Low cycle fatigue leading to failure on AISI 321 stainless steel as function of elevated temperature and straining frequency
18 p3219 A69-34834

Martensite transformation, C content and work hardening relations in stainless steels studied for magnetic detection of embrittlement during deformation
18 p3138 A69-35117

Liquid sodium penetration into stainless steel grain boundaries, using laser microprobe
18 p3154 A69-35473

Low temperature adhesive shear tests to measure force to break ice away from stainless steel surfaces coated with various bonded solid lubricants
19 p3323 A69-35581

Hydrogen effect on embrittlement of Cr-Ni stainless steel from viewpoint of corrosion cracking, using reverse bending apparatus
19 p3358 A69-35774

Stress corrosion cracking of stainless steels and Incoloy and Inconel alloys in chloride, caustic, oxygenated and miscellaneous environments
19 p3349 A69-36890

Fracture surfaces of stress corrosion cracks in Fe-Cr-Ni alloys studied by electron microfractography, noting cleavage fracture
19 p3350 A69-36891

Stress corrosion cracking in stainless steel foils correlated with stacking fault energy and ordering, emphasizing environmental forming tendencies
19 p3350 A69-36892

Apparent dynamic modulus and damping under multilevel loading during fatigue cycling to estimate stainless steel specimens cumulation fatigue lives
20 p3620 A69-36997

Stainless steel cladding of metals to combine desirable properties into composite, describing bonding, product types and treatment
21 p3745 A69-38937

Tungsten coatings applied on stainless steel and titanium alloy surfaces by plasma jet
21 p3746 A69-39152

Thermal fatigue combined with mean stress, reversed mechanical stress, low cycle fatigue and static creep in stainless steel
21 p3847 A69-39813

Outgassing rates of stainless steel and Al with different surface treatments, including glass bead shot blasting, electropolishing, baking and vacuum cleaning
22 p3958 A69-41215

High temperature vacuum treatment of thick stainless steel sheets reducing hydrogen content and outgassing
22 p3958 A69-41217

Cyclic stress tests of stainless steel fiber Al alloy matrix composite, including strain hardening and stiffness characteristics
24 p4331 A69-42925

STAINING

U BOUNDARY LAYER SEPARATION

STANDARD ATMOSPHERES U REFERENCE ATMOSPHERES

STANDARD DEVIATION

X Ray fluorescence of rock samples as applied to geological problems, noting standard deviations for elemental distribution
01 p0082 A69-10899

Standard deviation of wind direction fluctuations by simultaneous measurements of wind wave displacements and number of wind direction reversals
04 p0626 A69-14911

Frequency and space averaging effect on variability and standard deviation of multimode media transmission responses, with application to reverberant media
23 p4115 A69-41579

STANDARD LAUNCH VEHICLE 3

U ATLAS SLV-3 LAUNCH VEHICLE

STANDARD LAUNCH VEHICLES

U ATLAS SLV-3 LAUNCH VEHICLE

STANDARDIZATION

Emergency oxygen supply systems for aircraft, discussing simplicity, standardization, safety, reliability and maintenance
[AIAA PAPER 67-965]
01 p0013 A69-11025

Reliability terms for electrical apparatus, equipment and systems, indicating need for international standardization
08 p1292 A69-21108

Zero reference field for quiet day solar variations, considering magnetic field levels and errors
09 p1575 A69-21551

Photometric standardization and calibration of meteor spectrograms for real meteor masses determination using spectroscintometer
12 p2154 A69-25820

Standardization requirement for laboratory and field research into vibration effects on humans, stressing subjective rating and performance measurements
13 p2213 A69-28091

Zero reference field for quiet day solar variations, considering magnetic field levels and errors
16 p2851 A69-32546

Digital computers standard programs for astronomical problems
20 p3596 A69-37317

High quality castings unified standards for European aerospace industry
20 p3551 A69-38029

Thermal physiology standardized symbols compilation for units of measurement
23 p4078 A69-41317

Aerospace fastener systems standardization proposal to reduce inventories, simplify design and provide extended structural life
24 p4325 A69-43439

STANDARDS

NT FREQUENCY STANDARDS

NT REFERENCE ATMOSPHERES

Electrical conductivity standards and eddy current measurements noting calibration facility
01 p0081 A69-10830

Microwave thermal noise standards, discussing construction, calibration and errors for field operational liquid nitrogen cooled waveguide noise standard
02 p0210 A69-12438

Low temperature microwave thermal noise standard discussing waveguide termination, cryogenic cooling and temperature and pressure controls
02 p0211 A69-12446

Precision coaxial connectors, giving IEEE standard mechanical, electrical and environmental specifications for general precision connectors using coplanar butt joints
02 p0222 A69-12757

Standards of sterility for prevention of introduction of terrestrial microorganisms onto other planets during space missions, noting contamination probability
05 p0712 A69-15936

Dual gas reference electrode system for molten carbonate cells with immobilized electrolyte
05 p0706 A69-16237

Computer use evaluation, discussing standards for automatic data processing /ADP/ investment and operations
05 p0850 A69-16299

High accuracy microwave phase standard for calibration laboratories, discussing broadband differential phase shifter
06 p0896 A69-17487

Standards for EEG in pilot fitness examinations, analyzing effects of total flying hours
06 p0875 A69-18021

Aircraft separation standards, considering separate space for VTOL in automated high density airways system
[AIAA PAPER 69-210] 07 p1178 A69-19579

Photometric standard based on calibration of Vega by Hayes compared with six color magnitudes
09 p1603 A69-22233

Standard reference radiographs for weld defects on steel sheets and plates
18 p3150 A69-35425

Radio measurement methods and standards including measurements of attenuation, phase shift, time delay, impedance, field strength, antenna characteristics, RF properties of materials, etc
19 p3276 A69-36426

Nonferrous metals and alloys conductivity standards development program resulting in fabrication, calibration and certification of 16 primary reference standards
20 p3537 A69-37008

Minor planets positions computer calculated and tabulated from 1966 and 1967 Crimean astrophot observations, using Yale catalog reference stars
20 p3570 A69-37313

MIL-STD-781B reliability tests with standard based on exponential distribution for equipment exhibiting constant failure rate, noting sampling
20 p3551 A69-38289

Precision azimuth reference accuracy standards with confidence limits for gyrocompass evaluation, emphasizing astro and transfer angle repeatability
[AIAA PAPER 69-859] 21 p3725 A69-39387

Vacuum gage calibration standards and methods
23 p4162 A69-41530

Data systems coordinating standards developed from experience with STADAN, discussing operating environment and administrative decisions influence on implementation
23 p4133 A69-41769

IRIG /Inter-Range Instrumentation Group/ telemetry standards for U.S. Department of Defense missile and weapons systems, reviewing evolution, content, scope, philosophy, revisions, etc
23 p4121 A69-41770

Telemetry Standards Coordination Committee annual report
23 p4241 A69-41782

FAA power spectral gust methods for computing design limit loads on commercial aircraft, noting British investigation
24 p2553 A69-43111

STANDING WAVE RATIOS

Wideband tunnel diode amplifier design, discussing implementation to out-of-band circulator characteristics and VSWR suppression
15 p2578 A69-30804

Pseudoexact bandpass filter design, presenting graphs for passband loss, voltage standing wave ratio and time delay as function of frequency
15 p2581 A69-31526

Broadband low VSWR transitions between rectangular waveguides and coaxial transmission lines, discussing asymmetrical probe and ridge types
16 p2757 A69-31584

Voltage standing wave ratio measurement technique at low power level, including tolerated errors, compared with Roberts-von Hippel method
17 p2918 A69-33031

STANDING WAVES

Ministriations in frequency graphs as evidence of standing waves in electrically exploded iron wires
01 p0118 A69-10661

Standing Alfvén wave resonances in liquid sodium
01 p0131 A69-10820

Bragg reflection of electrons by standing light waves of giant pulse laser
02 p0255 A69-11833

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
02 p0292 A69-12555

Standing wave methods for measuring permittivities of liquids having attenuation coefficients over considerable range
04 p0599 A69-15015

Time averaged optical holographic interferometry of standing longitudinal acoustic waves in square cross section duct
06 p0923 A69-17150

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power
07 p1148 A69-18800

Transverse LF oscillations in geomagnetic field observed during January 1967, noting possibility of being second harmonic of magnetospheric standing Alfvén waves
07 p1124 A69-18835

Amplitude fluctuations and line width of traveling wave and standing wave He-Ne laser, considering saturation effects
10 p1701 A69-23135

Multiple scattering in Kapitza-Dirac effect describing electron scattering by standing electromagnetic wave, noting transition probability less than unity
11 p1919 A69-25323

Ruby laser performance with perturbing effect of standing wave field on homogeneity of deexcitation of level populations eliminated by HF modulation
11 p1900 A69-25569

Nonuniform standing wave fields spatial distribution in active rod of ruby laser effects on laser radiation dynamic parameters, discussing radiation spectrum width
11 p1901 A69-25756

Absorption characteristics of thin metallic films in standing light wave for mode selection and conversion in lasers
12 p2104 A69-26024

Standing wave theory for steady state performance of Raman laser oscillator extended for time variation of exciting laser pulse
12 p2108 A69-26634

Standing waves and single mode room temperature laser emission from electron beam pumped cadmium sulfide thin crystal, discussing emission at 77 K
12 p2109 A69-26639

Semifree elastic membranes standing waves fundamental frequency, developing variational principle for first eigenvalue
14 p2535 A69-29365

Standing ion-acoustic wave excitation in weakly ionized plasma, noting isothermal compression of electron gas
15 p2658 A69-30252

Short period pulsations in solar magnetic fields and chromosphere, determining optimum conditions for formation of standing oscillations
15 p2688 A69-30556

Electron scattering due to Kapitza-Dirac effect in laser standing wave field
15 p2634 A69-30736

Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix
16 p2798 A69-32480

Zonal flow intensity, velocity and kinetic energy of standing and traveling waves compared for Northern and Southern Hemispheres
17 p2997 A69-33392

ELF and VLF wave propagation examined for heavy ions and lower ionospheric disturbance effects using numerical integration, noting standing wave field role for interpretation
18 p3125 A69-34254

Vibrating circular plate standing wave lateral displacements visualization by photographically recorded moiré patterns
20 p3537 A69-37067

Acoustic filters performance determination, standing wave tube and anechoic termination methods
20 p3464 A69-37321

Standing waves on moon, discussing annular and radial structures of lunar craters and global tectonic patterns
20 p3604 A69-37565

Standing waves effect on spectral and power characteristics of laser with plane mirrors, determining dependence on pumping power
21 p3736 A69-38945

Standing waves in running tire shell wall, considering internal pressure, cross sections, wall thickness, cord angle, critical speed, etc
22 p4048 A69-41185

Hydrogen-air reaction kinetics analyzed using standing wave normal shock noting wall effects, ignition delay and recombination
23 p4239 A69-41893

Amplitude and phase maps for annual global variations in atmospheric pressure based on harmonic data analysis, suggesting standing wave type distributions
23 p4185 A69-42493

Numerical procedure obtaining scattering matrix of passive reciprocal two port from standing wave measurements, using image circle in Smith chart
24 p4281 A69-42617

STANDS

U SUPPORTS

STANNATES

Stannate immersion process for reduction of magnesium-steel couples galvanic corrosion, discussing bath operating limits
14 p2466 A69-29933

STANNIDES

U NIOBIUM STANNIDES

STANTON NUMBER

Heat transfer through turbulent boundary layer on porous plate with blowing and suction, determining Stanton numbers
04 p0586 A69-14356

Heat transfer in accelerated turbulent boundary layer between converging planes with varying wall temperature and decreasing Stanton number
[ASME PAPER 68-WA/HT-13] 05 p0847 A69-16120

Heat transfer to highly accelerated turbulent boundary layer with and without mass addition, presenting data in terms of Stanton number vs Reynolds number
[ASME PAPER 69-HT-53] 24 p4409 A69-43518

STAR CLUSTERS

NT VIRGO STAR CLUSTER

Age and initial helium abundance of stars in M15 globular clusters estimated from stellar evolution lifetime ratio
01 p0149 A69-10135

Late type stars, discussing main sequence for Population 1 and Population 2 stars and ages and chemical composition of old galactic clusters and globular clusters
01 p0158 A69-11325

N body systems with/without external field, noting galactic field effect on system flattening
02 p0322 A69-12270

Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
02 p0322 A69-12272

Evolutionary theory of origin and properties of Seyfert galaxies and quasars, postulating collisions within superdense clusters leading to supermassive stars and supernovas
05 p0819 A69-15703

Stellar escapes from clusters and temporary captures in restricted three body problem with equal masses
05 p0827 A69-16595

Stars of higher multiplicity, discussing numerical membership and gravitational binding of star clusters and binary stars
07 p1219 A69-19295

Photoelectric observations for stars in and near galactic cluster NGC 3680, discussing age and metal abundance
08 p1384 A69-20054

Three color photoelectric observations of stars near Orion Nebula, discussing gravitational contraction stars and color magnitude diagram
08 p1384 A69-20055

Paschen line intensity measured as function of position across Orion Nebula
08 p1384 A69-20058

Cluster star color indices determination by measuring intensities at nodes of extrafocal star spectra
08 p1387 A69-20122

Interlocking systems within Galaxy, deducing gravitational theory accounting for galactic spiral patterns
08 p1387 A69-20136

Open clusters age determination method to study giant star distribution as function of age
08 p1388 A69-20237

Color magnitude distribution as function of age for giant stars of open clusters, discussing error sources
08 p1388 A69-20238

Photographic magnitudes in UB_V system based on photoelectric sequences for stars in NGC 2483 and NGC 2489 open clusters, obtaining spectral classes from objective prism plates
08 p1388 A69-20239

Photographic magnitudes in UB_V system based on photoelectric sequence for stars in NGC 2546, Pi 1, NGC 2579 and Cr 185, obtaining spectral classes
08 p1388 A69-20240

Photographic magnitudes of stars in various open clusters based on UB_V system and photoelectric sequence
08 p1389 A69-20245

Photographic magnitudes in UB_V system for southern open clusters, giving table of photographic plates
08 p1389 A69-20253

Photographic magnitudes in UVB system based on photoelectric sequence for various open clusters stars, determining spectral classes for brighter stars
08 p1389 A69-20254

Mass loss in Red Giant stage from statistical analysis of H-R diagrams of galactic clusters
08 p1396 A69-20642

Stellar absolute magnitudes recalibration for consistency with photometric distance moduli of clusters
08 p1408 A69-21139

Galactic clusters absorption, discussing optical thickness in blue and red light
09 p1587 A69-21356

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems
09 p1589 A69-21368

Pleiades cluster structure, deriving visible density distribution curves for brighter stars
09 p1589 A69-21369

Radial velocities of stars near cluster NGC 7380, discussing discovered stars, double lined spectroscopic binaries and photometric information
09 p1597 A69-22060

Globular cluster origin as gravitationally bound gas clouds before galaxy formation from primeval fireball model
09 p1599 A69-22192

Spectrum analysis for early B type star Barnard 29 in M13 globular cluster
09 p1599 A69-22193

Spectral type and rotational velocity estimation for 83 stars near double cluster in Perseus, emphasizing Be stars
09 p1599 A69-22195

Stability of thin rotating disks of stars with respect to axisymmetric disturbances, noting overstabilities dependence on epicycles sizes
09 p1605 A69-22413

Solid hydrogen mantle condensation accounting for lack of detectable alpha hydrogen in star clusters and OB associations
10 p1776 A69-23214

Stellar models for chemical compositions to explain gap above main sequence in color-magnitude diagram of NGC 188
10 p1789 A69-24127

Dynamical model for spherical inhomogeneity in mean mass density of universe to predict velocity dispersion observed for Coma Cluster
10 p1789 A69-24133

Flare stars observational and known aggregate characteristics in Coal Sack region
10 p1790 A69-24141

Star counts in star cluster neighborhoods, obtaining ratios of corona radius to nucleus radius as function of cluster mass
11 p1951 A69-24246

Photoelectric and photographic observations in UVB system of open star clusters, analyzing dispersion in two color diagrams, noting absorbing material structure
11 p1951 A69-24247

Proper motions of low luminosity stars in Hyades cluster, noting photoelectric observations
12 p2152 A69-25797

Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
12 p2153 A69-25813

Period changes by variable stars in M13, showing Variable 2 period lengthening
12 p2154 A69-25814

Stellar evolution model for primeval He abundance in population II stars in globular clusters for big bang confirmation
12 p2156 A69-26228

Photoelectric observation of RR Lyrae stars in globular clusters to estimate reddening near galactic poles, considering color indices
12 p2172 A69-27157

Distance and mass-luminosity relation for Hyades stars relative to sun-Sirius type stars
13 p2339 A69-27565

Optical wavelength backscattering functions for nebulae in Pleiades cluster, noting color differences and surface brightness
13 p2340 A69-27577

Residual interstellar gas from protostar formation detected as high luminosity IR object
13 p2327 A69-27593

Photoelectric search for delta Scuti variables in Coma and NGC 752 clusters, discussing short period variability of B, A and F stars
13 p2343 A69-27620

Parallax and orbital motion of spectroscopic binary Tau Persei determined from Sproul refractor photographs
13 p2349 A69-27812

H-R diagrams of globular clusters, discussing evolution models with and without mass loss
14 p2527 A69-29943

Surface convection zone in atmospheres of global cluster and halo B stars determined to study He depletion efficiency
14 p2529 A69-29976

Mass point system moving in gravitational field, discussing statistical mechanics, relaxation time and evolution of stellar systems
14 p2530 A69-29987

Variability of period of RR Lyrae type stars in globular cluster M3, deriving seasonal moments of stellar maxima and light curve elements
15 p2683 A69-30511

Member stars number in globular clusters M3 and M5 determined from photometric and kinematic characteristics
15 p2688 A69-30561

Collisionless stability of relativistic, spherically symmetric star clusters against radial perturbations, considering one dimensional sufficient criteria
15 p2691 A69-30765

Atmospheric parameters for blue horizontal branch stars in globular cluster NGC 6397 by spectroscopic and photoelectric observations, obtaining mean stellar mass
15 p2692 A69-30770

Spectral classifications and UVB photometry for southern association Sco OB 1 containing cluster NGC 6231
15 p2692 A69-30771

Stellar group Ba 6 distance measured using three color photometry in RGU system
16 p2854 A69-31650

Open galactic cluster NGC 2254 distance determined by three color photometry in RGU system
16 p2854 A69-31651

Stellar diameters in galactic cluster stars determined using original and modified spectrophotometric method compared with spectral types BOV-FOV
16 p2858 A69-32210

Spatial distribution of stellar densities and velocity distributions in phase space, using Greenwich catalog of positions and proper motions of omega Centauri cluster stars
16 p2859 A69-32220

Four color and H beta photometry of stars in Coma and Ursa Major clusters compared to standard relations for Hyades Cluster
16 p2860 A69-32234

Galaxies clusters spatial distribution based on crude distance estimates, discussing serial correlation of counts and interpreting results
16 p2862 A69-32371

Stellar system stability for corresponding stable barotropic gaseous system, discussing Schroedinger operator role
16 p2862 A69-32374

Stationary galaxy dynamical theory, assuming constant velocity body of physically homogeneous star subsystems in space
17 p3031 A69-33102

Proper motions, color magnitude and distance modulus of stars in galactic cluster in direction of Large Magellanic Cloud using Cape wide angle photometry
17 p3034 A69-33411

Theoretical Hertzsprung-Russell diagram for star cluster NGC 1866, allowing stellar evolution study
17 p3038 A69-33720

Stars kinetic energy and escape rates from isolated cluster with arbitrary stellar mass distributions, assuming spherical symmetry and velocity distribution isotropy
17 p3038 A69-33721

UVB photoelectric investigation on southern globular clusters NGC 2808 and 1851, presenting star magnitudes and colors in tabular form and estimating reddening
18 p3190 A69-34290

Galactic clusters absorption, discussing optical thickness in blue and red light
18 p3197 A69-34746

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems
18 p3198 A69-34757

Pleiades cluster structure, deriving visible density distribution curves for brighter stars
18 p3198 A69-34758

UVB photoelectric observation of OB and open cluster Tr 16 stars in Carina-Centaurus, suggesting no limit in depth distribution
18 p3200 A69-35133

Fornax clusters integrated V magnitudes and B-V and U-B colors measurement
18 p3201 A69-35205

Radio emission attributed to galactic nebula NGC 6857, suggesting origin in high density H II regions excited by OB star clusters
18 p3202 A69-35209

Pulsars measured parameter data tabulation including right ascension, declination pulse repetition period, showing sources distribution and clusters
18 p3202 A69-35211

Book on Messier nebulae and star clusters covering current astronomical ideas, star maps, identification diagrams, telescope illustrations and astronomical data
18 p3206 A69-35471

IC 4499 cluster variable stars coordinates in tabular form, showing high percentage of short period
20 p3598 A69-37462

Open cluster NGC 7128 distance and reddening determination by photometry
20 p3598 A69-37465

Periods and magnitudes of RR Lyrae variable stars in M 2 cluster, tabulating photometric characteristics
20 p3599 A69-37477

Cepheid observation, nature and evolution
21 p3795 A69-38403

Statistical analysis of galactic structures subject to Newton gravitation covering globular clusters and spiral disk and rotating bar galaxies
21 p3803 A69-38924

Relativistic star clusters, discussing existence and quasi-static evolution before collapse through gravitational radius
21 p3814 A69-39570

Spectrophotometric analysis of interstellar absorption in direction of IC 1805 cluster, noting anomalies
21 p3814 A69-39576

Pleiades cluster and ambient interstellar medium structure analyzed for spectral distribution based on plane-parallel scattering model
21 p3817 A69-39727

Nonexistence of second order clustering of galaxies and relationship to gravitational cut-off, relativistic cosmologies and red shifted light by exponential decay of photon energy
22 p4024 A69-40579

Globular cluster star age and initial He abundance from main sequence, horizontal branch and red giant tip models using radiative opacities
22 p4035 A69-41205

Solar motions respecting high velocity atomic hydrogen clouds and local stellar group
22 p4035 A69-41209

Wolf-Rayet stars formation, evolution, age, galactic distribution and relation with open star clusters
23 p4208 A69-41288

Faint OB stars data tabulation between Carina and Centaurus, noting open clusters and MK classification
23 p4211 A69-41488

UVB magnitudes for open cluster NGC 559 stars determined from combined photoelectric and photographic measurements
23 p4211 A69-41490

Photographic observations of open cluster IC 4665 made on blue and yellow sensitive plates with Vatican refractor compared with photometric measurements
23 p4215 A69-42008

Narrow and intermediate band photometry of globular star clusters in uvby and beta photometric systems, relating reddening to metal abundances of member stars
24 p4387 A69-43352

STAR DISTRIBUTION

Stars of higher multiplicity, discussing numerical membership and gravitational binding of star clusters and binary stars
07 p1219 A69-19295

Galactic Wolf-Rayet star distances and distribution on galactic plane, noting concentration difference toward galactic center
07 p1223 A69-19636

Three color RGU system photometry in Milky Way field in direction of anticentrum, determining absolute brightness, luminosity and density of stars
08 p1387 A69-20119

Open clusters age determination method to study giant star distribution as function of age
08 p1388 A69-20237

Color magnitude distribution as function of age for giant stars of open clusters, discussing error sources

08 p1388 A69-20238

Color excesses in Kapteyn Selected Area 4 using photovisual /yellow/ and photographic /blue/ magnitudes from catalog data

08 p1388 A69-20241

Spatial distribution of stars and obscuring matter in Milky Way field in Kapteyn Selected Area 195 in Circinus, cataloging UVB photometry of stars

08 p1389 A69-20246

Photoelectric measurements of magnitudes and colors in UB system for stars in Puppis at Boyden Observatory

08 p1389 A69-20249

Sky areas search for stars with UV excesses listed in Luyten Two-Tenths Catalog of Proper Motions

08 p1392 A69-20560

Formation ratios of light isotopes in spallation reactions compared to observed stellar and solar abundances of lithium, beryllium and boron, discussing astrophysical implications

08 p1401 A69-20902

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems

09 p1589 A69-21368

Pleiades cluster structure, deriving visible density distribution curves for brighter stars

09 p1589 A69-21369

Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas

09 p1589 A69-21371

Stars astronomical positions elimination from photographic plates because of errors, discussing elimination criteria and picture taking method

10 p1784 A69-24034

Density wave theory of galactic spirals, discussing hydrogen distribution, young star distribution, stellar migration, magnetic field structure, density waves in stellar formation, etc

10 p1786 A69-24109

Proper motions and positions of X ray source Sco X-1 and surrounding stars derived from astrophysical plates using overlap technique

12 p2152 A69-25798

Correlation of stellar surface density distribution of young stars and neutral hydrogen gas in Small Magellanic Cloud

12 p2152 A69-25802

Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas

12 p2153 A69-25813

Spacecraft orientation from onboard stellar photographs, calculating absolute and relative elements, accuracy and camera parameters

13 p2296 A69-27696

Positions, spectral types and B magnitudes for possible field horizontal-branch stars at high galactic latitudes, selected from faint A star list

13 p2348 A69-27807

Cepheid variable 1 Carinae position in H-R diagram suggested from microturbulent velocity role in pulsational instability

14 p2522 A69-29590

Interstellar absorption and spatial distribution in northern Aquila with absence of early O-B2 stars, including luminosity function

15 p2683 A69-30513

Milky Way structure, discussing dust bridge and density of absorbing matter between spiral arms of Sagittarius and Carina Cygnus

15 p2683 A69-30514

Member stars number in globular clusters M3 and M5 determined from photometric and kinematic characteristics

15 p2688 A69-30561

Star chains around Eta Carinae, discussing nonrandom real groupings and probability criteria using ADH red sensitive plate without filter

16 p2856 A69-31931

Spatial distribution of stellar densities and velocity distributions in phase space, using Greenwich catalog of positions and proper motions of omega Centauri cluster stars

16 p2859 A69-32220

Giant galaxy classified in terms of stellar population, discussing Orion, intermediate amorphous and combination categories

16 p2862 A69-32395

Southern Milky Way spectral survey for selection, classification and photometry of interesting objects

17 p3031 A69-33101

BCD classification for cepheids, discussing /sigma/ surface definition, locus of normal stars of population I and interstellar reddening

17 p3038 A69-33725

Pulsars properties and distribution in galactic coordinates, deriving interstellar medium properties and physical nature of objects based on neutron star rotation

17 p3040 A69-33800

Dwarf elliptical galaxies of local group, discussing star distribution and orbits, formation process, origin and distribution about Milky Way

18 p3194 A69-34424

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems

18 p3198 A69-34757

Pleiades cluster structure, deriving visible density distribution curves for brighter stars

18 p3198 A69-34758

Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas

18 p3198 A69-34760

UBV photoelectric observation of OB and open cluster Tr 16 stars in Carina-Centaurus, suggesting no limit in depth distribution

18 p3200 A69-35133

Pulsars measured parameter data tabulation including right ascension, declination pulse repetition period, showing sources distribution and clusters

18 p3202 A69-35211

Stellar populations in Milky Way galaxy, considering stellar motions, spectroscopy, spatial distribution and galactic dynamics

18 p3202 A69-35284

Star counts in Ophiuchus nebula darkened region /Scorpius-Ophiuchus/ and in comparison fields Corona Australis and Sagittarius

20 p3604 A69-37788

Luminosity calibration for subluminescent stars and space density of blue subluminescent stars south of declination minus 45 degrees based on white dwarfs and binaries

20 p3612 A69-38160

Stars of spectral class F 2 and earlier, brighter than magnitude 11.5, found in four regions of intermediate galactic latitude

20 p3612 A69-38162

Automatic instrument for star detection and azimuth derivation, scanning nighttime zenith star field [AIAA PAPER 69-861]

21 p3762 A69-39389

Resonant asteroids in statistically underpopulated Kirkwood gaps, noting oscillating mean motion distribution

22 p4013 A69-40122

Book on radial velocities and distances in southern Milky Way stellar fields, covering statistical study of star motions in Galaxy, instrumentation, procedures, etc

22 p4020 A69-40317

Wolf-Rayet stars formation, evolution, age, galactic distribution and relation with open star clusters

23 p4208 A69-41288

Absolute magnitude dispersion of galactic cluster brightest members as normally distributed random variable independent of cluster richness or faint members luminosity

23 p4215 A69-42113

Galactic evolution using concept of stellar populations and correlation with metal and He abundances

23 p4218 A69-42323

Elements origin and development in universe, discussing energy generation, structure and population of stars in Galaxy

24 p4386 A69-43335

STAR TRACKERS

Working breadboard model of planet tracker under various illuminating conditions, discussing hardware and closed loop tracking error analysis accounting for signal to noise effects

03 p0463 A69-13214

Stellar identification system using onboard sighting equipment and computer mathematical methods

08 p1347 A69-20657

Tacite rocket probe to study space IR radiation, using passive stellar sensor for recording reference stars positions to recalibrate gyroscope kinetic motion for attitude restoration [ONERA-TP-731]

17 p3001 A69-33220

Star magnitude variation caused by earth atmosphere related by equation to star altitude, station height, sensor response, spectral radiance, etc

18 p3168 A69-34814

Automatic celestial navigation, discussing star trackers design, mathematics of celestial fix and relationship to errors and physical and environmental constraints

18 p3169 A69-34852

Star/horizon measurements for onboard spacecraft navigation without cloud cover obscuration, discussing sightings, data processing and evaluation

19 p3369 A69-35800

Automatic instrument for star detection and azimuth derivation, scanning nighttime zenith star field [AIAA PAPER 69-861]

21 p3762 A69-39389

Satellite attitude estimation from onboard telescope celestial sightings using iterative least squares method, considering measurement error noise and axes wobble

24 p4348 A69-43244

STARCHES

Dynamic differential thermal analysis with He flow performed on biological specimens, proteins and starches, showing discrete decomposition peaks monitoring pyrolysis process

16 p2747 A69-31807

STARFIGHTER AIRCRAFT

U F-104 AIRCRAFT

STARK EFFECT

Europium complexes high resolution emission spectra in relation to molecular configuration

01 p0024 A69-10893

Stark effect meter for electric field measurement in space, discussing absorption cell development

03 p0429 A69-13222

Charged particle density of unsteady plasma from Stark broadening of Balmer H beta line, using time scanning image converter

03 p0481 A69-14145

High temperature measurement based on spectral line displacement and broadening due to Stark effect, noting diagrams for O, Na, Mg, Al and Si at various temperatures

03 p0481 A69-14146

He-Ne and He-Xe laser lines in IR tuned by axial magnetic field, observing Stark patterns of organic molecules [IEEE PAPER C-5]

07 p1150 A69-19050

Helium I line profiles including forbidden component, discussing electron and ion Stark broadening and thermal Doppler broadening

09 p1601 A69-22209

Stark broadening of Balmer H alpha, H beta, H gamma and H delta lines in plasma region in strong magnetic fields

09 p1542 A69-22248

Degeneracy of hydrogenic states to sum S-matrix in Stark broadening calculations

09 p1543 A69-22405

Trivalent rare earth ions Stark structure based on spectroscopic observations of stimulated transitions in lasers

10 p1701 A69-23129

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations

11 p1955 A69-24389

Charged particle concentration near electrodes in high current pulsed discharge with separated flames at atmospheric pressure determined by measuring quadratic Stark effect

11 p1927 A69-25219

Electron concentrations in steady Ar and Ar-He plasma jets measured with microwave Fabry-Perot interferometer and Stark broadening of H beta line

12 p2137 A69-26537

Ultimate resolvable line dependence of Balmer series on electron density, considering line broadened by Stark and Doppler effects

13 p2351 A69-27865

Polychromator measurement of hydrogen plasma electron density produced by normal ionizing shock wave, using Stark broadening study of H beta line

14 p2494 A69-29767

Stark effect applicability to charged particle concentration in nonstationary plasma

14 p2497 A69-29790

Time resolved Stark broadened spectral profiles for Na I 5682-88 A and 4978-82 A lines of plasma, comparing electron densities

15 p2656 A69-31155

Stark broadened H gamma profile, considering effect of strong collisions in electron perturbation and electron impact broadening of lower levels

20 p3579 A69-37305

Stark broadening of H-gamma for electron density measurement in plasma, noting temperature range

22 p3985 A69-40664

Electron and ion Stark broadening of allowed and forbidden, triplet and singlet transitions in neutral He at low electron densities, noting Doppler broadening
22 p3985 A69-40665

Classical path approximation in line broadening theory to derive impact and one-electron theories, with application to Stark broadening of Lyman series in hydrogen
23 p4193 A69-41379

Rotational spectra of methylchlorodiazirine at room and dry ice temperature, using K band and Stark effect spectrometers
23 p4194 A69-42207

Hydrogen balmer lines broadening by Stark and Doppler effects, finding prominences and chromosphere electron concentrations
24 p4390 A69-43779

NT ZETA AURIGAE STAR

Eight color narrow band photometry of bright stars, discussing band system, instrumentation, data and calibration
02 p0313 A69-11487

Catalog of meridian program star observations made in Brorfelde, determining position relative to FK 4 stars by using impersonal photographic micrometer
02 p0315 A69-11815

Chemical composition of diffuse Orion Nebula and stars compared for lighter elements, considering solar system formation from interstellar medium
08 p1402 A69-20908

Angular momenta of stars, planets and asteroids, plot log of angular momentum per unit mass against log of mass of astronomical object
09 p1608 A69-22716

Faint blue objects in intermediate to high galactic latitudes, summarizing results of UVB photoelectric photometry
10 p1788 A69-24123

Spectroscopy and star classification on basis of spectra
12 p2155 A69-26122

Azimuth error from observations of circumpolar stars at greatest elongation using transit instrument
17 p3028 A69-32878

13 color narrow band photometry of 1000 bright stars in tubular form, discussing sample points, Balmer discontinuity, absolute energy calibration, etc
17 p3038 A69-33692

STARTERS

U ENGINE STARTERS

STARTING

Starting process in nozzle with one dimensional flow treated numerically by finite difference method using pseudoviscosity term
22 p3860 A69-40926

STATE EQUATIONS

U EQUATIONS OF STATE

STATE VECTORS

Linear filter performance degradation due to modeling error in estimate of state vector of stochastic linear dynamic systems
02 p0225 A69-11971

Optimal control of linear systems with state variables generated by linear feedback from output variables, considering time variance
06 p0903 A69-17406

Absolute stability of dynamic control systems with single nonlinear element function of two feedback state variables, giving sufficient conditions
06 p0905 A69-17948

Inertial navigation systems error analysis based on method of state variables
11 p1914 A69-25434

Optimization problem with bounded state variable, noting conditions on trajectories and relations for co-state vector at connecting or branching point
12 p2050 A69-26087

Lumped linear system state estimation with optimal linear smoothing instead of filtering, noting smoothing lag and variance
12 p2122 A69-26524

Equatorial moderately elliptical satellite orbit perturbations calculated in local invariants, assuming state vector dependence of acceleration
17 p3039 A69-33796

STATIC AERODYNAMIC CHARACTERISTICS

AZUR satellite structural development static and dynamic considerations, discussing center of gravity, notching technique and test results
12 p2187 A69-26876

STATIC DEFORMATION

Thermodynamic foundations of permanent deformation theory, noting parallel to viscoelastic material theory
02 p0350 A69-11714

Bar flexure determination for Saint Venant torsional and transverse loading, solving differential equations by finite element methods
09 p1614 A69-21722

Nonlinear programming for calculating static and kinematic failure of one dimensional structures by extending results from linear programming
14 p2418 A69-29597

Potential functions applications to three dimensional static elasticity problems of parallelepipeds, using general stress solution
15 p2715 A69-31216

Krylov functions determined by distribution theory and operational calculus, discussing deformations and statics of straight beams
15 p2715 A69-31475

Vibration properties of cantilever parallelogram box beam, using existing static deformation equations under large aspect ratio condition
21 p3846 A69-39803

Strain diagram with piecewise nonlinear curve for statically indeterminate systems stressed beyond elastic limit
24 p4400 A69-43072

STATIC ELECTRICITY

Electrostatic field strength and conductivity dependence of expansion and contraction of space charge cloud in process of discharging during static electrification
06 p0959 A69-18219

Signal propagation in channel subject to static investigated using Fokker-Planck type equation in statistical mechanics methods
16 p2753 A69-32437

Atmospheric ozone production by silent discharges near ground level during first stage of storm cell development
16 p2785 A69-32623

Electrical failures in aircraft due to static electrification of electrically heated windscreens, noting materials for reducing surface resistivity
19 p3256 A69-36769

Spark gap protection of input transistors in radio receivers against antenna-collected static charge damage
21 p3681 A69-38395

STATIC FIRING

Mississippi Test Facility (MTF) hardware data acquisition system error analysis from extensive simulated static firing tests
10 p1673 A69-23287

Ablative materials for solid rocket nozzles, discussing static firing tests, rating system, equipment design and cost reduction
19 p3357 A69-35537

Solid rocket motor static firing tests in low pressure environment, presenting data concerning vacuum chamber pressure, diffusers pressure distribution, chamber wall temperature distribution, etc
22 p4000 A69-40593

Solid rocket motors failure during static firing, discussing sequence of events
24 p4365 A69-43260

STATIC FRICTION

Stiction friction on magnetic tape and contact surfaces noting effect of binders, plasticizers, humidity and temperature
19 p3312 A69-36285

Film thickness and normal load effect in thin film solid friction, noting dependence on deformation at contact
22 p3955 A69-40400

STATIC INVERTERS

Airborne static inverter, called Digital Inverter, for conversion of DC to AC, single phase and/or three phase, noting precise frequency control
11 p1824 A69-24499

Modularized static AC and DC inverters and converters for aerospace electrical power conditioning systems, discussing circuit functions and performance tests
23 p4073 A69-42291

STATIC LOADS

Stability of ductility and fatigue strength of stainless steel under longtime static loads in vacuum and in liquid lithium
03 p0450 A69-13912

Effective slip systems in hexagonal close packed magnesium alloy under static and hydroexplosive loading, examining flow mechanism for fine structure formation
04 p0615 A69-146390

Reciprocity theorem applied to Somigliana relations for static loads and coupled thermoelasticity
09 p1618 A69-222604

Aluminum alloy thin sheets with central transverse fatigue cracks subjected to increasing static loads to fracture, investigating crack tip deformation
10 p1709 A69-230566

Subregions method in coupled thermoelasticity, discussing numerical values for thin steel circular disk
11 p1970 A69-246066

Energy dissipation in freely oscillating bodies under static stresses described by differential equation, assuming elliptical hysteresis loop
11 p1919 A69-250922

Energy dissipation and fatigue in metals under cyclic static loads, determining logarithmic decrements of vibrations and Bauschinger effect
12 p2181 A69-266122

Complex two layered shell of revolution under static and dynamic asymmetric loads analyzed using SABOR/DRASTIC computer codes
12 p2184 A69-268111

Fatigue cracks growth rate under combined static and cyclic stresses
15 p2709 A69-30808

Repeated static stress limit of internal pressure vessels, emphasizing effect of redistribution of stresses and strains
15 p2712 A69-30973

Plastic expansion in metals due to alternating torsional and static tensile loading
16 p2875 A69-32291

Static tensile stresses effect on energy dissipation in alloys used in compressor blades found dependent on composition and heat treatment
17 p2991 A69-33934

Laminated critical rate dampers consisting of ring shaped thin corrugated steel plates inserted between bearing and rotor, showing dependence on static load
17 p3066 A69-33945

Lunar surface bulk density determined from laboratory and spacecraft measurements of static bearing capacity as functions of depth and solids percentage
18 p3193 A69-34366

Load capacities of graphite lined journal bearings, discussing factors affecting wear rates
18 p3148 A69-35002

Reinforced plastics static fatigue strength under various loads including thin walled tubes long term tests under constant internal pressure
18 p3162 A69-35353

Plastic deformation in hardened Ti alloys with thermally unstable beta phase under static compression and tensile loads by electron microscope
21 p3746 A69-39161

Stress distribution on surface of stator vane loaded statically as cantilever derived by brittle coatings, strain gages and three dimensional photoelasticity
22 p4042 A69-40310

Summation methods for multiple damages caused by static fatigue in glass fiber reinforced plastics under stepwise loads
22 p3974 A69-40748

Plastic deformation by uniaxial tension during transition from dynamic to static loading from microscopic and macroscopic standpoint, noting slip lines
22 p4047 A69-41081

Solid solutions precipitation effect during deformation process on static and dynamic tensile tests of Al alloy by electric resistance measurement
22 p3972 A69-41082

Stress analysis of cylindrical tubes under torsional and transverse static loads based on vibrational theory, applied to rectangular cantilever tube
23 p4228 A69-41916

Mathematical method of processing test data air-frame panels subjected to repeated static loads to obtain lifetime equations and statistical characteristics
24 p4400 A69-43086

Total load factor static vertical component and lubricant flow rate square related to pocketed hydrostatic journal bearing revolutions
24 p4321 A69-43091

Static and cyclic tensile fatigue of alumina by ring test method, measuring time to failure
24 p4334 A69-43343

Deferred rupture as function of applied load noting test methods
24 p4407 A69-43801

STATIC PRESSURE
NT HYDROSTATIC PRESSURE

Axially symmetric bodies shape for static pressure at location independent of Mach number
04 p0542 A69-14738

Static pressures, profiles of local longitudinal velocity, fluctuating wall pressures and power spectra of wall pressures measured for subsonic turbulent flow [ASME PAPER 68-WA/FE-36]
05 p0750 A69-16109

Vortex incompressible flow in thin cylindrical chamber, analyzing outer and inner region and interface tangential velocity, shear and static pressures
10 p1679 A69-23557

Static pressure measurements at surface of sharp plate in supersonic flow during gas/liquid jet injection
11 p1821 A69-25479

Static pressure distribution induced by statistically roughened duct walls on supersonic stream
15 p2593 A69-31148

Monograph on static pressure and turbulence in free jets and jet flames covering radial velocity oscillations with and without chemical reactions, confined jets turbulence, etc
15 p2719 A69-31190

Static and dynamic characteristics of pressure compensated oil-hydraulic flow control valves and relief valves with emphasis on linearized effects
19 p3256 A69-36713

Axial velocity and static pressure for incompressible fluid flow through straight smooth porous tube [ASME PAPER 69-FE-44]
20 p3517 A69-38000

STATIC STABILITY
NT DIMENSIONAL STABILITY
NT SHELL STABILITY
NT STRUCTURAL STABILITY

Variational principles of dynamic shell theory using Legendre transform for relations and boundary conditions of Timoshenko theory
01 p0166 A69-10262

Multiple configuration analysis of structures systematically predicting static and dynamic response of structures of single configuration class
01 p0169 A69-10639

Phase plane diagram utility in toppling stability analysis of spacecraft, emphasizing numerical integration time reduction
02 p0334 A69-12376

Universal solution for static and dynamic response of structural components by method of initial parameters
03 p0527 A69-13746

Static stability of three dimensional elastic bodies under subcritical strains, noting application to stability of cylindrical shells and rods
05 p0834 A69-15784

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers [AIAA PAPER 69-133]
06 p0862 A69-18050

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations [AIAA PAPER 69-89]
06 p1028 A69-18133

Refractory compounds static strength temperature dependence at high temperatures measured in reference to melting temperature
09 p1523 A69-21873

Static characteristics of transistors dependence on current carriers surface recombination in inactive base region, noting strong electric field influence
09 p1464 A69-22287

Blood vessel model in form of cylindrical shell filled with liquid for studying cardiovascular system dynamic and static problems
12 p2018 A69-25989

Wind tunnel tests for static stability of Black Brant 4 vehicle second stage with flare and two fin flare combinations at supersonic speed
17 p2948 A69-34212

Soviet book on hydraulic servo drive covering design and performance, static and dynamic characteristics and stability problems
18 p3093 A69-34356

Two dimensional elastoplastic problems in static condition, discussing analytical, variational and finite difference methods
18 p3217 A69-34594

Static stability of three dimensional elastic bodies under subcritical strains, noting application to stability of cylindrical shells and rods
18 p3223 A69-35036

Static dynamic and damage tolerant strengths of advanced materials for VTOL aircraft with emphasis on Ti, cryoformed 301 stainless steels and filamentary composites [AIAA PAPER 69-764]
19 p3433 A69-35658

Cirrus cloud height above sea level and shape correlation with lower section static stability determined by stereophotogrammetric measurements
20 p3570 A69-37349

Static and fatigue strength of end-closed filament-wound vessels under internal pressure
21 p3846 A69-39797

Three dimensional welded structure of thin walled girders with stability loss, discussing welding strain gage measurements and simplified computational procedure
23 p4169 A69-42007

Static mechanical strength of syntactic foam tested by generating failure conditions based on combined biaxial and triaxial stress [ASME PAPER 69-APMW-24]
24 p4336 A69-43095

STATIC TESTS

Uniaxial strain static and gas gun compression tests result compared for syntactic foam
02 p0345 A69-12295

Large convective clouds in superheated air generated by static tests of Saturn 5 first stage
03 p0462 A69-14125

Static structure ground test for Saturn-Apollo vehicle short stack, describing air pressure simulation, data acquisition and readout systems
15 p2589 A69-31079

Automatic multichannel system for turbine blades static tests, discussing operation principles, component sections, programmed tape and vibration modes
15 p2672 A69-31209

Static, transient and in-space environmental tests at satellite structures and heat shield test facilities in Italy
16 p2765 A69-31750

STATICS

NT ELECTROSTATICS
NT HYDROSTATICS
NT MAGNETOHYDROSTATICS

Asymmetically loaded systems composed of shells of revolution, developing digital computer algorithm for solution of statics problems
05 p0840 A69-16201

Book on statics of thin walled shells of revolution covering stress-strain analysis for geometrical shapes
10 p1800 A69-23197

Book on solution of linear ordinary differential equations and simultaneous systems using bar statics-equivalent beam method
15 p2711 A69-30929

Matrix formulation for discrete element method applied to linear static and eigenvalue problems of thin walled segments, using homogeneous differential equations
19 p3445 A69-36831

Soviet collection of papers on static and dynamic problems in elasticity and plasticity theory covering plates, shells, beams, etc
22 p4038 A69-39911

STATIONARY ORBITS

Maritime radio communications satellite service for ship safety, discussing stationary equatorial satellite systems [AIAA PAPER 68-232]
02 p0356 A69-12383

Perturbations of stationary orbital vehicles of arbitrary latitude due to earth triaxiality, noting control by low thrust rocket engine
05 p0823 A69-16037

Dioscures system for international air traffic control and navigation over North Atlantic by means of two geostationary satellites [UN PAPER 68-95832]
06 p0954 A69-17063

Project Symphonie, discussing stationary communication satellite, coverage, frequencies and characteristics
06 p0886 A69-17072

Stable stationary positions for spacecraft determined by formulating variational equations for perturbing effects of earth triaxiality
06 p1006 A69-17565

Synchronous orbit attainment with continuous electric propulsion, noting payload ratio dependence on various parameters and changing orbit inclination [AIAA PAPER 69-275]
09 p1586 A69-21265

Ionic propulsion application to geostationary satellite attitude correction
10 p1753 A69-23841

European geostationary satellite orbit inclination and eccentricity modification for maximum observation time of Northern Hemisphere by high resolution IR radiometer
15 p2650 A69-31389

Ion propulsion applied to geostationary satellites attitude control, discussing thrust levels, cesium ionization, colloidal propulsion, etc
16 p2837 A69-32068

Geostationary satellite orbit used for communication satellites, noting ultimate limit of channels as related to separation angles between satellites
21 p3673 A69-38757

Satellite communication system capacity for segment of geostationary orbit extended to models involving two angular dimensions
23 p4131 A69-42521

STATIONKEEPING

Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite [AIAA PAPER 67-723]
02 p0305 A69-12375

Ammonia resistojet stationkeeping subsystem on-board ATS 4 satellite, noting flight test data agreement with ground tests [AIAA PAPER 69-296]
09 p1560 A69-21212

Feasibility of automatic stationkeeping for synchronous satellites by using solar sailing techniques and low thrust systems [AAS PAPER 68-151]
19 p3429 A69-35950

Stationkeeping motion effect on synchronous satellite orbit determination accuracy analyzed by two dimensional model, finding position uncertainty
20 p3595 A69-37218

Automatic stationkeeping /geosynchronization/ for maintaining satellite in circular synchronous orbit at all geocentric longitudes for prolonged time with low fuel consumption
21 p3805 A69-39213

Optimal control stationkeeping for maintaining space probe stability around collinear points in three body problem [AIAA PAPER 69-906]
21 p3807 A69-39338

Orbital results for Automatic Orbit Control System of Lincoln Experimental Satellite LES 6, using pulsed plasma microthrusters and self contained orbit measurement and control methods [AIAA PAPER 69-934]
21 p3824 A69-39428

Impulsive velocity correction determination method for precise stationkeeping of stationary satellite, discussing perturbations [AIAA PAPER 68-456]
21 p3817 A69-39757

High altitude balloon stationkeeping system combining battery powered propeller and drag chute
22 p3866 A69-40941

 NT WEIBULL DENSITY FUNCTIONS

Statistical equilibrium equations solution for thermodynamic equilibrium variations of populations of very high energy levels in hydrogen and complex atoms
 01 p0150 A69-10395

Optimal predictor design by comparison of statistical input models, measuring signal filter performance by root-mean-squared errors
 01 p0043 A69-10558

Statistical band model and line by line calculations of transmittance for IR bands in absorption spectra of ozone and water vapor
 [AFCR-68-0505] 01 p0124 A69-10919

Gross behavior patterns of intense sporadic E including seasonal, diurnal and geographic variations and latitudinal and longitudinal effects
 01 p0070 A69-11157

Euler-Lagrange relationship from equations of motion of tagged particle in turbulent velocity field consisting of random dispersive waves
 01 p0121 A69-11202

Integral and sigma pulse frequency modulation effects on white noise, analyzing autocorrelation and spectral density functions of PFM system output
 01 p0034 A69-11221

Statistical analysis of polarization of semiinfinite electron/ion plasma bounded by dielectric or conducting solid wall, deriving steady state and space potential
 02 p0286 A69-11706

Statistical analysis of polarization of two component nonisothermal electron-ion Coulomb gas plasma containing microfluctuations
 02 p0286 A69-11707

Dissociation and recombination of moderately complex molecules, using master equation with transition probabilities and decay rates obtained from reaction rates statistical theory
 02 p0283 A69-12181

Statistical characteristics of random phase quasi-harmonic process investigated for application of mathematical representation
 02 p0208 A69-12263

Composite tensile-failure modes, discussing failure load prediction, experimental data and statistical analysis of stress concentration effects
 [AIAA PAPER 68-173] 02 p0347 A69-12514

Statistical analysis of unsteady dynamic systems describable by unstable differential equations containing random parameters
 03 p0408 A69-12948

Statistical model of turbulent flow confirms Kolmogoroff hypothesis of equilibrium zone at large Reynolds numbers
 03 p0413 A69-12949

Optimal adaptive systems synthesis by statistical theory
 03 p0409 A69-12977

Statistical linearization of nonlinear memory type elements with stationary Gaussian input, applying Wiener method to one class of problems
 03 p0409 A69-13005

Statistical analysis of data concerning difference between real wind velocity and velocity of gradient wind for winds of various velocities
 03 p0458 A69-13268

Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception
 03 p0394 A69-13376

Statistical description of nonelastic processes in nonequilibrium plasma in transverse magnetic field, using kinetic equations for distribution functions
 03 p0476 A69-13412

Statistics of central peaks in lunar craters drawn from catalog
 04 p0656 A69-14675

Statistical characteristics of radiation pattern of mirror antennas in region of irregular sidelobes
 04 p0577 A69-14787

Soviet book of statistical and mathematical tables for calculation, analysis and control of reliability
 04 p0608 A69-15540

Real shape of time correlation function computed from partially averaged data
 05 p0786 A69-15924

Data sampling and statistical verification in large scale sterilization procedures, discussing biological in-

dicator /bacillus stearothermophilus/ and incubation time
 05 p0714 A69-15952

Statistical relations for best value, standard deviation and confidence limits for engineering data, noting weighted least squares polynomial for fitting
 [ASME PAPER 68-WA/PTC-1] 05 p0768 A69-16192

Statistical analysis of aircraft programs engineering man hours, aircraft performance and weight, avionics systems, schedules, etc, as estimating standards
 05 p0769 A69-16239

Secondary particle spectra from proton-proton interactions analyzed in two temperature statistical model, considering momentum distributions
 05 p0797 A69-16368

Statistical studies of current-voltage characteristics of zinc-doped silicon diodes
 05 p0732 A69-16425

Response of single and multidegree of freedom systems to nonstationary random excitation, analyzing spectral density function of pressure field close to jet engine
 05 p0844 A69-16763

Transfer function coefficients from frequency response data determined to obtain information about dynamic system characteristics
 05 p0844 A69-16764

Statistical method to investigate time varying stresses in helicopter structures, considering service life evaluation
 05 p0767 A69-16775

Recombination statistical model for neutron irradiated Si transistors, considering diffusion potential, junction voltage, temperature, activation energy and capture ratio for holes and electrons
 06 p0975 A69-16871

Solar disk surge distribution difference between eastern and western disk parts
 06 p0995 A69-17440

Statistical processing of oscillograms of instantaneous values of wire tension during winding, determining stress characteristics
 06 p0927 A69-17691

Statistical theory of traveling wave antennas for random phase-amplitude distribution of current, discussing phase errors
 06 p0898 A69-17797

M-20 digital computer program designed for calculating statistical characteristics of signals from IR TV scanning system of Cosmos 122 meteorological satellite
 06 p0929 A69-17980

Statistical theory of material strength with application to composite materials reinforced with whiskers and continuous fibers
 [AIAA PAPER 69-123] 06 p1028 A69-18142

Statistical frequency analysis of power spectrum of geomagnetic pulsations, discussing time and latitude dependence
 07 p1122 A69-18297

Statistical study of heart beat, respiration rate and arterial pressure of man during intermittent accelerations and short term weightlessness
 07 p1061 A69-18579

Laminated composite fracture statistical theory with stress enhancements in elements next to primary fracture, comparing elastic and plastic matrices
 07 p1170 A69-18712

Statistical computations of elastic moduli of macroscopically isotropic particulate composites, discussing porosity and elastic properties of materials made by sintering
 07 p1159 A69-18722

Statistical comparison of scintillation depths of Transit 4A satellite to radio star Cassiopeia A
 07 p1215 A69-18821

Spectral null from spectral characteristics and statistical properties of PCM signals used to estimate SNR
 07 p1083 A69-19122

Statistical analysis of cascade of bandpass limiter, ideal phase detector and video filter for mathematical modeling of coherent communication systems
 07 p1084 A69-19147

Statistical properties of intensity fluctuations of light fields consisting of incoherent Gaussian component heterodyned with single frequency coherent beam
 07 p1182 A69-19416

Statistical radomes design, analyzing dielectric constant and wall thickness tolerances effects on amplitude and phase of transmitted wave
 07 p1111 A69-19531

Antenna pattern loss factor for determination of average probability of detection vs SNR curves from three dimensional or pencil beam radars
 08 p1270 A69-19858

Statistical theory of fluids in equilibrium based on correlation functions for pair interactions between constituent molecules, invoking superposition closure approximation
 08 p1350 A69-19863

Statistical techniques to develop nickel base superalloy with high temperature capabilities for jet engine turbine bucket applications
 08 p1329 A69-20001

Radio source counts log N-log S diagram slope uncertainty due to finite source number, discussing statistical analysis methods accuracy
 08 p1383 A69-20048

Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
 08 p1303 A69-20323

Receiving systems for digital telemetry signals from spacecraft, analyzing receiver performance by statistical methods
 08 p1276 A69-20591

Statistical approach to design and management, discussing multiple regression analysis, attributes, intuition, probability, simulation and applications
 08 p1344 A69-21162

Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
 09 p1486 A69-21537

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data
 09 p1495 A69-21764

Mathematical model for improving statistical approximation convergence and accuracy in estimating structural components parameters
 09 p1461 A69-21857

Soviet book on methods of optimal statistical solutions and problems of optimal control covering basic equations of random processes, stochastic differential equations, etc
 09 p1473 A69-21932

Soviet book on statistical theory of discrete signal demodulation, covering demodulator analysis and synthesis methods
 09 p1455 A69-21933

Time dependent statistical equilibrium equations solutions for describing time development of atomic populations by means of ergodic Markov chain
 09 p1542 A69-22218

Radio signal reflection from objects of complex configurations by statistical model
 09 p1460 A69-22662

Statistical theory and dynamic programming to synthesize optimal pulsed control systems having restrictions on control device storage capacity
 09 p1476 A69-22673

Probability analysis of distortions caused by pulse noise action on digital information
 09 p1476 A69-22678

Inverse problem in stochastic processes, considering random moving force and strip load in structural stress analysis
 10 p1793 A69-22876

General and classical statistical techniques for cutting effectiveness and operational reliability of cutting fuses
 10 p1749 A69-23004

Data interpretation, discussing correlation describing effectiveness of independent variable and table giving values directly from sample size, t, z, F and chi square values
 10 p1669 A69-23040

Double galaxies consisting of components moving away from each other with hyperbolic velocities from statistical tests of hypotheses
 10 p1775 A69-23203

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence
 10 p1678 A69-23209

Two fold congruency method for statistical evaluation of fluorescent flow detection penetrant sensitivity and reproducibility
 10 p1700 A69-23374

Head injuries evaluation in aircrew, noting motor cycle accidents
 10 p1649 A69-23378

- Statistical, economic and psychological aspects of aeronautical and astronautical profitable reliability in relation to operation, using mathematical model
10 p1700 A69-23839
- Shock wave structure determination in simple monatomic gas, using statistical counting and successive approximation algorithm
10 p1680 A69-23894
- Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
10 p1769 A69-23904
- Ionized meteor trails initial radii statistical characteristics determined for two models
10 p1783 A69-23917
- Statistical characteristics of transverse shifts of ray directions in turbulent atmosphere for arbitrary wave parameter values
10 p1657 A69-23942
- Statistical regularization for obtaining a priori probability distribution information on mathematically incorrect inverse geophysical problems, deriving algorithm
10 p1689 A69-23968
- Brittle fracture of steel analyzed using statistical model, attributing occurrence to coalescence of arrested cracks initiated at different points
10 p1803 A69-24033
- Statistical estimation theory giving angular resolution of imaging systems in terms of noise characteristics and modulation transfer function
10 p1725 A69-24048
- Statistical theories of turbulence applied to thermal convection between infinite slippery plates at large Prandtl number
11 p1997 A69-24283
- Statistical parameters of critical load distribution in buckling of imperfection sensitive elastic structures, noting probability of failure
11 p1969 A69-24415
- Probability models used in statistical approach to fracture mechanics, noting role of weakest link model in representing brittle fracture
11 p1975 A69-24673
- Count rate meter for statistical frequency of signals applied to input of trigger with Poisson distribution of pulse intervals
11 p1884 A69-24734
- Statistical analysis of convective layer thickness and moisture content effect on convective cloud configurations, using satellite TV pictures
11 p1912 A69-24827
- Statistical analysis of lee wave clouds from satellite TV pictures, determining lengths and air flow direction
11 p1912 A69-24828
- Statistical method for determining accuracy of air-field weather reports on takeoff and landing conditions, visibility and cloud ceiling, correlating forecasts and actual conditions
11 p1913 A69-25205
- Dynamic properties of supply sources in carbon dioxide shielded welding as function of short circuit current statistical parameters, noting metal spatter correlation
11 p1892 A69-25667
- Lunar surface layer structure by statistical analysis of data concerning craters and stones distribution as shown by lunar orbiter photographs
12 p2154 A69-25816
- Statistical analysis of photometric curves for meteors undergoing fragmentation at onset of vaporization
12 p2154 A69-25819
- Descriptive statistics in quality control dealing with variability and probability, discrete and continuous variables, frequency distributions and measures of central tendency and dispersion
12 p2100 A69-25846
- Statistical reliability tools and methods, graphs and charts, estimations, prediction techniques and demonstrations
12 p2101 A69-25847
- Statistical turbulence theory applied to turbulent flow transport properties in lower atmosphere
12 p2125 A69-25894
- Stratospheric aerosol attenuation factor vertical distribution statistical structure, tabulating normalized correlation matrices, eigenvectors and eigenvalues
12 p2125 A69-25956
- Service life of system predicted by identifying and testing system variables of mission phases, using obtained data in statistical estimation
12 p2101 A69-25970
- Observed frequencies of number of members in multiple systems of galaxies
12 p2156 A69-26222
- Spherical wave propagation in homogeneous turbulent medium, discussing nonstationary statistics as applied to vertical propagation in atmosphere
12 p2029 A69-26251
- Statistical characteristics of stationary stochastic pulse train specified by probability generating function, noting power density
12 p2030 A69-26383
- Statistical data for visual binary systems with known spectral classes or colors and one component near main sequence
12 p2159 A69-26666
- Statistical method for calculating upper bound heights of sources responsible for magnetic anomalies
12 p2071 A69-26696
- Stationary inventory problems analysis, discussing inventory policy, recursive and or limiting procedures, stationary point processes, stock delivery time instants, etc
12 p2192 A69-26750
- Variational statistics applied to hourly meteorological data for predicting airport runways icing conditions time and duration
12 p2127 A69-26900
- Statistical analysis of UBv characteristics of blue objects located near galactic north pole by scintillation techniques
12 p2168 A69-27054
- Statistical properties of spatial radiance distribution of sky and forest backgrounds in IR, noting one dimensional Wiener spectra
12 p2131 A69-27072
- Inductive converters accuracy calculation by statistical method based on probability theory
13 p2259 A69-27424
- Vertical air motions and cloud behavior relationship based on statistical analysis of TV cloud pictures from Cosmos 122 satellite
13 p2291 A69-27724
- Statistical analysis of radiation temperature structure for automatic recognition of meteorological situations from actinometric satellite observations
13 p2293 A69-27842
- Friction wear of solid bodies based on microscopic contact system model, deriving particle distribution law from physico-statistical analysis
13 p2268 A69-28051
- Statistical theory of cumulative wear of machine parts with application to engine parts of passenger aircraft, automobiles, tractors, etc
13 p2268 A69-28052
- Wide signal and noise statistics range to determine noise rejection characteristics of communication system used for single path and diversity reception
14 p2410 A69-28826
- Statistical linearization of strong nonlinearity in series with random-gain amplifier element, deriving formulas for statistical gain parameters
14 p2425 A69-28920
- Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts
14 p2437 A69-29062
- Statistical synthesis of optimal control for quasi-harmonic systems by extending asymptotic method to include unremovable measurement error in output value
14 p2426 A69-29420
- Polynomial and nonlinear equations of state for solids and liquids analyzed using uncommon statistical and least squares methods
14 p2486 A69-29470
- Phase screen technique for deriving statistical characterizations of perturbations imposed on wave propagating through random medium applied to remote probing
14 p2414 A69-29511
- Vibrostand effects on statistical characteristics of random vibrations of elastic system, discussing simulation techniques
14 p2536 A69-29743
- Statistical analysis of data for 18-19 June 1936, estimating expressions involving external and internal components of geomagnetic field at storm time disturbances
14 p2444 A69-29883
- Two antenna radio direction finding system statistical synthesis, using quadratic linear process
15 p2562 A69-30110
- Orthogonal signal recognition in set of false signals by resolving devices with limited sensitivity, giving design formulas for error probability
15 p2563 A69-30135
- Quasi-uniform pseudorandom numbers program transmitter statistical characteristics suited for solving problems by Monte Carlo method
15 p2572 A69-30336
- Design and test criteria for dynamically loaded structures from various viewpoints, discussing statistical variations, load strength and limitations
15 p2618 A69-30368
- Statistical calculation of three dimensional frames of thin walled rods, using method of initial parameters in matrix form
15 p2714 A69-31199
- Statistical data concerning noctilucent clouds formation during IQSY, noting tendency to form along geographic longitudes and day and night existence
15 p2598 A69-31255
- Book on statistical theory of signal detection and resolution in random noise covering hypothesis testing, digital communications, stochastic signals, filters, etc
16 p2748 A69-31566
- Book on correlation theory of statistically optimal systems covering linear continuous, discrete, nearly optimal, nonlinear, decision element and adaptive systems
16 p2764 A69-32114
- Automatic nonrepairable control elements reliability evaluated statistically with differentiable lifetime distribution function
16 p2764 A69-32199
- Separation of normal geomagnetic field component from limited length measurements by moving averages, considering error and inhomogeneity of anomalous field
16 p2783 A69-32532
- Statistical analysis of Brewer-Mast electrochemical soundings of vertical ozone distribution for developing computer programs of climatological behavior
16 p2786 A69-32632
- Statistical characteristics of ozone measurements with Dobson spectrophotometers and filter ozonometers, determining requirements for maximum effectiveness of ozone network
16 p2787 A69-32639
- Rotating bending fatigue tests on aluminum alloys based on statistical analysis for material strength
17 p3052 A69-32979
- Random stress statistical properties and relationship to fatigue life, discussing Fuller prediction, comparison with test data, and vehicle design evaluation
17 p3053 A69-32988
- Satellite Proton 2 orientation from onboard measurement data, discussing general statistical method and data processing results
17 p3001 A69-33221
- Statistical dynamics of turbulent incompressible fluid, discussing harmonic function in Navier-Stokes equation
17 p2952 A69-33313
- Helicopter flight loads spectra data compared on statistical basis to establish component service lives [AHS PAPER 301]
17 p2901 A69-33548
- Tropical storms wind speeds related statistically to characteristics as pictured from satellites
17 p2997 A69-33690
- Radar unit for network component /wind patrol/ in statistical observations of wind drift conditions in meteor trails
17 p2939 A69-33901
- Statistical analysis in inlet air flow dynamics, discussing inlet duct design and pressure variations [AIAA PAPER 68-649]
17 p2896 A69-34020
- Linear isotropic elastic continuum dislocations distribution, deriving transport equations by statistical methods, noting analogy between energy/ momentum and MHD equations
18 p3212 A69-34352
- Statistical characteristics stabilization of random loads in fatigue tests, noting transfer function of testing machine and spring stiffness
18 p3215 A69-34544
- Statistical model for coherent functions obtained from laser equation, showing amplitude and frequency coupling of radiation fluctuations
18 p3152 A69-34820
- Time sharing remote computer station allowing on-spot data processing and output answers, formulating best-fit equation representing statistical data [SAWE PAPER 799]
18 p3107 A69-34860
- Rational vehicle weight estimation based on statistical data /REBOS/ including gross weight, weight coding, subdivisions, balance and size, inertia moments and products, etc [SAWE PAPER 791]
18 p3220 A69-34866

Meteor flakes nature and statistics from studying 318
meteors characterized by irregular brightness curve
18 p3203 A69-35333

Statistical regularization for determining vertical at-
mospheric temperature profile from measurements of
earth radiation in 15 micron carbon dioxide band
18 p3167 A69-35339

Statistical description of microstructural elements
/fibers and fillers/ in unidirectional fiberglass rein-
forced plastics determined in lattice nodes
18 p3163 A69-35363

Statistical relations between minute blood circula-
tion volume, O capacity and consumption rate in tis-
sues of men and dogs
19 p3260 A69-35896

Book on statistical communication and applications
to radio and radar systems technology to provide
guidelines for design decisions
19 p3267 A69-35900

Digital data compression system transmission error
statistical analysis, emphasizing addressing schemes ef-
fect on compression ratio
19 p3272 A69-36261

Ionosphere disturbances due to high altitude ther-
monuclear explosions, discussing experimental proof
by Cosmos satellites short wave transmitter radio signal
scintillation statistical evaluation
19 p3304 A69-36624

Two procedures for processing statistical data con-
cerning Gaussian processes made exchangeable by
manageable formula
19 p3361 A69-36646

Random gust design requirement and gust load
covariances to define boundaries of gust-loading region
for airframes
20 p3621 A69-37167

Small scale inhomogeneities motions in E and
sporadic E layers, processing data with method of full
correlation analysis and statistical method
20 p3528 A69-37683

Space vehicle launcher system reliability from trials
and adopted corrections, basing formal computation
on adoption of normalized form for reliability
likelihood
20 p3618 A69-38278

Mean importance variations of sunspot groups in
various latitude intervals, reducing data statistically
with dispersion analysis and autocorrelation method
20 p3616 A69-38303

Statistical analysis of galactic structures subject to
Newton gravitation covering globular clusters and
spiral disk and rotating bar galaxies
21 p3803 A69-38924

Statistical analysis of wind velocity measurements at
floating buoy stations, presenting velocity power spec-
tra for different frequency bands
21 p3758 A69-39111

Dispersion and correlation function for atmospheric
transparency due to water vapor from statistical model
of absorption bands and effective mass
21 p3759 A69-39113

Statistical characteristics of linear transformations of
gravity field anomalies by linear operators, noting com-
putation of covariance function
21 p3716 A69-39247

Nonlinear filter for optimal estimation of mean,
covariance and third central moments of system, noting
simulation tests stability for orbital navigation
[AIAA PAPER 69-852] 21 p3686 A69-39380

Statistical error analysis of autonomous manned
spacecraft navigation in long duration eccentric Mars
orbits
[AIAA PAPER 69-880] 21 p3763 A69-39406

Space vehicles optimal pulsed control systems
statistical synthesis, considering structural constraints
on operation, memory capacity and algorithm coeffi-
cients
21 p3767 A69-39651

Statistical regularization for obtaining a priori prob-
ability distribution information on mathematically incor-
rect inverse geophysical problems, deriving algorithm
21 p3680 A69-39654

Hydrodynamic turbulence in statistical prediction
for Burger equation, considering statistical inference
problem for initial conditions and prediction criterion
with estimable error
21 p3697 A69-39673

Weighting function of statistically optimal automatic
dynamic system generating stochastic loads, using
Fredholm equations
21 p3688 A69-39861

Statistical analysis of chromospheric flares connec-
tions with sunspots, using frequency distributions of
flares occurrences in sunspot groups
22 p4001 A69-39996

Resonant asteroids in statistically underpopulated
Kirkwood gaps, noting oscillating mean motion dis-
tribution
22 p4013 A69-40122

Distinction between faint and bright sources of
slowly varying solar microwave emission components
applied to geomagnetic activity statistics
22 p4020 A69-40306

LM descent engine behavior upon contact with lunar
surface simulated, basing test condition on statistical
trajectory analysis indicating fire until touchdown pos-
sibility
[AIAA PAPER 69-1020] 22 p3923 A69-40391

Deformation localization and slip functions in
statistical theory of plasticity, discussing approxima-
tions and untenability of Yosimura theory criticism
22 p4044 A69-40742

Statistical critique of Polyak values for tangential
dendritic spread of primate retinal neurons
22 p3880 A69-40848

Data evaluation, measurement accuracy and statisti-
cal procedure, using silicates chemical analysis
22 p3897 A69-40984

Infinites in statistical theory of radiative processes
when applied to plasmas containing charged particles
and radiation
22 p3991 A69-41055

Statistics of jet aircraft accidents including world-
wide data and safety trends
22 p4054 A69-41128

Jet transport operation and accidents statistics,
analyzing world data, accident causes and safety gap
22 p4054 A69-41130

Statistical analysis of position errors inherent in
position-finding system utilizing position fixing planes in
three dimensional space
22 p3979 A69-41253

Statistical analysis of operation of precision electric
spark machine servosystems with RC generator based
on working pulse peak voltage distribution
23 p4168 A69-41307

Statistical model of cratered planetary surface slopes
and elevation applied to radio wave scattering by moon
and Venus
23 p4209 A69-41322

Tolerance limits for uncertain requirements vector in
linear programming with random variation, introducing
nonparametric statistics with sensitivity analysis
[AAS PAPER 69-079] 24 p4340 A69-42821

Ruby laser second harmonic generation statistical
characteristics with dielectric surface scatterer, show-
ing variety of modes and high cross sectional stability
24 p4328 A69-43164

Norms for quantitative vectorcardiography derived
from statistical analysis of results from healthy young
subjects, emphasizing medical evaluation of flying per-
sonnel
24 p4277 A69-43390

Pilots myopia incidence statistical study after initiate
medical examination, emphasizing skiagram value in
prognosis
24 p4267 A69-43400

STATISTICAL COMMUNICATION THEORY U COMMUNICATION THEORY

STATISTICAL CORRELATION

Odd and even translational two sample test statistics
uncorrelated when combined sample distribution func-
tion is equally symmetric
01 p0106 A69-10925

One dimensional distribution law of random process
with arbitrary correlation function, verifying normality
hypotheses by integral criterion
08 p1299 A69-21069

Object shapes automatically classified from reflected
radio signals, considering correlation description of ob-
ject effective dispersion surface diagram
14 p2411 A69-28917

Spatial correlation function of Northern Hemisphere
geopotential, using model based on random distribu-
tion of potential vortex fluctuations for atmospheric
circulation
14 p2476 A69-29822

Statistical correlation of temperature and tail- wind
data for London-New York route at 50 mb for SST
operation
15 p2651 A69-30690

Galaxies clusters spatial distribution based on crude
distance estimates, discussing serial correlation of
counts and interpreting results
16 p2862 A69-32371

One dimensional distribution law of random process
with arbitrary correlation function, verifying normality
hypotheses by integral criterion
16 p2765 A69-32484

Line width and intensity correlation of laser radia-
tion noting damping constant
17 p2980 A69-33012

Analytical-statistical weight prediction to derive and
apply correlation expression, illustrated with bending
stress equation applied to aircraft wing group
[SAWE PAPER 810] 18 p3221 A69-34900

Hypercorrelation concept for statistical charac-
terization and structuring of systems with application to
management models, discussing multipoint systems
18 p3236 A69-35236

Random vibrations in linear systems during spectral
and correlation analysis, noting nonlinear systems
18 p3227 A69-35491

Statistical relation between expansion velocities and
radii of planetary nebulae due to Lyman-c and diffuse
Lyman-alpha radiation
19 p3426 A69-36575

Random processes correlation functions determined
by stochastic differential equations applied to lunar
surface statistical characteristics determination
22 p4033 A69-41092

STATISTICAL DECISION THEORY

Book on elements of detection and signal design
covering transmitter optimization for coherent and
noncoherent digital communication systems, statistical
decision theory, radar detection, etc
12 p2033 A69-26867

Recognition system for discrete decision function
generation to select one out of two classes of objects,
deriving solutions for selection probability
17 p2932 A69-33119

STATISTICAL DISTRIBUTIONS

NT PEARSON DISTRIBUTIONS

NT PROBABILITY DISTRIBUTION FUNCTIONS

NT RAYLEIGH DISTRIBUTION

Statistical characteristics of magnetoionic com-
ponents of obliquely incident waves, obtaining en-
velope distribution of signal reflected from F2 layer
02 p0314 A69-11691

Scattering data for optical diagnostic measurements
on two component suspensions or gases, using random
distributions of spheres
04 p0555 A69-14282

Energy fluxes statistical distribution produced by
random and regular energy sources
07 p1076 A69-18510

Frequency-fluctuation correlation functions of radio
wave field behind n random screens with random phase
shifts calculated, obtaining statistical characteristics
07 p1076 A69-18525

Interrelation between parameters of statistical dis-
tribution of amplitude, angular and phase charac-
teristics of signals scattered by extended body perform-
ing oscillations
07 p1085 A69-19154

Statistical distribution of chemical elements average
abundances in earth crust and meteorites and
nucleosynthesis of elements under specific astral condi-
tions
08 p1310 A69-20941

Mean temperature values accuracy determined from
fixed period values by frequency graphs, discussing
deviations from mean
09 p1534 A69-21511

Asymptotic behavior of frequency function of fluc-
tuations for generalized ensemble parameters, noting
characteristic function convergence to Gaussian at
thermodynamic limit
09 p1623 A69-22395

Variational approximation of probability measures
and products of random matrices, discussing point dis-
tribution on Lobachevskii plane
10 p1719 A69-23399

Zero crossing statistics measurements for 1/f noise,
noting statistically stationary character of probability
density distributions of interval spacings between zero
crossings
10 p1656 A69-23657

Two photon photoelectron counting statistics and in-
tensity fluctuations of incident radiation compared
with single photon detectors and applied to laser out-
puts
10 p1704 A69-23658

Statistical gain characteristics of radar antennas at
very short Fresnel zone ranges compared to Fraunhofer
zone
12 p2040 A69-26470

VLF signal strength minima during transition fading,
considering asymptotic statistical distribution
12 p2032 A69-26862

Statistical distribution of instantaneous frequency
and power of signal associated with Doppler spectrum

for exponentially distributed and determinate frequencies

12 p2032 A69-26863

Fiber axis distribution resulting from mechanical working deformation of matrix containing initially randomly oriented fibers

12 p2188 A69-26933

Statistical distributions of refractive index parameters in tropospheric radio propagation from psychrometer soundings, discussing lapse rate

13 p2254 A69-28428

Statistical characteristics of magnetoionic components of obliquely incidence waves, obtaining envelope distribution of signal reflected from F 2 layer

13 p2355 A69-28722

Statistical distribution functions for radar cross section of flying aircraft

14 p2414 A69-29500

Target trajectories determination based on radar data with allowance for association between neighboring readings, using statistical characteristics obtained with Markov chains

15 p2566 A69-30335

Autonomous radiometers signals statistical properties used in space technology, discussing radar signals phenomenological models, measurement errors and energy characteristics

15 p2566 A69-30337

Cost effectiveness of test selection when statistical distribution of load and strength are known, presenting curves for equally dispersed normal parameters distribution

15 p2720 A69-30401

CO absorption lines in solar spectrum analyzed theoretically and experimentally indicating random distribution of molecules

15 p2688 A69-30552

Statistical characteristics of Q switched He-Ne laser emission gain fluctuations during transient process from subthreshold to superthreshold value

15 p2634 A69-30960

Quantum mechanics method for obtaining photocount distribution from optical maser photoelectron counting statistics

15 p2635 A69-31238

Matrix eigenvalue problems with statistical properties, applying to dynamic structural systems and verifying solutions by Monte Carlo simulation

16 p2871 A69-31878

Statistical properties of parametric amplifier and frequency converter by Schrodinger quantum mechanics and P-representation of density matrix

16 p2761 A69-32363

Device quantity failure kinetics or time dependence effect on time-to-failure distribution resulting from given device degradation coefficients distribution

17 p2936 A69-32895

Fiber distribution in oriented fiberglass reinforced plastics, noting statistically isotropical distribution and use for regular structure model

18 p3162 A69-35355

Surges statistical properties observed in Sweden /1957-1967/ noting latitude distribution pattern, radio emission association, rate dependence on solar cycle, etc

18 p3204 A69-35393

Ozone vertical distribution predicted statistically, using total ozone amounts and backscattered UV spectral measurements

18 p3132 A69-35426

Astronomical observatory photomultiplier cell dark current fluctuations, showing statistical resemblance to binomial distribution

20 p3599 A69-37470

Atmospheric turbulence statistical distribution mass measurements using velocity, gravity and weight recordings based on calibration of aircraft as turbulence measuring instrument [ONERA-TP-699]

20 p3541 A69-37754

Random function output current obtained in phototube and scintillation detector including amplitude distribution, time measurements and pulse shape discrimination

22 p3947 A69-40670

Circular and spherical antenna arrays elements random distribution in three dimensional space using Monte Carlo method, considering arbitrary excitation and nonisotropic elements

22 p3914 A69-40704

Uniform random field model development by taking moments in linear transformation form of certain initial field

23 p4183 A69-41523

Randomly oriented disks and rods scatter pattern used to determine causes of log-normal distribution of radar cross section fluctuations

23 p4116 A69-41592

Absolute magnitude dispersion of galactic cluster brightest members as normally distributed random variable independent of cluster richness or faint members luminosity

23 p4215 A69-42113

Optimal scheme of combining moment estimators set derived for computational simplicity and asymptotic efficiency

24 p4342 A69-43704

STATISTICAL MECHANICS

Transport properties of steam, analyzing selection, correlation and prediction using statistical mechanical theories

01 p0174 A69-10110

Book on mathematical and physical fundamentals of molecular gasdynamics based on statistical mechanics, discussing free molecular flow

01 p0060 A69-10711

Statistical mechanics and thermodynamics for molecular systems applied to gravitational systems, discussing collisionless Boltzmann equation and Chandrasekhar binary collision model

02 p0323 A69-12273

Covariant statistical mechanics for equilibrium thermodynamics

03 p0533 A69-13758

Nonequilibrium statistical physics for kinetic theory of gases and statistical mechanics, noting irreversibility and entropy

05 p0793 A69-15769

Viscosity coefficient tensor in terms of autocorrelation functions, using linear reaction theory of mechanical disturbances

05 p0794 A69-15785

Gas adsorption on solids, discussing statistical mechanical theory assuming localized adsorption for first adlayer and nonlocalized mobile layer adsorption on top

06 p0980 A69-17387

Mechanical equilibrium and stability conditions for system of interacting atoms in crystal structure

06 p0944 A69-17504

Book on theory of kinetic equations covering classical mechanics, Liouville equation and distribution functions, kinetic equations relation to fluid dynamics, KBG equations, etc

07 p1180 A69-18411

Approximate solution to problem of estimating thickness of shock wave by statistical mechanics

07 p1119 A69-18704

Statistical theory of ionization for magnetoactive plasma with nonequilibrium concentration level and nonequilibrium energy distribution

07 p1193 A69-19142

Statistical properties of electromagnetic field diffracted by illuminated plane aperture studied in Fresnel zone on basis of partial coherence theory

11 p1836 A69-24978

Classical statistical mechanics of systems with identical or limited different particles, discussing particle collisions in dilute gases

11 p1870 A69-25009

Elastic proton scattering measurements, noting consistency with statistical theory when diffraction is taken into account

13 p2302 A69-28368

Statistical mechanics - Conference, Kyoto, September 1968

14 p2487 A69-29986

Mass point system moving in gravitational field, discussing statistical mechanics, relaxation time and evolution of stellar systems

14 p2530 A69-29987

Satellite signal probability density determined from scintillation plus Faraday effect in statistical terms

16 p2751 A69-32103

Lynden-Bell statistical mechanics of relaxation in collisionless one dimensional stellar system, discussing low energy particles distribution

16 p2862 A69-32376

Signal propagation in channel subject to static investigated using Fokker-Planck type equation in statistical mechanics methods

16 p2753 A69-32437

Lattice vibration theory of solid state diffusion for Cu including anharmonic effects formulated using equilibrium statistical mechanics, considering interacting phonon events

17 p3015 A69-32822

Closure conditions for Vlasov turbulence, discussing infinite systems of equations for dynamics of statistical quantities

17 p2958 A69-34228

Statistical dynamics and structure of turbulent shear flows in incompressible fluids of constant density, discussing Reynolds stress at critical layers

18 p3123 A69-34922

Viscosity coefficient tensor in terms of autocorrelation functions, using linear reaction theory of mechanical disturbances

18 p3173 A69-35037

Negative absolute temperatures physical meaning confirmed mathematically using statistical physics

18 p3231 A69-35403

Observation space transformed from statistical synthesis of nonlinear closed systems to multiple control system subjected to statistically assigned perturbations

19 p3287 A69-36662

Statistical equations for compressible gas, discussing turbulent quantities separated into fluctuating and macroscopic parts

19 p3300 A69-36784

Statistical mechanics applied to mechanical properties and thermodynamics studies of rapidly expanding or collapsing self gravitating systems

21 p3801 A69-38702

STATISTICAL MOMENTS

U DISTRIBUTION MOMENTS

STATISTICAL PROBABILITY

U PROBABILITY THEORY

STATISTICAL TESTS

NT RANK TESTS

Odd and even translational two sample test statistics uncorrelated when combined sample distribution function is equally symmetric

01 p0106 A69-10925

Algorithm for hypothesis optimal tests by series during signal detection in presence of noise

13 p2222 A69-28509

Nonlinear regression techniques for statistical simultaneous measurement of thermal properties including convergence criterion [AIAA PAPER 69-602]

17 p3070 A69-33260

Statistical testing techniques using small sample size at low component levels to predict product performance

18 p3117 A69-34528

Residual analysis prior to statistical tests on experimental data

21 p3755 A69-39120

Structural analysis and statistical fracture approach to design and testing for polycrystalline ceramic materials, including combined stress testing and load redistribution models

24 p4333 A69-43339

STATISTICAL WEATHER FORECASTING

Weather forecasting using statistical technique and Subsynoptic Advection Model of Weather Bureau, discussing mathematical background for various early morning predictions

08 p1345 A69-20298

Stochastic model for real time on demand weather predictions using REEP /regression estimation of event probabilities/ equations in Markov chain

08 p1345 A69-20299

Synoptic meteorological predictions using statistical dynamic approach, considering probability distributions and nocturnal temperature decay

08 p1345 A69-20300

Continuous variate duration estimates by Markov process, giving example of surface air temperature conditional probability distribution

08 p1346 A69-20731

Zonal westerlies variations associated with tidal cycles, discussing principal component analysis, zonal index, bandpass filtering, aliasing, prediction and stepwise regression

09 p1537 A69-22242

Statistical rules for seasonal forecasts based on temperature and precipitation deviations analysis in long term climatological records, considering sunspot cycle role

12 p2125 A69-25895

Synoptic process predictability, discussing forecasting of large and small scale processes by mathematical formulas and statistical description

12 p2126 A69-26576

Probabilistic forecasts in meteorological support of aviation, comparing economic implications of squall forecasting

14 p2474 A69-29739

STATOR BLADES

General atmospheric circulation instability factors for statistical weather forecasting, considering atmosphere as nonlinear oscillating system, analyzing relaxation time

14 p2476 A69-29820

Probability diagnosis and prognosis for buffeting zones based on Bayes formula, determining clear air turbulence zones

15 p2648 A69-30645

Nocturnal development of air mass stratus clouds in Texas and mechanism of formation, discussing turbulent mixing theory

15 p2649 A69-30893

Stochastic meteorological models based upon presence of weather regimes, illustrating association with statistical inference problems

18 p3166 A69-34822

Thunderstorm probabilities at Cape Kennedy, giving data on frequency, duration, multiple occurrence, nonoccurrence, runs and conditional probabilities

18 p3167 A69-35100

Weather prediction, considering mathematical and empirical procedures, computer applications, atmospheric instability, etc

21 p3757 A69-38324

Storm location and severity prediction by pattern recognition theory, using quantized radar data, compared with statistical prediction

21 p3678 A69-39458

STATOR BLADES

Transpiration cooling effect on turbine stator blade performance determined by annular cascade tests, using data to establish empirical correlation for loss coefficient

[ASME PAPER 69-GT-39] 09 p1432 A69-22487

Turbine stator blade performance determination from total pressure surveys downstream of blade row, noting problems in pressure measurement

[ASME PAPER 69-GT-103] 09 p1432 A69-22521

Dry friction whip role in radial rubs dynamic stability in labyrinth seals and blade tips of turbomachinery

[ASME PAPER 69-VIBR-56] 10 p1804 A69-24146

Stress distribution on surface of stator vane loaded statically as cantilever derived by brittle coatings, strain gages and three dimensional photoelasticity

22 p4042 A69-40310

STATORS

Stator setting effect on single stage turbine performance, considering blade loss and surface velocity distribution

[AIAA PAPER 69-525] 16 p2841 A69-32686

Wobble tolerance influence on axis deflection affecting accuracy during assembling of turbine rotors and stators

21 p3733 A69-39719

STEADY FLOW

NT COUETTE FLOW

NT HARTMANN FLOW

Effect of steady flow of incompressible conducting fluid on magnetic dipole at center of sphere

01 p0128 A69-10363

Indeformable gravity waves in horizontal cylindrical channel, using first and second order approximations for nearly uniform flow equations solutions

01 p0060 A69-10392

Steady one dimensional motion of current sheets in plasma accelerators, noting condition of zero initial conductivity

01 p0133 A69-11220

Static pressure field induced by steady subsonic flow of compressible inviscid fluid through two dimensional duct with statistically distributed wall roughness

01 p0062 A69-11279

Hydrodynamic analysis for determining steady flow region with closed separation area for Reynolds numbers to describe viscous mixing by Prandtl equations

02 p0190 A69-12570

Generalization of characteristic relations for steady supersonic 3D motion of polytropic gas, obtaining complex screw motions

03 p0412 A69-12847

Conservation equations for steady incompressible flow in variable area duct with mass transfer at walls simplified by linearizing inertial and convective terms

03 p0413 A69-13011

Supersonic flow region about blunt body calculated on basis of gasdynamic equations for steady flow of inviscid nonheat conducting gas

03 p0363 A69-13658

Steady flows of incompressible viscous fluid exterior or interior to circular cylinder

04 p0589 A69-14898

Steady plane supersonic gas flows with large number of shocks computed on basis of weak solutions of hyperbolic system

04 p0544 A69-15284

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow

05 p0745 A69-15780

Solution to system of equations in boundary layer theory of steady incompressible fluid flow

05 p0751 A69-16454

Nonisentropic simple waves in two dimensional steady flow of ideal gas

05 p0752 A69-16687

Self similar solution for Navier-Stokes equations describing steady motion of submerged eddy jet of incompressible viscous fluid injected into half space

06 p0908 A69-16825

Steady two dimensional MHD flow of perfectly conducting fluid past nonconducting wedge with magnetic field orthogonal to flow velocity

06 p0964 A69-17244

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics

[AIAA PAPER 69-187] 06 p0865 A69-18176

Steady two dimensional MHD flow in finite region of aligned fields

07 p1188 A69-18274

Steady flow circuit characteristics in square cross section channels of planar geometry fluid control elements in case of laminar flow

07 p1118 A69-18293

Unstationary characteristics method applied to numerical computation of steady compressible flow around airfoil

[ONERA-TP-630] 07 p1049 A69-18413

Boundary layer approximation for steady laminar flow of viscous incompressible fluid past paraboloid of revolution, obtaining vorticity distribution

07 p1120 A69-18812

Steady conical compressed flows in nonaxisymmetric ring nozzles characterized by discontinuities

07 p1120 A69-18989

One dimensional flow of conducting inviscid compressible fluid in channel in presence of transverse fields, discussing steady velocity flows

07 p1191 A69-19014

Arbitrary stationary foil in perfect incompressible fluid moving at constant velocity at infinity assuming plane, steady and irrotational flow

08 p1303 A69-20272

Two dimensional steady flow of finitely conducting compressible fluid subjected to magnetic field with two zero components

08 p1369 A69-20843

Hydromagnetic steady forced flow against porous rotating disk, integrating equations of motion by Karman-Pohlhausen and series methods

08 p1370 A69-21005

Plane steady transonic flow of perfect fluid around airfoils with constant curvature using hodographic method, discussing various boundary conditions

09 p1429 A69-21605

Permanent flow of solenoidal vector line rotation in steady nondegenerate rotational flow having complex lamellar unit normal to streamline

10 p1727 A69-22862

Steady three dimensional flow of gases with thermodynamic relaxation, noting flow field weak discontinuities and effect of discontinuities in wall curvature

10 p1677 A69-22894

Surface recombination efficiencies on metals measured as function of exposure time in steady Oseen flows, providing step-function increase in oxygen atom concentration

10 p1726 A69-23526

Finite difference technique for numerical computation of steady supersonic two dimensional gas flows, with or without diffusion normal to mean flow streamlines

10 p1679 A69-23595

Nonlinear partial differential equations for solution of steady stratified flows, noting hydrostatic pressure distribution and horizontal and vertical scales

11 p1869 A69-24889

Finite difference solutions for time dependent equations of motion for steady flow around cylinder at large Reynolds numbers

11 p1872 A69-25133

Steady incompressible fluids flow around stationary wings and through rotating blades cascades based on Prandtl airfoil theory of bound vortices

11 p1873 A69-25202

Steady flow of viscous incompressible fluid studied with system of equations equivalent to Navier-Stokes equations and finite difference method

11 p1875 A69-25480

Invariant transformation of Euler equations of motion for plane steady flows of perfect compressible fluid

11 p1877 A69-25739

Expansion of stream function of steady meridional flow of viscous fluid at small Reynolds numbers, giving expansion in spherical coordinates

13 p2247 A69-27737

Compressible gas MHD steady one dimensional flow in electric and magnetic fields

14 p2500 A69-29901

Space charge formation in MHD generator channels ascribed to gas parameters nonuniformity and magnetic induction vector presence, assuming steady flow

15 p2659 A69-30635

Steady incompressible MHD laminar flow between parallel porous disks solved for large Reynolds and Hartmann numbers

15 p2662 A69-30968

Steady inviscid compressible flow past wavy wall with simulated ablation, studying reflections effect on relationship between surface pressure and wall geometry

16 p2770 A69-31909

Monograph on ring airfoil theory with nonuniform incidence covering steady flow and shear flow transition into boundary value problem of potential theory

17 p2889 A69-32995

Exact similarity solutions of hypersonic small disturbance equations for steady flow, discussing equations of state and motion and dissociating gas flow

[AIAA PAPER 69-707] 17 p2953 A69-33448

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow

18 p3123 A69-35032

Boundary layer equation for steady incompressible flow past flat plate with parabolic leading edge, obtaining series solution in inverse powers of Reynolds number

18 p3124 A69-35270

Equations governing steady diabatic gas flows in Crocco velocity vector field, discussing changes in total pressure

21 p3695 A69-39007

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas

22 p3929 A69-40117

Viscoelastic fluid steady flow in porous walled channel, examining mass flow solution continuity

22 p3930 A69-40118

Piston motion influence on gaseous motion set up by constant energy explosion, applying to steady high Mach number flow past blunt nosed object

22 p3931 A69-40892

Integral equations of motion for plane steady flow of viscous incompressible electrically conducting fluid around flat plate

22 p3992 A69-41109

Class of one dimensional nonlinear waves and shock structure reduced to steady flows in radiation gas dynamics

23 p4240 A69-42466

STEADY STATE

U EQUILIBRIUM

STEADY STATE CREEP

Deformation dependence on strain hardening and recovery rate during transient and steady state creep

06 p0943 A69-17236

Thin circular cylindrical shells steady creep behavior under combined lateral and axial pressures, using Tresca criterion and associated flow rule

06 p1023 A69-17506

Polycrystalline W steady state creep rate at high temperatures noting effects of stress, grain size and subgrain size

07 p1158 A69-18241

Dislocation climb theory of steady state creep, noting necessity of self diffusion mechanism in any high temperature creep theory

08 p1329 A69-20000

Beta parameter in exponential stress dependences of high temperature steady state creep rate and time to rupture of creep resistant alloys

10 p1712 A69-23719

Creep behavior of dispersion strengthened Nb base bcc alloy, studying temperature and stress effects on steady state creep rate

19 p3343 A69-35924

Radial and tangential stress analysis of rotating disk during steady state creep, using equations solved by finite difference method
22 p4043 A69-40458

STEADY STATE FLOW
U EQUILIBRIUM FLOW

STEAM
Steam ingestion tests on carrier aircraft gas turbine engines, analyzing inlet pressure and temperature distortion in steam-air environment
01 p0143 A69-11062
Sterilization without damage by mixing steam and formaldehyde at 80 C under subatmospheric pressure, noting thorough penetration
05 p0713 A69-15946
Aircraft steam catapult test facilities, noting construction and operational requirements
10 p1674 A69-24068

STEAM FLOW
Transport properties of steam, analyzing selection, correlation and prediction using statistical mechanical theories
01 p0174 A69-10110
Wet steam injector power losses in nozzle as function of humidity, noting compensation of nozzle throat diameter and fluid flow rates
13 p2246 A69-27490
Pulsed performance of saturated steam reaction jet, comparing steam performance to nine gases for equal temperatures and thrust levels
21 p3785 A69-39021

STEAM GENERATORS
U BOILERS

STEAM TURBINES
Positive displacement Rankine cycle rotary wet steam engine design compared with piston type, noting simplified evaporator and tests
23 p4069 A69-42252

STEARTHERMOPHILUS
Data sampling and statistical verification in large scale sterilization procedures, discussing biological indicator /bacillus stearothermophilus/ and incubation time
05 p0714 A69-15952

STEEL STRUCTURES
NT WELDED STRUCTURES
Fatigue strength reduction of structural steels fatigued in rotating bending after tensile deformation
03 p0450 A69-13916
Plastic moments calculation of continuous steel beams under various loading patterns
05 p0837 A69-16035
Noncontacting torque meters using magnetoelastic properties of steel shafts, discussing gas turbine and industrial applications
[ASME PAPER 69-GT-64] 09 p1500 A69-22480
Load carrying capacity of thin steel plates fatigued by cyclic shear buckling
17 p3052 A69-32980
Plasticity of tubular steel annealed in vacuum furnace and subjected to complex tension and torsion along deformation trajectories containing salient point
21 p3839 A69-39197
Mechanical stress measurement in cylindrical steel subjected to loads inside coaxial transducer, using transducer signal in contactless eddy current method
24 p4296 A69-42654
Structural detection in steel welded joints using higher harmonics from eddy current sensing element
24 p4319 A69-42886

STEELS
NT AUSTENITIC STAINLESS STEELS
NT BAINITIC STEEL
NT CARBON STEELS
NT CHROMIUM STEELS
NT HIGH STRENGTH STEELS
NT MARAGING STEELS
NT MARTENSITIC STAINLESS STEELS
NT NICKEL STEELS
NT STAINLESS STEELS
Corrosion of steel surfaces in contact with molybdenum disulphide noting influence of high humidity, milling and inhibitors
01 p0094 A69-10367
Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment
01 p0096 A69-10612
Microscopic cleavage strength of high nitrogen steel notched bars determined from critical tensile stress criteria using elastoplastic analysis method
01 p0169 A69-10765

Steel selection for heat treated parts, discussing strength and hardness, service conditions, carbon content, quenching, cost, etc
01 p0101 A69-11397

Steel corrosion by iodine noting effects of water and oxygen
03 p0444 A69-13310

Vacuum effect on steel friction, noting changes in residual gases and heat transfer conditions
03 p0434 A69-13915

Methods of protecting industrial steel against hydrogen corrosion at high temperatures and pressures including cladding, carbon additions, surface film coating, etc
04 p0613 A69-14432

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens
04 p0614 A69-14573

Cr gas deposition on steel by means of chromium chloride salt, noting chromizing conditions effect on carbide growth and friction resistance
04 p0605 A69-14577

Nb and Cr additions effects on Hadfield type steel mechanical properties, noting improvement especially at low temperatures
04 p0614 A69-14579

Strain hardening and softening characteristics of maraging steels, Ni-Co and other steels and Ti-Al-Mo alloy
04 p0618 A69-15156

Sheet steel composition effect on gas-tungsten arc welds porosity
04 p0607 A69-15219

Hardenability of ShKh-15 steel, establishing relationship of porosity to sintering method
04 p0619 A69-15390

Creep properties of EP-376 steel under slowly varying loads
05 p0782 A69-16692

Fatigue tests on steel of various diameters using standard and accelerated methods
07 p1233 A69-19315

Atmospheric and alloying elements effects on casehardening by gas carburization of structural steels, noting carbon potential
07 p1167 A69-19344

Microstructural changes in 52100 steel bearing inner rings during cyclic stressing, obtaining thickening rate data on white-etching regions and lenticular carbides
08 p1319 A69-20004

Cr-Ni-Mo steel toughness with strain induced austenite to martensite transformation by TRIP /transformation induced plasticity/
08 p1330 A69-20012

Filler metals for HY steels, discussing tensile and yield strength, elongation and area reduction of butt welds deposited
08 p1320 A69-20406

Hard-drawn steel wire wound pipes and tanks, properties and design calculation, discussing laminates and permissible stress
08 p1414 A69-20487

Cyclic stress-strain and fatigue behavior in aircraft structural metals, discussing hardening and softening in aluminum alloys, steels and titanium alloys
10 p1714 A69-23981

Cyclic deformation resistance and fatigue damage accumulation in aluminum alloys, aircraft steels and titanium alloys
10 p1715 A69-23983

Brittle fracture of steel analyzed using statistical model, attributing occurrence to coalescence of arrested cracks initiated at different points
10 p1803 A69-24033

Arc welding aluminum to steel using bimetal transition insert piece
11 p1891 A69-24929

Steels classification for welded construction according to heat treatment and metallurgical structures
12 p2111 A69-25826

Fusion and solid state welding of steels, considering electron beam, HF resistance, friction and explosive welding
12 p2100 A69-25830

Quantitative interferometric analysis of shock induced wavelength variations in glass and polished steel plates using Q switched ruby laser light source
12 p2089 A69-26185

Fatigue fracture surfaces in cast steel and Al alloys, studying fracture morphology, crack propagation rate and striation spacing with microfractographic methods
12 p2116 A69-26916

Friction resistance between steel and ground basal in ultrahigh vacuum, showing increase by adhesion
13 p2298 A69-28014

Sensitivity decrease of reversible temper brittleness of low alloy steels due to Mo inhibiting effect on phosphorus diffusion
13 p2283 A69-28491

Stannate immersion process for reduction of magnesium-steel couples galvanic corrosion, discussing bath operating limits
14 p2466 A69-29933

Prolonged loading effect on mechanical properties of 18Kh2N4VA steel at low temperature, discussing notched and unnotched specimens
15 p2638 A69-30274

Titanium effect on structural steels mechanical properties noting anisotropy ascribed to sulfides, nitrides and borides
15 p2640 A69-30633

Brittle toughness determination method compared with Robertson and notch impact tests, evaluating steel susceptibility to brittle failure propagation
16 p2795 A69-32796

Fracture toughness of structural steels, discussing evaluation methods for brittle fracture resistance, toughness values and ratings correlation, etc
17 p2989 A69-33554

Dry dynamic friction of brass disk against steel surface reduced using ultrasonic oscillations creating air gap
18 p3135 A69-34587

Standard reference radiographs for weld defects on steel sheets and plates
18 p3150 A69-35425

Annealing effect on transition zone cohesion strength in two layer steel-titanium sheet, investigating role of TiC formation
18 p3159 A69-35450

Cyclic stress frequency on mild steel corrosion fatigue tests, showing strength dependence on potential and stress current
19 p3342 A69-35775

Stress relaxation of heat-resistant steels as function of equal stress during different elevated temperatures, applying results to time residual stress prediction
19 p3342 A69-35778

Pyrolyzed tetraethoxysilane for carburizing steels and Ti alloys at 850-1050 C
19 p3328 A69-36161

Nylon wear curves and friction coefficients for steel-on-nylon pairs determined as function of normal load
19 p3329 A69-36495

Fatigue strength tests of steels simulating boiler installation operating conditions, reproducing corrosion characteristics of water
19 p3347 A69-36741

C content and microstructure effect on electrochemical parameters of Fe and steels in dilute sulfuric acid, discussing Tafel constants and current density
20 p3563 A69-38002

Fatigue resistance of bimetallic sheets of steel and Al alloys by fatigue resonant machine, analyzing lifetime distribution and failure probability
21 p3835 A69-38773

Trace elements role in precision metallurgy for obtaining certain steel properties
21 p3750 A69-39870

Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties, derived from fatigue tests
22 p4047 A69-41064

Friction characteristics during diamond honing of different steel grades, determining lubricating and cooling liquids effect on friction coefficient
22 p3958 A69-41170

Mechanical properties of welded joints in Kh 18N9T steel at very low temperatures using austenitic-ferritic and austenitic welds
22 p3958 A69-41204

Residual stress measurement in steels and composite materials by X ray diffraction, discussing specimen preparation, diffractometer alignment, elastic modulus determination, etc
24 p4331 A69-42736

Low cycle fatigue strength tested on notched and unnotched round steel bars, distinguishing between fatigue lives for crack initiation and propagation
24 p4404 A69-43627

STEEP GRADIENT AIRCRAFT
U V/STOL AIRCRAFT

STEEPEST DESCENT METHOD

Minimum fuel attitude control of spacecraft by Pontryagin principle and extended steepest descent method
03 p0522 A69-14100

Baird-Hitchcock iterative method analog computer simulation by steepest descent
05 p0723 A69-15933

Continuous parameter identification methods for parameter optimization in automatic control system analysis and synthesis, using modified steepest descent optimization
05 p0725 A69-16474

Optimum evasion tactics for aircraft pursued by missile, using steepest ascent method for maximization of distance of closest approach
06 p0866 A69-17401

Power law fluids boundary layer near flat plate studied by series expansion and steepest descent methods, determining velocity gradient and skin friction coefficient
15 p2589 A69-30002

Stress and deformation in cross section of beam during complex loading using steepest-descent method
16 p2873 A69-32132

Steepest ascent convergence improved in orbital glider reentry trajectories optimization problems, discussing bang-bang and cosine control-variable changes
19 p3398 A69-35666

Kinetic model and steepest descent method to optimize one dimensional combustor
[AIAA PAPER 68-644] 19 p3448 A69-35943

Boundary layer equations solved for MHD version of Falkner-Skan problem, using Laplace transform and steepest descent technique
21 p3693 A69-38750

Unitary matrix representing generalized inverses, proving weak method of steepest descent for least squares solution of equations
21 p3755 A69-38926

Branched trajectory optimization for split rocket vehicles using projected gradient or steepest descent method
[AIAA PAPER 69-917] 21 p3808 A69-39346

STEEPNESS

U SLOPES

STEERABLE AN' ENNAS

NT INERTIALESS STEERABLE ANTENNAS

Nomograph for planning circular planar aperture antenna arrays, discussing element totalling and spacing, layout geometry, sidelobe suppression and scan loss from broadside
01 p0037 A69-10017

Equation for beam shift during beam steering of phased array by conjugate element phase shifting
02 p0219 A69-12340

Interferometer at lambda 21 cm using fully steerable paraboloids for processing output signal with on-line digital computer
03 p0411 A69-13468

Dynamic behavior of large steerable radio telescope, showing structural resonance influence on error detection system
03 p0412 A69-14093

Collimation of row and column steered phased arrays
04 p0570 A69-14304

Nonorthogonal beam steering commands for multielement two dimensional phased array antenna
04 p0570 A69-14305

Electronically steered and shaped beams for linear and ring phased array antennas by sampling element signals multiplexed into single channel
04 p0570 A69-14307

Phased array antenna radiator element design, emphasizing configuration selection and reflection loss for beam steering
04 p0572 A69-14321

Hybrid mode Ku-band mixer steering electronic scanning phased array design
04 p0572 A69-14325

High gain self steering repeater for multibeam microwave array system for earth-satellite communications
04 p0573 A69-14330

Electric position servosystems for 50 ton telemetry reception antenna and 1200 ton loading turntable of nuclear power plant
04 p0585 A69-15184

Electrohydraulic radar antenna telecontrol system, discussing pump assembly, hydraulic motor and pump control servojack
04 p0551 A69-15185

Frequency controlled time delay network for broadband phased array antenna steering
04 p0580 A69-15469

Digital radar systems, discussing control computers, beam steering computers, signal processors, mode control, displays and chirp networks
05 p0718 A69-15748

Miniature current discontinuity antennas for VHF and UHF, describing airborne electronically steerable array exhibiting efficiency and minimum structural disturbance
07 p1105 A69-19111

Onboard digital computer evaluation of trigonometric functions for antenna pointing
07 p1089 A69-19745

Broadband steerable arrays design, describing Wulvenberger array with doublet aeriels yielding good radiation patterns and low cost construction
08 p1288 A69-20963

Wideband array antenna IF time delay steering realization, showing steering independence of bandwidth
08 p1290 A69-20974

Large steerable mm wave radio telescope of Simeiz observatory in U.S.S.R. noting computer aided pointing system
10 p1674 A69-23805

Self steered retrodirective antenna arrays with phase synthesizer, combining signals from individual elements at LF levels
11 p1850 A69-24983

High gain self steering microwave repeater for earth-satellite communications noting design, performance and results of color TV transmissions
11 p1839 A69-25294

Number 2 ground communications antenna system on Goonhilly Downs for British Post Office earth station
12 p2044 A69-26923

Bandwidth limitations for phase steered planar arrays in satellite applications, discussing weight reduction by modulo 2 pi beam steering
17 p2941 A69-34082

Beam shape loss /BSL/ for electronically steerable array in search mode, determining optimum search beam locations from BSL computations
20 p3506 A69-37717

S band phased array receiver developed to track automatically moving telemetry transmitter by electronic beam steering
23 p4120 A69-41751

Structural features and performance of 300 ft steerable receiving antenna, discussing aiming error, aperture efficiency, azimuth and altitude drive
23 p4148 A69-42121

Feasibility studies to optimized design for 440 ft steerable filled-aperture radio and radar telescope, discussing parabolic configuration, radome selection, etc
23 p4148 A69-42123

Multisupport suspension arrangements for reducing reflector surface weight-loading distortion in steerable parabolic radio telescope antennas
23 p4149 A69-42128

Structural analysis program for obtaining steerable antenna surface deflections at various altitude angles and wind conditions as design parameters
23 p4230 A69-42129

High sensitivity communication system design consisting of radome enclosed steerable antenna, 500 kw transmitter and microwave configuration compatible with low noise receivers
23 p4149 A69-42131

Large paraboloidal reflector antenna computerized structural design, detailing framing, steering control, support structure, etc
23 p4231 A69-42135

STEERING

Gyroscopic apparent rate meters generating steering moments in inertial navigation systems for determining moving object position and course
18 p3134 A69-34556

Steerable landing gear system consisting of freely casting corotating wheel nose gear, tilttable axle and main gear skids for lifting body spacecraft
[AIAA PAPER 69-790] 19 p3243 A69-35639

STELLAR ATMOSPHERES

NT CHROMOSPHERE

NT SOLAR ATMOSPHERE

NT SOLAR CORONA

Pulsating magnetic white dwarfs as pulsar models, discussing radio emission mechanisms via shock wave interaction with stellar plasma atmosphere
01 p0149 A69-10269

Hydrogen line profiles in various early stars compared with profiles predicted from model atmosphere calculations for rotating and nonrotating early stars
01 p0154 A69-10876

Microturbulent velocity parameter correlation to iron-to-hydrogen ratio for G dwarfs, using model atmosphere abundance analyses
01 p0154 A69-10877

Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission
03 p0505 A69-13077

Stellar image and spectrum distortions during occultation observed from satellite, discussing recovery of atmospheric composition data from stellar spectra
03 p0421 A69-13346

Radiative transfer equations solved for electron scattering stellar atmosphere, using transformation of integrodifferential transfer equations into singular integral equations
03 p0466 A69-13351

Scaled solar and gray-body temperature distribution models compared to determine stellar atmosphere
04 p0653 A69-14626

Stellar spectra taken with rapid scanning Michelson interferometer, noting IR excess due to radiation from clouds surrounding stars
04 p0655 A69-14667

White dwarfs atmospheric pulsation suggested as pulsar mechanism, considering thin adiabatic atmospheric model with constant lapse rate
05 p0828 A69-16659

Temperature distribution for static stellar corona in presence of magnetic field, noting energy flow process
06 p1002 A69-17316

Rayleigh scattering cross sections for He, C, N and O compared with corresponding absorption coefficients, noting opacity of H deficient stars
06 p1002 A69-17319

Emission line profiles in spherical atmosphere expanding with constant radial velocity computed by Monte Carlo methods
06 p1009 A69-17965

Stellar atmospheres radiative opacity, computing metal absorption coefficients
07 p1220 A69-19392

Radiative opacity in stellar atmospheres, discussing effect of UV continuum on photospheric radiation field
07 p1221 A69-19393

Hydrogenic approximation validity in evaluation of atomic energy levels and radiative absorption cross sections for computation of stellar opacity
07 p1223 A69-19626

Dissociation equilibrium of negative H ions in solar type stellar atmospheres, noting H molecule vibrational and rotational levels and continuous thermal radiation
07 p1223 A69-19635

Strong line profiles computed for models of hot expanding extended atmospheres of OB supergiants
07 p1223 A69-19637

Preliminary model atmospheres for cepheid variable eta Aquilae, discussing mass loss processes
08 p1386 A69-20089

Expanding atmospheres in OB supergiants from radial velocity measurements, proposing tentative temperature and velocity fields
08 p1387 A69-20091

Atmospheric structure and energy distribution of planetary nebulae central stars
08 p1393 A69-20570

Acoustic energy generation for helium rich stars, discussing X ray radiation from helium star corona
08 p1380 A69-20645

Chemical composition of stellar atmospheres by model atmospheres, considering atomic transition, line broadening and thermodynamic equilibrium
08 p1402 A69-20904

Chemical composition of atmospheres of oldest Galactic stars, considering element abundances, metal and helium content and nuclear activity of massive stars
08 p1402 A69-20909

Stellar abundances of lithium, deuterium, beryllium and boron indicating nonthermal atmospheric origin
08 p1403 A69-20912

Aurigae star HD 35620 with respect to epsilon Virgins using model atmosphere and high dispersion spectra
08 p1403 A69-20913

Abundance analysis of B3 V star in Orion association, noting titanium and strontium overabundance and oxygen underabundance
08 p1407 A69-21133

- Stellar abundance and origin of elements, discussing stellar atmospheres and gaseous nebulae spectral determination, chronology of galactic halo, etc
09 p1587 A69-21306
- Density inversion in convective zone of stellar photospheres occurring in Eridani atmospheric model under certain conditions
09 p1595 A69-21843
- Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure
09 p1596 A69-22055
- Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature
09 p1600 A69-22199
- Effects of opacity arising from silicon bound-free transition on emergent fluxes and hydrogen line profiles for A and late B stellar atmospheres
09 p1604 A69-22403
- Lyman alpha wing opacity effect on temperature scale and helium content in F and G subdwarf atmospheres
09 p1607 A69-22431
- Stellar atmosphere parameters analyzed over pulsation cycle by high dispersion spectra of cepheid variable RT Aurigae
10 p1778 A69-23605
- Silicon carbide particle growth and motion in carbon star atmospheres
10 p1781 A69-23678
- Graphite particle formation in atmosphere of C type Mira variables, calculating particle size distribution by nucleation and coagulation theory
10 p1782 A69-23681
- Circumstellar grain compositions of stars with various O to C abundance ratios, calculating molecular equilibrium of condensates and gaseous compounds in stellar atmospheres
10 p1786 A69-24103
- Nongray models of atmospheres of early stars, giving Avrett-Krook method of correcting temperature distribution
11 p1954 A69-24361
- Book on stellar atmospheres covering radiation theories, thermal equilibrium, measurement techniques, spectral analysis, etc, emphasizing sun
11 p1961 A69-25084
- Nonadiabatic linear oscillations of stellar atmosphere, discussing wave coupling with stellar pulsation
11 p1961 A69-25104
- Shock wave propagation in gravitational field with pressure and density gradients, considering nonlinear equations of fluid flow
11 p1961 A69-25106
- Physical structure of convective envelopes of population II main sequence stellar models by mixing length theory, emphasizing hydrogen molecule formation and pressure ionization
11 p1961 A69-25109
- Free electron density upper limits in plasma attributed to negative ion formation, noting effect on ionization equilibrium calculations for stellar atmospheres
11 p1928 A69-25255
- Computer program for model stellar envelopes of red supergiants with extended atmospheres
12 p2156 A69-26218
- Physical parameters and chemical composition of DD Lac atmosphere from spectral analysis
12 p2156 A69-26219
- Atmospheric element contents of F stars of Cyg, Her and Boo, using Planckian gradients and computer calculations for growth curves of atmospheric models
12 p2157 A69-26335
- Element contents of supergiant HD 190603 atmosphere based on spectrophotometric analysis including temperatures, turbulent velocity, gravity acceleration and electron concentration
12 p2157 A69-26336
- Hydrogenic transition derived excitation temperatures for Wolf-Rayet stars of WC sequence
12 p2160 A69-26904
- Dwarf and subdwarf stars limb darkening tables for unblanketed nongray radiative model atmospheres
12 p2171 A69-27153
- Star twinkling absence for lunar observation laboratory, noting star distance measurement and laser action in stellar atmospheres
12 p2173 A69-27172
- Steady state model envelopes of Be stars, determining excitation and ionization states for hydrogen atoms
13 p2338 A69-27559
- Stellar atmosphere models of pure hydrogen in hydrostatic, radiative and statistical equilibrium, including Lyman-alpha and continua, discussing nonLTE deviations
13 p2338 A69-27560
- RR Lyrae gap stellar model atmospheres including radiation spectra, temperature radiation and convection, etc
13 p2338 A69-27561
- Hydrogen to He ratio effect on stellar atmospheric structure, considering flux relations, UVB color indices, H line profiles, electron and gas pressures
13 p2339 A69-27562
- White dwarf atmospheric structure, analyzing masses and radii for DA stars and surface parameters of Eri B, based on grid of line blanketed models
13 p2339 A69-27563
- Hayashi effect modifications due to high opacity stellar atmosphere or presence of molecular hydrogen dissociation zone, discussing pressure dissociation role
13 p2342 A69-27594
- Electron gas behavior in nondegenerate envelope of magnetic white dwarf, discussing increased opacity due to magnetic fields
13 p2343 A69-27624
- Fe III line profiles and equivalent widths from spectrograms of zeta Cas and gamma Peg for Fe abundance, using model atmospheres
13 p2347 A69-27715
- Astronomical model explaining shell instability of Pleione /28 Tauri/ extended atmosphere, discussing magnetic field amplification by differential rotation to explosive dissipation in 9.16 years
13 p2347 A69-27716
- Pulsar hypothesis based on oscillating white dwarf surrounded by hot rarefied corona to explain radio emission
14 p2515 A69-28759
- Relative element abundances in Cyg, Her and Boo atmospheres, calculating curves of growth by Planck gradient method for stellar spectra
14 p2519 A69-29356
- P Cyg star HD 190603 atmospheric parameters from spectrograms analyzed by curve of growth method, including ionization and excitation temperatures and electron density
14 p2519 A69-29357
- Surface convection zone in atmospheres of global cluster and halo B stars determined to study He depletion efficiency
14 p2529 A69-29976
- Supergiant HD-33579 in Magellanic cloud by model atmospheres, discussing abundances
14 p2529 A69-29979
- B-type stellar spectra, discussing atmospheres and local thermal equilibrium from considerations of He I and P II lines relative strength
15 p2679 A69-30046
- Neutron star atmosphere and X ray emission spectrum, computing incident protons mean free path for two assumptions
15 p2686 A69-30535
- Nonlinear limb darkening corresponding to nongray stellar atmosphere model applied to light curve for compact eclipsing binary systems
15 p2689 A69-30563
- Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars
15 p2692 A69-30766
- Atmospheric parameters for blue horizontal branch stars in globular cluster NGC 6397 by spectroscopic and photoelectric observations, obtaining mean stellar masses
15 p2692 A69-30770
- Pure hydrogen stellar atmosphere nonLTE models, calculating surface temperature rise due to H alpha line effect on continuum energy balance
15 p2693 A69-30777
- Surface gravity and temperature model atmospheres for O-type stars with UV line blanketing
15 p2693 A69-30778
- Photoelectric index of main sequence stars in F5 to G2 spectral range as indicator of atmospheric microturbulent velocities
15 p2695 A69-30999
- Magnetic field effect on thermal convection onset in compressible polytropic atmosphere compared with results from thin layer approximation
16 p2855 A69-31658
- Shock wave propagation in isothermal atmosphere, discussing radiation and ionization effects on thermal jump
16 p2858 A69-32207
- BetaCrB atmospheric microturbulence velocity, ionization and excitation temperatures, electron pressure and abundances determined by spectrophotometer
16 p2864 A69-32592
- Spectrophotometry of F stars 42 Cyg and nu Her atmospheres, analyzing microturbulence, excitation and ionization temperatures, electron pressures and abundances
16 p2864 A69-32596
- Effective temperature and gravity values for Mn Ap stars by comparing spectrum scans and H line profiles with predictions from atmospheric models
17 p3038 A69-33724
- Microturbulent velocities of A and F stars observed for reciprocal effective temperature range
17 p3039 A69-33729
- Red dwarf star /YZ Canis Minoris/ radio outbursts observation noting stellar atmospheric spectrum, electron density and temperature and total flare energy
17 p3043 A69-34164
- Radial velocities differences as indicator of stellar atmospheric turbulence, applying method to sun
17 p3044 A69-34177
- Alpha Serpentis spectrum study from model atmosphere and growth curves, finding metal abundance ratios five times as great as in Arcturus
18 p3200 A69-35130
- Balmer line spectrum formation in extended atmospheres of Be and shell stars, noting influence of angle of inclination to observer
18 p3204 A69-35349
- Monte Carlo relaxation method for physically self consistent model stellar atmospheres, discussing stability, accuracy and convergence of solution
19 p3425 A69-36337
- Atmospheric models for specified effective temperatures, hydrogen-to-metal ratios and surface gravities in studying metal deficiency effect on stellar atmosphere
19 p3425 A69-36338
- Effective thinness approximation for spectral line formation from photon degradation processes and random walk of scattered photons, discussing optical thickness
20 p3612 A69-38159
- Equivalent absorption line widths of supergiant B1 IA /kappa Cassiopeia/ tabulated with log NH content of atmosphere for various elements
21 p3803 A69-38844
- Stellar lithium and beryllium, discussing production and destruction processes in stellar atmospheres and abundance in various stars
21 p3810 A69-39505
- Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation
21 p3813 A69-39521
- Coronae around helium stars and X ray sources, calculating acoustic energy generation rates in convection zones
21 p3813 A69-39522
- Nongray models representing atmospheres of F and G supergiants computed and tabulated for 5400- 6600 K and various surface gravities
22 p4015 A69-40152
- P Cygni spectroscopy indicating existence and atmospheric structure of accelerating envelope about star, computing line profiles
22 p4023 A69-40471
- Helium-carbon star BD plus 10 degrees 2179 re-analyzed by grid of constant flux models containing right amount of C
22 p4026 A69-40652
- Model atmospheres of late type stars with solar abundances, effective temperatures between 2000-4000 K and gravities corresponding to dwarf, giant and supergiant stars
22 p4027 A69-40654
- Radiation transfer in circumstellar dust envelopes, considering thin and opaque clouds
22 p4027 A69-40655
- Exact solution of macroscopic line transfer equation including electron scattering terms for Milne-Eddington model atmosphere, discussing electron scattering effect on growth curves
22 p4007 A69-40903
- Atomic hydrogen departures from LTE computed for models of B star atmospheres, assuming detailed balance in hydrogen lines
24 p4376 A69-42665
- P Cygni characteristics and spectrum analysis, describing absorption lines, line widths, atmospheric composition, light variations, etc
24 p4391 A69-43803

Beta Orionis spectral line profiles data used to study atmospheric structure
24 p4391 A69-43804

STELLAR DOPPLER SHIFT

U DOPPLER EFFECT
U EXTRATERRESTRIAL RADIATION

STELLAR EVOLUTION

Collection of papers on physics, Volume 31, Part 1, covering stellar evolution, electron transport in semiconductors, plasma microstability, etc
01 p0115 A69-10045

Stellar evolution, discussing stellar structure, pre- and post-main sequence evolution, solar system origin, supernovae, white dwarfs, variable stars and close binaries
01 p0148 A69-10046

Age and initial helium abundance of stars in M15 globular clusters estimated from stellar evolution lifetime ratio
01 p0149 A69-10135

Pulsar discovery at position of suspected supernova remnant, suggesting pulsars as rotating neutron stars formed in stellar explosion
01 p0149 A69-10268

Late type stars, discussing main sequence for Population I and Population 2 stars and ages and chemical composition of old galactic clusters and globular clusters
01 p0158 A69-11325

Rotating star adiabatic axisymmetric motion solved numerically for small initial deviation from hydrostatic equilibrium
02 p0317 A69-11955

Computer study of collisionless self gravitating system using two dimensional model, obtaining gravitational field by solving Poisson equation
02 p0322 A69-12272

Red giants limiting helium core mass dependence on total stellar mass and initial composition from stellar evolutionary models
02 p0327 A69-12710

Supernova explosion theories, discussing neutrino and degenerate matter concepts, thermonuclear reactions in stellar explosions, oxygen conversion into sulfur, Crab Nebula, etc
03 p0509 A69-13356

Kinematic parameters of giant stars and stellar evolution, discussing variations as function of zone position in HR diagram
03 p0517 A69-14095

Time scale of cooling/heating process compared with gaseous clouds contraction/expansion for one solar mass protostar evolution in transparent stage
04 p0651 A69-14366

Mass exchange and evolution of close binaries /Main Sequence stars/
04 p0653 A69-14614

Evolution of close spectroscopic binaries and Am stars
05 p0822 A69-15855

Origin of binaries from angular momentum vectors orientation and separation distribution
05 p0822 A69-15856

Book on diffuse matter in space covering observations of interstellar gas, grains, particle interaction and star formation
06 p0997 A69-16833

Amount of flux carried by convection in late type stars, reevaluating drag role in mixing length theory
06 p1003 A69-17321

White dwarf general relativistic instability toward dynamic collapse and Type I supernovae
06 p1010 A69-17975

Pulsational properties of massive star in He burning evolutionary phase, determining inner structure from stellar model
07 p1218 A69-19279

Dynamical stability in premain sequence stars, discussing adiabatic models for pure hydrogen composition and collapse initiation by low opacity
07 p1220 A69-19388

Stellar samples with various luminosity and A star kinematic properties, discussing influence on application of hydrodynamics equations to evolution problems
07 p1224 A69-19712

Photoelectric observations for stars in and near galactic cluster NGC 3680, discussing age and metal abundance
08 p1384 A69-20054

Convection inhibition effects on premain sequence evolution of solar mass star, discussing largely radiative models
08 p1386 A69-20088

Photoelectric UVB photometry of stars in Puppis-Vela border region for associations of intermediate type stars
08 p1389 A69-20248

Period-age relations for delta Cephei stars based on stellar evolution theory and initial abundance of hydrogen
08 p1392 A69-20564

Binary stars systems with same total mass calculated for evolution from main sequence stage through mass exchange to white dwarfs
08 p1393 A69-20569

Close binaries evolution and Algol type systems origin, discussing hydrogen exhaustion in center
08 p1395 A69-20633

Wolf-Rayet star properties, model and mass loss
08 p1395 A69-20640

Mass loss in Red Giant stage from statistical analysis of H-R diagrams of galactic clusters
08 p1396 A69-20642

Carbon 12 stars to simulate core evolution of planetary nebulae precursors, discussing nuclear shell burning
08 p1396 A69-20649

Pu 244 and I 129 abundances in early solar system and continuous galactic synthesis model of element formation in stars
08 p1397 A69-20695

Helium production in Galaxy, assuming homogeneous evolution of some massive stars due to external factors
08 p1401 A69-20895

Abundance determinations and spectrum intercomparisons in late type peculiar stars, discussing carbon and heavy metal star classes
08 p1403 A69-20910

Cometary origin of meteors and element abundance in primitive solar nebula, discussing neutron capture products in chondrites
08 p1406 A69-20930

Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
09 p1587 A69-21359

Attractive and disruptive forces in conversion of interstellar gas into stars, discussing self gravitation, galactic magnetic field and cosmic ray pressure
09 p1599 A69-22190

Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
09 p1601 A69-22211

Stellar models for Population II lower main sequence stars, discussing uncertainties in radii and bolometric magnitude
09 p1601 A69-22214

Brans-Dicke gravitation theory effects on solar evolution and neutrino flux, discussing solar luminosity
09 p1605 A69-22415

General expressions derived for numerical stellar-interior calculations for nuclear reaction rates, emphasizing density-temperature combinations
09 p1606 A69-22418

Neutrino loss effects on evolution of pure iron stars, considering white dwarf, presupernova models and iron-helium transition
09 p1606 A69-22420

Anharmonic pulsations of 15.6 solar mass star in helium burning phase, discussing radiation pressure, third order terms, higher modes and magnitude variation effects
10 p1771 A69-22853

Solid hydrogen condensation on graphite grains for microwave background, discussing hydrogen grain promotion of galactic and stellar formation
10 p1776 A69-23216

Low mass close binary systems evolution, describing components inside critical Roche lobe in initial detached phases
10 p1777 A69-23310

Binary eclipsing visual star systems angular momentum, discussing evolution
10 p1777 A69-23313

Radial motion of uniform spheres in general relativity, finding conditions for initially inward motion to reverse /bounce/
10 p1779 A69-23607

Density wave theory of galactic spirals, discussing hydrogen distribution, young star distribution, stellar migration, magnetic field structure, density waves in stellar formation, etc
10 p1786 A69-24109

Virial theorem extended to investigate star condensations in large interstellar gas clouds
10 p1787 A69-24119

Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction
10 p1788 A69-24125

Stellar evolution, computing sequences to establish solar model of primordial composition, comparing models with spectroscopic observations
10 p1788 A69-24126

Stellar models for chemical compositions to explain gap above main sequence in color-magnitude diagram of NGC 188
10 p1789 A69-24127

Rb-Sr and other radioactive isotope cosmochronology in solar system, analyzing age of elements and r process
11 p1955 A69-24393

Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability
11 p1956 A69-24394

Solar system age based on decay rate of natural radioactive elements
11 p1961 A69-24972

Evolutionary stages of visual binary components based on magnitudes and color indices
11 p1962 A69-25111

Gravitational stability of spheroidal expansions of rotating gas masses in astronomy, noting mechanism for fragmentation in cosmology
11 p1962 A69-25112

Pulsars and ancient chinese records of supernova explosions, relating luminous intensities, radio sources and evolution
11 p1963 A69-25253

Theoretical models corresponding to initial phases in thermal-gravitational collapse of spherical clouds from interstellar gas for stellar formation
11 p1963 A69-25261

Book on stellar, galactic and nucleosynthetic evolution covering nuclear, Fermi, electromagnetic and gravitational interactions roles
11 p1964 A69-25413

Close binaries evolution and mass exchange for stars of 5 solar masses with very short periods, using modified Henyey method
11 p1964 A69-25414

Stellar physics, Volume 1, covering stellar structure, evolution, physical processes, statistical physics, quantum theory, classical mechanics, etc
12 p2152 A69-25785

Hydrodynamic calculation of 1.42 solar mass white dwarf supernova, considering instability and collapse initiation by electron capture
12 p2156 A69-26210

Stellar evolution model for primeval He abundance in population II stars in globular clusters for big bang confirmation
12 p2156 A69-26228

Toroidal configuration in stellar evolution, noting polar magnetic fields in stars and inclined rotators
12 p2173 A69-27174

Gravitational parameters of highly condensed objects, considering white dwarf evolutionary stages, density and upper mass limit
13 p2334 A69-27190

Pulsars and neutron star formation based on stellar evolution theory, suggesting massive O stars as origin
13 p2337 A69-27517

Residual interstellar gas from protostar formation detected as high luminosity IR object
13 p2327 A69-27593

Activity center in Crab Nebula, noting symmetrical configuration
13 p2343 A69-27621

Solar system light elements investigated assuming Li, Be and B abundance as nuclear reaction products of high energy particles accelerated in early sun formation
13 p2354 A69-28495

IR astrophysics, discussing detection, instrumentation, IR stars and stellar evolution
14 p2516 A69-28868

Lithium depletion in main sequence stars of one solar mass, suggesting e-folding time scale indicated by Coma Cluster data
14 p2517 A69-29089

Intermediate band photometry of G, K and M stars in IR indicating continuous stellar radiation deviant from black bodies
14 p2520 A69-29375

Planetary nebulae nuclei magnitudes in Magellanic Clouds and Galaxy measured photoelectrically, discussing early evolution
14 p2520 A69-29378

H-R diagrams of globular clusters, discussing evolution models with and without mass loss
 14 p2527 A69-29943
 Heavy element abundances in peculiar A stars, investigating nucleosynthesis during massive stars evolution
 14 p2527 A69-29945
 Horizontal branch stars of metal-poor globular clusters in Galaxy evolved from very blue stars, noting substantial mass loss at He-flash
 14 p2529 A69-29977
 Stellar Si burning at constant temperature studied for various initial abundance compositions, noting convergence toward pure Si relaxation
 14 p2529 A69-29983
 Mass point system moving in gravitational field, discussing statistical mechanics, relaxation time and evolution of stellar systems
 14 p2530 A69-29987
 Convective neutral stability in Schwarzschild- Harm model for evolution of stars with large masses
 15 p2681 A69-30422
 Late type cool degenerate stars nonobservability or rarity in terms of internal energy available for radiation from surface
 15 p2681 A69-30423
 Internal structure of rotating stars, analyzing physical changes, circulation influence on mixing during evolution and angular velocity
 15 p2683 A69-30512
 Elastic and inelastic evolution of concentrated gravitational systems, discussing stellar diffusion, evaporation, halos and rotating systems
 15 p2687 A69-30548
 Relativity theorems applied to collapsing stars and expanding universe noting limitations of general relativity from prediction of singularities
 15 p2694 A69-30854
 Preprotostar radio observations suggesting nonthermal radio sources formation with magnetic energy dissipated in particles acceleration
 15 p2701 A69-31531
 Energy release efficiency in gravitational collapse, estimating rest energy fraction from energy conservation, neutron star stability and spherically symmetrical systems collapse considerations
 16 p2853 A69-31594
 Equilibrium models reliability for main sequence stars estimated from systematic applications of physical assumption sets and numerical methods
 16 p2859 A69-32219
 Star formation in interstellar solid hydrogen clouds originating from cellular pressure created by hydrogen condensation onto interstellar grains
 16 p2862 A69-32375
 Lynden-Bell statistical mechanics of relaxation in collisionless one dimensional stellar system, discussing low energy particles distribution
 16 p2862 A69-32376
 Turbulent diffusion inside sun as explanation of solar spindown, Li depletion at surface and neutrino discrepancy, discussing diffusion coefficient and stellar evolution
 16 p2866 A69-32814
 Stellar light element abundances, discussing evolution models for various star types
 16 p2866 A69-32816
 Evolutionary tracks along horizontal branch of models for Population II stars in postred giant phase
 17 p3030 A69-33071
 Theoretical Hertzsprung-Russell diagram for star cluster NGC 1866, allowing stellar evolution study
 17 p3038 A69-33720
 H II regions distribution in nearby irregular I galaxies, attributing asymmetry to localized bursts of star formation
 18 p3190 A69-34289
 Pure carbon 12 stellar models evolution studied to determine production mechanism of planetary nebulae, discussing shell burning and surface layers unbinding role
 18 p3191 A69-34298
 Star collapse under energy losses due to neutrino emission, analyzing self similar asymptotic solutions
 18 p3197 A69-34749
 X ray sources model, describing possible ring of matter around white dwarf near end of active evolution
 18 p3188 A69-35204
 Quarkian core substance in superstars of great masses, discussing existence as primordial state forming baryon and nuclei and origin in stellar gravitational contraction
 19 p3401 A69-35912

Primitive solar nebula physical model considered under angular momentum conservation in collapsing fragment
 19 p3406 A69-36074
 Solar system matter evolutionary beginning traced to chemical elements synthesis by considering radioactive decay irreversible processes
 19 p3406 A69-36076
 Photometric evolution of Nova Delphini 1967 /HR Del/ in UPXYZVS seven color intermediate waveband system, showing position on QQ diagram
 19 p3425 A69-36563
 Statistical relation between expansion velocities and radii of planetary nebulae due to Lyman-c and diffuse Lyman-alpha radiation
 19 p3426 A69-36575
 Synthesis of proton rich nuclei in highly evolved stars, considering p elements production in interior by isobaric transformation
 19 p3428 A69-36837
 Pulsars pulse profiles data collected and interpreted with attempt to infer origin
 20 p3597 A69-37335
 Pulsars cosmic ray mass and charge spectra analyzed for evidence of neutron star origin
 20 p3588 A69-37487
 Cepheid observation, nature and evolution
 21 p3795 A69-38403
 Galaxy model for spiral structure origin
 21 p3797 A69-38537
 General relativity effects on isotropic stars evolution, discussing dynamic stability and white dwarfs
 21 p3798 A69-38540
 Big bang and little bang nucleosynthesis, discussing electron-neutrino or electron- antineutrino excess role in He production
 21 p3801 A69-38813
 Physics of massive starlike objects, discussing high entropy requirement, eventual nonrelativistic collapse and gravitational fields produced by low entropy equilibrium
 21 p3811 A69-39516
 Relativistic star clusters, discussing existence and quasi-static evolution before collapse through gravitational radius
 21 p3814 A69-39570
 Nuclear gamma ray astronomy utilization for stellar interior detection, showing identification of key radioactive nuclei of supernova at explosion time
 21 p3792 A69-39572
 Book on white dwarf formation through mass exchange covering binary star system, primary star mass losses and evolution into white dwarf
 22 p4021 A69-40421
 Pulsational stability of pulsation modes of star in He burning evolution phase
 22 p4022 A69-40467
 Relative abundances U-235/U-238, Th-232/U-238, Pu-244/U-238 and I-129/I-127 at solar system formation time to obtain time evolution of gamma process nuclei
 22 p3986 A69-40766
 Globular cluster star age and initial He abundance from main sequence, horizontal branch and red giant tip models using radiative opacities
 22 p4035 A69-41205
 Main sequence star models for diverse solar masses, covering hydrogen burning phase in core and conditions for dynamic instability and mass exchange
 23 p4208 A69-41286
 Wolf-Rayet stars formation, evolution, age, galactic distribution and relation with open star clusters
 23 p4208 A69-41288
 Gaseous self gravitating mass equations applied to galactic evolution and star formation
 23 p4213 A69-41716
 Stellar evolutionary ages and gravitational theory relations based on initial abundance ratio U 235/U 238 and present interstellar medium heavy element content
 23 p4219 A69-42329
 Proper motions and spectroscopic data of bright members of II Per and I Lac associations analyzed to determine expansion age
 23 p4221 A69-42385
 Neutron star formation, discussing influence of supernova explosions and need of pulsar study
 23 p4222 A69-42393
 Magnetic field implications in stellar formation mechanism including gravitational collapse, magnetic gas cloud fragmentation and stellar winds magnetic braking
 24 p4378 A69-42699

Stellar structures and evolution stressing composition and processes of stellar interiors
 24 p4379 A69-42782
 Nebulosity around FG Sagittae for origin and evolution of planetary nebulae, suggesting ejection of nebular shell
 24 p4381 A69-42887
 Elements origin and development in universe, discussing energy generation, structure and population of stars in Galaxy
 24 p4386 A69-43335
 M giant star possible evolution into S star, using high dispersion spectrograms
 24 p4387 A69-43349
 Rb-Sr and other radioactive isotopes cosmochronology in solar system, analyzing age of elements and r process
 24 p4390 A69-43783
 Stability of spherically symmetrical nonrotating mass systems moving in self consistent gravitational Einstein field, considering quasar applicability
 24 p4390 A69-43784
STELLAR FIELDS
 U STAR DISTRIBUTION
STELLAR INERTIAL NAVIGATION
 U CELESTIAL NAVIGATION
 U INERTIAL NAVIGATION
STELLAR LUMINOSITY
 Stellar brightness attenuation in atmosphere, determining extinction factor using computer calculations
 01 p0157 A69-11192
 Radio galaxies radio luminosity function expressed by means of power dependence, assuming three absolute visual magnitudes for each galaxy
 02 p0325 A69-12563
 Hydrogen alpha line strength in 951 O, B and early A stars from narrow band photoelectric measurements for stellar luminosity
 03 p0511 A69-13435
 Relation between amplitude of light and radial velocity variations of beta Canis Majoris stars
 03 p0517 A69-14126
 Balloon observations of solar far IR spectrum and brightness temperature
 04 p0652 A69-14419
 Pulsating stars, cepheids, RR Lyrae and W Virginis, excitation mechanisms, period- luminosity relation, oscillation modes, location on Hertzsprung-Russell diagram, etc
 04 p0653 A69-14625
 Photometric investigation in UVB and H alpha of early B stars in Scorpio-Centaurus association, computing intrinsic colors and magnitudes corrected for interstellar absorption
 06 p1001 A69-17195
 Light variations of irregular eruptive variables known as RW Aurigae or T Tauri stars, discussing suitability of stochastic model
 06 p0996 A69-17448
 Photoelectric observation of star occultation by Neptune for mean radius determination
 06 p1007 A69-17693
 Photoelectric observation of star occultation by Neptune for scale height determination
 06 p1008 A69-17694
 Flare star AD Leo observations by continuous photoelectric monitoring, noting light curves properties
 06 p1008 A69-17697
 Joint radio-optical observations of flare star UV Ceti in Australasia during September-October 1967
 07 p1214 A69-18666
 Photometric effects of UVB color indices ineffective in detecting double stars in Galaxy
 07 p1216 A69-18854
 Evolution of galaxies, considering masses, gas masses, luminosities, spectra and motions
 07 p1219 A69-19297
 Algorithm for high speed digital computers to evaluate stellar radiative opacities
 07 p1222 A69-19589
 Galactic Wolf-Rayet star distances and distribution on galactic plane, noting concentration difference toward galactic center
 07 p1223 A69-19636
 Stellar samples with various luminosity and A star kinematic properties, discussing influence on application of hydrodynamics equations to evolution problems
 07 p1224 A69-19712
 Variable eruptive star in Hercules, discussing magnitude
 08 p1382 A69-19871

Three color RGU system photometry in Milky Way field in direction of anticentrum, determining absolute brightness, luminosity and density of stars
08 p1387 A69-20119

Photographic magnitudes in UVB system based on photoelectric sequences for stars in NGC 2483 and NGC 2489 open clusters, obtaining spectral classes from objective prism plates
08 p1388 A69-20239

Spatial distribution of stars and obscuring matter in Milky Way field in Kapteyn Selected Area 195 in Circinus, cataloging UVB photometry of stars
08 p1389 A69-20246

Photoelectric measurements of magnitudes and colors in UVB system for stars in Puppis at Boyden Observatory
08 p1389 A69-20249

Photographic magnitudes in UVB system for southern open clusters, giving table of photographic plates
08 p1389 A69-20253

Photographic magnitudes in UVB system based on photoelectric sequences for various open clusters stars, determining spectral classes for brighter stars
08 p1389 A69-20254

Coincidence error between star image and planet edge for entrance pupil and telescope magnification
08 p1314 A69-20383

Color index and mean light curves constructed for Cepheid Variables
08 p1395 A69-20635

Brightness in blue light and radial velocity variability of metallic line star 28 Andromedae
08 p1395 A69-20637

Photoelectric observations of SRA variable CH Cygni reveal strong variability, discussing existence of hot companion
08 p1396 A69-20650

Quasar 3C454.3 optical variations, noting photographic and photometric evidence for period of 340 days
08 p1397 A69-20701

Stars closer than five parsecs including binary systems, luminosity, spectral type and mass
08 p1407 A69-21130

Isophotal wavelengths of U, B, V and R bright star systems for replacing spectrophotometry with broadband multicolor data
08 p1408 A69-21134

Russell method application to combined data of both minima of eclipsing binary using electronic computers
08 p1408 A69-21136

Polaris cepheid variable star system color index and absolute magnitude from photometric observations
08 p1408 A69-21138

Stellar absolute magnitudes recalibration for consistency with photometric distance moduli of clusters
08 p1408 A69-21139

Cepheid stars as distance indicators in extragalactic space, using periodicity-luminosity relation
08 p1408 A69-21147

Limb darkening nonlinear effects on solutions for brightness curves of eclipsing binaries
09 p1588 A69-21364

Pleiades cluster structure, deriving visible density distribution curves for brighter stars
09 p1589 A69-21369

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excesses in Aql and Cyg stars
09 p1590 A69-21381

Quasar red shifts due to cosmological and gravitational factors, assuming correlation of QSO intrinsic luminosity with gravitational red shift values
09 p1597 A69-22151

Distance of bright stars in Cepheus OB2 region by MK spectral classification and UVB photometry, noting early main sequence and supergiant stars
09 p1599 A69-22194

Radial velocity, light and magnetic variations of HD 10783 from concurrent UVB photometric and Zeeman spectroscopic observations
09 p1600 A69-22197

Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
09 p1601 A69-22211

Stellar models for Population II lower main sequence stars, discussing uncertainties in radii and bolometric magnitude
09 p1601 A69-22214

Half intensity angular diameter upper limit of Seyfert galaxy NGC 4151 nucleus, considering nonthermal continuum
09 p1602 A69-22227

Photometric standard based on calibration of Vega by Hayes compared with six color magnitudes
09 p1603 A69-22233

Maximum indicative absolute magnitudes of 33 supernovae, discussing usefulness as distance indicators
10 p1774 A69-22967

Celestial navigation system using photodetectors, comparing numbers and brightness of S4, S20 and silicon stars
10 p1775 A69-23190

Starlight extinction by interplanetary medium evidenced from confirming correlation between star brightness on ecliptic and elongation
10 p1775 A69-23198

Static envelope with no mass outflow for star static core constructed from opacity coefficient dependence on temperature and density
10 p1775 A69-23199

Cepheid variable stars light curves analyzed to determine radii and absolute magnitudes
10 p1775 A69-23200

Cepheids variations used to measure intergalactic distances, noting method of calibrating absolute Cepheid luminosity
10 p1780 A69-23646

Broadband photometry for circumstellar IR emission from cool stars, considering giant and carbon stars
10 p1786 A69-24102

Power spectrum analysis of photometric observations of white dwarf stars for measuring variability of stellar luminosity
10 p1788 A69-24124

Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction
10 p1788 A69-24125

Stellar evolution, computing sequences to establish solar model of primordial composition, comparing models with spectroscopic observations
10 p1788 A69-24126

Absolute dimensions of 34 eclipsing variables having both components near main sequence, comparing mass luminosity and mass spectrum to homogeneous model stars
11 p1952 A69-24248

Interstellar medium density distribution as function of stellar angular spherical coordinates applied to determining stellar motion forces and B stars brightness difference
11 p1955 A69-24386

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness
11 p1955 A69-24391

Improved extraatmospheric wideband sensor nominal S-4 magnitudes of bright stars observed with narrowband UVBRI filter-sensor combinations
11 p1960 A69-24853

Proper motions of low luminosity stars in Hyades cluster, noting photoelectric observations
12 p2152 A69-25797

Faint stars background exposure density and detection limit determined by astrosensitometer for Kodak Spectroscopic Plates
12 p2153 A69-25811

Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
12 p2153 A69-25813

Photographic observations of Nova Her 1963 in 1967, showing nonreturn to prenova stage
12 p2156 A69-26223

White dwarfs structure model for deriving formula for phase density in color-luminosity diagram
12 p2159 A69-26665

Photoelectric and visual minima tabulated for eclipsing binaries, calculating light elements
12 p2160 A69-26853

UVB observations of stars P and 36 Cygni including short period variations and secular changes in brightness
12 p2172 A69-27159

IR objective-prism survey along southern Milky Way for identifying high luminosity stars
13 p2335 A69-27314

Superdense stars energy yield from neutrino emission, assuming incomplete degeneration of elementary particle Fermi gas
13 p2336 A69-27435

Distance and mass-luminosity relation for Hyades stars relative to sun-Sirius type stars
13 p2339 A69-27565

Quasar red shifts distance dependence indicated by visually bright quasar faintness in radio range
13 p2344 A69-27635

Short period variability of B, A and F stars observed in photometry of New Delta Scuti stars
13 p2348 A69-27803

Twelve color stellar photometry for studying galaxy synthesis, relating observations to temperature, luminosity and metal abundance
13 p2348 A69-27804

OB stars absolute magnitude and intrinsic colors
Cleveland system related to MK system
13 p2348 A69-27805

Photoelectric yellow and blue observations of variable TZ bootis light variation and orbital elements, noting maxima and secondary minimum causes
13 p2348 A69-27808

Parallax and mass ratio of visual type K6 dwarf binary system, ADS 1865, BD plus 30339
13 p2349 A69-27811

Relative parallax, fractional mass and luminosity of visual binary 1785 determined from photographs taken with Sproul refractor
13 p2349 A69-27814

Photon emission from highly relativistic stars, using computed differential light delays to calculate blurring of spherically symmetrical emission pulses
13 p2350 A69-27825

Stellar densities and luminosity function determined from stellar data concerning sphere with 20 pc radius around sun
13 p2351 A69-27869

Vela pulsar PSR 0833-45 optical observations and Crab pulsar NP 0532 linear and circular polarization measurements by telescope-photomultiplier
13 p2354 A69-28470

Balmer jumps for B star temperature scale, discussing relation between observed Balmer jumps and observed U-B color indices
14 p2518 A69-29132

Planetary nebulae nuclei magnitudes in Magellanic Clouds and Galaxy measured photoelectrically, discussing early evolution
14 p2520 A69-29377

Errors in magnitude equation and atmospheric dispersion calculated for 400 mm astrograph, emphasizing constant errors due to objective
15 p2646 A69-30162

Protostars collapse and flare up computations, including radiative and convective energy flow terms in hydrodynamic equations of motion
15 p2680 A69-30206

Late type cool degenerate stars nonobservability or rarity in terms of internal energy available for radiation from surface
15 p2681 A69-30423

Interstellar absorption and spatial distribution in northern Aquila with absence of early O-B2 stars, including luminosity function
15 p2683 A69-30513

Comet atmosphere dust component, relating physical properties to brightness characteristics in stellar magnitudes
15 p2685 A69-30528

Response color curves of U, B, V photometric system compatible for stellar observation, including U revision
15 p2689 A69-30562

ET Pegasi photoelectric observations in UVB colors, giving period different from Kaho and new time of maximum light
15 p2694 A69-30787

Five color photometry of X ray source SCO X-1 in 1966-1968, discussing luminosity pulsations and flare activity
16 p2847 A69-31648

Nova Vulpeculae 1968 photographic observations analyzed for magnitudes, indicating 16 July 1968 explosion
16 p2855 A69-31659

Star chains around Eta Carinae, discussing nonrandom real groupings and probability criteria using ADH red sensitive plate without filter
16 p2856 A69-31931

Magnetic star HD 173650 light curves showing maximum luminosity variation occurring in U light, noting minima flattening from U toward V
16 p2858 A69-32208

Two dimensional spectral classifications for bright A stars including magnitudes and colors
16 p2860 A69-32233

Photoelectric observations of W Ursae systems, including observed and computed times of minimum light and period change

16 p2863 A69-32399

Eclipsing binary CQ Cephei envelope variability determined from photoelectric light curve, using astronomical telescope

16 p2864 A69-32593

Bright and faint stars absolute declinations compared in vertical circle systems used in Golosev and Pulko catalogs

17 p3027 A69-32872

UBV photometry of faint stars, discussing photographic plate effect on accuracy, emulsion standardization and use of electronography

17 p3031 A69-33099

Light changes caused by distortion of binary components, computing theoretical brightness variations by numerical integration of emerging atmospheric intensities over visible surface

17 p3044 A69-34179

Limb darkening nonlinearity effects on solutions for brightness curves of eclipsing binaries

18 p3197 A69-34754

Pleiades cluster structure, deriving visible density distribution curves for brighter stars

18 p3198 A69-34758

Galactic dust layer spatial structure and relation to brightness of Milky Way based on analysis of photoelectric color excess in Aql and Cyg stars

18 p3198 A69-34769

Star magnitude variation caused by earth atmosphere related by equation to star altitude, station height, sensor response, spectral radiance, etc

18 p3168 A69-34814

Radio sources identified as quasi-stellar objects through photographic detection of large brightness changes

18 p3201 A69-35206

Wavelength dependence of stellar scintillation, discussing apparatus to detect color effect in twinkling

19 p3401 A69-35809

Bright regions with loops /BRLS/ in sunspot group development, discussing survey of time lapse movies from 1968

19 p3403 A69-35967

Nova luminosity sources during premaximum, considering stellar shell separation and intense ejection of matter

19 p3426 A69-36574

O stars spectrograms study for luminosity and temperature criteria

20 p3598 A69-37463

Fluxes and luminous efficiencies tabulated for main sequence and subgiant stars within reflection effect problem in eclipsing binaries and Chandrasekhar non-gray atmospheric models

20 p3600 A69-37479

M-87 X ray luminosity from balloon-borne detectors, considering background counting rate relation to azimuth

20 p3588 A69-37488

Hot star photogravitational acceleration determined from difference between apex and antiapex brightness, noting constant magnitude and direction of principal component of apex force

20 p3608 A69-38046

Luminosity calibration for subluminous stars and space density of blue subluminous stars south of declination minus 45 degrees based on white dwarfs and binaries

20 p3612 A69-38160

Stars of spectral class F 2 and earlier, brighter than magnitude 11.5, found in four regions of intermediate galactic latitude

20 p3612 A69-38162

IC 2118 nebula luminosity study by polarimetry and photometry, showing role of light scattering and color properties

21 p3817 A69-39726

Projected surface density upper limit of neutral atomic H between M31 and M33 galaxies, noting brightness temperature between NGC 4631 and 4656

22 p4024 A69-40578

Interstellar reddening in solar vicinity, analyzing roles of galactic latitude and longitude and heliocentric distance

22 p4026 A69-40648

Variable HDE 310376 spectroscopic and photometric data, discussing brightness fluctuations, color changes, emission and absorption spectra, etc

22 p4026 A69-40651

O stars absolute magnitudes scales, discussing use of Balmer discontinuity in magnitude calculations

23 p4213 A69-41699

Absolute magnitude dispersion of galactic cluster brightest members as normally distributed random variable independent of cluster richness or faint members luminosity

23 p4215 A69-42113

Observational cosmology in terms of relation between red shift and apparent luminosity of galaxies /Hubble relation/

23 p4219 A69-42328

VV Cephei type binaries cool and hot primary stars light variations, discussing duration, orbital cycle correlation, mass loss, etc

24 p4386 A69-43346

Radio emission from diffuse thermal radio sources in northern Milky Way, giving contour maps

24 p4388 A69-43641

Cassiopeia A luminous filaments motion study noting stellar remnant magnitude

24 p4389 A69-43746

Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference

24 p4390 A69-43776

He I 10830 A line in beta Lyr shell observed by contact image converter tube, analyzing line structure and phase brightness

24 p4390 A69-43781

STELLAR MAGNETIC FIELDS

NT SOLAR MAGNETIC FIELD

Pulsating magnetic white dwarfs as pulsar models, discussing radio emission mechanisms via shock wave interaction with stellar plasma atmosphere

01 p0149 A69-10269

Interplanetary magnetic field intensities, solar and stellar fields measured by Zeeman effect, discussing fields of Jupiter, Mars, Venus and moon

04 p0657 A69-14810

Temperature distribution for static stellar corona in presence of magnetic field, noting energy flow process

06 p1002 A69-17316

Element abundances in magnetic stars, discussing Zeeman effect and anomalies in spectra

08 p1403 A69-20911

Sun-like alternating field generators, discussing dynamo theory of stellar and planetary magnetic fields based on nonmirror symmetrical turbulent motion in conducting fluid

10 p1782 A69-23703

Stellar model with magnetic field accelerating central core rotation to instability for determining rotating star energy and angular velocity distribution dependence

11 p1952 A69-24249

Spectroscopic, photometric and polarimetric observations of magnetic stars, discussing magnetic curves of periodic variables

11 p1954 A69-24362

Micrometric and photometric measurements of coude spectra of magnetic variable HD 125248, showing spectroscopic binary nature and computing orbital elements

11 p1963 A69-25264

Toroidal configuration in stellar evolution, noting polar magnetic fields in stars and inclined rotators

12 p2173 A69-27174

Electron gas behavior in nondegenerate envelope of magnetic white dwarf, discussing increased opacity due to magnetic fields

13 p2343 A69-27624

Local stability of rotating stars in toroidal and poloidal magnetic fields, using linear stability analysis

13 p2346 A69-27707

Two channel polarimeter capable of eliminating atmospheric scintillation effects used for observation of magnetic stars and eclipsing binary u Herculis

13 p2347 A69-27713

Astronomical model explaining shell instability of Pleione /28 Tauri/ extended atmosphere, discussing magnetic field amplification by differential rotation to explosive dissipation in 9.16 years

13 p2347 A69-27716

Pulsars suggested as magnetic rotating neutron stars with unstable oscillations

13 p2352 A69-27912

Stellar magnetic field generation by convective motions of surface layers of slowly rotating stars

15 p2688 A69-30559

Magnetic field effect on neutron beta decay rate, considering calculations applicability to elementary particle production

15 p2690 A69-30694

Metallic line /Am/ stars Zeeman observations, showing 16 Ori as spectroscopic binary, dubious binary nature of 15 Vul and doubtful presence of magnetic fields

15 p2692 A69-30775

Plasma viscosity relation to stellar magnetic fields generation, taking into consideration angular momentum transfer

15 p2700 A69-31492

Partial resolution of Zeeman patterns in spectrum for magnetic field existence in atmosphere of 53 Camelopardalis

20 p3611 A69-38155

HD 188041 magnetic field variations from Zeeman measurements correlated to spectral variations

20 p3611 A69-38156

Uniformly and differentially rotating stars taking into account magnetic fields effects, discussing radiative and hydrostatic equilibrium in nonspherical configurations, stellar atmospheres, etc

21 p3812 A69-39519

Rotating neutron stars with magnetic fields symmetric about rotation axis considered for pulsar model

22 p4027 A69-40657

A-type stars investigation for anomalous spectral line intensities, discussing Hertzprung-Russell diagrams, rotational velocities, magnetic fields and abundances

23 p4218 A69-43232

Magnetic field implications in stellar formation mechanism including gravitational collapse, magnetic gas cloud fragmentation and stellar winds magnetic braking

24 p4378 A69-42699

STELLAR MASS

Red giants limiting helium core mass dependence on total stellar mass and initial composition from stellar evolutionary models

02 p0327 A69-12710

Time scale of cooling/heating process compared with gaseous clouds contraction/expansion for one solar mass protostar evolution in transparent stage

04 p0651 A69-14366

Photographic plates based parallax determinations of nearby stars weights, relative and absolute values, probable error and observation interval

04 p0663 A69-15381

Galactic model with differential rotation, discussing experiments on bar and cylindrical galaxy and spiral and loop structures formation

07 p1216 A69-19204

Pulsational properties of massive star in He burning evolutionary phase, determining inner structure from stellar model

07 p1218 A69-19279

Element synthesis in stars of galactic halo as possible explanation for heavy elements presence in supermassive objects

07 p1219 A69-19296

Evolution of galaxies, considering masses, gas masses, luminosities, spectra and motions

07 p1219 A69-19297

Absolute magnitudes and intrinsic color photoelectric observations of Wolf-Rayet stars in Magellanic Clouds and Galaxy

07 p1221 A69-19583

Curve-of-growth abundance analysis for main sequence lambda Bootis stars, suggesting type Ap star characteristics

08 p1385 A69-20062

Convection inhibition effects on premain sequence evolution of solar mass star, discussing largely radiative models

08 p1386 A69-20088

Photographic magnitudes in UBV system based on photoelectric sequences for stars in NGC 2483 and NGC 2489 open clusters, obtaining spectral classes from objective prism plates

08 p1388 A69-20239

Photographic magnitudes in UBV system based on photoelectric sequence for stars in NGC 2546, Pi 1, NGC 2579 and Cr 185, obtaining spectral classes

08 p1388 A69-20240

Binary stars systems with same total mass calculated for evolution from main sequence stage through mass exchange to white dwarfs

08 p1393 A69-20569

Helium production in Galaxy, assuming homogeneous evolution of some massive stars due to external factors

08 p1401 A69-20895

Stars closer than five parsecs including binary systems, luminosity, spectral type and mass

08 p1407 A69-21130

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems

09 p1589 A69-21368

Structure and pulsational properties of massive stars with helium cores and thin hydrogen poor envelopes

09 p1606 A69-22421

Neutron proton plasma properties in massive stars and supernovae, discussing neutrino emission

10 p1756 A69-22814

Low mass close binary systems evolution, describing components inside critical Roche lobe in initial detached phases

10 p1777 A69-23310

Nonradial oscillation modes of massive stars determined by Ritz method application to variational principle, allowing for gravitational perturbation

10 p1785 A69-24036

Star counts in star cluster neighborhoods, obtaining ratios of corona radius to nucleus radius as function of cluster mass

11 p1951 A69-24246

Close binaries evolution and mass exchange for stars of 5 solar masses with very short periods, using modified Henyey method

11 p1964 A69-25414

Gravitational parameters of highly condensed objects, considering white dwarf evolutionary stages, density and upper mass limit

13 p2334 A69-27190

White dwarf atmospheric structure, analyzing masses and radii for DA stars and surface parameters of Eri B, based on grid of line blanketed models

13 p2339 A69-27563

Distance and mass-luminosity relation for Hyades stars relative to sun-Sirius type stars

13 p2339 A69-27565

Parallax and mass ratio of visual type K6 dwarf binary system, ADS 1865, BD plus 30339

13 p2349 A69-27811

Photographic recording of parallax, proper motion, acceleration and orbital motion of Barnards star, noting mass ratios to jupiter

13 p2349 A69-27813

Relative parallax, fractional mass and luminosity of visual binary 1785 determined from photographs taken with Sproul refractor

13 p2349 A69-27814

Visual binary star parallax, motions and mass ratio determined using photographic data

13 p2349 A69-27815

Radiative effect on rotating gaseous magnetic mass stability in thermodynamic equilibrium, including small oscillations stability

14 p2522 A69-29596

H-R diagrams of globular clusters, discussing evolution models with and without mass loss

14 p2527 A69-29943

Horizontal branch stars of metal-poor globular clusters in Galaxy evolved from very blue stars, noting substantial mass loss at He-flash

14 p2529 A69-29977

Validity range of nuclear quasi-equilibrium approximation for stellar silicon burning, discussing time rates of nuclear abundance changes and temperature effect

14 p2529 A69-29984

Convective neutral stability in Schwarzschild-Harm model for evolution of stars with large masses

15 p2681 A69-30422

Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars

15 p2692 A69-30766

Atmospheric parameters for blue horizontal branch stars in globular cluster NGC 6397 by spectroscopic and photoelectric observations, obtaining mean stellar mass

15 p2692 A69-30770

Simulated gravitational lens made of Plexiglass for demonstrating stellar gravitational lens phenomena, presenting partial cross section

15 p2653 A69-31163

Frequency distribution of star masses formed from solid H grains clouds, noting agreement with Salpeter initial mass function

16 p2862 A69-32372

Stars kinetic energy and escape rates from isolated cluster with arbitrary stellar mass distributions, assuming spherical symmetry and velocity distribution isotropy

17 p3038 A69-33721

Masses of visual binaries above main sequence with published orbits determined as function of position in H-R diagram, using spectroscopic parallaxes

18 p3195 A69-34429

Spatial density distribution in star clusters, determining relation between mean stellar mass and density range in subsystems

18 p3198 A69-34757

Quarkian core substance in superstars of great masses, discussing existence as primordial state forming baryon and nuclei and origin in stellar gravitational contraction

19 p3401 A69-35912

Eta Cassiopeiae orbit analysis with emphasis on multiple exposure photographic observations, noting companion mass

22 p4013 A69-40120

Book on white dwarf formation through mass exchange covering binary star system, primary star mass losses and evolution into white dwarf

22 p4021 A69-40421

Semiconvection zone occurrence in massive stars determined by stability considerations

22 p4022 A69-40470

Evolutionary dynamic model for H II region produced by massive stars within dense dust-laden clouds, discussing grain sputtering and time scales

22 p4025 A69-40646

Main sequence star models for diverse solar masses, covering hydrogen burning phase in core and conditions for dynamic instability and mass exchange

23 p4208 A69-41286

Eclipsing binaries spectroscopic and photometric data compared to Iben and Horn models of main sequence stars, noting stellar mass effects

23 p4208 A69-41287

STELLAR MASS EJECTION

Radio emission sources nature in terms of special relativity theory

03 p0499 A69-13078

Mass motions in flares, quiescent filaments or other eruption phenomena at solar surface, noting loops, sprays, surges, etc

06 p0994 A69-17438

Sunspot ejection of filaments, flare surges and flare sprays, discussing bright and dark matter divergence from western spot

06 p0995 A69-17441

Stellar chromosphere and flare spectra observations with image tube spectrograph using He 10803 line, noting possible contribution to X ray background

06 p1003 A69-17449

Nonisotropic mass ejection from components of close binary system effects on orbital elements for small initial eccentricity case

08 p1395 A69-20634

Wolf-Rayet star properties, model and mass loss

08 p1395 A69-20640

Mass loss observed in Of, Wolf-Rayet and OB supergiant stars from P-Cygni profiles in far UV resonance lines

08 p1395 A69-20641

Mass loss in Red Giant stage from statistical analysis of H-R diagrams of galactic clusters

08 p1396 A69-20642

Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone

08 p1396 A69-20644

Spectroscopic evidence for mass loss from CH Cygni based on observations of chromospheric lines of high dispersion spectrograms

08 p1396 A69-20651

Helium production in Galaxy, assuming homogeneous evolution of some massive stars due to external factors

08 p1401 A69-20895

Amplitudes and rates of brightness increase during supernova outbursts, calculating released energies

09 p1587 A69-21358

Static envelope with no mass outflow for star static core constructed from opacity coefficient dependence on temperature and density

10 p1775 A69-23199

Galaxies classified by matter content of nucleus, discussing evolution

11 p1953 A69-24351

Dynamical effects of mass exchange in close binary systems ejection modes from point of view of orbital elements evolution

11 p1962 A69-25113

Orbital parameters changes computation in table form for binary systems with more massive component mass decrease

11 p1962 A69-25120

Nonmesonic to mesonic decay ratio estimated for delta hydrogen hyperfragments

12 p2133 A69-26298

Intergalactic matter capture by NGC 1614 nucleus, stellar ejection from galaxies, explosive separation of close binary and other unsteady phenomena in galaxies

12 p2169 A69-27061

Fine structure of absorption lines of circumstellar Ca ejected from Nova Delphini 1967, determining ejection dates and photospheric radius

13 p2346 A69-27709

Radio emission sources nature in terms of special relativity theory

14 p2509 A69-28760

Nova thermal explosion, analyzing hydrogen combustion after penetration from white dwarf shell into degenerate core

15 p2682 A69-30507

Wolf 359 flare spectra obtained with Palomar telescope, noting hydrogen and He line enhancement, broadening and violet shifting

16 p2852 A69-32817

Amplitudes and rates of brightness increase during supernova outbursts, calculating released energies

18 p3197 A69-34748

Low energy cosmic ray density in Galaxy due to pulsar PSR 0833-45 caused by mass ejection

18 p3187 A69-34995

Nova luminosity sources during premaximum, considering stellar shell separation and intense ejection of matter

19 p3426 A69-36574

Steady state spherically symmetrical ejection of multicomponent plasma from sun determined with hydrogen approximation, considering ion composition

20 p3594 A69-37018

Plasma acceleration away from rotating magnetized astrophysical objects analyzed and applied to pulsar NP 0532 for magnetic moment and mass loss rate calculations

20 p3598 A69-37419

Spiral arms interpreted and derived as consequences of galactic nuclei explosion

20 p3599 A69-37468

Radial pulsations of neutron star losing mass, interpreting Crab Nebula pulsar observed period and secular increase of period

20 p3604 A69-37573

Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence

20 p3607 A69-38041

Stellar mass loss - Conference, Trieste, September 1968

21 p3812 A69-39520

Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation

21 p3813 A69-39521

Coronal jet resulting from chromospheric burst observed during 22 September 1968 total solar eclipse

22 p4028 A69-40716

Photoelectric photometer monitoring of flare star UV Cet, comparing time intervals between flares to those of YZ CMi

22 p4032 A69-40945

Continual photoelectric monitoring of flare star YZ CMi by photoelectric photometer attached to reflector, giving light curves for flares

22 p4032 A69-40947

STELLAR MOTIONS

Nonlinear adiabatic pulsations of sequence of massive stars of uniform composition, allowing for radiation pressure variations

01 p0149 A69-10266

Relative proper motion of blue star in field of pulsar CP 1919 determined from photographic data analysis

01 p0149 A69-10270

Perturbations on major axes of slow moving comets in nearly parabolic original orbits by fast moving stars, discussing statistics of stellar encounters

01 p0153 A69-10871

Rotating star adiabatic axisymmetric motion solved numerically for small initial deviation from hydrostatic equilibrium

02 p0317 A69-11955

Computer models of one dimensional stellar problems, discussing fast relaxation of unsteady state to Fermi-Dirac distribution and slow relaxation to thermal equilibrium

02 p0323 A69-12274

Sun motion with respect to extragalactic universe, discussing local supercluster kinematics

03 p0513 A69-13769

Relation between amplitude of light and radial velocity variations of beta Canis Majoris stars

03 p0517 A69-14126

- Light and radial velocity changes in close binary systems, including limb and gravity darkening of distorted stars in analysis of spectroscopic effects
04 p0653 A69-14612
- Probable errors in FK4 catalog of star positions and proper motions determined by Scott method
05 p0823 A69-16041
- Stellar escapes from clusters and temporary captures in restricted three body problem with equal masses
05 p0827 A69-16595
- Rotational velocity correlation to space velocity for early stars, suggesting attainment of spin momentum and space velocity during close encounter in small cluster
06 p1010 A69-17972
- Time variation of velocity spheroid dispersion, axis ratio and vertex deviation in Galaxy due to star-cloud encounters
07 p1215 A69-18668
- Evolution of galaxies, considering masses, gas masses, luminosities, spectra and motions
07 p1219 A69-19297
- Stellar galactic orbit perturbation by irregularities in distribution of gas cloud for motion inclined to galactic plane
07 p1223 A69-19634
- Stellar samples with various luminosity and A star kinematic properties, discussing influence on application of hydrodynamics equations to evolution problems
07 p1224 A69-19712
- Stellar orbits in galactic plane represented as generalized Keplerian motion
08 p1381 A69-19792
- Dynamical friction on star in postNewtonian approximation of general relativity
08 p1386 A69-20072
- Space motions of bright F type stars from parallaxes obtained by photometry
08 p1386 A69-20074
- Radial velocity curve, orbital elements and masses and radii of components of eclipsing binary system 9 Chamaleontis /BV 430/
08 p1391 A69-20395
- Nonisotropic mass ejection from components of close binary system effects on orbital elements for small initial eccentricity case
08 p1395 A69-20634
- Planckian stellar velocity distribution function, moduli and projections on coordinate planes determined by ellipsoidal approximation
09 p1589 A69-21370
- Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas
09 p1589 A69-21371
- Stability of thin rotating disks of stars with respect to axisymmetric disturbances, noting overstabilities dependence on epicycles sizes
09 p1605 A69-22413
- Eclipsing binary AU Puppis studied photoelectrically in yellow and blue light, noting period decrease by 1.3 sec in last 40 years
10 p1774 A69-22968
- Double galaxies consisting of components moving away from each other with hyperbolic velocities from statistical tests of hypotheses
10 p1775 A69-23203
- Bright fundamental stars right ascensions observed in Chile, discussing instruments, declination range, systematic errors, etc
10 p1777 A69-23388
- Relative proper motions of stars measured by microscope projection technique
10 p1778 A69-23570
- Density wave theory of galactic spirals, discussing hydrogen distribution, young star distribution, stellar migration, magnetic field structure, density waves in stellar formation, etc
10 p1786 A69-24109
- Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star
11 p1955 A69-24385
- Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference
11 p1955 A69-24386
- Delta Cepheid blue companion /delta Cep C/ radial velocity variations, noting spatial proximity between delta Cep A and C
11 p1957 A69-24405
- B star HD 19180 spectral variations from B-3 to B-8 noting helium to carbon line intensity ratio, interstellar D line strength and radial velocity measurements
11 p1958 A69-24594
- Proper motions of low luminosity stars in Hyades cluster, noting photoelectric observations
12 p2152 A69-25797
- Proper motions and positions of X ray source Sco X-1 and surrounding stars derived from astrophysical plates using overlap technique
12 p2152 A69-25798
- Oort constant A and solar motion components in galactic plane determined from Classical Cepheids data
12 p2153 A69-25804
- Stellar radial velocities derived from line positions measurements by precision screw microphotometer
12 p2153 A69-25810
- Magnetic models of pulsars and rotating neutron stars to explain narrowness of radiation beam in polar diagram
12 p2172 A69-27168
- Distance and mass-luminosity relation for Hyades stars relative to sun-Sirius type stars
13 p2339 A69-27565
- Isothermal H II region dynamics for moving central star, integrating equations numerically using holograph transformation and Riemann invariants
13 p2347 A69-27712
- Messier 51 ionized hydrogen observations, discussing H II regions, radial velocities and galactic mass, rotation and noncircular nuclear motions
13 p2347 A69-27720
- Galactic force law from observed stellar velocity and space density distribution
13 p2348 A69-27802
- Flare star astrometric study to determine possible variable proper motion
13 p2348 A69-27810
- Parallax and orbital motion of spectroscopic binary Tau Persei determined from Sproul refractor photographs
13 p2349 A69-27812
- Photographic recording of parallax, proper motion, acceleration and orbital motion of Barnards star, noting mass ratios to jupiter
13 p2349 A69-27813
- Visual binary star parallax, motions and mass ratio determined using photographic data
13 p2349 A69-27815
- Sco-Cen B stars radial velocities, determining spectroscopic binaries
14 p2519 A69-29136
- Radial velocities of southern OB stars and supergiants noting tabulation of information
14 p2519 A69-29368
- Radial velocities of planetary nebulae in Magellanic Clouds and Galaxy, discussing Population I and II kinematics
14 p2520 A69-29377
- Close galactic encounters in dense galactic clusters, discussing effects on internal motions dispersion and stellar dissipation
14 p2521 A69-29461
- Photoelectric observation of passage of stars through meridian, detailing error sources and corrective technique
14 p2521 A69-29507
- Chapman-Enskog theory applied to observed stellar velocity distribution function, attributing deviation from Maxwellian function to negative K effect
15 p2687 A69-30549
- Member stars number in globular clusters M3 and M5 determined from photometric and kinematic characteristics
15 p2688 A69-30561
- Collisionless stability of relativistic, spherically symmetric star clusters against radial perturbations, considering one dimensional sufficient criteria
15 p2691 A69-30765
- Optimization techniques for stellar kinetic theory problems, discussing kinematics distribution function, cosmic gas dynamics, interstellar matter, etc
15 p2695 A69-31004
- Revised proper motions for semiregular and RV Tauri variable stars tabulated from meridian observations and photographic positions, discussing computation methods
15 p2696 A69-31221
- Monograph on proper motions of RR Lyrae variables, discussing data acquisition analysis
15 p2700 A69-31493
- Spectroscopic observations of HD 4174 star by superimposition of emission and M1-I absorption spectra, revealing intensity and radial velocity variations
16 p2858 A69-32214
- Radial velocity and spectral line variations of HD 124224, suggesting main sequence star of B6 to B9 spectral type
16 p2859 A69-32223
- Star motion perturbations by invisible body, stressing bright bodies invisible by position near perturbed star
17 p3034 A69-33407
- Proper motions, color magnitude and distance modulus of stars in galactic cluster in direction of Large Magellanic Cloud using Cape wide angle photometry
17 p3034 A69-33411
- Relativistic effect detection on pulsar frequencies by general relativity theory, assuming pulsars are orbiting objects
17 p3037 A69-33645
- Microturbulence velocity estimation method for solar type stars using low dispersion spectra of narrow band photometry
17 p3044 A69-34178
- Dwarf elliptical galaxies of local group, discussing star distribution and orbits, formation process, origin and distribution about Milky Way
18 p3194 A69-34424
- Planckian velocity distribution function, moduli and projections on coordinate planes determined by ellipsoidal approximation
18 p3198 A69-34759
- Motion and dispersion of peculiar velocities of stars in gravitational condensing interstellar gas
18 p3198 A69-34760
- Radial velocity measurements with objective prisms and results in SA8
18 p3201 A69-35143
- Geometric determination of visual binary orbits, noting inadequacy of graphical method based on apparent orbit ellipse properties
19 p3403 A69-35968
- Open cluster NGC 7128 distance and reddening determination by photometry
20 p3598 A69-37465
- HD 200775 spectrum analyzed for absorption lines wavelengths and equivalent widths, noting role for NGC 7023
20 p3599 A69-37469
- Zeta Tauri shell spectrum radial velocity measurement results compared with extrapolated seven year curve by Delplace
20 p3599 A69-37471
- Monte Carlo method for constructing catalogs of stellar positions, distances and velocities
20 p3605 A69-37829
- NonJeans gravitational instability of stars and interstellar gas in Galaxy due to wave interaction with stars having velocity near wave phase velocity
20 p3607 A69-38037
- Hot star photogravitational acceleration determined from difference between apex and antiapex brightness, noting constant magnitude and direction of principal component of apex force
20 p3608 A69-38046
- Gas in H II regions and associated stars radial velocities correlation and systematic difference suggesting relationship between nebulae and stars
20 p3611 A69-38150
- Dynamical analysis of Bernard star motion, yielding companions in co-revolving, approximately coplanar, circular orbits
22 p4013 A69-40119
- Eta Cassiopeiae orbit analysis with emphasis on multiple exposure photographic observations, noting companion mass
22 p4013 A69-40120
- Resonant asteroids in statistically underpopulated Kirkwood gaps, noting osculating mean motion distribution
22 p4013 A69-40122
- Solar motions respecting high velocity atomic hydrogen clouds and local stellar group
22 p4035 A69-41209
- Radial velocities for O and B stars in Milky Way field in Scorpius determined from prism spectrograms with specific dispersion at H gamma line
23 p4211 A69-41489
- Proper motions and spectroscopic data of bright members of II Per and I Lac associations analyzed to determine expansion age
23 p4221 A69-42385
- Stellar radial velocity measurement accuracy dependence on dispersion, spectrum and line width
24 p4386 A69-43347
- Stars with motions greater than 100 km/sec perpendicular to galactic plane, tabulating data for CH, subdwarfs, cepheids and horizontal branch stars
24 p4386 A69-43348
- Cassiopeia A luminous filaments motion study noting stellar remnant magnitude
24 p4389 A69-43746

STELLAR OCCULTATION

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star
24 p4390 A69-43775

Interstellar medium density distribution as function of stellar action spherical coordinates applied to determining stellar motion forces and B stars brightness difference
24 p4390 A69-43776

Delta Cepheid blue companion /delta Cep C/ rapid radial velocity variations, noting spatial proximity between delta Cep A and C
24 p4391 A69-43795

STELLAR OCCULTATION

Neptune mean diameter determination by photometric observations of stellar occultation by planet
01 p0150 A69-10386

Radio source positions and structures from occultation observations, suggesting optical identifications
02 p0326 A69-12704

Photoelectric observation of star occultation by Neptune for mean radius determination
06 p1007 A69-17693

Photoelectric observation of star occultation by Neptune for scale height determination
06 p1008 A69-17694

Solar occulting disk diameter at radio wavelengths derived from consideration of slightly deviated rays
09 p1607 A69-22432

Stellar occultations by moon observed with ear and eye method, not taking into account corrections to radio time signals
10 p1776 A69-23205

Stellar photometry during occultations by earth, discussing feasibility of lunar based observations
13 p2345 A69-27651

Nonocculted areas of Algor during eclipse using Balmer discontinuity spectrophotometric method, determining apparent stellar diameters
16 p2858 A69-32216

Relative positions of Neptune and BD minus 17 degrees 4388 star determined by Yale-Columbia refractor and double star camera, noting ephemerides correction from stellar occultation
17 p3041 A69-33814

Photoelectric observations of BD minus 17 degrees 4388 occultation by Neptune on 7 April 1968, studying light curves during immersion and emersion of star
17 p3041 A69-33815

Neptune radius, density and atmosphere deduced from observations during occultation of BD minus 17 degrees 4388 by Neptune
17 p3041 A69-33816

Venusian cloud layer radius, discussing error in determination of occultation level height of Regulus by Venus
18 p3203 A69-35331

Neptune equatorial radius, diameter, flattening and upper atmosphere optical properties determined from photometric curves of star BD-17 occultation
21 p3796 A69-38471

Photographic observations of Neptune occultation of BD-17 degree 4388, Zodiac Catalog number 2232 in April 1968, noting geocentric separation and planet radius
23 p4221 A69-42388

STELLAR RADIATION

Neutrino radiation in universe with emphasis on stellar neutrino radiation, analyzing emission during nuclear fusion of C-N, He and Ne-Na cycles
01 p0145 A69-10754

Late type variable stars time dependent photometry and polarimetry in blue and violet, noting correlation for stellar brightness and degree of polarization
01 p0158 A69-11326

UV and X ray radiations of stars and interstellar gas of Milky Way and remote galaxies
02 p0316 A69-11906

Galactic X ray sources, discussing location along spiral arms, age and properties of stars responsible for emission
03 p0497 A69-12930

Light and radial velocity changes in close binary systems, including limb and gravity darkening of distorted stars in case of spectroscopic effects
04 p0653 A69-14612

Orion nebula flare type variable stars amplitudes, light curve sections and stability
06 p1002 A69-17264

Radio emission from supernova remnants, reviewing evolution, structure, spectra and polarization, plus

identification, characteristics, surface brightness and radio emissive remnants distance
06 p1002 A69-17314

Solar type stellar activity, considering solar activity origin and correlation with stellar distances
06 p0996 A69-17447

Joint radio-optical observations of flare star UV Ceti in Australasia during September-October 1967
07 p1214 A69-18666

Algorithm for high speed digital computers to evaluate stellar radiative opacities
07 p1222 A69-19589

Calculated profiles of He 14471 and 4922 A and forbidden components star spectra, using quasi-static and impact approximations
07 p1224 A69-19713

Color excesses in Kapteyn Selected Area 4 using photovisual /yellow/ and photographic /blue/ magnitudes from catalog data
08 p1388 A69-20241

Radio emission from magnetic neutron stars as possible model for pulsars, noting optical and IR emission bands
08 p1397 A69-20729

Continuous radiation spectrum of Taurus A in far IR using indium antimonide detector of Rolin type
09 p1597 A69-22156

Spectroscopic observation of quasi-stellar objects noting red shifts
09 p1602 A69-22226

Starlight extinction by interplanetary medium evidenced from confirming correlation between star brightness on ecliptic and elongation
10 p1775 A69-23198

Solid hydrogen mantle condensation accounting for lack of detectable alpha hydrogen in star clusters and OB associations
10 p1776 A69-23214

Early type stars spectrophotometric parameters, discussing hydrogen beta, gamma and delta line widths, magnitude, etc
10 p1777 A69-23387

Interstellar dust distribution ideas to explain observed variability in starlight polarization and similar phenomena
10 p1785 A69-24050

Improved extraatmospheric wideband sensor nominal S-4 magnitudes of bright stars observed with narrowband UBVRi filter-sensor combinations
11 p1960 A69-24853

Wavelength dependence of polarization and UBVRi photometry of highly polarized stars, correlating IR interstellar extinction with maximum polarization wavelength
12 p2153 A69-25809

X ray polarization from Sco X-1, noting spurious instrumental polarization due to cosmic ray anisotropy using X ray polarimeter
12 p2149 A69-26315

Stellar diameter interferometric measurements, discussing double slit arrangement and illumination in focal plane
13 p2334 A69-27305

Superdense stars energy yield from neutrino emission, assuming incomplete degeneration of elementary particle Fermi gas
13 p2336 A69-27435

Book on astrophysics and stellar astronomy covering stellar radiation, binary and variable stars, positions, magnitudes, galaxies, cosmologies, etc
13 p2337 A69-27463

Hydrogen atoms in interstellar grains as source of stellar flux absorption, noting crystal environment effect on atomic hydrogen Lyman alpha transition
13 p2337 A69-27518

Exterior field equations for radiating spheres with zero limb darkening in relativity and Bondi coordinates, determining radiative flux and pressures
13 p2339 A69-27566

Polarization of continuum background of planetary nebulae in window in visible spectrum from scattering of nucleus star radiation by electron gas
13 p2339 A69-27567

Nuclear energized pulsational instability of stars based on linear quasi-adiabatic theory, including models with hydrogen burning shells
13 p2340 A69-27576

Two channel polarimeter capable of eliminating atmospheric scintillation effects used for observation of magnetic stars and eclipsing binary u Herculis
13 p2347 A69-27713

Photon emission from highly relativistic stars, using computed differential light delays to calculate blurring of spherically symmetrical emission pulses
13 p2350 A69-27825

Shock heated gas radiation frequency dependence and UB and B-V color indices determination, studying role in close binary systems luminescence
13 p2350 A69-27860

White dwarfs periods of radial oscillations, considering ion gas contribution to adiabatic coefficient computation
14 p2517 A69-29090

Intermediate band photometry of G, K and M stars in IR indicating continuous stellar radiation deviant from black bodies
14 p2520 A69-29375

Late type stars with emission peak wavelength approximating graphite Debye frequency induced by graphite impurity atoms
14 p2521 A69-29586

Pulsar model used to explain stellar shape oscillations as cause of radio emission intensity periodic variations
14 p2522 A69-29675

Periodic stellar radiation at 3.5 mm from pulsar CP1919 measured by paraboloid antenna and radiometer
14 p2529 A69-29978

Stellar image vibration dependence on zenith distances and terrain relief determined from stellar traces by 200 mm telescope
15 p2647 A69-30163

Stellar image vibration amplitude dependence on trace direction by comparison with traces of moving satellites
15 p2647 A69-30166

Late type cool degenerate stars nonobservability or rarity in terms of internal energy available for radiation from surface
15 p2681 A69-30423

Eclipsing close binary stars orbital planes spatial position determined from stellar emission polarization
15 p2688 A69-30560

Nonlinear limb darkening corresponding to nongray stellar atmosphere model applied to light curve for compact eclipsing binary systems
15 p2689 A69-30563

Stellar energy diffusion processes studied to determine energy transfer time scale between stellar layers
15 p2692 A69-30767

Polarimetric observations of polarization percentage and position angle changes in T Tauri stars, confirming stellar polarization association with emission spectra
15 p2694 A69-30882

Close binary system components approximated by two nonsimilar ellipsoids, obtaining interpretation of light curves
15 p2695 A69-30957

Balloon-borne UV polarimetry of stars and planets, studying linear polarization between 2000 and 3000 A
15 p2616 A69-31380

Pulsars properties, nature and utilization for interstellar medium study including radiation mechanisms, white dwarf stars and neutron star development
16 p2855 A69-31762

Instrument for simultaneous observation of astronomical plate pairs for detection of stars with UV color excess
16 p2791 A69-32226

Polarimetric observations of Be stars, noting dependence and self absorption by hydrogen of polarization produced by electron scattering
16 p2863 A69-32397

Radio emission from Cygnus X-2 reporting on observations at 4.5 cm wavelength
16 p2865 A69-32804

Stellar photometric data for various photocathode materials used to calculate radiant energy falling on earth
17 p2973 A69-33092

Photoelectric observations of BD minus 17 degrees 4388 occultation by Neptune on 7 April 1968, studying light curves during immersion and emersion of star
17 p3041 A69-33815

Pulsar PSR 0833-45 period decrease resulting from mass addition leading to radius and inertia moment decreases
18 p3196 A69-34646

Neutrino-pair bremsstrahlung for hot degenerate electron gas during Coulomb scattering on imbedded nuclei in stellar regimes including lattice structure effects
18 p3176 A69-35004

Variable star in Large Magellanic Cloud having unusual light curve with complex maximum lasting 300 days
19 p3403 A69-35965

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models

19 p3396 A69-36621

Cameras photogrammetric parameters determined from stellar photographs, considering distortion components, reference points, etc

20 p3545 A69-38054

Variable BL Lac SHF flux density measurements, discussing periodicity and maxima spacing

21 p3798 A69-38545

Optical observations of pulsar NP 0532, comparing light curves in IR and UV, noting polarization

21 p3799 A69-38645

Photodetector responses to radiant energy from many stars tabulated for various photocathode materials and silicon detector

21 p3800 A69-38680

Thermal conduction by electrons in stellar matter, presenting opacity tables for H, He, C and red giant cores and solar composition

22 p4014 A69-40147

Semiconvection zone occurrence in massive stars determined by stability considerations

22 p4022 A69-40470

Radiation transfer in circumstellar dust envelopes, considering thin and opaque clouds

22 p4027 A69-40655

Polarization fluctuations of starlight indicating turbulent structure of interstellar medium, noting pulsar signal dispersion and Faraday rotation

22 p4030 A69-40771

Interstellar extinction in UV from zeta and epsilon Persei spectra obtained with scanner attached to telescope mounted in pointed Aerobee rocket

22 p4030 A69-40772

Stellar and diffuse galactic radiation intensity observations to obtain albedo values of interstellar dust particles

22 p4034 A69-41112

IR excess of R CrB type variable star RY Sgr, noting visual brightness and radiation in 2.0-3.4 micron range

23 p4220 A69-42377

Stellar neutrino energy loss due to electron-electron neutrino bremsstrahlung in nondegenerate gas determined from transition probability for charged baryons or leptons interaction

24 p4351 A69-42794

STELLAR REFRACTION

U ATMOSPHERIC REFRACTION

STELLAR ROTATION

NT SOLAR ROTATION

Differential rotation of celestial body maintained in resonance state by locking photosphere oscillation onto rotational period

01 p0156 A69-11136

Rotating star adiabatic axisymmetric motion solved numerically for small initial deviation from hydrostatic equilibrium

02 p0317 A69-11955

Einstein equations obtained for axisymmetric distribution of masses in approximation of square of stellar rotation angular velocity in empty space

02 p0317 A69-11956

Planet Mercury rotation, showing reminiscence of apparent path of sun to Ptolemaic concept of planetary system

03 p0509 A69-13368

Spinning neutron star model for pulsars based on slowing down of pulse rate, proposing emission mechanism for radio energy and relativistic gas

05 p0825 A69-16351

Rotational velocity correlation to space velocity for early stars, suggesting attainment of spin momentum and space velocity during close encounter in small cluster

06 p1010 A69-17972

Pulsar model based on rapidly rotating neutron star with radiating attached plasma, discussing test of radiation mechanism by means of coherence of emission

06 p1012 A69-18226

Time variation of velocity spheroid dispersion, axis ratio and vertex deviation in Galaxy due to star-cloud encounters

07 p1215 A69-18668

Galactic model with differential rotation, discussing experiments on bar and cylindrical galaxy and spiral and loop structures formation

07 p1216 A69-19204

Satellite components of lines formed in stellar type differentially rotating disk

07 p1219 A69-19336

Rotating stellar models oscillation and stability approximated by virial equations

07 p1220 A69-19389

Rapid differential rotation effect on massive main sequence O and B stars, discussing bolometric magnitude deficiencies and shifted position in Hertzsprung-Russell diagram

07 p1220 A69-19390

Frequency and radial velocity for various cepheid binaries, discussing hot companions detection through photometry

07 p1223 A69-19627

Gas remnant of large scale explosive event in galactic plane at 60 degree longitude, discussing resultant extension on line profile

07 p1225 A69-19717

Pulsar emission possible connection with rotating neutron stars, discussing rotational energy transfer to circumstellar plasma and production of periodic shock waves

08 p1383 A69-19895

Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone

08 p1396 A69-20644

Rotational energy conversion of neutron star into relativistic electrons energy suggested by increasing period of pulsating radio source in Crab Nebula

09 p1591 A69-21454

Vela pulsar polarization and periodicity observations supporting rotational model vs radial pulsations as radio emission source

09 p1592 A69-21461

Pulsars rotating neutron star model analyzed on basis of magnetic dipole rotating in vacuo

09 p1592 A69-21463

Hydrogen beta emission profiles for pole-on type Be stars, measuring stellar rotational velocity by Huang-Struve method

09 p1596 A69-22052

Spectral type and rotational velocity estimation for 83 stars near double cluster in Perseus, emphasizing Be stars

09 p1599 A69-22195

General relativistic models of massive hot nonrotating stars with adiabatic temperature gradients consisting of ideal gas and radiation mixture

09 p1605 A69-22416

Gravitational waves emitted by relativistic, nonrotating, nonradially pulsating stellar model, discussing polarization and energy and momentum transport

09 p1605 A69-22417

Uniformly rotating star models within first order perturbation theory in convective equilibrium and with radiation pressure, discussing radiative and gas pressure ratio

09 p1606 A69-22422

Axisymmetric models for stable and unstable oscillations of rapidly rotating zero temperature white dwarfs, discussing kinetic and potential energy

10 p1789 A69-24129

Stellar model with magnetic field accelerating central core rotation to instability for determining rotating star energy and angular velocity distribution dependence

11 p1952 A69-24249

Toroidal configuration in stellar evolution, noting polar magnetic fields in stars and inclined rotators

12 p2173 A69-27174

Local stability of rotating stars in toroidal and poloidal magnetic fields, using linear stability analysis

13 p2346 A69-27707

Pulsars suggested as magnetic rotating neutron stars with unstable oscillations

13 p2352 A69-27912

Secular instability of steadily rotating stars, analyzing meridional motions in radiation zones by linear perturbation theory

13 p2354 A69-28566

Internal structure of rotating stars, analyzing physical changes, circulation influence on mixing during evolution and angular velocity

15 p2683 A69-30512

Elastic and inelastic evolution of concentrated gravitational systems, discussing stellar diffusion, evaporation, halos and rotating systems

15 p2687 A69-30548

Stellar magnetic field generation by convective motions of surface layers of slowly rotating stars

15 p2688 A69-30559

Spin down effects on neutron stars, discussing decrease of period of PSR 0833-45 as result of differential rotation instability

16 p2865 A69-32803

Pulsar emission and magnetic field in Crab Nebula, discussing magnetic flux amplification, gravitational to magnetic energy conversion and pulsars as pulsed signals

17 p3026 A69-32859

German monograph on instability of nonrevolving rotating stars covering secular rotational perturbations, radiative zone rotation, spherical Cowling model, etc

17 p3029 A69-32997

Planetary systems interrelationship with binaries and rotating stars, emphasizing occurrence frequency study based on stellar angular momentum orientation

17 p3032 A69-33105

Pulsation periods for pure He white dwarfs calculated by Chandrasekhar equation including relativity and rotation effects

17 p3037 A69-33641

Pulsars properties and distribution in galactic coordinates, deriving interstellar medium properties and physical nature of objects based on neutron star rotation

17 p3040 A69-33800

Light curve of pulsar NP 0532 represented with oblique rotator hypothesis, assuming concentrated emission at opposite spots on star

18 p3192 A69-34321

Oblique rotator model for pulsars, discussing difficulties arising from two asymmetrically spaced pulses during each stellar rotation

18 p3196 A69-34647

Galactic rotation in Cassiopeia region, studying O, B and A stars circular velocities as function of distance from galactic center

18 p3201 A69-35142

Protosun and solar system angular momentum losses analyzed from equations for convective star rotation change, noting almost total protosun initial momentum loss possibility

18 p3203 A69-35346

Slow rotation of relativistic polytropes with linear corrections, showing inertia moment distribution and metric component

19 p3426 A69-36576

Plasma acceleration away from rotating magnetized astrophysical objects analyzed and applied to pulsar NP 0532 for magnetic moment and mass loss rate calculations

20 p3598 A69-37419

Time scale of diffusion of angular momentum estimated by model for disturbances occurring in star with secularly unstable angular velocity distribution

20 p3605 A69-37826

Stellar mass loss in gravitational contraction and variation of rotation law during transition to main sequence

20 p3607 A69-38041

Gaseous rotating stars radial oscillations by perturbation method, considering angular velocity effects

21 p3795 A69-38470

Rotating neutron star model to fit pulsar data, considering star crust formation and properties, angular velocity changes and starquake effects

21 p3798 A69-38544

Uniformly and differentially rotating stars taking into account magnetic fields effects, discussing radiative and hydrostatic equilibrium in nonspherical configurations, stellar atmospheres, etc

21 p3812 A69-39519

Stellar atmospheres acoustic energy generation rate calculations, studying corona mass ejection effects on stellar rotation

21 p3813 A69-39521

Rotating neutron stars with magnetic fields symmetric about rotation axis considered for pulsar model

22 p4027 A69-40657

A-type stars investigation for anomalous spectral line intensities, discussing Hertzsprung-Russell diagrams, rotational velocities, magnetic fields and abundances

23 p4218 A69-42322

Pulsars models and radiation mechanism, noting neutron stars with rotating magnetospheres

23 p4218 A69-42326

Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities

23 p4222 A69-42404

Pulsar model with seat as rotating neutron star having dipolar magnetic field not parallel to rotation axis

24 p4377 A69-42666

Rotating neutron stars, pulsars and cosmic X ray sources, accounting for large and small diameter sources by rotating neutron star losing mass in magnetic field

24 p4369 A69-43222

Stellar system differential rotation effect on gravitational instability with distribution propagating in rotation axis direction
24 p4388 A69-43639

STELLAR SPECTRA
NT SOLAR SPECTRA

IR emission in NGC 7027 spectrum and role of discrete line emissions, discussing magnetic dipole transitions, temperature and density
01 p0148 A69-10051

Stellar UV objective prism spectra from Gemini 11 and 12 manned flights
01 p0153 A69-10870

Hydrogen line profiles in various early stars compared with profiles predicted from model atmosphere calculations for rotating and nonrotating early stars
01 p0154 A69-10876

Radiation, Stark and van der Waals level broadening constants for Mg I and Si I calculated to interpret solar and stellar spectral line widths
02 p0310 A69-11454

Eight color narrow band photometry of bright stars, discussing band system, instrumentation, data and calibration
02 p0313 A69-11487

Narrow band and UVB photometry of GX3 plus 1 and Wolf-Rayet stars/HD 50896 and HD 45166/
02 p0325 A69-12596

Spectral data for central stars of planetary nebulae from Lick 120-inch telescope, discussing stellar temperature and evolutionary track deduction
02 p0325 A69-12624

Far UV spectra of O and B stars in Orion photographed from Aerobee rocket, describing wavelength measurements and line identifications
02 p0327 A69-12712

Stellar spectra observed with 2.8-14 micron IR spectrometer, noting broad absorption feature near 5 and 8 microns
02 p0327 A69-12713

Astronomical needs for atomic spectra, discussing emissions in Wolf-Rayet lines and Of stars and forbidden lines in absorption in sun and F-K stars
03 p0508 A69-13172

Growth curve for analysis of stellar spectra, determining relative f values and abundance
03 p0508 A69-13174

F values for Ti II, Cr II and Fe II by empirical astrophysical line strength analysis, discussing f value determination from stellar growth curve
03 p0508 A69-13175

Stellar image and spectrum distortions during occultation observed from satellite, discussing recovery of atmospheric composition data from stellar spectra
03 p0421 A69-13346

Stellar spectra taken with rapid scanning Michelson interferometer, noting IR excess due to radiation from clouds surrounding stars
04 p0655 A69-14667

Seyfert galaxies high excitation broad emission lines and quasars resemblance, discussing causes of spiral galaxies violent nuclear activity
04 p0657 A69-14689

Taurus A 21 cm absorption line frequency decrease during optical path approach to sun, discussing gravitational and electromagnetic origin
04 p0661 A69-15148

Fiber optic electrostatically focused image intensifier tube for recording star spectra with reduced exposure time
[WERL-68-1C2-TAACP-P1]

04 p0603 A69-15444

IR astronomy with ground based instruments noting Mars and Venus spectra, Jovian disk scans, solar radiometry, IR stars, quasars and galaxies
05 p0821 A69-15842

Spectra of close binary systems, analyzing abundance anomalies, noting metallicity results
05 p0822 A69-15854

Spectrum of accelerated particles on surface of stars revealed by observation of photospheric lithium and beryllium
05 p0817 A69-16711

Photometric investigation in UVB and H alpha of early B stars in Scorpio-Centaurus association, computing intrinsic colors and magnitudes corrected for interstellar absorption
06 p1001 A69-17195

Identification of emission lines from 3200 to 7000 A in Eta Carinae spectrum, noting P Cygni-like absorption lines
06 p1002 A69-17263

Stellar chromosphere and flare spectra observations with image tube spectrograph using He 10803 line, noting possible contribution to X ray background
06 p1003 A69-17449

Spectral line profiles of 3 Centauri A during microdisturbance, showing turbulent velocity and metal element abundances
07 p1211 A69-18407

Spectroscopic binary 16 Piscium, showing unusual period of 47.25 days
07 p1214 A69-18662

High dispersion IR image tube spectroscopy using telescope, discussing alpha Sco and alpha Boo spectral regions
07 p1074 A69-19203

Evolution of galaxies, considering masses, gas masses, luminosities, spectra and motions
07 p1219 A69-19297

Spectrum data of Nova Vulpeculae /1968/ summarized concerning dispersion figures
07 p1220 A69-19337

Sco XR 1 optical and X ray spectra simultaneous observations during rocket flights
07 p1220 A69-19391

Lines displacement in binary star spectrum due to blending, presenting graphs displaying magnitude of effect under various conditions
07 p1223 A69-19624

Strong line profiles computed for models of hot expanding extended atmospheres of OB supergiants
07 p1223 A69-19637

Atomic collision processes in astrophysics noting stellar continuum spectra, Ca ion and He lines, solar corona, heat balance in H I regions and planetary nebulae
07 p1224 A69-19653

Radio spectrum of quasi-stellar object identified as Parkes 2134 plus 004
07 p1224 A69-19708

Calculated profiles of He I 4471 and 4922 A and forbidden components star spectra, using quasi-static and impact approximations
07 p1224 A69-19713

UV emission spectrum of double star Boss 1985, excitation potential effect on Fe II lines and table identifying emission lines
08 p1385 A69-20060

Element abundances in two horizontal branch A stars through coarse and fine spectroscopic analysis, noting metal deficiencies with respect to sun
08 p1385 A69-20061

Spectra of envelope star HD 217050, analyzing metallic lines as function of central depths
08 p1387 A69-20121

Cluster star color indices determination by measuring intensities at nodes of extrafoveal star spectra
08 p1387 A69-20122

Photographic magnitudes in UVB system based on photoelectric sequences for stars in NGC 2483 and NGC 2489 open clusters, obtaining spectral classes from objective prism plates
08 p1388 A69-20239

Photographic magnitudes in UVB system based on photoelectric sequence for stars in NGC 2546, Pi 1, NGC 2579 and Cr 185, obtaining spectral classes
08 p1388 A69-20240

Color excesses in Kapteyn Selected Area 4 using photovisual /yellow/ and photographic /blue/ magnitudes from catalog data
08 p1388 A69-20241

Photographic magnitudes of stars in various open clusters based on UVB system and photoelectric sequence
08 p1389 A69-20245

Photoelectric measurements of magnitudes and colors in UVB system for stars in Puppis at Boyden Observatory
08 p1389 A69-20249

Equivalent widths of K line of single ionized calcium and central depths of unidentified broad absorption in O and B stars spectra
08 p1389 A69-20250

Photographic magnitudes in UVB system based on photoelectric sequence for various open clusters stars, determining spectral classes for brighter stars
08 p1389 A69-20254

Nine spectra of recurrent Nova T Pyxidis during fifth /1966/ outburst compared to previous outbursts
08 p1391 A69-20396

Forbidden resonance line of Ca II in Arcturus from spectrograms at widely different times of year
08 p1392 A69-20558

Color index and mean light curves constructed for Cepheid Variables
08 p1395 A69-20635

Mass loss observed in Of, Wolf-Rayet and OB supergiant stars from P-Cygni profiles in far UV resonance lines
08 p1395 A69-20641

Spectroscopic residual intensities variation of metallic and hydrogen lines of eclipsing system R Canis Majoris with phase, discussing surrounding gaseous matter
08 p1396 A69-20646

Spectroscopic evidence for mass loss from CH Cygn based on observations of chromospheric lines of high dispersion spectrograms
08 p1396 A69-20651

Abundance determinations and spectrum intercomparisons in late type peculiar stars, discussing carbon and heavy metal star classes
08 p1403 A69-20910

Element abundances in magnetic stars, discussing Zeeman effect and anomalies in spectra
08 p1403 A69-20911

Aurigae star HD 35620 with respect to epsilon Virginis using model atmosphere and high dispersion spectra
08 p1403 A69-20913

Stars closer than five parsecs including binary systems, luminosity, spectral type and mass
08 p1407 A69-21130

Abundance analysis of B3 V star in Orion association, noting titanium and strontium overabundance and oxygen underabundance
08 p1407 A69-21133

Isophotal wavelengths of U, B, V and R bright star systems for replacing spectrophotometry with broadband multicolor data
08 p1408 A69-21134

Polaris cepheid variable star system color index and absolute magnitude from photometric observations
08 p1408 A69-21138

H alpha emission line in nucleus of Virgo A radio galaxy observed on spectrograph, estimating gas electron density and mass
09 p1588 A69-21360

Taurus A flux density measurement at 4.3 mm with 36-ft antenna at National Radio Astronomy Observatory to determine spectrum unambiguously
09 p1591 A69-21450

Photoelectric monitoring broadband photometry and spectral scans of candidate star for pulsating radio source CP 1919
09 p1591 A69-21455

Hydrogen beta emission profiles for pole-on type Be stars, measuring stellar rotational velocity by Huang-Struve method
09 p1596 A69-22052

Hydrogen alpha emission nebulae catalog in western half of Cygnus X region, obtaining interstellar absorption from nebular distances determination
09 p1596 A69-22053

Atmospheric models for metal deficient stars of K and G spectral type, studying reduced metal abundance effect on atmospheric structure
09 p1596 A69-22055

Physical conditions in nuclei of various Seyfert galaxies deduced from line intensities, noting permitted and forbidden lines formation in different regions
09 p1596 A69-22056

Continuous radiation spectrum of Taurus A in far IR using indium antimonide detector of Rollin type
09 p1597 A69-22156

Spectral type and rotational velocity estimation for 83 stars near double cluster in Perseus, emphasizing Be stars
09 p1599 A69-22195

Radial velocity, light and magnetic variations of HD 10783 from concurrent UVB photometric and Zeeman spectroscopic observations
09 p1600 A69-22197

Subdwarf HD 25329 studied with model atmosphere approach, using H alpha, Na I and Mg I profiles for effective temperature
09 p1600 A69-22199

Spectroscopic study of A stars with large Stromgren m sub on indices, discussing rotational velocity, spectral intensity and type
09 p1602 A69-22215

IR spectrum of NML Cygnus star with Michelson interferometer, noting CO bands and IR excess
09 p1602 A69-22229

Photometric standard based on calibration of Vega by Hayes compared with six color magnitudes
09 p1603 A69-22233

IR excess from carbon-rich peculiar variable R Coronae Borealis and M7 variable associated with emission nebula R Aquarii attributed to circumstellar matter

09 p1603 A69-22263

Polarization changes of R Coronae Borealis Star RY Sagittarii, tabulating percentage polarization and position angles

09 p1603 A69-22265

Molecular ion C13H line found in zeta Oph at 4232.08 A, measuring equivalent width and finding C12/C13 ratio

09 p1603 A69-22266

Photoelectric spectrum scanning and IR photometric observations of Scorpius XR-1 X ray source

09 p1604 A69-22401

Effects of opacity arising from silicon bound-free transition on emergent fluxes and hydrogen line profiles for A and late B stellar atmospheres

09 p1604 A69-22403

Spectrographic observations indicating temperature range within individual filaments of Cygnus Loop, noting agreement with stratified models

09 p1607 A69-22430

Cosmic rays origin, measurements of energy spectrum and stellar diurnal variations

10 p1757 A69-22823

Atomic line spectrum computation for F-K supergiant or cepheid, using observational data on standard star spectrum

10 p1771 A69-22854

Cepheid variable stars light curves analyzed to determine radii and absolute magnitudes

10 p1775 A69-23200

Yellow and blue photoelectric observations of eclipsing binary CO Lac

10 p1775 A69-23202

Position and polarization of 1720 MHz OH emission from W28, W44 and galactic center, considering unresolved concentrations of shell type nonthermal sources

10 p1776 A69-23220

Stellar atmosphere parameters analyzed over pulsation cycle by high dispersion spectra of cepheid variable RT Aurigae

10 p1778 A69-23605

Asymmetrical profiles of 4430 A interstellar absorption band, discussing stellar and electronographic spectra

10 p1781 A69-23676

Polarization observation of star BL Lac continuum by multichannel scanner, noting photoelectric UVB observations and identification with radio source

10 p1785 A69-24090

Early F stars Li/Be abundance ratios estimation from change in solar Be abundance, discussing stellar Li isotopes ratios

10 p1785 A69-24099

Spectrum of IR object NML Cygnus, discussing model based on circumstellar IR emission

10 p1785 A69-24101

Broadband photometry for circumstellar IR emission from cool stars, considering giant and carbon stars

10 p1786 A69-24102

Far UV spectra of zeta Puppis and gamma super two Velorum with 1.6 A resolution photographed with all reflective objective spectrograph on Aerobee rocket

10 p1788 A69-24120

Six color stellar photometry of 159 field stars including subdwarfs, high velocity stars and 50 Hyades stars, tabulating color data

10 p1788 A69-24122

Flare stars observational and known aggregate characteristics in Coal Sack region

10 p1790 A69-24141

Absolute dimensions of 34 eclipsing variables having both components near main sequence, comparing mass luminosity and mass spectrum to homogeneous model stars

11 p1952 A69-24248

Microphotometer for stellar magnitudes of galaxies determination from photographs

11 p1879 A69-24256

B star HD 191980 spectral variations from B-3 to B-8 noting helium to carbon line intensity ratio, interstellar D line strength and radial velocity measurements

11 p1958 A69-24594

Triple system p Velorum, discussing coude spectra and published visual orbital elements

11 p1963 A69-25263

Color excess and 21 cm line intensity of RR Lyrae stars at high latitudes, confirming correlation between dust and atomic hydrogen

12 p2063 A69-25808

Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra

12 p2153 A69-25812

Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas

12 p2153 A69-25813

Spectroscopy and star classification on basis of spectra

12 p2155 A69-26122

UBV photometry observations of eclipsing binary AG Persei at Mount Palomar with 51 cm reflector

12 p2156 A69-26220

Element contents of supergiant HD 190603 atmosphere based on spectrophotometric analysis including temperatures, turbulent velocity, gravity acceleration and electron concentration

12 p2157 A69-26336

Statistical data for visual binary systems with known spectral classes or colors and one component near main sequence

12 p2159 A69-26666

Photometric and colorimetric characteristics of hot gas optically thin in continuous spectrum with optical thickness of several units in Balmer series lines

12 p2159 A69-26667

Statistical analysis of UVB characteristics of blue objects located near galactic north pole by scintillation techniques

12 p2168 A69-27054

Surface gravities and detection of metallic line early A stars from spectral classification using equivalent line widths

12 p2171 A69-27151

Spectrum of abnormal B-type star HR 3817, noting Balmer line profiles and instrumentation

12 p2172 A69-27160

Variable star BL Lacertae absolute spectral energy distribution in visible and IR regions, noting synchrotron features and possible quasar nature

13 p2335 A69-27315

Rocket spectrographic observations of Alpha Virginis noting hydrogen Lyman absorption lines

13 p2338 A69-27555

Photoelectric scanning of CH Cygni spectrum calibrated and compared with 45 Arctis, discussing high dispersion, excess blue and UV continua, H beta emission, etc

13 p2338 A69-27557

Photoelectric observations of blue light minima of U Geminorum variable Ex Hydrae indicating no change in orbital period

13 p2338 A69-27558

White dwarf atmospheric structure, analyzing masses and radii for DA stars and surface parameters of Eri B, based on grid of line blanketed models

13 p2339 A69-27563

Galactic H II regions of high surface brightness in radio continuum surveyed at 1.95 cm wavelength with high resolution and positional accuracy

13 p2339 A69-27568

Chromospheric heating and polarization in late stars, considering association with Ca II K line emission cores

13 p2340 A69-27579

Expected IR line spectra of gaseous nebulae based on physical conditions, listing line intensities

13 p2342 A69-27595

Hydrogen content in Ia supergiant spectra of type B, noting lack of Stark wings of Balmer lines

13 p2348 A69-27722

Short period variability of B, A and F stars observed in photometry of New Delta Scuti stars

13 p2348 A69-27803

Twelve color stellar photometry for studying galaxy synthesis, relating observations to temperature, luminosity and metal abundance

13 p2348 A69-27804

OB stars absolute magnitude and intrinsic colors in Cleveland system related to MK system

13 p2348 A69-27806

Positions, spectral types and B magnitudes for possible field horizontal-branch stars at high galactic latitudes, selected from faint A star list

13 p2348 A69-27807

Photoelectric yellow and blue observations of variable TZ bootis light variation and orbital elements, noting maxima and secondary minimum causes

13 p2348 A69-27808

Shock heated gas radiation frequency dependence and UB and B-V color indices determination, studying role in close binary systems luminance

13 p2350 A69-27860

Goddard Experiment Package /automated spaceborne telescope design/ for stars and nebulae UV spectral emittance measurements

13 p2261 A69-27948

Photometric discovery of new variable stars resulting from quasars observation, noting optical variability noncorrelation with observed properties

13 p2354 A69-28468

Nighttime molecular O densities between 100- 130 km determined from Schumann-Runge absorption data for successive far UV spectra of hot star

14 p2435 A69-28959

Lacerta OB 1 B spectroscopic binaries periods and orbital elements, noting limits for secular variation

14 p2519 A69-29137

Late type stars with emission peak wavelength approximating graphite Debye frequency induced by graphite impurity atoms

14 p2521 A69-29586

Arcturus and solar rubidium abundance compared using Mount Wilson photographic spectrograms of Arcturus

14 p2522 A69-29589

Cepheid variable 1 Carinae position in H-R diagram suggested from microturbulent velocity role in pulsational instability

14 p2522 A69-29590

Nucleosynthesis based on stellar spectra and nuclear reactions data, discussing elements in sun and stars, meteorites, solar neutrinos, etc

14 p2529 A69-29985

B-type stellar spectra, discussing atmospheres and local thermal equilibrium from considerations of He I and P II lines relative strength

15 p2679 A69-30046

Stellar scintillation spectra for different zenith distances, correlating data with meteorological conditions at time of observation

15 p2647 A69-30165

Atmospheric parameters for blue horizontal branch stars in globular cluster NGC 6397 by spectroscopic and photoelectric observations, obtaining mean stellar

15 p2692 A69-30770

Spectral classifications and UVB photometry for southern association Sco OB 1 containing cluster NGC 6231

15 p2692 A69-30771

Canum Venaticorum variable A star spectrum, listing all lines observed between 5000 and 6650 A

15 p2692 A69-30773

Metallic line /Am/ stars Zeeman observations, showing 16 Ori as spectroscopic binary, dubious binary nature of 15 Vul and doubtful presence of magnetic fields

15 p2692 A69-30775

Polarimetric observations of polarization percentage and position angle changes in T Tauri stars, confirming stellar polarization association with emission spectra

15 p2694 A69-30882

Spectral Pt II lines in Ap stars of Hg class observed during analysis of double lined spectroscopic binary HR 4072

15 p2695 A69-30891

Photoelectric index of main sequence stars in F5 to G2 spectral range as indicator of atmospheric microturbulent velocities

15 p2695 A69-30999

Oscillator strengths calculated for transitions in Si III using dipole length and velocity matrix elements, comparing many electron correlation problem approximations

15 p2656 A69-31158

Stellar group Ba 6 distance measured using three color photometry in RGU system

16 p2854 A69-31650

Spectral characteristics of B stars group, reviewing causes of spectral line profile deformation

16 p2855 A69-31828

Magnetic star HD 173650 light curves showing maximum luminosity variation occurring in U light, noting minima flattening from U toward V

16 p2858 A69-32208

Stellar diameters in galactic cluster stars determined using original and modified spectrophotometric method compared with spectral types BOV-FOV

16 p2858 A69-32210

Spectroscopic observations of HD 4174 star by superimposition of emission and M1-I absorption spectra, revealing intensity and radial velocity variations

16 p2858 A69-32214

Radial velocity and spectral line variations of HD 124224, suggesting main sequence star of B6 to B9 spectral type

16 p2859 A69-32223

Two dimensional spectral classifications for bright A stars including magnitudes and colors
16 p2860 A69-32233

Spectral variations of red variable stars analyzed by objective-prism spectra in near IR
16 p2860 A69-32235

Giant galaxy classified in terms of stellar population, discussing Orion, intermediate amorphous and combination categories
16 p2862 A69-32395

Eclipsing binary CQ Cephei envelope variability determined from photoelectric light curve, using astronomical telescope
16 p2864 A69-32593

Hydrogen line profiles, equivalent widths and electron densities for peculiar alpha 2 CVn and gamma Lyr stars
16 p2864 A69-32594

Spectroscopic study of P Cygni showing ionization temperature, Balmer decrement agreement with calculated value and chemical composition
16 p2864 A69-32595

Spectrophotometry of F stars 42 Cyg and nu Her atmospheres, analyzing microturbulence, excitation and ionization temperatures, electron pressures and abundances
16 p2864 A69-32596

MH alpha 328116 /Cygnus/ spectrum noting three Fe IV lines
16 p2866 A69-32815

Wolf 359 flare spectra obtained with Palomar telescope, noting hydrogen and He line enhancement, broadening and violet shifting
16 p2852 A69-32817

Proper motions, color magnitude and distance modulus of stars in galactic cluster in direction of Large Magellanic Cloud using Cape wide angle photometry
17 p3034 A69-33411

Spectral lines radial velocities and profiles observed on 48 Librae from 1950-1962
17 p3038 A69-33722

Effective temperature and gravity values for Mn Ap stars by comparing spectrum scans and H line profiles with predictions from atmospheric models
17 p3038 A69-33724

BCD classification for cepheids, discussing /sigma/ surface definition, locus of normal stars of population I and interstellar reddening
17 p3038 A69-33725

Red dwarf star /YZ Canis Minoris/ radio outbursts observation noting stellar atmospheric spectrum, electron density and temperature and total flare energy
17 p3043 A69-34164

YZ Canis Minoris red dwarf star flare event observation record, noting optical spectrum energy output and slow decay
17 p3043 A69-34165

Heavy nuclei origin based on empirical abundance distribution, discussing stellar, galactic and cosmic events for nuclear genesis
17 p3009 A69-34190

RF recombination lines measurement of helium for abundance in nebulas, comparing optical and radio values for H II regions
18 p3190 A69-34293

Ionization stratification and chemical abundances in planetary nebula NGC 7662, discussing density fluctuations effect on N II and O II lines
18 p3191 A69-34294

Curve of growth analysis for close binary HR 5317 indicating Mg, Mn, Ca and Sr overabundance respecting standard star 110 Her
18 p3191 A69-34297

Four color photometry data of late F type stars in general catalog tabulated with columns for HD and GC numbers, apparent visual magnitude, etc
18 p3195 A69-34430

Variable CoD minus 35 degrees 4257 noting primary period of 502 days superimposed on secondary beat period of 3000 days
18 p3195 A69-34431

H alpha emission line in nucleus of Virgo A radio galaxy observed on spectrograph, estimating gas electron density and mass
18 p3197 A69-34750

Alpha Serpentis spectrum study from model atmosphere and growth curves, finding metal abundance ratios five times as great as in Arcturus
18 p3200 A69-35130

HD 217050 spectroscopic study, determining Balmer envelope temperature from comparison of homologous Balmer and Paschen lines intensities
18 p3201 A69-35144

Balmer line spectrum formation in extended atmospheres of Be and shell stars, noting influence of angle of inclination to observer
18 p3204 A69-35349

Atomic and molecular absorption lines and width measurement in spectrum of WZ Cassiopeiae carbon star in visual and IR region
18 p3204 A69-35350

Water vapor microwave emission measurement from galactic hydroxyl sources
18 p3205 A69-35435

NbO presence uncertainty in S type stars due to close coincidences with ZrO bandheads, noting 6484 and 6591 lines in R Cygni spectrogram
19 p3403 A69-35964

Forbidden transitions in stellar spectra - Conference, Liege, Belgium, June 1968
19 p3420 A69-36211

Forbidden transitions in absorption spectra of sun and normal and peculiar stars
19 p3422 A69-36215

Forbidden emissions in CH Cygni and VV Cephei noting symbiotic star
19 p3423 A69-36228

IR spectra of Eta Carinae, confirming nitrogen and sulfur abundance
19 p3423 A69-36229

Forbidden lines in slow nova RR Tel spectrum, comparing ionization rate with RR Pic
19 p3423 A69-36230

Intensity variations of Eta Carinae emission lines
19 p3423 A69-36231

Forbidden transitions in emission line spectra of variables near minimum light, finding origin in hot chromosphere
19 p3424 A69-36232

MH alpha 328-116 spectral characteristics noting weak continuum, emission lines from forbidden transitions and absence of absorption
19 p3424 A69-36233

MH-alpha 328-116 /V 1016 Cyg/ star spectrum, indicating object evolution toward higher ionization states
19 p3424 A69-36234

Spectral energy distribution of gamma-Cas in 1967 based on observations in seven color photometric system
19 p3426 A69-36565

Red leak corrections for UV filter on color UV indices for stars of various spectral types using winter-reddened response curve
19 p3426 A69-36566

Balmer and Ca II /K/ line profiles computed by program based on model atmospheres, comparing computed and observed data for F stars
19 p3426 A69-36578

O stars spectrograms study for luminosity and temperature criteria
20 p3598 A69-37463

WY Gem star spectroscopic observation showing peculiarity about forbidden and absorption spectra superposition
20 p3598 A69-37464

HD 200775 spectrum analyzed for absorption lines wavelengths and equivalent widths, noting role for NGC 7023
20 p3599 A69-37469

Zeta Tauri shell spectrum radial velocity measurement results compared with extrapolated seven year curve by Delplace
20 p3599 A69-37471

Pulsars cosmic ray mass and charge spectra analyzed for evidence of neutron star origin
20 p3588 A69-37487

Southern stars of spectral types between O5 and A3 analyzed for equivalent widths and equatorial rotation velocity from direct intensity spectrogram tracings
20 p3600 A69-37491

Photometric and spectral observations of Chuadze and Wild supernovae, showing type I classification
20 p3607 A69-38038

Giant stars UVB reddening line slopes determined from photometric data
20 p3608 A69-38047

Interferometric photoelectric scans of interstellar Na D-lines in stellar spectra using Pepsios spectrometer
20 p3611 A69-38148

Partial resolution of Zeeman patterns in spectrum for magnetic field existence in atmosphere of 53 Camelopardalis
20 p3611 A69-38155

HD 188041 magnetic field variations from Zeeman measurements correlated to spectral variations
20 p3611 A69-38156

TiO bands identified in Mira variables IR region, discussing rotational structure and band strength-temperature relation
20 p3611 A69-38158

MK spectral types for bright southern O and B stars
20 p3612 A69-38161

Stellar nuclear reactions at low energies studied to provide predictions of cross sections in carbon burning
20 p3612 A69-38164

M 82 direct photographs sequence observation in optical IR region, noting small nucleus and unbroadened inclined emission lines
21 p3799 A69-38649

IR spectrum of NML Cygnus star using rapid scanning Michelson interferometer, estimating temperature from CO bands
21 p3800 A69-38678

Short region scanning of Arcturus spectrum with McMath solar spectrometer double pass system at Kitt Peak National Observatory compared to single pass system
21 p3721 A69-38697

Differential curve-of-growth analysis of late type giant stars yielding chemical compositions, discussing nature and size of uncertainties in estimates
21 p3800 A69-38700

Line statistics for representation of line absorption coefficient distribution for solar type stars
21 p3801 A69-38762

Big bang and little bang nucleosynthesis, discussing electron-neutrino or electron-antineutrino excess role in He production
21 p3801 A69-38813

Spectra, fading and pulse structure of pulsars noting electron density, polarization, second periodic pulsation, etc
21 p3802 A69-38826

Stellar IR spectroscopy, describing absorption and emission lines of various atoms and molecules, atmospheric composition, problems with variable stars, etc
21 p3811 A69-39510

Quasi-stellar objects identification, distribution, emission lines interpretation, energy distribution, absorption spectra, radio properties, etc
21 p3811 A69-39515

Stellar scintillation spectra theory extended to rectangular apertures, generalizing to planetary scintillation and effects of diffraction, atmospheric dispersion and seeing
21 p3773 A69-39771

Radio observations of supernova remnant HB 21 at 2695 MHz, noting spectral brightness and curvature of northern shell segment
22 p4014 A69-40129

Finding list of spectral type A7 stars and earlier in region at south galactic pole compiled from prism survey data
22 p4021 A69-40436

Variable stars blue sequence, proposing mu mechanism and beta mechanism as explanation for radial pulsations
22 p4026 A69-40650

Helium-carbon star BD plus 10 degrees 2179 re-analyzed by grid of constant flux models containing right amount of C
22 p4026 A69-40652

C, N and O abundances in K giants alpha Boo, beta Gem and epsilon Peg, noting stellar nuclear burning and evolution
22 p4026 A69-40653

Rocket measurement of far UV spectral intensity of theta Orionis for far UV interstellar extinction law in Orion nebula region
22 p4030 A69-40770

MK system spectral types determination for B, A and F type stars from slit spectrograms near NGC 2264
23 p4211 A69-41487

UBV magnitudes for open cluster NGC 559 stars determined from combined photoelectric and photographic measurements
23 p4211 A69-41490

Tabulated spectroscopic observations of Be stars included in Merrill and Burwell catalog
23 p4213 A69-41720

A-type stars investigation for anomalous spectral line intensities, discussing Hertzsprung-Russell diagrams, rotational velocities, magnetic fields and abundances
23 p4218 A69-42322

Proper motions and spectroscopic data of bright members of II Per and I Lac associations analyzed to determine expansion age
23 p4221 A69-42385

Carroll Fourier transform method applied to stellar spectra lines to determine small rotational velocities
23 p4222 A69-42404

- Equivalent width measurements of Arcturus IR line spectra using Fourier transform spectroscopy, tabulating results
23 p4222 A69-42453
- Model atmosphere analysis of line identifications and equivalent width data for relatively cool Ap star HD 204411, discussing atmospheric composition
24 p4376 A69-42664
- Absorption lines in stellar spectra and significance in cosmogony, discussing ionized Ca K line detection during delta Orionis study, K and H lines components, etc
24 p4383 A69-42999
- VV Cephei type binaries cool and hot primary stars light variations, discussing duration, orbital cycle correlation, mass loss, etc
24 p4386 A69-43346
- Stellar radial velocity measurement accuracy dependence on dispersion, spectrum and line width
24 p4386 A69-43347
- Blue component of HD 237006 and VV Cephei spectra, suggesting greater luminosity of blue star in late type supergiant
24 p4387 A69-43353
- P Cygni characteristics and spectrum analysis, describing absorption lines, line widths, atmospheric composition, light variations, etc
24 p4391 A69-43803
- Beta Orionis spectral line profiles data used to study atmospheric structure
24 p4391 A69-43804
- STELLAR SPECTROPHOTOMETRY**
- Spectrophotometric studies of planetary NGC 6543 gaseous nebula, measuring emission line intensities, electron density and temperature [ARL-68-0200]
02 p0327 A69-12708
- Phase method of photoelectric registration of stellar transition moments
04 p0601 A69-15252
- Solar image or spectrum focal plane scanning technique with output beam displaced but undeviated relative to input beam for solar spectrophotometry
04 p0602 A69-15378
- Arizona-NASA atlas of IR solar spectrum, reproducing photometric tracings obtained from CV-990 aircraft flights
06 p1008 A69-17808
- Absolute magnitudes and intrinsic color photoelectric observations of Wolf-Rayet stars in Magellanic Clouds and Galaxy
07 p1221 A69-19583
- Element abundances in two horizontal branch A stars through coarse and fine spectroscopic analysis, noting metal deficiencies with respect to sun
08 p1385 A69-20061
- Sky background light automatic compensation in stellar photography, using single or double channel photometer
08 p1313 A69-20247
- Spectrophotometry of relics of supernovae, determining H alpha and N II lines intensities radial velocities and velocity dispersion
09 p1587 A69-21357
- Narrow band photometry of variable stars and X ray source Cyg X-2, considering continuum variations with time
09 p1591 A69-21451
- Photoelectric monitoring broadband photometry and spectral scans of candidate star for pulsating radio source CP 1919
09 p1591 A69-21455
- Spectrum analysis for early B type star Barnard 29 in M13 globular cluster
09 p1599 A69-22193
- Three color observations of 16 magnetic stars and photometric properties of 23 stars, discussing periodicities in variations
09 p1599 A69-22196
- Quasi-stellar objects photometric selection in near IR
09 p1604 A69-22272
- Photoelectric spectrum scanning and IR photometric observations of Scorpius XR-1 X ray source
09 p1604 A69-22401
- Far UV stellar astronomy, concerning very hot stars and interstellar gas composition studies
10 p1772 A69-22870
- Hot companion presence for RW Camelopardalis confirmed from UVB photometry
10 p1775 A69-23201
- Flare stars observational and known aggregate characteristics in Coal Sack region
10 p1790 A69-24141
- Spectroscopic, photometric and polarimetric observations of magnetic stars, discussing magnetic curves of periodic variables
11 p1954 A69-24362
- Micrometric and photometric measurements of coude spectra of magnetic variable HD 125248, showing spectroscopic binary nature and computing orbital elements
11 p1963 A69-25264
- Stellar radial velocities derived from line positions measurements by precision screw microphotometer
12 p2153 A69-25810
- Faint stars background exposure density and detection limit determined by astrosensitometer for Kodak Spectroscopic Plates
12 p2153 A69-25811
- Spinning rockets UV spectrophotometry of early type stars, discussing instrumentation, calibration, data recording and stellar spectra
12 p2153 A69-25812
- Lacerta OB1 stellar spectral classes and photographic magnitudes, analyzing clusters and distributions in concentrated and dispersed areas
12 p2153 A69-25813
- Photoelectric and visual minima tabulated for eclipsing binaries, calculating light elements
12 p2160 A69-26853
- Statistical analysis of UVB characteristics of blue objects located near galactic north pole by scintillation techniques
12 p2168 A69-27054
- Spectroscopic and eclipsing binaries in zodiac tabulated for photometric studies at lunar occultations
12 p2171 A69-27152
- UVB observations of long period variable stars using reflecting telescope and refrigerated photocell with standard filters
12 p2172 A69-27156
- UVB observations of stars P and 36 Cygni including short period variations and secular changes in brightness
12 p2172 A69-27159
- Crab Nebula pulsar NP 0532 photoelectric spectrophotometry results, noting main pulse and interpulse spectral energy distributions similarity to extended synchrotron radiation
13 p2335 A69-27317
- High dispersion classification of early K2-M6 giants of high and low velocity, using titanium oxide band strengths criteria tested by atomic lines estimation
13 p2338 A69-27556
- Multiband photoelectric photometer for near IR observations, tabulating magnitudes, colors, spectral irradiance, radii and effective temperatures of late type stars
13 p2342 A69-27592
- Stellar photometry during occultations by earth, discussing feasibility of lunar based observations
13 p2345 A69-27651
- Photoelectric yellow and blue observations of variable V502 Ophiuchi, noting influence of partial eclipses on orbital determination reliability
13 p2348 A69-27809
- Spectrophotometry of variable star SS Cyg, analyzing energy distribution in continuum, UV gradient and Balmer jump
13 p2351 A69-27868
- Photometric discovery of new variable stars resulting from quasars observation, noting optical variability noncorrelation with observed properties
13 p2354 A69-28468
- Variable comparison star identified from photoelectric observations of RR Lyrae star BR Aqr, showing light and color curves
14 p2519 A69-29139
- Arcturus and solar rubidium abundance compared using Mount Wilson photographic spectrograms of Arcturus
14 p2522 A69-29589
- Absolute spectrophotometric gradients determined from energy distribution in UV beta Lyr spectrum, confirming gradual variations in light curve shape and spectral characteristics
15 p2688 A69-30557
- Member stars number in globular clusters M3 and M5 determined from photometric and kinematic characteristics
15 p2688 A69-30561
- Atmospheric parameters for blue horizontal branch stars in globular cluster NGC 6397 by spectroscopic and photoelectric observations, obtaining mean stellar mass
15 p2692 A69-30770
- Spectrographic and photoelectric analyses of F type sharp line eclipsing binary HR 7484, tabulating masses, radii, color indices and absolute magnitudes
15 p2693 A69-30776
- ET Pegasi photoelectric observations in UVB colors, giving period different from Kaho and new time of maximum light
15 p2694 A69-30787
- Photoelectric index of main sequence stars in F5 to G2 spectral range as indicator of atmospheric microturbulent velocities
15 p2695 A69-30999
- Photoelectric observations program at Astronomical Observatory of Bucharest to determine smallest moments of several eclipsing stars
15 p2696 A69-31224
- Supernovae spectra observation suggesting tracing as broad band interstellar absorption rather than emission features on continuum
15 p2701 A69-31534
- Photometer for simultaneous stellar photometry in UVB bands, purposes and performance characteristics and circuit diagrams
16 p2790 A69-32209
- Stellar diameters in galactic cluster stars determined using original and modified spectrophotometric method compared with spectral types BOV-FOV
16 p2858 A69-32210
- Nonocculted areas of Algol during eclipse using Balmer discontinuity spectrophotometric method, determining apparent stellar diameters
16 p2858 A69-32216
- Four color and H beta photometry of stars in Coma and Ursa Major clusters compared to standard relations for Hyades Cluster
16 p2860 A69-32234
- Photoelectric observations of color and titanium oxide in M7 giants in nuclear bulge of Galaxy compared with late giants near sun
16 p2863 A69-32396
- BetaCrB atmospheric microturbulence velocity, ionization and excitation temperatures, electron pressure and abundances determined by spectrophotometer
16 p2864 A69-32592
- Spectrophotometry of F stars 42 Cyg and nu Her atmospheres, analyzing microturbulence, excitation and ionization temperatures, electron pressures and abundances
16 p2864 A69-32596
- Stellar photometric data for various photocathode materials used to calculate radiant energy falling on earth
17 p2973 A69-33092
- UVB photometry of faint stars, discussing photographic plate effect on accuracy, emulsion standardization and use of electronography
17 p3031 A69-33099
- Southern Milky Way spectral survey for selection, classification and photometry of interesting objects
17 p3031 A69-33101
- Spectrophotometric characteristics of Serpentes, high metallicity A2 star and standard F zero V 9 Aurigae, analyzing chemical composition, microturbulence velocity and abundance by detailed differential growth curve
17 p3039 A69-33728
- Photoelectric photometric stellar spectroscopy for calculating metal abundance from Fraunhofer absorption lines, relating results to star age
17 p3043 A69-34140
- Spectrophotometry of relics of supernovae, determining H alpha and N II lines intensities radial velocities and velocity dispersion
18 p3197 A69-34747
- HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data
18 p3203 A69-35348
- Spectroscopic and photoelectric observations of peculiar variable FG Sge, discussing expansion velocity and equivalent widths for Balmer and K lines
20 p3599 A69-37474
- Periods and magnitudes of RR Lyrae variable stars in M 2 cluster, tabulating photometric characteristics
20 p3599 A69-37477
- Solar far UV images systematic photometry for thin solar models in terms of quiet sun intensity
20 p3603 A69-37546
- Delay in photoelectric recording of transit of stars, considering stellar image brightness distribution and temperature
20 p3608 A69-38053
- Stellar systems observations using photometers with long narrow slits in identical telescopes
20 p3545 A69-38055

Papers of Lunar and Planetary Laboratory, Volume 8, covering lunar craters, rock fragmentation, stellar photometry, etc 21 p3799 A69-38674

Photodetector responses to radiant energy from many stars tabulated for various photocathode materials and silicon detector 21 p3800 A69-38680

Instrumental profile determination for high resolution stellar spectrograph, using profiles of telluric oxygen bands obtained from emission line observations 21 p3721 A69-38696

Photometric and spectroscopic data for southern RR Lyrae variables, deriving period, light curves in three colors, mean radial velocity and spectral types 21 p3801 A69-38764

IC 349 nebula in Pleiades investigated with diffraction spectrograph, observing spectral energy distribution relationship to illuminating star 21 p3817 A69-39728

Spectrophotometric observations of delta Scuti short period variable stars compared with model atmospheres 22 p4015 A69-40150

Calcium K line strengths in A stars measured by narrow band spectrometer compensated for seeing and transparency variations 22 p4015 A69-40154

P Cygni spectroscopy indicating existence and atmospheric structure of accelerating envelope about star, computing line profiles 22 p4023 A69-40471

Variable HDE 310376 spectroscopic and photometric data, discussing brightness fluctuations, color changes, emission and absorption spectra, etc 22 p4026 A69-40651

Photoelectric observations of eclipsing binary 32 Cygni during 1968 eclipse using standard UVB color filters, tabulating results of UVB photometry 22 p4032 A69-40946

Continual photoelectric monitoring of flare star YZ CMi by photoelectric photometer attached to reflector, giving light curves for flares 22 p4032 A69-40947

Tabulated photoelectric photometer measurements of Nova Vulpeculae 1968 No. 1 23 p4208 A69-41290

UBV magnitudes for open cluster NGC 559 stars determined from combined photoelectric and photographic measurements 23 p4211 A69-41490

Photographic observations of open cluster IC 4665 made on blue and yellow sensitive plates with Vatican refractor compared with photometric measurements 23 p4215 A69-42008

Narrow and intermediate band photometry of globular star clusters in uvby and beta photometric systems, relating reddening to metal abundances of member stars 24 p4387 A69-43352

STELLAR STRUCTURE

Stellar evolution, discussing stellar structure, pre- and post-main sequence evolution, solar system origin, supernovae, white dwarfs, variable stars and close binaries 01 p0148 A69-10046

Solar granules structural and correlation functions indicate homogeneous random field within photograph and regular component in intensity fluctuations spatial distribution 02 p0317 A69-11958

Solar neutrino flux dependence on rotation rate of solar core and fractional mass involved in interior mixing 02 p0325 A69-12600

Electron conductivity in low mass red giant core 02 p0327 A69-12709

Red giants limiting helium core mass dependence on total stellar mass and initial composition from stellar evolutionary models 02 p0327 A69-12710

Photospheric brightness differences and structure of large scale intensity fluctuation, discussing association with solar supergranulation and chromospheric network 03 p0515 A69-14037

Sunspot structure from two dimensional radiative transfer analysis of center limb intensity profiles made at several heliocentric angles 03 p0516 A69-14040

Atomic collision processes in astrophysics noting stellar continuum spectra, Ca ion and He lines, solar corona, heat balance in H I regions and planetary nebulae 07 p1224 A69-19653

Neutrino emission and carbon burning onset in 1.45 solar mass stellar models with pure He envelope, He burning shell and degenerate C-O core 08 p1384 A69-20059

Carbon 12 stars to simulate core evolution of planetary nebulae precursors, discussing nuclear shell burning 08 p1396 A69-20649

Instability of stellar structures intermediate between white dwarfs and neutron stars shown by stellar models, discussing pulsar signals periodicities 08 p1397 A69-20770

Stellar abundances of lithium, deuterium, beryllium and boron indicating nonthermal atmospheric origin 08 p1403 A69-20912

Temperature gradient in semiconvective region, examining molecular weight distribution in mixing due to overstability 09 p1596 A69-22057

Structure and pulsational properties of massive stars with helium cores and thin hydrogen poor envelopes 09 p1606 A69-22421

Static envelope with no mass outflow for star static core constructed from opacity coefficient dependence on temperature and density 10 p1775 A69-23199

Period variations, colors and light curve peculiarities of models of U Geminorum type stars 11 p1954 A69-24363

Stellar physics, Volume 1, covering stellar structure, evolution, physical processes, statistical physics, quantum theory, classical mechanics, etc 12 p2152 A69-25785

White dwarfs structure model for deriving formula for phase density in color-luminosity diagram 12 p2159 A69-26665

Book on astrophysics and stellar astronomy covering stellar radiation, binary and variable stars, positions, magnitudes, galaxies, cosmologies, etc 13 p2337 A69-27463

Critical parameters of isothermal quasi-degenerate white dwarfs calculated by energy method, allowing for relativity theory error and neutron irradiation effect 13 p2351 A69-27871

Structure and thermometry of solar interior from measuring neutrino fluxes intensities emitted by unit mass 13 p2333 A69-28434

White dwarfs periods of radial oscillations, considering ion gas contribution to adiabatic coefficient computation 14 p2517 A69-29090

Relative element abundances in Cyg, Her and Boo atmospheres, calculating curves of growth by Planck gradient method for stellar spectra 14 p2519 A69-29356

P Cyg star HD 190603 atmospheric parameters from spectrograms analyzed by curve of growth method, including ionization and excitation temperatures and electron density 14 p2519 A69-29357

Pulsar model used to explain stellar shape oscillations as cause of radio emission intensity periodic variations 14 p2522 A69-29675

Horizontal branch stars of metal-poor globular clusters in Galaxy evolved from very blue stars, noting substantial mass loss at He-flash 14 p2529 A69-29977

Internal structure of rotating stars, analyzing physical changes, circulation influence on mixing during evolution and angular velocity 15 p2683 A69-30512

Stellar energy diffusion processes studied to determine energy transfer time scale between stellar layers 15 p2692 A69-30767

Equilibrium models reliability for main sequence stars estimated from systematic applications of physical assumption sets and numerical methods 16 p2859 A69-32219

Lynden-Bell statistical mechanics of relaxation in collisionless one dimensional stellar system, discussing low energy particles distribution 16 p2862 A69-32376

Finite resolution effect on solar granulation simulated by numerical experiments using two dimensional smeared pattern 17 p3029 A69-33046

Photoelectric photometric stellar spectroscopy for calculating metal abundance from Fraunhofer absorption lines, relating results to star age 17 p3043 A69-34140

Microturbulence velocity estimation method for solar type stars using low dispersion spectra of narrow band photometry 17 p3044 A69-34178

Pulsar PSR 0833-45 period decrease resulting from mass addition leading to radius and inertia moment decreases 18 p3196 A69-34646

Pulsar PSR 0833-45 polarization structure frequency dependence measurement leading to model implying radiation emanated from magnetic poles neighborhood 18 p3202 A69-35215

Magnetic structure of active solar region as function of time for correlation between flares and magnetic field evolution 20 p3590 A69-37827

Autoionization lines effect on stellar structure by computing contributions to Rosseland mean opacity 20 p3612 A69-38165

Rotating neutron star model to fit pulsar data, considering star crust formation and properties, angular velocity changes and starquake effects 21 p3798 A69-38544

Pleiades cluster and ambient interstellar medium structure analyzed for spectral distribution based on plane-parallel scattering model 21 p3817 A69-39727

Dynamo action origin of stellar and planetary magnetic fields, considering turbulent helical motions of H convection zone of sun 22 p4011 A69-39998

Galactic center observations over various wavelengths including polarization, diameter, flux measurements and power output 22 p4029 A69-40767

Book on stellar structure, Volume 1, Physical principles, covering interior conditions, thermodynamic and radiation theories, stellar temperature, energy and opacity, etc 23 p4211 A69-41377

Principles of stellar structure, Volume 2, covering outer layers, models computation, white dwarf stars, stellar evolution, pulsating stars, etc 23 p4223 A69-42475

Stellar structures and evolution stressing composition and processes of stellar interiors 24 p4379 A69-42782

STELLAR WINDS

Stellar rotation braking due to mass loss from coronae through stellar wind based on calculation of acoustic energy generation from convective zone 08 p1396 A69-20644

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star 11 p1955 A69-24385

Magnetoacoustic waves generated by Cerenkov radiation from corpuscular fluxes due to star interaction with stellar wind, determining deceleration forces on star 24 p4390 A69-43775

STELLARATORS

Hot plasma containment by magnetic field, presenting results from stellarator for toroidal sheared magnetic field properties 07 p1190 A69-18929

Plasma diffusion in toroidal stellarator using integrals of drift equations for particle trajectories, determining distribution function 07 p1191 A69-18985

Loss rate of plasma from stellarator due to binary Coulomb collisions scattering particles in loss region, discussing diffusion coefficients 08 p1364 A69-20520

Asymptotic toroidal equilibrium for guiding center plasma model based on stellarator expansion, considering toroidal curvature, helical currents and plasma pressures 09 p1552 A69-22044

Plasma diffusion in toroidal stellarator, calculating collisional diffusion and diffusion constants 09 p1552 A69-22294

Plasma capture in stellarator diverter aperture with asynchronous plasma jets injection through diverter magnetic slots, discussing plasma cylinder density effect 21 p3776 A69-38585

STEP FUNCTIONS

Pneumatic stepping motor actuation system with pure fluid valves and signal processing and minimum number of moving mechanical parts for high g and temperature environments 02 p0196 A69-12086

- Numerical integration stability of differential equations, noting limiting integration step size for unsteady distillation
02 p0273 A69-12478
- Plant identification procedures by stepwise approximation and least squares methods
03 p0409 A69-13072
- Step function factor for laminar heat transfer from rotating disk with surface temperature changing stepwise in uniform forced stream
06 p1029 A69-17003
- Discrete time, single input, stepping extremum control system with input disturbance and output measurement noise, discussing computer simulation and dimensional analysis
07 p1114 A69-18287
- Laser small signal step response measured, deducing medium bandwidth
[IEEE PAPER G-9]
07 p1151 A69-19056
- Transient response spectrum of nonlinear cubic spring mass system subjected to step function input, discussing viscous damping effects on peak response
08 p1413 A69-20402
- Electromagnetic step-function plane waves propagation in ionosphere using Fourier transform and Bessel functions
12 p2034 A69-27132
- Nonlinear control systems error signals convergence to steady states in frequency domain, applying step or ramp functions to single feedback system
13 p2237 A69-27188
- Shadow zone diffraction of plane step function compressional wave by circular cavity, using Friedlander wave front approximations
13 p2368 A69-28347
- Weak superconducting contacts volt-ampere characteristics current steps and emission spectra, showing singularities due to superconducting current nonharmonicity
14 p2504 A69-28994
- Spring mass nonlinear systems under constant force excitation, studying step function responses of systems with various restoring force characteristics
21 p3836 A69-38985
- STEREOCHEMISTRY**
Pyridine nucleotide-linked D-lactate dehydrogenase stereospecificity in various species of invertebrates
01 p0018 A69-11198
- Gas-liquid and thin layer chromatography and nuclear magnetic resonance techniques to steric analysis of diketopiperazines
07 p1075 A69-19498
- Life detection for space missions based on detecting optical asymmetry in biogenic molecules by gas chromatography involving diastereomeric esters synthesis
15 p2556 A69-31315
- STEREOGRAPHY**
U STEREOPHOTOGRAPHY
- STEREOPHOTOGRAPHY**
Mirror photogrammetry geometric principles, studying photo pairs, mirror reflection and reduction methods
01 p0077 A69-10025
- Error analysis of orientation methods for extraterrestrial stereophotogrammetric mapping
[JPL-TR-32-1344]
03 p0429 A69-13299
- Algorithm generating same stereogram for two or more selected surfaces by extending random dot stereogram technique
04 p0603 A69-15445
- Wind vector in respect to orientation of large scale cirrus bands based on stereophotogrammetry and radar observations
08 p1346 A69-20442
- Scenic holographic stereograms resolution and up/down scaling, discussing roles of projector lens and camera aperture
11 p1883 A69-24690
- Photogrammetric calibration of Surveyor 7 stereo mirror based on vector analysis
[JPL-TR-32-1390]
13 p2263 A69-28199
- Heights of cloud bases and convective cloud tops determined by stereoscopic photogrammetry of Apollo 6 mission
20 p3569 A69-36926
- Side-looking radar and IR line scanning as method for simultaneous stereo height mapping, using images produced from same vantage point
20 p3536 A69-36929
- Microholographic system for nonpseudoscopic stereoscopic image reconstruction of transparent and nontransparent microobjects
21 p3726 A69-39702
- Mars landing site topography reconstructed via stereoscopic pictures returned by surface-based imaging systems
23 p4164 A69-41618
- Automated air photo identification of crop types, utilizing stereo height as discriminating variable
23 p4155 A69-41721
- STEREOSCOPIC PHOTOGRAPHY**
U STEREOPHOTOGRAPHY
- STEREOSCOPIC VISION**
Algorithm generating same stereogram for two or more selected surfaces by extending random dot stereogram technique
04 p0603 A69-15445
- Stereoscopy effects on pattern recognition in visual noise
06 p0880 A69-17214
- Stereoscopic shadow caster application to photographic stereoscopic projection for studying binocular stereopsis under kinetic viewing conditions in vision research
22 p3893 A69-40839
- Device for studying stereoscopic field of vision applied to determining field of vision standards for healthy individuals
22 p3886 A69-41113
- Electronic scanning and correlation techniques for terrain sensing required in automatic stereoperception
24 p4316 A69-43566
- STEREOSCOPY**
NT STEREOPHOTOGRAPHY
- Hyperstereoscopic and hypostereoscopic hologram images with doubled or halved interocular distance, noting effect on image depth
02 p0249 A69-11931
- STERILIZATION**
NT CHEMICAL STERILIZATION
NT SPACECRAFT STERILIZATION
- Microorganisms and viruses susceptibility to sterilization by ionizing radiation, heat and combination of radiation and heat, considering space materials damage elimination
05 p0713 A69-15947
- Data sampling and statistical verification in large scale sterilization procedures, discussing biological indicator /bacillus stearothermophilus/ and incubation time
05 p0714 A69-15952
- Control and sampling in sterile rooms, noting worker introduction of contaminants
05 p0714 A69-15953
- Research and development programs leading to heat sterilizable spacecraft battery separator material, describing bench tests
23 p4072 A69-42284
- STERNS**
U AFTERBODIES
- STEROIDS**
NT ALDOSTERONE
NT CHOLESTEROL
NT CORTICOSTEROIDS
NT CORTISONE
- Steroid hormones effect on nervous system and behavior from data on gonadectomized rats and monkeys treated with testosterone propionate
03 p0375 A69-13551
- Electron impact induced fragmentation of ring D in steroids involving loss of carbon atoms analyzed by mass spectrometry
07 p1069 A69-19497
- European pilots accustomed to equatorial climate tested during regular flying missions, discussing heat effects on urinary steroids
12 p2024 A69-26560
- Food intake changes of female rats in response to changes in energy balance, discussing steroids as physiological tracer
15 p2555 A69-30693
- Urinary excretion of hormonal metabolites in intercontinentally flown test subjects, using gas chromatographic procedure for steroid identification
24 p4268 A69-43404
- STETHOSCOPES**
Electronic stethoscopes for use in high background noise environments for patients on air evacuation flights
21 p3667 A69-39444
- STIELTJES INTEGRAL**
Stieltjes transform relating initial boundary value problems for partial differential equations of various classifications
08 p1342 A69-20352
- Dynamic reciprocity relationship for linear directed continuous viscoelastic media, using Stieltjes convolution
19 p3373 A69-36307
- STIFF STRUCTURES**
U RIGID STRUCTURES
- STIFFENING**
Buckling equations for orthotropic cylindrical shells with eccentric spiral stiffeners derived through variation method of total potential
04 p0676 A69-14710
- Damping of response of integrally stiffened skin structures to random acoustic pressures, reducing rms stress in case of broad band excitation
[ASME PAPER 69-VIBR-26]
10 p1806 A69-24172
- Free vibrations in axisymmetrically loaded orthotropic circular conical shells with longitudinal and circumferential stiffening based on linearized theory, considering shear deformation and inertia
11 p1969 A69-24327
- Stiffener geometry and spacing effects on buckling of axially compressed cylindrical and conical shells
11 p1979 A69-24815
- Shear buckling of simply supported infinitely long plates orthogonally reinforced by stiffeners with flexural and torsional rigidity
11 p1984 A69-25142
- Contact problem for half plane with elastic stiffener reduced to Prandtl integrodifferential equation, determining contact stresses
14 p2531 A69-28804
- STIFFNESS**
Ribbon reinforcements in composite materials noting stiffness properties
01 p0172 A69-11265
- Vertical, horizontal and rocking vibrations of body on surface of otherwise unloaded elastic half plane, estimating stiffness for coupled vibrations
[ASME PAPER 68-WA/APM-12]
04 p0668 A69-14393
- Stiffness matrices for sector elements under membrane stress, considering alternative displacement distributions within element
04 p0676 A69-14728
- Stiffness matrices for buckling or vibration analysis of long thin flat plate structures connected at longitudinal edges
05 p0836 A69-16029
- Polycarbonate surface stiffness increase associated with fatigue induced by repetition of loads
06 p0946 A69-17206
- Small bending stiffness effect on inflated torus and cylindrical shells under radial load for determining large space structure stiffness
06 p1024 A69-17607
- Computer analysis for optimizing size and shape of thin walled axisymmetric elastic rings, plates and shells with respect to tension, rigidity and weight
06 p1026 A69-18017
- Unsymmetrically laminated simply supported plates approximate solutions, considering potential energy and reduced stiffness matrix
07 p1232 A69-18725
- Explicit transverse bending stiffness and mass matrices for triangular finite plate element with linear thickness variation, using matrices for natural frequencies of vibration
08 p1414 A69-20526
- Testing system stiffness effect on sheet fracture, discussing notch strength dependence on stiffness
10 p1796 A69-23075
- Stiffness matrix for doubly curved shallow shell element with rectangular plane projection applied to circular cantilevered cylinder and barrel vault
10 p1802 A69-23892
- Modal coupling in thermally stressed plates, obtaining solution for frequencies and stiffness
11 p1990 A69-25509
- Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation
11 p1993 A69-25529
- Nonstiffness of nonshallow spherical dome using asymptotic method, applying nonlinear Reissner equations to finite symmetric deformation of thin shells of revolution
11 p1996 A69-25733
- Book on design procedures for modern fibrous composites emphasizing stiffness properties and calculations, covering laminates orthotropic lamina, etc
12 p2179 A69-26238

Stiffness matrix derived for skewed curved shallow shell element with reference to oblique coordinate system

13 p2358 A69-27210

Subelement geometrical stiffness determined, considering complete element natural modes

13 p2362 A69-27838

Stiffness matrix for refined triangular plate bending finite element, considering Kirchhoff theory

15 p2706 A69-30434

Finite element and iteration method for large deflection of rectangular plate, considering stiffness matrix for bending

15 p2706 A69-30435

Stiffness matrix of polygonal finite plate bending element derived using assumed stress distribution

15 p3447 A69-30867

Noise transmission from turbulent boundary layer through flexible plate into closed cavity, emphasizing nonlinear plate stiffness and mutual interaction between plate and airflow

17 p3006 A69-33409

Elastic stiffness, kinematically equivalent loads and initial loads due to initial strains of FUGA 6 element, describing program for matrices generation

19 p3447 A69-36852

Random arrays representing random filament packing of actual composite materials, discussing effects on transverse stiffness

20 p3626 A69-37758

Holor algebra with tensor notations applied to elastic structures /discrete systems/, discussing inertia and stiffness tensors

21 p3831 A69-38415

Stiffness matrix for curved membrane shell, outlining discrete element representation of cylinders with widely spaced circumferential stiffeners

21 p3842 A69-39305

Computerized aircraft structural analysis system, adopting finite element technique /direct stiffness method/ based on COSMOS system

21 p3842 A69-39307

Stress analysis of thin axisymmetric shells by plane frame analysis program, noting stiffness matrix for conical shell element

21 p3843 A69-39312

Curved rectangular elements stiffness matrices derived for finite element analysis of cylindrical shells bending

22 p4046 A69-40969

Single stage rocket body finite bending stiffness effect on pitching moment using approximate equation, noting applicability to multistage rockets

22 p4037 A69-41048

ASTRA /advanced structural analyzer/ based on stiffness approach to finite element method, generating mathematical model for stresses and deflections

23 p4232 A69-42144

Perforated heat exchanger tube plates stiffness determination from hole diameter-to-spacing ratios

24 p4400 A69-43087

STILBENE

Polymeric Schiff bases synthesis, thermal stability and nature of pyrolytic decomposition of polyazines and derived polystilbenes

07 p1074 A69-18628

STILLS

Digital simulation of transient solar still processes, using finite difference approach for heat flow to and from soil

16 p2765 A69-31816

STIMULANT

NT NORADRENALINE

NT NOREPINEPHRINE

Lobeline effect on oxygen pressure in gigantocellular nucleus of medulla oblongata and respiration rates of dogs recorded automatically

22 p3888 A69-41273

STIMULATED EMISSION

Radiation damage in CdS irradiated by normal mode or Q-switched ruby laser, discussing stimulated Brillouin scattering

02 p0257 A69-12614

High resolution spectroscopic study of stimulated rotational transitions of nitrogen molecules using crossed grating Echelle spectrograph

02 p0284 A69-12621

Two photon absorption and stimulated emission mechanism of CdS-CdSe mixed crystals investigated by ruby laser output

03 p0438 A69-13052

Q switched laser based on light waves parametric interaction in nonlinear medium operating at wavelengths from UV to IR

03 p0439 A69-13054

Nonlinear influence of resonator losses on stimulated emission of ruby laser, noting cut-off action

03 p0439 A69-13058

Neodymium glass properties degradation during laser operation due to short wave pumping radiation and stimulated emission

03 p0442 A69-14219

Superradiant and laser spectroscopy in second positive system of molecular nitrogen

04 p0609 A69-14285

Stimulated emission of cyanine dyes, discussing amplification coefficients

04 p0612 A69-15373

Stimulated emission properties of active fibers obtained from photomultipliers transmitting pulses to oscillograph

05 p0761 A69-15657

Thermionic electron emission from Mo and W targets irradiated by CW carbon dioxide laser beam

05 p0771 A69-15812

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

06 p0934 A69-17457

Relaxation theory of highly ionized hydrogen plasma noting applications to stimulated emission, radiation source development and electromagnetic radiation amplification

07 p1191 A69-18996

Spatially nonuniform laser model allowing for photon density and inversion variations, noting self Q switching mechanisms from stimulated scattering processes

[IEEE PAPER Q-6] 07 p1154 A69-19078

Stimulated Compton scattering for laser action, noting voltage tunability and gain at far IR wavelengths

[IEEE PAPER S-9] 07 p1154 A69-19081

Induced emission cross section of neodymium glass laser in quasi-steady mode measured as function of rod section, mirror reflectivity and output

07 p1156 A69-19161

Level crossing effect in stimulated emission and application to determination of hyperfine splitting in Xe 129 excited electronic state during laser transition

07 p1156 A69-19398

Second harmonic generation in laser crystals by Gaussian beams of finite aperture

07 p1158 A69-19756

Li niobate crystal emission excited by Ar laser beam, deriving laser action formulas

08 p1323 A69-19941

Stimulated emission of laser employing crystal and glass lasers doped with neodymium ions, using high temperature spectroscopy

08 p1323 A69-19944

Stimulated emission of water cooled CW Nd doped lanthanum fluoride at room temperature

08 p1323 A69-19945

Collective interactions of electromagnetic waves in plasma, discussing light scattering from electron fluctuations, stimulated emission and anomalous absorption

08 p1361 A69-20220

Stimulated Mandelstam-Brillouin scattering at second harmonic of ruby laser and neodymium glass laser

09 p1520 A69-22684

First Stokes component of stimulated Mandelstam-Brillouin scattering and line defects caused by self focusing of single pulse laser beam

09 p1521 A69-22686

Stimulated emission of trivalent Nd ions in glass base, explaining connection between efficiency and emission polarization by interaction of laser modes with ions

10 p1703 A69-23618

Resonator interferometry of pulsed submillimeter wave lasers, analyzing mode structure, pulse shapes and molecular mechanism of laser emission

10 p1705 A69-23810

Specific level role in emission of optical radiation by ruby laser stimulated calcium fluoride crystals doped with divalent Dy ions

11 p1894 A69-24618

Stimulated emission cross section measurement of Nd ions in calcium tungstate using Edwards method

11 p1938 A69-25049

Transmitter frequency increase effect on production of artificial stimulated VLF emissions in magnetosphere

11 p1878 A69-25156

Fluorescence stimulated by high energy electron and ion beams, determining vibrational temperature and concentration of molecular oxygen in high enthalpy wind tunnel flows

13 p2302 A69-28265

Self resonant energy transfer mechanisms in active media for lasers investigated by two methods

14 p2460 A69-29644

Stimulated emission of cerium trifluoride-positive trivalent Nd ion laser noting absorption, luminescence, excitation, emission spectra and metastable state lifetime

14 p2460 A69-29645

Low temperature method for measuring breakdown threshold parameters of liquid and gaseous He by laser beam, observing stimulated Mandelstam-Brillouin scattering

16 p2796 A69-31799

Stimulated emission of cyanine dyes, discussing amplification coefficients

16 p2797 A69-32120

Stimulated emission properties of active fibers obtained from photomultipliers transmitting pulses to oscillograph

16 p2792 A69-32514

Radiation diffusion in plane-parallel isothermal gas layer of two and three level atoms, considering stimulated emission and frequency redistribution

16 p2864 A69-32587

Laser action in quantum system, analyzing absorption constant relation to spontaneous/stimulated emission constants, energy level population inversion, pumping, etc

17 p2984 A69-34150

Ruby laser stimulated emission spatial, temporal, energetic and spectral characteristics during disruption in spherical cavity containing strongly scattering medium

18 p3152 A69-35026

Radiation emission by molecules in electromagnetic field, considering cavity resonators and waveguides excitation

18 p3178 A69-35404

Induced-emission oscillator navigation sensor with performance limitations, noting ring laser and nuclear maser gyro and laser accelerometer

19 p3369 A69-35795

Stimulated emission characteristics of CdS-CdSe mixed crystals subjected to two photon excitation, studying pulse energy at 77 K as function of pumping power

19 p3332 A69-35867

Two photon excitation of luminescence in complex uranyl compound single crystals using Q switched ruby laser

19 p3334 A69-35982

Metastable level population measurement in laser crystal based on luminescence changes under influence of stimulated emission

20 p3555 A69-37940

Stimulated emission at current pulse end ascribed to external resonator turn-on time delay effects with GaAs injection lasers at room temperature

21 p3734 A69-38408

Luminous efficiency for electron induced molecular nitrogen bands, discussing thick- and thin-target measurements of fluorescent efficiencies

21 p3774 A69-38521

Time dependent mathematical double acceptor model including heat effects for analyzing Q switching and stimulated emission time delays in pulsed junction lasers

22 p3962 A69-40560

Digital computer determination of stimulated emission time delay, Q switching temperature and current region and impurity profile effect across junction in junction lasers

22 p3962 A69-40561

Linear self consistent diffraction emission theory and relationship to electron beam propagation

22 p3899 A69-40615

Pumping model for analyzing stimulated and enhanced potassium multiphoton emission primed by ruby laser-stimulated Raman electronic radiation

23 p4171 A69-41391

Stimulated Brillouin scattering application to measurement of hypersonic velocities and absorption in gigahertz frequency range, laser frequency shifting and Q switching, etc

23 p4167 A69-42183

GaAs junction laser total stimulated light power dependence on resonator length taking into account optical losses

24 p4330 A69-43768

STIMULATED EMISSION DEVICES NT ARGON LASERS

NT CARBON DIOXIDE LASERS
 NT CHEMICAL LASERS
 NT GALLIUM ARSENIDE LASERS
 NT GAS LASERS
 NT GAS MASERS
 NT INFRARED LASERS
 NT INJECTION LASERS
 NT LASERS
 NT LIQUID LASERS
 NT MASERS
 NT ORGANIC LASERS
 NT PROTON MASERS
 NT PULSED LASERS
 NT Q SWITCHED LASERS
 NT RING LASERS
 NT RUBY LASERS
 NT SEMICONDUCTOR LASERS
 NT SOLID STATE LASERS
 NT TRAVELING WAVE MASERS

Semiclassical theory of quantum generators, examining laser system response to effect of monochromatic standing wave based on kinetic equation for density matrix

16 p2798 A69-32480

Collection of papers on quantum electronics covering microwave, optical quantum generators and amplifiers, paramagnetic resonance, molecular excitation, etc

18 p3178 A69-35401

Gas and solid state microwave quantum generators and amplifiers, discussing radiation characteristics

18 p3153 A69-35407

Far IR radiation generation, considering incoherent sources, harmonic generators, electron tubes, relativistic electrons and quantum oscillators

22 p3982 A69-40669

STIMULATION

U AUDITORY STIMULI
 U SENSORY STIMULATION

STIMULI

Hypothalamic motivational systems and stimulation, discussing behavior patterns and plasticity

09 p1444 A69-21310

STIRLING CYCLE

Radioisotope energized Stirling engine for spacecraft auxiliary electric power, discussing system configurations, weight and fuel requirements

23 p4190 A69-42281

STIRRING

Adiabatic stirred reactor, discussing steady state nonlinear equations of reactant gases combustion

02 p0352 A69-12316

STOCHASTIC PROCESSES

NT MARKOV CHAINS
 NT MARKOV PROCESSES
 NT RANDOM PROCESSES

Stochastic Lurie type systems stability using Liapunov method

01 p0050 A69-10240

Optimal control of discrete and continuous stochastic linear dynamical systems, discussing algorithms for instantaneous weighted minimum mean square error performance

01 p0051 A69-10439

Single frequency oscillations in stochastic quasi-linear differential equations with delay

01 p0170 A69-10825

Kalman optimal filter for linear distributed parameter systems with Gaussian disturbances and measurement noise

01 p0034 A69-11143

Free access of low energy galactic particles to solar wind lines of force due to stochastic nature of lines

01 p0147 A69-11238

Linear filter performance degradation due to modeling error in estimate of state vector of stochastic linear dynamic systems

02 p0225 A69-11971

Bulk queueing with service time distribution assuming customer arrival in batches and service discontinuance

02 p0271 A69-12060

Approximation of correlation or transfer function obtained through exponential polynomial to determine stochastic process spectral density

03 p0409 A69-12976

Book on filtering for stochastic processes with applications to guidance covering asymptotic properties, nonlinear filtering, mathematical models, etc

04 p0580 A69-14386

Optimal control of linear stochastic systems using noise measurement data mathematical model

04 p0581 A69-14569

Stochastic problems in control - Conference, Ann Arbor, June 1968

04 p0581 A69-14693

Mathematical modeling of Gaussian and nonGaussian processes obtained by linear and nonlinear transformations of white Gaussian noise, noting Markov processes

04 p0623 A69-14694

Stability of stochastic systems, discussing continuous parameter models, Gaussian white noise, stabilization of unstable deterministic system and ITO equations

04 p0623 A69-14695

Linear and nonlinear filtering, discussing models for signal process, linear white noise problem, optimal estimates, colored noise and finite dimensional approximation

04 p0581 A69-14696

Optimal stochastic control of small dynamic systems described by random differential equations, noting selective bibliography on several subjects

04 p0582 A69-14697

Fluid amplifier linear transfer functions at signal levels on order of internal noise identified by random signal testing method

[ASME PAPER 68-WA/AUT-2]

05 p0706 A69-16184

Maximum principle application to stochastic systems, developing set of stochastic partial differential equations

05 p0788 A69-16482

Matrix Riccati and matrix quadratic equations in problems of stochastic control and filtering

05 p0740 A69-16601

On-line optimization of stochastic control systems based on learning controller model, discussing computer simulation results

06 p0900 A69-17354

Linear distributed parameter system identification by stochastic approximation, obtaining constant parameters sequentially

06 p0900 A69-17358

Optimal estimation of sampled stochastic process with finite state unknown parameters

06 p0901 A69-17362

M measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations

06 p0902 A69-17402

Light variations of irregular eruptive variables known as RW Aurigae or T Tauri stars, discussing suitability of stochastic model

06 p0996 A69-17448

Stochastic approximation algorithms for adaptive linear discrete time system identification using noisy input

06 p0904 A69-17940

Linear equivalent gain matrix of multivariable nonlinearity evaluated with equivalent gain concept for monovariable nonlinear stochastic process

07 p1114 A69-18286

Galerkin method of moments applied to stochastic bounded linear operator equation, discussing statistically homogeneous operator case and electric field in dielectric

07 p1174 A69-19472

Stochastic model for real time on demand weather predictions using REEP /regression estimation of event probabilities/ equations in Markov chain

08 p1345 A69-20299

Book on stochastic convergence covering infinite sequences of random variables, stochastic integrals and derivatives, characterization of normal distribution and Wiener process

08 p1343 A69-20443

Nonadiabatic and stochastic mechanisms for cyclotron resonance trapping and heating in magnetic mirror geometries

08 p1364 A69-20518

Fluctuation voltage mean square value at polar dielectric capacitor terminals determined by applying stochastic properties of Poisson point processes to statistical model

08 p1295 A69-21151

Soviet book on methods of optimal statistical solutions and problems of optimal control covering basic equations of random processes, stochastic differential equations, etc

09 p1473 A69-21932

Stochastic model of electron cyclotron heating, calculating energy gain during transit of magnetic mirror field in presence of microwave electric field

09 p1551 A69-22038

Stochastic model for calculating expected component failures in transient state from Weibull distribution failure data for first generation

09 p1504 A69-22149

Plasma ion heating by external stochastic HF field, noting avoidance of special thermalization processes

09 p1553 A69-22527

Optimal stochastic control, discussing dynamic mathematical models described by differential equations

09 p1475 A69-22567

Inverse problem in stochastic processes, considering random moving force and strip load in structural stress analysis

10 p1793 A69-22876

State probabilities of finite stochastic queueing system for calculating equipment reliability parameters

10 p1664 A69-23693

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account

10 p1722 A69-23972

Stochastic and ergodic aspects of magnetic lines of force, discussing cosmic ray diffusion in interplanetary magnetic field

10 p1770 A69-24111

Stochastic model of interstellar magnetic field to account for observed cosmic ray mean life

10 p1771 A69-24112

Stochastic approximation procedure minimizing mean square error criterion for system identification, estimation and decomposition of mixtures

11 p1842 A69-24934

Adaptive optimal estimation of sampled stochastic process with finite state unknown parameters, using separation technique

11 p1858 A69-24935

Kozhevnikov optimality principle for optimum averaging of discontinuous stochastic control systems extended to include intensities of discontinuities

11 p1966 A69-25329

Stochastic optimal control of continuous time systems with unknown gain, discussing filtering- control interaction and computer experiments

11 p1860 A69-25442

Modeling errors in linear discrete stochastic system effects on Kalman filter state estimates

11 p1860 A69-25448

Stochastic problems in thin elastic shell theory solved by equations obtained by linearizing shell equations near initial state of stress

11 p1996 A69-25732

Linear extrapolation of stationary stochastic process predicting fluctuations of minimum and maximum periods in solar cycle

12 p2149 A69-26221

Integral representation for continuous linear stochastic processes with independent pieces, assuming convergence in probability for sequence of random variables

12 p2121 A69-26365

Partial differential equation with stochastic characteristics reducible to parabolic equation by introducing additional variables

12 p2121 A69-26366

Quasi-stochastic nonlinear one dimensional oscillations in periodically disturbed field applied to celestial mechanics of planetoids

12 p2130 A69-26373

Feedback control of linear systems subject to sudden changes in parameter values

12 p2052 A69-26502

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements

13 p2355 A69-27683

Book on probability and stochastic processes, discussing applications

13 p2289 A69-28177

Stochastic saturating systems optimal control computation, considering attitude control and tracking system design by elliptical differential equation of dynamic programming

15 p2582 A69-30601

Probabilistic automata stochastic matrices algebraic properties of definite, quasi-definite, periodic and quasi-periodic sets

15 p2645 A69-31141

Stochastic heating of protons by random magnetosonic wave propagating normal to magnetic field to explain proton energy excess in magnetotail plasma sheet

16 p2848 A69-31969

Book on estimation theory and applications covering stochastic processes, linear estimators and recursive formulations

16 p2764 A69-32386

Stochastic differential game theory, discussing nonlinear partial differential equations for solution, dynamic programming validity conditions, finite difference scheme, etc
17 p2994 A69-32844

Cosmic ray intensity short term stochastic variations in solar system related to turbulent solar wind day-to-day variations
18 p3186 A69-34300

Filtering and optimal control problems for discrete stochastic dynamical systems, describing various feedback controls and midcourse guidance optimization
18 p3109 A69-34660

Feedback realization of continuous optimal filter applied to designing servomechanisms with stochastic inputs and disturbances
18 p3110 A69-34673

Rarefied gases transfer coefficients stochastic process calculation models, comparing results with correlation functions derived from transport equation
18 p3121 A69-34710

Stochastic meteorological models based upon presence of weather regimes, illustrating association with statistical inference problems
18 p3166 A69-34822

Nonlinear filter theory applied to digital telemetry binary processes, using continuous time stochastic process
19 p3274 A69-36281

Stochastic models for calculating optimal elastoplastic one dimensional systems
19 p3438 A69-36313

M-ary detection for optical communication investigated for maximum likelihood detection of one of M Poisson processes in background noise
19 p3276 A69-36486

Two procedures for processing statistical data concerning Gaussian processes made exchangeable by manageable formula
19 p3361 A69-36646

Stochastic motion in linear lattice of coupled harmonic oscillators analyzed by Schroedinger coordinates and Bessel functions for time behavior, energy flow and impurity effect
19 p3374 A69-36752

Stochastic model for estimating manufacturing costs, discussing Mellin and Laplace transforms and Gram-Charlier series approximations
20 p3633 A69-36924

Book on stochastic optimal linear estimation and control, discussing probability theory, models and continuous and discrete time linear systems
20 p3509 A69-37143

Atmospheric turbulence and impurities diffusion considered as stochastic processes, deriving equations and covariance functions for flow characteristics
20 p3570 A69-37426

Admissible controls set for discontinuous stochastic automatic control systems, deriving mean optimal averaging of controls
21 p3770 A69-38855

Unknown parameter experimental estimation based on signal direct observations with solution by stochastic approximations method
21 p3756 A69-39265

Spacecraft atmospheric entry descent trajectory optimization by stochastic procedure, requiring onboard digital computer to realize optimal algorithms
21 p3767 A69-39648

Stochastic motion control problems formulations in rocket dynamics
21 p3767 A69-39650

Condensation kinetics in clouds, determining cloud spectrum evolution taking stochastic processes into account
21 p3760 A69-39658

Laminated random media stochastic displacement, using perturbation procedure to derive mean wave propagation deterministic equations
22 p4040 A69-39979

Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
22 p3917 A69-40116

Adaptive control system synthesis for reducing computation labor for controlled inertialess plant, reproducing probability density function to describe unknown parameters
22 p3918 A69-40739

Robbins-Monro stochastic approximation method using algorithms for identifying finite memory time-discrete time-stationary linear system from noisy input-output measurements
22 p3918 A69-41013

Liapunov stochastic stability direct method analog used for estimating reliability of redundant systems with constant recovery time
23 p4144 A69-41953

Frequency condition for ensuring stochastic stability of one dimensional discrete feedback control system containing linear dynamic part and inertialess nonlinear component
24 p4288 A69-42670

Separation theorem for arbitrary nonlinear measurements to find optimal stochastic control without dynamic programming
24 p4291 A69-43269

Multidimensional approximation algorithm for parameter optimization of nonlinear stochastic systems, detailing application to space vehicle attitude controller
24 p4291 A69-43275

Stochastic fuel regulator problem investigated by optimal and self organizing techniques, emphasizing realizability of resulting controllers
24 p4292 A69-43284

Linear-quadratic pursuit-evasion game with dynamics perturbed by additive white Gaussian noise, obtaining linear minimax solutions
24 p4341 A69-43296

Stochastic approximation applied to sampled data system parameters including sampling interval
24 p4295 A69-43319

Wiener-Hermite truncated stochastic expansion used for velocity and concentration fields in turbulent flow convecting passive scalar, determining diffusivity and spectrum function
24 p4302 A69-43359

Pulsating mechanisms in alternative gas and liquid blocks two phase flow, using stochastic process specified by dynamic pressure time dependent fluctuations
24 p4305 A69-43633

STOICHIOMETRY

Temperature vs compactness relationship in NbC compacts having nonstoichiometric composition and approximately equal specific surface, determining self diffusion coefficients
10 p1711 A69-23337

Room temperature thermal conductivity of semiconducting alloys with stoichiometric distributions of vacancies in cation sublattice, discussing heat resistance
12 p2142 A69-25975

GaAs crystallization for various deviations of melt from stoichiometric state, noting concentration supercooling at phase boundary layer
12 p2144 A69-26586

Beta-thiodiglycol effect on hardening of epoxy resin with stoichiometric amounts of maleic anhydride and methyltetrahydrophthalic anhydride
22 p3973 A69-40677

STOKES FLOW

Series solutions for compressible and incompressible flows at low Reynolds number, including axisymmetric and MHD Stokes flow
04 p0587 A69-14609

Forced convection heat transfer coefficient invariance to flow reversal in Stokes and potential streaming flows past isothermal particles of arbitrary shape
04 p0590 A69-15274

MHD Stokes flow for rotating disk in parallel magnetic field, showing Lorentz force inhibiting effect on fluid motion
13 p2305 A69-27325

Integral equations for classical elasticity boundary value problems, stressing analogous Stokes flow hydrodynamic equations
14 p2535 A69-29361

Bag type deformation of incompressible viscous convective and nonevaporating droplets immersed in Stokes or potential flow pressure distributions, including Weber number
17 p2954 A69-33456

Unsteady viscous flow past flat plate based on Stokes approximation, calculating shear stress
22 p3931 A69-40684

STOKES LAW

Stokes phenomenon, considering continuity solution of differential equations across Stokes lines
07 p1174 A69-19220

STOKES LAW [FLUID MECHANICS]

Stokes and Rayleigh layer formation during solid body rotation of semiinfinite fluid and infinite disk
03 p0417 A69-13797

Stokes-like region around yawed needle in hypersonic strong interaction regime, discussing asymptotic analysis under Stewartson conditions
04 p0542 A69-14732

STOKES THEOREM [VECTOR CALCULUS]

Instrumental Stokes vector calculating method involving light flow transformation matrix elements determination
04 p0601 A69-15248

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements
09 p1588 A69-21367

Spectral study of Stokes vector for light scattered by natural objects, recommending phase and optical axis inclination angles for aircraft measurements
18 p3198 A69-34756

STOL AIRCRAFT

U SHORT TAKEOFF AIRCRAFT

STOMACH

Increased gravitational stress effects on esophageal sphincter pressures and gastroesophageal reflux in rhesus monkeys, noting cardia competence
06 p0874 A69-17838

Motion sickness inhibitive effect on stomach motor activity, measuring biopotential of stomach wall, pyloric sphincter and ganglions
08 p1263 A69-19935

STONES [ROCKS]

U ROCKS

STONY METEORITES

NT ACHONDRITES
NT CARBONACEOUS METEORITES
NT CHONDRITES
NT KAPOETA ACHONDRITE
NT MURRAY METEORITE
NT ORGUEIL METEORITE
NT PANTAR CHONDRITES

Meteorite structure and origin, discussing cosmic dust analysis and collection, Tungusk silicate-magnetite spherules, asteroid collisions and meteorite ages
01 p0159 A69-11367

Uranium in meteorites, discussing U content and isotope composition, Pb isotope ratios, radiogenic Pb, origin of matter and meteorite ages
01 p0025 A69-11369

Mineralogy of iron fragments from impact craters near Lake Kaali, Estonia, discussing structure and type of meteorite
01 p0159 A69-11370

Thermoluminescence intensity of dolomite specimens from Kaali meteorite craters, discussing meteorite impact thermomechanical effect and crystal lattice defects
01 p0159 A69-11371

Nerf and Kaande stony meteorites mineralogical composition from microscopy, noting olivine hypersthene chondrite classification
01 p0159 A69-11374

Morphological properties and history of Zabrode stony meteorite, discussing storage, disappearance and recovery
01 p0160 A69-11384

Minerals in ablated crust of Saratov meteorite using X ray analysis
01 p0160 A69-11388

Stony meteorite Krahenberg, determining isotopic composition, rubidium and strontium age of dark and light portions by neutron activation analysis
05 p0826 A69-16439

Rare gases in stony meteorites, noting premodern inheritance and complex Xe anomalies
05 p0826 A69-16440

Production rates of nuclides measured in stack of glass plates under proton irradiation for calculating cosmic ray production rates in stone meteorites
06 p0989 A69-17283

Tritium and argon 39 measurements of stone and iron meteorites, discussing decay and production rates and cosmic ray intensity
09 p1604 A69-22398

Aluminum abundances in stony meteorites measured using nondestructive instrumental neutron activation analysis
11 p1952 A69-24334

Chemical composition of stony meteorites by analytical methods, discussing sample preparation and X ray fluorescence
11 p1953 A69-24358

Stony meteoric particles size and velocity during passage through atmosphere
12 p2157 A69-26341

Iron and stone meteorites ablation using electrodeless plasmatron and filmed onto IR films
15 p2697 A69-31252

Uranium abundances in several eucrites measured by fission track method, discussing Pu-Xe decay interval question
17 p3044 A69-34167

Quantitative analysis and classification of stony meteorites, including carbonaceous chondrites, by Mossbauer characteristics, discussing Prior plot and weather influence role in finds and falls
19 p3408 A69-36083

Boron, Li and Cl contents in iron and stone meteorites by fluorometric, thermal-neutron activation and pyrohydrolytic separation methods, tabulating results
19 p3408 A69-36085

Depth distribution of primary cosmic radiation fluxes and secondary nuclear-active particles in stone meteorites and surface layer of planets, moon and asteroids
19 p3410 A69-36092

Ar 39 and Cl 36 production rates and ratios in stone and stony-iron meteorites metal phases, discussing terrestrial age calculation
19 p3411 A69-36100

Isotopic age determinations on iron and stone meteorites, discussing Rb-Sr and K-Ar results, internal isochrones, Kodaikanal data and planetary formation
19 p3413 A69-36108

Magnetic properties of stone, stony-iron and iron meteorites, discussing natural remanent magnetization origin in parent bodies and magnetic susceptibility
19 p3415 A69-36122

Reflectivity and chemical composition of metallic phase minerals in stone meteorites, showing optical characteristics sensitivity to composition
19 p3415 A69-36124

Stony meteorite barium isotopes and iron meteorite and terrestrial silicate inclusions analyzed using double spike method for laboratory fractionation correction
19 p3425 A69-36422

Na 22 and H 3 production rates determined in stone meteorites exposed to 3 Gev isotropic protons, using radionuclide distribution data of exposed thick stone target
19 p3425 A69-36423

Rare gas distribution in earth atmosphere explained as outgassing from primordial solid particles, discussing stony meteorites composition
20 p3600 A69-37489

Stony meteorite composition and structure studied for conditions of preplanetary stage of solar system
22 p4012 A69-40084

STOPPING

Circulation control by blowing and application to stopped rotor aircraft, discussing data from model scale blade experiments
19 p3248 A69-36767

STOPPING POWER

Oxygen K-shell X ray production cross section and stopping power of aluminum oxide thin films for 20-100 kev protons
14 p2489 A69-29994

STORABLE PROPELLANTS

NT AIRCRAFT FUELS

Space storable propulsion system comparison, discussing liquid propellants performance and thermodynamic analysis
[AIAA PAPER 68-614] 09 p1570 A69-21981

Collection of articles on ramjets including reaction propulsion, hypersonic inlets, combustion problems, Griffon aircraft, storable liquid fuels, etc
16 p2837 A69-32608

Specific impulse deliverable performance of space storable propellant combination fluorine-oxygen/methane and oxygen difluoride/diborane
[AIAA PAPER 69-505] 16 p2845 A69-32762

Space storable hydrocarbon fuel blended FLOX propellant performance with coaxial injector including characteristic velocity, chamber geometry, pressure and heat flux distribution
[AIAA PAPER 69-507] 16 p2835 A69-32772

Hydrogen and methane combustion to simulate expansion of storable propellants
[AIAA PAPER 68-635] 20 p3631 A69-37188

STORAGE

Store separation from high speed aircraft via wind tunnel test techniques, discussing drop model, flowfield survey and captive trajectory testing
[AIAA PAPER 68-361] 11 p1819 A69-25373

STORAGE BATTERIES

NT NICKEL CADMIUM BATTERIES

NT SILVER CADMIUM BATTERIES

NT SILVER ZINC BATTERIES

Low temperature hydrogen fuel cells and basic electrolyte batteries design, discussing electrolyte concentration regulation by elimination of water formed
08 p1258 A69-21027

Integral cell-level electronic charge controls for secondary batteries, emphasizing performance, reliability and power system interfaces
23 p4076 A69-42542

STORAGE STABILITY

Operating and storage conditions effects on reliability of Pd-Ag thick film resistors
08 p1283 A69-20131

Energy dissipation of solder-covered and solderless solar cells with TiAg contacts as function of storage time, temperature and humidity
19 p3253 A69-35706

STORAGE TANKS

NASA LOX and liquid hydrogen barges, discussing storage tank design, acceptance testing and operating conditions
01 p0056 A69-11150

Thermal design and test for liquefied gas vessels under unsteady insulation cooling conditions
04 p0687 A69-15162

Aircraft gas turbine component pressure data storage and scanning
05 p0726 A69-16768

High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASME PAPER D8-14.1] 07 p1143 A69-19666

Liquid helium vented and nonvented storage container design and handling techniques
10 p1810 A69-24016

STORMS [METEOROLOGY]

NT HURRICANES

NT IONOSPHERIC STORMS

NT TORNADOES

NT TROPICAL STORMS

NT TYPHOONS

Nonstationary model of mesoscale atmospheric vortex with vertical axis based on atmospheric thermohydrodynamics
03 p0462 A69-13932

Meteorological Doppler radar information display for real time identification of hazardous winds and turbulence in storms
18 p3139 A69-35427

Storm location and severity prediction by pattern recognition theory, using quantized radar data, compared with statistical prediction
21 p3678 A69-39458

STRAIN AGING

U PRECIPITATION HARDENING

STRAIN DISTRIBUTION

U STRESS CONCENTRATION

STRAIN ENERGY METHODS

Plate theories derived via strain energy potential integration through thickness, noting constitutive equations applicability to elastic buckling and postbuckling
02 p0340 A69-12055

Fiberglass reinforced plastic laminates failure under biaxial compression due to layer separation with strain energy as endurance criterion
02 p0270 A69-12142

Strain induced deformational instability of aluminum alloys
03 p0447 A69-13818

Compatible triangular plate elements for normal and in-plane displacements, discussing nine degree of freedom element, strain energy, simply supported and clamped plates
04 p0677 A69-14742

Crack tip plastic flow effect on strain energy release rate, considering Dugdale model for yielded crack
[ASME PAPER 68-WA/MET-17] 05 p0838 A69-16155

Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method
06 p1021 A69-17179

Sliding friction technique to determine contact area and surface microtopography between abraded metals and polymers
08 p1319 A69-19994

Cylindrical elastic membranes with finite axisymmetric deformation, discussing exact solution by strain energy method
08 p1418 A69-21001

Strain energy for two and three dimensional crack systems subjected to varying loads, detailing loading and crack geometry effects on fracture criterion
11 p1974 A69-24669

Hole mobilities in InSb due to phonon and ionized impurities scattering on basis of strain potential constants
16 p2824 A69-31575

Stress distribution in variable rigidity reinforcing frame of circular cylindrical shell using strain energy method
17 p3055 A69-33131

Algorithm for minimum weight structures automated design, coupling strain energy criteria with linear interpolation search technique to cover stress and displacement constraints
[SAWE PAPER 798] 18 p3219 A69-34861

Yield condition of maximum constant distortion strain energy for anisotropic material without incompressibility assumption
18 p3227 A69-35494

Pure plastic bending of wide strip, determining stress strain state and plastic strain energy during constrained bending, noting application to corrugated panels
19 p3324 A69-35833

Rectangular plate bending element corresponding to finite difference method use, deriving stiffness matrix from strain energy approximation
20 p3619 A69-36949

Mooney and Rivlin theories compared for strain energy function W of ideal superelastic material
20 p3624 A69-37586

Plane membranes finite deformation, deriving energy theorems for potential U bounds estimation
20 p3624 A69-37588

Noncircular curved shell stability under axial compression, using strain energy method to determine upper and lower critical stresses
21 p3834 A69-38715

Rib cross sections distribution for cylindrical shell under concentrated longitudinal forces obtainable by designing for minimum strain energy
23 p4228 A69-41988

STRAIN FATIGUE

U FATIGUE [MATERIALS]

STRAIN GAGE BALANCES

Semiconductor strain gage balance with temperature compensation for conventional wind tunnels
10 p1672 A69-23265

STRAIN GAGES

Fatigue-damage evaluation system for transport aircraft, noting use of cumulative strain gauge that stores strain history
01 p0165 A69-10118

Strain gage behavior on unstressed aluminum alloy under rapid heating using radiant heating, weld strength and high temperature test equipment
02 p0341 A69-12229

Strain multiplier device for fatigue sensors for totalizing resistance change from aircraft service load parameters
02 p0250 A69-12230

Printed circuit board wiring technique for strain gage rosettes application in extensive airframe static tests
02 p0250 A69-12231

Resistance wire strain gages for measuring elastoplastic deformations in zones with high stress concentrations of strained machine elements
04 p0671 A69-14433

Resistance change arising from transverse straining of single conductor derived in terms of measurable filament and adhesive parameters
04 p0603 A69-15433

Plane shear strain measurement by means of properly oriented strain gages on surface and proper disposition of gages in Wheatstone bridge circuit
04 p0603 A69-15498

Direct plotting of vibrating wire strain gauge data for concrete structures, giving diagrams for grid and backing sheet scaling
08 p1312 A69-20104

Foil type strain gage for measurement of tangential strains along circumference of hole in plate under uniaxial and equibiaxial tension
08 p1314 A69-20258

Strain gage transducers and measurements noting Wheatstone bridge, supporting structure and accuracy 10 p1690 A69-23227

Calibration for instrument systems including strain gages, piezoelectric, thermoelectric and thermoresistive transducers 10 p1691 A69-23229

Multichannel miniature telemetry for vibration, strain and temperature measurements in high speed machinery by solid state encapsulated devices 10 p1654 A69-23251

Silicon resistance strain gage sensitivity dependence on crystallographic orientation following cut-off from single crystal 11 p1887 A69-25209

Poisson ratio determination with bonded electrical resistance strain rosettes 11 p1995 A69-25652

Coherent optical flaw detection and surface microstrain measurement techniques including holographic interferometry, optical correlation and diffraction 12 p2180 A69-26305

Resistance type bonded strain gages for seven adverse environments, discussing installations and transducers 12 p2099 A69-27165

Materials surface thermal stress analysis by strain gauges, considering behavior during rapid temperature changes 13 p2264 A69-28599

Strain sensor using p-n heterojunction diode fabricated by vacuum evaporation onto flexible substrate 14 p2422 A69-29555

Scratch gages under water in open and at high temperature, including circular X-Y recording scratch strain gage 15 p2610 A69-30682

S-N fatigue life small bondable resistance sensor, discussing random response data interpretation with emphasis on use of strain multipliers 15 p2613 A69-31270

Strain gages to measure flight loads in high temperature environment, discussing selection, calibration techniques and performance characteristics 15 p2614 A69-31277

High temperature capacitance strain gage development, discussing extensometer prototype systems 15 p2614 A69-31278

Cumulative metal fatigue damage gauges, analyzing resistance change properties by using strain amplitude tests 17 p3053 A69-32989

Mechanical and resistance type fatigue life indicator, comparing operating and performance characteristics [AHS PAPER 378] 17 p3059 A69-33511

Fatigue strength of highly loaded gears and stress measurements by strain gauges [AHS PAPER 371] 17 p3060 A69-33517

Variable resistance strain gages for study of light gas guns operating characteristics, including chamber pressure and piston velocity 19 p3306 A69-35736

High temperature strain measurement based on strain gage with capacitance changes for structural analysis 20 p3537 A69-37006

Finite element analysis and strain gage results to verify end constraint on off-axis tensile coupons and to design test specimen 20 p3628 A69-37775

Creep strain rate measurement at high temperatures by inductance strain gage to determine deformations from 0.2 microns 20 p3544 A69-37815

Technical and metrological characteristics of short base strain gages and bonding to specimen, investigating sensitivity and creep 20 p3544 A69-37817

Design features comparison and operation principles of gas strain gauges in application to structures, emphasizing independence of temperature variations in pneumatic circuits 21 p3725 A69-39324

Strain distribution on surface of adhesive bonded box beam in simple bending, using water based brittle coating and self adhesive strain gages 21 p3844 A69-39325

Strain gage embedding techniques and applications 21 p3725 A69-39327

Standardizing strain gage with long time stability characteristics, analyzing statistically strain calibration results 22 p3945 A69-40078

Strain measurement by interferometer with gas laser source emphasizing long period measurement problem 22 p3960 A69-40189

Error correction of strain gage/cement combination reading relaxation under prolonged steady loading at elevated temperature 22 p4042 A69-40313

Short range telemetering strain gage system with stable multivibrator transmitter for measuring intercoupling displacement and shaft torque 22 p3946 A69-40314

Carrier frequency monitoring amplifier with automatic bridge tuning for coupling to passive sensors including strain gages, inductive transmitters, etc 22 p3915 A69-40937

Hungarian-made semiconductor silicon-base strain gages meeting specifications at half world market price 22 p3947 A69-40938

Pressure transducers using heterode strain sensors evaporated directly onto pressure diaphragm 22 p3950 A69-41222

Bonded strain gages for experimental stress analysis of high speed rotating machinery under high centrifugal loads 24 p4397 A69-42740

STRAIN HARDENING

Strain hardening of alpha titanium studied for effects of grain size, strain rate, temperature and purity 01 p0095 A69-10610

Material memory effect in plastically prestrained thin walled brass tubes analyzed on basis of kinematic strain hardening theory 02 p0336 A69-11551

Elastic analogue in creep stress analysis under time dependent boundary conditions and strain hardening theory 02 p0345 A69-12418

Second phase hardened materials recovery creep rate model, showing dependence on stress level 03 p0447 A69-13615

Recovery behavior of nickel strain hardened by impact loading by aluminum projectiles, showing microstructure correlation with stress levels 03 p0447 A69-13620

Strain hardening and softening characteristics of maraging steels, Ni-Co and other steels and Ti-Al-Mo alloy 04 p0618 A69-15156

Ductile creep rupture of thin walled membrane shell of revolution subjected to time dependent internal pressure and strain hardening [ASME PAPER 68-WA/MET-15] 05 p0838 A69-16153

Aluminum-stainless steel wire reinforced metal matrix composites, analyzing strain hardening and plastic deformation 06 p0940 A69-16950

Deformation dependence on strain hardening and recovery rate during transient and steady state creep 06 p0943 A69-17236

Fatigue hardening in fcc metals, discussing dislocation distribution in unidirectionally deformed single crystals 06 p0944 A69-17503

Plastic deformation in bcc, fcc and hcp metals as function of initial impact load energy, noting strain hardening effects 07 p1166 A69-19144

Stress relaxation in structural elements, analyzing unsteady creep in case of strain hardening following power law 07 p1237 A69-19683

Retained austenite content control, strain aging and ausforming to improve toughness of high strength martensitic stainless steel without strength loss 08 p1330 A69-20010

High temperature metallic material strengthening methods, noting metallurgical factors and temperature effects on mechanical properties 10 p1712 A69-23630

Order-disorder transformations in nickel alloys under loading operations 11 p1904 A69-24706

Fcc metals cyclic deformation and fatigue dependence on cross slip of screw dislocations, considering strain hardening and crack propagation 11 p1906 A69-25389

Homogenization of martensite formation in nickel 300 grade maraging steel, analyzing anisotropic transformation strains during thermal cycling 13 p2278 A69-27410

Plane elastoplastic shock waves propagation due to combined shear loadings assuming elastic isotropic work hardening materials 13 p2368 A69-28346

Strain hardening experiments on single crystals of AlZn and AlAg alloys noting plastic behavior 16 p2800 A69-31776

Buckling time of oval ring under unsteady creep based on strain hardening theory 17 p3062 A69-33716

Shock wave propagation induced by nonuniform instantaneous internal heating of nonlinear elastic strain hardening solid material [SAWE PAPER 69-APM-17] 18 p3214 A69-34393

Strain hardening of titanium wire during room temperature stress relaxation shown equal to strain hardening during constant strain rate test 19 p3342 A69-35811

Elements substitution for Al in gamma prime of Ni-Al alloy to change aged hardness by gamma prime mismatch and coherency strains 20 p3558 A69-36962

Linearization of relationship between stress concentration factor and reciprocal of strain hardening exponent enabling shakedown to pressure vessels formulated by mathematical model 20 p3620 A69-37002

Ronay effect in reversed cyclic torsion or tension in thin cylindrical viscoelastic tube showing creep under sustained load 20 p3625 A69-37596

Surface grains orientation effect on fatigue behavior in polycrystalline Al, noting strain hardening role in failure 20 p3561 A69-37597

Metals plastic behavior including strain hardening and Bauschinger effect 21 p3832 A69-38466

Shock hardening of Al alloys in annealed, solution heat treated and aged conditions compared with cold-rolled materials [ASM PAPER W9-10.4] 21 p3729 A69-38664

Stress concentration and surface strain hardening effects on fatigue strength of refractory alloy specimens with and without cut 21 p3745 A69-38875

Vector properties of isotropic strain hardenable materials in stress vector space applied to tubular brass subject to biaxial tension and complex loading 23 p4227 A69-41714

STRAIN RATE

Strain hardening of alpha titanium studied for effects of grain size, strain rate, temperature and purity 01 p0095 A69-10610

Aluminum deformation at various strain rates and temperatures under combined stress, comparing results with theoretical predictions 02 p0343 A69-12282

Strain rate effect on dislocation substructure in deformed niobium single crystals, investigating relationship between mechanical properties and dislocation substructure 02 p0268 A69-12287

Elastic-plastic wave profiles in Al alloy under uniaxial strain load, investigating sensitivity to various strain rates 02 p0344 A69-12289

Strain rate effect of large deflections of clamped circular viscoplastic plates subject to rigid mass impact 02 p0349 A69-12799

Strain rate and temperature effect on flow stress of 7075 aluminum bars 03 p0443 A69-13120

Twisted yarns composed of continuous viscoelastic filaments dynamic response under periodic strain effect on dynamic modulus 04 p0619 A69-14686

Truncated solid cones plastic yielding under quasi-static and dynamic axial loads at various strain rates 04 p0682 A69-15301

Strain dependent modulus and Poisson ratio behavior of CTPB propellant, performing stress relaxation tests [AIAA PAPER 68-519] 04 p0646 A69-15510

Stress-strain rate relation under combined stress fields derived from Gilman relation between dislocation velocity and force for single dislocation 05 p0834 A69-15756

Work hardening in quenched fully hardened and overaged Mg-Mn alloy single crystals as function of temperature and strain rate 05 p0778 A69-15757

Thermodynamic theory of strain rate sensitive plastic material within framework of thermodynamics of materials with internal state variables 05 p0834 A69-15792

Crack nucleation in high strain fatigue based on plastic instability model

05 p0780 A69-16430

Strain rate effect on structure and mechanical properties of rapidly stretched metals

06 p0941 A69-17122

Theoretical and experimental results on annealed tapered aluminum rods to assess one-dimensional rate independent theory of plastic wave propagation from longitudinal impact

06 p1022 A69-17365

Tensile stress and energy-to-break values compared for glass-fortified thermoplastic resins, discussing notched and unnotched Izod impact

08 p1337 A69-20480

Heat resistant alloys plastic deformation, studying stress/strain systems, strain divisibility, strain rate and temperature effects, etc

09 p1504 A69-22145

Aluminum alloy crack propagation and fracture patterns as function of temperature under high strain amplitude and low strain rate

10 p1709 A69-23071

Temperature and strain rates effect on delayed yield and failure of plasticized epoxy resin

10 p1717 A69-24218

Back stress role in strain rate equation for high temperature deformation and study of structure and applied stress effects

11 p1987 A69-25388

Thermodynamics of strain rate sensitive elastoviscoplastic solids, considering kinematic description of plastic deformation and choice of state variables

11 p1994 A69-25601

Rigid plastic circular and annular plates dynamics taking into account yield point dependence on strain rate

12 p2177 A69-25994

Added metal oxides solid solutions effect on creep kinetics and strain rate of zirconia samples during sintering

12 p2118 A69-26260

Strain rate and pressurization effect on ductile-brittle transition temperature of polycrystalline sintered W, discussing yield stress

12 p2117 A69-27138

Moire and gridwork methods of plastic strain analysis with application to plane strain and axisymmetric extrusion

13 p2359 A69-27256

Molybdenum dislocation velocity and macrodeformation, noting thermal double kink mechanism inconsistencies and strain role in strain-rate relationship

13 p2276 A69-27392

Strain-rate sensitivity measurements to determine ductility of materials, noting relation to elongation

13 p2278 A69-27416

Creep and hot working strain-rates relationships, showing work hardening and dynamic recovery relative levels dependence on plot used

13 p2278 A69-27417

Minimum theorems for plastic strain rates and plastic strains governed by holonomic elastoplastic theory utilizing quadratic functions

13 p2370 A69-28629

High temperature thermal resistance stability of multilayer cylindrical elements for thermionic converters determined by layer strain rate

14 p2539 A69-29218

Ferrous and nonferrous metals shock tensile strength by elastic contact dynamometer, noting diagram shape dependence on stress growth rate

14 p2464 A69-29314

Strain rate and temperature effects on sintered molybdenum sheets strength and elongation characteristics

14 p2464 A69-29322

Isothermal deformations in linear viscoelastic material under uniaxial stress, determining optimum strain rate history for maximum work lower bound

15 p2707 A69-30637

Experimental determination of strain /or strain rate/tensor in plastic deformation analysis

15 p2707 A69-30639

Fracture strength of Al alloy in biaxial stress field, considering strain rate influence on material toughness

17 p2986 A69-32985

Low cycle fatigue behavior prediction for 304 and 306 stainless steels based on temperature and strain rate ratio to tensile ductility

17 p2987 A69-33079

Plane strain forging of pure Al and Al-Cu alloy at low strain rates and elevated temperatures, in constant velocity compression test

17 p2979 A69-34137

Low cycle fatigue leading to failure on AISI 321 stainless steel as function of elevated temperature and straining frequency

18 p3219 A69-34834

Strain hardening of titanium wire during room temperature stress relaxation shown equal to strain hardening during constant strain rate test

19 p3342 A69-35812

Closed form solutions for rigid viscoplastic cylindrical shell under dynamic loading based on constitutive equations for rate sensitive plastic material

19 p3439 A69-36478

Primary and tertiary uniaxial creep strain rate changes based on internal stress redistribution described with mathematical model

20 p3619 A69-36941

Creep strain rate measurement at high temperatures by inductance strain gage to determine deformations from 0.2 microns

20 p3544 A69-37815

Low strain rate effects on metals yield and tensile strength

20 p3563 A69-38063

Alpha Ti thermally activated tensile deformation, studying flow stress dependence on strain, temperature and strain rate

21 p3729 A69-38659

Strain rate-load relations in elastoplastic shells reaching yield point, discussing variational method applicability

21 p3838 A69-39189

Fatigue endurance determined from thermal stresses by balancing elastic strain rates, creep relaxation and mechanical cyclic loading with triangular waveform, discussing nonsteady creep

21 p3843 A69-39310

Serrated yielding at high temperatures from dislocation theory viewpoint, considering critical strain relation to temperature and strain rate

21 p3749 A69-39710

High temperature electronic tensile testing device utilizing SCR to study strain rate effect on metals properties

21 p3727 A69-39811

Tensile cryostat for low temperature strain measurement, discussing design, insulation and vacuum sealed environment for heat leak reduction

22 p3947 A69-40627

Yield condition and relation between stresses and strain rates for anisotropic body, allowing for influence of stressed state type

22 p3934 A69-41169

Thermodynamics of elastoplastic materials with dislocation motion related to internal state variables, including case of rate independent plasticity

23 p4226 A69-41537

Tensile test facility for specific strain rate range, applying impact load to sample end with high speed striker accelerated by explosive energy

23 p4147 A69-41710

Single crystal Ta and Ta base bcc solid solution strengthening and weakening as function of temperature and strain rate

23 p4178 A69-42358

Cylindrical steel specimens high strain rate tensile tests, using Malvern theory for ideal elastoplastic and work hardened materials

23 p4236 A69-42529

Serrated flow characteristics in gold-indium solid solutions at various strain rates and temperatures

24 p4361 A69-43028

Mechanical properties and dislocation configurations and densities of Nb single crystals measured at various strain rates

24 p4332 A69-43030

STRAIN SOFTENING

U PLASTIC DEFORMATION

STRAPDOWN INERTIAL GUIDANCE

Strapdown electrostatic aerospace navigator /SEAN/ using electrostatically suspended gyros /ESG/ for inertial reference, including drift and computer tests

19 p3369 A69-35802

Strapdown inertial reference unit system for inflight reliability and maintainability, discussing design and components

19 p3370 A69-35803

Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources

21 p3762 A69-39378

Strapdown redundant experimental sensor inertial navigation package containing gyros and accelerometers, discussing signal real time processing by digital computer

21 p3762 A69-39379

Gyro test package, dynamic test facility and real time attitude algorithm to investigate operational capabilities of strapdown inertial attitude package

[AIAA PAPER 69-849] 21 p3765 A69-39424

Strapdown gimballess inertial measurement unit with general purpose computer, describing hardware, software and test results

[AIAA PAPER 69-850] 21 p3765 A69-39426

STRAPS

Transverse reinforcing straps effects on torsional stiffness and bending behavior of open cross section profile thin walled prismatic beams

10 p1802 A69-23890

STRATA

NT SUBSTRATES

Cylindrical sound pulse propagation in homogeneous layer under inhomogeneous half space

04 p0630 A69-14531

Electromagnetic wave propagation in spherically stratified isotropic media, presenting generalized refractive index profiles for electric type fields

04 p0563 A69-15492

Charged body moving at subsonic velocity normally through stratified elastic half space composed of film on homogeneous half space

08 p1417 A69-20753

Spectrographic observations indicating temperature range within individual filaments of Cygnus Loop, noting agreement with stratified models

09 p1607 A69-22430

STRATIFICATION

NT ATMOSPHERIC STRATIFICATION

Electric or magnetic dipole antenna radiated electromagnetic field for antenna orientation perpendicular to striations of periodically stratified dielectric medium

03 p0398 A69-13802

Electromagnetic transient wave propagation and reflection in lossless isotropic stratified ionized media, discussing time variations of fields due to incident plane unit step wave

17 p2924 A69-33839

Planetary nebulae imaging stratification effects on structural difference studies by slit and slitless spectrographs and narrow band photography

21 p3817 A69-39785

Multiple outlets for reducing stratification-induced liquid propellant supply temperature rise, preventing cavitation problems in supply pumps

[AAS PAPER 69-395] 24 p4363 A69-42830

STRATIFIED FLOW

Reflectivity of low Richardson number critical levels for internal gravity waves propagating in stably stratified fluids with shear, studying stability numerically

03 p0424 A69-13953

Stability of nondissipative stratified rotating flows with constant density to axisymmetric disturbances

04 p0588 A69-14740

Theoretical analysis of fixed stratification, taking into account nonlinear effects and variation in charged particle concentration along plasma column

04 p0636 A69-14783

Laminar flow of stably stratified fluid with uniform upstream velocity and density gradient past thin flat plate, discussing upstream wake and boundary layer

05 p0745 A69-15724

Large amplitude waves in inviscid flows of stably stratified fluids over barriers with constant density upstream constructed from vortex pairs and doublets

08 p1346 A69-20313

Fluid flow induced by horizontally moving bodies in stratified and rotating fluids determined by matched asymptotic expansion theory

08 p1253 A69-20997

Temperature profiles and heat transfer coefficients in two phase liquid-liquid stratified laminar flow of variable immiscible film thickness with surface evaporation

09 p1622 A69-21904

Striated flow induction synchronous MHD generator, producing striated flow by nonthermal ionization of inert seeded gas in electric field

10 p1638 A69-23487

Nonlinear partial differential equations for solution of steady stratified flows, noting hydrostatic pressure distribution and horizontal and vertical scales

11 p1869 A69-24889

Two dimensional stratified flow over obstacle in finite height channel, noting lee waves and drag increase with decreasing speed

11 p1869 A69-24892

Power law profiles of mean wind velocity and temperature in thermally stratified shear flow, considering

dependence on thermal stability and Richardson number
11 p1874 A69-25381

Stratified rotating fluid time dependent motion characterized by stability frequency ratio and Coriolis parameter within quasi-geostrophic approximation
13 p2248 A69-28171

Stratified fluid flow past obstacle, considering steady inviscid flow with nonlinear convection and vertical acceleration
19 p3240 A69-36474

Rotating stratified fluid in thermally insulated cylinder, studying angular velocity abrupt change effects under stable temperature distribution
21 p3694 A69-38768

Stratified blood flow distribution in lung lobe from analyzing breath-holding changes on expired Ar and nitrous oxide tension plateaus during rest and exercise
23 p4078 A69-41315

STRATIFIED LAYERS

U STRATA

STRATOFORTRESS AIRCRAFT

U B-52 AIRCRAFT

STRATOSCOPE TELESCOPES

Stratoscope II unmanned balloon-borne telescope design, detailing pointing, focusing and thermal characteristics
13 p2261 A69-27956

Guiding system of Spectro-Stratoscope /balloon-borne solar telescope/, describing hydrostatic bearing and torque motor
13 p2262 A69-27957

Photospheric granulation near center of quiet sun, analyzing morphological properties from high definition Stratoscope photographs
17 p3029 A69-33045

STRATOSPHERE

Photochemistry in dry atmosphere, discussing ozone density vertical distribution in upper atmosphere and influence of O and ozone reactions with H compounds
02 p0245 A69-12694

Zonal temperature and spectral characteristics of stratospheric circulation, noting westward rotation of second harmonic
02 p0246 A69-12759

Air movements in lower stratosphere analyzed on basis of ozone measurements, showing correlation with north-south gradient of total ozone amount
02 p0246 A69-12762

Acoustical thermometer-interferometer to measure air temperature between 20 and 50 km
03 p0429 A69-13269

Quasi-biennial oscillation in tropical stratosphere as result of long period gravity waves interaction with zonal wind
03 p0461 A69-13342

Large scale disturbances in summertime stratosphere observed from high level balloon, discussing diurnal wind patterns and planetary traveling waves
03 p0461 A69-13343

Middle stratospheric diurnal temperature variation based on model eliminating radiation error of rawinsonde
03 p0461 A69-13344

Northern California humidity to 32 km utilizing alpha radiation hygrometer and associated balloon sounding equipment
03 p0461 A69-13345

Stratospheric balloons for space research, emphasizing stabilization equipment suitability
03 p0366 A69-13589

Long period variations in zonally symmetric circulations of tropical stratosphere, using zonally averaged momentum, continuity and heat and latent energy equations for numerical model
03 p0461 A69-13681

Stratospheric aerosol investigation by IR and lidar, applying Mie theory to model aerosol size distribution
04 p0592 A69-14654

Covariances of temperature and meridional wind component and relation to northward flux of sensible heat due to transient eddies in stratosphere
04 p0627 A69-15084

COSPAR manual on stratospheric temperature and wind measurements, discussing synoptic and time variation study by Arcas and Loki-Judi meteorological sounding rocket systems
05 p0752 A69-15706

Rocket and radiosondes data from measurements over Northern Hemisphere used to study stratospheric and mesospheric circulation during three midwinter periods
05 p0753 A69-15800

Stratospheric temperature, wind and ozone concentration measurement during solar eclipse by sounding rocket system
06 p0916 A69-17008

Multilevel objective weather analysis system for stratosphere and upper troposphere over Australia, using stream function analysis
06 p0950 A69-17787

Stratospheric critical clear atmospheric turbulence at midlatitudes, noting applications to supersonic aircraft design
06 p0950 A69-17789

Nightglow intensities correlated with atmospheric ozone concentration and stratospheric temperatures
07 p1123 A69-18675

Annual temperature variation in lower tropical stratosphere, noting effect of equatorial upward motion
07 p1126 A69-19043

Midwinter warmings in upper stratosphere for differences between various stratospheric and mesospheric levels, noting need for additional upper air data
08 p1345 A69-20134

Horizontal ozone distribution at high cyclones and anticyclones in middle stratosphere
08 p1308 A69-20261

Geostrophic trajectories of horizontal diffusivity estimated in midlatitude troposphere and lower stratosphere
08 p1308 A69-20310

Mean and eddy terms contribution to momentum and heat balance of troposphere and lower stratosphere at solstices, describing zonal wind equations
08 p1308 A69-20318

Ozone and carbon dioxide stratospheric and tropospheric horizontal distribution from weather data collected on polar flight
09 p1484 A69-21403

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions
09 p1575 A69-21542

Power spectral analysis of upper wind data of equatorial lower stratosphere noting quasi-biennial oscillation
09 p1537 A69-22297

Zonal momentum vertical transport due to large scale moving disturbances in westerlies of equatorial lower stratosphere
09 p1537 A69-22299

Stratospheric dust, discussing terrestrial and meteoritic origins, volatility of particles smaller than few microns, and light scattering and direct sampling measurements
09 p1608 A69-22689

Galactic cosmic ray modulation and solar activity analyzed on basis of cosmic ray measurement in stratosphere
10 p1758 A69-22832

Particulate radioactivity for study of stratospheric motions, demonstrating negligible long time particle settling with comparative measurements of particulate Sr 90 and gaseous C 14
10 p1682 A69-23410

Carbon dioxide concentration in upper troposphere and lower stratosphere recorded during commercial aircraft flights over polar route
11 p1879 A69-25254

Stratospheric aerosol attenuation factor vertical distribution statistical structure, tabulating normalized correlation matrices, eigenvectors and eigenvalues
12 p2125 A69-25956

Sky polarization neutral points around sunset /spring-summer 1968/ at Bedford, Mass., inferring continuation and variations of enhanced stratospheric turbidity
12 p2067 A69-26343

Zonal and meridional wind components monthly global cross sections for stratosphere and mesosphere from sounding and radar data
12 p2070 A69-26577

Stratosphere and troposphere processes analyzed, indicating feasibility of forecasting geopotential and wind fields between 12 and 24 km
12 p2126 A69-26581

Mean vertical moisture profile for summer and winter midlatitude stratosphere from Soviet radiosonde data
12 p2070 A69-26582

Height and temperature vertical variability in mid and upper stratosphere determined from constant pressure charts /1964-1966/
13 p2290 A69-27637

Soviet stratospheric solar observation projects compared with American
13 p2355 A69-27640

Latitudinal and vertical variations in six-month zonal wind cycles in equatorial and tropical stratosphere and lower mesosphere, utilizing rocket observations
13 p2294 A69-27854

Diffusion of ozone distribution tracers in stratosphere, based on photochemistry in oxygen- only and oxygen-hydrogen atmospheres
13 p2294 A69-28492

Acoustical thermometer-interferometer to measure air temperature between 20 and 50 km
14 p2445 A69-28777

Tropospheric and stratospheric temperature distribution in 1965 summer and winter from radiosonde and rocket data
14 p2442 A69-29725

Equatorial stratospheric wind fluctuations from pressure fluctuation data, relating southern fluctuations, stratospheric fluctuations and seasonal hemispheric air exchange
14 p2442 A69-29726

Irregular data obtained by radiosondes in winter for charts of high isobaric levels, noting stratospheric temperature effects on radiosonde ascent height
14 p2473 A69-29731

Stratospheric turbulence producing bumpiness up to 18 km developing at levels characterized by abrupt changes in vertical temperature gradients
14 p2474 A69-29737

Zonal and meridional components of air circulation in troposphere and lower stratosphere for Northern Hemisphere
14 p2477 A69-29829

Troposphere behavior and stratosphere structure over Southern Hemisphere based on rocket measurements, comparing hemispheric atmospheric circulation intensities
14 p2477 A69-29832

Two year cyclic monsoon type variations in zonal wind distribution in tropical stratosphere and mesosphere obtained by rocket measurements
14 p2478 A69-29834

Ozone concentrations harmful to humans in atmosphere based on U.S. and Western European observations, emphasizing lower stratosphere
15 p2596 A69-30642

Mixed balloon systems for long duration stratospheric flights with open balloon to carry payload and overpressure balloon as stabilizer or aerial buoy
15 p2551 A69-30703

GHOST Balloon Project, emphasizing launch and ascent control and location and life expectancy of superpressure balloons in tropical stratosphere
15 p2551 A69-31361

Longitudinal variations of density, temperature and pressure distributions in stratosphere and mesosphere based on rocket observations, emphasizing arctic and subarctic regions
15 p2602 A69-31379

Stratospheric balloons launching and nacelles for measurement of cosmic rays, atmosphere high altitude characteristics, discussing French launching center
16 p2734 A69-31759

Cosmic ray intensity temperature dependence in stratosphere and anisotropy in interplanetary space determined from measurements over Arctic and Antarctic regions
16 p2851 A69-32537

Simultaneous Umkehr observations of vertical ozone distribution in upper stratosphere using two Dobson photometers, discussing deviations due to calibration sensitivity
16 p2786 A69-32631

Ozone vertical distribution in upper stratosphere determined from OGO 4 observations, describing calibration of satellite data and onboard instrumentation
16 p2788 A69-32645

Ozone concentration worldwide anomaly above 40 km in annual variations, noting dissimilarity in seasonal maximum and minimum with lower level
17 p2960 A69-33166

Stabilization system design for stratospheric balloon gondolas, discussing optimal system with flywheel and weight combination
17 p2898 A69-33242

Stratospheric winds effect on instrument package suspended from high altitude balloon, discussing package displacements, yarn shapes and air drag characteristics
17 p2961 A69-33612

Meteorological analysis of stratospheric clear air turbulence flights, discussing vertical temperature structure in terms of wave motion and turbulence intensity
17 p2999 A69-33736

Lee waves and orographic wind phenomena in Rocky Mountains near Boulder, noting stratospheric standing gravity waves and turbulence sampled by HI-CAT U-2
17 p2999 A69-33738

Rocket and radiosondes data from measurements over Northern Hemisphere used to study stratospheric and mesospheric circulation during three midwinter periods
17 p2962 A69-33779

Relation between atmospheric processes in troposphere and upper stratosphere in cold half year
18 p3166 A69-34817

Diurnal wind variations below 30 km plotted on constant pressure charts, showing topographical influence on tidal fluctuations
18 p3166 A69-34828

Atmospheric aerosols influence on ion density profile in stratosphere obtained from numerical solution of equilibrium ionization equation
18 p3129 A69-34962

Ion density, electrical conductivity and weighted mean mobility deduced from Gerdien capacitor I-V characteristics used in balloon sounding of stratosphere
18 p3130 A69-34970

Physical process providing EMF for maintaining electrical structure of stratosphere and mesosphere shown to center in lower ionospheric thermally driven tidal motions
18 p3130 A69-35103

Vertical distribution of concentration, microstructure and chemical composition of solid aerosol in troposphere and stratosphere from high altitude balloon measurements
18 p3132 A69-35340

Stratospheric balloon vertical oscillations and gondola attitude during long flights
19 p3248 A69-36689

Vertical wind shears, structure functions, turbulence and power spectra for transverse velocity fluctuations in troposphere and stratosphere, noting clear air turbulence
20 p3570 A69-37506

Water vapor profiles in stratosphere from IR radiometric observations under cloudless conditions, indicating relation to tropospheric meteorological features
20 p3535 A69-38261

Ionospheric electron density and collision frequency profiles examined for changes during December 1967 to January 1968 stratospheric warming
21 p3714 A69-38556

Aerosol attenuation coefficients vs altitude in troposphere and stratosphere, noting seasonally dependent surface convective dust layer and temperature dependent aerosol maximum altitude
21 p3718 A69-39773

Rocket optical experiment for determining water, methane, nitric oxide and ozone vertical profiles in stratosphere and mesosphere
22 p4035 A69-39910

Upper stratosphere warming and associated structure of mesosphere from rocket sounding, discussing high winds related to pressure gradient, upward vertical motion, etc
22 p3977 A69-39928

Circulation and temperature fields indices used for studying tropospheric-stratospheric interactions during stratospheric warming at constant pressure levels
22 p3977 A69-39929

SST stratospheric environment problems, discussing temperature effects on fuel consumption and convective turbulence effect on flight safety and efficiency
22 p3867 A69-41141

Three dimensional structure of large scale disturbances in lower stratosphere and upper troposphere in equatorial Pacific, using power spectral and synoptic analysis
23 p4159 A69-42345

Ionospheric absorption relationship to major stratospheric sudden warmings, considering regional coincidence and interaction mechanism
24 p4306 A69-42680

Atmospheric variability at proposed flight levels, analyzing meteorological requirements of SST operations, discussing annual cycles in stratospheric circulation
24 p4251 A69-42711

Model for ozone formation, distribution and decomposition at 15-45 km assuming zonal symmetry, includ-

ing time effects of photochemistry, advection and turbulence
24 p4309 A69-43147

STRATOSPHERE RADIATION

Stratospheric air sampling reliability instrumentation as part of radioactivity fallout detection program
05 p0766 A69-16751

Solar protons in subpolar stratosphere during solar activity minimum indicated from proton measurements at Tiksi Bay
20 p3587 A69-37044

STRATUS CLOUDS

Aircraft measurements of stratus cloud absorption and albedo and earth surface albedo
04 p0627 A69-14914

Aircraft charge measurements in stratus clouds, noting charge sign is independent of cloud space charge
04 p0549 A69-15108

Radiation scattering changes due to droplet size distribution change during stratus cloud formation calculated, using development model and Mie theory
08 p1346 A69-21093

Nocturnal development of air mass stratus clouds in Texas and mechanism of formation, discussing turbulent mixing theory
15 p2649 A69-30893

Radio emission and absorption of cumulus and stratus clouds at millimeter and centimeter wavelengths, giving maximum SNR defined by brightness temperature
16 p2807 A69-32270

Synoptic and mesoscale cloud patterns near low level jet from Tiros 7 and 8 photographs, noting stratus formation and dissipation
20 p3570 A69-37404

STREAM FUNCTIONS [FLUIDS]

Two dimensional Navier-Stokes equations of axisymmetric motion of viscous incompressible fluid, giving integral and solutions for stream function
02 p0231 A69-12135

Two dimensional turbulent jet in uniform parallel stream, developing coordinate type perturbation expansion and applying series truncation method to predict downstream development
04 p0588 A69-14713

Acoustic streaming near small spherical obstacles, obtaining stream functions
04 p0631 A69-14904

Ground influence on Helmholtz flow in presence of plate perpendicular to stream, reducing problem to mixed Volterra problem in complex half plane
04 p0590 A69-15221

Stream function approximation for plane axisymmetric vortex free transonic inviscid gas flow
06 p0910 A69-17336

Multilevel objective weather analysis system for stratosphere and upper troposphere over Australia, using stream function analysis
06 p0950 A69-17787

Stream function for plane free sonic gas jet flowing past profile
07 p1050 A69-18740

Incompressible fluid unsteady motion between journal and bearing solved in form of Reynolds number power series from stream functions
09 p1514 A69-22712

Circle theorem for iterated equation of generalized axisymmetric potential theory, noting Stokes flow of viscous liquid
10 p1680 A69-23718

Acoustic streaming near small spherical obstacles, obtaining stream functions
12 p2131 A69-26657

Expansion of stream function of steady meridional flow of viscous fluid at small Reynolds numbers, giving expansion in spherical coordinates
13 p2247 A69-27737

Nonuniform gas flow past axisymmetric body from supersonic source simulating jet discharging into vacuum, using power series of stream function
19 p3238 A69-35851

Heat and mass transfer on vertical surface under combined free and forced convection, solving laminar boundary layer equations by stream function
19 p3453 A69-36844

Computation method of hydrodynamic blade cascade for compressible fluid and variable channel width by stream function
20 p3460 A69-37972

Stokes stream function and forces acting on two spheres moving in contact along line of centers through viscous fluid
24 p4299 A69-42747

STREAMLINE FLOW
U LAMINAR FLOW

STREAMLINED BODIES
NT FAIRINGS

Two dimensional supersonic rotational flow around convex corner solved using coordinate system consisting of left running characteristics and streamlines
05 p0697 A69-15722

Conventional fuselage and streamline body shapes effect on drag at subsonic speeds, noting boundary layer development
05 p0697 A69-15827

Exact partial solutions to transonic gas flow equations used to describe flow around shape streamlined by supersonic flow with additional shock wave
07 p1118 A69-18698

Streamlined rotors calculation, interpreting compatibility conditions between streamlining and airscrew stresses
08 p1252 A69-20655

Three dimensional supersonic flow past pointed nonaxisymmetrical bodies characterized by great local surface curvature changes, using new approximation
18 p3086 A69-34705

STREAMS
NT GAS STREAMS
NT RIVERS

Particle size, velocity and position in moving streams measured by tilted film plane optical system with pulsed light source
19 p3306 A69-35733

STRENGTH

Dimensioning and strength calculations - Conference, Budapest, October-November 1968
17 p3051 A69-32975

STRENGTH OF MATERIALS
U MECHANICAL PROPERTIES

STRESS [BIOLOGY]

Physiopathological reactions of humans exposed to infrasonic vibrations applied via aural canal, observing cardiac and circulatory hemodynamic troubles
13 p2215 A69-28590

STRESS [PHYSIOLOGY]
NT ACCELERATION STRESSES [PHYSIOLOGY]
NT CENTRIFUGING STRESS

Prolonged decompression stress effects on humans in simulated orbital flight or extravehicular activity, investigating endocrine-metabolic disturbance by urinaryysis
01 p0022 A69-11336

Nitrogen and helium as factors affecting human decompression stress severity, using urinary measurements reflecting various endocrine and metabolic changes
01 p0018 A69-11338

Acceleration, hypoxia and stress effects on humans and animals, noting latent functional disorders of organisms requiring special techniques for detection
02 p0197 A69-11488

Sympathetic neurohormones measurement in plasma of race car drivers
07 p1067 A69-19424

Human endurance during isolation in closed space with prescribed veloeometric exercises, noting impairment of functional capacity
08 p1263 A69-19933

Brief intense thermal stresses effects on cardiovascular system of man, noting criticality of effective blood volume for circulatory competence
08 p1264 A69-20668

Rapid decompression and recompression in stapledecomized cat, noting fibrous tissue response in middle ear at reconstructions utilizing polyethylene struts on gelfoam
14 p2406 A69-29292

Constant light/darkness effects on stress response rhythm of hypothalamic-pituitary-adrenocortical system in female rats
15 p2556 A69-31330

Artificial heat acclimatization effect on orthostatic tolerance in man exposed to stresses of heat, exercise and dehydration
16 p2746 A69-32810

Prolonged hypokinesia effect on human resistance to physical stress, noting prophylactic influence of physical exercises
17 p2907 A69-32939

Injury stress vs acceleration specification as valid criterion for pilots subjected to high acceleration, introducing models and illustrating with ejection example
17 p2913 A69-33008

STRESS [PSYCHOLOGY]

- Beta adrenergic blockade in differential diagnosis of cardiovascular changes produced by stress induced catecholamine liberation and organic disease
17 p2909 A69-33184
- Cladonia rangiferina resistance to stresses, considering suitable indices for stress response
18 p3095 A69-34539
- Increased tolerance of orthostatic stress in heart failure patients
19 p3258 A69-36374
- Noise influence on heart rate and oxygen consumption of young male subjects under simultaneous physical stress
21 p3654 A69-38908
- Blood pressure measurements of pilots at rest during tests under stress on bicycle ergometer revealing transient hypertension
23 p4087 A69-41795
- Physical and psychic stress effects on phosphatidyl glycerol and related phospholipids concentration in human and rat blood plasma
23 p4088 A69-41815
- Hearing adaptation measurements after aircraft noise stresses for estimation of induced noise damage
23 p4110 A69-42051
- Vascular interface histological and chemical responses to acute mechanical stress in dog aorta
24 p4257 A69-42625

STRESS [PSYCHOLOGY]

- Human behavior during stressed underground confinement, discussing adaptation processes
01 p0020 A69-10757
- Book on groups under stress covering psychological research in SEALAB 2, emphasizing planning of data collection and experimental results
04 p0552 A69-14533
- Man psychic activity interference resistance, discussing stress effects characterized by theta and delta rhythms
08 p1262 A69-19839
- F-102 pilot anticipatory and flight stress, noting endocrine-metabolic hyperactivity
12 p2023 A69-26552
- Physical and psychic stress effects on phosphatidyl glycerol and related phospholipids concentration in human and rat blood plasma
23 p4088 A69-41815
- Psychological stress effect on human convergent and divergent thinking after presentation of disturbing or benign control films
24 p4269 A69-42555
- Abnormal biologic rhythm in rhesus monkeys associated with behavioral stress, noting brain temperature periodicities sensed with implanted extradural thermistor
24 p4261 A69-42708

STRESS ANALYSIS

- NT PHOTOGRAPHIC MEASUREMENT
NT X RAY STRESS ANALYSIS
- Creep and stress rupture strength of unidirectional glass fiber reinforced plastics, using tensile tests
01 p0101 A69-10080
- Generalized plane stress concept extended for mathematical model to study out of plane displacement restraint in thin plates
01 p0165 A69-10114
- Thin cylindrical shell deformation and stress under concentrated radial loading, analyzing singularity at load point
01 p0166 A69-10301
- Yield surface after prestraining under radial loading, analyzing formation of yield corner
01 p0166 A69-10303
- Low stress fracture criteria for large elastic structures and small brittle laboratory specimens below transition temperature
01 p0169 A69-10768
- Fiber-fiber interaction effect on stress distribution and tensile strength of discontinuous aligned fiber composites
01 p0171 A69-11261
- Homogenous mechanical stresses in amorphous and crystalline gallium films during vacuum deposition and annealing
01 p0141 A69-11420
- Metal fatigue crack propagation mechanism, deriving basic laws for failure in high and low stress regions, determining material parameters
02 p0340 A69-12025
- Equilibrium problem of elastic medium with stress couples in linearized elasticity theory, representing biharmonic function with aid of analytical functions
02 p0340 A69-12035

- Stress analysis of multiply connected bodies under large elastic strains, deriving second order potentials for plate with elliptical holes
02 p0340 A69-12139
- Bending of freely supported plates of polygonal planforms under transverse load with aid of R functions
02 p0341 A69-12140
- Computer stress analysis may result in automated designs, emphasizing finite element technique
02 p0341 A69-12153
- Two dimensional elasticity problem for two zero tangential stresses, expressing stress-strain states by biharmonic and harmonic functions
02 p0341 A69-12198
- Eccentric compression in elastic domain for rigid homogeneous structural elements, considering traction and stress
02 p0341 A69-12258
- Crystal dislocation motion in viscous media, discussing velocity stress behavior and measurements by etching and ultrasonic attenuation methods
02 p0343 A69-12285
- Three dimensional thermal stress distribution in case bonded solid propellant determined by scattered light photoelastic technique coupled with transparent rocket motor model
02 p0345 A69-12371
- Elastic analogue in creep stress analysis under time dependent boundary conditions and strain hardening theory
02 p0345 A69-12418
- Multilayered shells equivalence to single layer shells for stress analysis, vibrations and stability
02 p0346 A69-12509
- Stresses in circular cylindrical shell subjected to local heating
03 p0523 A69-12952
- Notch stress procedure to predict low cycle fatigue life of specimens with fabrication flaws, discussing crack initiation and propagation lives effects
03 p0523 A69-12997
- Photoviscoelastic stress analysis to predict time dependent stress redistributions in polyphase system with viscoelastic binder under external loading conditions
03 p0524 A69-13061
- General solutions of three dimensional elasticity theory applied to isotropic disks and plates, emphasizing homogeneous solutions
03 p0526 A69-13738
- Stress diffusion from axially loaded stiffeners into cylindrical elastic shells
03 p0530 A69-14065
- Skin panel stresses for random acoustic loading, determining aircraft structure responses
03 p0530 A69-14092
- Elastic equilibrium stress condition of anisotropic plates with circular isotropic inclusions
04 p0667 A69-14264
- Plane problem of anisotropic elasticity based on biharmonic and Helmholtz equation for stress functions
04 p0667 A69-14267
- Thermal stress determination in two dimensional problem of theory of elasticity, using stress simulation by thin plate bending
04 p0668 A69-14272
- Photoelastic analysis of HF stress waves propagating in bars and plates subjected to damped sinusoidal loading
04 p0669 A69-14397
- Two point boundary value problems for determining buckling behavior of two hinged circular arches
04 p0669 A69-14399
- One dimensional wave propagation analysis for zero value stress time derivatives on both sides of elastic-plastic boundary
04 p0670 A69-14407
- Stressed state periodic problem in infinite strip under combined pressure and temperature field effect
04 p0673 A69-14497
- Stress field for skew hole determined from plane stress field for equivalent right hole, considering elastic plate penetrated by oblique circular cylinder
04 p0674 A69-14589
- Stresses and displacements in anisotropic elastic solids under mechanical loading, determining general solution for treatment of time dependent boundary conditions
04 p0675 A69-14595
- Reinforced thin walled cylindrical pressure body nonlinear circumferential stress problem approximate

- solution, noting fatigue strength of aircraft pressurized cabins
04 p0548 A69-14838
- Integration method for equations of plastic two dimensional stressed state with Mises yield condition, noting stress concentration at hole with pressure on contour
04 p0679 A69-14924
- Holographic interferometer for isopachic stress analysis, utilizing photochromic recording for real time interference
04 p0599 A69-15013
- Circular disk stress-strain state due to thermoelastic strain applied at disk sector edge
04 p0681 A69-15171
- Elastic strain and stress in ribbed circular plate bent skew-symmetrically, using orthotropic plates theory
04 p0681 A69-15172
- Holography, discussing image formation, position, enlargement, aberration and application to stress analysis
04 p0601 A69-15186
- NeoHookian /incompressible solid/ rectangular parallelepiped compressed between lubricated rigid plates, comparing stability bounds with predicted critical loads
04 p0682 A69-15303
- Soviet handbook on stress analysis of anisotropic three layer reinforced plates and shells and of thick walled cylinders, Volume 2
04 p0683 A69-15500
- Point matching method for analysis of stress in incompressible solids of revolution, noting application to solid propellant rocket charges
04 p0683 A69-15518
- Internal gravity waves propagation in shear flow, detailing interaction stress in incompressible stratified Boussinesq liquid, conservation energy exchange and radiation stress
05 p0788 A69-15721
- Mathematical theory for describing mechanical behavior of continuous media based on principle of determinism for stress
05 p0833 A69-15729
- Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
05 p0834 A69-15783
- Static stability of three dimensional elastic bodies under subcritical strains, noting application to stability of cylindrical shells and rods
05 p0834 A69-15784
- Displacement, distortions and unit stresses in rotating circular disk under plane strain
05 p0835 A69-15807
- Stresses in cylindrical shell with elastic core loaded on curved surface solved, using elasticity theory for core and membrane solutions for shell
05 p0835 A69-15871
- Clamped rectangular plate under lateral load stress analyzed by extended Kantorovich method to include bending moments and shearing forces
05 p0835 A69-15872
- Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane
05 p0839 A69-16186
- Elastic-plastic analysis of flat plates in membrane stretching and flexure, using method of initial strains
05 p0840 A69-16191
- Annular stress in rib reinforced cylindrical shells under axial compression load and internal pressure, using successive approximation
05 p0841 A69-16208
- Matrix displacement and force methods of stability analysis, deriving method of determining geometrical stiffnesses for complex structures
05 p0841 A69-16399
- Photoelastic study of interaction between overlapping parallel cracks in tensile stress field
05 p0842 A69-16435
- Stresses in finite width infinite elastic isotropic strip with equally spaced identical semicircular notches under uniform tension or pure bending
05 p0843 A69-16644
- Buckling of rod with initial deflection as sinusoidal half wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep
06 p1021 A69-17182
- Plastic deformation in hypoeutectoid and hypereutectoid Ni-Ti alloys studied by compressive stress-strain analysis and transmission electron microscopy
06 p0941 A69-17222

- Simple dipolar stresses, noting effect of antisymmetry on equations of motion and energy equation
06 p1022 A69-17239
- Exponential decay of stresses in circular elastic cylinders subject to axisymmetric self equilibrated end loads
06 p1024 A69-17507
- Temperature distributions and thermal stresses in bimetallic I-beam structures with dissimilar materials for skins and webs and with kinetic heating inputs
06 p1024 A69-17610
- Two dimensional stress distribution changes around rectangular hole with rounded corners for varying internal pressure and temperature
06 p1025 A69-17611
- Statistical processing of oscillograms of instantaneous values of wire tension during winding, determining stress characteristics
06 p0927 A69-17691
- Incremental complementary energy method of stress analysis of orthotropic nonlinear materials having different behavior in tension and compression [AIAA PAPER 69-119]
06 p1028 A69-18159
- Stress concentration factors for composite body of two isotropic elastic phases in plane strain in plane of composite parameters
07 p1170 A69-18716
- Sign conventions definition and importance for shear stress and strain analysis in laminated anisotropic composite materials, noting role in studying response
07 p1170 A69-18720
- Fundamental problems of plane elastostatics with stress couples reduced to solution of integral equations, noting uniqueness theorem in plate bending theory
07 p1233 A69-19328
- Collection of papers on mechanics of solid state covering structural stability, stress analysis, creep, cracking and fracture
07 p1234 A69-19377
- Brittle fracture models compared with experimental stress analysis results, noting plane strain and plane stress fracture toughness
07 p1234 A69-19379
- Anisotropic stress analysis of creep in theory of linear viscoelasticity
07 p1234 A69-19381
- Quasi-plane stress in rotating disks of unconventional profile emphasizing conic shaped disk analysis in terms of hypergeometric series
07 p1235 A69-19444
- Linear analysis of strain in continua in terms of one-one correspondence, relative displacement and stretch dyadic
07 p1236 A69-19445
- Stress analysis split method for determining residual strength and fatigue crack life of damaged or initially cracked VTOL structures [AIAA PAPER 69-214]
07 p1237 A69-19576
- Accuracy of deformation theory in case of simple loading, analyzing external forces under conditions not satisfying loading theorem
07 p1237 A69-19684
- Stresses nature at ends of brittle cracks, discrediting finiteness under certain conditions
07 p1238 A69-19691
- Elastic springback and residual stress distribution in sheet metal formed by bending determined as function of radius sheet thickness and stress-strain characteristics
08 p1319 A69-20005
- Direct plotting of vibrating wire strain gauge data for concrete structures, giving diagrams for grid and backing sheet scaling
08 p1312 A69-20104
- Separation of principal stresses along sections of symmetry free from external loads with application to circular ring and grooved bar
08 p1412 A69-20256
- Streamlined rotors calculation, interpreting compatibility conditions between streamlining and airsearc stresses
08 p1252 A69-20655
- Simply supported isotropic cylindrical panel stability under axial compression, obtaining asymptotic series expansion for upper critical stress
08 p1419 A69-21182
- Reaction vs time relations in accidental impact of large commercial aircraft against rigid surface, detailing stress analysis of nuclear power plants structures
09 p1613 A69-21677
- Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention
09 p1614 A69-21741
- Graphical methods for photoelastic effect behind system with stresses rotating about direction of light propagation, discussing j circle technique [DVL-903]
09 p1617 A69-22011
- Material selection for structures under vibration loads, analyzing fatigue strength on basis of stress susceptibility and relationship with tensile strength
09 p1620 A69-22574
- Strength hypothesis for structures under multiaxial vibration load, taking into account plane stress state
09 p1620 A69-22575
- Elastoplastic stress in notch as cause of decreased lifetime of aircraft components, analyzing stress reversal and displacement during takeoff and landing
09 p1620 A69-22576
- Inverse problem in stochastic processes, considering random moving force and strip load in structural stress analysis
10 p1793 A69-22876
- Numerical analysis for stresses in finite or infinite plate with arbitrary holes, considering boundary value problems
10 p1793 A69-22882
- Structures analysis by photoelastic model techniques of stress visualization
10 p1794 A69-22941
- Book on statics of thin walled shells of revolution covering stress-strain analysis for geometrical shapes
10 p1800 A69-23197
- Couple stresses effect on distribution of stresses in elastic solid due to crack analyzed on basis of Cosserat theory
10 p1800 A69-23242
- Shear field pattern theory modified to apply to determination of sweptback wings, calculating stress development
10 p1801 A69-23645
- Propagation of extensional cylindrical waves in elastic plates with free boundaries, considering plane stress and Lamb dispersion
11 p1969 A69-24414
- Nonlinear elasticity theories emphasizing quadratic approximation of stress concentration
11 p1973 A69-24660
- Macroscopic states of stress criteria for plastic flow initial yielding, plastic flow and brittle fracture of ductile and brittle metals
11 p1975 A69-24671
- Linear shell theory foundations, discussing two and three dimensional stress strain relations, couple stresses, circumferential length ratio to shell thickness, etc
11 p1977 A69-24803
- Stress analysis, Volume 12, Theoretical and experimental studies of strength of machine structures
11 p1980 A69-24940
- Moire patterns for photoelastic strain analysis noting applications to elasticity, plasticity and creep problems
11 p1982 A69-24944
- Stress analysis of reinforced cylindrical shells under external loading, using Vlasov semimomentless theory
11 p1982 A69-24949
- Field approach for stress and deflection analysis in rectangular plates reinforced by straight ribs, noting kernel function
11 p1983 A69-25019
- Deformations and stresses in pressure vessel with elliptical cross section under uniform internal pressure, noting radial deflection and membrane, bending and skin stress
11 p1983 A69-25023
- Temperature and stress dependence of microstrain and microyielding in polycrystalline W for range of impurities and dislocations, considering transition to macrostrain
11 p1905 A69-25183
- Maximum stress under bending for thin walled circular cylindrical shell stiffened with uniform stringers
11 p1987 A69-25380
- Birefringent coatings application to plane stress in orthotropic glass-fiber reinforced plastic materials noting stress-strain relations
11 p1995 A69-25647
- Bending and membrane stresses determination in shallow thin shells of revolution under large axisymmetric deflections, using normal and radial displacements relationship [SESA PAPER 1332]
11 p1995 A69-25651
- Poisson ratio determination with bonded electrical resistance strain rosettes
11 p1995 A69-25652
- Stress discontinuity surface of three dimensional rigid plastic body arbitrary yield condition, considering equilibrium of regular four sided pyramid
11 p1996 A69-25738
- Stress concentration near circular hole in plate during bending, showing dependence on material constant
12 p2178 A69-25999
- Plane stress state in plate with different glide moduli during tension and compression, considering axisymmetrical deformations
12 p2178 A69-26003
- Thermal stress and displacement fields in elastic solid weakened by crack outside of circular region, noting plastic zone size and energy dissipation
12 p2179 A69-26216
- Stress distribution in elements of unidirectionally fiber reinforced composite materials analyzed as function of fiber content and fiber-matrix elastic properties
12 p2180 A69-26263
- Thermal stresses in infinite elastic plates containing insulated circular holes, using two dimensional bipolar coordinates
12 p2180 A69-26267
- Thermal stresses in hollow finite circular cylinder having smooth rigid insulating cover on curved surfaces and temperature distribution on plane ends
12 p2180 A69-26268
- Critical load for anisotropic right-angled isosceles triangular plate stability with large deflections obtained from differential equation
12 p2180 A69-26270
- Axisymmetric elastic stresses in ring stiffened segmented shells of revolution, noting finite difference method for nonlinear analysis and computer program
12 p2185 A69-26818
- Lateral bending and two dimensional thermal stress in rectangular orthotropic plates, considering alternating direction implicit method
12 p2188 A69-27100
- Stress distribution in matrix of unidirectionally fiber reinforced composite subject to shrinkage and normal transverse load, using three dimensional photoelastic analysis
12 p2189 A69-27162
- Crack opening displacements of stationary and running cracks and of inclined stationary cracks in centrally notched plates, noting normal strain fields
12 p2189 A69-27163
- Moire fringes, discussing fringe multiplication by filtering to obtain small strain measurement sensitivity and engraving technique for wave front reconstruction
12 p2099 A69-27164
- Moire and gridwork methods of plastic strain analysis with application to plane strain and axisymmetric extrusion
13 p2359 A69-27256
- Plane stress theory for large elastic deformations of isotropic thin sheets, outlining successive substitutions method for neoHookean materials static and dynamic problems
13 p2359 A69-27320
- Book on stress rupture parameters including least squares approach to Larson-Miller, Dorn, Manson-Haford, Graham-Walles, Murry, Brozzo and Chitty-Duval
13 p2360 A69-27372
- Subelement geometrical stiffness determined, considering complete element natural modes
13 p2362 A69-27838
- Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane [ASME PAPER 68-WA/APM-8]
13 p2362 A69-28121
- Stresses in elastic half plane with bonded disk of same elastic properties, describing stress production by expansion of disk
13 p2363 A69-28132
- Strain resultants in finite quadrilateral elements, noting application to linear strain triangles
13 p2364 A69-28230
- Stress intensity for Griffith crack with asymmetrical distribution of surface tractions
13 p2369 A69-28352
- Phenomenological macro rheology, discussing mechanical models designed for studying relation between stresses and strains in materials
13 p2369 A69-28562
- Materials surface thermal stress analysis by strain gauges, considering behavior during rapid temperature changes
13 p2264 A69-28599
- Rotating disk of nonuniform thickness, establishing optimum geometry for minimum tangential stress [ASME PAPER 69-DE-36]
14 p2454 A69-28841
- Stress and strain fields for circular rubber ring under diametrical compression between flat plates, using moire, large strain analysis and photoelastic verification
14 p2531 A69-28884

Structural stress under acceleration loading simulated by two dimensional photoelastic model noting improvement of fringe patterns quality
14 p2532 A69-28885

Temperature measurement for aircraft gas-turbine engine development
14 p2509 A69-28886

Plasticity theory approximation variants for complex loading, analyzing strain trajectories using Prandtl-Reiss theory
14 p2532 A69-28978

Model equation for Reynolds stress in turbulent two dimensional shear flow
14 p2428 A69-29000

Stress in elastic cylinder under thermal expansion with one end clamped expressed by series expansion of biharmonic function using least squares method
14 p2534 A69-29284

Constitutive equations for living soft tissues freely deforming under negligible stresses with Hooke law as limit
14 p2535 A69-29366

Strains determination for laterally edge loaded rectangular plate and sagittas determination of perpendicularly loaded plate proved analogous
15 p2704 A69-30295

Box girders stress distribution analyzed by stress-freezing method compared with photoelastic measurement
15 p2705 A69-30419

Elastoplastic matrix for stress increments for yield surfaces with associated flow rule, considering initial stress computation
15 p2706 A69-30433

Torsion of composite prismatic rod consisting of three different isotropic materials with two interfaces converging on cross section contour corner point
15 p2707 A69-30579

Creep rates measurement errors at low stresses in intermediate temperature range, examining log creep rate vs log stress plot in Cr-Mo steel
15 p2639 A69-30599

Automated shear difference analysis of three dimensional photoelastic model stress distribution by stress-freezing and slicing technique
15 p2609 A69-30680

Scratch gages under water in open and at high temperature, including circular X-Y recording scratch strain gage
15 p2610 A69-30682

Screening techniques for semiconductor devices, considering component classification with respect to population strength distribution
15 p2627 A69-30840

Monograph on stress fields in plane plastic flow as solutions to boundary value problems
15 p2711 A69-30932

Stress calculation for thermoelastic mixed boundary value problem in infinite isotropic plate with cylindrical stress free cavity
15 p2712 A69-31013

Plane stress solution for stresses due to concentrated couple acting at any point on elliptic plate with fixed edge
15 p2712 A69-31014

Stresses in fixed two dimensional photoelastic models analyzed by hologram interferometry, displaying isochromatic and isopachic interference patterns
15 p2611 A69-31110

Thermal stresses in circular cylinder with regularly distributed cavities, establishing distribution laws for temperatures and stresses
15 p2714 A69-31196

Potential functions applications to three dimensional static elasticity problems of parallelepipeds, using general stress solution
15 p2715 A69-31216

Full stress design feasibility as function of load conditions, indeterminacy order and structure topology
16 p2872 A69-31915

Stress and deformation in cross section of beam during complex loading using steepest-descent method
16 p2873 A69-32132

Transient stress waves due to inputs of various types and time dependence in plates and revolving shells, discussing applications of elasticity theory analysis methods
16 p2876 A69-32785

Grain boundaries contribution to creep deformation, discussing ratio of grain boundary slip strain to total creep strain
17 p2985 A69-32905

Random stress statistical properties and relationship to fatigue life, discussing Fuller prediction, comparison with test data, and vehicle design evaluation
17 p3053 A69-32988

Stress-strain state analysis for brittle plate with circular holes of equal radius performed in cylindrical system of coordinates
17 p3055 A69-33127

Stresses and displacements in elastoplastic cantilever beams and beams fastened at both ends calculated by stress-strain diagrams of material
17 p3056 A69-33191

Strains in elastoplastic curved beam under bending obtained from approximating stress-strain diagram by parabola
17 p3056 A69-33192

Centrifugal compressor impeller disk design, considering stress analysis for shielding portion profile determination to satisfy equal strength condition
17 p3057 A69-33193

Solid propellant thrustors fabrication procedures, design considerations and quality control, stressing stress analysis and propellant choice with respect to geometry
17 p3018 A69-33331

Holography application in gas turbine components stress and vibration analysis, discussing techniques and apparatus usable by nonspecialist and measurement accuracy
17 p2974 A69-33351

Strength margins for combined random stresses, discussing average crossing frequency of curve by Gaussian stationary random vector with correlation coefficients included
17 p3066 A69-34038

Elastic stresses in rotating anisotropic disks with constant thickness, discussing solid, circular rigid shaft mounted and center drilled disks
17 p3067 A69-34138

Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy
17 p2991 A69-34186

Mean stresses effect on fatigue strength by specimens vibratory/tensile mean stress diagram combining Goodman line and Gerber parabola merits with increased accuracy
17 p3067 A69-34197

Coupled stresses in thermoelasticity for displacement and rotation vector characterized medium, discussing wave propagation in unbounded medium
18 p3211 A69-34262

Grid method of strain determination, discussing print, record, analysis and application
18 p3134 A69-34423

Modified Bubnov-Galerkin-Ritz method for determining approximation coefficients in stress and displacement analysis, using mixed variational principle of elasticity theory
18 p3215 A69-34566

Stressed state analysis in dynamic brittle breakdown wave front of compression waves propagating in brittle rod under longitudinal impact
18 p3217 A69-34592

Positive Gaussian curvature shell under concentrated forces, analyzing stresses and strains relation to load distance using Thompson and Legendre functions
18 p3218 A69-34601

Stress conditions of anisotropic plate with soldered in circular isotropic aluminum disk in presence of notches at seam, assuming elastic symmetry of plate
18 p3218 A69-34602

Analytical-statistical weight prediction to derive and apply correlation expression, illustrated with bending stress equation applied to aircraft wing group [SAWE PAPER 810]
18 p3221 A69-34900

Constrained elastoplastic torsion of closed thin walled cylindrical shells, analyzing tangential and normal stress by using equilibrium equations
18 p3222 A69-34978

Rectangular thin beam Saint Venant deflection in case of moment stresses based on elasticity and shell theory
18 p3223 A69-35035

Static stability of three dimensional elastic bodies under subcritical strains, noting application to stability of cylindrical shells and rods
18 p3223 A69-35036

Photoelastic materials stressed state analysis by inserting analyzer and polarizer into sandwich medium, obtaining polarized light field
18 p3138 A69-35152

Strains in solids of any form, using moire method combined with holographic interferometry
18 p3139 A69-35280

Microstresses in hollow-fiber reinforced cylindrical shell under longitudinal shear stress, determining modulus of elasticity and optimum component ratios
18 p3225 A69-35369

Limiting equilibrium of infinite brittle body weakened by internal plane elliptical crack, determining critical loads and stresses at crack
18 p3226 A69-35379

Strength analysis of three layer rectangular plates under complex load and support distributions
19 p3434 A69-35827

Book on moire fringes in strain analysis, discussing methods for strain measurement in deformed bodies and engineering structures
19 p3435 A69-35835

Turbine disks stress-strain state, using wire strain gage to determine residual strains, radial and tangential stresses as function of disks rpm
19 p3436 A69-35850

Two dimensional stress analyzed near crack in infinite elastic sheet, considering crack shape and Young modulus
19 p3440 A69-36638

Graphical representation of friction stresses produced on mechanical parts surface layers, using mathematical model based on Poisson ratio and friction coefficient
19 p3329 A69-36723

Thin elastic shells internal stress state by iteration of two dimensional equation of general linear theory
19 p3443 A69-36790

Finite element method in stress analysis for axisymmetric rotors design, describing computer program and applications
19 p3445 A69-36826

Finite element displacement method using elastic analogy applied to viscoelastic materials plane stress analysis
19 p3445 A69-36830

Stress distribution in tension specimen notched on one edge obtained photoelastically for several notch depth to specimen width ratios, noting Neuber theory agreement
19 p3447 A69-36859

Stress analysis of cylindrical shell-end closure junction for optimum pressure vessel configuration prediction for nuclear reactor applications
19 p3447 A69-36861

Surface stresses in rotating asymmetric profiled disks and axial deflection effects computed theoretically and compared to measurements on photoelastic models
19 p3447 A69-36862

Photoelastic model methods for two and three dimensional investigations of microstresses in composite materials
20 p3565 A69-36940

Geometry effects on stresses in discontinuous composite materials, studying fiber spacing, failure and discontinuities size and nature
20 p3565 A69-36942

Stress and displacement in thin circular plates of ductile materials under axisymmetric loading predicted by nonlinear analysis
20 p3628 A69-37787

Monograph on beam impact force and bending stresses during transverse impact, noting Bernoulli and Hertz theories application
20 p3628 A69-37922

Stress rupture parameters for refractory metals and alloys from Larson-Miller, Dorn and Manson-Haferd constants, noting optimization procedure [ASM PAPER D8-3.4]
20 p3564 A69-38135

Soviet book on shell and thin walled structure calculation methods covering stability and stress analysis, reinforced and sandwich shells, etc
20 p3630 A69-38199

Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention
20 p3630 A69-38217

Stress analysis of circular elastic plate buckling under radial compression, noting Kirchhoff hypothesis influence on critical value of thickness-to-radius ratio
21 p3834 A69-38722

Adhesives and adhesive resin bonding, describing internal stresses in joints, joints design for bonding, strength, bonding processes and testing
21 p3752 A69-38932

Stress analysis - Conference, London, March 1968
21 p3840 A69-39301

Error propagation and tolerance analysis in design and reliability engineering and stress analysis
21 p3842 A69-39303

Computer program for stress analysis of cylindrical pressure vessel with flat-end closures by thin shell theory

21 p3842 A69-39306

Stress analysis of thin axisymmetric shells by plane frame analysis program, noting stiffness matrix for conical shell element

21 p3843 A69-39312

Isoparametric finite element system for stress analysis, with examples for arch dam, impeller and cellular structure, illustrating shells of revolution

21 p3732 A69-39314

Photoelastic data analysis for stress separations, discussing shear slope and Tesar methods

21 p3843 A69-39316

Photoelastic and micromechanic studies of epoxy resins of varying Young moduli by simultaneous stress analysis of FRP and matrix materials

21 p3846 A69-39796

Mohr tensor representation and Mohr theorem proof developed for general problem in structural engineering

22 p4038 A69-39903

Rectangular plate under biaxial tension stress analyzed to determine onset of necking and stress-strain state

22 p4039 A69-39913

Momentless orthotropic spherical shell of variable thickness stress analyzed, assuming large deformations under uniform axisymmetric load distribution

22 p4039 A69-39916

Holography applied to stress and vibration analysis of gas turbine blades, disks and small components

22 p4040 A69-39960

Metal fatigue crack nucleation at stresses below static fracture strength, determining local plastic strain under cyclic loading

22 p4041 A69-40053

Stress analysis fundamental equation for variable thickness plate under concentrated load, using two dimensional Dirac delta function

22 p4041 A69-40144

Moire effect applications to stress analysis, enumerating advantages over conventional grid techniques

22 p4042 A69-40315

Radial and tangential stress analysis of rotating disk during steady state creep, using equations solved by finite difference method

22 p4043 A69-40458

Stress analysis during solidification of binders in glass fiber reinforced plastic materials, using resin coated glass film simulation

22 p3973 A69-40746

Initial stress dependence on tensile load in glass fiber reinforced plastic rings during winding

22 p4045 A69-40749

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges

22 p4046 A69-41061

Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation

22 p4047 A69-41123

Shallow shells two dimensional theory including effects of transverse shear deformation and of moments turning about normal to middle surface

22 p4048 A69-41197

Vector properties of isotropic strain hardenable materials in stress vector space applied to tubular brass subject to biaxial tension and complex loading

23 p4227 A69-41714

Stress analysis of cylindrical tubes under torsional and transverse static loads based on vibrational theory, applied to rectangular cantilever tube

23 p4228 A69-41916

Plates and shells under concentrated loads, analyzing stress-strain state

23 p4228 A69-41986

Principal stresses determination in optically active photoelastic models from fringe pattern while obtaining sum from Dirichlet problem solution by straight line method

23 p4228 A69-41987

Stress analysis in elastic bodies induced by axisymmetric strains in presence of mass forces and temperature gradients, obtaining equilibrium equation

23 p4229 A69-41997

Algorithm for stress analysis of structurally orthotropic conical and cylindrical shells, resolving first order differential equations

23 p4229 A69-42000

Green formula and fundamental solution for determining displacements and stresses in contour integral form for plate bending problems

23 p4230 A69-42002

Creep stress analysis of circular cylindrical shells under axisymmetric loading, plotting stresses and deformations for various parameters

23 p4233 A69-42352

Nadai and Zyczkowski stress analysis for Tresca yield condition reexamined for determination of critical angular velocity of solid elastic perfectly plastic disk

23 p4235 A69-42480

Scattered light methods inaccuracies for nondestructive analysis of generally stressed photoelastic models, noting modified Mini-max method

24 p4396 A69-42737

Isoclinics determination from fringe patterns, obtaining continuous principal stress direction data for photoelastic model in bonded polariscope

24 p4396 A69-42738

Bonded strain gages for experimental stress analysis of high speed rotating machinery under high centrifugal loads

24 p4397 A69-42740

Stress analysis in design techniques taking into account failure of flawed structures, discussing fracture mechanics

24 p4398 A69-42773

Limiting load of square plate subjected to shear and reinforced by vertical stiffener, computing membrane and bending stresses as function of flexural rigidity

24 p4399 A69-42967

Stress analysis of hollow viscoelastic cylinder reinforced with elastic helically wound wires

[ASME PAPER 69-APMW-23]

24 p4401 A69-43096

Contact stress distribution between two two-dimensional finite nearly rectangular elastic bodies with general surface configurations for surface load expressed in trigonometric series

[ASME PAPER 69-APMW-9]

24 p4402 A69-43104

Soviet book on resistance of materials to deformation and fracture in complex stress states covering elasticity, mechanical theories of limiting stress state, experimental verification, etc

24 p4402 A69-43233

Stress analysis of incompressible solid propellant rocket charges by point matching technique, considering differential thermal shrinkage and axial acceleration cases

24 p4402 A69-43263

Relative slip effect on fretting fatigue strength, deriving stress initiating fatigue cracks

24 p4404 A69-43628

STRESS CONCENTRATION

Stress concentration near eccentric elliptical hole in spherical shell, using computer methods

01 p0165 A69-10089

Strain distribution for fracture initiation and steady state crack propagation in plane strain tension of plastic materials

01 p0169 A69-10764

Fiber-fiber interaction effect on stress distribution and tensile strength of discontinuous aligned fiber composites

01 p0171 A69-11261

Thermal stresses near spherical inclusion in elastic matrix with uniform heat flow

01 p0171 A69-11264

Stress distribution in composite cantilever beams of three layers with end loading solved by closed form elasticity method

01 p0172 A69-11266

Stress transfer from loaded matrix to single fiber in composite materials determined by series and step formulations

01 p0172 A69-11271

Three dimensional stress concentration around cylindrical hole in semiinfinite elastic body loaded at infinity, using Fredholm integral equation

01 p0172 A69-11332

Stress peak distribution effects on random load fatigue investigated for one and two degree of freedom systems

01 p0172 A69-11355

Stress field and force system within torsional flow of cylindrical mass of incompressible anisotropic fluid

02 p0229 A69-11558

Dynamical strength of solid cylinder under axial loads increasing in time at given rate, using constitutive equations of thermodynamic theory

02 p0342 A69-12278

Three dimensional thermal stress distribution in case bonded solid propellant determined by scattered light photoelastic technique coupled with transparent rocket motor model

[AIAA PAPER 68-512]

02 p0345 A69-12371

Stress concentrations around elliptical perforations in shrunk plates with bonded boundaries based on photoelastic models

02 p0345 A69-12391

Internal elastoplastic stress distribution within reinforced plastics subjected to force normal to internal filaments direction

02 p0347 A69-12513

Composite tensile-failure modes, discussing failure load prediction, experimental data and statistical analysis of stress concentration effects

[AIAA PAPER 68-173]

02 p0347 A69-12514

Time dependent viscoelastic stress distribution in two phase composite material, using plane stress model for approximation

02 p0348 A69-12540

Stress and heat flux spectra estimation using Busch-Panofsky observations

02 p0276 A69-12698

Stresses in infinite elastic plate containing rigid rectangular inclusion subject to uniform stress field, using complex variable method and Schwartz-Christoffel conformal mapping

02 p0348 A69-12796

Stress state of circular cylindrical shell subjected to uniform inward radial line load along generator solved by closed form particular integral, discussing convergence

02 p0349 A69-12797

Stresses around two reinforced circular openings in thin elastic plate of isotropic material under biaxial loads

02 p0349 A69-12799

Successive approximations utilizing analytic stress functions used to obtain solution for infinite plate with arbitrary holes under biaxial stresses

[ASME PAPER 68-PVP-1]

03 p0523 A69-12998

Grooved commercial Ti and Ti alloys mechanical properties under uniaxial static tension at low temperatures

03 p0443 A69-13028

Photoviscoelastic stress analysis to predict time dependent stress redistributions in polyphase system with viscoelastic binder under external loading conditions

03 p0524 A69-13061

Performance prediction by testing, considering stress analysis, temperature, multiaxial stresses, combined stress, corrosion, shock, etc

03 p0525 A69-13307

Grain boundary sliding influence on gross mechanical behavior and stress distributions, emphasizing creep behavior

03 p0450 A69-13882

Graphical representation of stress distributions and forces on dislocations

03 p0529 A69-13973

Helicoidally symmetrical stress in cylindrical thin shells

03 p0529 A69-14056

Tangential and normal stress distribution in deformed metals, discussing work hardening of metals and cold working without softening effect

03 p0435 A69-14118

Stress distribution near circular hole in elastic layer

04 p0667 A69-14266

Stress concentration near arbitrary hole, assuming small deformations and physical nonlinearities

04 p0667 A69-14268

Computer method calculating stressed state of elliptical bottom of cylindrical pressure vessel based on differential bending equations for shell of revolution

04 p0668 A69-14275

Elastic ring subject to uniform hydraulic pressure on inner boundary and with two opposite slipless quarter-arcs on outer boundary, noting stress and deformation

[ASME PAPER 68-WA/APM-17]

04 p0669 A69-14395

Axisymmetric stress field around spheroidal inclusions and cavities in transversely isotropic material

[ASME PAPER 68-WA/APM-14]

04 p0669 A69-14400

Dynamic pressure pulse over band on solid elastic cylinder surface, analyzing time stress distribution throughout elastic cylinder

04 p0670 A69-14408

Resistance wire strain gages for measuring elastoplastic deformations in zones with high stress concentrations of strained machine elements

04 p0671 A69-14433

Dead-end microcracks stress fields, studying positive /tensile/ and negative /compressive/ nature dependence on crack size

04 p0674 A69-14548

Mechanical properties and stress concentration sensitivity of structural alloys at low temperature
04 p0614 A69-14574

Stress field for skew hole determined from plane stress field for equivalent right hole, considering elastic plate penetrated by oblique circular cylinder
04 p0674 A69-14589

Circular cylindrical shell creep behavior and buckling under axial compression and internal pressure, using multimembrane model
[AIAA PAPER 68-108] 04 p0676 A69-14706

Creep stress concentration at circular hole in thin sheets under loads in own plane, discussing infinite thin plates
[AIAA PAPER 68-175] 04 p0676 A69-14708

Equilibrium and compatibility equations for axisymmetric stress distribution in finite length anisotropic elastic cylinder reduced to single integrodifferential equation
04 p0676 A69-14709

Plate thickness effect on bending of elastic plate with crack, investigating stress distribution
04 p0678 A69-14890

Stress concentration around centrally placed circular bolt in axially loaded bar, using theory of infinite systems of linear equations
04 p0681 A69-15195

Stress-strain rate relation under combined stress fields derived from Gilman relation between dislocation velocity and force for single dislocation
05 p0834 A69-15756

Plane thermal stress distribution determined around holes under steady temperature distribution, using complex variable approach
05 p0836 A69-15877

Course slip during cyclic deformation of copper single crystals, discussing strain bursts dependence on stress amplitude rate, unidirectional prestrain and orientation
05 p0779 A69-15905

Axisymmetric thermal stresses in spheroidal shell of arbitrary thickness due to thermoelastic strain nucleus
05 p0836 A69-15923

Tangential stress distribution and heat transfer in circular cylinder with attached wall jet
05 p0746 A69-16022

Elastic plastic stress distribution in compressed ring determined with postyield strain gages and stress-strain relationship from uniaxial tensile test
05 p0837 A69-16063

Velocity fields and wall shear stress distributions in eccentric annuli
[ASME PAPER 68-WA/FE-35] 05 p0750 A69-16108

Flow stress of iron wire reinforced aluminum alloy composites
[ASME PAPER 68-WA/MET-10] 05 p0780 A69-16150

Green function for computation of stress intensity factors for edge cracks in rectangular plates with arbitrary loadings
[ASME PAPER 68-WA/MET-18] 05 p0839 A69-16156

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses
[ASME PAPER 68-WA/MET-19] 05 p0839 A69-16157

Stress distribution and spring rates in cantilever cone ring combination
[ASME PAPER 68-WA/DE-3] 05 p0839 A69-16168

Circular inclusion effect on stresses around line crack in sheet under tension based on elasticity theory
05 p0841 A69-16432

Plastic yield on inclined slip planes at tip of crack deformed in antiplane strain
05 p0842 A69-16436

Plane problem of moment theory of elasticity for stress concentration near circular hole
05 p0842 A69-16502

Stress distribution in infinite strip with equally spaced identical semicircular notches on one edge and subject to transverse bending
05 p0842 A69-16643

Fatigue life reduction in Al alloy specimens with stress concentrations due to notches
05 p0843 A69-16696

Plastic yielding and strain distribution in Al reinforced with stainless steel wires determined by electron microscopy
06 p0940 A69-16947

Strain distribution at crack base measured by Fabry-Perot interferometer and photoelastic coating
06 p1020 A69-17127

Finite plane deformation of solid body, arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change solved by nonlinear equation
06 p1021 A69-17175

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method
06 p1021 A69-17180

Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes
06 p1021 A69-17184

Deformation and stresses in biaxially loaded stretched thin plate with central small hole during stress redistribution caused by creep
06 p1022 A69-17368

Iterative solution of integral equation and uniform convergence conditions of function sequence approximating incremental stress distribution in elastic-plastic structures
06 p1024 A69-17510

Two dimensional stress distribution changes around rectangular hole with rounded corners for varying internal pressure and temperature
06 p1025 A69-17611

Stress distribution in shallow spherical shell with smooth cornered rectangular hole or biperiodically arranged set of holes, using computer program
06 p1027 A69-18020

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration
[AIAA PAPER 69-56] 06 p1029 A69-18193

Stresses and displacement around crack under various conditions using two dimensional elasticity theory, deriving complex potentials for various loading types
07 p1231 A69-18269

Ultrahigh strength steel susceptibility to brittle fracture, describing methods of testing rupture toughness and stress intensity factor
07 p1158 A69-18402

Laminated composite fracture statistical theory with stress enhancements in elements next to primary fracture, comparing elastic and plastic matrices
07 p1170 A69-18712

Stress concentration factors for composite body of two isotropic elastic phases in plane strain in plane of composite parameters
07 p1170 A69-18716

Fiber geometry and partial debonding effects on bond stress distributions around single rigid fiber in infinite elastic plate subject to tensile stress
07 p1170 A69-18717

Thermal stress concentrations in vicinity of cylindrical elastic inclusions embedded in elastic matrix, using displacement functions and photothermoelasticity
07 p1171 A69-18726

Plastic fractures of age hardened aluminum alloys analyzed by tensile tests and electron fractography, considering stresses, surface and intergranular effects
07 p1166 A69-18961

Steady state thermal stress distributions near external crack in solid, treating temperature distributions with respect to plane of crack
07 p1232 A69-19172

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K
07 p1166 A69-19264

Strain concentration design factors for notch effect in low cycle fatigue and crack propagation conditions
07 p1235 A69-19383

Parameters interrelating time and temperature used to present creep-rupture data for Al alloys, providing direct readings of stresses
[ASM PAPER D8-9.7] 07 p1169 A69-19665

Critical analysis of Sedov contention of infinite stress development at ends of brittle cracks
07 p1238 A69-19690

Brittle fracture criterion for small steel specimens based on interaction between stress concentration of initial crack and nearby slip band
07 p1238 A69-19694

Breakdown regularity of metals having different crystal structure, considering metal lifetime dependence on stress magnitude and test temperature
08 p1328 A69-19793

Elastic springback and residual stress distribution in sheet metal formed by bending determined as function of radius sheet thickness and stress-strain characteristics
08 p1319 A69-20005

Amplitude dependent internal friction of materials under inhomogeneous strain, giving values for torsional, free longitudinal and transverse vibration modes
08 p1331 A69-20175

Couple stresses effect on thin plate stress distribution due to pressure of rivet on one side of circular hole
08 p1319 A69-20201

Two dimensional photoelasticity for minimizing stress concentration in perforated rectangular plate subjected to restrained shrinkage, discussing application to solid propellant rocket grains
08 p1412 A69-20255

Stress distribution around equal size holes at ends of crack for normal uniaxial tension, based on photoelastic and brittle lacquer technique
08 p1412 A69-20257

Elastic potential for obtaining localized strain theory, describing deformation characteristics of compressible and incompressible orthotropic materials with physical nonlinearity
08 p1412 A69-20328

Constructional HY steels for high stress critical welded structures, discussing fracture mechanics stress intensity factor
08 p1333 A69-20405

Dynamic stress intensity factor for axisymmetric loading of circular crack in infinite isotropic elastic medium
08 p1413 A69-20412

Stress fields in Hertzian contact of parallel cylinders composed of anisotropic materials and transversely isotropic spherical bodies
08 p1414 A69-20524

Transient thermal stress distribution in infinite orthotropic elastic cylinder of rectangular cross section in presence of heat sources
08 p1415 A69-20664

Elastic cone stresses due to axial force at point on axis, solving problem in terms of convergent integrals
08 p1415 A69-20689

Matrix displacement method for nonlinear elastoplastic two or three dimensional structures or continua, discussing strain distribution
08 p1416 A69-20705

Monograph on plane problem and bending problem for infinite elastic plate with doubly periodic set of circular holes
08 p1416 A69-20709

Resonant frequencies, vibration modes and stress distributions for naturally vibrating plane wide blades of turbomachines
08 p1376 A69-20764

Compatibility theorem extension to three dimensional rigid plastic bodies with stress and velocity discontinuities, noting isotropic bodies with convex yield surface
08 p1418 A69-20845

Plane and three dimensional stress concentration studies involving asymmetrical stress tensors, noting contributions to moment theory of elasticity
08 p1419 A69-21177

Axisymmetric elastoplastic bending theory for cylindrical shell by applying Saint Venant plasticity conditions, determining stress distribution
08 p1419 A69-21179

Displacements and stress intensity as function of crack length for compact tension specimen, considering load line and crack edge
09 p1503 A69-21392

Stress-strain distribution in rotor wheel with radial side blades, giving differential equations system for circular disk strains
09 p1612 A69-21494

Three dimensional vibration analysis of circular homogeneous elastic cylinder, obtaining differential equations and zero stress conditions
09 p1612 A69-21601

Stress concentration at circular hole in infinite plate for large strains and nonlinearity, analyzed by integral operator method
09 p1613 A69-21629

Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention
09 p1614 A69-21741

Asymptotic two dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads
09 p1614 A69-21884

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates
09 p1614 A69-21885

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function
09 p1614 A69-21886

- Stress formulation of thermoelasticity in simply connected body, noting uniform temperature change influence on stress components 09 p1617 A69-22007
- Plastic strain intensity distribution in aluminum alloy specimen with central hole measured with marked orthogonal lattice 09 p1617 A69-22221
- Plane thermal stress field in discontinuous temperature distribution within isotropic linear elastic circular cylinder of infinite length 10 p1793 A69-22884
- Crack stability under mechanical and thermal stresses, noting critical tensile stress and thermal insulating character of crack 10 p1794 A69-22890
- Liquid crystal coatings for determining fracture initiation flaws in material structures, considering stress concentration and hysteresis heating 10 p1699 A69-23053
- Crack propagation velocity in titanium alloys over varying stress intensities under adverse environment 10 p1709 A69-23058
- Nonwork hardening elastic plastic material fracture criteria for antiplane strain, noting plastic zone shape effect on zone size and crack opening 10 p1795 A69-23064
- Fatigue crack propagation in cylindrical shells under fluctuating internal pressure, considering stress intensity factor 10 p1795 A69-23066
- Buckling deformation and stress fields around central slits in photoelastic models and metal sheets under tensile load 10 p1796 A69-23069
- Fatigue crack propagation and crack tip stresses measurements in tensioned cracked panels subjected to acoustic loading 10 p1797 A69-23078
- Stress intensity magnification factors in surface flawed tension plates and notched round tension bars, evaluating fracture toughness 10 p1797 A69-23080
- Low cycle fatigue of metals under biaxial strain, considering specimen life and strain amplitude correlation 10 p1797 A69-23083
- Couple-stresses and singular stress concentrations in elastic solids with locally unbounded deformations and stress reduction around hole 10 p1798 A69-23149
- Stress concentration in Cosserat continua based on model of six elastic constants in linear isotropic and notch case 10 p1799 A69-23150
- Continuum theory of dislocations and plasticity in crystals, analyzing stress fields in elastoplastic materials 10 p1799 A69-23154
- Couple stresses effect on distribution of stresses in elastic solid due to crack analyzed on basis of Cosserat theory 10 p1800 A69-23242
- Creep of high purity Nb-Mo alloys in 800-1300 C range and at 1500-13000 lb/square inch stresses, giving activation energy for creep 10 p1711 A69-23375
- Notched members fatigue life prediction from smooth specimen fatigue data and Neuber rule application 10 p1715 A69-23984
- Rubber modified thermoplastics structure and mechanical properties, emphasizing stress concentration around composite particles and crazing role in creep and fracture 10 p1716 A69-23985
- Fatigue growth of disk shaped crack in infinite body, noting dependence on fourth power of stress intensity factor 10 p1802 A69-24028
- Modified Rayleigh-Ritz method for prediction of stress concentration in elastostatic problems for elastic continua, noting plate bending 11 p1969 A69-24413
- Soviet collection of papers on stress concentration, Number 2 11 p1970 A69-24645
- Moment stresses effect on stress concentration in plates with common type hole, considering uniaxial and triaxial bending and torsion 11 p1971 A69-24646
- Stress concentration during deformations in thin shallow shells, using conformal mapping and difference method 11 p1971 A69-24648
- Elastic waves propagation in inhomogeneous composite media, considering coefficient of structural stress concentration 11 p1972 A69-24649
- Stress concentration analysis of interactions between stress raisers and cross section changes, considering asymptotic expansion method 11 p1972 A69-24650
- Elastic isotropic half plane weakened by circular hole with concentrated force applied along hole contour, considering stress distribution 11 p1972 A69-24653
- Stress distribution around holes in thin shells and plates during large elastic displacements, considering hole size, loading and shallow spherical shells 11 p1972 A69-24654
- Stress concentration in isotropic plates weakened by curvilinear holes subjected to loading at infinity, noting curvature at corner points of holes 11 p1972 A69-24655
- Semibrittle material decompaction influence on stress distribution in infinite plate with edge loaded circular hole, noting stress-strain relation nonlinearities 11 p1972 A69-24656
- Limiting equilibrium of plate weakened by curvilinear hole stress raiser with one or two cusps, obtaining stress-strain diagrams 11 p1973 A69-24658
- Two dimensional contained plastic deformation in asymmetrical elasticity theory based on Cosserat medium, examining boundary value problems, stress concentration and elastic wave propagation at holes 11 p1973 A69-24659
- Nonlinear elasticity theories emphasizing quadratic approximation of stress concentration 11 p1973 A69-24660
- Two dimensional problems solutions by contour smoothing methods, considering stress concentrations in reinforced or perforated thin elastic plates 11 p1973 A69-24661
- Stress concentration at holes and cavities in thin elastic shells under static and dynamic loads, considering physical nonlinearities of material 11 p1974 A69-24665
- Mathematical theory of equilibrium cracks in stressed bodies with minimum loading for crack extension, analyzing crack tip zone and force transmission 11 p1974 A69-24668
- Stress concentrations in physically nonlinear multiply connected elastic media, discussing rods, thin plates and bodies with cavities 11 p1976 A69-24783
- Stress concentrations in bending of thin perforated plates, considering potential and vortex stresses due to edge effect 11 p1976 A69-24784
- Time scales for creep stress redistribution in structures subject to step loading 11 p1980 A69-24879
- Three dimensional theory of elasticity for finite hollow cylinder under axisymmetric deformation, considering stress and pressure distribution over surface 11 p1983 A69-25022
- Stress concentration around curvilinear holes in three layer spherical and cylindrical isotropic shells with hard and soft fillers under external loads 11 p1984 A69-25171
- Flat bar optimal cross section under tensile stress applied to minimize stress in large structural components using elasticity theory 11 p1986 A69-25203
- Indentation of inhomogeneous rigid plastic solid by flat punch under plane strain conditions analyzed by perturbation method 11 p1986 A69-25244
- Bending of half strip rigidly fastened along short edge, constructing integral equation for normal stress at clamping, investigating corners singularities 11 p1996 A69-25734
- Axisymmetric problem of stress in elastic space weakened by plane annular slit solved by asymptotic method in terms of equations for parameter lambda 11 p1996 A69-25735
- Inclination effect of fatigue cracks on plane strain fracture toughness of 7075-T651 Al alloy, discussing cantilever bending 12 p2177 A69-25958
- Stress concentration near circular hole in plate during bending, showing dependence on material constant 12 p2178 A69-25999
- Stress concentration around square hole in celluloid plate subjected to creep under biaxial tension analyzed by photocreep method 12 p2178 A69-26000
- High speed deformation of metals under pulse loading, noting role of maximum stress magnitude and deformation characteristics 12 p2113 A69-26043
- Thermal stresses induced in plate plane by temperature gradient varying in space and time calculated using Mach-Zehnder interferometer, determining stress intensity factors 12 p2089 A69-26189
- Stress distribution in elements of unidirectionally fiber reinforced composite materials analyzed as function of fiber content and fiber-matrix elastic properties 12 p2180 A69-26263
- Elastic stress created by perpetual motion of isotropic elastic solid in static space-time 12 p2130 A69-26283
- Symmetrical stressed state of shallow shell with crack edge loading solved in Cartesian coordinates 12 p2181 A69-26614
- Orthotropic properties and stress fields for configurations of fiber or whisker reinforced composite materials subjected to nonaxial loading, considering infinite elastic matrix 12 p2186 A69-26824
- Accelerated structural tests under creep conditions, noting isothermal structures subjected to uniaxial and complex stress loads 12 p2186 A69-26838
- Fatigue crack propagation laws determined by material yielding at crack tips, stress intensity and exponential crack growth law 12 p2187 A69-26846
- Correlation between temperature and stress field in thermal buckling of square viscoelastic Maxwell plates under random temperature 12 p2188 A69-27113
- Stress distribution in matrix of unidirectionally fiber reinforced composite subject to shrinkage and normal transverse load, using three dimensional photoelastic analysis 12 p2189 A69-27162
- Crack opening displacements of stationary and running cracks and of inclined stationary cracks in centrally notched plates, noting normal strain fields 12 p2189 A69-27163
- Fracture and equilibrium position of dislocations in discrete and continuously distributed dislocations arrays including stress due to crack, energy considerations and crack initiation 13 p2358 A69-27222
- Stress distributions in two normally intersecting cylindrical shells subjected to internal pressure, using Donnell and Flugge equations 13 p2359 A69-27255
- Natural stress concept for analysis of nonhomogeneous strains fields exhibiting geometrical nonlinearity 13 p2359 A69-27259
- Membrane and bending stresses around elliptic hole in thin circular cylindrical shell, considering axial tension [NAL-TN-13] 13 p2362 A69-28123
- Stress and displacement fields for uniaxially loaded infinite elastic continua with doubly periodic array of holes and inclusions, using finite element method 13 p2363 A69-28133
- Induced stressing method for complex castings by controlled cooling during heat treatment applied to front frame of J-79 turbojet engine 13 p2269 A69-28184
- Stresses in infinite solid elastic circular cylinder due to rotating line source of heat 13 p2364 A69-28206
- Dynamic stresses in case bonded cylinder due to transient angular accelerations, presenting numerical results for incompressible elastic cylinder 13 p2364 A69-28209
- Discrete element plastic analysis of long prismatic bars under transverse loading in longitudinal direction, based on matrix displacement method 13 p2365 A69-28237
- Stressed state of cylindrical circular shell clamped at edges and subjected to concentrated radial forces 13 p2368 A69-28322
- Variational principle based on assumed stress hybrid method suitable for finite element analysis of incompressible solids 13 p2368 A69-28348
- Variational principle and convergence of finite element method based on stress distribution 13 p2368 A69-28349
- Couple stresses effect on dynamic stress concentrations, considering elastic compressional wave diffraction by cylindrical discontinuity 13 p2369 A69-28351

Stress intensity for Griffith crack with asymmetrical distribution of surface tractions
13 p2369 A69-28352

End loaded two layer laminated elastic strip stress concentration and self equilibrating traction distribution analyzed by eigenvalue equation
13 p2370 A69-28672

Shrinkage stresses in two phase materials, analyzing stress distribution in epoxy inclusions in plasticized matrix during curing by photoelastic method
13 p2371 A69-28675

Contact problem for half plane with elastic stiffener reduced to Prandtl integrodifferential equation, determining contact stresses
14 p2531 A69-28804

Three dimensional equations of elasticity reduced to two dimensional equations of shell theory, discussing stressed states of thin elastic bodies
14 p2531 A69-28807

Infinite cylindrical shell stability under circular load solved by linearization about bending moment stress state and Galerkin method
14 p2531 A69-28808

Boundary layer equation of viscous incompressible fluid with moment stresses, noting flow around thin plate and submerged jet problems
14 p2428 A69-28815

High speed rotating disks design and stress analysis [ASME PAPER 69-DE-1]
14 p2453 A69-28838

Stress and strain fields for circular rubber ring under diametrical compression between flat plates, using moire, large strain analysis and photoelastic verification
14 p2531 A69-28884

Stress concentration around holes in thin shells, including analysis of stress-strain state in cylindrical and spherical shells
14 p2532 A69-28977

Plasticity theory approximation variants for complex loading, analyzing strain trajectories using Prandtl-Reiss theory
14 p2532 A69-28978

Thermoelastic stress-strain state of infinite circular cylindrical shell with elasticity modulus temperature dependence expressed by exponential function
14 p2532 A69-28980

Stress concentration around rhombic hole in non-linear isotropic plate under pure shear
14 p2533 A69-28987

Axisymmetric impact of circular cylindrical plates, obtaining two dimensional dynamic stress distributions for materials of linear elastic compressibility and plastic behavior in shear
14 p2534 A69-29027

Book on fatigue strength in construction covering structural strength and stability, load design, metal physical properties, elasticity and plasticity theories, stress concentration, strain buildup, etc
14 p2534 A69-29333

Convective instability by active stress, discussing composition dependent stress fields in continuous and mechanically isolated material and chemical to kinetic energy conversion
14 p2540 A69-29634

Creep strain rate and stress distribution of thick walled cylinders under internal pressure at elevated temperature, using variational principle
15 p2703 A69-30070

Differential equations for elastic stress distribution in thin rotating shell with arbitrary profile, obtaining analytical dimensionless solutions for potential profiles
15 p2703 A69-30158

Mechanical properties and stress concentration sensitivity of structural alloys at low temperature
15 p2638 A69-30275

Longitudinal internal cracks in deformed Al alloys initiated by elastic stress concentration in areas of highest flow rate gradient
15 p2638 A69-30277

Box girders stress distribution analyzed by stress-freezing method compared with photoelastic measurement
15 p2705 A69-30419

Elastoplastic matrix for stress increments for yield surfaces with associated flow rule, considering initial stress computation
15 p2706 A69-30433

Structural strength calculations, considering micro and macro stress distributions
15 p2706 A69-30447

Stress concentration near circular nonreinforced hole at bending of transversely isotropic rectangular plate analyzed in terms of transverse shear theory
15 p2707 A69-30580

Couple-stresses effect on stress concentration of plate containing infinite row of holes, solving linear elastic problem in isotropic Cosserat continua for plate
15 p2708 A69-30640

Three dimensional problem in crack theory for brittle body, determining stress concentration and critical loads
15 p2708 A69-30658

Plastic strains at crack tips in thin plate under concentrated forces, analyzing slip bands during initial deformation
15 p2708 A69-30659

Automated shear difference analysis of three dimensional photoelastic model stress distribution by stress-freezing and slicing technique
15 p2609 A69-30680

Initial comparisons between theory and experiment of strain fields in cracked copper plate
15 p2640 A69-30810

Plane strain and stress compared for elastoplastic cracked plate in work hardening tension
15 p2710 A69-30811

Reaction rate theory for dilatational failure of heterogeneous materials subjected to stress
15 p2710 A69-30813

Stiffness matrix of polygonal finite plate bending element derived using assumed stress distribution
15 p2710 A69-30867

Repeated static stress limit of internal pressure vessels, emphasizing effect of redistribution of stresses and strains
15 p2712 A69-30973

Stress distribution in isotropic spherical shell rotating uniformly about diametral axis, deriving equilibrium equations
15 p2712 A69-31005

Expression derived for arbitrary system subjected to external loading, using Cauchy equations for relationship between external plane forces and internal stresses
15 p2713 A69-31018

Stress concentration on circular holes and notches in anisotropic oriented glass fiber reinforced plastics determined by using photoelastic birefringent coatings
15 p2713 A69-31053

Thermal stresses in circular cylinder with regularly distributed cavities, establishing distribution laws for temperatures and stresses
15 p2714 A69-31196

Photothermoelastic analysis of thermal stresses in turbine wheels with welded blades, noting stress concentration reduction
15 p2715 A69-31488

Flexure of Ta and Nb thin rectangular specimens during high temperature oxidation, showing stress generation due to O dissolution into metal surface [ECS PAPER 87]
15 p2641 A69-31541

Equilibrium equations for elastic medium with stress couples, presenting first term of asymptotic expansion of solution for disk and simply connected region
16 p2871 A69-31830

Stresses due to nucleus of thermoelastic strain in infinite elastic solid with two rigid circular inserts
16 p2872 A69-31906

Stresses in perforated ribbed cylindrical shell subjected to internal pressure using brittle coating, electrical strain gages, photoelasticity and micrometers
16 p2876 A69-32784

Free-free transverse vibration damping phenomena, calculating strain amplitude dependence of internal friction at various frequencies
17 p3051 A69-32961

Photoelasticity testing of stress gradient factor on notched tensile specimens
17 p3052 A69-32982

Stress-strain state analysis for brittle plate with circular holes of equal radius performed in cylindrical system of coordinates
17 p3055 A69-33127

Transverse bending of asymmetric sandwich plates with rigid filler taking into account stresses and strains in filler
17 p3055 A69-33129

Stress distribution in variable rigidity reinforcing frame of circular cylindrical shell using strain energy method
17 p3055 A69-33131

Critical loads and stability loss forms of annular plates flexibly clamped at edges in uniform stress field
17 p3057 A69-33197

Elastic stresses in rotating anisotropic disks with constant thickness, discussing solid, circular rigid shaft mounted and center drilled disks
17 p3067 A69-34138

Craze formation and shear yielding considered for glassy polymers in terms of stress field requirements
17 p2993 A69-34169

Temperature dependence of metal elastic properties including thermal strains effect on stress field, yielding stress changes and elastic modulus variations
18 p3212 A69-34338

Stress field in elastic contact area vicinity of hollow sphere subjected to normal load through flat plate, noting contact life [ASME PAPER 69-LUBS-5]
18 p3212 A69-34338

Displacement bounding principle for work hardening plasticity theory based on Drucker inequality and stress space path existence [ASME PAPER 69-APM-7]
18 p3213 A69-34385

Nonlinear equations for elastic strain of circular-toroidal membrane shell under uniform pressure, computing stress and displacement fields
18 p3216 A69-34575

Ponderable annular region under symmetrically applied concentrated forces, obtaining solution for stress state by successive approximations
18 p3216 A69-34577

Growth rate of stability loss intrinsic modes in elastic shells under severe load, discussing stress distribution during buckling
18 p3217 A69-34598

Positive Gaussian curvature shell under concentrated forces, analyzing stresses and strains relation to load distance using Thompson and Legendre functions
18 p3218 A69-34601

Quadratic programming method for equations of elastic perfectly plastic solid applied to stress distribution in plate torsion and bending
18 p3218 A69-34661

Lightweight structural design problem of stress concentration associated with load diffusion in rectangular panels with constant stress flanges
18 p3219 A69-34785

Wing elastic strains effect on vertical velocity in downwash, noting wing tail combination
18 p3086 A69-34999

Stochastic failure models based on stress peak distributions, including randomly deteriorating strength model and increasing hazard reliability functions
18 p3148 A69-35079

Crack analysis in stiffened vibrating plate based on dynamic stress distribution, showing high bending stresses at intersection
18 p3223 A69-35168

Stress-strain state of open cylindrical shells with arbitrary cross section determined for clamped-clamped, clamped-free and free-free supported shells
18 p3225 A69-35372

Free oscillations of rigidly clamped circular plate carrying concentrated masses, deriving frequency equation and value of lower roots
18 p3226 A69-35377

Fatigue fracture due to heat generation in polycarbonate subjected to pulsating tensile load, presenting temperature change per unit stress increase
18 p3163 A69-35498

Fatigue characteristics of Al alloys by fatigue tests with complex stress patterns, finding secondary stress wave effects
19 p3342 A69-35712

Iterative algorithm applied to shell theory boundary value problem of stress concentrations at shallow shell holes
19 p3436 A69-35847

Two dimensional thermoelasticity problem for nonlinear media, obtaining solutions for thermal stress concentration and boundary value problems
19 p3436 A69-35848

Hollow cylinder plane stress-strain state analyzed for effect of variable modulus of elasticity of cylinder material
19 p3436 A69-35858

Nondestructive test method using transducer action of flaw in stress field causing plastic deformation with energy release as acoustic emission
19 p3314 A69-36634

Autocorrelation function for unsteady temperature and stress fields in bar located in gas stream leaving combustion chamber
19 p3440 A69-36685

Limiting equilibrium stress state of unbounded brittle body with elliptical crack under monotonically increasing tensile or compression load, noting influence of crack curvature
19 p3441 A69-36745

- Electroplating method for local stress concentrations determination, discussing measurement techniques, metal fatigue failure prediction, etc
19 p3441 A69-36751
- Micell type optimum fiber arrangement for transferring torque across annulus, considering single straight, double and multiple annular arrays under single load system
19 p3447 A69-36851
- Stress distribution in tension specimen notched on one edge obtained photoelastically for several notch depth to specimen width ratios, noting Neuber theory agreement
19 p3447 A69-36859
- Stress and strain concentration factors under initial stages of elastoplastic deformation for circular hole in infinite medium, using method of successive approximation
19 p3447 A69-36860
- Primary and tertiary uniaxial creep strain rate changes based on internal stress redistribution described with mathematical model
20 p3619 A69-36941
- Fractography of compact fracture toughness specimens failure, noting stress at fracture origin and crack growth rate
20 p3557 A69-36957
- Linearization of relationship between stress concentration factor and reciprocal of strain hardening exponent enabling shakedown to pressure vessels formulated by mathematical model
20 p3620 A69-37002
- Grade three strain-gradient elastic materials, deriving general solution to linearized field equations
20 p3621 A69-37073
- Stress distribution in finite and semifinite solid cylinders under end normal load, using Fourier-Bessel series
20 p3621 A69-37199
- Thermal stress concentration near elliptical hole in thin walled liquid filled cylindrical shell in presence of temperature gradient across shell cross section
20 p3622 A69-37325
- Residual tensile stress distribution during plasma spraying determined as function of temperature field in blank
20 p3548 A69-37328
- Axially symmetric distribution of residual strain in multilayered filament wound ring analyzed and compared with experimental results
20 p3628 A69-37774
- Transient thermal stresses in heat treated elastic-perfectly plastic disks with temperature dependent yield stress, considering stress distribution sequence and residual stresses
20 p3629 A69-37974
- Fatigue crack initiation in relation to contact stresses due to fretting, studying causes of strength reduction and crack inclination to surface
20 p3563 A69-38110
- Mean stresses effects on fatigue crack initiation and propagation under controlled fretting slip amplitude
20 p3563 A69-38111
- Radial and tangential stresses in double glass fiber assuming different Poisson coefficients, determining conditions for axial stress redistribution prevention
20 p3630 A69-38217
- Stress concentration near holes in three layer spherical shells, determining boundary conditions at hole perimeters for various loads
21 p3833 A69-38570
- Thermal stress distribution induced in wedge by apex heat source analyzed using elasticity theory, considering lateral surface heat transfer
21 p3833 A69-38644
- Flow stress temperature dependence of Ni-Cr-Al alloys consisting of gamma prime dispersion in Ni base solid solution
21 p3744 A69-38738
- Stress concentration and surface strain hardening effects on fatigue strength of refractory alloy specimens with and without cut
21 p3745 A69-38875
- Steady motion of frictionless indenters along surface of elastic layer in plane strain, using Fourier transform and Fredholm equations for numerical solution
21 p3837 A69-39155
- Solution procedure for torus with given surface loads or displacements, using series expansion of generalized analytical functions, discussing stress concentration near toroidal cavity
21 p3839 A69-39192
- Stability of unbounded homogeneous brittle body containing circular planform crack, determining elastic stresses and critical load by macrocrack propagation theory
21 p3839 A69-39195
- Levy-Mises equations for ideal plastic material derived from relationship between stress and rate of deformation tensors
21 p3840 A69-39287
- Dynamic stress concentrations and rigid body response of cylinder imbedded in elastic medium subjected to compressional wave
21 p3840 A69-39300
- Finite element relaxation method for computing stress distribution in thin walled structure, considering computer program, storage and solving time
21 p3843 A69-39313
- Creep accumulation under time varying stress of Al alloy sheet, using creep recovery analysis to determine anelastic strain growth
21 p3747 A69-39323
- Strain distribution on surface of adhesive bonded box beam in simple bending, using water based brittle coating and self adhesive strain gages
21 p3844 A69-39325
- Stress concentrations in metals determined through surface properties measurements, correlating local electrochemical potentials and metal-metal oxide junction parameters
21 p3747 A69-39326
- Fringe multiplication techniques for moire fringe arrays of inhomogeneous strain fields
21 p3845 A69-39328
- Corrosion and stress effects separation in stress corrosion of Al-Zn-Mg-Cu alloy, considering machined surface finishing role
21 p3747 A69-39435
- Fracture strength of glass fiber-reinforced cylinders made by unidirectional filament winding predicted by analyzing three dimensional stress distributions
21 p3846 A69-39795
- Cosserat theory on couple stresses applied to stress distribution in semiinfinite plate, using Fourier transform method
22 p4038 A69-39902
- Strain anisotropy matrices behavior along strain trajectories of arbitrary curvature, studying matrices and elastic constants dependence
22 p4039 A69-39914
- Strain anisotropy matrix construction for various strain trajectories from elastic properties of expression relating stress and elastic strain deviators
22 p4039 A69-39915
- Intersection plane stresses in internally pressurized cylindrical shells joined over elliptic face
22 p4040 A69-39978
- Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms
22 p4041 A69-40114
- Stress distribution on surface of stator vane loaded statically as cantilever derived by brittle coatings, strain gages and three dimensional photoelasticity
22 p4042 A69-40310
- Radial and tangential stress analysis of rotating disk during steady state creep, using equations solved by finite difference method
22 p4043 A69-40458
- Supersonic panel flutter boundary of buckled and unbuckled clamped rectangular plates, discussing in-plane stress effects
22 p3930 A69-40584
- Photoelastic technique of stress-freezing and slicing to determine bending stresses in transversely loaded plate supported at corners
22 p4045 A69-40900
- Strain induced creep equation for hardened materials for fixed temperature and stresses range, noting application to steel and Al alloys
22 p3971 A69-41033
- Meridional crack problem for cylindrical and spherical shells solved for uniform membrane load and bending moment, obtaining stress intensity components
22 p4046 A69-41041
- Yield condition and relation between stresses and strain rates for anisotropic body, allowing for influence of stressed state type
22 p3934 A69-41169
- Fittings stress distribution determined for optimization of material utilization
23 p4169 A69-41418
- Mounting elements alloys relaxation characteristics at various temperatures, considering effects of scale factor and stress concentrations
23 p4169 A69-41419
- Stress concentrations in circular plate with square hole subject to triaxial tension
23 p4227 A69-41712
- Stress concentration in shallow spherical perforated shell under loads, reducing boundary value problem to infinite algebraic equations solution
23 p4233 A69-42342
- Traction stresses distribution over contact surfaces using photoelastic frozen stress model
23 p4235 A69-42461
- Notch effect on corrosion fatigue behavior of high strength Al alloy under bending and direct stresses
24 p4330 A69-42553
- Local stress distribution in cylindrical shells at concentrated load area solved by shallow shell theory
24 p4395 A69-42593
- Eigenfunction expansion technique to analyze three dimensional crack and wedge problems, emphasizing stress field near straight edged crack
24 p4395 A69-42641
- Photothermoelastic investigation of thermal stress concentrations around circular cavities and inclusions in two dimensional composite models
24 p4396 A69-42739
- Interlaminar shear stresses in cross-plyed three ply symmetric laminated composite plate, analyzing interlaminar stress distribution under simple tension
24 p4399 A69-43052
- Contact stress distribution between two two-dimensional finite nearly rectangular elastic bodies with general surface configurations for surface load expressed in trigonometric series [ASME PAPER 69-APMW-9]
24 p4402 A69-43104

STRESS CORROSION

- Titanium alloy stress corrosion behavior in atmospheric salt environments at elevated temperatures related to aircraft engine part failures
01 p0099 A69-11056
- Atmospheric stress corrosion tests of aluminum alloys in various environments, comparing aging results with accelerated laboratory tests
01 p0100 A69-11352
- Welding with aluminum-zinc-magnesium alloys, discussing stress corrosion, embrittlement, compositions, heat treatment, material production and fabrication
02 p0266 A69-12063
- Corrosion rates and stress corrosion cracking sensitivity of explosively shocked austenitic stainless steels
03 p0444 A69-13308
- Surface preparation effect on stress corrosion cracking of type 310 stainless steel wires in boiling aqueous magnesium chloride solutions
03 p0444 A69-13311
- Salt water stress corrosion cracks morphology in titanium alloy, discussing crack propagation, brittle nature and chloride contamination effect
03 p0444 A69-13458
- Brittle surface films role in stress-corrosion phenomena in various environments
03 p0448 A69-13873
- Consumable electrode vacuum melted steels, discussing ausforming and stress corrosion cracking
04 p0604 A69-14528
- Heat treatment effects on stress corrosion cracking resistance of Al-Zn-Mg alloys, using cantilever loading in aqueous solution
04 p0617 A69-14933
- Stress corrosion crack initiation in aluminum alloy observed by optical microscopy
06 p0944 A69-17855
- Electrochemical kinetic and mass transport model for studying stress corrosion crack propagation in Ti [ECS PAPER 147]
08 p1332 A69-20359
- Grain morphology and preferred orientation effects on direction and propagation of stress corrosion cracking of aluminum alloy plate
09 p1521 A69-21399
- Crystallographic fracture path of stress corrosion cracks in austenitic stainless steels using scanning electron microscopy
09 p1522 A69-21486
- Stress corrosion of nonage-hardenable Al-Mg-Cr alloy investigated for failure in absence of grain boundary precipitate, using notched specimens
10 p1709 A69-23055
- Fracture surfaces of Ti and Ti-Sn alloys for stress corrosion cracking in methanol with HCl and in aqueous chloride solutions
10 p1710 A69-23085
- Transgranular stress corrosion crack propagation in thin sheet single phase magnesium-aluminum alloy
10 p1710 A69-23086

Stress corrosion cracking of Ti-6Al-4V alloy tensile tested in anhydrous methanol by electron fractography and diffraction, noting hydrogen embrittlement
11 p1903 A69-24576

Stress corrosion cracking of titanium alloys in contact with high temperature fuel tank sealants
12 p2112 A69-25945

Incipient stress corrosion damage detection in aluminum alloys, using Rayleigh wave attenuation
12 p2114 A69-26306

Microscopic mechanisms in fracture surface markings, using electron fractography cleavage, fatigue, stress corrosion cracking, microvoid coalescence and tear ridge formation
13 p2274 A69-27224

Structural modes of fracture, analyzing brittle, ductile, fatigue and stress corrosion fractures using fractography
13 p2274 A69-27226

High strength alloys stress corrosion cracks, analyzing tensile ligament instability from plastic flow tests of bulk/compression/specimens
13 p2277 A69-27404

Stress corrosion crack initiation and propagation in titanium alloy
13 p2282 A69-28165

Cleavage plane in stress corrosion cracking of alpha phase Ti-Al alloys
13 p2283 A69-28189

Stainless steels stress corrosion susceptibility, detecting chromium carbide in martensitic matrix by galvanic nondestructive test method
14 p2466 A69-29935

Stress corrosion preventative metal-pigmented paints for titanium alloys, discussing chemicals added to increase cathodic potential
14 p2469 A69-29936

Stress corrosion cracking prevention by shot peening, considering aircraft industry applications
14 p2466 A69-29937

Stress corrosion in smooth and prenotched maraging steels exposed to sodium chloride solution and natural sea water
14 p2467 A69-29940

Electrochemical test predicting stress corrosion performance of 2219 aluminum alloy in T851 and T87 tempers
16 p2798 A69-31716

Failure mechanism for intergranular stress corrosion cracking of vacuum annealed unalloyed Ti in alcohol iodine solutions
16 p2798 A69-31717

Stress corrosion resistance of AlZnMgCu and AlZnMg alloys, discussing combinations of alloy composition, heat treatment and stable precipitation conditions
16 p2800 A69-31779

Ti alloys commercial applications and properties, discussing alloying elements influence, deformability, weldability, stress corrosion and market trends
16 p2801 A69-31784

Stress corrosion cracks investigation by shear wave technique
16 p2876 A69-32334

Ti-Al base alloys brittleness and stress corrosion cracking, discussing diffusion mechanism, hydrogen mobility, dislocations, etc
17 p2987 A69-33372

Heat treatment effect on stress corrosion cracking of ternary Al-Zn-Mg alloys noting aging strength, solution temperature, quenching rate and alloy content
17 p2990 A69-33676

Ti-6Al-4V alloy general and stress corrosion behavior in Freon environments, discussing fracture mechanics
18 p3150 A69-35411

Be and BeAl alloy stress corrosion behavior in aqueous NaCl solution, discussing metallography and electron fractography
19 p3341 A69-35572

Cyclic stress frequency on mild steel corrosion fatigue tests, showing strength dependence on potential and stress current
19 p3342 A69-35775

High strength titanium alloys subcritical stress corrosion crack propagation, studying stress and environment effects on cleavage mode
19 p3343 A69-35922

Stress corrosion cracking - Conference, Columbus, Ohio, September 1967
19 p3347 A69-36883

Stress corrosion cracking research, history, engineering and education, incorporating stress corrosion data in mechanical design, terminology and nomenclature
19 p3348 A69-36884

Stress corrosion cracking of metals related to surface phenomena involving surface reaction layer ruptures or selective electrochemical dissolution along defects
19 p3349 A69-36885

Dislocation effects on stress corrosion of metals, discussing behavior of porous structure and metal/corrosion film interface under applied stress
19 p3349 A69-36886

Stress corrosion cracking mechanisms in liquid-solid metal combinations and solvent exposed plastics, discussing adsorption processes and cathodic polarization inhibition
19 p3349 A69-36887

Linear-elastic fracture mechanics applied to environment enhanced crack growth/stress corrosion cracking/
19 p3349 A69-36888

Interface electron transport phenomena in stress corrosion, expressing defect movements in terms of electron energy dynamics
19 p3349 A69-36889

Stress corrosion cracking of stainless steels and Incoloy and Inconel alloys in chloride, caustic, oxygenated and miscellaneous environments
19 p3349 A69-36890

Fracture surfaces of stress corrosion cracks in Fe-Cr-Ni alloys studied by electron microfractography, noting cleavage fracture
19 p3350 A69-36891

Stress corrosion cracking in stainless steel foils correlated with stacking fault energy and ordering, emphasizing environmental forming tendencies
19 p3350 A69-36892

Crack growth in steel tested in hydrogenated condition, distilled water and in combination by acoustic emission, relating time intervals to hydrogen diffusion
19 p3350 A69-36893

Hydrogen embrittlement mechanism in steel based on modified pressure theory, discussing crack propagation mechanisms and stress corrosion cracking
19 p3350 A69-36894

Stress corrosion cracking mechanism in Al alloys, discussing requisites for stress corrosion cracking
19 p3350 A69-36895

Aluminum 7 percent Mg alloys stress corrosion cracking, presenting aging kinetics and depletion zone dislocations at grain boundaries
19 p3350 A69-36896

Stress corrosion cracking model for 7075 Al, correlating macroscopic yield stress and corrosion time to failure
19 p3351 A69-36897

Precipitation hardening, microstructure and dislocation influence on intergranular stress corrosion cracking /SCC/ of high strength Al alloys examined by transmission electron microscopy
19 p3351 A69-36898

Electrochemical analysis of stress corrosion cracking in Al-Zn-Mg alloy, noting oxide film growth at grain boundary
19 p3351 A69-36899

Ti and Ti alloys stress corrosion cracking, discussing metallurgical and environmental factors
19 p3351 A69-36900

Titanium alloys stress corrosion cracking in presence of chloride, bromide and iodide under potentiostatic conditions, postulating electrochemical kinetic and mass transport model
19 p3351 A69-36901

Titanium alloys stress corrosion cracking /SCC/ from metallurgical-mechanical viewpoint, discussing phase transformations, dislocation arrangements, crack propagation, etc
19 p3352 A69-36902

Metallographic analysis of stress corrosion cracking of Ti alloys of Al and Sn in aqueous magnesium chloride solutions, noting cleavage process
19 p3352 A69-36903

Moisture and hydrogen role in hot chloride salt stress corrosion cracking of Ti alloys by radiotracer technique and mass spectrography
19 p3352 A69-36904

Titanium alloys hot salt stress corrosion cracking, studying effects of chlorides and surface oxides
19 p3352 A69-36905

Stress corrosion cracking of alpha Ti in liquid nitrogen tetroxide and various methanol environments, considering failure mechanisms
19 p3352 A69-36906

Ti alloy stress corrosion susceptibility in salt water, alcohols and alkanes, comparing stress intensity for crack propagation in dry air
19 p3353 A69-36907

Singular factors affecting stress corrosion cracking resistance of Ti alloys in salt water and hot salt, finding immune single phase alloys
19 p3353 A69-36908

Alpha and alpha plus beta Ti alloys analyzed to relate phase composition and microstructure to stress corrosion cracking in NaCl solution
20 p3557 A69-36961

Seam welded Al alloy aircraft structure fabrication problems, emphasizing stress corrosion
[SBAC PAPER 5]
20 p3550 A69-37454

Design and processing tradeoffs for preventing stress corrosion cracking in Al alloy aircraft structural forgings
[ASM PAPER W9-14.4]
21 p3729 A69-38655

Stress corrosion cracking of alpha and alpha-beta Ti alloys in aqueous environment at ambient temperature, noting Al content and microconstituents
21 p3743 A69-38662

High strength steel landing gear components corrosion protective finishes, discussing paint over bare steel, porous Cd plating and vacuum deposited Cd
21 p3743 A69-38730

Hot salt stress corrosion of Ti alloy, discussing hydrogen generation during elevated temperature exposure and embrittlement as manifestation of strain rate
21 p3747 A69-39434

Corrosion and stress effects separation in stress corrosion of Al-Zn-Mg-Cu alloy, considering machined surface finishing role
21 p3747 A69-39435

Galvanostatic anodic and cathodic currents effects on stress corrosion of Be sheet in aerated synthetic sea water at 72 F
21 p3747 A69-39436

Temperature, applied stress and pressurization effects on materials corrosion by liquid F and F containing oxidizers
21 p3748 A69-39485

Stress corrosion cracking prevention by selection of material, stress relief, compressive stresses introduction, protective coatings and by simulated accelerated tests
21 p3748 A69-39490

Stress corrosion cracking in aerospace situations, discussing corrective measures emphasizing fracture toughness criteria
21 p3748 A69-39491

Stress corrosion cracking of welded Al alloys in sea water solution, showing combined action of sustained stress, corrosive environment and heat treatment
21 p3748 A69-39492

Forged corrosion in aqueous salt environment at various temperatures in unstressed and stressed conditions, considering Be usability in turbomachinery
21 p3749 A69-39493

Stress history and corrosive environment effects on fatigue crack propagation under constant and varying stress amplitude
21 p3750 A69-39814

Large diameter bolts in aircraft structures resisting hydrogen embrittlement and stress corrosion, noting fatigue properties
22 p3957 A69-40827

Stress corrosion cracks propagation from fatigue precrack in Al alloy exposed to organic liquid environments
23 p4178 A69-42452

Aerospace systems failures caused by stress corrosion, fatigue, overload, improper designing or inadequate processing control
24 p4323 A69-43428

STRESS CYCLES

Cycle dependent fatigue hardening and softening of metals in terms of crystal structure and stress amplitude
01 p0165 A69-10133

Plastic fatigue life of steel under rotary bending, proposing fracture criterion based on strain amplitude for low cycle stress levels
02 p0346 A69-12421

Stress variation cycles pattern effects on fatigue strength of materials, discussing results of low-carbon steel tests under sinusoidal loading
04 p0673 A69-14535

Random cumulative damage theory for fatigue failure of steel under sinusoidal loading taking into account randomness of time to failure and possession of memory
04 p0680 A69-15154

Moment curvature models under reverse cyclic straining developed from stress-strain curves for rectangular beams
04 p0683 A69-15497

- Course slip during cyclic deformation of copper single crystals, discussing strain bursts dependence on stress amplitude rate, unidirectional prestrain and orientation
05 p0779 A69-15905
- Generation of crack propagation data on notched rotating beam specimens by interrupted stressing techniques
[ASME PAPER 68-WA/MET-3]
05 p0838 A69-16148
- Heating effects produced by periodic stresses in viscoelastic bodies with resonance dispersion, considering torsional oscillations of viscoelastic cylinders
06 p1019 A69-16826
- Superimposed stress of higher frequency and rotating bending stress effects on aluminum alloy
06 p0941 A69-17121
- Fatigue damage of metals under cyclic stressing, noting deformation modes dependence on stress amplitude and material type
07 p1166 A69-19215
- Forging and heat treatment parameters effect on Ti-Al-V alloy low cycle fatigue properties, relating crack initiation and propagation rates to microstructures
[ASM PAPER D8-24.4]
07 p1169 A69-19669
- Microstructural changes in 52100 steel bearing inner rings during cyclic stressing, obtaining thickening rate data on white-etching regions and lenticular carbides
08 p1319 A69-20004
- Tensile strength of glass-fiber reinforced epoxy resin laminates subjected to fluctuating tension, discussing crack density dependence on fatigue stress cycles
08 p1338 A69-20494
- Aircraft reliability under cyclic loads in flight taking into account stress fluctuations
08 p1322 A69-21106
- Fatigue life evaluation by programmed fatigue strength tests, using frequency distribution of load set amplitudes
09 p1620 A69-22573
- Existing predictive methods for determining high temperature low cycle fatigue life reexamination based on experiments on nickel
10 p1796 A69-23068
- Mechanical model for fatigue crack propagation assuming propagation as function of material strain cycling at crack tip
10 p1797 A69-23082
- Low cycle fatigue of metals under biaxial strain, considering specimen life and strain amplitude correlation
10 p1797 A69-23083
- Cyclic stress-strain and fatigue behavior in aircraft structural metals, discussing hardening and softening in aluminum alloys, steels and titanium alloys
10 p1714 A69-23981
- Cyclic stress-strain curve of metals determined using companion specimens, step strain tests, monotonic tension and hysteresis loop analysis
10 p1715 A69-23982
- Cyclic deformation resistance and fatigue damage accumulation in aluminum alloys, aircraft steels and titanium alloys
10 p1715 A69-23983
- Metal fatigue at elevated temperatures concerning viscosity, energy loss and stress, strain and temperature cycling
10 p1803 A69-24043
- Hysteresis loop contour equation derivation based on energy dissipation dependence on stress amplitude in cyclically deformed vibrating system
11 p1985 A69-25176
- Hydrostatic pressure-cycling technique for controlled fatigue precracking of spin burst fracture toughness specimens, noting ultrasonic flaw detection
11 p1995 A69-25650
- Slip band extrusions in hexagonal close packed Cd, Mg and Ti subject to cyclic stresses, noting microstructure changes
12 p2116 A69-26912
- Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages
13 p2359 A69-27291
- Fatigue cracks growth rate under combined static and cyclic stresses
15 p2709 A69-30808
- Fatigue crack propagation caused by cumulative damage due to strain cycling at crack tip, relating resistance to cyclic ductility
15 p2710 A69-30812
- Fatigue life estimation for irregularly varying loads with emphasis on ground-air-ground stress cycles in aircraft
17 p3052 A69-32977
- Facility for determining energy dissipation in materials under cyclic stresses or strains for wide range of temperatures
17 p2946 A69-33925
- Energy dissipation in fiberglass reinforced plastics subjected to axially induced sinusoidal stresses, noting absorption coefficient and hysteresis heating
17 p2993 A69-33937
- Low cycle fatigue leading to failure on AISI 321 stainless steel as function of elevated temperature and stressing frequency
18 p3219 A69-34834
- Cyclic stress frequency on mild steel corrosion fatigue tests, showing strength dependence on potential and stress current
19 p3342 A69-35775
- Recrystallization in thoria dispersed Ni sheet as function of strain-anneal cycles, using electron transmission technique quantitative determination
20 p3557 A69-36958
- Apparent dynamic modulus and damping under multilevel loading during fatigue cycling to estimate stainless steel specimens cumulation fatigue lives
20 p3620 A69-36997
- Supersonic aircraft and power plant structural members operating under cyclic stress at elevated temperatures tested by various methods for interaction between creep and fatigue
20 p3620 A69-37001
- Thermal fatigue combined with mean stress, reversed mechanical stress, low cycle fatigue and static creep in stainless steel
21 p3847 A69-39813
- Cyclic stress tests of stainless steel fiber Al alloy matrix composite, including strain hardening and stiffness characteristics
24 p4331 A69-42925
- STRESS FUNCTIONS**
- Stress function formulas in asymmetric theory of elasticity obtained by completeness method
01 p0167 A69-10325
- Basic equations for optimum inhomogeneity in pressure vessels of maximum rigidity derived, using thick walled spherical shell
01 p0167 A69-10326
- Energy function invariants for cubic and hexagonal systems of anisotropic media with coupled stresses
01 p0169 A69-10811
- Plane problem of asymmetric elasticity based on biharmonic and Helmholtz equation for stress functions
04 p0667 A69-14267
- Variational theorems for stress function formulation of boundary value problems in linear theory of thin elastic shells
04 p0678 A69-14894
- Finite plane deformation of solid body, arbitrary deformation law and arbitrary hydrostatic stresses dependence on volume change solved by nonlinear equation
06 p1021 A69-17175
- Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function
06 p1021 A69-17177
- Numerical method for stress function of elastic-plastic torsion of hollow bars during quasi-static monotonic twist compared with relaxation method solution
06 p1023 A69-17370
- Castigliano variational principle applied to thermal stresses in rectangular plate by expanding stress function in double series of cosine binomials
08 p1419 A69-21178
- Beta parameter in exponential stress dependences of high temperature steady state creep rate and time to rupture of creep resistant alloys
10 p1712 A69-23719
- Back stress role in strain rate equation for high temperature deformation and study of structure and applied stress effects
11 p1987 A69-25388
- Love stress function derivation from equilibrium equations
13 p2364 A69-28233
- Maximum turbulent stress in turbulent two dimensional boundary layers leading to general stress law, designing experiment to confirm validity
16 p2769 A69-31832
- Loading path criterion for total strain /deformation/ plasticity theory based on Sanders loading function, discussing case of thermally loaded bar
17 p3062 A69-33711
- Longitudinal crack in cylindrical shell under internal pressure, calculating normal and bending stress singularity strengths against curvature/ cracklength parameter
18 p3212 A69-34346
- Completeness and relations between potentials and stress functions in micropolar elasticity and thermoelasticity
19 p3439 A69-36476
- Generalized Love functions in axisymmetric micropolar elasticity, deriving stress functions expressing all state components
19 p3440 A69-36585
- Transverse stiffness and strength of unidirectional fiber-reinforced composites determined as function of fiber volume content, using finite element method and stress functions
20 p3623 A69-37354
- Homogeneous equilibrium equations of nonlinear shallow shell theory, obtaining six stress function solutions for strain measures
22 p4048 A69-41199
- Plate and shell structures static and dynamic analysis by generalized variational principles in finite element method, discussing element displacement functions
[AIAA PAPER 68-290]
23 p4227 A69-41882
- STRESS MEASUREMENT**
- NT X RAY STRESS MEASUREMENT**
- Torsional pendulum for stress and strain relaxation measurements of wire sample
01 p0079 A69-10221
- Strain measurements in pure polycrystalline Ti at constant temperature and strain, considering creep and elastic aftereffects
01 p0101 A69-11363
- Lattice deformation relationship to dislocation density in vanadium carbide powders
02 p0265 A69-12001
- Free surface motion and stress measuring instrumentation, describing plate impact one dimensional strain configuration for determining mechanical properties under stress wave propagation
02 p0344 A69-12290
- Second normal stress difference measurement by annular flows, giving approximate method for experimental data inversion
02 p0234 A69-12604
- Inelastic strain measurement in metals during cyclic loads by impact tester
04 p0674 A69-14539
- Glued metal joints under cyclic loading evaluated by change in short term strength as function of time at stress levels
04 p0605 A69-14540
- Delayed rupture strength of metals and welded joints at fixed stress level
04 p0674 A69-14541
- Uniaxial loading effect determination by change of harmonics amplitude of inductive pickup signal
05 p0763 A69-15995
- Crack tip displacements and strains in plastically yielded region measured with replica technique
05 p0780 A69-16437
- Strain near fatigue crack tip in notched steel plates measured by copper electroplating method
06 p1022 A69-17198
- Nondestructive technique to measure residual and working stresses in machine parts, using specially designed circuit
06 p0926 A69-17497
- Chromium steel /E1961/ susceptibility to structural damage under cyclic loads by nondestructive inspection of magnetic hysteresis and eddy current losses
07 p1141 A69-19316
- Brittle fracture models compared with experimental stress analysis results, noting plane strain and plane stress fracture toughness
07 p1234 A69-19379
- Stress-strain-time relations in magnesium alloy and aluminum plate impact load tests, discussing stress measurement, Hugoniot equation of state, yield point and dynamic response
08 p1330 A69-20102
- Plastic strain intensity distribution in aluminum alloy specimen with central hole measured with marked orthogonal lattice
09 p1617 A69-22221
- Ultrasonic technique for metal surface and near surface residual stress measurement, emphasizing aluminum alloys
10 p1794 A69-23052
- Experimental evidence of validity of shear coefficient in Timoshenko beam theory
10 p1801 A69-23538

Elastic-plastic deformations /strains/ amplitudes measured at high cycle temperatures in thermal fatigue tests

10 p1801 A69-23844

Direct measurement device for metallic material response to mechanical stresses from stress force and global displacement /including material deformation/

11 p1884 A69-24757

Optical investigation of defects in crystal lattices on stress induced birefringence basis, describing stress visualization results for Si and glass

11 p1887 A69-25199

Floating element skin friction meter designed for adverse pressure gradients, discussing wall shear stress measurement

11 p1889 A69-25557

Wall shear stress measurement by evaporating liquid film, determining optimum liquid viscosity

13 p2375 A69-27793

Machine for measuring creep deformation of polytetrafluoroethylene under uniaxial compressive loads, discussing stress-strain relationship

14 p2469 A69-29412

Stainless steel biaxial residual surface stresses from grinding and finish machining determined by dissection technique

[ASME PAPER 68-WA/MET-9]

14 p2455 A69-29437

Fluctuating turbulent stress measurements in mixing layer of two dimensional jets including intensity, spatial correlation and wave-number fluctuating stress frequency spectra

14 p2431 A69-29577

Box girders stress distribution analyzed by stress-freezing method compared with photoelastic measurement

15 p2705 A69-30419

Clevis design for reduced friction errors associated with round hole clevis in plane strain fracture toughness measurements

15 p2612 A69-31150

Uniaxial stress effect in Schottky barrier diodes measured by beam balance noting higher sensitivity

16 p2758 A69-31619

X ray diffractometer stress analysis of WC-Co cermets, discussing surface preparation and heat treatment

16 p2802 A69-32339

X ray analyzer for residual stress measurement applied to quality control

18 p3150 A69-35423

Skin friction balance for shear stress measurements in presence of ablation, describing balance construction, calibration, flexure range, etc

19 p3292 A69-35735

Electroplating method for local stress concentrations determination, discussing measurement techniques, metal fatigue failure prediction, etc

19 p3441 A69-36751

Keyway stresses in shafts under tension, bending and torsion, using frozen stress photoelastic technique

19 p3445 A69-36827

Stress determination in materials with creep in presence of nonuniform temperature field

21 p3833 A69-38571

Telecentric lens principle for accurate optical strain measurements, using moire grids

21 p3844 A69-39322

Stress concentrations in metals determined through surface properties measurements, correlating local electrochemical potentials and metal-metal oxide junction parameters

21 p3747 A69-39326

Strain gage embedding techniques and applications

21 p3725 A69-39327

Stress history and corrosive environment effects on fatigue crack propagation under constant and varying stress amplitude

21 p3750 A69-39814

Grids applied to plastic samples for strain measurement using moire fringe method, comparing tensile test results with Linley extensometer

22 p4042 A69-40312

Babinet compensator with birefringent wedges made of stress frozen photoelastic material rather than quartz

22 p4042 A69-40442

Three dimensional welded structure of thin walled girders with stability loss, discussing welding strain gage measurements and simplified computational procedure

23 p4169 A69-42007

Mechanical stress measurement in cylindrical steel subjected to loads inside coaxial transducer, using transducer signal in contactless eddy current method

24 p4296 A69-42654

Real shear modulus and mechanical damping characteristics of cured adhesives measured for temperature effect, using torsion pendulum apparatus

24 p4338 A69-43460

STRESS PROPAGATION

Photoelastic analysis of HF stress waves propagating in bars and plates subjected to damped sinusoidal loading

[ASME PAPER 68-WA/APM-27]

04 p0669 A69-14397

Longitudinal stress pulse propagation in finite length free-free bar with variable cross section, noting stresses in projectile impacting plane target

04 p0671 A69-14412

Thermal stress propagation in infinite viscoelastic thin plate analyzed with cylindrical coordinate system

08 p1415 A69-20661

Two dimensional elastic stress wave propagation in thick multilayered cylindrical shells for nonuniform external pressure distribution

11 p1991 A69-25511

Stress wave propagation in thermoviscoelastic solids using extended Ritz method

11 p1993 A69-25527

Stress waves propagation through elastic-plastic medium with uniaxial displacement, discussing wave interactions and interface conditions

16 p2870 A69-31809

Elastic circular cylindrical panel behavior in fluid with acoustic shock wave, allowing for propagation waviness of elastic stresses

18 p3216 A69-34579

Stress and displacement waves propagation in thin walled elastic cylindrical shell under compressive axisymmetric force based on momentless theory

18 p3218 A69-34600

Dynamic processes in upper earth mantle, discussing thermal convection currents and stress propagation

22 p3937 A69-40184

STRESS RATIO

Uniaxial strain static and gas gun compression tests result compared for syntactic foam

02 p0345 A69-12295

Axial load fatigue crack propagation tests on Al alloy sheets for stress ratio effects

19 p3346 A69-36435

STRESS RELAXATION

Torsional pendulum for stress and strain relaxation measurements of wire sample

01 p0079 A69-10221

Hydrogen content effect on relaxation spectrum of alpha titanium, using nondestructive tests

01 p0096 A69-10614

Anomalous discontinuous stress relaxation in sintered tantalum

02 p0265 A69-12003

Recovery behavior of nickel strain hardened by impact loading by aluminum projectiles, showing microstructure correlation with stress levels

03 p0447 A69-13620

Strain dependent modulus and Poisson ratio behavior of CTPB propellant, performing stress relaxation tests

[AIAA PAPER 68-519]

04 p0646 A69-15510

Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane

[ASME PAPER 68-WA/APM-8]

05 p0839 A69-16186

Nimonic alloys recovery analyzed by X rays and electrolytic phase separation, showing precipitated gamma phase effect

07 p1159 A69-18533

Diffusion coefficient of interstitial oxygen atoms in tantalum by elastic energy dissipation measurements as temperature function, discussing relaxation effect

07 p1168 A69-19452

Stress relaxation in structural elements, analyzing unsteady creep in case of strain hardening following power law

07 p1237 A69-19683

Ductility as principal cause of postweld heat treated stress relaxation cracking in nickel based Waspaloy and alloy 718

08 p1318 A69-19964

Generalized approximate method for solving problems in linear viscoelasticity theory to cover arbitrary creep and relaxation centers

08 p1412 A69-20327

Modulus of elasticity changes and stress relaxation spectra of viscoelastic liquids measured by acoustic methods

11 p1887 A69-25206

Tension stress and shearing strain vs time for simultaneous stress relaxation and creep in polyurethane

[ASME PAPER 68-WA/APM-8]

13 p2362 A69-28121

Stress level reduction in pressurized circular cylinder with circumferential ring stiffener and longitudinal crack, using shallow shell equations

18 p3212 A69-34347

Stress relaxation of heat-resistant steels as function of equal stress during different elevated temperatures, applying results to time residual stress prediction

19 p3342 A69-35778

Strain hardening of titanium wire during room temperature stress relaxation shown equal to strain hardening during constant strain rate test

19 p3342 A69-35812

Elastic interactions between cylindrical shell and added band reinforcement turns, analyzing stress relaxation magnitude and effect on pressure vessel design

20 p3621 A69-37064

Creep resistance increase of Ni refractory alloy by thermovibrational treatment under stress relaxation conditions

21 p3744 A69-38869

Thermal and athermal component of flow stress and deformation dynamics for Ti at low homologous temperatures determined by stress relaxation tests

21 p3749 A69-39598

Structural defects of neutron irradiated W wire noting microstress relaxation using autoionic microscope

21 p3749 A69-39623

Time-temperature method modified for combining stress relaxation data with stress or strain into single correlation curve, analyzing isothermal relaxation data

21 p3846 A69-39812

Short period creep and relaxation in various heat resistant alloys under heat treatments and loads, determining temperature dependence of cyclic thermal instability

22 p3969 A69-40071

Reinforcement effect on stress relaxation and creep in hereditary elastic materials, assuming integral shear modulus operator with exponential kernel

22 p4045 A69-40744

Mounting elements alloys relaxation characteristics at various temperatures, considering effects of scale factor and stress concentrations

23 p4169 A69-41419

STRESS RELIEVING

Compact device for low temperature neutron irradiation of deformed specimens under tensile stress, emphasizing specimen carrier

11 p1862 A69-24901

Macrostructure of steel, zinc and aluminum ingots using electromagnetic vibrations during crystallization, for stress relieving of welded structures

14 p2456 A69-29916

Rotating shafts impact damping efficiency increaseable by providing proper clearance to reduce shaft stress in critical resonance frequency region

17 p3066 A69-33946

Stress corrosion cracking prevention by selection of material, stress relief, compressive stresses introduction, protective coatings and by simulated accelerated tests

21 p3748 A69-39490

STRESS RUPTURE STRENGTH

U CREEP RUPTURE STRENGTH

STRESS-STRAIN DIAGRAMS

Stress-strain state of isotropic elastic medium using equations with stress tensor, noting role of curvilinear hole

01 p0164 A69-10081

Hollow finite cylinder stress-strain analysis under normal loads on end faces solved by four partial differential equations

01 p0168 A69-10359

Stress-strain behavior of crazes in glassy polymers, discussing crack propagation, craze formation and failure and molecular weight effects

01 p0102 A69-10915

Elastoplastic stress-strain behavior of concentric composite cylinders under uniaxial tension using analytical model, predicting transverse stresses during axial loading

01 p0171 A69-11263

Wave front profiles sensitivity to form of constitutive equation in one dimensional stress problem

02 p0344 A69-12291

Rapidly heated ablative reinforced plastics strength and stress-strain properties, considering heat shield designs

02 p0347 A69-12512

Knee in stress-strain diagram and crack formation in glass fiber reinforced plastics, discussing effect on construction load capacity

03 p0453 A69-13820

Elastoplastic bending of plates with nonlinear stress-strain diagram

04 p0667 A69-14269

Elastic noncircular orthotropic conical shell stress-strain state, obtaining differential equations reducible to integrodifferential equations solvable by iteration

04 p0673 A69-14494

Circular disk stress-strain state due to thermoelastic strain applied at disk sector edge

04 p0681 A69-15171

Moment curvature models under reverse cyclic straining developed from stress-strain curves for rectangular beams

04 p0683 A69-15497

Stress-strain state of thin elliptical shell of revolution under rapidly varying cyclic edge loads

05 p0832 A69-15686

Unified theory of stress-strain curve of fcc metal crystals in Stages II and III of work hardening

05 p0778 A69-15755

Stress-strain rate relation under combined stress fields derived from Gilman relation between dislocation velocity and force for single dislocation

05 p0834 A69-15756

Elastic plastic stress distribution in compressed ring determined with postyield strain gages and stress-strain relationship from uniaxial tensile test

05 p0837 A69-16063

Stress-strain state for two dimensional physically nonlinear multiply connected elastic regions, noting plate with two identical circular holes

05 p0841 A69-16203

Elastoplastic stress-strain state of asymmetric profile thin walled beam under mobile load

05 p0841 A69-16205

Stress-strain state of infinite plate with two holes of different diameter solved, using integral equation derived for two dimensional problem in elasticity theory for anisotropic medium

05 p0843 A69-16680

Stress-strain state of shell having one end clamped and other under concentrated bending moments and concentrated force acting along generatrix solved by integral equation

05 p0843 A69-16681

Large displacement bending of rods for constant deformation cross section, negligible shearing forces and exponential stress-strain relation

05 p0843 A69-16682

Stress calculation for internal pressure in moment-less shell of revolution

05 p0843 A69-16690

Basic equations describing stress-strain state of anisotropic half planes and anisotropic planes with cuts

06 p1020 A69-16827

Metal matrix composites compression microstrain behavior, analyzing continuous fiber composites of magnesium-boron and copper-tungsten

06 p0939 A69-16945

Stress direction and mean stress effects on fatigue properties of fiberglass reinforced plastics

06 p0945 A69-17124

Griffith crack in brittle material, discussing validity for rock-like material with nonlinear stress-strain relationship

06 p1020 A69-17128

Stress-strain relations for laminar anisotropic medium from known mechanical properties of layers for application to fiber reinforced plastics

06 p1021 A69-17176

Stress-strain state of shells of multicable elevator pulleys under asymmetric load for various friction coefficients and pulley shell lengths and widths

06 p1026 A69-18016

Stress-strain response up to ultimate failure and ultimate strength of laminated composite with nonlinear orthotropic lamina

07 p1170 A69-18710

Stress-strain relationship of composite bars consisting of single glass fiber with thin metal coating layer and under axial load

07 p1235 A69-19385

Minimum theorems in elastoplastic theory extended to continua for plastic strains governed by holonomic and nonholonomic stress-strain laws

07 p1235 A69-19442

Cr-Ni-Mo steel toughness with strain induced austenite to martensite transformation by TRIP/transformation induced plasticity/

08 p1330 A69-20012

Continuum stress/plastic strain relations from Schmid Law of plastic slip in individual crystal grains

08 p1414 A69-20525

Flow equations of rheological media derived using thermodynamics, assuming nonlinear stress-strain relation in incompressible medium

08 p1419 A69-21074

Stress-strain problem of geometrically nonlinear conical shell subjected to creep, giving method for complex deformation solution

09 p1612 A69-21497

Finite elastic locking medium, discussing equation of state for thermodynamic variables and applications to thermoelasticity [IS-ERI-70]

09 p1612 A69-21561

Stress-strain state of infinite plate with elliptical eccentric reinforced hole, using quadrature method

09 p1613 A69-21630

Ordinary and inverse variational methods for stress-strain state of solid body, using Lagrange multipliers to reduce variational problem

10 p1793 A69-22885

Strain fatigue mechanism of crack propagation in ductile metals, considering distribution of plastic cohesive stresses at crack tip

10 p1795 A69-23059

Ductile to brittle transition shown in tensile stress-strain curves of polycrystalline body centered cubic and hexagonal close packed materials

10 p1795 A69-23063

Elastomeric solid propellant grains viscoelastic flow, analyzing stresses and strains under various operating conditions and rocket engine geometry effect

10 p1801 A69-23702

Cyclic stress-strain curve of metals determined using companion specimens, step strain tests, monotonic tension and hysteresis loop analysis

10 p1715 A69-23982

Axisymmetric problems in thermoviscous plasticity, discussing stress-strain state of annular disks and thick walled cylinders made of rate sensitive materials

10 p1802 A69-24025

Semibrittle material decompaction influence on stress distribution in infinite plate with edge loaded circular hole, noting stress-strain relation nonlinearities

11 p1972 A69-24656

Limiting equilibrium of plate weakened by curvilinear hole stress raiser with one or two cusps, obtaining stress-strain diagrams

11 p1973 A69-24658

Linear shell theory foundations, discussing two and three dimensional stress strain relations, couple stresses, circumferential length ratio to shell thickness, etc

11 p1977 A69-24803

Two dimensional elastic reinforcements effects on stress, strain and elasticity of quasi-homogeneous anisotropic elastic medium

11 p1981 A69-24941

Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects

11 p1981 A69-24943

Stress-strain state of shells with opposite edges hinged and rigidly clamped solved by numerical method after reduction to boundary value problem

11 p1985 A69-25174

Bent plates elastoplastic stress-strain state determination by elastic solution and finite differences, considering linear strengthening under uniform distribution of load

11 p1985 A69-25175

Comparison of errors obtained by using linearly gliding and rotating strengthening moduli in stress-strain state on basis of linear stepwise approximation

11 p1986 A69-25342

Fiber reinforced materials shear and tensile strength effect on stress-strain state of composite materials machine parts, considering design requirements

11 p1907 A69-25680

Optimal additional loading at zero moment stress-strain state in simply connected shell of complex design under external loads, using successive approximation

12 p2181 A69-26610

Natural stress concept for analysis of nonhomogeneous strains fields exhibiting geometrical nonlinearity

13 p2359 A69-27259

Volterra integral equation with nondifference type singular kernel for stress-strain state in long hollow viscoelastic cylinder with moving inner boundary

13 p2361 A69-27744

Fatigue crack propagation in aged aluminum alloy sheets, studying specimen geometry and stress level variations effects

13 p2280 A69-27835

Spacecraft construction materials and strength problems including stress-strain determination, thin shell structural stability, dynamic loads, heat resistance, fiber-reinforced composites, ablation materials, etc

13 p2362 A69-27920

Bending state of shells of revolution due to edge effects using nonlinear stress strain relation

13 p2362 A69-27921

Inelastic structural system stresses, strains and displacements analyzed by differential stress-strain relationships, using finite element method [AIAA PAPER 68-291]

13 p2364 A69-28208

Stress-strain state of circular annular plate with varying thickness subjected to concentrated axisymmetric load and shearing force applied to internal perimeter

13 p2369 A69-28563

Differential equations for shallow circular spherical shell transformation to equation describing stress-strain state of plate on elastic base

13 p2369 A69-28565

Stress-strain problem of piecewise-homogeneous plane with cut normal to interface line reduced to Wiener Hopf equation, obtaining solution for arbitrary boundary conditions

14 p2531 A69-28805

Elastoplastic continua fire resistance at high temperatures, establishing plasticity condition and stress-strain relationships

14 p2536 A69-29598

Creep strain rate and stress distribution of thick walled cylinders under internal pressure at elevated temperature, using variational principle

15 p2703 A69-30070

Elastoplastic matrix for stress increments for yield surfaces with associated flow rule, considering initial stress computation

15 p2706 A69-30433

Bending theory of orthotropic plates with variable elastic modulus under transverse loads, utilizing stress-strain relations and Kirchhoff-Love hypothesis

15 p2708 A69-30661

Boundary layer solution in three dimensional bending for plate with curvilinear hole to study stress-strain state at hole and over entire plate

15 p2708 A69-30662

Stress-strain state of circular disk with diametral cracks determined by approximating limiting equilibrium equation

15 p2708 A69-30663

Polymers stress-strain behavior and corresponding birefringence within limited temperature range and strain rates

15 p2642 A69-30678

Initial comparisons between theory and experiment of strain fields in cracked copper plate

15 p2640 A69-30810

Biaxial stress strain properties of graphite base refractory composites noting fracture strength predictions [AIAA PAPER 68-337]

16 p2803 A69-32150

Nonlinear theoretical derivation of creep equations for three dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation

16 p2803 A69-32290

Temperature field, strains and stresses induced in thin circular disk by unsteady heat source, noting time effect and resonant vibrations

17 p3054 A69-33021

Stress-strain state analysis for brittle plate with circular holes of equal radius performed in cylindrical system of coordinates

17 p3055 A69-33127

Anisotropic elastic plate deflection weakened by circular hole with thin elastic ring reinforcement, assuming no load on ring and uniform stress-strain state of plate

17 p3055 A69-33128

Stresses and displacements in elastoplastic cantilever beams and beams fastened at both ends calculated by stress-strain diagrams of material

17 p3056 A69-33191

Strains in elastoplastic curved beam under bending obtained from approximating stress-strain diagram by parabola

17 p3056 A69-33192

Stress-strain state determination for axisymmetric shells applied to design of circular/annular plates and rotating disks

17 p3057 A69-33194

Stress-strain rate of glass fiber reinforced plastic pressure vessels under internal pressure, determining optimal fiber pattern

17 p3057 A69-33195

Moire reflection technique applied to study of stress-strain state of partially clamped rectangular cantilever plates under various loads

17 p3058 A69-33203

Rotating machinery fracture and design approach based on effect of detailed stress and strain duty on imperfect materials metallurgical behavior

17 p3060 A69-33561

Near resonant oscillations of warped turbine or compressor blades, discussing stress-strain relations

17 p3064 A69-33918

Energy dissipation in vibrating warped turbine blades subject to complex stress-strain rate produced by simultaneous bending, torsional and tensile stresses

17 p3065 A69-33924

Low endurance fatigue in aluminum, Nylon 66 and epoxy resin compared, considering stress-strain relationships, fatigue damage, failure mechanisms and crack propagation

18 p3155 A69-34633

Elastoplastic flow equations formulation, inverting flow rule to relate stress rates to strain rates and instantaneous stresses, noting Navier equations

18 p3219 A69-34666

Stress-strain state of shells under concentrated loading, emphasizing positive Gaussian curvature

18 p3219 A69-34832

Stress-strain state of elastoplastic material subjected to quasi-static uniaxial tension and compression, considering Bauschinger type effects by scalar parameters

18 p3222 A69-34909

Stress-strain state calculations of ribs reinforcing cantilever shell under external pressure, using differential-difference equations

18 p3223 A69-34980

Creep calculation with temperature considerations for multilayer cylinder under nonisothermal load, comparing stress-strain state of viscoelastic and elastic cylinders

18 p3225 A69-35358

Linearity range of viscoelastic properties of fiberglass reinforced plastics, calculating stress-strain state

18 p3163 A69-35364

Pure plastic bending of wide strip, determining stress strain state and plastic strain energy during constrained bending, noting application to corrugated panels

19 p3324 A69-35833

Turbine disks stress-strain state, using wire strain gauge to determine residual strains, radial and tangential stresses as function of disks rpm

19 p3436 A69-35850

Anisotropy coefficients obtained during annealed Al sheet tests based on stress-strain characteristics, noting fading memory effects

19 p3447 A69-36857

Viscoelastic nonlinear and linear solids models and rheological equations, studying stress-strain states of various complex Hookean, Kelvin, Maxwellian and Zener elements

20 p3625 A69-37601

Linear limit uniaxial stresses for stress-strain and stress-birefringence in photoelastic and mechanical model materials

20 p3628 A69-37777

Soviet book on fundamentals of theory of plasticity and creep covering stress-strain state, bending, torsion, pressure, plane deformation, etc

20 p3630 A69-38206

Metal deformation dynamics at elevated temperatures, discussing closed loop electrohydraulic testing machine for stress relaxation and strain rate sensitivity

21 p3689 A69-38595

Alpha Ti thermally activated tensile deformation, studying flow stress dependence on strain, temperature and strain rate

[ASM PAPER W9-4.2]

21 p3729 A69-38659

Stress-strain state of thin spherical shell of variable thickness in elastoplastic equilibrium, using Meissner variables to reduce equilibrium equations

21 p3834 A69-38717

Stress-strain state in thin isotropic plate with circular hole under lateral bending and torsional moments

21 p3835 A69-38725

Flexible circular plate in stationary temperature field calculated for stress-strain state using perturbations method

21 p3835 A69-38830

Stress-strain state of fiberglass reinforced plastics under load analyzed by anisotropic linear creep theory and Galerkin method

21 p3835 A69-38831

Stress-strain state of thick and thin walled closed shells of variable thickness during elastoplastic torsion developing in aircraft component production

21 p3835 A69-38882

Bending of circular plate into shell, using stress-strain relation in finite strain, solving differential equations and boundary conditions

21 p3836 A69-39005

Thermal stresses and displacements in long isotropic hollow cylinder heated on part of outer curved surface, analyzing temperature distribution

21 p3838 A69-39166

Stress-strain state of homogeneous anisotropic elastic body under action of internal forces, deriving equations to generalize state

21 p3838 A69-39184

Generalized strain-measure application to linearization of stress-strain curves of compressive, shear and tensile nature, discussing plastic deformations

21 p3844 A69-39321

Stress-strain curves of W wires and of aligned composites of same wires in Cu matrix

21 p3845 A69-39709

Rectangular plate under biaxial tension stress analyzed to determine onset of necking and stress-strain state

22 p4039 A69-39913

Approximate generalized stress-strain rate relations for stationary creep analysis of thin shells compared with corresponding exact relations

22 p4041 A69-40013

Heat influx equation coupling in thermoviscoelasticity, considering internal forces dissipation and stress-strain operators

22 p4044 A69-40741

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges

22 p4046 A69-41061

Stress-strain state of circular disks with arbitrarily varying thickness along radius under antisymmetrical load calculated by integral equations method

22 p4047 A69-41168

Stress-strain relations for materials with variable modulus of elasticity applied to internal work, obtaining potential strain energy

22 p4047 A69-41171

Nonlinear shallow shell theory of stress and strain formulated via shell of revolution problem

22 p4048 A69-41198

Closed circular cylindrical shell stability and oscillations under ring-shaped axial load, defining stress-strain state by radial displacements and force function

22 p4049 A69-41280

Warping of doubly supported submerged wings, calculating stress and strains due to bending and constrained torsion

23 p4225 A69-41423

Deformation tractions in undeformed and curved cuboid flexure and inverse flexure determined by stress-strain relations for homogeneous isotropic compressible materials

23 p4226 A69-41521

Prismatic beam stress-strain state under steady temperature field, deriving stresses, displacements and elastic curve equations

23 p4227 A69-41708

Plates and shells under concentrated loads, analyzing stress-strain state

23 p4228 A69-41986

Stressed state of thin plate with circular hole under normal and breaking force applied over hole perimeter

23 p4233 A69-42341

Yield condition for elastic-plastic medium, considering pure torsion-associated second order effects and dissimilarity between stress and strain increment Mohr circles

23 p4234 A69-42409

Dynamic uniaxial tensile stress-strain data obtained at high rates by measuring kinematics of symmetrically expanding thin ring specimens

24 p4330 A69-42735

Strain diagram with piecewise nonlinear curve for statically indeterminate systems stressed beyond elastic limit

24 p4400 A69-43072

Orthotropic aircraft materials plasticity theory, deriving stress-strain relationships in three mutually perpendicular symmetry planes for use in engineering calculations

24 p4400 A69-43083

STRESS-STRAIN DISTRIBUTION U STRESS CONCENTRATION

STRESS-STRAIN-TIME RELATIONS

Aluminum deformation at various strain rates and temperatures under combined stress, comparing results with theoretical predictions

02 p0343 A69-12282

Dynamic tensile stress-strain curves for annealed Al, Cu and Fe at constant strain rates, describing experimental method

03 p0524 A69-13065

Dynamic pressure pulse over band on solid elastic cylinder surface, analyzing time stress distribution throughout elastic cylinder

04 p0670 A69-14405

Constitutive equation for viscoelastic material generalized, assuming instantaneous part of deformation to be nonlinear function of time dependent stress state

05 p0835 A69-15868

Ductile creep rupture of thin walled membrane shell of revolution subjected to time dependent internal pressure and strain hardening

[ASME PAPER 68-WA/MET-15]

05 p0838 A69-16153

Long term creep behavior of nickel-chromium-molybdenum alloy, noting temperature effect on grain boundaries

05 p0781 A69-16500

Technique for compressive mechanical behavior of viscoplastic nonlinear composites, discussing rate dependence and one dimensional stress-strain time properties

07 p1159 A69-18721

Stress-strain-time relations in magnesium alloy and aluminum plate impact load tests, discussing stress measurement, Hugoniot equation of state, yield point and dynamic response

08 p1330 A69-20102

Creep buckling stability of shells, with emphasis on stress and strain states and critical time, considering circular cylindrical shell

08 p1411 A69-20143

Fatigue strength and stress-time functions obtained by programmed fatigue tests under time variable loads

09 p1620 A69-22572

Stress-strain relation in crystalline media for pure tension and elongation epsilon several times conventional elastic limit, verifying by testing Al alloy

[ONERA TP-695]

11 p1975 A69-24754

Short time creep rupture behavior of austenitic stainless steel at high temperature ranges, noting rupture times various stresses and data correlation

[ASME PAPER 68-WA/MET-2]

14 p2464 A69-29439

Chemical reaction-rate theory for creep tests, analyzing extrapolation equations for time-to-rupture dependence on temperature and stress

14 p2464 A69-29442

Failure mechanisms time and stress dependence relations

18 p3144 A69-34490

Fiberglass reinforced plastics short and long term strength anisotropy, correlating stress and logarithm of time to rupture under tension along different directions

18 p3162 A69-35352

Stress relaxation of heat-resistant steels as function of equal stress during different elevated temperatures, applying results to time residual stress prediction

19 p3342 A69-35777

Tensile tests on time dependent Pb and cellulose nitrate, including stress-strain curve prediction from creep test data

19 p3445 A69-36829

Crack density effects on stress-dependent creep rate in isotropic and anisotropic materials undergoing high temperature creep deformation

20 p3619 A69-36964

Viscoelastic materials gradual resilience loss under tensile stress, discussing mathematical relations between stress, loading time, elastic deformation and experimental verification

20 p3625 A69-37600

Dynamic plasticity of nonsymmetrical free flight collision impact of crystalline solids, using linear temperature dependent stress-strain function and finite amplitude wave expansion

21 p3840 A69-39298

Time-temperature method modified for combining stress relaxation data with stress or strain into single correlation curve, analyzing isothermal relaxation data

21 p3846 A69-39812

Damaging effects of vibration on materials and parts to estimate fatigue life, considering periodic and non-periodic stress vs time relationships

22 p4041 A69-40167

- Partial differential equation for creep process in plane stressed metals, interrelating strain, rate, stress tensors, temperature and time 22 p4048 A69-41268
- Stress-strain state in infinite medium with cavity under triaxial tensile force obtained from integrodifferential equation deduced from equilibrium equation 23 p4226 A69-41703
- Wave propagation in dynamical theory of thermoelasticity, considering half space subject to step time strain, temperature and stress distributed over free surface 23 p4235 A69-42464
- Matrix method for analyzing elastic structures linear transient response to time dependent loads and temperature change 24 p4399 A69-42988

STRESS TENSORS

- Stress-strain state of isotropic elastic medium using equations with stress tensor, noting role of curvilinear hole 01 p0164 A69-10081
- Elastic shell nonlinear theory, introducing nonsymmetric stress tensor and principles of virtual work and objectivity 01 p0166 A69-10166
- Symmetric tensor of time averaged stresses for collisionless plasma in oscillating field derived by Maxwell equations 02 p0286 A69-11588
- Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function 06 p1021 A69-17177
- Viscous stress tensor for collisionless plasma with anisotropic pressure in magnetic field 08 p1365 A69-20522
- Plane and three dimensional stress concentration studies involving asymmetrical stress tensors, noting contributions to moment theory of elasticity 08 p1419 A69-21177
- Stresses and waves in highly conducting magnetoplastic metals as analogy of MHD processes in plasma 09 p1551 A69-22033
- Analytical expressions for Gaussian constraint of continuum, using continuity conditions as equations of internal geometric couplings 11 p1984 A69-25170
- Time averaged stress tensor for ionized plasma in HF electromagnetic field, considering collisions 14 p2493 A69-29649
- Experimental determination of strain /or strain rate/ tensor in plastic deformation analysis 15 p2707 A69-30639
- Monograph on stress fields in plane plastic flow as solutions to boundary value problems 15 p2711 A69-30932
- Isotropic strain tensor general theory based on isotropy between second order asymmetric tensors reducible to finite form 20 p3624 A69-37584
- Mohr tensor representation and Mohr theorem proof developed for general problem in structural engineering 22 p4038 A69-39903
- Protoplastic materials defined in terms of protopotential function, discussing stress tensor dependency on displacement gradients within body 22 p4042 A69-40452

STRESS WAVES

- Free surface motion and stress measuring instrumentation, describing plate impact one dimensional strain configuration for determining mechanical properties under stress wave propagation 02 p0344 A69-12290
- Wave front profiles sensitivity to form of constitutive equation in one dimensional stress problem 02 p0344 A69-12291
- Plane strain plastic stress waves radial propagation from center of hollow cylinder subject to dynamic pressure load 02 p0344 A69-12292
- Spherical elastic-plastic stress wave propagation analysis via finite difference procedure 02 p0348 A69-12610
- Viscoelasticity effect on tensile stress in absorption layer for free surface uniaxial motion 04 p0676 A69-14705
- Dynamic shear stresses at interface of embedded thin elastic filament and elastic matrix after subjecting filament to concentrated longitudinal line load 05 p0831 A69-15577

- Thermally generated stress wave propagation in dispersive elastic rod investigated experimentally and analytically, using ruby laser and differential equation 09 p1617 A69-22010
- Laser radiation induced stress waves in transparent media using dynamic photoelastic technique 10 p1707 A69-24213
- Coupling constants of fast space charge waves in three frequency parametric TWT amplifier and of stress waves in slow wave structure, using graphical methods 11 p1844 A69-24446
- Two dimensional elastic stress wave propagation in thick multilayered cylindrical shells for nonuniform external pressure distribution 11 p1991 A69-25511
- Elastoplastic stress wave generation by penetration of impulsive electromagnetic radiation through thin surface layer of solid 12 p2179 A69-26215
- Stress waves analysis of brittle fractures, considering loading time role and cavitation of viscous fluids relation to fracture incipience 13 p2275 A69-27229
- Three dimensional harmonic dispersion analysis of incremental waves in uniaxially prestressed plastic and viscoplastic bars, plates and unbounded media 13 p2363 A69-28125
- Characteristics method for stress waves from hypervelocity impact of circular cylinder on half space, discussing numerical diffusion effect on pressure and flow fields [AIAA PAPER 69-355] 13 p2365 A69-28287
- Spherical stress wave reflected from plane surface, discussing tensile stress in target [AIAA PAPER 69-363] 13 p2366 A69-28295
- Fracture of bumper protected fuel tanks subjected to hypervelocity meteoroid impact, applying method of characteristics to stress wave propagation in tank walls [AIAA PAPER 69-369] 13 p2367 A69-28301
- Axisymmetric thermoelastic vibrations of infinite and finite cylindrical shells, determining natural frequencies and stress wave propagation 14 p2532 A69-28979
- Materials and structural failures under short time compressive loadings, showing structural response to tensile stresses produced by rarefaction waves 15 p2639 A69-30364
- Stress waves propagation through elastic-plastic medium with uniaxial displacement, discussing wave interactions and interface conditions 16 p2870 A69-31809
- Stress waves analysis in laminates design, assuming one dimensional linear elastic response to plane stress pulse on flat laminated plate surface 16 p2872 A69-31923
- Transient stress waves due to inputs of various types and time dependence in plates and revolving shells, discussing applications of elasticity theory analysis methods 16 p2876 A69-32785
- Cylindrical shell stability under axial compression, studying buckling process and wave formation 18 p3217 A69-34597
- Deformation detection by stress wave analysis technique /SWAT/, noting pressure vessel applications 18 p3223 A69-35080
- Transient processes of strain wave propagation in elastic shells and plates under time varying loads 18 p3224 A69-35321
- Reflection of spherical stress wave against smooth deformable plane in elastoviscoplastic medium, discussing Taylor series expansions for displacement, velocity and stress fields 18 p3226 A69-35463
- Fatigue characteristics of Al alloys by fatigue tests with complex stress patterns, finding secondary stress wave effects 19 p3342 A69-35772
- Equations governing stress waves generated by rapid nonuniform heating of solids, comparing elastoplastic with purely elastic solutions 21 p3837 A69-39158
- Geometric dispersion of transient stress waves in linearly elastic laminated composite based on sinusoidal modes [ASME PAPER 69-APMW-20] 24 p4401 A69-43098
- Stress wave propagation in nonhomogeneous elastic media, considering curvilinear characteristics transformation into equal slope straight lines by change of independent variable 24 p4403 A69-43574

- Reflection of spherical stress wave against plane clamped partition in elastoviscoplastic medium, investigating three dimensional problem by infinitesimal deformations theory 24 p4406 A69-43732

STRESSES

- NT AXIAL STRESS
- NT COMBINED STRESS
- NT CRITICAL LOADING
- NT PHOTOSTRESSES
- NT RESIDUAL STRESS
- NT SHEAR STRESS
- NT TENSILE STRESS
- NT THERMAL STRESSES
- NT TORSIONAL STRESS
- NT TRIAXIAL STRESSES
- NT VIBRATIONAL STRESS
- X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices 03 p0491 A69-14053
- X ray study of scandium containing ferrites, establishing lattice stresses due to ion replacement in octahedral interstices 18 p3182 A69-35046

STRETCH FORMING

- Strain rate effect on structure and mechanical properties of rapidly stretched metals 06 p0941 A69-17122
- Sheet metals deformation behavior during punch stretching and hydraulic bulging, noting effects of lubrication, stress-strain relation, anisotropy and microcracks 20 p3551 A69-38115

STRETCHING

- Thermoelastic waves in stretched circular cylindrical bar, analyzing displacements, secondary pressure and temperature field by using Frobenius method 12 p2189 A69-27115
- Reaction rate theory for dilatational failure of heterogeneous materials subjected to stress 15 p2710 A69-30813
- Heat conduction orientation anisotropy in linear amorphous high polymers due to uniaxial stretching, noting molecular weight distribution and temperature effects 19 p3359 A69-36443
- Continuous particle media on basis of microstructure, discussing granular media deformation, elastic media dilatation, turbulent flow and dilute suspensions 19 p3446 A69-36833
- Tension effects on amino acid incorporation rate into proteins of cross-striated muscles of rats 23 p4083 A69-41458
- Isolated pacemaker tissue from rabbit heart under dynamic and static stretching, discussing spontaneous frequency phenomena 23 p4096 A69-42092

STRIATION

- Electron thermal relaxation length in positive column determined by plasma parameters variations in small amplitude moving striations 01 p0127 A69-10341
- Ministriations in frequency graphs as evidence of standing waves in electrically exploded iron wires 01 p0118 A69-10661
- Fast type r moving striations in plasmas and dependence of ionization frequency on electron mean energy 03 p0477 A69-13801
- Evaporographic converter to test for striations /schlieren/ in materials used in IR 08 p1314 A69-20384
- Striation formation during steady state glow discharge, noting origin in cathode interfacial positive ions 09 p1545 A69-21343
- Moving striations in plasmas, presenting measurements of relative phases of electron temperature, plasma potential and luminous intensity near Pupp current limit 10 p1741 A69-23859
- Aluminum alloys ductile fatigue striations, considering dependence on grains crystallographic orientation and vacuum effect 13 p2278 A69-27415
- Moving striations relations to ion acoustic waves in DC discharge in neon at various pressures, discharge currents and measurement excitation modes 14 p2494 A69-29695
- Moving striations as plasma oscillations arising from transit time delays of neutral and charged particles moving through ionized gas, using continuity equation 24 p4356 A69-43122

Moving striations dispersion and stability theory applied to ionization waves excited in Ar, Ne and Hg-Ar mixture low and medium pressure discharge
24 p4356 A69-43363

Diamond shaped striations development mechanism on ablative heat shield materials exposed to supersonic flow and turbulent boundary layers
24 p4248 A69-43598

STRINGERS

Imperfection sensitivity of axially compressed stringer stiffened cylinder analysis via shell equations formulation using finite differences
02 p0348 A69-12542

Load diffusion from transverse tension bar into semiinfinite elastic sheet, considering line and area contact methods of stringer attachment
[ASME PAPER 68-WA/APM-15]
04 p0669 A69-14396

Prestressing of aircraft wing stringers in order to reduce weight, noting initial bending moment, initial axial stress and prestressing methods
05 p0832 A69-15690

Crack propagation in plate with stiffening ribs /riveted stringers/ under concentrated and tensile loads, determining rivet points displacements
24 p4406 A69-43709

STRINGS

Nonlinear theory for whirling of heavy string under constant axial tension, considering orbitally stable modes for eigenvalues of rotation
13 p2359 A69-27264

Natural oscillations of loaded strings, membranes and geometric bodies with distributed loads treated as material discontinuities
20 p3578 A69-38292

Flexible string extraction from bobbin through nozzle, solving equations of motion by neglecting bending rigidity, extensibility, drag, internal friction, etc
22 p3930 A69-40585

STRIP

Infinite strip plane elastic problem reduced to Hilbert problem by employing multiply connected region and biharmonic solutions
15 p2707 A69-30625

Powder properties effect on rolled strip thickness and compactness, angles, pressure at roll and torsion during rolling, analyzing Fe, Ni and Cu powders
15 p2630 A69-31183

Elastoplastic boundary dynamic behavior in strip with crack determined by solving boundary value problem in elliptic integrals form
24 p4395 A69-42591

Plane problem of infinite strip weakened by crack, determining crack form under uniformly distributed tensile loads applied to edges
24 p4395 A69-42592

STRIPPING

Stripping and low-energy collisions of H atoms on O and N molecules, showing target ionization to projectile stripping ratio dependence on ionization potential
16 p2814 A69-31773

STROBOSCOPES

Stroboscopic holography for repetitive scenes, using mode locked laser as source
02 p0250 A69-12411

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates
02 p0251 A69-12561

Device based on stroboscopic effect for observing crack propagation on rotating specimens during fatigue tests
05 p0843 A69-16665

Stroboscopic generator of trains of high brightness light flashes for hydrodynamic and gas dynamic research, noting electronic control and thyatron circuits
11 p1879 A69-24235

Monograph on laser stroboscopy in megahertz range covering spark photography comparison, concept of modes, resonators, applications, etc
11 p1893 A69-24368

Selective stroboscope with explosive bright light source and microsecond pulse duration for short flash period over large area, noting single frame separation method
12 p2086 A69-26162

Q switched ruby laser stroboscope for high speed photography, using electro-optical crystals for Q switch
12 p2086 A69-26167

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates
15 p2608 A69-30258

X ray stroboscope for moving objects in penetrating irradiation, considering synchronization of radiation receiver
18 p3138 A69-35114

Topographic distribution of cortical potentials produced with tachistoscope and by stroboscopic stimulation, studying occipital and frontal differences
22 p3884 A69-40885

Stroboscope method for measuring pulsating flow transfer velocity based on hot-wire chronometric recording of small ion clouds emitted during pulsation
22 p3951 A69-41257

STRONTIUM

Moldavites and Ries crater material, studying Rb-Sr isochronal relationship
23 p4154 A69-41341

STRONTIUM ISOTOPES

Rubidium, Sr and Sr isotopic composition of normal gray hypersthene chondrite falls, noting Rb/Sr and Sr87/Sr86 ratio determination of Bath Furnace L chondrite isochron
02 p0317 A69-12020

Radiation ages of silicate inclusions in iron meteorites based on Sr evolution diagrams
08 p1405 A69-20927

Initial Sr isotopic composition at time of planetary objects formation in solar system and precision measurements for age determination of basaltic achondrites
11 p1953 A69-24357

Rb-Sr isotope patterns in tektites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production
23 p4154 A69-41342

Rb-Sr isotopic determinations for Olivine olivine-hypersthene chondrite, noting isotopic ratio vs age
24 p4385 A69-43214

STRONTIUM TITANATES

Zr doped superconducting ceramic strontium titanate, noting effective electron mass variations and transition temperature
13 p2316 A69-27400

Electrical conductivity and optical spectra changes of strontium titanate single crystals under constant electric field action
15 p2666 A69-30043

Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
20 p3583 A69-37280

Waveguide-resonance investigation of temperature dependence of dielectric constant and paraelectric dispersion of Ba and Sr titanate single crystals at millimeter wavelengths
22 p3995 A69-41158

Temperature dependence of heat capacity of Ba and Sr titanate solid solutions in ferroelectric phase transition region
22 p3996 A69-41162

Dielectric polarization of barium titanate and barium strontium titanate in pulsed fields in paraelectric phase, analyzing coefficient B in free energy function and equilibrium state
22 p3996 A69-41165

STRONTIUM 90

Lithium doped solar cell irradiation by strontium 90 radioisotope, discussing electron flux rate, spectrum and recovery rates
19 p3251 A69-35693

Gisette 5 thermoelectric radioisotopic generator for submarine use, discussing strontium 90 as isotopic source
21 p3768 A69-38458

STROUHAL NUMBER

Discrete vortices in two dimensional subsonic and supersonic wake, determining Strouhal numbers, frequencies and flow velocities with aid of HF cinematography
02 p0191 A69-12587

Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two dimensional flow
07 p1119 A69-18749

STRUCTURAL ANALYSIS

NT BERNSTEIN ENERGY PRINCIPLE
NT DYNAMIC STRUCTURAL ANALYSIS
NT ENERGY METHODS
NT EQUILIBRIUM METHODS
NT FINITE ELEMENT METHOD
NT FLUTTER ANALYSIS
NT MATRIX METHODS
NT STRAIN ENERGY METHODS

Strength analysis of cylindrical shells with rib and ring reinforcement under compression loads using network method
01 p0164 A69-10083

Structural analysis by direct moment distribution, Volume 1, covering statistically indeterminate structures formed of prismatic members
01 p0165 A69-10156

Power spectral density method of random loads analysis applied to V/STOL aircraft structural analysis, discussing statistical distribution
01 p0168 A69-10407

Orthotropic plates bending and thermal stress, analyzing basic equations
01 p0168 A69-10416

Piecewise analysis of large structures, showing incompatibility of minimum computer storage and minimum number of multiplication requirements through bandwidth schemes
01 p0169 A69-10637

Multiple configuration analysis of structures systematically predicting static and dynamic response of structures of single configuration class
01 p0169 A69-10639

Two dimensional structural model of micropolar continuum involving orientable points joined by extensible and flexible rods
01 p0169 A69-10810

Ribbon reinforcements in composite materials noting stiffness properties
01 p0172 A69-11265

Contact problem of pair of nonhomogeneous semicircular regions solved by singular integral equations solution method
02 p0336 A69-11553

Thermoviscoelasticity equation solution for class of dynamic problems, giving problem solution for half space with arbitrary temperature field boundary condition
02 p0336 A69-11554

Long term creep characteristics of metal structures from short duration relaxation tests, summarizing data on rheologically stable materials
[ONERA-TP-639]
02 p0337 A69-11626

Three dimensional elastic theory using parametric expansion method developed for cylindrical translation shell profiles
02 p0338 A69-11718

Limit load analysis of three dimensional rigid perfectly plastic continua by approximate variational method
02 p0338 A69-11721

Computer solution of forced torsional oscillation equations for periodic coupled machine system with viscous dampers
02 p0338 A69-11893

Complex revolution vessels and multilobed structures analyzed by electronic computers, considering doubly stressed state of shells and bending moments from external forces
02 p0339 A69-11894

Plate theories derived via strain energy potential integration through thickness, noting constitutive equations applicability to elastic buckling and postbuckling
02 p0340 A69-12055

Thermostructural analysis of large flexible paraboloid antenna indicates RF losses due to thermal distortions significant for X band and higher transmissions
[AIAA PAPER 68-333]
02 p0345 A69-12372

Crystall structure of boron filaments vapor deposited on tungsten wire substrate, using X ray diffraction and transmission-electron microscopy
02 p0268 A69-12405

Structural influence on superconductivity of niobium-titanium alloys, using electron microscopy and measurements of current density vs magnetic field strength
02 p0269 A69-12763

Book on flight structure theory and analysis covering methods for digital computers, differential equations for equilibrium boundary value problems, etc
03 p0525 A69-13266

Applications of electronic computers in construction - Conference, Weimar, June-July 1967
03 p0525 A69-13734

Open and closed path orthogonal analysis for structural network
03 p0526 A69-13735

Numerical technique using transfer matrices to solve boundary value problems in structural analysis
03 p0526 A69-13736

Finite element method convergence introduced as general numerical technique related to Ritz method in structural analysis with digital computers
03 p0527 A69-13745

Universal solution for static and dynamic response of structural components by method of initial parameters 03 p0527 A69-13746

Symmetric structure stability with first and second order imperfections, analyzing discrete system with n degrees of freedom 03 p0529 A69-14062

Elastohereditary characteristics of composite materials with random inhomogeneities based on Volterra principle 04 p0667 A69-14263

Matrix perturbation method for hyperstatic structure modification by combining original solution elements with data on modification 04 p0668 A69-14380

Resistance wire strain gages for measuring elastoplastic deformations in zones with high stress concentrations of strained machine elements 04 p0671 A69-14433

Spar attachments of aircraft wings analyzed with respect to weight and applied loads, determining optimum bolt diameter ratio to lug width 04 p0673 A69-14496

Annular plate clamped at inner and outer boundaries and subject to point load, computing deflection 04 p0676 A69-14725

Testing techniques and graphical presentation of test results to determine resonant frequencies and oscillation modes in sporting gliders 04 p0549 A69-15420

Shear strength of grossly deformed solids noting extrusion and opposed anvils techniques 04 p0631 A69-15465

Moment curvature models under reverse cyclic straining developed from stress-strain curves for rectangular beams 04 p0683 A69-15497

Approximate equations in matrix form for analyzing complex semiconductor structures with p - n junctions 05 p0806 A69-15658

Stability functions for local buckling of long thin flat walled structures loaded for longitudinal compression and shear 05 p0833 A69-15709

Mathematical theory for describing geometric structure of simple bodies, discussing dislocation distribution and exact field equations for elastic bodies motion 05 p0834 A69-15731

Theory of inhomogeneous simple bodies applied for universal solutions for incompressible laminated bodies 05 p0834 A69-15732

Linear theory applied to anisotropic elastic materials, discussing transition from compressible to incompressible elastic materials 05 p0834 A69-15795

Static criterion for yield computation in plane two dimensional systems 05 p0836 A69-16013

Elastoplastic element structural growth induced by thermal cycling analyzed as function of temperature and sustained axial load [ASME PAPER 68-WA/MET-14] 05 p0837 A69-16067

Asymmetrically loaded systems composed of shells of revolution, developing digital computer algorithm for solution of statics problems 05 p0840 A69-16201

Weld-nugget formation in resistance spot welding, using high-speed photography on model section of spot weld 05 p0769 A69-16539

Statistical method to investigate time varying stresses in helicopter structures, considering service life evaluation 05 p0767 A69-16775

Calculation of thin shell or beam structures with plasticity and isothermal creep based on linearization and local kinematic behavior [ONERA-TP-667] 06 p1020 A69-17099

Nonlinear constrained optimization by nonrandom complex method demonstrated by minimum weight structural analysis of elastic ring and plate 06 p1022 A69-17366

Large paraboloid radio antennas structural setting for minimizing effects on performance due to deformation of surface by gravitational forces 06 p1023 A69-17372

Substructure optimization in structural synthesis, minimizing number of cells for configuration parameter [AIAA PAPER 69-121] 06 p1027 A69-18069

Turbulent boundary layer loading function for use with finite element structural analysis system applied to elastic aircraft structures random vibration [AIAA PAPER 69-20] 06 p0914 A69-18132

Digital computer simulation of nonlinear redundant structure variables including thermal influence, creep and arbitrary loads [AIAA PAPER 69-120] 06 p1028 A69-18166

Snapping and buckling of simple elastic structures under dynamic load, noting influence of structural geometry and load duration [AIAA PAPER 69-22] 06 p1029 A69-18206

Approximate solution for hollow circular cylinder with fixed ends under axial displacement and cylindrical surfaces free from traction, using boundary layer technique 07 p1230 A69-18265

Plane anisotropic rectangular plates with various boundary conditions, analyzing stability, natural frequencies, mode shapes and displacement under lateral loads 07 p1232 A69-18719

Phase and structural transformations in two phase quenched and aged titanium alloys, using electron microscopy and X ray analysis 07 p1162 A69-18776

Book on computer calculation of structures covering programming, computer language, mathematical aspects of structural analysis, matrix computation, etc 07 p1233 A69-19349

Collection of papers on mechanics of solid state covering structural stability, stress analysis, creep, cracking and fracture 07 p1234 A69-19377

Transient response of targets subjected to hyper-velocity impacts and quantitative aspects of impact process, noting study of wax targets interiors 07 p1234 A69-19380

Quadratic programming and theory of elastic perfectly plastic structures under holonomic laws, proving theorems of limit analysis 07 p1235 A69-19443

Sparse matrix scheme for computer analysis of structures, introducing term searching factor as efficiency guide for matrix routines 07 p1089 A69-19723

Mathematical theory generalization for smooth materially uniform simple bodies, discussing elastic body structure, material tangent bundle and index bundle, motion equations, etc 08 p1410 A69-19822

Direct plotting of vibrating wire strain gauge data for concrete structures, giving diagrams for grid and backing sheet scaling 08 p1312 A69-20104

Stereoradiography using holographic techniques to examine internal structure of opaque objects 08 p1313 A69-20178

Nb-Zr-Cr alloys solidus surface and isothermal sections, using optical pyrometry, microstructural and X ray analyses 08 p1333 A69-20440

Transverse vibration of beam rigidly fastened at one end, using series expansion in terms of set of eigenfunctions 08 p1414 A69-20445

Continuum stress/plastic strain relations from Schmid Law of plastic slip in individual crystal grains 08 p1414 A69-20525

Polar elastic media pure torsion solved, noting couple-stresses influence on Poynting effect 08 p1414 A69-20527

Complementary plastic work theorems in piecewise-linear elastoplasticity applied to plastic and nonlinear elastic problems 08 p1414 A69-20528

Second order tensor describing deformation of particles of continuum determined by functional, noting invariance restrictions 08 p1416 A69-20690

Matrix displacement method for nonlinear elastoplastic two or three dimensional structures or continua, discussing strain distribution 08 p1416 A69-20705

Optimization of plane smooth rectangular panels of constant cross section subjected to loading and heating conditions 08 p1417 A69-20821

Perturbation theory for branching analysis of perfect and imperfect discrete conservative structural systems 08 p1417 A69-20822

Incremental and corresponding total strain theories of plasticity used to analyze hydrostatic bulging of circular diaphragm 08 p1418 A69-20826

Compatibility theorem extension to three dimensional rigid plastic bodies with stress and velocity discontinuities, noting isotropic bodies with convex yield surface 08 p1418 A69-20845

Elastic stability of one dimensional structures analyzed by energy method, discussing deformable line, conservative forces and linear stability 08 p1418 A69-20846

Finite element analysis of large deflections in thin elastic plates subjected to transverse loading, including nonlinear geometric effects 09 p1615 A69-21924

Generalized orthogonality principles and expansion schemes for forced response of partial differential equations, noting applicability to rodlike structures 09 p1533 A69-21975

Flexible circular plate on elastic support connected at free edge, noting stress independent of working load 09 p1618 A69-22239

Multilayer pressure vessel load carrying capacity calculated, using Huber-Mises yield condition to estimate axial force influence 09 p1618 A69-22257

Unidirectional filamentary composites thermoelastic properties relation to constituent materials properties, using semiempirical micromechanics theory 09 p1530 A69-22320

High temperature magnetic testing and analysis of structure sensitive hysteresis properties 09 p1512 A69-22375

Inverse problem in stochastic processes, considering random moving force and strip load in structural stress analysis 10 p1793 A69-22876

Nonlinear Lagrange equations and iterative solutions for studying strain state of mechanical structures on basis of very small displacements 10 p1793 A69-22888

Finite element concepts for continuum theory of shells, noting bilinear approximation for displacement and fundamental decomposition principle for large deflection 10 p1794 A69-22891

Structures analysis by photoelastic model techniques of stress visualization 10 p1794 A69-22941

Dual continuum model of nonelastic processes in elasticity and dislocation theory, including incompatibility effects of interaction forces between structural elements 10 p1799 A69-23152

Microstructural analysis, determining junction orientation polarity effect on draw junction structure in GaSb crystals at room temperature 10 p1745 A69-23330

Thermal stresses for mixed boundary conditions calculated from combined use of integral transforms and variational techniques, reducing computational labor 10 p1801 A69-23429

Elastomeric solid propellant grains viscoelastic flow, analyzing stresses and strains under various operating conditions and rocket engine geometry effect 10 p1801 A69-23702

Pressure vessels burst tests for investigating alloys, fabrication processes and biaxial loading effects, noting vessel configurations and test temperatures 10 p1714 A69-23974

Structural fatigue life evaluation as cumulative damage analysis for irregularly varying loads [DVL-780] 10 p1802 A69-24020

Frequency response dynamics of beam type periodic structures on elastic supports typical in flight vehicle designs [ASME PAPER 69-VIBR-17] 10 p1804 A69-24150

Polymer fatigue model from low cycle analysis of dynamic and thermal properties in structural plastics 10 p1717 A69-24217

Three dimensional bending problem for thick isotropic plate with curvilinear hole and normal and tangential stress applied to edge of hole 11 p1973 A69-24657

Time scales for creep stress redistribution in structures subject to step loading 11 p1980 A69-24879

Nodal lines shape in individual flats for long plates in combined shear and compression with sinusoidal edge rotations in longitudinal direction 11 p1983 A69-25137

Stress-strain state of shells with opposite edges hinged and rigidly clamped solved by numerical method after reduction to boundary value problem 11 p1985 A69-25174

Hysteresis loop contour equation derivation based on energy dissipation dependence on stress amplitude in cyclically deformed vibrating system 11 p1985 A69-25176

Elastic bending moments and shear forces uniformly loaded flat plate structures with rectangular symmetry,

using collocation technique and complex variable methods 11 p1986 A69-25241

Dynamic stability of elastic beam type structures, using electronic simulation based on finite element approach 11 p1986 A69-25344

Shim joints design for composite material structural members reinforcement in joint region, considering weight factor [AIAA PAPER 68-341] 11 p1987 A69-25369

Back stress role in strain rate equation for high temperature deformation and study of structure and applied stress effects 11 p1987 A69-25388

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc 11 p1991 A69-25516

Numerical prediction for nonlinear transient response of structures, considering geometric and material nonlinearities in systems with line elements 11 p1993 A69-25526

Optimum automatic selection of redundancies, discussing weighting and pivot choice and rigid element incorporation 11 p1993 A69-25529

Two and three dimensional quasi-static problems in coupled thermoelasticity, obtaining solutions for space containing cylindrical cavity and for solid cylinder 12 p2177 A69-25993

General perturbation theory for branching analysis of discrete structural systems, considering elastic post-buckling 12 p2179 A69-26213

Torsion in composite inhomogeneous circular cylinder, obtaining solutions for elastic displacements and stresses 12 p2180 A69-26274

Finite plane deformations theory extended to incompressible materials with logarithmic change of volume proportional to pressure 12 p2181 A69-26613

Automated Structural Analysis Procedure employing Displacement Method of Matrix analysis applied to validation studies of various finite elements for wing structures 12 p2184 A69-26809

Complex two layered shell of revolution under static and dynamic asymmetric loads analyzed using SABOR/DRASTIC computer codes 12 p2184 A69-26811

Thin ring-strut structure resting on elastic foundation, analyzing deformation taking warping effects into account, noting applicability to engine design 12 p2184 A69-26812

Computationally stable solution of finite element analysis of elastic-plastic response of nonlinear discrete structures loaded beyond yield load 12 p2185 A69-26819

Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces 12 p2185 A69-26821

Linear plate theory deficiency for large plate deflections, considering approximation of nonlinear behavior permitting changes in form without additional terms 12 p2185 A69-26822

Nonlinear structure undergoing arbitrary load history including temperature variations solved by computerized force and subordinated step procedure 12 p2185 A69-26823

Large deflection elastic-plastic analysis of axisymmetric shells of revolution indicating role of plastic yielding in buckling pressure reduction 12 p2186 A69-26839

Man machine interactive structural analysis using digital computer with CRT display, detailing design 12 p2035 A69-27098

Stiffness matrix derived for skewed curved shallow shell element with reference to oblique coordinate system 13 p2358 A69-27210

Continuum mechanics for brittle fracture analysis in metal structures, discussing plastic limit loads 13 p2275 A69-27228

Finite element displacement method extension to include geometric nonlinearity applied to arbitrary plate element, shallow cylindrical shell and shallow hyperbolic paraboloid 13 p2361 A69-27441

High velocity liquid lithium effect on structural materials for MHD power generators, discussing material loss 13 p2278 A69-27478

Control system for thin diffraction limited orbiting astronomical telescope mirror based on structural analysis of static deflections 13 p2261 A69-27951

Three dimensional harmonic dispersion analysis of incremental waves in uniaxially prestressed plastic and viscoplastic bars, plates and unbounded media 13 p2363 A69-28125

Strain resultants in finite quadrilateral elements, noting application to linear strain triangles 13 p2364 A69-28230

Higher order difference method for equilibrium and eigenvalue problems of two dimensional structures using iterative solution 13 p2365 A69-28239

Linear elastic structural analysis for one, two and three dimensional continua [ASME PAPER 69-DE-13] 14 p2531 A69-28843

Dynamic programming method applied to Cauchy problem of large deflections in compressed rods, using recurrent functional equations 14 p2533 A69-28988

Variational principles of solid mechanics for finite element analysis of solid continua 15 p2705 A69-30429

Elastic deformations of spherical sandwich shell of rigidly connected isotropic homogeneous layers, describing shell symmetrical expansion and inversion under stresses 15 p2707 A69-30582

Finite element analysis of flat rectangular panels, developing equilibrium equations based on specified displacement modes 15 p2708 A69-30667

Finite element analysis of flat rectangular orthotropic multilayer stiffened panels, proposing six degrees of freedom model 15 p2708 A69-30668

Uniaxial stress effects on molecular breakage rate, relating structure-sensitive parameter to elastic modulus 15 p2709 A69-30807

Taylor expansion applied to solution of nonlinear simultaneous algebraic equations in analyses of nonlinear structural systems using finite differences or elements 15 p2711 A69-30871

Economical computer techniques for numerically integrated finite elements, creating 96 element square matrix 15 p2711 A69-30873

Finite elements concept cast in topological framework, presenting generalizations of Lagrange and Hermite interpolation functions 15 p2711 A69-30874

Elastic anisotropic panels mechanics analyzed using differential equations stressing transverse displacements, anisotropic thermal expansion, shape imperfections and slip deformations 15 p2711 A69-30904

Expression derived for arbitrary system subjected to external loading, using Cauchy equations for relationship between external plane forces and internal stresses 15 p2713 A69-31018

Triangular shell element SHEBA for arbitrary curvature variation as means of performing large displacement matrix analyses, discussing local subelement, natural modes, cross sectional resultants, etc 16 p2872 A69-32025

Anisotropic conical shells free vibrations analyzed by Galerkin and operator-matrix methods, neglecting transverse shear deformation and rotatory inertia effects 16 p2874 A69-32165

Approximate equations in matrix form for analyzing complex semiconductor structures with p-n junctions 16 p2827 A69-32515

High temperature radial turbine design for small gas turbine engines, discussing aerodynamic, structural and thermal analyses [AIAA PAPER 69-524] 16 p2838 A69-32662

Two dimensional plate theory with moment stress considerations derived from three dimensional elasticity theory, discussing reduction of equilibrium and compatibility equations 16 p2876 A69-32786

Soviet collection of articles on theoretical and experimental investigations of strength of mechanical engineering structures 17 p3056 A69-33190

Discrete element displacement method applied to buckling analysis of flat rectangular plates under arbitrary membrane loading, calculating critical load intensities 17 p3066 A69-34048

Flexure functions of triangular sections under terminal loads, using electric analogy to study function effect on section shape and material Poisson ratio 17 p3066 A69-34050

Mass spectroscopic structural analysis of organic compounds, discussing computer application to data recording, processing and evaluation 18 p3099 A69-34553

Load analysis for elastoplastic bodies by Prandtl-Reuss theory and Mises yield condition, considering avoidance of difficulties associated with nonlinear partial differential equation solution 18 p3216 A69-34571

Two dimensional elastoplastic problems in static condition, discussing analytical, variational and finite difference methods 18 p3217 A69-34594

Buckling in process of loading idealized elastoplastic Shanley column, noting continuous increase possibility 18 p3217 A69-34596

State space procedure for mixed boundary value problems applied to structural analysis, fluid mechanics and eigenvalues for deformable bodies 18 p3164 A69-34685

Erectable metal booms and meshes structural analysis, design and mounting and deployment techniques for space applications 19 p3433 A69-35544

Book on moire fringes in strain analysis, discussing methods for strain measurement in deformed bodies and engineering structures 19 p3435 A69-35835

Structural analysis of thin walled conical shell with variable external loading and Winkler-base elastic filler, using linear differential equation with variable coefficients 19 p3436 A69-35846

Hollow cylinder plane stress-strain state analyzed for effect of variable modulus of elasticity of cylinder material 19 p3436 A69-35858

Finite element techniques of structural analysis for missile and space structures, including Apollo computerized analysis and structural optimization 19 p3438 A69-36324

Book on structural sandwich panels analysis and design covering beams and struts, bending theory, buckling, strain energy use, differential equations, etc 19 p3438 A69-36380

Thermal effects on viscoelastic structure response to applied loads, using equations for thermomechanics, linear and nonlinear thermoviscoelasticity and nonisothermal creep theorem 19 p3440 A69-36657

Limiting equilibrium stress state of unbounded brittle body with elliptical crack under monotonically increasing tensile or compression load, noting influence of crack curvature 19 p3441 A69-36745

Plastic tension of axisymmetric sample involving necking and small inhomogeneity, assuming Tresca yield condition and associated flow law 19 p3446 A69-36847

Static theory of fibrous surface media based on continuum mechanics, neighboring fibers noninteraction principle and additivity of mechanical properties 19 p3447 A69-36858

High temperature strain measurement based on strain gage with capacitance changes for structural analysis 20 p3537 A69-37006

Stress distribution in finite and semifinite solid cylinders under end normal load, using Fourier-Bessel series 20 p3621 A69-37199

Structural flexure center position from shear stress analysis showing nondependence on Poisson ratio 20 p3622 A69-37213

Equilibrium equations reduced to single partial differential equation for membrane theory of shells having coefficients of first quadratic form and specified curvature radius 20 p3622 A69-37220

Arbitrary circle distribution in plane transformed to corresponding distribution of spheres in space for size and shape distribution determination of disperse phase 20 p3627 A69-37764

Axial forces effects on dynamic load factors of beams under transverse impulsive loads, considering various end conditions 20 p3629 A69-38113

Holography application to three dimensional structure determination of weakly scattering semitransparent objects

20 p3546 A69-38198

Soviet book on thin plates and shells bending and stability during creep covering analytical and numerical solutions for various structural elements

20 p3630 A69-38207

Mathematical models and solution techniques for calculating optimal elastoplastic structures by computer, discussing methods for displacements preceding plastic failure

21 p3831 A69-38414

Holor algebra with tensor notations applied to elastic structures /discrete systems/, discussing inertia and stiffness tensors

21 p3831 A69-38415

Complex representation of strain and displacement state in spherical shell using membrane theory, deriving shear forces resulting from single moment loading

21 p3831 A69-38416

Multilayer sandwich panels containing unequal facings with distinct orthotropic cores, calculating dynamic load and stability of triangular panels

21 p3832 A69-38418

Stress-strain state of fiberglass reinforced plastics under load analyzed by anisotropic linear creep theory and Galerkin method

21 p3835 A69-38831

Computerized aircraft structural analysis system, adopting finite element technique /direct stiffness method/ based on COSMOS system

21 p3842 A69-39307

Creep buckling strength reduction of aircraft compression structure, discussing initial eccentricity and loading mode effects on supersonic aircraft operation mode

21 p3842 A69-39308

Automatic structural analysis by matrix force method, giving diagrams of load paths, equilibrium sequence and flow chart

21 p3843 A69-39311

Isoparametric finite element system for stress analysis, with examples for arch dam, impeller and cellular structure, illustrating shells of revolution

21 p3732 A69-39314

Curved shell elements in shell and plate analysis, discussing quadratic and cubic elements for space structures design

21 p3845 A69-39329

Soviet book on heat treatment of Ti alloys emphasizing structural and phase composition changes

21 p3749 A69-39526

Time-temperature method modified for combining stress relaxation data with stress or strain into single correlation curve, analyzing isothermal relaxation data

21 p3846 A69-39812

Stress distribution on surface of stator vane loaded statically as cantilever derived by brittle coatings, strain gages and three dimensional photoelasticity

22 p4042 A69-40310

Plate and shell structures static and dynamic analysis by generalized variational principles in finite element method, discussing element displacement functions

[AIAA PAPER 68-290] 23 p4227 A69-41882

Stress analysis of cylindrical tubes under torsional and transverse static loads based on vibrational theory, applied to rectangular cantilever tube

23 p4228 A69-41916

Complex configuration shells described by single analytical expression using R-conjunctive and R-disjunctive functions yielding boundary equations

23 p4229 A69-41991

Time averaged and fluctuating wind load effects on large radio telescope structures, discussing wind shear and turbulence influence on steady and unsteady loading

23 p4230 A69-42125

Structural analysis program for obtaining steerable antenna surface deflections at various altitude angles and wind conditions as design parameters

23 p4230 A69-42129

Rosman I reflector antenna for collecting data from earth orbiting satellites, discussing dynamic analysis of structural response to natural frequencies

23 p4231 A69-42133

Space frame radome shell structural stability with emphasis on analogous continua for reticulated framework, examining connection imperfections effect on stiffness

23 p4232 A69-42140

Nonlinear formulation for rigid jointed space frame comprised of prismatic linear elastic members, using Newton-Raphson and successive substitution methods

23 p4232 A69-42142

ASTRA /advanced structural analyzer/ based on stiffness approach to finite element method, generating mathematical model for stresses and deflections

23 p4232 A69-42144

NASA structural analysis /NASTRAN/ program applied to large radio telescopes, discussing static and dynamic analysis, problem formulation, finite element method, etc

23 p4232 A69-42145

Flat square plates loaded along two opposite straight edges, analyzing postbuckling behavior and geometric imperfections effects

23 p4234 A69-42395

Force maintaining rigid inclusion embedded in elastic plate with rigid boundaries

23 p4235 A69-42465

Mathematical flow graphs application in analysis and design of elastomechanical structural systems

[AAS PAPER 69-151] 24 p4339 A69-42816

Matrix method for analyzing elastic structures linear transient response to time dependent loads and temperature change

24 p4399 A69-42988

Circular plates axisymmetric nonlinear bending, using variational method to derive equilibrium equations and boundary conditions

24 p4399 A69-42989

Perforated heat exchanger tube plates stiffness determination from hole diameter-to-spacing ratios

24 p4400 A69-43087

Newton method providing continuing solutions of nonlinear differential equations through limit or bifurcation points, discussing elastic stability applications

[ASME PAPER 69-APMW-14] 24 p4401 A69-43102

Composite and metal tubes compared to determine properties for various loadings

[AIAA PAPER 68-340] 24 p4405 A69-43653

Composite media elastic moduli upper and lower bounds determination using variational principles to characterize displacement and stress in time harmonic deformation

24 p4406 A69-43701

STRUCTURAL BEAMS

U BEAMS (SUPPORTS)

STRUCTURAL DESIGN

NT PRESSURE VESSEL DESIGN

Space radiators for heat rejection from nuclear powered spacecraft doubling as primary structures to save weight, discussing conical or cylindrical configurations

01 p0160 A69-10151

Helicopter structures design for maximum practicable crashworthiness and survivability, comparing load factors and deformations with indicated human impacts tolerance

[AHS PAPER 225] 01 p0009 A69-10408

Chemical vapor deposited W and W-Re alloys for structural applications, discussing fabrication methods and effects on mechanical properties

01 p0096 A69-10641

Optimal structural design since 1962

01 p0170 A69-10814

Displacement function selection in calculating rubber-metal valve design, considering boundary conditions of material deformation

01 p0087 A69-10829

Triangulated pantograph structure for deploying antennas, special equipment and instruments from spacecraft, noting structural design and strength characteristics

02 p0252 A69-11752

Supersonic interference on lateral stability of planar configurations analyzed using wind tunnel data

[AIAA PAPER 68-21] 02 p0189 A69-12377

Structural designs for minimum flexibility or weight using energy intensity per unit mass parameter

02 p0345 A69-12380

Exact expressions for rates of change of eigenvalues and eigenvector to facilitate computerized design of complex structures

02 p0347 A69-12532

Mathematical programming in optimized truss design noting reduction of components under buckling

02 p0347 A69-12536

Alignment of rocket-borne instrument with sun, discussing mechanical system design, servocontrol and silicon photodiode sensors

03 p0427 A69-12980

Sandwich panel construction, examining design with respect to panel size, thickness and weight limit

03 p0524 A69-13124

Optimum structural design based on linear, nonlinear and dynamic programming

[SAE PAPER 680752] 03 p0525 A69-13437

Diffusion bonding and forming of large and complex Ti structures, noting advantages in freedom of design and in economy

[ASM PAPER C7-2.3] 04 p0604 A69-14525

Multidegree of freedom systems for modeling optimum design of cantilever and simply supported beams for sudden loading

04 p0674 A69-14590

Structural design options for decelerative aeroshell configurations for atmospheric entry on unmanned planetary explorations

[AIAA PAPER 68-344] 04 p0683 A69-15507

Book on plate formulas and tables for designing structure components of various geometrical shapes and thickness covering bending, compression, loading, etc

05 p0833 A69-15726

Lift fluctuation on airfoil due to transverse and chordwise gusts applied to rotating fan and compressor blade design

[ASME PAPER 68-FE-28] 05 p0697 A69-16070

Handbook of techniques in high pressure research and engineering, discussing construction materials, design and construction methods, measuring techniques, etc

07 p1137 A69-18412

Strain concentration design factors for notch effect in low cycle fatigue and crack propagation conditions

07 p1235 A69-19383

Optimum geometrical design of multipad externally pressurized journal bearings

07 p1141 A69-19439

Radomes developments for supersonic/hypersonic aircraft and missiles, considering conditions imposed by speed and by electronic requirements

07 p1171 A69-19508

Radomes design and manufacture for high speed flight vehicles, discussing interactions between aerodynamic and electrical requirements with reference to mechanism of aberration

07 p1141 A69-19510

Spherical sandwich radomes designs, discussing aerodynamic loads, wind pressure effect, electrical properties and mountings

07 p1112 A69-19538

Fail-safe design principles and criteria for helicopter structures to prevent operational failure arising from undetected fatigue damage

[AIAA PAPER 69-213] 07 p1054 A69-19549

Minimum weight analysis of Michell trusses transmitting given load to bars within allowable range of axial stress

08 p1410 A69-19893

Intelsat 2 satellite structural design for Apollo communications

08 p1408 A69-19907

Optical resonator as Q meter, discussing error capability and construction

08 p1312 A69-20106

Structural iterative design convergence to minimum weight proved by dual linear programming, discussing global convergence and convergence rate

08 p1413 A69-20351

Fiber composite design, discussing contribution of filament diameter, number, content and properties, ply parameters and void content to structural response

08 p1341 A69-20512

Curved tetrahedral and triangular elements in matrix displacement method covering linear and nonlinear cases

08 p1415 A69-20631

Optimal design of circular cylindrical sandwich shells under pressure and shear loads, showing acceptability of small shear coefficient values

08 p1416 A69-20722

Minimum weight plastic design of circular and annular sandwich plates with piecewise constant cross section, discussing cost reduction

08 p1417 A69-20823

Design parameters for optimum heavily loaded single rotation ducted fan characterized by ultimate wake vortex system

[AIAA PAPER 69-222] 08 p1253 A69-21030

Roll diffusion bonding technique for permitting complex design of coldplates and radiators of spacecraft electronic equipment

09 p1504 A69-22066

Fatigue strength and aircraft structural standards based on experimentally determined safety factors

09 p1619 A69-22571

Optimum design of shells loaded by concentrated forces, discussing thickness relation to middle surface, loading point and manufacturing considerations
11 p1979 A69-24812

Stress analysis, Volume 12, Theoretical and experimental studies of strength of machine structures
11 p1980 A69-24940

Aircraft structure geometry design for minimizing total mass concerning flutter requirements
11 p1989 A69-25493

Complex structure least weight optimization for specific frequency by computerized modification of existing member cross sectional properties
11 p1989 A69-25494

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics
11 p1989 A69-25495

Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method
11 p1989 A69-25496

Flutter design charts for isotropic panels stressed to verge of buckling for typical values of structural damping
11 p1992 A69-25524

Composite materials for aerospace applications, discussing high modulus filaments, structural and non-structural design considerations, nondestructive testing techniques, etc
12 p2111 A69-25852

Isaac Newton telescope, describing support of 98 inch mirror, structure between fabricated cell steel surface and mirror and tests with air bag support
12 p2058 A69-26416

Construction techniques for lightweight mirrors for secondaries, considering optical finishing and thermal expansion
12 p2058 A69-26420

Book on hovercraft design and construction covering aerostatic and aerodynamic craft, cushion performance, ducting, fans, compressors, drag, propulsion, control, stability, economics
12 p2013 A69-26633

Shock pulse criterion limitations and HF transients technique for design and tests of structures and components
12 p2182 A69-26731

Systems design of airframe structures taking into account material characteristics noting structural stability, shell postbuckling, fail-safe designs, etc
12 p2186 A69-26833

Space propulsion system design with consideration for launch and mission requirements, noting upper stage structural design and computer techniques
12 p2148 A69-26834

Fatigue crack propagation and fail-safe design for stiffened large Al alloy panels with crack stoppers, using residual strength analysis method
12 p2186 A69-26835

Thermostuctural simulation of lifting vehicle panel design, considering safety and trajectory shaping of flying laboratory
12 p2060 A69-26836

AZUR German research satellite main structure dynamic characteristics, solar panels, yo-yo despin system, electronic ignition devices and magnetometer boom
12 p2175 A69-26875

Aesthetic preservation of visual amenities in countryside by proper antenna design without affecting performance or cost
12 p2044 A69-26924

Minimum volume face sheet design of circular cylindrical sandwich shell obeying Mises yield criterion for loads transverse to lateral surface and axisymmetric
12 p2189 A69-27117

Optimal design of rectangular frames for stability
13 p2358 A69-27209

MHD generators semihot wall duct, discussing structural design, ceramic insulation elements brazing, temperature control, electrodes, working fluid, etc
13 p2372 A69-27473

Glass reinforced plastics for Hovermarine HM.2 sidewall hovercraft designed for ferry routes
13 p2201 A69-27542

Spacecraft construction materials and strength problems including stress-strain determination, thin shell structural stability, dynamic loads, heat resistance, fiber-reinforced composites, ablation materials, etc
13 p2362 A69-27920

Shock tubes and tunnels design and operation principles for investigating physical and chemical phenomena
13 p2240 A69-27930

Trident 2E and 3B structural design and fail-safe tests, noting difference in fuselage length
13 p2202 A69-27972

Minimum weight design of structures excited to harmonic vibrations by given single load, with intensity dependent on time
13 p2369 A69-28350

European space program developmental and fabrication problems in satellite structure development covering booster constraints, mission constraints, tolerances, etc
13 p2357 A69-28479

Rotating disk of nonuniform thickness, establishing optimum geometry for minimum tangential stress [ASME PAPER 69-DE-36]
14 p2454 A69-28841

Linear elastic structural analysis for one, two and three dimensional continua [ASME PAPER 69-DE-13]
14 p2531 A69-28843

Shock load protection through energy absorption and dissipation in primary or composite structures, listing honeycomb, cellular plastics and rubber mechanical properties [ASME PAPER 69-DE-37]
14 p2531 A69-28846

Power gyro stabilizer kinematic structure synthesis, applying matrix methods to design variables
14 p2446 A69-28924

All metal nuclear thermionic modular converter, discussing applications, design and material requirements or limitations
14 p2398 A69-29181

Composite airframe structural joint design and weight considerations for boron and glass fiber reinforced plastic materials [ASM PAPER W9-23.1]
14 p2535 A69-29448

Fatigue design procedures - Conference Munich, June 1965
15 p2705 A69-30355

Design and test criteria for dynamically loaded structures from various viewpoints, discussing statistical variations, load strength and limitations
15 p2618 A69-30368

Mountbatten /SR.N4/ hovercraft development, seakeeping, skirt design and service introduction
15 p2550 A69-30479

Gun projectiles assisted by solid propellant motor to increase range, discussing construction, performance and free-wheeling rotation band use
15 p2702 A69-30592

Radio astronomical research developments including structural requirements for 100 m telescope
15 p2589 A69-30864

Sailplanes design, discussing structural flexibility, deformations, aeroelastic effects and plastics and man-made fibers
15 p2551 A69-30899

Concorde aircrew seats design for electric operated tracking and lift, vertical movement accommodation seat and back tilt
15 p2553 A69-31167

Full stress design feasibility as function of load conditions, indeterminacy order and structure topology
16 p2872 A69-31915

High strength fibers and composite materials for structural design, considering anisotropy and low ultimate tensile strain
16 p2802 A69-32380

Fatigue data adapted to conditions of specific design part including fatigue limits, S-N curves and various failure diagrams
16 p2794 A69-32433

Short life fatigue data for metals, noting applications in design
17 p3052 A69-32978

Random stress statistical properties and relationship to fatigue life, discussing Fuller prediction, comparison with test data, and vehicle design evaluation
17 p3053 A69-32988

Stress-strain state determination for axisymmetric shells applied to design of circular/annular plates and rotating disks
17 p3057 A69-33194

Rotary wing aircraft speed boundary widening without impairing low speed attributes, discussing structural design factors, airframe design and stability, etc
17 p2897 A69-33209

Critical review of paper on tail rotor structural design principles covering sizing, blade frequency and response and aeroelasticity [AHS PAPER 342A]
17 p3059 A69-33503

Papers on fracture, Volume 5, Fracture design of structures
17 p3060 A69-33559

Arrest mechanisms to halt crack before gross failure, involving material toughness exploitation and subding stress by structural configuration
17 p3060 A69-33560

Rotating machinery fracture and design approach based on effect of detailed stress and strain duty on imperfect materials metallurgical behavior
17 p3060 A69-33561

Fracture safe design practices for pressure vessels and piping, stressing transition temperature and proof testing roles
17 p3060 A69-33566

Fracture design for aircraft vehicles, discussing crack strength requirements and method for serviceability prediction
17 p3060 A69-33563

Elastic sandwich structures design for maximum strength, using potential energy functional to derive governing equations
17 p3062 A69-33708

Network synthesis technique applied to structural dynamics design, using topological formulas to express systems response transfer functions
17 p2933 A69-33709

Directional transmitting and receiving antenna arrays for short wave meteor studies in Kharkov
17 p2939 A69-33903

Monopulse parabolic antenna radiator design for decimeter and meter wavelengths, discussing characteristic properties at optimal dimensions
17 p2939 A69-33905

Minimum weight design of tiltable enclosed antenna structure as subject to deformation constraints
18 p3211 A69-34341

Carrying cables shape optimization for suspended structures under load, using minimum weight criterion
18 p3212 A69-34354

High speed ball bearing skidding, proposing analytic model as design tool, discussing effects of thrust load, speed, oil temperature and flow rate [ASME PAPER 69-LUBS-20]
18 p3140 A69-34377

Composite materials behavior studies for structural applications, using macroscopic and microscopic phenomenological approach
18 p3154 A69-34607

Extreme disturbance analysis and optimum performance and design problems for structural and mechanical dynamic systems, basing solutions on linear, nonlinear and dynamic programming
18 p3106 A69-34663

Lightweight structural design problem of stress concentration associated with load diffusion in rectangular panels with constant stress flanges
18 p3219 A69-34785

Algorithm for minimum weight structures automated design, coupling strain energy criteria with linear interpolation search technique to cover stress and displacement constraints [SAWE PAPER 798]
18 p3219 A69-34861

Army OH-6A helicopter light weight design, considering effects of WRAP /weight, radius, area, power/ factors on empty weight [SAWE PAPER 781]
18 p3091 A69-34870

Aerospace structures optimization, discussing weight considerations and finite element techniques [SAWE PAPER 814]
18 p3221 A69-34896

Erectable metal booms and meshes structural analysis, design and mounting and deployment techniques for space applications
19 p3433 A69-35544

Rigidity of rotors with pin joints, calculating moments of inertia at connected sections of turbine shaft disks utilizing similarity concept
19 p3324 A69-35832

Subsystem designs evaluated on basis of human reliability metric to select desirable design configurations
19 p3261 A69-36026

Structural design optimization based on reliability analysis stressing proof-load test and weight savings consideration under cost constraint
19 p3437 A69-36033

Aircraft structures design, discussing reinforced sandwiches and composites, failure mechanisms, non-destructive testing and fabrication
19 p3438 A69-36325

Book on structural sandwich panels analysis and design covering beams and struts, bending theory, buckling, strain energy use, differential equations, etc
19 p3438 A69-36380

Turbocompressors, reviewing axial and radial compressors
19 p3395 A69-36749

Helicopter rotor blade construction and development, discussing mass balance, fatigue life, fail-safe characteristics, cost and weight ceiling and plastic materials

19 p3329 A69-36768

Design laws of warping-free multicellular box beams under torsion or bending, using variational method

19 p3443 A69-36786

Laminated composites ultimate strength prediction based on consecutive yield procedure with step-wise reduction of strength or load-carrying capacity used as design criterion

20 p3627 A69-37773

Aerodynamic skin heating at high Mach numbers affecting structural design, noting use of high temperature materials, insulation systems and shell construction method

21 p3646 A69-38460

Design and processing tradeoffs for preventing stress corrosion cracking in Al alloy aircraft structural forgings

[ASM PAPER W9-14.4] 21 p3729 A69-38657

Structural design for minimum weight under random loads representing steady vector random function

21 p3731 A69-38870

Composite or sandwich construction design based on employing all available materials and setting up requirements for mechanical and physical properties

21 p3836 A69-38935

Structural and aerodynamic developments in attached inflatable decelerators for deployment of payload at supersonic speeds

[AIAA PAPER 68-929] 21 p3647 A69-39015

Impact limiter system design for Mars landing vehicle noting balsa wood or phenolic honeycomb construction

[AIAA PAPER 68-161] 21 p3820 A69-39228

Hypersonic parachute structural design using nylon ribbon, glass fiber heat shield and ablative coating construction

[AIAA PAPER 68-963] 21 p3647 A69-39230

Sequential design for economic description of potentially redundant elastic structures, noting redesign sequence

21 p3842 A69-39302

Design features comparison and operation principles of gas strain gauges in application to structures, emphasizing independence of temperature variations in pneumatic circuits

21 p3725 A69-39324

Superconducting magnets for MHD generators, discussing design, construction and operation problems

21 p3782 A69-39478

Boron and carbon reinforced composite materials aerospace structural application, discussing weight savings, components structural design and connection and load input problems

22 p4038 A69-39908

Scientific balloon vehicle design and development approaches for altitude, flight duration and payload capacity extension, discussing plastic balloons

22 p3865 A69-40812

Fatigue collapse probability of fail-safe structure compared to safety factor design

22 p4045 A69-40820

Pressure transducers using heterodyne strain sensors evaporated directly onto pressure diaphragm

22 p3950 A69-41222

Minimum radius of three dimensional cam gears calculated from driven element motion and pressure angle

23 p4168 A69-41413

Minimum weight and optimal cross sections design for statically determinate and indeterminate shell and H beams, using variational method

23 p4225 A69-41424

Modular configuration of recoverable scientific MAP (Modular Auroral Probe) payloads aboard Nike-Apache rockets, discussing payload design concepts

23 p4223 A69-41763

Potential energy modeling method for optimal design of structural systems with diverse performance criteria, giving truss design example

23 p4228 A69-41923

Rib cross sections distribution for cylindrical shell under concentrated longitudinal forces obtainable by designing for minimum strain energy

23 p4228 A69-41988

Thin walled rods for girder and frame systems designed by matrix method, solving differential equations for tension, compression, bending and torsion

23 p4230 A69-42005

Ridge-slot-ridge slow-wave structures used in multibeam TWT (traveling wave tube), analyzing E type electromagnetic dispersion as function of system parameters

23 p4140 A69-42049

Structural technology for large radio and radar telescope systems - Conference, Cambridge, Mass., October 1967

23 p4147 A69-42120

Structural features and performance of 300 ft steerable receiving antenna, discussing aiming error, aperture efficiency, azimuth and altitude drive

23 p4148 A69-42121

Computerized evaluation of elastic deformations of 100 m parabolic reflector designs for Max Planck Institute radio telescope, outlining supports and dish structure

23 p4148 A69-42122

Structural analysis program for obtaining steerable antenna surface deflections at various altitude angles and wind conditions as design parameters

23 p4230 A69-42129

Canadian radio observatory 150 ft telescope antenna, discussing dish structural feature for resisting gravity, wind and thermal stresses

23 p4149 A69-42134

Large paraboloidal reflector antenna computerized structural design, detailing framing, steering control, support structure, etc

23 p4231 A69-42135

Metal space frame radome design, considering electromagnetic performance, structural integrity, cost, membrane structures stability, etc

23 p4231 A69-42139

Integrated civil engineering system /ICES/ and structural design language /STRUDL/ programming and operating characteristics, including computer run example

23 p4134 A69-42146

Structural aircraft design requirements for high flight speeds stressing aerodynamic heating, heat resistant materials, weight and geometry problems

23 p4233 A69-42164

Li, Na and K heat pipes for high temperature emitter and low temperature collector thermionic applications

23 p4074 A69-42297

Pumping pore size and permeability of wicks as part of heat pipes design

23 p4074 A69-42298

Causes of ascent failures in high altitude balloons, discussing test methods and specifications revisions

24 p4251 A69-42714

Stress analysis in design techniques taking into account failure of flawed structures, discussing fracture mechanics

24 p4398 A69-42773

Mathematical flow graphs application in analysis and design of elastomechanical structural systems

[AAS PAPER 69-151] 24 p4339 A69-42816

Materials research structural design cycle, discussing simultaneous optimization, constituent materials, fabrication process, load environment and mission constraints

24 p4399 A69-42991

Linear viscoelastic model parameters optimization for designing automobile lap seat belts, assuming abrupt impact stop

[ASME PAPER 69-APMW-25]

24 p4275 A69-43094

Li-F-H tripropellant study, discussing injection method variations and thrust chamber configuration effects on characteristic velocity efficiency and heat flux measurement

24 p4362 A69-43128

Structural analysis and statistical fracture approach to design and testing for polycrystalline ceramic materials, including combined stress testing and load redistribution models

24 p4333 A69-43339

Nucleate boiling effect on operation of low temperature heat pipes, using everted stainless steel to permit visualization of wick structure and bubble nucleation

[ASME PAPER 69-HT-24]

24 p4412 A69-43544

STRUCTURAL DYNAMICS

U DYNAMIC STRUCTURAL ANALYSIS

STRUCTURAL ENGINEERING

Tubular metal parts and assemblies, discussing flaring, forming, beading, tapering and step drawing

03 p0435 A69-13918

Engineering glass manufacturing, properties and applications in buildings, vehicles, lamp and electronic devices, etc

04 p0619 A69-14585

Applied mechanics yearbook covering shell theory, elastic stability and other problems

05 p0831 A69-15685

Matrix method for structural analysis using force and rigidity methods

07 p1239 A69-19776

Development of materials in aerospace structures and propulsion systems, discussing superelastic alloys, graphite fibers, composites, refractory metals and processing techniques

08 p1332 A69-20306

AZUR satellite structural development static and dynamic considerations, discussing center of gravity, notching technique and test results

12 p2187 A69-26876

Aircraft noise alleviation through flight procedures improvement, home building modification and noise standards legislation

14 p2392 A69-29154

Integrated structural and dynamic testing plans for proposed large interplanetary spacecraft, discussing acoustic testing, testing environments and flight environment transformation into laboratory

15 p2588 A69-30399

Linear theory of elastic stability of structures, discussing deformation kinematics, perturbed and neutral equilibria and solutions for buckling of beams, plate, shells, etc

17 p3054 A69-33042

Radio telescope for radio astronomy in Bonn, discussing structural and operational problems

17 p2975 A69-33702

Solid and structural mechanics theories noting continuum mechanics role

19 p3443 A69-36776

Radio telescope structure material selection criteria, developing deformability criteria for structures under various stresses

20 p3546 A69-38306

Mohr tensor representation and Mohr theorem proof developed for general problem in structural engineering

22 p4038 A69-39903

Programming aspects of computer uses in civil engineering, stressing engineer-coder communication via flow diagrams

22 p3903 A69-40138

Coding aspects of computers use in civil engineering, discussing language selection, program partitioning and storage use

22 p3903 A69-40139

Documentation aspects of computer programs use in civil engineering, describing maintenance, users and operators manuals

22 p3904 A69-40140

Integrated civil engineering system /ICES/ and structural design language /STRUDL/ programming and operating characteristics, including computer run example

23 p4134 A69-42146

Airplane structure electromagnetic compatibility engineering problem including bonding, electrointerference suppression and static control considerations

23 p4063 A69-42234

Ti-Al alloy structure manufacturing technology covering forming, cleaning, chem-milling, machining, fastening and welding

24 p4324 A69-43431

STRUCTURAL FAILURE

Composite material mechanical failure due to detachment of microfiber ends from elastic matrix while under tension

01 p0171 A69-11259

Fracture toughness concept in predicting failure of materials due to sharp notches or cracks

02 p0336 A69-11431

Fatigue properties and failure mechanisms of glass reinforced plastics based on chopped strand mat-polyester resin laminates

02 p0269 A69-11795

Composite tensile-failure modes, discussing failure load prediction, experimental data and statistical analysis of stress concentration effects

02 p0347 A69-12514

Liquid metal adsorption induced embrittlement, noting bond strength reduction and grain boundaries penetration

03 p0448 A69-13872

Random cumulative damage theory for fatigue failure of steel under sinusoidal loading taking into account randomness of time to failure and possession of memory

04 p0680 A69-15154

Fracture surface topography and applications to fracture analysis of laboratory and service failures, describing fracture models

04 p0619 A69-15394

General linear theory of isotropic cumulative fatigue involving phenomenological consideration of fatigue damage accumulation

[ASME PAPER 68-WA/MET-6]

- 05 p0838 A69-16149
Collection of papers on metal fatigue theory and design
- 06 p1024 A69-17525
Stress-strain response up to ultimate failure and ultimate strength of laminated composite with nonlinear orthotropic lamina
- 07 p1170 A69-18710
Laminated composite fracture statistical theory with stress enhancements in elements next to primary fracture, comparing elastic and plastic matrices
- 07 p1170 A69-18712
Rupture times in analysis of creep tensile instability in uniformly pressurized thin walled membrane shells of revolution, comparing two criteria
- 07 p1234 A69-19378
Flow fracture and rheological properties of viscoelastic material under biaxial loading
- 07 p1202 A69-19386
Neurological impairment in baboons exposed to prolonged decompression simulating high altitude aircraft cabin structural failure, noting neuropathological examination results
- 07 p1067 A69-19426
Fail-safe design principles and criteria for helicopter structures to prevent operational failure arising from undetected fatigue damage
[AIAA PAPER 69-213]
- 07 p1054 A69-19549
Stress analysis split method for determining residual strength and fatigue crack life of damaged or initially cracked VTOL structures
[AIAA PAPER 69-214]
- 07 p1237 A69-19576
High pressure storage vessels for gaseous hydrogen, discussing failure, manufacturing controls and access for internal nondestructive inspection
[ASM PAPER D8-14.1]
- 07 p1143 A69-19666
Critical analysis of Sedov contention of infinite stress development at ends of brittle cracks
- 07 p1238 A69-19690
Stresses nature at ends of brittle cracks, discrediting finiteness under certain conditions
- 07 p1238 A69-19691
Translunar cracks in laminated graphite filament composites, noting effect of thermal stresses due to cooling
- 08 p1337 A69-20483
Variational method for safety limits of perfectly plastic simply supported conical sandwich shells subjected to uniform internal pressure and obeying Mises yield criterion
- 08 p1416 A69-20702
Failure causes for planetary reduction gear tooth for adjustment of radio telescopic antennas, studying fracture characteristics, working conditions and loading moments
- 08 p1321 A69-20853
Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations
- 09 p1611 A69-21479
Failure modes in fiberglass reinforced epoxy laminates subjected to compression loadings, discussing cracks formation and delamination at glass-resin interface
- 09 p1529 A69-22305
Algorithm in fault detection and isolation, discussing test optimization for complex systems or structures subject to failure
- 10 p1698 A69-22978
Stress corrosion of nonage-hardenable Al-Mg-Cr alloy investigated for failure in absence of grain boundary precipitate, using notched specimens
- 10 p1709 A69-23055
Low cycle fatigue of metals under biaxial strain, considering specimen life and strain amplitude correlation
- 10 p1797 A69-23083
Temperature and strain rates effect on delayed yield and failure of plasticized epoxy resin
- 10 p1717 A69-24218
Statistical parameters of critical load distribution in buckling of imperfection sensitive elastic structures, noting probability of failure
- 11 p1969 A69-24415
Aircraft structures fatigue strength determination, discussing test procedures, sample preparation, strength prediction, etc
- 11 p1970 A69-24525
Book on strength and failure of viscoelastic materials covering linear and three dimensional polymers or polymer-based materials, flexibility and temperature effects
- 11 p1970 A69-24610
Incremental collapse of shells under cyclic loadings in terms of generalized variables, finding interaction surfaces of load multipliers
- 11 p1980 A69-24820

- Tresca shear stress fatigue failure criterion and experimental data for combined bending and torsion acting out of phase
- 11 p1984 A69-25140
Aircraft structures fatigue life determination based on Kordonskii method, comparing steel tests result with linear summation theory
- 11 p1987 A69-25345
First excursion failure survival probability of randomly excited structures, considering single degree of freedom linear oscillator under Gaussian white noise
- 11 p1990 A69-25505
Tensile strength and failure loading evaluation for structure, discussing stresses in neighborhood of crack, crack toughness measurement and fracture mechanics
- 12 p2176 A69-25861
Computationally stable solution of finite element analysis of elastic-plastic response of nonlinear discrete structures loaded beyond yield load
- 12 p2185 A69-26819
Local failure of axially loaded plastic foam core sandwich panels, using face wrinkling analysis procedures
- 13 p2357 A69-27207
General linear theory of isotropic cumulative failure involving phenomenological consideration of fatigue damage accumulation
[ASME PAPER 68-WA/MET-6]
- 14 p2535 A69-29436
Nonlinear programming for calculating static and kinematic failure of one dimensional structures by extending results from linear programming
- 14 p2418 A69-29597
Stress corrosion in smooth and prenotched maraging steels exposed to sodium chloride solution and natural sea water
- 14 p2467 A69-29940
Structural fatigue-inducing random load spectrum analyzed and computed for laboratory simulation
- 15 p2705 A69-30363
Materials and structural failures under short time compressive loadings, showing structural response to tensile stresses produced by rarefaction waves
- 15 p2639 A69-30364
Reaction rate theory for dilatational failure of heterogeneous materials subjected to stress
- 15 p2710 A69-30813
Fatigue life gage on operational aircraft providing in situ monitoring of fatigue damage prior to and during propagation of running fatigue cracks
- 15 p2613 A69-31271
Automated IR fatigue crack detection in sonic test facility capable of subjecting large aircraft or missile structures to intense sound fields
- 15 p2631 A69-31505
Deformation detection by stress wave analysis technique /SWAT/, noting pressure vessel applications
- 18 p3223 A69-35080
Isotropic plate critical strength measurements, evaluating role of material shear modulus
- 18 p3225 A69-35361
Fractography of compact fracture toughness specimens failure, noting stress at fracture origin and crack growth rate
- 20 p3557 A69-36957
Torsional-flexural buckling of thin walled open sections under eccentric load, emphasizing singly symmetric sections loaded in plane of symmetry
- 20 p3625 A69-37653
Boron fiber reinforced Al alloys spall failure and shock induced filament damage, using flyer plate technique
- 20 p3562 A69-37772
Curved beams ultimate strength using angular velocity considerations for collapse load
- 20 p3629 A69-38031
Decompression study simulating supersonic aircraft cabin small structural failure at 60,000 ft, using monkeys as subjects
- 21 p3665 A69-39171
Snap through in thin shells with initial irregularities during creep, determining critical time to failure by analyzing undisturbed buckling process
- 21 p3838 A69-39188
Brittle failure models, discussing rheological properties, Griffith energy criterion properties, crack behavior in elastic and linear viscoelastic media, etc
- 21 p3839 A69-39194
Scattered light mean intensity determination in twilight aerosol atmosphere from satellite observations, formulating boundary value problem
- 21 p3717 A69-39656
Deformation of thin walled spherical shell reinforced with equatorial hoop by concentric equal forces
- 21 p3846 A69-39714

Fatigue collapse probability of fail-safe structure compared to safety factor design

22 p4045 A69-40820
Polymer film breakdown under impact of supersonic plasma beam pulses from capillary discharge chamber, including photomicrographs of cavities and structural defects

22 p3974 A69-41031
Scale factor in designing uniform strength structures for dynamic load effects determined by recording fatigue limit and failure location, using variable cross section samples

23 p4225 A69-41422
Fatigue tests with cylindrical samples for observation of macrocrack formation and propagation at bottom of notches, discussing kinetics of fatigue failure

23 p4225 A69-41425
Space frame radome model elastic buckling tests for load deflection and maximum load predictions, considering individual beam failure and complex instability

23 p4232 A69-42143
Structural changes in subsurface layer and surface microgeometry factors of metal fatigue failure, explaining crack formation and propagation

24 p4395 A69-42559
Causes of ascent failures in high altitude balloons, discussing test methods and specifications revisions

24 p4251 A69-42714
Postbuckling analysis by equilibrium solutions of conservative system near critical point, considering stability failure in elastic structure under increasing load

24 p4396 A69-42730
Structural materials deformation response to loading conditions and stress or strain cycle analysis to predict failure, including creep and stress relaxation

24 p4398 A69-42771
Stress analysis in design techniques taking into account failure of flawed structures, discussing fracture mechanics

24 p4398 A69-42773
Civil aircraft structural components failure analysis, discussing fatigue failures and fail-safe design for accident prevention

24 p4251 A69-42779
Long term fatigue tests of wooden gliders, discussing structural materials fatigue strength and glider strain spectra

24 p4398 A69-42912
Model for estimating creep life of material containing wedge crack growth

24 p4399 A69-43032
Structural airframe fasteners, reviewing systems for fatigue critical wing/fuselage structures, honeycomb panel attachments and data on fatigue life

24 p4325 A69-43437
Various fasteners influence on fatigue life of bolted joints, noting high clamping force beneficial effect

24 p4325 A69-43438
Damping influence on shallow arch static and dynamic snapping under step pressure load

STRUCTURAL FATIGUE U FATIGUE [MATERIALS] STRUCTURAL FOUNDATIONS U FOUNDATIONS

STRUCTURAL INFLUENCE COEFFICIENTS

Duality between effect and influence problems in linear elastoplasticity, obtaining rules for influence functions plotting

09 p1612 A69-21604
Structural influence coefficients from vibration test modes and frequencies, eliminating errors by Gram-Schmidt orthogonalization

Fatigue endurance of structural elements determined from stress rupture strength under high and low loading rates

04 p0673 A69-14536

Spring supported hydrostatic shaft seal with floating members isolated from structure
 [ASME PAPER 68-WA/LUB-9]

05 p0768 A69-16132

Static endurance of aircraft structural elements under single and multiple loading, based on real alloys and crystalline materials theories

07 p1231 A69-18554

Strength increase in steel components of aircraft, missiles and submersibles in relation to chronological application sequence, discussing ultimate strength
 [ASM PAPER GG8-9.4]

07 p1169 A69-19675

Stress relaxation in structural elements, analyzing unsteady creep in case of strain hardening following power law

07 p1237 A69-19683

Bar flexure determination for Saint Venant torsional and transverse loading, solving differential equations by finite element methods

09 p1614 A69-21722

Mathematical model for improving statistical approximation convergence and accuracy in estimating structural components parameters

09 p1461 A69-21857

Aluminum bonded structures corrosion resistance through adhesive primers and surface treatments

10 p1700 A69-24088

Flat bar optimal cross section under tensile stress applied to minimize stress in large structural components using elasticity theory

11 p1986 A69-25203

Shim joints design for composite material structural members reinforcement in joint region, considering weight factor
 [AIAA PAPER 68-341]

11 p1987 A69-25369

Complex structure least weight optimization for specific frequency by computerized modification of existing member cross sectional properties

11 p1989 A69-25494

Inelastic structural system stresses, strains and displacements analyzed by differential stress-strain relationships, using finite element method
 [AIAA PAPER 68-291]

13 p2364 A69-28208

Numerical procedure to optimize complex structures by determining relative proportions of selected elements attaining flutter speed with minimum total mass

16 p2874 A69-32163

Structural members stability mathematical models using lumped bars and springs simulating postbuckling behavior

18 p3211 A69-34342

Book on deformable bodies mechanics covering load resisting members of structures and machines

18 p3222 A69-34927

Wide panel Ti structural extrusions with integral stiffeners, discussing material, sizes, properties and tolerances

19 p3319 A69-35552

Elastic stiffness, kinematically equivalent loads and initial loads due to initial strains of FUGA 6 element, describing program for matrices generation

19 p3447 A69-36852

Natural oscillations of loaded strings, membranes and geometric bodies with distributed loads treated as material discontinuities

20 p3578 A69-38292

STRUCTURAL RELIABILITY

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
 [AIAA PAPER 68-1166]

03 p0465 A69-13561

Damage tolerance as design consideration for aircraft safety and reliability, discussing application of failed single principal member concept to airframe construction
 [AIAA PAPER 69-212]

07 p1056 A69-19574

Quality control tests for adhesives used in structural parts including ultrasonic and nondestructive tests

09 p1513 A69-22564

Structural reliability tests using photoelasticity and associated techniques, discussing computer methods, materials research, etc

09 p1479 A69-22734

Glass finish and glass resin chemical bond adhesion roles in filament wound structures response, failure and filament strength

14 p2468 A69-29345

Spacecraft structures reliability, discussing detection, identification, assessment and control of defects

18 p3146 A69-34513

Plastics thermal properties and industrial structural applications dependency on temperature

18 p3161 A69-34839

Time-dependent failures of components subjected to fatigue loading analyzed for reliability prediction

19 p3437 A69-36032

Structural design optimization based on reliability analysis stressing proof-load test and weight savings consideration under cost constraint

19 p3437 A69-36033

Aircraft structures efficiency and weldability as function of application, welding procedures and metallurgical factors, considering high strength Al alloys, Ti and Ni alloys, etc

20 p3550 A69-37457

Eddy current machine /nondestructive testing device/ for aircraft structures surface cracks detection

21 p3719 A69-38391

Concorde structural tests emphasizing problems associated with thermal cycle, including fatigue test setup on complete airframe
 [RAES PAPER 16]

22 p4043 A69-40495

Aerothermal-structural reentry safety evaluation for SNAP-27 radioisotope Graphite Lunar Module Fuel Cask at orbital and superorbital velocities
 [AIAA PAPER 68-1166]

22 p3979 A69-40551

Crimping method for preventing nuts loosening, discussing elliptical deformation and point crimp for obtaining maximum interference fits

22 p3957 A69-40828

Safety standards for DC 10 aircraft, considering cockpit design, hydraulic, electric power, autoland and direct lift control systems, structural safety and crash worthiness

22 p3867 A69-41133

Causes of ascent failures in high altitude balloons, discussing test methods and specifications revisions

24 p4251 A69-42714

Safety and failure of components - Conference, Brighton, England, September 1969

24 p4397 A69-42767

Large space erectable structures rigidity, stiffness, thermal stability, structural efficiency and integrity
 [AAS PAPER 69-152]

24 p4398 A69-42877

STRUCTURAL STABILITY

NT SHELL STABILITY

Deflection of orthotropic sandwich plates with unequal facing thickness with edges subjected to uniform and concentrated loading

01 p0172 A69-11270

Structural stability of manganese austenitic steels at high temperatures, discussing phase transformations and carbide precipitation changes

01 p0100 A69-11294

Instability of struts subjected to axial force and radiant heat, considering elastic and thermal deformation

02 p0337 A69-11716

Limit load analysis of three dimensional rigid perfectly plastic continua by approximate variational method

02 p0338 A69-11721

Dynamic stability of structural system excited by random load, discussing effect of nonlinearities and dynamic snapping problems

02 p0339 A69-11988

Mathematical aspects of stability of equilibrium configurations

02 p0340 A69-11991

Finite deformation mode stability for finite amplitude first diameter nonlinear plastic wave initiation and growth at impact face in long rods

02 p0342 A69-12279

Liquid propellant space launch vehicles longitudinal modes natural frequency, discussing coupled engine-propellant supply system stability
 [AIAA PAPER 68-289]

02 p0335 A69-12393

Direct matrix method for evaluation of critical loads and buckling modes for nonuniform flexural rigid plates having end and side constraints

03 p0522 A69-12866

Single degree of freedom structural damping estimations from viscous and hysteretic energy dissipation data

03 p0523 A69-12947

Equilibrium stability of elastic circular arch constrained in rigid cavity and subjected to uniformly distributed parallel loading

03 p0524 A69-13066

Elastic stability equations solved in geometrical linearization for thin anisotropic plates under transverse shear, using variational method

03 p0525 A69-13130

Strain induced deformational instability of aluminum alloys

03 p0447 A69-13818

Symmetric structure stability with first and second order imperfections, analyzing discrete system with n degrees of freedom

03 p0529 A69-14062

Elastodynamic boundary value problem solution for stability in linear elasticity

03 p0530 A69-14066

Computer method calculating stressed state of elliptical bottom of cylindrical pressure vessel based on differential bending equations for shell of revolution

04 p0668 A69-14275

Stability against snap-through and final states of shallow arches on elastic foundations and subject to time varying loads
 [ASME PAPER 68-WA/APM-26]

04 p0669 A69-14394

Two point boundary value problems for determining buckling behavior of two hinged circular arches
 [ASME PAPER 68-WA/APM-18]

04 p0669 A69-14399

Energy transfer in circulatory force fields, noting mechanism changes for simultaneously operative original field and adjoint field energy sources

04 p0671 A69-14415

Stability of elastoplastic clamped free rod, noting compressive force for production of new equilibrium state and occurrence of transition to state

04 p0679 A69-14925

Bending of rectangular plate with partial clamping, obtaining solution by superposition method

04 p0681 A69-15289

Schaefer theory of two parameter eigenvalue problems applied to stability of twisted bars, discussing quick estimate of critical loads

04 p0682 A69-15290

NeoHookean /incompressible solid/ rectangular parallelepiped compressed between lubricated rigid plates, comparing stability bounds with predicted critical loads

04 p0682 A69-15303

Elastic rods shape for maximum stability defined by solution of variational problem, assuming noninfinite compressive stresses

05 p0832 A69-15688

Stability theorems for discrete linear circulatory systems with N degrees of freedom for static and dynamic loss of stability in presence of velocity dependent forces

05 p0836 A69-15875

Matrix displacement and force methods of stability analysis, deriving method of determining geometrical stiffnesses for complex structures

05 p0841 A69-16399

Structural stability of cobalt base superalloy at high temperature prolonged exposure under stress

05 p0781 A69-16448

Mechanical equilibrium and stability conditions for system of interacting atoms in crystal structure

06 p0944 A69-17504

Small bending stiffness effect on inflated torus and cylindrical shells under radial load for determining large space structure stiffness

06 p1024 A69-17607

Mechanical stability of pressed and forged Ti alloy gas turbine disks at high temperatures and rates of rotation

06 p1026 A69-18018

Thermally induced vibration and flutter of flexible spacecraft boom, discussing stability by considering boom as cantilever beam
 [AIAA PAPER 69-21]

06 p0869 A69-18144

Spacecraft control system and flexible structures interactions, discussing transient phenomena, limit-cycle oscillations and instabilities
 [AIAA PAPER 69-116]

06 p1019 A69-18187

Transverse motion of embedded or free semifinite beam with given initial displacement and velocity, using potentials leading to integral equations
 [ONERA-TP-653]

07 p1230 A69-18264

Static endurance of aircraft structural elements under single and multiple loading, based on real alloys and crystalline materials theories

07 p1231 A69-18554

Critical axial load for elastic instability of unidirectional equally spaced fibers in plane of composite plate and buckling modes

07 p1232 A69-18714

Miniature current discontinuity antennas for VHF and UHF, describing airborne electronically steerable array exhibiting efficiency and minimum structural disturbance

07 p1105 A69-19111

Axially loaded viscoelastic constrained bar instability for large deformation

07 p1235 A69-19440

Free surface strain increment components on high carbon steel compression specimens to estimate tensile plastic instability onset, noting ductile fracture criterion

08 p1328 A69-19891

Thin walled symmetrical angle section beam stability under bending moment by section deformation or torsional buckling

08 p1410 A69-19892

Stability of hydrostatic gas bearings with large clearances

08 p1303 A69-20271

Fiberglass reinforced plastic plates strength coupled to elastic base with allowance for tangential shearing stresses

08 p1412 A69-20334

Stability and bending of flexible plates and shallow shells obeying hereditary relations solved by singular kernel functions

08 p1413 A69-20335

Forced vibration of thin elastic plate resting on elastic foundation and subjected to time dependent loads and external damping

08 p1416 A69-20692

Elastic stability of one dimensional structures analyzed by energy method, discussing deformable line, conservative forces and linear stability

08 p1418 A69-20846

Simply supported isotropic cylindrical panel stability under axial compression, obtaining asymptotic series expansion for upper critical stress

08 p1419 A69-21182

Gyrostatic moments effects on critical angular velocities of varying and constant cross section rigidly and elastically supported hinged rotors

09 p1567 A69-21384

Bar flexure determination for Saint Venant torsional and transverse loading, solving differential equations by finite element methods

09 p1614 A69-21722

Uniform gravity load effect on buckling of beam continuously supported by soft foundation and subjected to uniform lateral load

09 p1615 A69-21927

Gas bearings for spool gas generator for aircraft turbine engines, noting rotor bearing stability and LP spool balancing and seal leakage
[ASME PAPER 69-GT-60]

09 p1513 A69-22515

Plates stability and corner stress-strain state under variable loads calculated by method analogous to structural mechanics

10 p1792 A69-22849

Pointwise bounding of eigenfunctions in vibration and stability problems in elasticity theory

10 p1794 A69-22925

Long rectangular rods stability and vibrations under elastic deformations using bending theory

10 p1802 A69-24024

Response and stability of self sustained two degrees of freedom system with nonlinear damping, noting harmonic oscillations
[ASME PAPER 69-VIBR-24]

10 p1806 A69-24171

Natural mode structural analysis matrix methods for small displacements, discussing curved local subbeam in space and circular arch

11 p1969 A69-24374

Slender elastic rod stability under spatial finite deflection, analyzing critical load by using Kirchhoff analogy and gyroscope motion

11 p1970 A69-24609

Lame problem for elastic isotropic medium having free energy dependent on medium deformation and deformation gradients, estimating minimum surface curvature

11 p1970 A69-24632

Two dimensional elastic reinforcements effects on stress, strain and elasticity of quasi-homogeneous anisotropic elastic medium

11 p1981 A69-24941

Finite difference method for transient and steady state response of vibrating plates, considering explicit and implicit formulas

11 p1983 A69-25020

Book on statics and dynamics of anisotropic and heterogeneous elastic structures covering thin heterogeneous anisotropic panels, elastic and sandwich plates, etc

11 p1986 A69-25236

Servocontrol to delay flutter onset of aeroelastic structures, discussing rapid amplitude and phase changes near instability point, wind tunnel models, instrumentation, analog simulation

11 p1992 A69-25518

Warping rigidity effect on stability of cantilever bar under eccentric follower end load, discussing bending torsional flutter and buckling

12 p2179 A69-26212

Critical load for anisotropic right-angled isosceles triangular plate stability with large deflections obtained from differential equation

12 p2180 A69-26270

Antiflexure cylinder for large astronomical mirror, noting support by astatic counterpoint levers and simple flanges

12 p2056 A69-26409

Bending of weightless thin elastic beams clamped to circular template by external force

12 p2181 A69-26572

Mathematical bending theory for three layer elastic plates containing light or rigid fillers

12 p2182 A69-26678

Simply supported laminated anisotropic rectangular plate with coupling occurring between bending and in-plane extension, discussing stiffness analysis by Fourier series method

12 p2184 A69-26808

Optimal design of rectangular frames for stability

13 p2358 A69-27209

Equilibrium paths in initial postbuckling of elastic structural systems, discussing stability boundaries and relationships between imperfections and critical loads

13 p2359 A69-27261

Chemical composition of cermet material for radial sealing of high temperature gas turbines, ensuring structural stability and oxidation resistance

13 p2275 A69-27344

Bounding technique of first excursion probability for random vibration, considering relation to reliability of mechanical and structural systems under random disturbances

13 p2361 A69-27438

Thin walled channel columns section stability analyzed in terms of overall /Euler/ and local buckling

13 p2361 A69-27440

Shear buckling of clamped rectangular linearly tapered plates, considering uniform shear stress and load

13 p2361 A69-27443

Microstructural stability Fe-Ni base heat resistant alloy Pyromet 860 during long time creep-rupture testing

13 p2279 A69-27764

Subelement geometrical stiffness determined, considering complete element natural modes

13 p2362 A69-27838

Thermal and mechanical stability of fused silica lightweight mirror structures, examining impact and shear strengths of fused joints

13 p2261 A69-27954

Stress and displacement fields for uniaxially loaded infinite elastic continua with doubly periodic array of holes and inclusions, using finite element method

13 p2363 A69-28133

Rectangular plate buckling analyzed by finite element method with deflection function

13 p2364 A69-28225

Discrete element plastic analysis of long prismatic bars under transverse loading in longitudinal direction, based on matrix displacement method

13 p2365 A69-28237

Higher order difference method for equilibrium and eigenvalue problems of two dimensional structures using iterative solution

13 p2365 A69-28239

Dynamic stability of flexural free transverse vibrations of supported thin walled elastic beam with initial velocity distribution and parametric excitation

13 p2369 A69-28353

Circular membranes vibrational and stability characteristics under simultaneous constant spin and precessional motions, obtaining Hill equation for motion amplitude coefficients

13 p2370 A69-28665

Uniaxial compressive stability of rectangular boron-epoxy laminated plates clamped on loaded edges, determining buckling loads by Southwell plots

13 p2287 A69-28669

Rigid supporting ribs effect on annular plate critical loading, stability loss and buckling

14 p2533 A69-28983

Book on fatigue strength in construction covering structural strength and stability, load design, mechanical properties, elasticity and plasticity theories, stress concentration, strain buildup, etc

14 p2534 A69-29331

Collection of soviet articles on vibrations and stability of devices, machines and control system elements

14 p2536 A69-29747

Nonlinear oscillations stability of solid body connected to base by elastic springs of different rigidities under external forces

14 p2536 A69-29747

Michelson interferometers with large interference fields for plasma diagnostics emphasizing structural rigidity, monochromatic light pulse power, instruments vibrations resistance, etc

14 p2496 A69-29776

Beam deflection equations having different rigidity moduli on each half span

15 p2705 A69-30417

Elastic and elastoplastic bodies, showing vector field for surface condition as sufficient condition for stability

15 p2707 A69-30621

Minimum vibration frequency and compressive force for freely supported rectangular, triangular and circular plates simulated on analog computer

15 p2708 A69-30665

Aluminum models of single cell simply supported folded plates to study instability phenomena possibly occurring in actual structure

15 p2709 A69-30679

Fatigue cracks growth rate under combined static and cyclic stresses

15 p2709 A69-30808

Fatigue crack propagation caused by cumulative damage due to strain cycling at crack tip, relating resistance to cyclic ductility

15 p2710 A69-30812

Lifetime of structural plastics under vibration loading, considering polystyrene and polyformaldehyde samples under tension

15 p2643 A69-30972

Repeated static stress limit of internal pressure vessels, emphasizing effect of redistribution of stresses and strains

15 p2712 A69-30973

Gradient iterative methods for finite element eigenvalue problem associated with stability and vibrations of elastic systems based on Rayleigh quotient

16 p2871 A69-31898

Plate bending problems, comparing various approximate analytical methods including point matching, Galerkin, Ritz, Kantorovich and least squares techniques
[AIAA PAPER 68-296]

16 p2874 A69-32160

Ceramic phase reinforcement of metals and alloys, discussing interfacial energies, binding forces and elastic stress fields
[ONERA-TP-661]

16 p2802 A69-32204

Absolute stability, stability in whole and engineering stability in reference to Liapunov stability applicability

16 p2874 A69-32244

Linear theory of elastic stability of structures, discussing deformation kinematics, perturbed and neutral equilibria and solutions for buckling of beams, plate, shells, etc

17 p3054 A69-33042

Stress distribution in variable rigidity reinforcing frame of circular cylindrical shell using strain energy method

17 p3055 A69-33131

Soviet collection of articles on theoretical and experimental investigations of strength of mechanical engineering structures

17 p3056 A69-33190

Stability of nonuniformly heated rectangular plate reinforced by elastic longitudinal and rigid transverse ribs, accounting for influence of torsional and bending rigidities

17 p3057 A69-33198

Wire wound glass fibers for rocket motors, discussing rupture strength

17 p3021 A69-33357

Thin circular ring stability under uniform external transverse loading at various angles, discussing transverse shear deformation effects and buckling

17 p3061 A69-33707

- Elastic sandwich structures design for maximum strength, using potential energy functional to derive governing equations
17 p3062 A69-33708
- Soviet collection of papers on energy dissipation during vibrations of mechanical systems, covering elastic oscillations, nonlinear systems, energy frequency characteristics, etc
17 p3062 A69-33912
- Energy dissipation in fiberglass reinforced plastics subjected to axially induced sinusoidal stresses, noting absorption coefficient and hysteresis heating
17 p2993 A69-33937
- Minimum weight design of tiltable enclosed antenna structure as subject to deformation constraints
18 p3211 A69-34341
- Structural members stability mathematical models using lumped bars and springs simulating postbuckling behavior
18 p3211 A69-34342
- Von Karman equations in dimensionless and finite difference forms for deflections of elastic circular plate with central hole under load solved by iteration [ASME PAPER 69-APM-20]
18 p3214 A69-34395
- Longitudinal oscillations of homogeneous elastic rod under nonconservative force at one end, deriving equations of motion and stability conditions
18 p3216 A69-34578
- Buckling in process of loading idealized elastoplastic Shanley column, noting continuous increase possibility
18 p3217 A69-34596
- Stress conditions of anisotropic plate with soldered in circular isotropic aluminum disk in presence of notches at seam, assuming elastic symmetry of plate
18 p3218 A69-34602
- Book on deformable bodies mechanics covering load resisting members of structures and machines
18 p3222 A69-34927
- Beam torsion nodal line displacement dependence on flexural and torsional bending frequency
18 p3223 A69-34998
- Elastic bodies brittle stability weakened by cut, developing criterion for determining critical cut length
18 p3224 A69-35314
- Elastic stability of sandwich materials in microvolume under compressive force analyzed using three dimensional linearized equations for small sub-critical strains
18 p3226 A69-35374
- Flanges flexural rigidity effect on load carrying capacity, failure mechanism and postbuckling behavior of webs in shear, noting permissible load
18 p3227 A69-35492
- Yield condition of maximum constant distortion strain energy for anisotropic material without incompressibility assumption
18 p3227 A69-35494
- Composite material applications in space vehicle structures, noting strength and stiffness of boron fibers in plastic or metal matrices
19 p3340 A69-35502
- Static dynamic and damage tolerance strengths of advanced materials for VTOL aircraft with emphasis on Ti, cryoformed 301 stainless steels and filamentary composites [AIAA PAPER 69-764]
19 p3433 A69-35658
- Stiffened integrally formed panel stability evaluation based on compression structural efficiency and manufacturing costs [AIAA PAPER 69-760]
19 p3434 A69-35660
- Syphon geometry influence on rigidity and strength determined using integrating Meissner type differential equations with finite difference schemes
19 p3358 A69-35849
- Buckling behavior of idealized Shenley rod consisting of linearly reinforced elastoplastic materials under compression, formulating constraints for stability
19 p3446 A69-36846
- Clamped skew plates natural frequencies analysis using Galerkin method, expressing deflections as double series of beam characteristic functions, stating eigenvalues and eigenvectors
20 p3621 A69-37201
- Deep circular arches undergoing large deflections and stability loss, determining buckling load variations
20 p3622 A69-37210
- Stability loss nonaxisymmetric distribution in elastic annular plates under axisymmetric heating, using Ritz method to determine critical temperature
20 p3623 A69-37327
- Airframe stability of VAK 191 examined by displacement method, using matrix calculations within Automatic System of Kinematic Analysis
20 p3462 A69-37515
- Reinforcement unbonding onset in composite materials determined by continuous dynamic moduli and damping measurements of tensile specimens
20 p3511 A69-37761
- Automated device for load carrying ability of structural elements like gas turbine blades under thermal and mechanical cyclic loads
20 p3544 A69-37816
- Analog method for determining structural creep displacement by setting up boundaries for linear elasticity and perfect plasticity
20 p3628 A69-37915
- Soviet book on thin plates and shells bending and stability during creep covering analytical and numerical solutions for various structural elements
20 p3630 A69-38207
- Natural oscillations of loaded strings, membranes and geometric bodies with distributed loads treated as material discontinuities
20 p3578 A69-38292
- Stability of sandwich panel strip with lightweight core, formulating problem in terms of equilibrium conditions and potential energy of system
21 p3832 A69-38417
- Multilayer sandwich panels containing unequal facings with distinct orthotropic cores, calculating dynamic load and stability of triangular panels
21 p3832 A69-38418
- Gyroscopic system behavior analyzed for steady state operation following transient period
21 p3723 A69-38832
- Two machining processes for eliminating unbalanced state of machine parts, using eccentric cutting and adjustment of part CG for coincidence with spindle axis
21 p3732 A69-39097
- Stability of unbounded homogeneous brittle body containing circular planform crack, determining elastic stresses and critical load by macrocrack propagation theory
21 p3839 A69-39195
- Galerkin method application to solve differential equation and boundary value conditions for elastic stability of bars, showing linear relation between critical loads
21 p3845 A69-39678
- Wobble tolerance influence on axis deflection affecting accuracy during assembling of turbine rotors and stators
21 p3733 A69-39719
- Gupta stability solution extended to liquid anisotropic viscoelastic films, analyzing surface and shear wave perturbations in material structures
22 p3929 A69-39893
- High E modulus, structure, strength and temperature characteristics of reinforcement fibers, considering B, silicon carbide, C and Be
22 p3951 A69-39907
- Stability loss of beams analyzed under compression allowing for various creep conditions in loading and unloading regions, calculating time to failure
22 p4039 A69-39917
- Compressed rectangular beam stability under different creep conditions, deriving relation between creep time and initial deflection
22 p4039 A69-39918
- Elastoplastic analysis of thin plates deformation, discussing loading conditions effects
22 p4041 A69-40064
- Single stage rocket body finite bending stiffness effect on pitching moment using approximate equation, noting applicability to multistage rockets
22 p4037 A69-41048
- Network method for stability of thin nonlinearly elastic compressible material plates, noting difference operators for rigidly clamped plates
23 p4230 A69-42003
- Parkes paraboloid radio telescope structural performance, using rapid survey instrument to measure surface deformations for optimum focusing determination
23 p4231 A69-42130
- Canadian radio observatory 150 ft telescope antenna, discussing dish structural feature for resisting gravity, wind and thermal stresses
23 p4149 A69-42134
- Large deflection of three dimensional bar structures stability analyzed by potential energy minimization method, considering radome design
23 p4232 A69-42141
- Field transfer matrices for simultaneous treatment of free and forced vibrations and buckling through axially loaded Timoshenko beam
23 p4234 A69-42400
- Rigid/plastic solids subjected partly to uniform fluid pressure and partly to general boundary conditions, analyzing uniqueness and stability criteria
23 p4235 A69-42460
- Heated three layer plates stability under finite deflections in supersonic gas flow, deriving aerothermoelasticity equations
24 p4395 A69-42590
- Large space erectable structures rigidity, stiffness, thermal stability, structural efficiency and integrity [AAS PAPER 69-152]
24 p4398 A69-42877
- Limiting load of square plate subjected to shear and reinforced by vertical stiffener, computing membrane and bending stresses as function of flexural rigidity
24 p4399 A69-42967
- Strain diagram with piecewise nonlinear curve for statically indeterminate systems stressed beyond elastic limit
24 p4400 A69-43072
- Newton method providing continuing solutions of nonlinear differential equations through limit or bifurcation points, discussing elastic stability applications [ASME PAPER 69-APMW-14]
24 p4401 A69-43102
- Mechanical model for dynamic buckling of elastic imperfection-sensitive structures under step loading, using perturbation method
24 p4405 A69-43656
- Asymmetric metal flanges effect on beam tilt of aperture antennas
24 p4288 A69-43765

STRUCTURAL STRAIN

- Stress analysis of multiply connected bodies under large elastic strains, deriving second order potentials for plate with elliptical holes
02 p0340 A69-12139
- Strain effects on transverse electromagnetic modes of anisotropic dielectric waveguides at p-n junctions
03 p0406 A69-13830
- Cumulative damage theories application to fatigue data for high strength materials, discussing stress levels
04 p0668 A69-14379
- Temperature stresses analysis for jet lift VTOL aircraft structure during takeoff and landing, discussing fire hazard in lift pod
04 p0548 A69-14841
- Elastic strain and stress in ribbed circular plate bent skew-symmetrically, using orthotropic plates theory
04 p0681 A69-15172
- Book on thermal time independent plastic and time dependent creep strains in structures through analogy permitting inelastic structures analysis
04 p0681 A69-15200
- Repeated loading influence on microstrain region, noting decrease in size with each cycle
05 p0836 A69-15876
- Crack tip displacements and strains in plastically yielded region measured with replica technique
05 p0780 A69-16437
- Grain strain measurements use in studies of high temperature creep
06 p0943 A69-17231
- Initial defects influence on equilibrium states of compressed elastoplastic plates
06 p1025 A69-17684
- Stress-strain state of shells of multicable elevator pulleys under asymmetric load for various friction coefficients and pulley shell lengths and widths
06 p1026 A69-18016
- Plasticity theories for nonisothermal loading, considering plastic strain
07 p1237 A69-19681
- Structural residual stresses determination in oriented fiberglass reinforced plastics by models taking into account mutual influence of fibers
08 p1335 A69-20333
- Material selection for structures under vibration loads, analyzing fatigue strength on basis of stress susceptibility and relationship with tensile strength
09 p1620 A69-22574
- Elastic-plastic deformations /strains/ amplitudes measured at high cycle temperatures in thermal fatigue tests
10 p1801 A69-23844
- Thin elastic conical shells asymmetric deformation under stresses and strains, deriving asymptotic solution
11 p1983 A69-25090
- Analytical expressions for Gaussian constraint of continuum, using continuity conditions as equations of internal geometric couplings
11 p1984 A69-25170

Elastic and elastoplastic strains in materials under various loadings, determining temperature variations by thermoelectric method and verifying by tensile tests
11 p1985 A69-25178

Rotor angular velocity and flexural strain interdependence at critical velocity
11 p1987 A69-25390

Three dimensional problems in crack theory for unbounded brittle body, deriving critical loads from limiting equilibrium equation
12 p2178 A69-25997

Thermal stress and displacement fields in elastic solid weakened by crack outside of circular region, noting plastic zone size and energy dissipation
12 p2179 A69-26216

Hollow circular viscoelastic cylinder axisymmetric plain strain problem, considering displacement, traction and mixed boundary conditions, noting applicability to rocket solid fuel core
12 p2181 A69-26396

Elastic directed curves dynamic theory, considering Hamilton principle, mass conservation and behavior of action density function under rigid body variations
13 p2360 A69-27321

Inverse deformation in elastic materials, using variational principle to obtain equilibrium equations properties
13 p2360 A69-27324

Torsional testing facility for delayed elastic and nonrecoverable strains in materials, noting application to diffraction limited reflecting optics
13 p2240 A69-27955

Microstresses and distortions in quasi-isotropic solid bodies under strain evaluated by correlation functions
14 p2531 A69-28806

Thin elastic plates buckling under small normal load and external edge force
14 p2531 A69-28810

Structural stress under acceleration loading simulated by two dimensional photoelastic model noting improvement of fringe patterns quality
14 p2532 A69-28885

Book on fatigue strength in construction covering structural strength and stability, load design, metal physical properties, elasticity and plasticity theories, stress concentration, strain buildup, etc
14 p2534 A69-29333

Strains determination for laterally edge loaded rectangular plate and sagittas determination of perpendicularly loaded plate proved analogous
15 p2704 A69-30295

Structural strength calculations, considering micro and macro stress distributions
15 p2706 A69-30447

Elastoplastic strains in thin walled beams subjected to oblique bending by mobile loads of coupled concentrated forces, calculating deflections and plastic region distribution
15 p2711 A69-30971

Plane strain solution for thick walled viscoelastic cylinder bonded to thin elastic shell from deformation rate and strain, including inertia effects
16 p2871 A69-31876

Full stress design feasibility as function of load conditions, indeterminacy order and structure topology
16 p2872 A69-31915

Strains in elastoplastic curved beam under bending obtained from approximating stress-strain diagram by parabola
17 p3056 A69-33192

Initial thermostructural stresses in homogeneous quasi-isotropic two component medium, solving statistical boundary value problem thermoelastically
17 p3058 A69-33316

Plane strain fracture toughness determined for crack notched bend specimens using standard test procedure for specific metallic material property
17 p2989 A69-33566

Von Karman equations in dimensionless and finite difference forms for deflections of elastic circular plate with central hole under load solved by iteration [ASME PAPER 69-APM-20]
18 p3214 A69-34395

Grid method of strain determination, discussing print, record, analysis and application
18 p3134 A69-34423

Stress-strain state of open cylindrical shells with arbitrary cross section determined for clamped-clamped, clamped-free and free-free supported shells
18 p3225 A69-35372

Plane strain fracture toughness of high strength steels and Ti alloy from precracked notched bend test method
19 p3346 A69-36436

Design laws of warping-free multicellular box beams under torsion or bending, using variational method
19 p3443 A69-36786

Buckling behavior of idealized Shenley rod consisting of linearly reinforced elastoplastic materials under compression, formulating constraints for stability
19 p3446 A69-36846

Stress and strain concentration factors under initial stages of elastoplastic deformation for circular hole in infinite medium, using method of successive approximation
19 p3447 A69-36860

Generalized strain-measure application to linearization of stress-strain curves of compressive, shear and tensile nature, discussing plastic deformations
21 p3844 A69-39321

Telecentric lens principle for accurate optical strain measurements, using moiré grids
21 p3844 A69-39322

Strain anisotropy matrices behavior along strain trajectories of arbitrary curvature, studying matrices and elastic constants dependence
22 p4039 A69-39914

Strain anisotropy matrix construction for various strain trajectories from elastic properties of expression relating stress and elastic strain deviators
22 p4039 A69-39915

Homogeneous equilibrium equations of nonlinear shallow shell theory, obtaining six stress function solutions for strain measures
22 p4048 A69-41199

Central transverse impacts of sphere on free-free beams, investigating maximum strains variation with impact velocity by narrow band tuned circuit filter
23 p4235 A69-42455

STRUCTURAL VIBRATION

NT BENDING VIBRATION

NT FLUTTER

NT LINEAR VIBRATION

NT MISSILE VIBRATION

NT PANEL FLUTTER

NT SELF INDUCED VIBRATION

NT SUBSONIC FLUTTER

NT SUPERSONIC FLUTTER

NT TORSIONAL VIBRATION

Small oscillations in solid body with arbitrary cavity partially filled with viscous incompressible fluid
01 p0165 A69-10084

Stabilized platform vibration in inertial navigation system with integral correction
01 p0112 A69-10086

Structural vibration problems of SA 330 helicopter from test flight data, discussing natural frequency displacement of blades and dynamic response improvement of structure
01 p0009 A69-10158

Flexural vibration of unbalanced rotating shaft with nonlinear characteristic of elasticity and damping, using equations of motion
01 p0168 A69-10329

Discrete model for investigating beam vibration under various end conditions, determining natural frequency dependence on degrees of freedom
02 p0336 A69-11462

Parametric vibrations of self excited elastic and aeroelastic systems with traveling waves, determining stable vibration boundaries
02 p0337 A69-11561

Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell
02 p0337 A69-11654

Summed and differential types of higher order oscillations in vibratory systems with multiple degrees of freedom under parametric excitation
02 p0346 A69-12422

Soviet book on vibrations of elastic shell partly filled with fluid covering different stages in procedure for shells of axisymmetric configuration
02 p0346 A69-12480

Multilayered shells equivalence to single layer shells for stress analysis, vibrations and stability
02 p0346 A69-12509

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates
02 p0251 A69-12561

Arbitrary phase shift vibrations of airfoil profiles in incompressible flow reduced to Fredholm equations, allowing for trailing vortices influence
02 p0190 A69-12574

Flutter vibration of sails fixed along edge and single wing weather vanes in supersonic flows
02 p0192 A69-12824

Flutter vibration in subsonic flows, analyzing critical velocity for membrane and damping destabilizing effects in nonconservative system
02 p0192 A69-12825

Single and double resonance in system of coupled nonlinear differential equations describing vibration phenomena in mechanical and similar systems
03 p0527 A69-13744

Dynamic behavior of large steerable radio telescope, showing structural resonance influence on error detection system
03 p0412 A69-14091

Thickness twist and face shear vibrations of laminated layer, determining frequencies from stress equations of motion, constitutive equations and boundary conditions [ASME PAPER 68-WA/APM-10]
04 p0668 A69-14392

Vertical, horizontal and rocking vibrations of body on surface of otherwise unloaded elastic half plane, estimating stiffness for coupled vibrations [ASME PAPER 68-WA/APM-12]
04 p0668 A69-14393

Timoshenko beam theory accuracy, defining deflection and rotation in terms of average values over cross section
04 p0675 A69-14593

Statistical energy approach for analyzing steady state vibration distribution in composite structures in terms of energy balances
04 p0675 A69-14687

Beam vibration problems with mixed response-excitation input information solved by recasting equations of motion [AIAA PAPER 68-319]
04 p0676 A69-14711

Ground vibration testing of flight and space vehicles, noting structural damping asymmetries and nonlinearities
04 p0585 A69-14833

Normal modes and natural frequencies of combined linear elastic structures resting on immovable base
04 p0678 A69-14870

Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load
04 p0679 A69-14907

Axisymmetric oscillation modes and frequencies of hemispherical shell partially filled with liquid, using moment theory of shells
04 p0679 A69-14922

Vibration analysis of plates with discrete mass distribution based on Galerkin approach
04 p0682 A69-15293

LOX prevalue accumulator system with He pressurant for prevention of Pogo effect on Saturn 5
04 p0666 A69-15298

Testing techniques and graphical presentation of test results to determine resonant frequencies and oscillation modes in sporting gliders
04 p0549 A69-15420

Equation governing transverse vibration of beams with exponentially varying properties, expressing solution in terms of Bessel functions
05 p0835 A69-15873

Resonant beam tuned vibration damping device, noting weight saving potential [ASME PAPER 68-WA/GT-2]
05 p0837 A69-16138

Orthogonality of natural oscillation modes of shell of arbitrary geometry, using equations of motion from Vlasov engineering moment theory
05 p0840 A69-16200

Turbulent boundary layer loading function for use with finite element structural analysis system applied to elastic aircraft structures random vibration [AIAA PAPER 69-20]
06 p0914 A69-18132

Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect [AIAA PAPER 69-58]
06 p0109 A69-18204

Holographic interferometry, determining mechanical vibration amplitudes of compressor and turbine blades and airframe panel [SAE PAPER 690265]
07 p1130 A69-18313

High speed sampling for dynamic data analysis, considering random and transient vibrations
07 p1232 A69-19139

Longitudinal and transverse vibrations of viscoelastic rods excited by inertia with aid of linear oscillator subjected to harmonic stress, using Kelvin-Voigt model
07 p1233 A69-19326

Circular cylindrical spinning shells vibrations by gyroscopically induced inertia loads, formulating equations of motion based on shallow shell theory
07 p1236 A69-19459

- Analytical solution for plate velocity statistics of turbulent-flow-excited rectangular flat plate, discussing vibration excitation
07 p1236 A69-19461
- Flexible rotor blade dynamic response to radially moving force, emphasizing helicopter rotor vibration characteristics associated with tip-vortex impingement [AIAA PAPER 69-203]
07 p1054 A69-19546
- Vibration characteristics of rectangular plate with fatigue crack and subject to tensile load, applying results to crack propagation in fuselage panels
08 p1413 A69-20399
- Nonhomogeneity effect on transverse vibrational frequency of uniform beams
08 p1413 A69-20413
- Transverse vibration of beam rigidly fastened at one end, using series expansion in terms of set of eigenfunctions
08 p1414 A69-20445
- Liquid filled cylindrical container motion with longitudinal forces applied to base, obtaining stability conditions for natural oscillations
08 p1419 A69-21181
- Three dimensional vibration analysis of circular homogeneous elastic cylinder, obtaining differential equations and zero stress conditions
09 p1612 A69-21601
- Three dimensional analysis of torsional vibrations of circular elastic homogeneous cylinder, stressing new torsional vibrations
09 p1612 A69-21603
- Time average holography for analysis of vibrations, overcoming fringe peak decrease with large amplitude and loss of phase information
09 p1495 A69-21749
- Hypersonic missile interceptor vibration characteristics in lower atmosphere, noting role of base pressure excitation
09 p1614 A69-21890
- Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells, with exact solutions from Flugge shell equation [AIAA PAPER 69-447]
09 p1616 A69-21938
- Structural damping coefficient for free vibrations of one degree freedom general systems motion
09 p1617 A69-22076
- Single degree of freedom mechanical system under random excitation studied for creep effect on vibrations by harmonic analysis
09 p1617 A69-22095
- Gyroscope error due to axial play of inner gimbal of Cardan mounting during base circular vibrations, noting axial clearance reduction
09 p1498 A69-22110
- Natural vibration frequency of circular orthotropic plate with variable rigidity
09 p1618 A69-22238
- Pressure on unsteadily oscillating cylindrical shell in external or internal supersonic flow derived from asymptotic theory
09 p1618 A69-22256
- Vibration natural frequencies and mode shapes in cylindrical shells clamped at both ends, using fundamental differential equation under dynamic surface loading
09 p1618 A69-22274
- Vibrating momentum exchange device /VMED/ in single axis configuration as competitor for inertia wheel or twin gyro
09 p1538 A69-22435
- Strength hypothesis for structures under multiaxial vibration load, taking into account plane stress state
09 p1620 A69-22575
- Damping criteria for satellite vibration based on energy dissipation by material hysteresis, friction in viscous flow, magnetic hysteresis and eddy currents
10 p1791 A69-22921
- Wideband acceleration instrumentation for Rover ground test facility liquid hydrogen turbopumps to study structural and flow induced vibrations
10 p1692 A69-23250
- Interfacial pressure distribution during slip damping in clamped rectangular beams subjected to vibration
10 p1800 A69-23350
- Long rectangular rods stability and vibrations under elastic deformations using bending theory
10 p1802 A69-24024
- Balancing criteria for rotors of rotating machines, discussing acceptable residual specific unbalance, center of gravity displacement and machine vibration tolerance [ASME PAPER 69-VIBR-60]
10 p1804 A69-24149
- Gas turbine blade vibrations, discussing excitation causes and damping techniques [ASME PAPER 69-VIBR-59]
10 p1805 A69-24155
- Central circular hole effect on fundamental frequency of rectangular fixed edges plate, discussing hole size, square plates, etc [ASME PAPER 69-VIBR-62]
10 p1805 A69-24156
- Vibration characteristics of circular cylindrical shells containing water under axial excitation, investigating bubble formation and shell-fluid interaction [ASME PAPER 69-VIBR-4]
10 p1805 A69-24162
- Natural frequencies and mode shapes for longitudinal oscillations of liquid filled elastic circular cylindrical tank with flexible inverted conical bulkhead [ASME PAPER 69-VIBR-11]
10 p1806 A69-24165
- Vibratory acceleration limiting equipment attachment for resonance conditions, utilizing attachment stiffness reduction above predetermined value [ASME PAPER 69-VIBR-23]
10 p1806 A69-24170
- Magnitude limited random excitation effect on linear system response, using single degrees of freedom model representing idealized mechanical structure [ASME PAPER 69-VIBR-41]
10 p1807 A69-24179
- Nonlinear large amplitude vibrations of flexible beam with pinned ends supported simply on rigid base noting frequencies, modes, waveforms and stress distribution [ASME PAPER 69-VIBR-43]
10 p1807 A69-24181
- Atmospheric influence on plane oscillations of space vehicle moving at 100-150 km heights
10 p1792 A69-24208
- Transverse beam natural vibration frequency evaluation method from Timoshenko theory
11 p1970 A69-24581
- Free vibration modes of infinite uniform plate in linear coupled theory of thermoelasticity, considering heat transfer conditions
11 p1976 A69-24793
- Vibration problem of supported beam elastically restrained against rotation at both ends solved by Hermitian and linear differential operators
11 p1976 A69-24794
- Finite difference method for transient and steady state response of vibrating plates, considering explicit and implicit formulas
11 p1983 A69-25020
- Flexible cylinder vibration in nominally axial flow, discussing length, mass, flexural rigidity and diameter variation effects on vibration amplitude
11 p1984 A69-25166
- Hysteresis loop contour equation derivation based on energy dissipation dependence on stress amplitude in cyclically deformed vibrating system
11 p1985 A69-25176
- Amplitudes of forced bending vibrations of frames with superfluous elastohysteretic couplings by dynamic compliances method
11 p1986 A69-25333
- Dynamic unified structural analysis method in computer program, calculating stiffness matrix to obtain natural frequencies and mode shapes
11 p1987 A69-25367
- Free vibration frequencies of simply supported parallelogramic plates, noting skew angle splitting of degenerate frequencies and frequency crossing of modes
11 p1987 A69-25379
- Axisymmetric oscillations of two spherical shells with noncoinciding centers of curvature immersed in compressible or incompressible fluids
11 p1875 A69-25467
- Optimal design of structures with constraints on strength and natural frequency, developing steepest descent boundary value method
11 p1989 A69-25496
- Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustums, considering dimensional and boundary condition influences
11 p1992 A69-25519
- Dynamic analysis of axisymmetric ring stiffened shells with attached asymmetric elastic structures, noting vibration modes
11 p1993 A69-25525
- Thermally induced oscillatory instabilities in spacecraft booms, rederiving thermal torque equation to predict finite twist response
11 p1994 A69-25531
- Vibration eigenfrequencies of helicopter blades, discussing equation integration problems
11 p1995 A69-25673
- Space vehicle dynamic structure response, discussing vibration problems, test methods and responses to periodic, stochastic and forced excitations
12 p2176 A69-25857
- Viscoelastic models for solving longitudinal oscillations of one degree of freedom system under dynamic load, taking into account energy dissipation
12 p2177 A69-25995
- Linear vibrational systems natural frequencies and damping characteristics determined from system reaction to pulse effect
12 p2178 A69-26004
- Vector equation for correction masses for dynamic balancing of rotor supported on n points derived from bearing structure vibrations amplitude and phase
12 p2180 A69-26243
- Energy dissipation and fatigue in metals under cyclic static loads, determining logarithmic decrements of vibrations and Bauschinger effect
12 p2181 A69-26612
- Laminated plates vibrational characteristics calculations by transition matrices, relating stresses and displacements under load
12 p2182 A69-26660
- Soviet book on strength, stability and vibrations covering stability of rods, plates and shells subjected to plastic and elastic deformations, etc
12 p2182 A69-26755
- Friction damping properties of deployed structures vibrating in weightless state compared to damping in space for true determination
12 p2183 A69-26792
- Thin cylindrical shell vibration with three supports analyzed by minimizing Lagrangian of vibration, obtaining frequencies and modes
13 p2359 A69-27257
- Self controlled vibration of elastically supported cylinder in fluid stream due to von Karman shedding, considering fluidelastic interaction, structural deformation and natural frequency
13 p2360 A69-27437
- Bounding technique of first excursion probability for random vibration, considering relation to reliability of mechanical and structural systems under random disturbances
13 p2361 A69-27438
- Acoustic power transferred to plane homogeneous elastic structures and cylindrical shells by neighboring sound sources
13 p2363 A69-28186
- Dynamic stability of flexural free transverse vibrations of supported thin walled elastic beam with initial velocity distribution and parametric excitation
13 p2369 A69-28353
- Circular membranes vibrational and stability characteristics under simultaneous constant spin and precessional motions, obtaining Hill equation for motion amplitude coefficients
13 p2370 A69-28665
- Free vibrations of laminated anisotropic rectangular plates with clamped edges analyzed by Rayleigh-Ritz energy method
13 p2371 A69-28673
- Axisymmetric thermoelastic vibrations of infinite and finite cylindrical shells, determining natural frequencies and stress wave propagation
14 p2532 A69-28979
- Vibrations of thick walled shallow circular cylinder with thickness change in time, applying dynamic elasticity and Volterra equations
14 p2533 A69-28985
- Finite difference method for motion stability of periodic bipolar vibrational systems, considering perturbations
14 p2534 A69-29039
- Orthonormal aspect on vibration modes for nonuniform beams, evaluating normalization for end conditions by using Rayleigh technique
14 p2534 A69-29319
- Runway roughness induced vibrations in highly flexible aircraft, noting effect on pilot control of aircraft and airframe structure
14 p2392 A69-29504
- Collection of soviet articles on vibrations and stability of devices, machines and control system elements
14 p2536 A69-29741
- Machine vibration effects on human operator performance using locomotor model
14 p2409 A69-29742
- Vibrostand effects on statistical characteristics of random vibrations of elastic system, discussing simulation techniques
14 p2536 A69-29743

Vibration damping and elastic bond positioning in nonlinear systems with coincident centers of gravity and rigid damping 14 p2537 A69-29746

External and internal energy dissipation coefficients in vibrating aerodynamic rod structures 14 p2537 A69-29748

Macrostructure of steel, zinc and aluminum ingots using electromagnetic vibrations during crystallization, for stress relieving of welded structures 14 p2456 A69-29916

Steady natural oscillations of unbounded brittle plane with cut under edge load, showing decreased critical load in presence of inertial effect 15 p2703 A69-30050

Perturbation analysis for error estimates in algebraic eigenvalues and eigenvectors problems for solving skewed membrane vibrations 15 p2703 A69-30211

Stroboscopic technique for obtaining interferential holograms of vibrating transparent and reflecting plates 15 p2608 A69-30258

SST fuselage response to reverberant and turbulent boundary layer noise calculated for computing equivalent reverberant acoustic fields 15 p2549 A69-30302

Uncoupled field equations for free large amplitude axisymmetric transverse vibrations of spinning membrane disks 15 p2704 A69-30303

Time dependence of maximum structural response of single degree of freedom mechanical system under random loading 15 p2705 A69-30365

Dynamic vibration effects on guidance and control systems performance determined from spectral densities, cross spectral densities and vibratory environment amplitude distributions 15 p2608 A69-30367

Natural frequencies and modes of complex structures composed of beam elements, considering hysteretic damping for response and transmissibility 15 p2706 A69-30431

Oscillations of freely supported cylindrical shell of arbitrary cross section with breaks along generatrix, determining eigenvalue of infinite matrix with normal determinant 15 p2707 A69-30581

Minimum vibration frequency and compressive force for freely supported rectangular, triangular and circular plates simulated on analog computer 15 p2708 A69-30665

Oscillating beams lateral buckling allowing for torsional stress in determining critical load 15 p2712 A69-31015

Extensional vibration of thin inhomogeneous circular plate with variable modulus of elasticity and central hole, calculating periods of vibration 15 p2713 A69-31026

Natural vibration of isotropic plates in temperature field with nonuniform distribution over plate 16 p2871 A69-31891

Gradient iterative methods for finite element eigenvalue problem associated with stability and vibrations of elastic systems based on Rayleigh quotient 16 p2871 A69-31898

Structural influence coefficients from vibration test modes and frequencies, eliminating errors by Gram-Schmidt orthogonalization 16 p2872 A69-31916

Viscoelastic half space properties effect on self excited vibration boundaries determination 16 p2873 A69-32063

Axially symmetric vibrations of thin elastic spherical shell partially filled with liquid, considering shell as joined hemispheres with or without same thickness 16 p2873 A69-32129

Anisotropic conical shells free vibrations analyzed by Galerkin and operator-matrix methods, neglecting transverse shear deformation and rotatory inertia effects 16 p2874 A69-32165

Mixed plate element application to vibration and buckling eigenvalue problems based on Reissner variational principle, considering quadrilateral elements 16 p2874 A69-32176

Saturn 5 longitudinal instability /POGO/ precluded by lowering S-1C stage propulsion system resonance below structural frequency [AIAA PAPER 69-548] 16 p2868 A69-32658

Eigenvalue problems in partial differential equations solved by extended Kantorovich method, considering vibration of rectangular membrane and stability of elastic rectangular plate 16 p2876 A69-32783

Fluid filled spherical shell axisymmetric nontorsional motion analysis via differential equations obtained by Hamilton principle 17 p3051 A69-32956

Linear aerospace structures vibrations in randomly distributed pressure field forecasted by applying Green function [ONERA-TP-703] 17 p3054 A69-33064

Frequency and mode shapes of conical shell free oscillations related to shell parameters and boundary conditions 17 p3058 A69-33201

Vibrating objects phase determined by time average and real time holographic interferometry 17 p2974 A69-33324

Infinite isotropic elastic plate vibration under vertical harmonic load, deriving vertical displacement at center of loaded area 17 p3058 A69-33408

Critical review of paper on tail rotor structural design principles covering sizing, blade frequency and response and aeroelasticity [AHS PAPER 342A] 17 p3059 A69-33503

Complete spherical shells transverse frequency analysis, comparing results of elastic theory and classical, improved and membrane shell theories 17 p3061 A69-33705

Complete spherical shells nonsymmetric vibrations frequencies and mode shapes calculated by matrix method 17 p3061 A69-33706

Numerical Fourier transform and inversion in random vibration performed on computer, noting use for stochastic structural dynamic analysis of complex structures 17 p2996 A69-33710

Soviet collection of papers on energy dissipation during vibrations of mechanical systems, covering elastic oscillations, nonlinear systems, energy frequency characteristics, etc 17 p3062 A69-33912

Nonlinear flexural vibrations excitation in cylindrical shell by longitudinal harmonic load, discussing solution of partial differential equations of motion 17 p3064 A69-33920

Energy-frequency characteristics of vibrating machines obtained as spatial curves relating energy dissipation to system vibrations frequency 17 p3065 A69-33922

Energy dissipation in elastic systems as function of limiting damping characteristics of oscillations 17 p3065 A69-33923

Energy dissipation in vibrating warped turbine blades subject to complex stress-strain rate produced by simultaneous bending, torsional and tensile stresses 17 p3065 A69-33924

Test facility to determine factors influencing aerodynamic energy dissipation of cantilever rods oscillating in airstream 17 p2947 A69-33928

Energy dissipation in bonded structures, analyzing vibration damping, hysteresis loop and absorption coefficient dependence on deformation energy 17 p3066 A69-33943

Blade vibration damper consisting of springs attached to blade, analyzing resonance stresses on basis of dynamic rigidities 17 p3066 A69-33944

Transverse and torsional vibration characteristics of tapered cantilever beams and shafts analyzed by lumped inertia force method 17 p3066 A69-34052

Transient vibration linear analysis using Duhamel integral and Fourier and Laplace transformations, deriving receptances and application to aeroelastic systems 18 p3211 A69-34326

Axisymmetrical vibration characteristics of circular sandwich shell with viscoelastic core layer analyzed via differential equation to obtain frequency equation and composite loss factors 18 p3211 A69-34327

Mechanical single degree of freedom system mean square response to AM random noise, considering frequency response, input excitation spectrum, etc [ASME PAPER 69-APM-25] 18 p3214 A69-34398

Elastic beam-plate vibration natural frequency and dynamic instability in transverse static or oscillating magnetic field [ASME PAPER 69-APM-B] 18 p3215 A69-34400

Random excitations effects on vibrating nonlinear single degree of freedom system, statistically estimating resonance mode probability 18 p3171 A69-34554

Longitudinal oscillations of homogeneous elastic rod under nonconservative force at one end, deriving equations of motion and stability conditions 18 p3216 A69-34578

Natural longitudinal oscillations of variable cross section straight rods, assessing errors due to use of finite difference schemes 18 p3217 A69-34581

Machine parts vibration attenuation, discussing input vibration reduction, resonance avoidance, damping, vibrating parts strengthening and shakers 18 p3148 A69-34619

Equations of motion for plate vibration derived by complementary variational principle, including boundary conditions and thin plate transverse vibrations 18 p3218 A69-34626

Structural vibrations characteristics using expression of complex energy applied to structure, discussing coupling between damping modes [ONERA-TP-724] 18 p3218 A69-34639

Free oscillations of rigidly clamped circular plate carrying concentrated masses, deriving frequency equation and value of lower roots 18 p3226 A69-35377

Plane LF oscillations of eccentric cylinder under harmonic pressure applied to lateral surfaces, noting natural oscillations 18 p3226 A69-35380

Viscous incompressible fluid flow around semi-infinite oscillating plate and skin friction on infinite cylinders oscillating parallel to length 19 p3237 A69-35620

Transverse oscillations of shallow multilayer shells, using tangential-stress distribution law in determining natural oscillation frequencies in single and sandwich layer panels 19 p3435 A69-35842

Natural frequencies and mode shapes of vibration of cylindrical shells orthogonally stiffened with rings and stringers [AIAA PAPER 68-349] 19 p3437 A69-35948

Engineering equations for elastic thin plate oscillations of materials with properties described by linear integral Volterra-Boltzmann operators 19 p3437 A69-35989

Nonlinear periodic oscillations in liquid rocket combustion chambers for different chamber models and burning rate response formulations 19 p3449 A69-36352

Vibration phenomena analysis by transfer function computer, discussing precision spectrum analyzers 20 p3498 A69-37003

Vibrating circular plate standing wave lateral displacements visualization by photographically recorded moire patterns 20 p3537 A69-37067

Rectangular cross section pretwisted beams modal curves for turbine and compressor blading vibrational studies 20 p3621 A69-37080

Stability augmentation system for B-52, noting flight test performance evaluation for structural vibrations and rigid body motions of aircraft [AIAA PAPER 68-1068] 20 p3461 A69-37157

Vibration analysis, using rigid body and normal modes to solve interconnection problem, applied to free-free natural vibration modes of clustered rockets 20 p3621 A69-37195

Rocket body elastic vibrations, liquid fuel supply oscillations and engine thrust vibrations effects on system stability 20 p3617 A69-37604

Nonlinear oscillations of rectangular plates of composite materials by Berger approach and Reissner variational principle, noting rotary inertial and transverse shear deformation 20 p3627 A69-37771

Spinning satellite attitude perturbations due to oscillating mass in satellite rigid frame, discussing analytical approach and analog simulation results 20 p3618 A69-37912

Axisymmetric vibrations of thin drums consisting of circular cylindrical shell and two circular end plates 20 p3629 A69-38114

Vibrating surface relative phases visual observation by introducing small rotation between exposures of stroboscopic hologram 20 p3546 A69-38123

Transverse vibrations of isotropic solid rectangular beam with secondary effects of rotary inertia and shear deformation retained 21 p3832 A69-38447

- Natural oscillations of end-hinged solid beam with variable parameters and concentrated masses, determining natural frequencies
21 p3833 A69-38575
- Gyroscopic system behavior analyzed for steady state operation following transient period
21 p3723 A69-38832
- Free vibration of thin cylindrical shells with thickness discontinuity, considering natural frequencies and mode shapes dependence on thick/thin ratio
21 p3836 A69-38984
- Damped mass spring system response to sonic booms, considering effects of structural damping, total/positive phase duration ratio and N wave rise time
21 p3647 A69-38987
- Spacecraft natural vibrations analyzed using point transforms with allowance for control systems imperfections
21 p3826 A69-39637
- Vibration properties of cantilever parallelogram box beam, using existing static deformation equations under large aspect ratio condition
21 p3846 A69-39803
- Cylindrical shells vibrations using Lagrangian based on Fluegge system of stress-strain relations
22 p4039 A69-39924
- Noise and vibration levels measured in An-24 Polish passenger aircraft indicating excess noise in crew compartment
22 p3862 A69-40005
- Young modulus for wire or strip shaped specimens determined from unloaded cantilever vibration considerations
22 p4042 A69-40443
- Natural torsional-flexural vibrations of bars with single symmetry, using matrix equations of equilibrium, displacements and natural coupled vibrations
22 p4043 A69-40456
- Spacecraft booms thermally induced vibration and flutter, considering damping and solar exposure effects
22 p4043 A69-40545
- Axisymmetric vibrations of semiinfinite cylindrical shell constructed of fiber reinforced composite layers, obtaining frequency equation from equations of motions
22 p4044 A69-40559
- Small curvature effect on prevention of vibration in shallow shells under random loading numerically analyzed for component modes using linear theory
22 p4044 A69-40600
- Machine tools design for performing cutting operations within acceptable vibration limits
22 p3928 A69-40672
- Homogeneous, viscous and electrically conducting fluid bounded at one end by infinite plane surface of rigid body vibrating relative to fluid body
22 p3991 A69-41036
- Power flow relations between randomly vibrating systems with weak linear elastic or dissipative coupling
23 p4227 A69-41877
- Differential equations of motion and associated boundary condition for axisymmetric flexural vibration of cylindrically anisotropic circular plate, using variational calculus
23 p4228 A69-41911
- Natural vibrational frequencies of uniform thin elastic isotropic flat plates, investigating rectangular and parallelogram plates with various edge conditions
23 p4233 A69-42348
- Central transverse impacts of sphere on free-free beams, investigating maximum strains variation with impact velocity by narrow band tuned circuit filter
23 p4235 A69-42455
- Truncated conical sandwich shell suspended in free-free condition measured and analyzed for vibrational characteristics
23 p4235 A69-42462
- Three layered circular plate under harmonic excitation, analyzing forced vibrational characteristics by variational principle and Ritz method
23 p4236 A69-42495
- Real space-time Green functions applied to turbulence induced infinite thin elastic plate vibration, analyzing mechanical dissipation effects
24 p4395 A69-42597
- Incompressible fluid flow inhomogeneities effect on oscillations of airfoils cascade, noting occurrence of parametric resonance in turbine engine blades
24 p4245 A69-43479
- Inviscid hypersonic flow over oscillating slender wedge, defining equivalent phase shift
24 p4248 A69-43582
- Energy dissipation in oscillating sphere filled with viscous fluid, giving fluid response by solving Navier-Stokes equation
24 p4305 A69-43587
- Synthesis of second order nonlinear differential equations reducible to linear third order equations for application to vibrations field
24 p4342 A69-43702
- ### STRUCTURAL WEIGHT
- Structural weight fraction factor analysis leading to improvements in materials and structures
[AIAA PAPER 68-331] 01 p0011 A69-11021
- Low profile bulkheads for launch vehicles and spacecraft compartments to obtain structural weight reduction
[AIAA PAPER 68-355] 02 p0334 A69-12370
- Numerical method for explicit solution of aircraft mass problem based on linearization of equations describing individual aircraft section masses
03 p0367 A69-13790
- Glass fiber reinforced plastic in aircraft construction, considering cellular weight and economy
03 p0454 A69-13821
- Spar attachments of aircraft wings analyzed with respect to weight and applied loads, determining optimum bolt diameter ratio to lug width
04 p0673 A69-14496
- Aircraft structure lightweight construction materials, reviewing Ti alloys and Be and Al-B bonded filament materials
05 p0779 A69-15917
- Substructure optimization in structural synthesis, minimizing number of cells for configuration parameter
[AIAA PAPER 69-121] 06 p1027 A69-18069
- Minimum weight analysis of Michell trusses transmitting given load to bars within allowable range of axial stress
08 p1410 A69-19893
- Structural iterative design convergence to minimum weight proved by dual linear programming, discussing global convergence and convergence rate
08 p1413 A69-20351
- Electrochemical generators using zinc electrode in alkaline medium, noting weight consideration of zinc/air or zinc/oxygen cells
08 p1261 A69-21049
- Power systems for future aircraft emphasizing growth in performance and reduction in weight
09 p1567 A69-21387
- Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability
[AIAA PAPER 69-254] 09 p1569 A69-21879
- Truss framework for support of eight 100-lb satellites through Titan 3C launch and dispensing of satellites at predetermined times, discussing materials and fabrication
09 p1512 A69-22369
- Ultrasonically assisted installation of fasteners for weight savings in aircraft/spacecraft structures
09 p1478 A69-22373
- Gas turbine engines control and fuel systems integration, considering weight reduction
[ASME PAPER 69-GT-49] 09 p1571 A69-22483
- Boeing 747 aircraft, discussing weight and cost reduction, flap design, structural philosophy, powerplants, fuel system, flying controls, power systems, etc
09 p1435 A69-22714
- Permissible expenditures for decreasing aircraft structural weight
11 p2005 A69-25349
- Variable and fixed weight growth factor effect on aircraft, showing coincidence of minimum weight
11 p1987 A69-25432
- Complex structure least weight optimization for specific frequency by computerized modification of existing member cross sectional properties
11 p1989 A69-25494
- Construction techniques for lightweight mirrors for secondaries, considering optical finishing and thermal expansion
12 p2058 A69-26420
- Linear programming algorithms for optimal structural weight design
12 p2181 A69-26566
- Ultralightweight mirror blanks for astronomical telescopes, discussing weight saving low thermal expansion and fused monolithic core technology
13 p2261 A69-27953
- Weight and cost control program for Boeing 747 aircraft through combined value and weight engineering methods
13 p2383 A69-28096
- Structure, equipment and weight breakdown of Black Arrow X3 spacecraft
13 p2357 A69-28478
- Complex structures lumped weight and inertia parameters automatic computation based on finite weight element method, using SCOWL computer program
14 p2533 A69-29025
- Composite airframe structural joint design and weight considerations for boron and glass fiber reinforced plastic materials
[ASM PAPER W9-23.1] 14 p2535 A69-29448
- Helicopter weight analysis in preliminary design and proposal field
15 p2550 A69-30463
- Starting weight increments in aircraft designs having various structural features and dimensions
16 p2735 A69-32144
- JT8D turbofan engine composite fan blades design and fabrication methods using aluminum-Borsic fiber, noting direct and indirect weight reduction
[AIAA PAPER 69-465] 16 p2842 A69-32698
- Turbopump weight minimization and low suction pressure requirements realized using high rotating speeds, hydraulic turbine driven upstream inducer and computer testing
[AIAA PAPER 69-552] 16 p2741 A69-32747
- Aircraft landing gear cylinder reinforcement rings design for minimum weight, using optimization iteration method for planar frames with elastic supports
[AIAA PAPER 68-328] 17 p3066 A69-34030
- Bandwidth limitations for phase steered planar arrays in satellite applications, discussing weight reduction by modulo 2 pi beam steering
17 p2941 A69-34082
- Aircraft generator weight in relation to system performance requirements, using digital computer to study generator design
17 p2904 A69-34087
- Carrying cables shape optimization for suspended structures under load, using minimum weight criterion
18 p3212 A69-34354
- Apollo 10 lunar landing module, detailing weight, shape, electronic system and rendezvous radar
18 p3207 A69-34629
- Algorithm for minimum weight structures automated design, coupling strain energy criteria with linear interpolation search technique to cover stress and displacement constraints
[SAWE PAPER 798] 18 p3219 A69-34861
- Fixed weight aircraft growth factor variation with location of initial weight penalty along fuselage station, using static stability margin and trim capability
[SAWE PAPER 796] 18 p3220 A69-34862
- Weight estimation and forecast in manned spacecraft design, noting size and weight relationship
[SAWE PAPER 793] 18 p3208 A69-34864
- Rational vehicle weight estimation based on statistical data /REBOS/ including gross weight, weight coding, subdivisions, balance and size, inertia moments and products, etc
[SAWE PAPER 791] 18 p3220 A69-34866
- Advanced design weight analysis and fixed equipment and propulsion systems weight prediction, noting error probability
[SAWE PAPER 790] 18 p3220 A69-34867
- Weight estimation of structures and systems unique to VTOL aircraft, considering remote fan and high bypass engine lift propulsion concepts
[SAWE PAPER 784] 18 p3090 A69-34868
- Army OH-6A helicopter light weight design, considering effects of WRAP /weight, radius, area, power/ factors on empty weight
[SAWE PAPER 781] 18 p3091 A69-34870
- Cost and weight optimization for solid rocket motors using various steel casings
[SAWE PAPER 777] 18 p3208 A69-34871
- Market analysis program to evaluate relationship between launch vehicle jettison weight and total cost based on all projected missions
[SAWE PAPER 776] 18 p3208 A69-34872
- Aerospace vehicle mass property limits and dynamic balancing related, noting errors
[SAWE PAPER 772] 18 p3208 A69-34875
- Earth orbital entry vehicles weight prediction, noting vehicle geometry as function of vehicle shape, hyper-sonic lift drag ratio and crew size
[SAWE PAPER 770] 18 p3208 A69-34876

- Armor selection for advanced aircraft systems based on premium value concept and cost-weight considerations [SAWE PAPER 764] 18 p3094 A69-34878
- Gross weight and aircraft size estimates for configuration design of fighter aircraft [SAWE PAPER 760] 18 p3220 A69-34880
- Aircraft structural weight optimization based on design consideration of grouped related elements, noting application to Boeing 747 trailing edge flap drive [SAWE PAPER 757] 18 p3220 A69-34881
- Design iteration loop calculations related to fighter aircraft weight growth factor, noting asymptotic aircraft performance and strength [SAWE PAPER 732] 18 p3221 A69-34893
- Synthesis and integration of cross discipline function for weight effective design of airplanes [SAWE PAPER 730] 18 p3221 A69-34895
- Aerospace structures optimization, discussing weight considerations and finite element techniques [SAWE PAPER 814] 18 p3221 A69-34896
- Aircraft preliminary design weight and volume characteristics relation to aircraft density [SAWE PAPER 813] 18 p3221 A69-34897
- Parametric approach for weight estimation of surface control systems of transonic and supersonic combat and subsonic transport aircraft [SAWE PAPER 812] 18 p3221 A69-34898
- Analytical-statistical weight prediction to derive and apply correlation expression, illustrated with bending stress equation applied to aircraft wing group [SAWE PAPER 810] 18 p3221 A69-34900
- Aircraft on board weight and balance system, discussing operations and economics programs [SAWE PAPER 805] 18 p3091 A69-34901
- Weight estimation inaccuracies due to use of quickie equations discussing error and extrapolation avoidance in wing weight study [SAWE PAPER 794] 18 p3222 A69-34904
- Monograph on weight and performance tradeoff methodology for selection of high lift devices [SAWE PAPER 761] 18 p3091 A69-34906
- L500 cargo transport commonality with C-5 showing need for aggressive weight control program [SAWE PAPER 745] 18 p3091 A69-34908
- Lockheed L-500 aircraft weight consideration in structural design as all cargo lifter, describing engine thrust, payload, options, etc 18 p3092 A69-35464
- Boron epoxy strut prototype for support system of advanced nuclear flight stage with nonintegral cryogenic tankage configuration, achieving weight reduction 19 p3354 A69-35516
- Perturbation technique application to stability criterion for rectilinear missile flight with arbitrary inclination, noting mass reduction and flow and gravity effect 19 p3429 A69-35779
- Two stage vehicle gross weight minimization determined by slide rule computation using formula based on specific impulse differences between stages 19 p3429 A69-35918
- Structural design optimization based on reliability analysis stressing proof-load test and weight savings consideration under cost constraint 19 p3437 A69-36033
- Sounding rocket aerodynamic stability as function of nose length and mass, discussing wind tunnel test data 19 p3432 A69-36761
- Carbon fiber reinforced plastics application to aircraft metal components for weight reduction, low cost and high mechanical properties 21 p3750 A69-38428
- Stability loss for hinged circular cylindrical elastic shells reinforced by thin walled closed profile ribs, proposing minimum weight design method 21 p3835 A69-38723
- Structural design for minimum weight under random loads representing steady vector random function 21 p3731 A69-38870
- Sprayable polyurethane foam lightweight insulation for Saturn S-2 booster tanks holding liquid H an liquid O at wide temperature ranges 21 p3732 A69-38967
- Boron and carbon reinforced composite materials aerospace structural application, discussing weight savings, components structural design and connection and load input problems 22 p4038 A69-39908
- Computerized solid rocket motor nozzle design with computer program providing weight, envelope and performance values for vehicle optimization studies [AIAA PAPER 69-975] 22 p3999 A69-40355

Elastic curve shape effects on volume of minimum weight uniformly strong beam under combined longitudinal and transverse bending 23 p4225 A69-41421

Minimum weight and optimal cross sections design for statically determinate and indeterminate shell and H beams, using variational method 23 p4225 A69-41424

Spacecraft Si cell solar array using self rigidizing folded panels with flexible substrates for increased power/weight and power/stowage volume ratios 23 p4073 A69-42290

Lightweight large area solar cell arrays for space programs with multikilowatt predicted performance, noting rollup array orbital flight testing 23 p4073 A69-42291

Weight limitations effect on optimum motion parameters of variable mass body in gravitational field applied to spacecraft optimum propulsion system controls and trajectory determination 24 p4383 A69-42956

Maximum admissible weight of structural elements required for conventional wing conversion into variable geometry wing without performance impairment 24 p4253 A69-43092

SST range-payload improvement by emphasizing Ti alloys honeycomb and trusscore sandwich panels fabrication for structural boxes in wing and empennage 24 p4324 A69-43436

Aerospace fastening system requirements to lower in-place costs, extend service life and reduce weight of aircraft 24 p4325 A69-43440

High modulus carbon filament composite structural elements for missile interstage application, showing weight savings 24 p4325 A69-43444

STRUTS

Instability of struts subjected to axial force and radiant heat, considering elastic and thermal deformation 02 p0337 A69-11716

Theoretical buckling load for single edge notched struts, discussing brittleness effects 05 p0837 A69-16064

Thin ring-strut structure resting on elastic foundation, analyzing deformation taking warping effects into account, noting applicability to engine design 12 p2184 A69-26812

Aircraft onboard weighing system, eliminating ring seal friction to permit accurate measurement of oleo strut pressure [SAWE PAPER 748] 18 p3137 A69-34883

Boron epoxy strut prototype for support system of advanced nuclear flight stage with nonintegral cryogenic tankage configuration, achieving weight reduction 19 p3354 A69-35516

STRYCHNINE

Cortical biopotentials in cats induced by strychnine under acoustic click stimuli of increasing intensity 22 p3888 A69-41270

STUDS (STRUCTURAL MEMBERS)

Capacitor discharge stud welding on Ti alloys, discussing weld zone microstructure, arc and mechanical properties 18 p3151 A69-35431

STURM-LIOUVILLE THEORY

Irregular Sturm-Liouville first and higher order perturbation problem in boundary layer theory providing analytical approximations to complete orthogonal set of characteristic functions 04 p0590 A69-15001

Temperature distribution for thin plate heated by source of arbitrary motion and strength and governed by Sturm-Liouville boundary conditions 09 p1622 A69-21906

Finite difference schemes of high order of accuracy for Sturm-Liouville and boundary value problems with regular singularity 10 p1719 A69-23365

STYRENES

NT POLYSTYRENE

Nuclear environment irradiation effects on materials, emphasizing radiation chemical processes affecting polyimide and copolymer of styrene and alpha-methylstyrene 19 p3356 A69-35530

STYROFOAM (TRADEMARK)

Perforation and penetration mechanisms of Styrofoam slabs, using impact tests with free falling and rifle powered projectiles 01 p0165 A69-10115

SUBCARRIER WAVES

U CARRIER WAVES

SUBCIRCUITS

U CIRCUITS

SUBCOOLING

U SUPERCOOLING

SUBCRITICAL FLOW

Plane subcritical flow past lifting aerofoil analyzed using conformal mapping and difference scheme on annular mesh inside circle 06 p0859 A69-17474

Separation of subcritical and supercritical compressible turbulent boundary layers under strong pressure gradients using method based on integral equations [AIAA PAPER 69-34] 06 p0912 A69-18010

Stationary elliptic cylinders in subcritical flow, determining Strouhal number, pressure fluctuations and wake geometry as functions of angle of attack [AIAA PAPER 69-745] 18 p3084 A69-34411

SUBGRAVITY

U REDUCED GRAVITY

SUBHARMONIC GENERATORS

Numerical digital computer determination of ultrasonic subharmonic response for Duffing equation 01 p0104 A69-10235

Pulsed subharmonic oscillation in nonlinear regenerative selective circuits with reference to graphical analytical method for explaining behavior 03 p0385 A69-12918

SUBLATTICES

U LATTICES (MATHEMATICS)

SUBLAYERS

U SUBSTRATES

SUBLIMATION

Mass spectrometer residual gas analyzer (RGA) for identifying and measuring sublimated substances from spacecraft construction materials, noting applications during vacuum testing 02 p0227 A69-11758

Sublimation solid reaction control, discussing propellants, nozzle performance, sublimation area, power, pressure drop, response and valueless design [AIAA PAPER 68-516] 04 p0552 A69-15322

Nose cone reentry simulation under low temperature sublimating ablators, discussing dry ice, camphor and steel calibrations models fabrication, instrumentation and boundary layer measurements [AIAA PAPER 69-152] 06 p0929 A69-18098

Sublimation in ammonium perchlorate propellants combustion, discussing low temperature isothermal processes, linear regression rates measurements and low ambient pressure 11 p1940 A69-24481

Expression relating gas density, radial velocity and temperature at comet nucleus surface to nucleus surface temperature, applying results to unsteady sublimation process 15 p2684 A69-30521

Granular ammonium perchlorate thermal decomposition analyzed by cinemicrography, discussing sublimation role [WSCI PAPER 69-20] 16 p2832 A69-32358

Ammonium perchlorate sublimation models, discussing low temperature decomposition influence on pressure dependence of sublimation rate [WSCI PAPER 69-22] 16 p2832 A69-32360

Micropropulsion system with sublimable solid fuel for satellite attitude control, satisfying mechanical and thermal environmental conditions during launch and in space 17 p3021 A69-33359

Sublimation of various compressed naphthalene wind tunnel models analyzed in supersonic air flow, discussing effects of temperature and model configurations 18 p2331 A69-35121

Noctilucent clouds formation relation to ice sublimation, discussing rocket soundings 21 p3701 A69-38343

SUBLIMINAL STIMULI

Psychophysical threshold changes during subliminal monocular and interocular stimulation, studying conditioning flash size effects on temporal summation 22 p3881 A69-40866

SUBMARINES

Gisette S thermoelectric radioisotopic generator for submarine use, discussing strontium 90 as isotopic source 21 p3768 A69-38455

SUBMERGED BODIES

Submerged rigid circular cylinder displacement under influence of plane acoustic pressure wave solved by operational method 04 p0667 A69-1426

Inviscid cavity and wake flows behind submerged bodies, analyzing mathematical and theoretical models
04 p0587 A69-14608

UBMERGING

Immersion depth influence on hydrofoil for flow of arbitrary depth with bottom consisting of free surface or solid wall
01 p0007 A69-11132

Automatic inflators for life jackets and survival gear in emergencies activated after submersion in water
06 p0877 A69-16955

Human body heat loss control during water immersion, discussing insulative garments and technologies of energy conversion systems
[AGARDOGRAPH-111] 08 p1267 A69-20681

Cold water immersion effects on man from physiological and physiopathological viewpoint, examining clothing effect
08 p1267 A69-20682

Auditory evoked response /AER/ as measure of narcosis induced at depth in diving personnel, discussing hyperbaric nitrogen and oxygen effects
14 p2407 A69-29302

Reinforced textolite plastic dimensional and mass changes in water and oil immersion as function of surface, temperature and time
15 p2643 A69-31550

NACA submerged intake performance at M 2.5, considering total pressure and mass flow ratios, drag coefficient and boundary layer thickness effects
19 p3242 A69-36819

Feline lung injury produced by vertical sinusoidal vibrations during upright water immersion attributed to chest wall impact
23 p4082 A69-41447

Diuresis during total immersion in thermally neutral water, interpreting urine flow increase caused by intrathoracic blood volume expansion
23 p4094 A69-42075

Human heart rate changes resulting from diving and breath holding exercises
23 p4095 A69-42083

Change in weight, plasma volume, urine flow and hematocrit in man before and after immersion up to chin in thermally neutral bath
23 p4096 A69-42087

Test animals prolonged deep submersion in water, in mixed oxygen-H atmosphere at elevated pressure, noting EEG and EKG activities
24 p4262 A69-43025

SUBMILLIMETER WAVES

Figures of merit for polycrystalline uniaxial antiferromagnetic materials, for nonreciprocal devices at millimeter and submillimeter wavelengths, calculated from perturbation theory
[IEEE PAPER 17.11] 01 p0045 A69-10720

Electromagnetic wave generation in 0.2-3mm range, noting applications to physics, biology and technology
02 p0250 A69-12247

Submillimeter wave oscillator /orotron/ involving open resonator with mirror having reflection grating period less than wavelength
02 p0250 A69-12248

Submillimeter wave observation of sun to study anomalous absorption region
03 p0513 A69-13774

High power output from submillimeter continuous wave gas laser
04 p0609 A69-14289

Submillimeter wave vapor laser power output for admixtures of H, N, carbon dioxide, methane, He and Ar, noting buffer effect of H
04 p0612 A69-15175

Absorption effect on fluctuation of signal level propagating in turbulent atmosphere taking into account absorption in water vapor
05 p0717 A69-15634

Submillimeter wavelength astronomy noting instruments, prestellar matter, interstellar and intergalactic matter state and composition, IR stars, planetary atmospheres, etc
05 p0821 A69-15843

Submillimeter wave absorption by dimeric water in atmosphere, using interferometer and maser
05 p0759 A69-16658

Submillimeter plane monochromatic wave amplitude and phase fluctuations during propagation in turbulent atmosphere surface layer, considering absorption by water vapor
05 p0722 A69-16778

Background radiation intensity upper limits for mm and submillimeter wavelengths in interstellar medium, noting intense flux in far IR
07 p1221 A69-19404

Resonator interferometry of pulsed submillimeter wave lasers, analyzing mode structure, pulse shapes and molecular mechanism of laser emission
10 p1705 A69-23810

Millimeter and submillimeter radio waves attenuation in rain, showing effective loss cross section as function of raindrop diameter and wavelength
10 p1657 A69-23943

Sulfur dioxide-helium laser pulsed and CW submillimeter outputs
10 p1706 A69-24005

Atmospheric attenuation of solar radiation, discussing submillimeter astronomy at low altitude observatories
13 p2327 A69-27590

Instrumental investigation of submillimeter astronomy, noting advancements in semiconductor physics, quantum electronics and space astronomy
13 p2342 A69-27602

Millimeter and submillimeter astronomy, discussing lunar poleward darkening function, solar eclipse measurements, observations of Jupiter, Fourier transform and filter spectroscopy uses, etc
13 p2343 A69-27603

Submillimeter astronomy role for solar and atmospheric studies
13 p2343 A69-27604

Submillimeter wave generated in ZnTe by difference frequency mixing of Q switched ruby laser, discussing beat power
[IEEE PAPER B-4] 14 p2457 A69-28927

Orotron electron beam excited oscillator-generator of millimeter and submillimeter wave bands with wide frequency tuning range
14 p2421 A69-29546

Submillimeter atmospheric absorption spectra, emphasizing absorption by isotopic and vibrationally excited forms of water molecules
15 p2568 A69-30699

Superheterodyne millimeter and submillimeter wave detection, allowing harmonics separation
15 p2570 A69-31093

Absorption effect on fluctuation of signal level propagating in turbulent atmosphere taking into account absorption in water vapor
16 p2754 A69-32492

Monochromatic linearly polarized electromagnetic beam generator for submillimeter band, discussing applications
17 p2932 A69-34162

Submillimeter water vapor laser power output for admixtures of H, N, carbon dioxide, methane, He and Ar, noting buffer effect of H
18 p3152 A69-34717

Water vapor absorption at submillimeter wavelengths in atmospheric window regions related to foreign gas pressure, using HCN maser
18 p3152 A69-35241

Water vapor laser submillimeter emission spectra, considering rotational and vibrational lasing transitions due to electron impact and molecular interactions
19 p3336 A69-36349

Cross correlation coefficient for submillimeter monochromatic wave amplitude and phase fluctuations in turbulent atmospheric boundary layer
21 p3674 A69-39129

SUBORBITAL FLIGHT

Suborbital probes, discussing UK sounding rockets Skylark, Petrel and Skua configurations, capabilities and performances
06 p1012 A69-16859

Physiological reactions of dogs during acceleration and weightlessness in suborbital flights of ballistic rockets
07 p1061 A69-18577

Equations of motion for optimal attitude of suborbital aircraft regarding time and distance range
21 p3795 A69-38440

SUBREFLECTORS

Aperture blockage by subreflector in Cassegrain antenna system, computing effects on far field radiation patterns
03 p0401 A69-12853

Cassegrain two reflector antenna modification by discrete phased array, allowing for subunit redesign
04 p0572 A69-14326

SUBROUTINES

Subroutines for computing characteristics of electromagnetic radiation scattered by absorbing and homogeneous sphere employing logarithmic derivative method
14 p2412 A69-29283

SUBSETS [MATHEMATICS]

U SET THEORY

SUBSONIC AIRCRAFT

Wing-body combinations analysis and design at supersonic and subsonic speeds by aerodynamic influence coefficients method
[AIAA PAPER 68-55] 01 p0006 A69-11016

Fiat G.91Y subsonic light tactical fighter, discussing fixed armaments and weapons facilities
02 p0193 A69-12679

Subsonic aircraft potential for short haul transportation, discussing technical problems
05 p0701 A69-15559

Boeing 747 operational and economic considerations including capacity, airport constraints, noise factors, landing gear, compatibility, etc
13 p2201 A69-27340

Next generation subsonic aircraft, discussing basic concerns, aerodynamic factors, materials, noise reduction, cost effectiveness, titanium techniques, etc
15 p2550 A69-30590

Large subsonic transport aircraft effect on economics of air operations with emphasis on airport facilities for Boeing 747
17 p3077 A69-34205

SUBSONIC FLOW

Kernel function applied to compressible fluid flow computation for linear procedure to determine subsonic flow patterns
01 p0058 A69-10225

Compressible relativistic flow in subsonic, transonic and supersonic regimes, noting pressure coefficient variations
01 p0007 A69-11203

Static pressure field induced by steady subsonic flow of compressible inviscid fluid through two dimensional duct with statistically distributed wall roughness
01 p0062 A69-11279

Discrete vortices in two dimensional subsonic and supersonic wake, determining Strouhal numbers, frequencies and flow velocities with aid of HF cinematography
02 p0191 A69-12587

Convergence of Rayleigh-Ritz approximations to solution of elliptic boundary value problem applied to subsonic airfoil problem for 2D steady isentropic irrotational flow
03 p0361 A69-12846

Subsonic or transonic bidimensional flows around airfoils by hodograph method
[ONERA-TP-645] 03 p0361 A69-12873

Unsteady aerodynamic forces on coplanar lifting surfaces in subsonic flow induced by wing/ horizontal tail interference
04 p0543 A69-14819

Test of similarity theory of leading edge vortices above slender wings in subsonic conical flow
04 p0543 A69-14820

Static pressures, profiles of local longitudinal velocity, fluctuating wall pressures and power spectra of wall pressures measured for subsonic turbulent flow
[ASME PAPER 68-WA/FE-36] 05 p0750 A69-16109

Rotating hot wire and five hole pressure probes for determining complete velocity vector in subsonic flow
05 p0764 A69-16398

Approximate method for calculating subsonic gas flows in curvilinear channels for gas admission control in arc welding
06 p0908 A69-16828

Autrotation characteristics of various shapes in subsonic and hypersonic flows for mechanics of free flight reentry to earth impact
[AIAA PAPER 69-132] 06 p0863 A69-18062

Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties
[AIAA PAPER 69-37] 06 p0865 A69-18167

Mixed sub- and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction
07 p1050 A69-18739

High velocity subsonic flow past wedge in wind tunnel with perforated walls, applying solution to optimum parameter determination of suction system
07 p1050 A69-18741

Irrational plane subsonic flow of compressible fluid about obstacle, reducing problem to integration of linear partial differential equation with boundary conditions
09 p1480 A69-21735

Lifting pressure distributions on oscillating surfaces in subsonic flows using doublet lattice method for various surface geometries
[AIAA PAPER 68-73] 09 p1430 A69-21946

Wall temperature and Prandtl number effects on turbulent boundary layer thicknesses and shape factors for subsonic compressible gas flow over flat plate
[ASME PAPER 69-GT-55] 09 p1432 A69-22513

Nitrogen dilution low pressure simulation technique for subsonic flow flame stabilization of bluff bodies
09 p1624 A69-22614

Digital computer programs for aerodynamics of subsonic gas turbine combustion systems applicable to incompressible flow with specified flow boundaries, noting vortices distribution
09 p1573 A69-22621

Subsonic channel flow of frictionless barotropic gas through oscillating grid, investigating perturbation velocity field and aerodynamic forces on airfoils
10 p1631 A69-22905

Flow and heat transfer measurements for heated air in subsonic flow through contraction section connecting tube to conical section
[JPL-TR-32-1348] 10 p1809 A69-23194

Boltzmann H theorem and related mathematical topics, noting applications to subsonic gas flow and continuum flow around and over body
11 p1870 A69-25008

Laminar compressible subsonic boundary layer flow on symmetrical cylinder bounded by circular arcs noting zero/nonzero angle of attack
12 p2062 A69-26272

Flow through turbine stage with inclined guide vanes at moderate Mach numbers, discussing exit blade angle formula for swept cascades
15 p2547 A69-30570

Thermal radiation effects on subsonic flow of ideal gray gas, calculating streamwise variations of flow properties
15 p2717 A69-30908

Single and two phase subsonic plasma jets temperature and velocity distribution, noting reduction by condensed phase and use of Schlichting curves
15 p2663 A69-30989

Water cooled split-flow probe measuring enthalpy of high temperature subsonic streams
15 p2614 A69-31275

Lifting surface theory for cascade of blades in subsonic shear flow, determining blade surface pressure distribution, distinguishing shear and uniform flow compressibility effects
16 p2731 A69-31592

Subsonic diffuser design, discussing flow distortion and turbulence levels and pressure loss characteristics
[AIAA PAPER 69-449] 16 p2843 A69-32700

Fixed position pressure probe for measuring subsonic flow direction over range of Reynolds number, Mach number and flow angle
17 p2973 A69-33107

Mixed supersonic/subsonic type steady wake flow fields in flat based slender bodies, using finite difference method
[AIAA PAPER 69-649] 17 p2892 A69-33468

Transport properties of free turbulent mixing of subsonic coaxial streams by introducing environmental distributions in integrals of momentum, energy and species continuity equations
[AIAA PAPER 69-681] 17 p2956 A69-33495

Preston probe measurement of friction drag on subsonic and supersonic nozzle wall including effects of heat transfer, compressibility and pressure gradient
[AIAA PAPER 69-648] 17 p2893 A69-33496

Aerodynamic control surface/trim tab coupling coefficients in subsonic two dimensional unsteady flow using matrix method valid for motion involving harmonic oscillations
17 p2895 A69-33597

Static and impact pressure distributions for Mach number and velocity profiles of supersonic to subsonic flow transition in tube at low Reynolds numbers
[ASME PAPER 69-APM-23] 18 p3120 A69-34397

Strong shock wave structural model, considering near molecular beam, upstream hypersonic and downstream subsonic flows and beam-continuum conversion by collision
18 p3120 A69-34457

Electrohydrodynamic subsonic flow of isothermal charged gas over wavy insulator wall by perturbation method, calculating surface pressure, streamlines and electric lines of force
19 p3297 A69-35837

Inverse transformation method for plane subsonic flow extended to flow past cambered profiles at angle of attack, obtaining velocity distribution
19 p3240 A69-36473

Linearized theory of subsonic gas flow past profile compared with methods based on approximations of relationship between density and pressure
19 p3241 A69-36782

Cold subsonic coaxial jets observed for relationship between noise output and flow characteristics, showing effect of relative annular and central jet velocities
20 p3513 A69-37063

Second order theory for steady or unsteady subsonic flow past slender lifting bodies of finite thickness
[AIAA PAPER 68-75] 20 p3458 A69-37182

Supersonic fan-shaped jet formation by identical colliding underexpanded jets, calculating subsonic flow between interaction plane and curvilinear shock wave
21 p3643 A69-38643

Rotary derivatives of aerodynamic forces and moments in subsonic and supersonic flow, emphasizing kinematic and dynamic oscillations
21 p3647 A69-38733

Jet deflection in drifting subsonic gas flow
21 p3644 A69-39096

Plasma pause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow
22 p3942 A69-41103

Supersonic free stream flow past finite conical body with subsonic surface gas injection
23 p4059 A69-41884

Subsonic compressible flow at two dimensional inlets, analyzing field representation, boundaries, surface configuration and optimal wedge
23 p4060 A69-41915

Graphical method for two dimensional supersonic expansion flow with subsonic reaction front around corner compared to existing iteration method
23 p4061 A69-42411

Tridimensional infrasonic diffuser geometry effects on operational efficiency, considering opening angle, outlet/inlet section fields ratio and diffuser length/hydraulic radius ratio
24 p4243 A69-42560

SUBSONIC FLUTTER

Flutter vibration in subsonic flows, analyzing critical velocity for membrane and damping destabilizing effects in nonconservative system
02 p0192 A69-12825

Slender profile oscillations in subsonic flow near solid boundary, calculating pressure gradients by dipole method
23 p4058 A69-41713

SUBSONIC SPEED

Subsonic lifting surface analysis accuracy tested by planar circular wing theory
04 p0543 A69-14818

Subsonic aeronautics - Conference, New York, April 1967
05 p0699 A69-15541

Airframe subsonic aerodynamic problems for fixed wing aircraft under low speed/high lift conditions
05 p0695 A69-15542

Design of high lift devices in relation to fixed wing subsonic transport aircraft, considering lift, drag, stability and control
05 p0695 A69-15544

Stability derivative estimation at subsonic speeds for preliminary design engineer
05 p0700 A69-15545

Aerothermodynamics of subsonic-aircraft propulsion, analyzing performance of bypass engine, fuel consumption and specific weight
05 p0695 A69-15551

Subsonic aerodynamics theory applications to VTOL design, architecture, radio antennas, launch vehicles and agriculture
05 p0696 A69-15561

Conventional fuselage and streamline body shapes effect on drag at subsonic speeds, noting boundary layer development
05 p0697 A69-15827

Hodograph for lifting airfoil with subsonic velocity at infinity, using Chaplygin compressibility law for computation
[ONERA-TP-631] 07 p1049 A69-18416

Atmospheric gust effect on aircraft flying at Mach one calculated for subsonic and supersonic regions, finding difficulties for transonic calculations
10 p1632 A69-22918

Aerodynamic and flight characteristics of variable geometry entry spacecraft during subsonic wing deployment and landing
[AIAA PAPER 69-742] 18 p3084 A69-34407

C-5A aircraft model high subsonic speed tests, correlating data from three transonic wind tunnels
[AIAA PAPER 69-794] 19 p3237 A69-35636

SUBSONIC WIND TUNNELS

Large subsonic wind tunnels for correct simulation of V/STOL powered flight by minimizing wall constraint effects on flow field
05 p0741 A69-15578

Wind tunnel wall constraints effects at extreme force coefficients during V/STOL testing shown different from effects in conventional aircraft testing
05 p0741 A69-15578

Test facilities and techniques for low speed flight problems of aircraft handling qualities, stability, control and performance
05 p0741 A69-15578

Blockage correction for blunt based bodies off revolution in wind tunnels at low Mach numbers
05 p0699 A69-16395

Transition boundary layer on flat plate in subsonic wind tunnel measured by hot-wire method, obtaining velocity fluctuation distribution and turbulence intensity
07 p1121 A69-19329

Strip method for prediction of subcritical frequency and damping characteristics for subsonic wind tunnel and flight flutter tests
11 p1987 A69-25368

Jet pump actuation of intermittently operating variable density closed circuit subsonic wind tunnels, measuring wind tunnel power factor
11 p1892 A69-25371

Subsonic wind tunnel solid and ventilated wall interference on air flow around aerodynamic models, discussing data corrections and slotted wall tests
[AIAA PAPER 68-360] 12 p2059 A69-26766

Subsonic wind tunnel balance and holders investigated for effects on lift, drag and stability of models of body of revolution
24 p4297 A69-43084

Wind tunnel model one component magnetic support and balance system for sphere drag investigation at subsonic Mach numbers
[AIAA PAPER 68-401] 24 p4298 A69-43714

SUBSTANCES U MATERIALS

SUBSTRATES

Epitaxial GaAs films with high electron mobility noting radiation recombination spectra dependence on substrate orientation
03 p0492 A69-14172

Loss factors effects on substrate choice in production of microwave printed circuit components
04 p0578 A69-15199

Chemical vapor deposition of chromium metal on substrates, discussing influence of temperature, gas flow rate and chromium chloride concentration
[ECS PAPER 223] 05 p0769 A69-16232

Computer model for n-p-n transistor in integrated circuit using substrate p-n junction isolation
07 p1114 A69-18246

Ferrite microstrips substrates role in integrated circuits, noting application of hybrid technology
07 p1090 A69-18399

Substrates containing silicon regions separated by silicon dioxide or ceramic dielectrics, prepared by lamination in hot press, noting applications to integrated circuits
07 p1100 A69-18617

Substrate bias influence on AC characteristics of MOS transistors used in variable resistor region
07 p1102 A69-18860

Optical parameters for system of isotropic nonabsorbing film on isotropic absorbing substrate determined by ellipsometric method, noting Si optical constants
07 p1201 A69-19648

Micromin alumina substrates design data, determining dielectric constant, impedance vs line width and wavelength vs frequency
09 p1460 A69-22792

Ceramic substrate cutting with carbon dioxide laser by scribing perforation pattern,
10 p1699 A69-23302

Silicon single crystal substrate, preoxidation, oxidation and low temperature heat treatment effects on MOS transistor compared with Silicon-Silicon dioxide interface characteristics
10 p1665 A69-24051

Gold-underlayer film combinations adhesion to oxide substrates, describing adhesion changes as function of Au and underlayer film thickness, time, environment, etc
13 p2321 A69-28007

Electrical properties of electron beam evaporated Ti, Zr and Hf films as function of substrate temperature, material and film thickness
13 p2321 A69-28010

Substrates ultraclean surface preparation methods, examining crystal cleaving and crushing, heating, chemical cleaning, ion bombardment, etc
14 p2455 A69-29348

Electrical resistivity of aluminum oxide films deposited on tubular substrates by plasma and gas flame spraying, noting dependence on film thickness and substrate
15 p2630 A69-31179

Current-voltage characteristics of uniron with metal-dielectric-semiconductor structure /MOSFET/ taking into account substrate potential effect
19 p3284 A69-36592

Substrate specificity of cathepsin C derived from rat liver, describing polymeric structure and behavior as acidic protein
20 p3473 A69-37577

Condensation dynamics of atom by solid body model consisting of one dimensional chain of harmonic oscillators
21 p3775 A69-39557

Van Driest-Bradshaw model for calculating sublayer function for self preserving laminarescent boundary layers, discussing porous surface suction or acceleration effects
[ASME PAPER 69-HT-12] 24 p4304 A69-43557

SUBSTRUCTURES

Substructures around fatigue cracks in fcc metals and alloys, noting relation between structural formation and crack propagation
02 p0260 A69-11826

Flow theories of fluids with elastic deformation of substructure, treating suspensions of irregularly shaped deformable particles
05 p0752 A69-16738

Substructure optimization in structural synthesis, minimizing number of cells for configuration parameter
[AIAA PAPER 69-121] 06 p1027 A69-18069

Fatigue crack initiation and propagation correlation with substructure formation by static and alternating stresses in Al
12 p2188 A69-26915

SUBTRACTORS

U ADDING CIRCUITS

U SUBTROPICAL REGIONS

U TEMPERATE REGIONS

U TROPICAL REGIONS

SUCROSE

Escherichia coli B/r cells plasmolyzed in sucrose observed under phase contrast, noting plasmolysis reduction in ions presence
19 p3257 A69-35973

DNA and d(A-T) oligomers enzyme binding to DNA polymerase by sucrose density gradient centrifugation
22 p3898 A69-41075

SUCTION

Soviet monograph on laminar boundary layer in presence of suction covering incompressible flow through porous surface, drag reduction and optimal suction at high velocities
01 p0060 A69-10615

Heat transfer, suction and injection in plane Couette flow analyzed for Rivlin-Ericksen fluid, using perturbation method
04 p0589 A69-14970

Laminar flow on swept low drag suction wings at high Reynolds numbers
05 p0696 A69-15557

Suction effect on incompressible flow through step expansion in circular pipe through sudden enlargement, considering inlet flow with thin boundary layer
[ASME PAPER 68-FE-11] 05 p0748 A69-16074

Injection or suction at disk surface, noting effects on heat and mass transfer in laminar flow about rotating disk
06 p1029 A69-17002

Decreasing secondary flows in spatial boundary layer on porous plate by boundary layer control /BLC/ through suction or blowing, using Prandtl partial differential equations
06 p0909 A69-17185

Unsteady suction motion of viscous incompressible fluid under action of slowly rotating suction disk, noting fluid velocity variation
08 p1302 A69-19875

Suction effect on temperature distribution and heat transfer in plane Couette flow and laminar flow in circular pipe
08 p1303 A69-20371

Boundary layer suction sound emission, analyzing turbulent flow past elastic plate with reinforced slots performing flexural and torsional vibrations
09 p1483 A69-22638

Monograph on optimal design of free-running drag turbines for boundary layer suction in aircraft, emphasizing gliders performance
12 p2011 A69-26117

Suction effects on shockwave-turbulent boundary layer interactions at compression corner leading to reductions in upstream influence
13 p2244 A69-27326

Loitsianski method of parametric approximation extended to include flat plate with constant surface suction and flow past circular cylinder
13 p2249 A69-28247

Model to study viscous flow characteristics in channel with porous walls and constant suction, noting non-monotonic velocity profile
14 p2429 A69-29015

Laminar boundary layer control by combined blowing and suction, analyzing surface roughness influence concerned with underwater vehicle skin friction reduction
[AIAA PAPER 69-387] 15 p2591 A69-30477

Fluidic logic elements using suction to influence main jet, outlining operation principles
16 p2736 A69-31835

Critical review of paper on suction effect on hypersonic laminar boundary layer separation
16 p2771 A69-31928

Distributed boundary layer suction effectiveness for controlling supersonic transitional flow separation
16 p2772 A69-32149

Conical shock wave-turbulent boundary layer interaction data obtained for adiabatic wall conditions at supersonic free stream Mach numbers, including suction effects
[AIAA PAPER 69-450] 16 p2773 A69-32754

Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests
17 p2890 A69-33251

Laminar boundary layer control on two dimensional body by combined blowing and suction in presence of roughness, noting skin friction reduction
[AIAA PAPER 68-641] 17 p2957 A69-34015

Pure gas suction through free jet shock structure, analyzing aerodynamic effect of molecular separation
19 p3240 A69-36650

Boundary layer flow past permeable surface, generalizing integral equations for case with suction
21 p3691 A69-38573

Unsteady boundary layer with distributed injection or suction on porous plate, determining acceleration and flow parameter functions from velocity profiles
21 p3692 A69-38609

Laminar corner boundary layer flow with suction, discussing Navier-Stokes equations and steady state heat conduction problems
21 p3696 A69-39578

Distributed suction effect on boundary layer structure of water flow from turbulence measurements, determining velocity and pulsation intensity distributions
22 p3933 A69-41029

Laminar boundary layer in steady compressible gas flow past plane wing profile, studying surface temperature and suction effects
23 p4058 A69-41709

Steady constant density two dimensional flow in laminar boundary layer over permeable curved surfaces, showing effects of suction or blowing
23 p4153 A69-42399

Laminar flow in porous circular pipe with constant suction or injection applied at wall
24 p4298 A69-42618

Turbulent pipe flow with wall suction, calculating friction factor, pressure gradient, heat and mass transfer coefficients, velocity and temperature profiles
[ASME PAPER 69-HT-4] 24 p4414 A69-43562

SUD AVIATION AIRCRAFT

NT ALOUETTE HELICOPTERS

NT CONCORDE AIRCRAFT

NT SA-330 HELICOPTER

NT SE-210 AIRCRAFT

Sud commercial aircraft /1970-1980/, discussing market trends, airport saturation, Airbus power plants and seating capacities
24 p4416 A69-42563

SUD AVIATION SA-330 HELICOPTER

U SA-330 HELICOPTER

SUD AVIATION SE-210 AIRCRAFT

U SE-210 AIRCRAFT

SUDDEN ENHANCEMENT OF ATMOSPHERICS

Equatorial enhancement of storm sudden commencements and sudden impulses in horizontal component in American Zone during IGY/JGC
01 p0068 A69-11116

Structure of sources of noise storm enhancements and stationary type 4 bursts, discussing head and tail components
02 p0328 A69-12753

Midday enhancement of sudden commencements and sudden impulses in H and Z at equatorial stations in Indian zone during IGY
08 p1307 A69-20187

Low energy solar cosmic ray proton flux characteristics observed by Injun 1 satellite after July 1961 sudden commencement magnetic storm
09 p1576 A69-21707

Auroral electrojet index in relation to magnetic storm sudden commencements, ring current main phase and energetic solar protons
14 p2511 A69-28954

Sudden enhancement of atmospherics recorded during IGY, noting time lag between flare and SEA maximum
16 p2778 A69-32192

High altitude nuclear explosions detected by distinguishing artificial from natural sudden enhancement of atmospherics /SEA/ phenomena
20 p3492 A69-37701

SUDDEN IONOSPHERIC DISTURBANCES

Ionospheric inhomogeneities vertical and latitudinal distributions and diurnal variations, measuring Explorer 22 signals Faraday fading with space diversity reception
01 p0064 A69-10446

Solar proton event generating sudden commencement magnetic storm, discussing effects on outer belt electrons as observed by Explorer 26 and time delay
01 p0146 A69-11124

Ionospheric irregularities and cross field plasma instability, analyzing nonlinear behavior of latter with two dimensional model
01 p0073 A69-11179

Sudden magnetic field increase associated with July 8, 1966 sudden commencement observed by OGO 3 satellite in magnetotail
01 p0075 A69-11226

Sudden cosmic noise absorption in ionosphere confirms relationship with solar chromospheric flares
02 p0306 A69-11667

Hydromagnetic emissions observed at Antarctic auroral zone, discussing relation to sudden storm commencement
02 p0241 A69-11726

Sudden ionospheric disturbance development and characteristics of solar cosmic ray flares, associated X ray emissions and high energy particle generation
02 p0308 A69-12398

Solar X ray flares measurement by rocket and satellite, discussing X ray spectrum hardening, hard flares and SID
03 p0500 A69-13225

Ionospheric F2 layer following SSC magnetic storm, noting similarity with polar aurora region
03 p0423 A69-13531

Ionospheric parameters variation during SC effect as function of solar and magnetic activities
03 p0423 A69-13534

VHF satellite signal scintillation by ionospheric irregularities with sharp boundary /such as sporadic E/, noting diffraction pattern dependence on phase shift
09 p1489 A69-21713

Sudden commencement associated discontinuities in interplanetary magnetic field observed by IMP 3 satellite, stressing shocks and tangential and rotational discontinuities
09 p1598 A69-22183

Summation curves method for development of active region and time dependence of energy loss during proton flare
10 p1764 A69-23743

Sudden ionospheric disturbance effects of solar X ray emission from active region with proton flare
10 p1764 A69-23744

X ray and extreme UV radiation deduced from sudden ionospheric disturbances during proton flare, discussing time dependence of emission
10 p1766 A69-23756

Geomagnetic crochet of July 7, 1966, discussing pulsations, recombination coefficient and electron density of ionospheric D region
10 p1683 A69-23757

Ionospheric irregularities drift and anisotropy parameters variation with true reflection height during magnetically disturbed conditions

10 p1659 A69-24062

Solar flare X ray and extreme UV radiation contribution to E and F1 region ionospheric effects observed by sudden frequency deviations

11 p1950 A69-25160

Iono-index above hard emission of solar active regions, analyzing field fluctuations and SID in D region under daytime conditions

12 p2148 A69-26107

Sudden cosmic noise absorption in ionosphere confirming relationship with solar chromospheric flares

13 p2334 A69-28698

Ionospheric effect sudden commencement parameters of magnetic storm related to distance from origin in polar regions

14 p2435 A69-29051

Worldwide changes in geomagnetic field, determining causes by examining magnetic field and plasma data for solar wind and classifying as SSC or SI

16 p2847 A69-31963

Sudden phase anomalies on radio paths compared with calculated results for satellite observed solar X ray flux intensities to explain sudden ionospheric disturbances

17 p2959 A69-33006

Planetary ionospheric effect of 15 July 1959 sudden commencement magnetic storm based on N/h/ profiles of earth day and night sides

17 p2967 A69-33987

Geomagnetic crochets time relations to solar X rays, radio bursts and flares

17 p3025 A69-34227

Sudden frequency deviations of HF radio waves propagated through ionosphere correlated with solar microwave bursts and optical flare events

20 p3592 A69-38101

Sharply bounded homogeneous ionospheric model to solve modal equation, discussing lower ionospheric conductivity from VLF transmission sudden enhancements of strength/SES/

21 p3714 A69-38554

Sudden and gradually developing geomagnetic storms with 27 day recurrence period and relation to 11 year solar activity cycle

23 p4156 A69-41849

SUGARS

NT GLUCOSE
NT MONOSACCHARIDES
NT SUCROSE

Sugars identification as trifluoethylacetyl polyol derivatives by gas-liquid chromatography

15 p2558 A69-31539

White rats hyperglycemia during blood sugar changes following single X ray dose, indicating increased sugar benefit in radiation damage treatment

21 p3658 A69-39057

SUHL EFFECT

Relaxation oscillations in field ionized epitaxial n-GaAs Gunn oscillators on semiinsulating substrates, discussing recombination of excess electrons and holes

13 p2227 A69-27236

SUITS

U PRESSURE SUITS
U SPACE SUITS

SULFATES

NT HEXAHEDRITE
NT HYDROXYLAMINE SULFATE

Bright cadmium plating by electrolysis, describing processes during electrodeposition from sulfate electrolytes

22 p3959 A69-41266

SULFATION

Reaction between nickel-base alloy and hydrogen sulphide at high temperatures under atmospheric pressure, discussing activation energy

12 p2115 A69-26617

Synthetic ferrites and sulfides of Ni and Co sulfated in presence of molten sodium pyrosulfate and sodium bisulfate

16 p2747 A69-32567

Dynamic hot corrosion rig test for operating environment and alloy composition effect on sulfidation attack during gas turbine fuel combustion

23 p4150 A69-42448

SULFIDES

NT CADMIUM SULFIDES
NT COPPER SULFIDES
NT DISULFIDES
NT HYDROGEN SULFIDE
NT INDIUM SULFIDES
NT LEAD SULFIDES
NT MOLYBDENUM DISULFIDES

NT MOLYBDENUM SULFIDES

NT TROILITE
NT WURTZITE
NT ZINC SULFIDES

Sulfide addition agents for diester lubricating grease and organic resin solid film lubricants, noting formulation and tests for steel and molybdenum

01 p0102 A69-10907

SnTe, SnSe and SnS epitaxial layers obtained by deposition of sublimates on cellulose-nitrite-varnish and single crystal NaCl and KBr substrates

02 p0298 A69-12049

Sulfospinels polymorphism at high temperature and pressure and pressure-temperature phase relations

02 p0266 A69-12162

Temperature dependence of viscosity and density in molten thallium sulfide, noting structural changes absence in short range order

04 p0643 A69-14998

Austenitic Fe-Ti alloys sulfur solubility and internal sulfidation rate computed, noting stronger Ti-S interaction with temperature decrease and sulfur diffusion role

06 p0942 A69-17226

Petroleum sulfides advantageous effect on oxygen consumption during combustion

07 p1202 A69-19456

Sulfidation attack and structural stability of nickel-base superalloy [SAE PAPER 690103]

09 p1522 A69-21556

Synthetic ferrites and sulfides of Ni and Co sulfated in presence of molten sodium pyrosulfate and sodium bisulfate

16 p2747 A69-32567

Cr-S and Cr-Fe-S systems phase relations, using silica tube and collapsible tube experiments, correlating formation conditions of meteoritic sulfide assemblages

19 p3359 A69-36123

Antimony trisulfide single crystals spectral dependence of impurity and stimulated impurity photoconductivities, comparing optical and thermal activation energies

22 p3994 A69-41042

Ferredoxin from thermophilic and mesophilic Clostridia, noting difference in heat stability due to iron and sulfide environments

22 p3897 A69-41068

SULFITES

Sulfite ion influence on pitting corrosion of stainless steels in sodium chloride solution

07 p1167 A69-19343

SULFONES

Thermoplastic polyarylsulfone thermal and electrical properties at over 500 F, noting resistance to thermal oxidative attack

19 p3355 A69-35527

SULFUR

Permissible JP-5 fuel sulfur content effect on hot corrosion of protective coated Ni-base superalloys in marine environment, noting atmospheric sea salt role

01 p0141 A69-11059

Forbidden S I lines due to transitions within ground configuration identified in Fraunhofer spectrum of sun, noting photospheric abundance of S

07 p1217 A69-19237

Quantitative gas-liquid chromatography of sulfur amino acids trimethylsilyl derivatives

13 p2217 A69-28259

Electronic levels excitation in S I and II by beam foil method

18 p3177 A69-35015

IR spectra of Eta Carinae, confirming nitrogen and sulfur abundance

19 p3423 A69-36229

SULFUR COMPOUNDS

NT CADMIUM SULFIDES
NT COPPER SULFIDES
NT CYSTEINE
NT DISULFIDES
NT HEXAHEDRITE
NT HYDROGEN SULFIDE
NT HYDROXYLAMINE SULFATE
NT INDIUM SULFIDES
NT LEAD SULFIDES
NT MOLYBDENUM DISULFIDES
NT MOLYBDENUM SULFIDES
NT SULFATES
NT SULFIDES
NT SULFITES
NT SULFONES
NT THIOLS
NT TROILITE
NT WURTZITE
NT ZINC SULFIDES

Sulfur organic compound formation effect on composition and structure of solid phase formed during hydrocarbon jet fuels oxidation

01 p0142 A69-11097

Sulfur-organic compounds association with aromatic hydrocarbons, noting oxidation inhibiting effect on petroleum oil

03 p0494 A69-1380

SH above photosphere in solar atmosphere, discussing dissociation equilibrium of diatomic molecules and possible abundances

06 p1002 A69-17317

ESR comparative study of selenoamino acids and analog radical formation and radiation resistance, noting selenium groups ability as acceptors for unpaired electrons

21 p3668 A69-38423

SULFUR FLUORIDES

Nonlinear interactions of linearly polarized carbon dioxide laser signals in sulfur hexafluoride measured as function of angle between polarization planes

14 p2460 A69-29602

Sulfur hexafluoride dissociation in argon at various temperatures and pressures, using shock tube techniques to determine unimolecular parameters

18 p3100 A69-35475

Rice-Ramsperger-Kassel kinetic theory applied to sulfur hexafluoride injection into boundary layer of high speed reentry vehicle

20 p3514 A69-37226

Carbon trioxide formation during ozone photolysis in liquid carbon dioxide and sulfur hexafluoride, noting ozone disappearance quantum yield independence of oxygen/ozone ratio

23 p4112 A69-41338

SULFUR OXIDES

Sulfur trioxide production in photolysis of sulfur dioxide at 1849 angstroms, noting oxygen addition effect on quantum yield

01 p0024 A69-10619

Therapeutic potential of dimethyl sulfoxide in aerospace medicine

06 p0883 A69-17851

Temperature and concentration measurements of H radical in hydrogen flames

21 p3669 A69-38807

SUM RULES

Partially conserved axial vector currents and current algebra to obtain vertex functions at point having zero mass by extrapolations

17 p3008 A69-33004

SUMMARIES

U ABSTRACTS

SUMMER

Large scale disturbances in summertime stratosphere observed from high level balloon, discussing diurnal wind patterns and planetary traveling waves

03 p0461 A69-13343

SUMS

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order

01 p0104 A69-10264

Summation of Legendre series by transformation into integrals and use of recurrence relations

01 p0171 A69-11072

Chebyshev polynomials maximum property, examining effect of roundoff errors in Horner scheme for floating point arithmetic

03 p0456 A69-13553

Hard limiting effect on sum of three or four sinusoidal signals noting output amplitudes, signal suppression and negative suppression effect

09 p1451 A69-21311

Sum rule properties of finite set of wave functions obtained from application of variational principles to basis functions linear combinations

14 p2471 A69-29921

Neumann-Lommel formula generalization for obtaining Bessel functions product sums illustrated with FM wave distortion calculation in multichannel system

18 p3101 A69-34625

Asymptotic behavior of probabilities of large deviations of sums of independent random variables with moments of any order

19 p3360 A69-36199

Homogeneous Markovian sum of sequence of random quantities series, deriving limiting theorem for sum density

21 p3757 A69-39538

JUN

- Solar limb image vibrations caused by turbulent pulsations in refractive index of lowest atmospheric layers
01 p0156 A69-11183
- Solar growth curves constructed for solar disk center using various metal lines
02 p0314 A69-11637
- Solar granules structural and correlation functions indicate homogeneous random field within photograph and regular component in intensity fluctuations spatial distribution
02 p0317 A69-11958
- Sun motion with respect to extragalactic universe, discussing local supercluster kinematics
03 p0513 A69-13769
- Limb darkening and central intensity of solar disk measured in UV
05 p0827 A69-16466
- Magnetic field surface in isolated symmetrical sunspot during motion across solar disk, determining field vector angle of inclination variation as related to solar surface
06 p0999 A69-16978
- Solar disk surge distribution difference between eastern and western disk parts
06 p0995 A69-17440
- Solar intensity measurements at 1.2 mm during partial solar eclipse, noting solar limb brightening and intense solar outburst near end of eclipse
07 p1217 A69-19243
- Solar atmosphere model calculations of solar oblateness, discussing flux difference and Dicke experiment on general relativity
08 p1383 A69-19899
- Cometary origin of meteors and element abundance in primitive solar nebula, discussing neutron capture products in chondrites

- Primordial solar system chemical composition for studies of origin and evolution, compiling solar composition data
09 p1608 A69-22745
- Plasmas role in emission mechanisms active in celestial sources of radiation, discussing sun and quasars
12 p2159 A69-26619
- Relative transition probabilities for visible Si atom lines, noting disagreement with LS coupling predictions and solar Si abundance determination
13 p2340 A69-27580
- Icarus radar and optical observations analyzed to verify general relativity predictions using Schwarzschild metrics and to estimate solar oblateness, Mercury mass, etc
13 p2350 A69-27823
- Stellar densities and luminosity function determined from stellar data concerning sphere with 20 pc radius around sun
13 p2351 A69-27869
- Soviet collection of articles on cosmic physics, Number 3, Comets, sun and interplanetary space
14 p2522 A69-29703
- Solar telescope imaging quality measured as function of atmospheric turbulence and temperature above land level
14 p2453 A69-29973
- Radial velocities differences as indicator of stellar atmospheric turbulence, applying method to sun
17 p3044 A69-34177
- Upper limit of solar oblateness determined from secular stability of differential rotation during evolution
18 p3202 A69-35214
- Nonlinear effects in spiral galaxies with emphasis on solar neighborhood region, discussing radial motion, stationary state with excited waves and vertex deviation
20 p3607 A69-38036
- Interstellar reddening in solar vicinity, analyzing roles of galactic latitude and longitude and heliocentric distance
22 p4026 A69-40648
- Solar motions respecting high velocity atomic hydrogen clouds and local stellar group
22 p4035 A69-41209
- Fe abundance in sun and carbonaceous chondrites, noting agreement between solar and meteorite abundances of Ni, Mg, Si and Li
24 p4385 A69-43223

Instantaneous response TV system application to observing solar surface granulation, noting advantages over photometric measurements
24 p4389 A69-43711

SUN SENSORS

U SOLAR SENSORS

SUNLIGHT

- Airborne polarimeter to measure Stokes parameters of linearly polarized visible atmospheric radiation in four narrow spectral regions
06 p0923 A69-16924
- Sun-orbit plane relationship effects on mission planning
[AIAA PAPER 69-129] 06 p1011 A69-18093
- Thermal flutter effect on gravity gradient stabilized spacecraft, noting dependence on sunlight and time
07 p1226 A69-18325
- Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
11 p1994 A69-25534
- Solar simulator with pulsed Xe arc tube, describing operating characteristics, spectral emission and simulator-sunlight correlation
15 p2586 A69-30385
- Equatorial mounted solar energy concentrator efficiency compared to unconcentrated sunlight and artificial UV-visible light source in reducing Pb tetraacetate solution in acetic acid
16 p2736 A69-31814
- Lifetime of ground state oxygen molecular ions in sunlight from photodetachment rate by free electron production measurement from ions in buffer gas
16 p2848 A69-31973
- Wavelength dependence of linear polarization of sunlight scattered by Venus, noting temporal variations in UV
16 p2860 A69-32236
- Earth-reflected solar energy /albedo energy/ distribution model, assuming isotropic scattering by homogeneous atmosphere
[AIAA PAPER 69-591] 17 p2961 A69-33292
- Ozone measurement from satellite by direct beam and scattered light methods employing UV sunlight attenuation
21 p3721 A69-38625
- Total solar radiation correlation with bright sunshine hours measured monthly on solarimeters and Campbell-Stokes recorders at various tropical stations
23 p4206 A69-42178
- Sun-orbit plane relationship effects on mission planning
[AIAA PAPER 69-164] 24 p4386 A69-43261

SUNRISE

- D region composition at and shortly after sunrise, noting negative ion factor changes, ionization source and quasi-equilibrium conditions
01 p0066 A69-10597
- F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines at magnetically conjugate point
02 p0238 A69-11681
- Sunrise effects in lower D region by solar eclipse, discussing anomaly in ionospheric absorption due to negative ion factor or recombination coefficient
02 p0246 A69-12767
- Phase and amplitude record changes in sunrise and sunset transitions in VLF transmissions over long path
06 p0889 A69-17655
- F 2 layer cut-off frequency predawn increase caused by sunrise, resulting in photoelectrons transfer along force lines magnetically conjugate point
13 p2257 A69-28712
- Quantitative criteria imposed on balloon measurements of auroral emissions from Kiruna, considering times of sunrise and sunset at different altitudes
21 p3716 A69-39250

SUNSET

- Phase and amplitude record changes in sunrise and sunset transitions in VLF transmissions over long path
06 p0889 A69-17655
- Green flash photographed at sunset by aircraft at 10.6 km over Pacific, noting correspondence with visual observation
12 p2066 A69-26232
- Quantitative criteria imposed on balloon measurements of auroral emissions from Kiruna, considering times of sunrise and sunset at different altitudes
21 p3716 A69-39250
- Absorption observation of solar radiation at sunset by nitric acid in three wavelength intervals on different balloon flights
24 p4308 A69-42969

SUNSPOT CYCLE

- 26-month periodicity in quiet day range of geomagnetic field horizontal force, noting similar periodicity in sunspot number and 16-month oscillation in both phenomena
01 p0063 A69-10427
- Chromospheric and photospheric solar observations made in Belgium in 1967, noting heliographic sunspot latitudes
02 p0313 A69-11533
- Longitudinal distribution of cycle sunspots in initial phase of solar activity from Greenwich Observatory data
02 p0314 A69-11647
- 11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers
02 p0238 A69-11680
- Relation between solar activity and cyclic variation of pearl pulsations excitation frequency during sunspot cycle
02 p0239 A69-11696
- Solar limb prominence areas variation with latitude and solar activity cycle, noting changes in yearly mean latitude of prominences during cycle
05 p0816 A69-16390
- Null solar neutrino flux possible relation to 2 year solar cycle, discussing energetic disturbances at solar core and sunspots
08 p1377 A69-19902
- Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization
09 p1575 A69-21550
- Sunspot lifetime, maximum area and cyclic variations recorded in photoheliographic results of Greenwich, discussing frequency distribution and mean
10 p1770 A69-24000
- Statistical rules for seasonal forecasts based on temperature and precipitation deviations analysis in long term climatological records, considering sunspot cycle role
12 p2125 A69-25895
- Nightglow intensity variations at sunspot minimum from measurements in South West Africa, considering relationship to ionospheric vertical movements and density variations
12 p2066 A69-26133
- 11-year solar cycle influence on F 2 region critical frequency, investigating correlation coefficient between mean monthly values of F 2 variations and respective sunspot numbers
13 p2257 A69-28711
- Relation between solar activity and cyclic variation of pearl pulsations excitation frequency during sunspot cycle
13 p2258 A69-28727
- Interplanetary sector structure during rising portion of 1966-1967 sunspot cycle, giving recurrence period of interplanetary field
14 p2517 A69-28957
- Solar quiet day variations studied by annual amplitude dependence on number of sunspots, considering E layer ionization
16 p2851 A69-32545
- Auroral absorption maximum frequency correlation with years of solar activity reduction and magnetic activity from riometric data long term variations
17 p2968 A69-33991
- Jupiter red spot prominence correlation with Zurich sunspot number
17 p3045 A69-34185
- Global electron density distribution morphology in topside ionosphere during sunspot minimum from Alouette 1 and 2 ionograms
20 p3530 A69-37867
- Solar activity center characteristics in floccula stage during eleven year sunspot cycle
20 p3616 A69-38302
- Babcock solar activity periodicity theory, correlating spots displacement and coronal magnetic field intensity changes
23 p4208 A69-41283
- Solar activity long term forecasts determined from comparison between Mount Wilson magnetic field synoptic chart latitude zones and sunspot groups
24 p4374 A69-43625

SUNSPOTS

- Ionized calcium lines in spectra of light bridges of sunspots, observed by diffraction spectroscopy, indicating similarity to chromospheric flares
01 p0154 A69-10894

Sunspots autocorrelation functions in sunspot area on solar disk, tabulating extremal values

02 p0314 A69-11677

Wilson effect in sunspots, interpreting penumbra distortion near solar disk limb in terms of radiation transport

03 p0504 A69-12893

Time dependence of relation between sunspot number and ionospheric index IF 2, noting hysteresis characteristic and changes for different solar cycles

03 p0424 A69-13632

Sunspot structure from two dimensional radiative transfer analysis of center limb intensity profiles made at several heliocentric angles

03 p0516 A69-14040

Time dependent variations in magnetic fields of active sunspot clusters in photosphere observed by magnetograph

04 p0651 A69-14369

Chromospheric flare development and motion with respect to magnetic field of sunspot clusters

04 p0648 A69-14371

Dissipation time of sunspot magnetic field determined as function of minimum spot value

04 p0660 A69-15039

Solar flares and sunspots number decrease near central meridian

04 p0660 A69-15040

Solar radio emission sources associated with sunspot groups and flocculi at 1.6 cm

04 p0649 A69-15241

Local hydromagnetic mechanism to increase magnetic fields and shape into bipolar sunspot group configuration, discussing applicability to solar atmosphere

04 p0662 A69-15243

Photospheric network obtained by spectroheliograms, discussing Fraunhofer lines weakening, nonsunspot magnetic fields and Zeeman sensitivity

04 p0664 A69-15523

High resolution H alpha line photographs of solar chromosphere, showing superpenumbra-like dark fibrils around isolated sunspots

04 p0664 A69-15526

Lithium abundance in sunspots and undisturbed solar atmosphere from measurements of solar atmosphere and spot spectra

05 p0821 A69-15850

Sunspot group classifications made at Zurich and Catania during 19th solar cycle compared to determine seeing influence

05 p0826 A69-16388

Pressure stratification and transparency/geometrical depth expansion/ in Fricke-Elsasser and Zwaan sunspot models

06 p0999 A69-16976

Model for Evershed effect postulating unipolar symmetrical sunspot surrounded by magnetic knots of opposite polarity

06 p0999 A69-16977

Magnetic field surface in isolated symmetrical sunspot during motion across solar disk, determining field vector angle of inclination variation as related to solar surface

06 p0999 A69-16978

Sunspot ejection of filaments, flare surges and flare sprays, discussing bright and dark matter divergence from western spot

06 p0995 A69-17441

Model to account for flare and sunspot phenomena, discussing uni- and bipolar spots

06 p0995 A69-17443

Solar type 4 bursts characteristics accounted for by cyclotron mechanism, assuming models of spot magnetic field configuration and electron density distribution

07 p1205 A69-18959

Magnetic knots /intergranular space strong small scale magnetic fields near sunspot/, longitudinal and transversal fields and radial velocities

07 p1217 A69-19244

Sunspot groups area changes relationship to cosmic ray flare occurrences

07 p1206 A69-19252

Sunspot observations with astrophot telescope by tracing on projected image of solar disk

08 p1387 A69-20118

Scattered light reduction in sunspot photometry, noting eliminating effect when observing spectral lines or narrow spectral regions

08 p1389 A69-20251

Synoptic charts of chromosphere, giving position and magnitude of sunspots, facula plages and prominences during synodic revolution of sun

08 p1379 A69-20378

Sunspot activity dependence on phase of eleven year cycle and heliographic latitude, discussing fine structure of butterfly diagrams

08 p1379 A69-20611

Frequency distribution curves of spot groups according to area, confirming existence of stable stages in evolution of sunspots

08 p1379 A69-20612

Solar phenomena correlation with brightness variations of comet Alcock 1963b, noting sunspot maximum followed by maximum in absolute magnitude of comet

08 p1394 A69-20620

Magnetic fields of solar supergranulation convective cells based on electromagnetic induction equation, indicating bipolar sunspots occurrence

09 p1588 A69-21366

Correlated spectra of related sunspot number and solar 10.7 cm radiation component, noting variance for solar rotation periods

09 p1574 A69-21397

Effective cross sections of electron-neutron interaction in photosphere and sunspots, calculating electric conductivity and anisotropy coefficient

09 p1579 A69-22175

Solar activity influence on cosmic ray intensity 11 year variation, taking into account heliolatitudinal movement of sunspot regions in solar cycle as evidence of density gradient

10 p1754 A69-22802

Magnetically aligned flows between sunspots, considering Evershed effect on umbrae and penumbrae

10 p1772 A69-22907

Sunspot group associated with proton flare of July 1966, describing formation of spot cluster pairs on borders of adjoining network cells

10 p1763 A69-23730

Proton flares during July 1966, discussing flare magnitude classes on disk, behind west limb, in active region and proximity to sunspots

10 p1763 A69-23737

Sunspot group evolution after proton flare, discussing decay of central umbrae

10 p1765 A69-23748

Magnetic field decay in sunspot group 21034 during July 7, 1966 proton flare

10 p1766 A69-23759

Sunspot lifetime, maximum area and cyclic variations recorded in photoheliographic results of Greenwich, discussing frequency distribution and mean

10 p1770 A69-24000

Equivalent line widths for solar disk Fe and Ti spectra determined for umbra models, noting role of sunspot location

11 p1955 A69-24388

Center to limb variations of sunspot-photosphere brightness ratio, considering umbra darkening and radiative equilibrium

11 p1946 A69-24426

Sunspot groups large scale configuration in complex proton region, investigating probability of occurrence of accompanying groups/satellites/ in flare generation

11 p1946 A69-24427

Mercury transits in 1970 and 1973 to resolve prominence threads and spicules, sunspot fine structures, etc

11 p1958 A69-24434

Photoelectric measurements of nightglow intensities during sunspot minima by zenith photometer, considering background continuum

11 p1877 A69-24584

Jupiter red spot visibility, establishing partial dependence on solar activity

11 p1964 A69-25404

Indium, Rb and Cs abundances obtained from sunspot spectra by comparison with Zr and Ti lines

13 p2343 A69-27626

Spectrometric and photometric investigation of spectral characteristics of large sunspot 45 degrees from solar disk center, tabulating characteristics of 134 spectral lines

13 p2218 A69-28324

Sunspots autocorrelation functions in sunspot area on solar disk, tabulating extremal values

13 p2355 A69-28708

Sunspot equivalent line widths calculated using sunspot models, considering influence of light scatter correction

14 p2525 A69-29721

Light saturation development of line profile component of normal Zeeman triplet in sunspot umbrae

14 p2528 A69-29964

Solar photosphere and sunspot magnetic fields structure and strength dependence on sunspot area

14 p2528 A69-29965

Slowly varying component of solar radio emission evaluating resolution of radio telescopes in sunspot studies and localized areas luminescence

15 p2674 A69-30500

Hydromagnetic stability calculations applied to umbral models, showing overstable oscillations relation to thermal hydromagnetic wave generation occurrence in sunspots

15 p2693 A69-30700

Photoheliographic data tabulation of sunspots positions and areas for 1961 obtained from various astronomical observatories

15 p2700 A69-31400

Solar flares and bursts correlation, taking into account sunspot type associated with flare and frequency range of bursts

16 p2850 A69-32210

Solar Ca chromospheric plage decay curves obtained from area measurements, showing similarity and exponential mean curve

16 p2859 A69-32220

Semiannual variation in amplitude of solar daily quiet geomagnetic variation, discussing sunspot dependence of seasonal secondary minimum and maxima

16 p2782 A69-32450

Active longitudes of indices for sunspot activity and solar flares detected and investigated by isoline method for period 1957 to 1962

17 p3022 A69-33045

Sunspot of 28 December 1967 studied by far IR scanning with interference and Reststrahlen filters defining bandpass, obtaining umbral temperature

17 p3029 A69-33050

Heliosphere boundary location significance for Jovian magnetosphere configuration, considering inverse correlation between sunspot number and Jovian decametric radio emission

17 p3033 A69-33379

Chromospheric inhomogeneities rapid changing properties observable in H and K lines above sunspot umbrae

18 p3204 A69-35389

Sunspots magnetic structure producing solar proton flares, considering role of sunspots rotational motion on photospheric surface

18 p3189 A69-35415

Bright regions with loops /BRLS/ in sunspot group development, discussing survey of time lapse movies from 1968

19 p3403 A69-35967

Butterfly diagram of sunspot distribution, concluding physical processes not yet clarified

19 p3426 A69-36583

Solar radio emission parameters calculated, determining basic 327 MHz emission component and flux density-sunspot area correlation coefficient

20 p3588 A69-37478

Relative penumbral intensity independent of sunspot position from data by pinhole photometer of large sunspots

20 p3603 A69-37542

Kinetic energy of sunspot rotational motion transferred to electromagnetic energy in filamentary currents, noting time variations in solar atmosphere preconditioning for flare

20 p3589 A69-37550

Solar microwave emission relationship to geomagnetic activity, analyzing statistically source intensity and model of coronal condensation associated with sunspots based on electron densities

20 p3589 A69-37551

Sunspot umbra observed on 21 September 1966, computing transparency in model equaling photosphere transparency at same optical depth

20 p3605 A69-37825

Magnetic field and radial gas motion in sunspots from Crimean magnetograph observations at different depths of solar atmosphere

20 p3615 A69-38295

Sunspot size and shape in continuous spectrum regions from photometric observations in UV and red ranges

20 p3616 A69-38301

Mean importance variations of sunspot groups in various latitude intervals, reducing data statistically with dispersion analysis and autocorrelation method

20 p3616 A69-38302

Chromospheric heating above sunspots by analyzing MHD wave generation and propagation in sunspots and solar atmosphere

22 p4010 A69-39997

Statistical analysis of chromospheric flares connections with sunspots, using frequency distributions of flares occurrences in sunspot groups

22 p4001 A69-39998

Sunspot position in H alpha core relative to continuum, discussing height differences between H alpha core and continuum levels
22 p4019 A69-40291

Sunspot spectra near solar limb for difference between Fraunhofer line continuum and line core formation levels, finding geometrical height scale and pressure equilibrium
22 p4019 A69-40292

Explorer 30/Solrad 8/ satellite observation of 0.5-3 A solar X ray emission related to magnetic configuration in sunspot group
22 p4003 A69-40298

Distinction between faint and bright sources of slowly varying solar microwave emission components applied to geomagnetic activity statistics
22 p4020 A69-40306

Sunspots microstructure, discussing penumbra and umbral properties with respect to magnetic field configuration
24 p4378 A69-42690

Phenomenological sunspot model describing granules, supergranules, magnetic fields and photospheric convection
24 p4378 A69-42691

Oscillatory convection, energy transport and structure of sunspots, suggesting fast changes in equilibrium conditions for magnetic reconstruction and solar flares origin
24 p4374 A69-43624

Equivalent line widths for solar disk Fe and Ti spectra determined for umbra models, noting role of sunspot location
24 p4390 A69-43778

SUPERALLOYS

U HEAT RESISTANT ALLOYS

SUPERCAVITATING FLOW

Supercavitating flow past thin hydrofoils, determining flow velocity or acceleration potential near free surface
22 p3933 A69-41023

SUPERCAVITATION

U SUPERCAVITATING FLOW

SUPERCARGERS

Supercharged bypass engines for possible application in light aircraft, noting payload fractions and total takeoff weights values
08 p1254 A69-20168

Performance correction and nonstandard day performance prediction for analyzing turbocharged reciprocating aircraft engines in light aircraft applications [SAE PAPER 690309]
11 p1942 A69-24514

SUPERCARGING

U SUPERCARGERS

SUPERCONDUCTING MAGNETS

Superconductors, discussing properties and materials for magnets, power systems, radiation detectors, HF devices and computer elements
04 p0642 A69-14584

Superconducting magnets steady state stability improvement by using composite conductors
10 p1746 A69-23634

Variable voltage DC power supplies for energizing cryogenically cooled and superconductive electromagnets
12 p2017 A69-26498

Superconductivity methods to neutralize ambient magnetic field by free electrons motion for nonmagnetic environments
13 p2244 A69-28604

MHD generator design using shock wave kinetic energy produced by explosion in shock tube with superconducting magnetic system
14 p2393 A69-28911

Terminal characteristics of composite superconductor, taking into account heat transfer to coolant, interface thermal contact resistance and superconductor size
17 p3007 A69-33792

Book on solenoid magnet design covering magnetic and mechanical aspects of resistive and superconducting systems
20 p3464 A69-37145

Superconducting magnets for MHD generators, discussing design, construction and operation problems
21 p3782 A69-39478

SUPERCONDUCTIVITY

Microscopic theory of superconductivity, considering quantitative physical properties of low temperature electric current flow
02 p0293 A69-11432

Superconductivity and melting point of metals, discussing cause of anomalies
02 p0283 A69-11785

Structural influence on superconductivity of niobium-titanium alloys, using electron microscopy and measurements of current density vs magnetic field strength
02 p0269 A69-12763

Vanadium-gallide alloys critical temperature of transition into superconducting state determined by measuring cast alloy samples magnetic permeability
03 p0483 A69-13023

Superconductivity of niobium-titanium-oxygen alloy wires containing 40 percent minimum niobium weight, noting thermomechanical aging effect on critical current density
03 p0484 A69-13118

Electron vs phonon superconductivity mechanism conditions for semiconductors, semimetals and molecular crystals
03 p0492 A69-14176

Superconductivity of electron beam evaporated tungsten films by X ray and electron diffraction techniques, discussing temperature dependence of energy gap
04 p0640 A69-14447

Superconductivity and band structure from pseudopotential for zinc and cadmium, analyzing values of electron phonon mass enhancement
04 p0642 A69-14965

Relationship between microhardness of niobium and other variables characterizing superconductivity
05 p0810 A69-16805

Zr-Nb alloy structure effect on critical superconductivity parameters determined, using electron microscopy of thin films
05 p0811 A69-16806

Structure and critical superconductivity current of titanium niobium alloy as function of heat treatment and deformation
07 p1158 A69-18532

High pressure high temperature synthesis and superconducting properties of yttrium sesquicarbide, noting effect of ambient pressure annealing
07 p1201 A69-19600

White dwarfs transfer to superconducting state, using BCS theory for superconducting transition temperature dependence on electron density
08 p1391 A69-20546

Plasmon superconductivity mechanism in degenerate semiconductors and semimetals, noting interaction effect between electrons and plasma sound
09 p1556 A69-21573

Stationary Josephson effect used to determine fluctuations influence on superconducting tunneling
09 p1556 A69-21669

Semiconductor properties, applications and problems including thin films, superconductivity, etc
11 p1937 A69-24736

Josephson effects in superconductivity and superfluidity including electron tunneling DC and AC effects, basic and double junctions
11 p1938 A69-25240

Quenched titanium-niobium alloy structure effect on superconductivity properties, using electron microscope and X rays
12 p2112 A69-26040

GeTe, SnTe and strontium titanate transition into superconducting state including induced superconductivity
12 p2144 A69-26620

Niobium aluminide-niobium germanide alloys superconductivity and heat treatment influence on critical temperature
13 p2316 A69-27659

Transition metal interstitial compounds thin film preparation and superconducting properties, emphasizing high critical temperature, rock salt structure and NbN base
13 p2321 A69-28009

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, Fermi particles, boson systems, neutron stars, etc
16 p2853 A69-31595

Superconductive tunneling measurements on thin Al films, discussing enhanced transition temperatures, energy gap dependence on temperature, electron microscope observation of crystallites, etc
16 p2825 A69-31634

Superfluidity and superconductivity under cosmic conditions, discussing Bose-Einstein condensation, neutron stars, white dwarfs, etc
16 p2856 A69-31950

Book on superconducting materials physical metallurgy covering fundamental theory, material properties, behavior regularities, applications, etc
16 p2802 A69-32051

Automatic tuning of superconducting cavity resonant frequency using optical feedback, discussing phase error processing and frequency deviation
17 p2937 A69-33781

Superconducting antenna factors and matching circuit equivalents developed for predicting efficiency and Q increase on basis of Pb surface resistance
17 p2937 A69-33784

NbN thin film production by refined reactive sputtering technique, discussing Pauli spin paramagnetism and spin orbit scattering in high field superconductivity
17 p3016 A69-33790

Ta type I and II wire resistance in transverse magnetic field during superconducting to normal transition, discussing strain and impurity effects
17 p3016 A69-33791

Omega phase formation in Ti and Zr alloys with transition metals, discussing effects on mechanical and superconducting properties
18 p3155 A69-34634

Electronics applications of superconductivity including inductors for energy storage, computer elements and magnets, cavities for microwave circuits, signal generators and detectors, etc
19 p3382 A69-35807

Tempering time and temperature effect on microstructure, superconductivity, tensile strength and electrical conductivity of recrystallized Nb-Ti alloy
19 p3345 A69-36302

Heat treatment effect on superconducting properties of deformed Nb-Ta alloys, noting critical current density
19 p3345 A69-36303

Polarons large to nearly small transitions, studying ground state mass dependence on bare electron mass, electron-phonon interactions model, superconducting strontium titanate, etc
20 p3583 A69-37280

SUPERCONDUCTORS

Vortices coupling between superposed superconducting tin films as function of perpendicular magnetic field, primary current and temperature
01 p0135 A69-10014

Electromagnetic wave propagation in superconductors, noting transmission line structure variation with magnetic fields and current and suitability for parametric amplifiers
01 p0135 A69-10176

Energy gap behavior and thermodynamic properties of anomalous superconductors noting sensitivity to phonon spectrum
01 p0138 A69-10436

Stability of compound superconducting cables under conditions of controlled heat transfer from cable surface to liquid He [IEEE PAPER 13.5]
01 p0176 A69-10718

Electromagnetic waves parametric interactions during unsteady Josephson effect as function of wavelength ratio, magnetic field penetration and contact dimensions
02 p0293 A69-11464

Pressure and magnetostriction effects on magnetization curves of type 2 superconducting In-Ti alloy, noting Ginzburg-Landau parameter stress dependence
02 p0294 A69-11776

Thorium and La-compounds retained superconductivity to Pr and Tm concentrations due to crystal field splitting effect producing nonmagnetic singlet ground state
02 p0295 A69-11778

Critical state model of type 2 superconductor taking account of critical current on magnetic field and surface sheath currents, evaluating flux penetration, hysteresis, AC losses, etc
02 p0298 A69-12030

Surface structure effect on flux penetration and AC losses in superconductive niobium
02 p0298 A69-12031

Josephson voltage-frequency relation independence of superconductor nature, noting e/h value and importance to voltage standards and quantum electrodynamics
02 p0299 A69-12599

Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor
03 p0484 A69-13284

Electronic attenuation of 10 to 130 MHz longitudinal ultrasonic waves in superconducting high purity Ti, noting energy gap anisotropy
03 p0485 A69-13293

Superconductor energy spectrum gap, discussing temperature dependence, anisotropy, thermodynamic

and kinetic properties and relation to Fermi surface and phonon spectrum

03 p0485 A69-13331

Superconductor tunnel junction with noise, calculating frequency pulling, radiation linewidth and voltage power spectrum in AC Josephson effect

03 p0486 A69-13387

Upper bound for free energy of nonlocal superconductor in magnetic field, using variational method and perturbation theory

03 p0491 A69-13971

Heat removal in multilayer superconducting devices, determining optimum number of layers

03 p0493 A69-14225

Superconductors, discussing properties and materials for magnets, power systems, radiation detectors, HF devices and computer elements

04 p0642 A69-14584

BCS theory application to metallic modification of hydrogen for obtaining high temperature superconductor

04 p0642 A69-14680

Superconductors and living matter behavior, studying conditional parallelism via microstructure, cryogenic and electronic fundamentals

04 p0644 A69-15321

Electromagnetic properties associated with presence of overlapping bands in pure superconductors, discussing temperature dependence

05 p0810 A69-16802

Temperature dependence of Josephson critical current in superconductor model having anisotropic energy gap

05 p0810 A69-16803

Superconductors with overlapping energy bands studied by nuclear magnetic resonance method

07 p1198 A69-18513

Superconducting flux-flow resistivity minimum in Pb-Tl alloy, discussing thermal dissipation associated with temperature gradients across moving fluxoid

07 p1198 A69-18642

Experiments on Josephson tunneling junctions and superconducting contacts to demonstrate quantum electronic properties of superconductors [IEEE PAPER D-7]

07 p1200 A69-19052

Metallographic and X ray study of cellular decomposition and precipitation in superconducting niobium zirconium alloy, noting heat treatment effect on current carrying properties

08 p1331 A69-20192

Magnetic field distribution and resistance of homogeneous type 2 superconductor cylinder at transition under effect of axial current

08 p1371 A69-20202

Type two superconductors physical properties, discussing magnetic flux lines interaction with structural defects

09 p1555 A69-21490

High homogeneity sixth order superconducting solenoids with coil inner surface notch correction, describing graphical design techniques

10 p1665 A69-23857

Cryogenic applications including maser amplification, IR detection and superconductivity, discussing systems optimization and cost reduction

10 p1665 A69-24017

Mixed state of type 2 superconductors, stressing alloying elements effects in solid solution and structural inhomogeneities

12 p2145 A69-27119

Hard superconductors technology, stressing metallurgical processing factors effect on properties of niobium alloys and intermetallic compounds

12 p2103 A69-27120

Zr doped superconducting ceramic strontium titanate, noting effective electron mass variations and transition temperature

13 p2316 A69-27400

Weak superconducting contacts volt-ampere characteristics current steps and emission spectra, showing singularities due to superconducting current nonharmonicity

14 p2504 A69-28994

Josephson current dependence on nonmagnetic impurity concentration in pure and highly contaminated superconductor

14 p2508 A69-29656

Josephson current density distribution in thin film superconductors, determining relation between tunneling density and magnetic field for films with/without current

15 p2667 A69-30196

Magnetic field effects on ultrasonic propagation in high field superconductors

16 p2826 A69-31825

Hall effect and transverse voltages in type II superconductors in mixed state, considering cold rolled Nb-Zr alloys

16 p2827 A69-31827

Superconducting cavities for resolving optically induced changes in dielectric constant of CdS at 4.2 K

17 p3016 A69-33782

Kinetic inductance measurements in linear circular and rectangular cylindrical superconductors, giving inductance temperature dependence for wires and both thick and thin films

17 p3016 A69-33783

Slow electromagnetic wave propagation in superconducting thin film transmission lines, noting phase velocity dependence on film thickness and spacing

17 p2938 A69-33785

Steady state performance of multistrand superconducting compound conductors in current sharing state, using heat measurement from metal surface to He bath

17 p3016 A69-33786

Steady state flux jumping for thin walled tubular superconducting NbTi subjected to coaxial superimposed AC and DC magnetic fields, discussing effective resistivity

17 p3016 A69-33787

Superconductor research noting pressure effects, graphs and tables illustrate behavior of materials considered

20 p3584 A69-38015

Superconducting cavity X band oscillator designed for study of stability and spectral purity dependence on temperature

21 p3683 A69-39453

Time dependent differential equation for order parameter in superconductors near critical temperature derived from density matrix equations

22 p3994 A69-41053

Superconducting leads with small electrical resistance and low thermal conductance for cryogenic applications, noting manganin wires coated with Pb-Sn alloy

22 p3997 A69-41236

Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density

24 p4361 A69-43121

SUPERCOOLING

Supercooled water drop frozen and observed to undergo explosive shattering and ejection of ice splinters

02 p0275 A69-12693

SUPERCritical FLOW

Supercritical flow effects on unsteady aerodynamic coefficients used for subsonic aircraft flutter analysis, emphasizing changes due to shock and flow separation

01 p0007 A69-11020

Diathermal regenerative cooling of combustion chambers and engine nozzles with supercritical heat transfer mode

03 p0495 A69-12970

Separation of subcritical and supercritical compressible turbulent boundary layers under strong pressure gradients using method based on integral equations [AIAA PAPER 69-34]

06 p0912 A69-18077

Heat transfer in single phase medium at near critical state parameters

11 p1997 A69-24230

Free surface in supercritical regime downstream of valve submerged in MHD flow, noting effects of horizontal and vertical magnetic induction fields

15 p2659 A69-30299

SUPERCritical PRESSURES

Natural convection heat transfer through enclosed horizontal layer of supercritical carbon dioxide, discussing flat plate configuration data

04 p0688 A69-15398

Helium cryostat designed to operate under overload and vibrations and used for cooling onboard superconducting devices of Cosmos 140 satellite

04 p0585 A69-15407

Heat transfer coefficient deterioration between fluid and tube wall at supercritical pressure and high heat fluxes [ASME PAPER 68-HT-39]

13 p2373 A69-27771

Thermodynamic parameters of MHD cycle employing supercritical Hg, indicating need for more suitable fluids

16 p2736 A69-31914

Compressible gas flow into cavity of various volumes in presence of supercritical pressure gradients

24 p4298 A69-42587

SUPERFLUID FLOW

U SUPERFLUIDITY

SUPERFLUIDITY

Exciton distribution in semiconductors below Bose condensation temperature differing from diffusion distribution

03 p0486 A69-13411

Josephson effects in superconductivity and superfluidity including electron tunneling DC and AC effects, basic and double junctions

11 p1938 A69-25244

Superfluidity and superconductivity under cosmological conditions, discussing Bose-Einstein condensation of Fermi particles, boson systems, neutron stars, etc

16 p2853 A69-31594

Superfluidity and superconductivity under cosmological conditions, discussing Bose-Einstein condensation of neutron stars, white dwarfs, etc

16 p2856 A69-31950

Pressure activated superfluid valve design and operation for liquid He transfer from reservoir to cold finger

22 p3870 A69-41233

SUPERGIANT STARS

Strong line profiles computed for models of hot expanding extended atmospheres of OB supergiants

07 p1223 A69-19637

Expanding atmospheres in OB supergiants from radial velocity measurements, proposing tentative temperature and velocity fields

08 p1387 A69-20091

Mass loss observed in Of, Wolf-Rayet and OB supergiant stars from P-Cygni profiles in far UV resonance lines

08 p1395 A69-20641

Distance of bright stars in Cepheus OB2 region by MK spectral classification and UVB photometry, noting early main sequence and supergiant stars

09 p1599 A69-22194

Cepheid variable and F and G stars observed for neutral lithium line, searching for resonance lines of ionized beryllium in similar stars

09 p1604 A69-22402

Atomic line spectrum computation for F-K supergiant or cepheid, using observational data on standard star spectrum

10 p1771 A69-22854

Reddened M supergiant 119 Tauri IR spectra and IR absorption by CO and SiO molecules in stellar atmosphere and silicate mineral in interstellar grains

10 p1786 A69-24100

Red supergiants as old derivatives of main sequence O and B stars, discussing neutrino emissions and carbon core contraction

10 p1788 A69-24125

Computer program for model stellar envelopes of red supergiants with extended atmospheres

12 p2156 A69-26218

Element contents of supergiant HD 190603 atmosphere based on spectrophotometric analysis including temperatures, turbulent velocity, gravity acceleration and electron concentration

12 p2157 A69-26336

IR objective-prism survey along southern Milky Way for identifying high luminosity stars

13 p2335 A69-27314

Hydrogen content in Ia supergiant spectra of type B, noting lack of Stark wings of Balmer lines

13 p2348 A69-27722

Radial velocities of southern OB stars and supergiants noting tabulation of information

14 p2519 A69-29368

Supergiant HD-33579 in Magellanic cloud by model atmospheres, discussing abundances

14 p2529 A69-29979

Radial pulsation mode of convective envelopes in adiabatic equilibrium for variable M red supergiant stars

15 p2692 A69-30766

HD 30353 He binary star invisible component suggested as KO type supergiant from IR photometric data

18 p3203 A69-35348

Equivalent absorption line widths of supergiant B1 IA /kappa Cassiopeia/ tabulated with log NH content of atmosphere for various elements

21 p3803 A69-38844

Nongray models representing atmospheres of F and G supergiants computed and tabulated for 5400- 6600 K and various surface gravities

22 p4015 A69-40152

Blue component of HD 237006 and VV Cephei spectra, suggesting greater luminosity of blue star in late type supergiant

24 p4387 A69-43353

Beta Orionis spectral line profiles data used to study atmospheric structure

24 p4391 A69-43804

UPERHARMONICS

- Self adaptive systems stability analyzed using filter and correlation methods, considering higher harmonics at rectifier and synchronous detectors output 04 p0582 A69-14796
- Structural detection in steel welded joints using higher harmonics from eddy current sensing element 24 p4319 A69-42886

UPERHEATING

- Upgrading wave superheater for evaluation of reentry materials 01 p0054 A69-10917
- Nucleate pool boiling heat transfer data extended to relate effect of heating surface characteristics [ASME PAPER 68-WA/HT-22] 05 p0847 A69-16125

UPERHETERODYNE RECEIVERS

- Performance characteristics of 300 GHz Dicke type superheterodyne radiometer receiver for measuring atmospheric attenuation of electromagnetic waves 02 p0209 A69-12336
- Diode mixer power series coefficients for spurious response prediction in superheterodyne receiver 03 p0399 A69-13905
- Wideband superheterodyne tunable radiometers of millimeter wave range using input mixer and high intermediate frequency 07 p1131 A69-18517
- Microwave frequency synthesizer for digitally tuned UHF and microwave superheterodyne receivers, considering phase locking voltage-tuned transistor oscillator 12 p2030 A69-26390
- Ferrite frequency mixers used with heterodyne receiver, studying combination and cross noise rejection efficiency 15 p2574 A69-30129
- Superheterodyne millimeter and submillimeter wave detection, allowing harmonics separation 15 p2570 A69-31093

SUPERHIGH FREQUENCIES

- X band mixer with reactively terminated image, using gallium arsenide barrier diodes and microwave integrated circuit techniques 01 p0039 A69-10189
- Diode structure optimization for monolithic integrated circuit for Ku-band reflective phase shifter 01 p0040 A69-10195
- S band thyatron waveguide switch as pretriggered megawatt balanced duplexer 01 p0048 A69-11035
- S band solid state amplifier capable of 10 watts output power based on combination of transistor amplifiers 02 p0217 A69-12147
- X band radiometer to minimize errors in calibration of microwave noise sources 02 p0220 A69-12440
- Doppler effect in centimeter wave range demonstrated by radio interferometer, noting amplitude difference between reference wave and wave reflected from moving reflector 03 p0393 A69-13333
- Broadbanding of S-band three port stripline circulator, discussing effect of tuning and mode suppressor screws 03 p0404 A69-13472
- Satellite traveling wave tube for X band duplicating C and S band performance 03 p0405 A69-13678
- CW klystron amplifiers design limitations at Ku and Ka bands, discussing operation characteristics 03 p0405 A69-13724
- Plane reflector with variable reflection coefficient for electromagnetic centimeter waves, consisting of plane grating of semiconductor diodes mounted in waveguide 03 p0406 A69-13938
- Electronically scanned X band array used as receiving antenna for target recognition radar 04 p0562 A69-15476
- X-band swept frequency oscillator using Gunn diode and ferrite phase shifter 05 p0734 A69-16573
- Nearly abrupt X band Si avalanche IMPATT diodes irradiated by fast neutrons, noting effects on DC and microwave characteristics 06 p0976 A69-16874
- Harmonic generation of S band signal inside plasma column at resonance 06 p0965 A69-17488

- X band CW traveling wave tube developed for communications, ECM and plasma research, discussing design, performance and gain ripple diminution 07 p1094 A69-18425
- Pulse power from X band LSA devices at centimeter through millimeter wavelengths 07 p1097 A69-18445
- Radio wave absorption measurements in atmosphere at superhigh frequencies, considering earth radiation, antenna sidelobes anisotropy, instrument effects, etc 07 p1076 A69-18518
- Epitaxial GaAs IMPATT diodes for generating CW X band power, noting high efficiencies and low noise characteristics 07 p1102 A69-18660
- X band internal cavity voltage tunable magnetron operating in theta mode, solving output loading, interaction limitations and cavity dimensions 07 p1102 A69-18670
- Kwajalein Missile Range UHF telemetry conversion program using S band antennas with three channel monopulse autotrack systems 07 p1077 A69-18829
- Sun as calibration signal source for L and S band telemetry, discussing receiving system noise temperature determination and antenna gains 07 p1082 A69-19113
- Band three port Y junction stripline circulator with triangular ferrite 08 p1286 A69-20838
- X band eight element matrix array construction, producing antenna suitable for aircraft 08 p1288 A69-20966
- Electronic multibeam switching X band antenna system design with separate transmitting and receiving antennas for use on continuous wave surveillance radar 08 p1289 A69-20967
- Active microwave scattering antenna arrays at super-high frequencies, noting low bias power requirement 08 p1290 A69-20975
- Short multicoronal TE sub 01 mode X band taper for connecting two different diameter circular waveguides 09 p1468 A69-22604
- Flux density of quasars 3C 270 and 3C 278 at 40 cm, determined by digital computer with point source program 11 p1954 A69-24383
- Vertical parabolic antenna array and receiving system for S band transhorizon signal phase and amplitude measurement 11 p1851 A69-24987
- Parametric frequency converter consisting of mixer head in bridge circuit with varactors for 12 GHz TV transmitters 11 p1854 A69-25614
- Attenuation losses on curved dielectric waveguide in X band 11 p1856 A69-25633
- LF negative resistance of X band Gunn diodes with lumped components, using coaxial circuit 12 p2039 A69-26387
- Quasar spectra changes observed from 1962 to 1966 including flux density and antenna temperature for 3C 279 at cm wavelengths 12 p2167 A69-27043
- Quasars intensity variations at various cm wavelengths confirming wavelength dependence 12 p2167 A69-27045
- Linear polarization measurements at 6 cm, determining rotation period associated with Jupiter cm radiation 13 p2343 A69-27623
- Integrated S-band parametric amplifier design, combining low noise performance at room temperature with broadband flat gain and linear phase response 13 p2230 A69-27678
- Space Ground Link Subsystem as S-band communication link within Air Force Satellite Control Facility including unified telemetry, tracking and command systems 14 p2427 A69-28879
- Parametron preamplifier for X band superheterodyne ESR spectrometer, noting sensitivity and SNR 14 p2423 A69-29757
- X band open resonator terminated by step-rimmed flat mirrors, discussing rim effect on Fabry-Perot diffraction loss 14 p2424 A69-29765
- X band avalanche diode oscillator operated as superregenerative amplifier, noting frequency response characteristics ascribed to diode susceptance modulation 16 p2757 A69-31585

- Microelectronic S band upconverter designed and fabricated in microstrip on alumina substrate 16 p2762 A69-32562
 - Wide tuning range S band low noise maser amplifier system, discussing bandwidth, gain and packaging for antenna mounting 17 p2979 A69-32914
 - Pulsed radio source CP 1919 detection at 13 cm wavelength with maser receiver and 210 ft antenna 17 p3036 A69-33637
 - Nonmetallic materials thickness measurements at SHF, describing factors affecting geometrical-optics method 18 p3138 A69-35116
 - Superconducting cavity X band oscillator designed for study of stability and spectral purity dependence on temperature 21 p3683 A69-39453
 - Performance prediction of terrestrial communication system based on experimental radio and meteorological program at 11 GHz, discussing transmission loss 22 p3900 A69-40680
 - L and S band transmitters for space applications, discussing power and frequency stability, low intermodulation, inputs isolation, efficiency, size and weight 23 p4137 A69-41740
 - Wideband FM telemetry transmitters for S band, using symmetrical discriminator 23 p4119 A69-41741
 - S band antenna systems for missiles, designed in various types to obtain RF telemetry links reliability by sharing effort between airborne and ground station equipment 23 p4137 A69-41753
 - X band pulsed microwaves effect on skin metabolism including respiratory activity, biochemistry and biosynthesis of intercellular materials, etc 24 p4270 A69-42575
 - Meter and decimeter wavelength range short period fading under conditions excluding optical shifts, correlating specular and diffuse reflection 24 p4281 A69-42612
 - Flux density of quasars 3C 270 and 3C 278 at 40 cm determined by digital computer with point source program 24 p4389 A69-43773
- SUPERIMPOSITION [MATHEMATICS]**
U SUPERPOSITION [MATHEMATICS]
- SUPERMAGNETS**
U HIGH FIELD MAGNETS
- SUPERNOVAE**
- Stellar evolution, discussing stellar structure, pre- and post-main sequence evolution, solar system origin, supernovae, white dwarfs, variable stars and close binaries 01 p0148 A69-10046
 - Pulsar discovery at position of suspected supernova remnant, suggesting pulsars as rotating neutron stars formed in stellar explosion 01 p0149 A69-10268
 - Cosmic rays properties and sources, considering origin in supernovae, galaxies, quasars and unknown sources 02 p0308 A69-12158
 - Supernova explosion theories, discussing neutrino and degenerate matter concepts, thermonuclear reactions in stellar explosions, oxygen conversion into sulfur, Crab Nebula, etc 03 p0509 A69-13356
 - Heavy nuclei in cosmic rays analyzed in photographic emulsion tracks suggest supernova origin 04 p0649 A69-15422
 - Supernova remnant theories used to interpret results of 1-mile Molonglo cross type radio telescope survey of nonthermal galactic sources 04 p0664 A69-15441
 - Evolutionary theory of origin and properties of Seyfert galaxies and quasars, postulating collisions within superdense clusters leading to supermassive stars and supernovas 05 p0819 A69-15703
 - Radio emission from supernova remnants, reviewing evolution, structure, spectra and polarization, plus identification, characteristics, surface brightness and radio emissive remnants distance 06 p1002 A69-17314
 - Radio spectra of supernova remnants Cygnus Loop and IC443, noting possible radiation from shell source 06 p1003 A69-17322
 - White dwarf general relativistic instability toward dynamic collapse and Type I supernovae 06 p1010 A69-17975

Book on supernovae covering galactic supernovae, type II supernovae remnants, Crab Nebula, primary cosmic radiation, etc

07 p1210 A69-18379

Gamma ray telescope development for balloon-borne astronomy in search for discrete gamma sources and supernova explosions
[IEEE PAPER 3A-5]

07 p1134 A69-19192

Gas remnant of large scale explosive event in galactic plane at 60 degree longitude, discussing resultant extension on line profile

07 p1225 A69-19717

Pulsar emission possible connection with rotating neutron stars, discussing rotational energy transfer to circumstellar plasma and production of periodic shock waves

08 p1383 A69-19895

Nucleosynthesis in dynamics of massive star cores, noting element synthesis by neutron capture in supernova explosions

08 p1401 A69-20898

Spectrophotometry of relics of supernovae, determining H alpha and N II lines intensities radial velocities and velocity dispersion

09 p1587 A69-21357

Amplitudes and rates of brightness increase during supernova outbursts, calculating released energies

09 p1587 A69-21358

Condensed supernova remnants in Crab Nebula, considering various hypotheses for radio source

09 p1592 A69-21485

Polarization and intensity distribution of extended supernova remnant in Centaurus, discussing remnant effect on galactic magnetic field

09 p1598 A69-22184

Linearly polarized radiation from supernova remnants 3C 10, Taurus A, 3C 358 and Cassiopeia A, determining distributions by synthesizing fan beam

09 p1598 A69-22185

Contour maps of supernova remnants HB 9, Simeis 147 and IC 443, noting spectra showing radiation nonthermal

09 p1604 A69-22408

Gamma ray luminosity of typical type I supernovae remnant computed by assuming Ni 56 radioactive decay energy origin of optical luminosity

09 p1581 A69-22409

Neutron proton plasma properties in massive stars and supernovae, discussing neutrino emission

10 p1756 A69-22814

X ray universe, considering contribution of X ray astronomy to phenomena of big bang, supernovae, neutron stars, exploding galaxies, etc

10 p1760 A69-22869

Supernova frequency in galactic clusters, 45 supernovae in 2144 galaxies and average frequency of one supernova per galaxy per 316 years

10 p1774 A69-22966

Maximum indicative absolute magnitudes of 33 supernovae, discussing usefulness as distance indicators

10 p1774 A69-22967

Polarized brightness distributions of supernova remnants IC 443 and W44 at 6-cm wavelength from observations with 6 minute resolution

10 p1787 A69-24113

Pulsars and ancient chinese records of supernova explosions, relating luminous intensities, radio sources and evolution

11 p1963 A69-25253

Hydrodynamic calculation of 1.42 solar mass white dwarf supernova, considering instability and collapse initiation by electron capture

12 p2156 A69-26210

Frequency spectra of radio galaxies, supernova remnants and quasars observed by radio telescope operating in decimeter wave range

12 p2167 A69-27041

Coherent radio emission mechanism in quasars and supernova remnants, discussing magnetic effects

12 p2168 A69-27050

Supernova in Sc type spiral M83, discussing supernovae occurrence frequency

15 p2682 A69-30451

Supernovae spectra observation suggesting tracing as broad band interstellar absorption rather than emission features on continuum

15 p2701 A69-31534

Spectra for 16 radio sources, questioning classification as supernova remnants

17 p3035 A69-33610

Supernovae research, discussing supernovae classes and connections with cataclysmic processes in galactic evolution

17 p3044 A69-34173

Spectrophotometry of relics of supernovae, determining H alpha and N II lines intensities radial velocities and velocity dispersion

18 p3197 A69-34747

Amplitudes and rates of brightness increase during supernova outbursts, calculating released energies

18 p3197 A69-34748

Pulsars, pulse shape and duration, object size and spatial distribution, distinguishing between pulsars and supernovae

18 p3202 A69-35283

Supernovae observations at Palomar during 1968 made with Schmidt telescopes

19 p3403 A69-35963

Photometric and spectral observations of Chuadze and Wild supernovae, showing type I classification

20 p3607 A69-38038

Galactic radio sources high resolution observations at 178 MHz, determining flux densities and angular structures, noting supernovae remnants

21 p3801 A69-38701

Nuclear gamma ray astronomy utilization for stellar interior detection, showing identification of key radioactive nuclei of supernova at explosion time

21 p3792 A69-39572

Radio observations of supernova remnant HB 21 at 2695 MHz, noting spectral brightness and curvature of northern shell segment

22 p4014 A69-40129

Neutrons, protons and alpha particles abundance resulting from nuclear evolution of nondegenerate matter exploding at very high temperatures

22 p3980 A69-40148

Radiant energy diffusion from spherical expanding matter for masses and velocities of model supernova outbursts, discussing thermonuclear and neutron star origins of supernovae

22 p4026 A69-40649

Photographic observations of supernovae including magnitudes, comparison star tables and instrument details

22 p4032 A69-40944

Neutron star formation, discussing influence of supernova explosions and need of pulsar study

23 p4222 A69-42393

Radio galaxies differences from quasi-stellar objects indicating relativistic particles generation from violent explosions releasing energy comparable with powerful supernova

24 p4378 A69-42697

Pulsars relation with supernovae remains and radiation patterns and fluxes analysis, ascribing radio emission to relativistic plasma

24 p4383 A69-42985

Cassiopeia A luminous filaments motion study noting stellar remnant magnitude

24 p4389 A69-43746

SUPERPOSITION [MATHEMATICS]

Maxwellian velocity distributions simulated in one, two and three dimensions by superposition of N monoenergetic isotropic distributions, noting application to kinetic theory computation

13 p2313 A69-28222

Linear radar system theory including Fourier transforms, linear superposition and input/output ratio for deterministic and random signals, discussing filter and sampling theory

20 p3489 A69-37633

Superposition principle extended for wave propagation in composite materials /nonhomogeneous elastic media/

20 p3627 A69-37765

Cosmic ray diurnal phase and amplitude variations determined using superimposed records of cosmic ray stations inside limited rigidity region

23 p4204 A69-41481

SUPERSATURATION

Nonpolar gases solubilities in aqueous KOH solutions in temperature range 25 to 100 C, noting activity coefficients, salting out coefficients and heats of solution

10 p1651 A69-22937

Thermal accommodation coefficient and critical supersaturation for nucleation of mercury vapor on pyrex glass

13 p2321 A69-28005

Oxygen supersaturation in unstirred blood under temperature effects, noting tension loss during stirring

23 p4077 A69-41296

Computerized design of potassium vapor turbine with supersaturation effects compared with equilibrium flow turbine design

23 p4187 A69-42251

SUPERSONIC AIRCRAFT

NT B-70 AIRCRAFT

NT CONCORDE AIRCRAFT

NT F-4 AIRCRAFT

NT F-5 AIRCRAFT

NT F-104 AIRCRAFT

NT F-106 AIRCRAFT

NT F-111 AIRCRAFT

NT FIREBEE 2 TARGET DRONE AIRCRAFT

NT JAGUAR AIRCRAFT

NT SAAB 37 AIRCRAFT

NT TU-144 AIRCRAFT

NT X-15 AIRCRAFT

Hydraulic powered flight control system for Jaguar supersonic military training aircraft

01 p0012 A69-10636

Ti for high temperature use in supersonic aircraft, noting compressibility limit on maneuvering load factor and cooling by H

02 p0192 A69-11898

Onboard electric power systems of transport aircraft, analyzing constant frequency systems for supersonic aircraft

02 p0196 A69-12166

Kinetic heating of aircraft, discussing aerodynamic boundary layer, relationship between heat transfer coefficient or boundary layer energy turbulence and skin friction

03 p0534 A69-14081

Jaguar combat trainer/tactical support aircraft to meet France and UK military requirement, noting supersonic performance and honeycomb construction

04 p0549 A69-15063

Jaguar aircraft-equipment conformity to maximum standardization with equipment for other programs

04 p0550 A69-15062

Supersonic airplane high temperature wire tests, detecting corona onset voltage /COV/ or voltage breakdown

05 p0731 A69-16245

Supersonic aircraft fire detection using coherent fiber bundles

06 p0926 A69-17679

Stratospheric critical clear atmospheric turbulence at midlatitudes, noting applications to supersonic aircraft design

06 p0950 A69-17788

Mirage G supersonic swing wing two seater aircraft performance, discussing hinging of mobile wing on pivot, fluids for airfoil-fuselage transfer, landing gear, etc

07 p1053 A69-19230

Firebee 2 /BQM-34E/ turbojet-propelled recoverable supersonic aerial target construction, performance prediction and missions

09 p1434 A69-21901

Sonic boom reduction by azimuthal redistribution of supersonic aircraft pressure field variation

09 p1434 A69-21948

Titanium fuselage skin contouring to shallow compound curvature of supersonic aircraft by elastic draping, shot pen forming and cold stretching, discussing residual stresses

09 p1512 A69-22374

Human engineering program at early design phase of SST aircraft to achieve maximum human efficiency and man machine compatibility

09 p1447 A69-22546

Titanium compared with aluminum in application to supersonic aircraft structures, considering tests and costs

10 p1700 A69-23600

Supersonic transport airline operations including safety, noise, traffic control, routing, etc

11 p2004 A69-24373

Supersonic aircraft radiation hazard due to solar flare proton exposure, using Monte Carlo method to estimate dosage as function of tissue slab

11 p1949 A69-24864

Stabilizing methods for supersonic aircraft, noting effect of aircraft characteristic parameters on magnitude of balancing coefficients of lifting force

16 p2735 A69-32127

Exhaust nozzle/airframe interference test evaluation for twin engine supersonic fighter

16 p2733 A69-32730

Local external flow variations effect on blow-in-door nozzle performance in transonic flight regime

16 p2733 A69-32731

Concorde aerodynamic design compromise between high and low speed requirements, kinetic heat problems and materials selection

19 p3245 A69-35666

Supersonic aircraft and power plant structural members operating under cyclic stress at elevated temperatures tested by various methods for interaction between creep and fatigue

20 p3620 A69-37000

- Jaguar aircraft design and operational characteristics, noting supersonic performance at high altitudes and during maneuvers 20 p3463 A69-37928
- Scattering equations for sonic boom waveform spike perturbations produced by atmospheric turbulence, discussing supersonic aircraft pressure signatures 21 p3646 A69-38689
- Aeroelasticity of supersonic aircraft in flight, discussing buffeting, wing flutter and control surface flutter 22 p3862 A69-40003
- Structural aircraft design requirements for high flight speeds stressing aerodynamic heating, heat resistant materials, weight and geometry problems 23 p4233 A69-42164
- Supersonic aircraft sonic bangs loudness level calculations by model waveforms with allowance for interaction between incident and ground reflected shock waves 23 p4063 A69-42454
- Supersonic aircraft design data, costs and benefits, discussing origin and significance of sonic boom 24 p4252 A69-42997
- SUPERSONIC AIRFOILS**
- Supersonic interference on lateral stability of planar configurations analyzed using wind tunnel data [AIAA PAPER 68-21] 02 p0189 A69-12377
- Base drag effects on maximum lift drag ratio airfoils determined for moderate supersonic laminar and turbulent flows 10 p1633 A69-24060
- Aerodynamic properties calculations of arbitrary slender supersonic wings using sum of simple integrals 15 p2548 A69-31170
- SUPERSONIC COMBUSTION**
- Hydrogen-air supersonic combustion at low densities, discussing laboratory computer simulation based on boundary layer concepts and finite rate chemistry [WSCI PAPER 68-29] 07 p1240 A69-18358
- Optimum fixed geometry ramjet in Mach range of 3 to 7 with successively subsonic and supersonic combustion [ONERA-TP-656E] 07 p1203 A69-18415
- Supersonic combustion technology, noting air breathing propulsion systems for application to hypersonic flight 11 p2003 A69-25596
- Air-hydrogen supersonic mixing and combustion, characterizing hot hydrogen jet discharging into supersonic concentric air stream at atmospheric pressure [AIAA PAPER 69-339] 13 p2378 A69-28275
- Test facility for supersonic combustion at low static pressure using fuel and gas streams and optical scanning spectrometer [AIAA PAPER 69-340] 13 p2243 A69-28276
- Finite difference method for turbulent mixing and combustion of hydrogen injected parallel to supersonic air stream, considering vitiated and unvitiated air [AIAA PAPER 69-539] 16 p2877 A69-31844
- Supersonic combustion for high Mach number high altitude flight, discussing laboratory simulation for actual flight condition and chamber design [AIAA PAPER 69-458] 16 p2880 A69-32743
- Nonequilibrium inlet conditions effect on combustor performance during H and vitiated air combustion, studying ignition delays [AIAA PAPER 69-457] 16 p2881 A69-32767
- Solid fuel ablation and supersonic combustion processes for various propulsion configurations, testing plastic models in wind tunnel 24 p4414 A69-43569
- SUPERSONIC COMBUSTION RAMJET ENGINES**
- Three dimensional scramjet exhaust nozzle flow fields by second order method of characteristics [AIAA PAPER 69-5] 06 p0862 A69-18048
- Shock tunnel simulation of scramjet combustion chamber performance [AIAA PAPER 69-84] 06 p0985 A69-18165
- Fuel mixing mechanism in diffusion type supersonic combustion, noting influence of combustor configuration and fuel density [AIAA PAPER 69-32] 07 p1242 A69-19266
- Supersonic ramjet propelled air breathing booster for speeds up to Mach 12, discussing flight mechanics, aerodynamics, propulsion, heating and air intake design 09 p1573 A69-22608
- Integrated double oblique shock scramjet for supersonic combustion tests and instrumentation development, discussing fuel injection through sonic orifices, combustion data, etc [AIAA PAPER 69-827] 16 p2840 A69-32673
- Scramjet engine active cooling with regenerative system using superalloy heat exchangers and hydrogen fuel as coolant [AIAA PAPER 68-1091] 24 p4365 A69-43725
- SUPERSONIC COMMERCIAL AIR TRANSPORT**
- NT TU-144 AIRCRAFT
- Satellites and ocean platforms for civil aviation operations over North Atlantic, noting cost justification dependence on supersonic traffic increase [UN PAPER 68-95887] 01 p0113 A69-10521
- Public health aspects of galactic radiation exposure at supersonic transport altitudes 03 p0375 A69-14072
- Biological effects of cosmic ionizing radiation in supersonic commercial aircraft at high altitudes, showing spatial distribution based on balloon experiments 11 p1830 A69-24865
- Commercial supersonic and subsonic air traffic growth forecast 22 p3862 A69-39934
- SUPERSONIC COMPRESSORS**
- Hydraulic analogy for shock and expansion waves arising in supersonic compressors due to three dimensionality of flow [ONERA-TP-598] 02 p0187 A69-11621
- Supersonic compressors for supersonic and subsonic air intakes, studying wave configuration at entry of circular cascade of blades with hydraulic analogy [ONERA-TP-669] 05 p0699 A69-16340
- Supersonic axial compressor boost stages for small gas turbine engines, using passage flow approach and passage criteria to design airfoils [ASME PAPER 69-GT-44] 09 p1570 A69-22478
- Air powered fluid jet engine compressor bleed control stressing closing, reset and override operations [ASME PAPER 69-GT-19] 09 p1571 A69-22498
- Supersonic compressor blade sections performance prediction near maximum pressure ratio and efficiency by analyzing flow processes [AIAA PAPER 69-522] 16 p2843 A69-32711
- Supersonic radial flow compressor producing flow with meridional component exceeding velocity of sound 17 p2889 A69-32992
- Supersonic cascade wind tunnel /ONERA/ for super and transonic compressors profiles studies 17 p2895 A69-33591
- Steady state and dynamic distortion influence on performance and stall of turbofan engine, discussing compressor instrumentation, tests and simulation data 18 p3185 A69-35175
- Boundary layer effects in turbulent spiral vortex flow of compressible fluid in supersonic centrifugal compressor, discussing flow geometry, using momentum integral method 23 p4152 A69-42109
- SUPERSONIC DIFFUSERS**
- Secondary injection effect on supersonic parallel diffuser, analyzing flow patterns, pressure distribution and recovery and heat transfer 03 p0365 A69-13991
- Diffuser performance in hypersonic shock wind tunnel for nitrogen flow, discussing steady shock wave and separation zone formation time 14 p2391 A69-29622
- Supersonic blowdown wind tunnel noting cylindrical diffusers efficiency in starting supersonic nozzles increased in proportion to Mach number 17 p2890 A69-33125
- SUPERSONIC DRAG**
- Equations, tables and charts for shock drag parameter in determination of shock wave drag of body in supersonic free stream of ideal gas 02 p0188 A69-11862
- Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique [AIAA PAPER 69-140] 06 p0865 A69-18184
- Optimum aerodynamic shapes theory, considering linearized and nonlinearized supersonic flow, Newton-Busemann hypersonic flow, free molecular flow, mathematical models and variational problems 08 p1253 A69-21127
- Minimum drag wing profile at zero angle of attack in supersonic flow, allowing for initial structural flaws and randomly varying parameters 11 p1818 A69-25328
- SUPERSONIC FLIGHT**
- Aerodynamic configurations to reduce sonic boom at supersonic speeds 01 p0007 A69-11028
- Air coupled seismic waves generated by jet fighters flying at high altitudes and supersonic speeds 01 p0077 A69-11281
- Minimum drag configurations with low heat transfer for hypersonic bodies of revolution, noting performance at supersonic speeds 02 p0191 A69-12578
- Fuel requirements for flights up to Mach 3.5, discussing heat stable mineral oil based SST fuels 11 p1941 A69-25422
- Ramjets and air augmented rockets as propulsion systems for supersonic atmospheric flight, noting inlet design, combustors and nozzles 11 p1943 A69-25586
- Supersonic aerodynamic characteristics of wings with complex planar geometry and subsonic leading and trailing edges, discussing varying geometry 14 p2391 A69-29624
- Sonic boom damage to structures from supersonic aircraft overflights using inductive and deductive approaches 15 p2585 A69-30370
- Shock waves from accelerated, decelerated and stationary axisymmetric bodies flying at supersonic velocities in stratified isothermal atmosphere 15 p2551 A69-31171
- Supersonic combustion for high Mach number high altitude flight, discussing laboratory simulation for actual flight condition and chamber design [AIAA PAPER 69-458] 16 p2880 A69-32743
- Legal, social and physical effects of supersonic flight, discussing damage claims validity and recovery resulting from breaking of sound barrier 17 p3075 A69-32841
- Flight velocity changes from sonic to supersonic through turbojet/ramjet combination possibility 17 p3020 A69-33348
- Supersonic flight altitude stability, studying effects of velocity, lift-drag ratio, thrust law, wind direction, engine unstarts, etc [AIAA PAPER 69-813] 19 p3366 A69-35627
- Passenger transport cruising at low supersonic speeds without sonic boom generation on ground, discussing overpressures, signature characteristics and corridor widths [AIAA PAPER 69-776] 19 p3244 A69-35647
- Tremographic studies of central nervous system during supersonic flight as engineering psychology application to man machine relations in aircraft-spacecraft industries 19 p3259 A69-35834
- Supersonic flying effect on urinary catecholamine excretion rates in pilots, noting emotional state 24 p4265 A69-43370
- SUPERSONIC FLOW**
- Gas jet interaction with supersonic flow during injection from orifice of flat body, investigating Mach number, orifice diameter and jet effects on flow pattern near injection 01 p0005 A69-10357
- Supersonic air flow around blunt body studied near critical line with allowance for viscosity, thermal conductivity and radiant energy transfer, assuming thermodynamic equilibrium 01 p0006 A69-10378
- Algorithms for three dimensional supersonic gas flow incident on bodies applied to calculating oxygen flow in asymmetric nozzle 01 p0060 A69-10724
- Compressible relativistic flow in subsonic, transonic and supersonic regimes, noting pressure coefficient variations 01 p0007 A69-11203
- Pressure and shock shape determination for plane supersonic and low hypersonic flows past aerodynamic profiles 01 p0008 A69-11299
- Fluid mechanics of supersonic flow separation and reattachment in fluidic devices 02 p0231 A69-12077
- Monte Carlo direct simulation for treating rarefied supersonic flows about bodies in transitional regime between continuum and free molecular flow 02 p0189 A69-12523
- Turbulent boundary layer growth, pressure distributions and surface shear stresses on yawed semiangle cone [AIAA PAPER 68-98] 02 p0190 A69-12526
- Aerodynamic characteristics of delta wings for supersonic flow at large angles of attack, showing sweepback angle influence on drag coefficient 02 p0191 A69-12585
- Generalization of characteristic relations for steady supersonic 3D motion of polytropic gas, obtaining complex screw motions 03 p0412 A69-12847

Plane supersonic base flows studied using integral analysis of turbulent reattachment, noting prediction of wall pressure distribution

03 p0361 A69-12990

Film cooling by subsonic gas injection of air through porous flat plate into 2.9 Mach air flow, noting wall temperatures

03 p0413 A69-12994

Supersonic flow past blunt body with convex corner calculated to establish sonic point on body

03 p0363 A69-13406

Problem of viscous supersonic flow past blunt bodies based on Navier-Stokes equations formulated and solved numerically with explicit difference scheme

03 p0363 A69-13653

Supersonic flow region about blunt body calculated on basis of gasdynamic equations for steady flow of inviscid nonheat conducting gas

03 p0363 A69-13658

Numerical computer results applied to supersonic flow of perfect gas past staggered cones

03 p0363 A69-13659

Pressure distribution at wedge wall during instantaneous small variation of supersonic motion

03 p0364 A69-13662

Resonance analysis of forced vibration of rectangular plate in three dimensional supersonic flow

03 p0528 A69-13928

Numerical algorithm for supersonic gas flow past blunt bodies with shock wave separation, using Dorodnitsyn method of integral correlation

04 p0587 A69-14621

Reattachment pressure correlated for any type of two dimensional turbulent supersonic separated flow

04 p0588 A69-14727

Steady plane supersonic gas flows with large number of shocks computed on basis of weak solutions of hyperbolic system

04 p0544 A69-15284

Sting diameter and cylindrical protuberance length effects on base pressure of axisymmetric body in turbulent supersonic flow

05 p0697 A69-15712

Two dimensional supersonic rotational flow around convex corner solved using coordinate system consisting of left running characteristics and streamlines

05 p0697 A69-15722

Boundary conditions in oblique reaction waves in supersonic flow, adding or subtracting heat by chemical reaction

05 p0697 A69-15828

Plane supersonic flows separated by thin film shaped jet, deriving pressure as function of deviation

05 p0746 A69-16020

Zhukovskii lifting force theorem application to slender wing profile and airfoil lattice in linearized supersonic flow

05 p0697 A69-16023

Thickness effects on flow past sweptback wings in supersonic flight noting influence of oscillatory motion [ASME PAPER 68-FE-31]

05 p0698 A69-16078

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities

05 p0699 A69-16674

Unsteady supersonic flow around thin circular cylinder representing rocket stage, calculating flutter and response to random environment

[ONERA-TP-666] 06 p0857 A69-17098

Delta wing head wave at zero angle of attack in steady supersonic flow during transition from subsonic to supersonic leading edges

[DVL-871] 06 p0858 A69-17242

Wall temperature and Mach number effect on heat flux distribution at spreading line of flow for supersonic gas on ellipsoid of revolution

06 p0858 A69-17331

Asymmetric supersonic air flow at 60 degree angle of attack past ellipsoid with frontal spike creating separation area

06 p0858 A69-17337

Nonequilibrium supersonic flow calculation of detonating mixture past blunt bodies applied to flow of hydrogen-oxygen mixture past sphere

06 p0859 A69-17343

Shock formation in supersonic plasma flow guided by magnetic channel up to magnetic barrier

06 p0966 A69-17524

Dynamic behavior of three layer plates in supersonic gas flow

06 p1024 A69-17552

Aircraft aerodynamic characteristics determination from numerical computer solution of supersonic gas flow past blunt body with broken generatrix

06 p0859 A69-17582

Laminar boundary layer separation and reattachment near concave corner on cooled reentry body in supersonic flow

06 p0911 A69-17592

Kinetic theory of sharp leading edge parallel to supersonic flow using Boltzmann equation, determining flow field

06 p0861 A69-17637

Weakly ionized wakes study in free quasi-molecular regime of supersonic flow, using Langmuir probe in wind tunnels, discussing ion density distribution

06 p0966 A69-17639

Pressure distribution, heat transfer rates and shear stresses in laminar boundary layer of supersonic viscous flow incident on corner point of body

06 p0861 A69-17641

Supersonic plasma flow interaction with two dimensional magnetic dipole

06 p0967 A69-17738

Dynamic behavior of shock layer of supersonic rarefied gas flow past disk and sphere

06 p0861 A69-17812

Boundary layer transition detection at supersonic speeds, using thin film gages to infer local laminar and turbulent supersonic skin friction

[AIAA PAPER 69-9] 06 p0912 A69-18075

Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow

[AIAA PAPER 69-137] 06 p0913 A69-18078

Transverse secondary gaseous injection penetration into confined supersonic flow

[AIAA PAPER 69-2] 06 p0913 A69-18080

Pressure distribution determined from laminar viscous-inviscid interactions in supersonic flow, including flows with heat transfer

[AIAA PAPER 69-7] 06 p0913 A69-18095

Isoenergetic two dimensional supersonic turbulent base flow, noting boundary layer separation properties upstream and downstream

[AIAA PAPER 69-68] 06 p0864 A69-18137

Finite plate length effect on two dimensional supersonic turbulent boundary layer with large distributed surface injection

[AIAA PAPER 69-162] 06 p0864 A69-18138

Flow field for single or multiple jets firing forward into oncoming supersonic free stream, noting effect of forward extending cylindrical body

[AIAA PAPER 69-69] 06 p0864 A69-18164

Injectant stagnation temperature and molecular weight variation effect on flow field generated from secondary injection into supersonic stream

[AIAA PAPER 69-1] 06 p1039 A69-18196

Similarity functions defined for laminar or turbulent separation in nonuniform supersonic flow

[ONERA-TP-659F] 07 p1050 A69-18417

Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure

07 p1190 A69-18695

Mixed sub- and supersonic gas flow in plane pressure nozzle free of vortex and neglecting viscosity and heat conduction

07 p1050 A69-18739

Base pressure calculation in initial turbulent boundary layer of supersonic flow about two dimensional backward facing step, using mass conservation conditions

07 p1119 A69-18747

Stationary supersonic nonequilibrium plasma source in gas vacuum expansion and nozzle flows

07 p1191 A69-18986

Solar wind flow past earth and magnetosphere correspondence to external aerodynamics of round noses bodies in supersonic stream

07 p1128 A69-19360

Detonation wave propagation in H-O mixtures in supersonic flow, noting detonation front structure and velocity

08 p1420 A69-19882

Book on wing theory in supersonic flow covering simple and cruciform wings, wings with vertical plane tail, etc

08 p1251 A69-20523

Displacement effect due to subsonic reaction heat front behind shock wave in two dimensional supersonic flows

08 p1252 A69-20691

Supersonic flows past slender bodies, calculating pressure by means of moving singularities

08 p1252 A69-20721

Discharge structure and stability of nonequilibrium plasma undergoing supersonic flow through linear MHD channel

08 p1366 A69-20787

Heat flux effect on laminar boundary layer separation in supersonic flow stressing free interaction zone

09 p1429 A69-21695

Two dimensional supersonic flow along adiabatic curved ramp noting separation, attached flow and laminar boundary layer interaction with external stream

[AIAA PAPER 68-109] 09 p1430 A69-21948

Lateral spreading of liquids injected into supersonic flow, discussing dependence on Mach number and scattered light and schlieren photographs of spray structure

09 p1482 A69-21964

One strip method of integral relations applied to inviscid supersonic blunt body problem

09 p1430 A69-21971

Base pressure fluctuations behind cone in supersonic gas flow, noting complicated superposition of harmonics associated with various factors

09 p1431 A69-22237

Pressure on unsteadily oscillating cylindrical shell in external or internal supersonic flow derived from asymptotic theory

09 p1618 A69-22254

Hydrogen diffusion flames stabilization by flame holders in supersonic flow at low stagnation temperatures measuring burning limits

[DVL-815] 09 p1624 A69-22612

Oblique shock wave separation conditions in supersonic gas flow past wedge

09 p1483 A69-22665

Steady three dimensional flow of gases with thermodynamic relaxation, noting flow field weak discontinuities and effect of discontinuities in wall curvature

10 p1677 A69-22894

Mach wave and anisotropic supersonic flow interaction, considering constant entropy along streamlines and layer of entropy discontinuities/interfaces

10 p1631 A69-22906

Shock front propagation in argon with electrode-drawn induced EMF, using shock tube with induced transverse magnetic field

10 p1737 A69-23466

Finite difference technique for numerical computation of steady supersonic two dimensional gas flows, with or without diffusion normal to mean flow streamlines

10 p1679 A69-23595

Base drag effects on maximum lift drag ratio airfoils determined for moderate supersonic laminar and turbulent flows

10 p1633 A69-24060

Mean flow measurements in supersonic wake of slender two dimensional body at zero incidence and heat transfer rate, noting predictability from similarity analysis

11 p1817 A69-24281

Boltzmann equation with BGK model as governing equation for sharp leading edge problem in supersonic flow

11 p1817 A69-24288

Second approximation of asymptotic damping of disturbances in viscous heat conducting gas supersonic flow about solid of revolution at critical velocity

11 p1817 A69-24627

Monograph on calculation of linearized supersonic flow on rocket configurations at zero angle of attack, particularly at interfaces between components, covering applications

11 p1817 A69-24637

Minimum drag wing profile at zero angle of attack in supersonic flow, allowing for initial structural flaws and randomly varying parameters

11 p1818 A69-25328

Delta wing in three dimensional supersonic flow analyzed by method of characteristics, discussing leading edge problems

11 p1820 A69-25425

Supersonic gas flow past plane and axisymmetric bodies with broken generatrix, determining tangential discontinuities and shock waves shape and position

11 p1820 A69-25470

Supersonic air flow past blunt body of revolution in presence of nonequilibrium chemical reactions, ionization and molecular excitation

11 p1820 A69-25474

Gas dynamics for supersonic nonequilibrium flows discussing method for determination of nozzle contour for maximum thrust

11 p1820 A69-25477

- Interference between bodies of revolution and wings in supersonic flow, using Volterra method for calculation
11 p1820 A69-25476
- Numerical integration of equations for three dimensional laminar boundary layer on sharp elliptical cones in supersonic flow of ideal gas, discussing heat exchange
11 p1821 A69-25477
- Supersonic and hypersonic flow of rarefied gas around blunt cylinders at various angles of attack, noting pressure distribution on model surface
11 p1821 A69-25478
- Static pressure measurements at surface of sharp plate in supersonic flow during gas/liquid jet injection
11 p1821 A69-25479
- Flow field structure involving supersonic secondary jet interactions and separated regions in thrust vector control system
11 p1944 A69-25594
- Topological properties of plane flow in subsonic region behind smooth shock wave in uniform supersonic flow, discussing shock wave convexity
12 p2061 A69-25888
- Heat flux in two dimensional laminar separation zone in supersonic flow, measuring convection coefficient and wall pressure
12 p2011 A69-26289
- Supersonic air flow around blunt body studied near critical line with allowance for viscosity, thermal conductivity and radiant energy transfer, assuming thermodynamic equilibrium
12 p2012 A69-26669
- Shadow, schlieren and interferometric methods for study of transonic, supersonic and hypersonic fields of aerodynamics, using refractivity variations in heterogeneous medium
12 p2060 A69-26934
- Nonuniform flowfield from supersonic penetration of plane shock by three dimensional pointed planar wing, using integral transform method to study field perturbation pressure
13 p2199 A69-27323
- Heat transfer coefficients for supersonic open cavity flow recompression steps noting influence of step and flow shapes
13 p2375 A69-27786
- Laminar temperature and velocity profiles near plane rectangular surface for free supersonic flow, solving partial differential equations for mass, momentum and energy conservation
13 p2309 A69-28025
- Creep stresses and displacements in conical membrane shells at small angle of attack to supersonic flow field, discussing temperature distributions
13 p2364 A69-28205
- Electrical breakdown voltage and voltage-current characteristics of uncooled coplanar carbon electrodes in walls of supersonic conical and rectangular nozzles [AIAA PAPER 68-713]
13 p2249 A69-28231
- Inviscid supersonic flow in right angle corner of varied angular intersecting wedges with bow waves remaining planar up to intersection line
13 p2200 A69-28251
- Supersonic wake flow visualization, obtaining direct photographs of various smoke streamlines [AIAA PAPER 69-346]
13 p2200 A69-28281
- Variational problems associated with supersonic gas flows with foreign particles, considering nozzle designs
14 p2389 A69-28801
- Flow structure in conical shock wave-sharp flat plate interaction zone in supersonic flow, noting turbulent boundary layer before separation
14 p2428 A69-28897
- Near wake in axisymmetric supersonic flow past slender body with/without base injection, obtaining pressure, temperature, Mach number, velocity and concentration distributions
14 p2389 A69-29017
- Shock wave and blunt faced cylinder interaction in supersonic gas flow in two chamber shock tube observed with high speed photography
14 p2390 A69-29467
- Difference schemes for quasi-linear hyperbolic equations, with applications to three dimensional supersonic flow past bodies
14 p2430 A69-29475
- Supersonic gas flows in shock layer past blunt bodies taking into account selective radiation and radiative transfer in continuum, applying method of characteristics
14 p2390 A69-29477
- Supersonic gas flow past wedge at zero angle of attack with separated shock wave, calculating velocity gradient at stagnation point and pressure and drag distribution
14 p2390 A69-29615
- Spatial supersonic ideal gas flows past blunt bodies analyzed by numerical finite difference methods, discussing flow fields and entropy
14 p2390 A69-29616
- Quasi-steady state supersonic gas flow past two closely spaced coaxial separating bodies at different velocities, showing dependence on separation rates
14 p2391 A69-29617
- Supersonic combustible gas mixture flow around circular cone, discussing ignition by shock wave and flow modification by conical flame front
15 p2548 A69-31007
- Surface of minimum drag symmetrical trapezoidal wing in supersonic flow solved by variational method
15 p2548 A69-31022
- Static pressure distribution induced by statistically roughened duct walls on supersonic stream
15 p2593 A69-31148
- Supersonic flow past cone in presence of blowing normal to cone surface, calculating flow field parameters behind conical shock wave
15 p2548 A69-31175
- Aeroelastic nonlinear panel stability in supersonic gas stream, defining hazardous conditions of critical flutter boundary
15 p2716 A69-31549
- Supersonic laminar boundary layer separation calculated by integral method using free parameters for velocity and enthalpy profiles, considering boundary layer-external flow interaction
16 p2731 A69-31834
- Turbulent and transitional near wake of adiabatic slender wedge with and without base injection at Mach 4 in supersonic wind tunnel [AIAA PAPER 68-100]
16 p2732 A69-31882
- Compressible flow over finite porous plate in supersonic stream with massive injection over surface analyzed using inviscid vortical flow model
16 p2770 A69-31884
- Flow field around sharp slender cones with surface mass transfer at zero angle of attack in low density supersonic and hypersonic flow [AIAA PAPER 68-66]
16 p2732 A69-31887
- Book on three dimensional flow of ideal gases past smooth bodies, emphasizing utility of finite difference methods
16 p2771 A69-32003
- Distributed boundary layer suction effectiveness for controlling supersonic transitional flow separation
16 p2772 A69-32149
- Three dimensional supersonic nozzle flow field calculations using second order numerical method of characteristics and computer programmed for internal flows [AIAA PAPER 69-463]
16 p2734 A69-32766
- Supersonic radial flow compressor producing flow with meridional component exceeding velocity of sound
17 p2889 A69-32992
- Axisymmetric supersonic gas flow with attached shock wave past cone, calculating flow parameters between body and shock wave
17 p2890 A69-33123
- Vortex motion enhancement of jet penetration and spreading in supersonic fuel injection into large diameter combustors [AIAA PAPER 69-664]
17 p2953 A69-33437
- Supersonic leading edge problem using nonlinear Boltzmann equation with ellipsoidal model, calculating molecular distribution functions for flow field [AIAA PAPER 69-652]
17 p2892 A69-33464
- Supersonic and hypersonic flow of inviscid ideal gas over conical delta wings using three dimensional method of characteristics [AIAA PAPER 69-646]
17 p2893 A69-33486
- Favorable pressure gradient effect on compressible two dimensional supersonic turbulent boundary using temperature and pressure probes and shear balance [AIAA PAPER 69-685]
17 p2956 A69-33489
- Preston probe measurement of friction drag on subsonic and supersonic nozzle wall including effects of heat transfer, compressibility and pressure gradient [AIAA PAPER 69-648]
17 p2893 A69-33496
- Static and impact pressure distributions for Mach number and velocity profiles of supersonic to subsonic flow transition in tube at low Reynolds numbers [ASME PAPER 69-APM-23]
18 p3120 A69-34397
- Three dimensional supersonic flow past pointed nonaxisymmetrical bodies characterized by great local surface curvature changes, using new approximation
18 p3086 A69-34705
- Rarified gas dynamics of blunt and sharp-pointed slender bodies in supersonic stream and free jet sonic expansion into high vacuum
18 p3123 A69-34924
- Sublimation of various compressed naphthalene wind tunnel models analyzed in supersonic air flow, discussing effects of temperature and model configurations
18 p3231 A69-35121
- Nonequilibrium behavior of shock standoff distance ahead of spheres at low supersonic Mach number
18 p3089 A69-35385
- Asymptotic solution of supersonic linearized nonisentropic flow of viscous and heat conducting gas with internal heat sources past cylindrical shell, deriving surface pressure
18 p3089 A69-35460
- Asymptotic theory of pressure on cylindrical shell subjected to unsteady oscillations in external and internal linearized supersonic flow using Laplace and Fourier transforms
18 p3089 A69-35461
- Biased electrostatic probes determining free stream charge density and ionization risetime in supersonic flows in arc heated pressure driven shock tube
19 p3291 A69-35715
- Static temperature measurement in arc-tunnel tests producing high velocity air streams by duplex scanning IR spectrometer
19 p3294 A69-35752
- Electrohydrodynamic supersonic flow over wavy wall by oscillating piston model, calculating streamlines and density distributions
19 p3297 A69-35838
- Turbulent velocity of flame propagation in supersonic stream of hydrogen-air mixture determined by velocity distribution, exchange coefficient and burning time
19 p3448 A69-35854
- Monograph on method of characteristics for three dimensional supersonic flows, covering numerical calculations of steady gas flow past bodies at angle of attack
19 p3238 A69-36170
- Function theoretic solution of dual integral equations applied to boundary value problem of supersonic flow over infinite span thin wing
19 p3239 A69-36311
- Supersonic aerodynamic characteristics of flared cones with various flare angles studied by schlieren photography, showing geometrical parameters influence on flow patterns
19 p3239 A69-36387
- Nonuniform supersonic flow of ideal inviscid gas impinging on plane obstacle, discussing flowfields and shock wave production in impact
19 p3239 A69-36397
- Compressible fluid two dimensional supersonic and one dimensional unsteady flows similarities shown graphically, discussing hodograph-speedgraph relationship
19 p3300 A69-36777
- Supersonic flow past antisymmetrical thin delta wing by flow separation from subsonic leading edges, noting wing surface pressures
19 p3241 A69-36779
- Supersonic flow past segmented and blunt bodies, investigating flow characteristics
19 p3242 A69-36783
- Supersonic inviscid flow past wing-body configuration, determining pressure distribution
20 p3458 A69-37099
- Linearly elastic medium supersonic flow past rigid wedge, considering longitudinal and transverse perturbations interactions, dry friction, adhesion, slip and wedge physicochemical properties
20 p3515 A69-37439
- Conical delta wings in supersonic-moderate hypersonic flow, studying yaw effects on pressure distribution behind shock wave
20 p3459 A69-37593
- Monograph on forces exerted by air during yawing motion of sharp cones in supersonic and hypersonic flows by semilinear method
20 p3460 A69-37919
- N strip algorithm of integral relations to analyze flow around circular cone at incidence in supersonic flow
20 p3460 A69-38128
- Continuously operating multipurpose wind tunnel for laser light scattering experiments in supersonic two phase flow
21 p3689 A69-38596
- Sedov canonic equations for supersonic gas flow solved by applying Chaplygin function to determine

tion of Riemann function for potential and stream function equations

21 p3643 A69-38637

Rotary derivatives of aerodynamic forces and moments in subsonic and supersonic flow, emphasizing kinematic and dynamic oscillations

21 p3647 A69-38733

Nonequilibrium processes behind shock wave in shock tube supersonic air and nitrogen flow, using photoelectrical shadow method

21 p3695 A69-38961

Multistep axisymmetrical supersonic exit cones optimum geometry design diagram based on external oblique and normal compression shock

21 p3785 A69-39104

Electron beam injection into magnetic trap, obtaining plasma by ionization of supersonic argon flow passing through system

22 p3990 A69-40791

Semianalytic solution for axisymmetrical supersonic inviscid flow near stagnation region of spherically blunted body with detached shock waves

22 p3861 A69-41178

Axisymmetric supersonic flow around spherically blunted body at small angles of attack, deriving equations for shock deformation perturbations and surface pressure

22 p3861 A69-41179

Frictionless supersonic and hypersonic flow of ideal gas of constant specific heat past cone with deformed axis at zero angle of attack

23 p4058 A69-41579

Successive approximations convergence analyzed in solving supersonic collisionless plasma flow past magnetic dipole

23 p4156 A69-41853

Supersonic free stream flow past finite conical body with subsonic surface gas injection

23 p4059 A69-41884

Linear small perturbation approximation for supersonic nonequilibrium flows past oscillating airfoil in two dimensional wind tunnel, noting Laplace transform solution

23 p4061 A69-42349

Supersonic flows around slender bodies calculated by method of moving singularities

23 p4061 A69-42407

Graphical method for two dimensional supersonic expansion flow with subsonic reaction front around corner compared to existing iteration method

23 p4061 A69-42411

Transonic flow around profiles with heat input, showing drag reduction in supersonic part of flow field

23 p4061 A69-42414

Second order differential equations of supersonic flows past bodies at small angles of attack, showing linearized characteristics method applicability for conical nose

24 p4243 A69-42581

Heated three layer plates stability under finite deflections in supersonic gas flow, deriving aerothermoelasticity equations

24 p4395 A69-42590

Supersonic rarefied gas flow past circular cylinder, studying flow and shock parameters by multiple wave interferometry

24 p4244 A69-43070

Laminar boundary layer separation in supersonic flow, constructing method for flow distribution functions, perturbed flow region dimensions and pressure perturbation amplitude

24 p4246 A69-43482

Hydrogen-air combustion in supersonic flow past sphere determined with allowance for chemical reactions nonequilibrium rates at high pressure and temperature

24 p4408 A69-43488

Supersonic flows past blunt bodies, formulating approximate similarity law for shock layers in subsonic regions

24 p4246 A69-43495

Gas dynamic functions of axisymmetric supersonic gas flows determined using flow density distribution optical measurements

24 p4247 A69-43496

Supersonic viscous flow around sharp corner at various expansion angles, giving pressure distributions and velocity profiles role

[ASME PAPER 69-HT-14] 24 p4247 A69-43555

Diamond shaped striations development mechanism on ablative heat shield materials exposed to supersonic flow and turbulent boundary layers

24 p4248 A69-43598

Supersonic flow stability with energy input applied to reaction kinetics of processes in aircraft and rocket combustion chambers

24 p4248 A69-43642

Perturbation equations for oscillating wedges and caret wings with attached bow shock in hypersonic and supersonic flows

24 p4249 A69-43659

Strong shock and Mach waves interaction generated downstream of thick wedge body shock in unsteady hypersonic and supersonic flows

24 p4306 A69-43674

Jet dynamic characteristics injected into supersonic air slipstream incident on flat body, calculating configuration, shock wave geometry and parameters distribution in flow field

24 p4250 A69-43710

Forced parametrically excited periodic vibration of finite length plate in plane supersonic flow, considering periodic forces applied at edges

24 p4407 A69-43733

SUPERSONIC FLUTTER

Flutter vibration of sails fixed along edge and single wing weather vanes in supersonic flows

02 p0192 A69-12824

Panel flutter in supersonic flow, using finite element approach in matrix displacement methods to derive aerodynamic influence coefficient matrices

04 p0676 A69-14707

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium

08 p1412 A69-20324

Supersonic flutter of circular cylindrical heterogeneous orthotropic thin panels of finite length, obtaining nonlinear flutter equation

08 p1413 A69-20404

Supersonic flutter solutions using finite elements, analyzing rectangular plate bending elements, square simply supported and clamped panels, low aspect ratio configurations, etc

11 p1991 A69-25516

Perturbation method for nonlinear panel flutter at high Mach numbers, using von Karman large deflection plate theory and quasi-steady aerodynamic theory

13 p2364 A69-28204

Membrane flutter and panel stability in supersonic flow, considering infinite aspect ratio equation solution through Galerkin method

13 p2365 A69-28236

Supersonic flutter in square panels and cylindrical shells, measuring critical dynamic pressure

17 p3051 A69-32923

Stability analysis of missile lateral supersonic flutter based on Lagrange equations, considering conservative thrust, control deviation and aerodynamic forces

17 p3045 A69-32946

Finite aspect ratio sandwich plates flutter in supersonic gas flow analyzed by differential equation describing plates elastic equilibrium

17 p3058 A69-33317

Asymptotic theory of pressure on cylindrical shell subjected to unsteady oscillations in external and internal linearized supersonic flow using Laplace and Fourier transforms

18 p3089 A69-35461

Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc

19 p3437 A69-36201

Supersonic panel flutter boundary of buckled and unbuckled clamped rectangular plates, discussing in-plane stress effects

22 p3930 A69-40584

Buckled rectangular plates with constrained edges, analyzing natural frequencies as basis for supersonic panel flutter analysis

22 p4046 A69-41049

Shearing force and shear buckling deformation influence on supersonic panel flutter boundary of simply supported rectangular plates, basing analysis on deflection approximation

24 p4400 A69-43055

Initial deflection and internal pressure effects on supersonic panel flutter boundary of simply supported rectangular plates under diverse middle surface stress conditions

24 p4400 A69-43056

Acroelastic stability of thin plates exposed to supersonic flow using singular perturbation methods, obtaining flutter boundary and membrane solution

24 p4403 A69-43573

SUPERSONIC HEAT TRANSFER

Performance analysis for electrothermal thrusters using lithium propellant with supersonic heat addition

[AIAA PAPER 69-286] 09 p1567 A69-21261

Ceramic heat transfer gage for supersonic wind tunnel investigation of blunt swept wing leading edges aerodynamic heating

15 p2613 A69-31270

SUPERSONIC INLETS

Supersonic compressors for supersonic and subsonic air intakes, studying wave configuration at entry of circular cascade of blades with hydraulic analogy

[ONERA-TP-669] 05 p0699 A69-16344

Variable geometry intake and convergent-divergent nozzle design for supersonic aircraft, noting subsonic installations

08 p1253 A69-21164

Ramjets and air augmented rockets as propulsion systems for supersonic atmospheric flight, noting inlet design, combustors and nozzles

11 p1943 A69-25586

Steam-water convergent condensing injector with supersonic inlet vapor, discussing axial pressure profiles and discharge pressure

13 p2372 A69-27486

M 3.5 two dimensional mixed compression inlet system with self restarting using flexible variable ramp system

[AIAA PAPER 69-447] 16 p2845 A69-32732

Nonequilibrium inlet conditions effect on combustion performance during H and vitiated air combustion, studying ignition delays

[AIAA PAPER 69-457] 16 p2881 A69-32767

Large scale axisymmetric inlet systems performance capabilities, reviewing theoretical and experimental programs

[AIAA PAPER 68-580] 17 p3022 A69-34018

NACA submerged intake performance at M 2.5, considering total pressure and mass flow ratios, drag coefficient and boundary layer thickness effects

19 p3242 A69-36819

Control system concept for axisymmetric supersonic inlet operation in mixed compression mode noting test results

[AIAA PAPER 68-581] 20 p3585 A69-37151

SUPERSONIC JET FLOW

Reactions kinetics contribution to nonequilibrium recombination occurring in supersonic nozzle flow of combustion products of hydrogen in air

02 p3353 A69-12488

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature

02 p0292 A69-12557

Crystals and molecules diffraction in supersonic molecular jets

02 p0284 A69-12629

Minimum admissible spacing between supersonic jet expelled from VTOL aircraft nozzle and plane surface near nozzle exit

03 p0361 A69-12955

Supersonic gas jet impingement on inclined plane barrier, calculating parameters by approximation

03 p0413 A69-12958

Interaction between supersonic jet and counterflow of ideal compressible fluid

05 p0751 A69-16551

Gas mixture separation in supersonic jet, noting results for hydrogen-nitrogen mixture and diffusion flux

06 p0911 A69-17553

Mach number distribution along axes of underexpanded supersonic jets measured in wind tunnel experiments

07 p1050 A69-18922

Turbulent flow effect on heat transfer in supersonic jet with plane infinite obstacle perpendicular to jet axis

07 p1243 A69-19738

Supersonic jet impingement on flat plate, showing shock wave profiles and slipstream surface at stations parallel to nozzle axis

08 p1252 A69-20841

Supersonic free jet with real gas effects and chemical reactions calculated by approximation

10 p1631 A69-22898

External burning ramjets in supersonic stream noting applications to drag reduction, lift-drag ratio and attitude control

11 p1941 A69-24261

Sound field generation by isotropic turbulence through finite strength shock, estimating acoustic energy flux from supersonic jet containing shock waves

11 p1872 A69-25130

Axisymmetric turbulent supersonic incompressible fluid jet, calculating momentum flow distribution and excess heat flow densities in basic segment
11 p1818 A69-25346

Supersonic jet flow with separated shock wave flowing past infinite wedge using Chaplygin method, assuming negligible entropy variations
14 p2391 A69-29619

Radiation effect enhancement in supersonic plasma jet cooled by rapid expansion, giving energy equation for electron cooling rates to analyze electron temperature
15 p2658 A69-30254

Flow field of highly ionized arc heated supersonic free jet, using continuous flow test facility
[AIAA PAPER 68-135] 16 p2772 A69-32153

Combustion effects on mixing of axisymmetric supersonic and turbulent free jets to obtain species concentrations, pitot pressures and temperatures
[AIAA PAPER 69-538] 16 p2843 A69-32705

Base flow component of total drag for axisymmetric supersonic afterbody with single exhaust jet, considering turbulent mixing
[AIAA PAPER 69-650] 17 p2956 A69-33485

Method of characteristics for computing supersonic jets and wakes with given boundary pressure distribution
[ONERA-TP-721] 18 p3121 A69-34636

Nonuniform gas flow past axisymmetric body from supersonic source simulating jet discharging into vacuum, using power series of stream function
19 p3238 A69-35851

Supersonic fan-shaped jet formation by identical colliding underexpanded jets, calculating subsonic flow between interaction plane and curvilinear shock wave
21 p3643 A69-38643

Polymer films damage due to supersonic plasma jets, comparing fracture relief of oriented and unoriented polymers
21 p3752 A69-39081

Flowfield properties of two dimensional supersonic jet near sonic nozzle exit by numerical method of characteristics
22 p3860 A69-40920

Heat exchange at stagnation point during interaction between underexpanded axisymmetric supersonic jet and flat obstruction, using method of characteristics
24 p4246 A69-43493

Slot type jet interaction flow tests at free stream Mach 4 and 5, describing equipment, procedure and results
24 p4249 A69-43686

SUPERSONIC NOZZLES

Minimum admissible spacing between supersonic jet expelled from VTOL aircraft nozzle and plane surface near nozzle exit
03 p0361 A69-12955

Short cylindrical diffusers efficiency in supersonic wind tunnel with exchangeable nozzles with conical supersonic section
03 p0365 A69-14226

Recombination constants of dissociated oxygen and nitrogen flow in supersonic nozzle at high temperatures using modified Bray method
06 p1030 A69-17349

Differential equations for two phase flow in axisymmetric supersonic nozzle, discussing existing solutions
06 p0861 A69-17815

Underexpanded nozzle ejected supersonic turbulent jet off-design behavior, discussing static pressure distribution, boundary layer and Mach number effect
07 p1049 A69-18397

Optimum profile of supersonic nozzle with nonequilibrium flow
07 p1119 A69-18737

Performance of short supersonic nozzles producing expansion and density jumps in flow, noting efficiency in obtaining maximum driving effect
07 p1050 A69-18753

Supersonic nozzle cross section and diffuser throat in MHD generator calculated by continuity equation
11 p1826 A69-25348

Supersonic nozzle design ensuring desirable flow field in inviscid core of viscous gas flow, using boundary layer equations
11 p1820 A69-25473

Electrical breakdown voltage and voltage-current characteristics of uncooled coplanar carbon electrodes in walls of supersonic conical and rectangular nozzles
[AIAA PAPER 68-713] 13 p2249 A69-28231

Heat release rate during gas combustion products recombination in supersonic nozzle, using graphic interpolation of flow parameters
15 p2717 A69-30987

Flow disturbances in supersonic rocket nozzles due to secondary injection analyzed by effective body approximation, including side forces
[AIAA PAPER 69-443] 16 p2839 A69-32666

Supersonic blowdown wind tunnel noting cylindrical diffusers efficiency in starting supersonic nozzles increased in proportion to Mach number
17 p2890 A69-33125

Laminar boundary layers in low density supersonic and hypersonic conical and axisymmetric nozzles, treating displacement, transverse curvature, velocity slip and temperature jump
[AIAA PAPER 69-653] 17 p2954 A69-33458

Hydrogen jet structure ejected into vacuum from Laval nozzle at supersonic velocity, considering separation point from diffuser wall
19 p3240 A69-36601

Supersonic molecular beam relative intensity represented as function of nozzle to collimator distance and gas admission pressure
20 p3579 A69-37432

Supersonic air to air ejectors performance for low secondary-to-primary mass flow ratios, deriving correction factor for Fabry-Paulon theory
21 p3644 A69-38654

Internal flow measurements in transonic region of supersonic nozzle with small throat radius of curvature compared with prediction data
23 p4060 A69-41900

Pressure ratio effect on supersonic turbine nozzle performance during off-design regime operation, noting effect of low specific heat gas ratio
23 p4203 A69-42250

Cylindrical shell with supersonic nozzle end, describing axisymmetric oscillations forced by burning filler in gas stream
24 p4300 A69-43073

SUPERSONIC PRESSURE DISTRIBUTION U PRESSURE DISTRIBUTION

SUPERSONIC SPEEDS

Ablation rate optical measurement near stagnation point of Teflon cylinder models, noting effect of nose curvature and temperature at supersonic speed
01 p0006 A69-10758

Wing-body combinations analysis and design at supersonic and subsonic speeds by aerodynamic influence coefficients method
[AIAA PAPER 68-55] 01 p0006 A69-11016

Velocity field excited by wing vibrations propagating over elastic surface at supersonic velocities, considering nonvertical motion and absence of external forces
02 p0188 A69-11976

Lift efficiency of and stabilization by square flare on high speed missile, comparing wind tunnel measurements with circular conical flare
02 p0190 A69-12544

Shock waves collision with supersonically moving axisymmetric slender bodies analyzed by integral transform method, noting application to shock-shock interaction
03 p0413 A69-13010

Atmospheric gust effect on aircraft flying at Mach one calculated for subsonic and supersonic regions, finding difficulties for transonic calculations
10 p1632 A69-22918

Fluid mechanics shock wave interaction with turbulent boundary layers at transonic to high supersonic speed ranges, noting examples in aviation
11 p1871 A69-25018

Flight tests of deployment of 20 ft diam ribbon parachute at high dynamic pressures and supersonic speeds
11 p1823 A69-25383

Linear and second order theory for maximum lift to drag ratio airfoils at moderate supersonics speed, considering length, thickness and area
13 p2199 A69-28214

Velocity field excited by wing vibrations propagating over elastic surface at supersonic velocities, considering nonvertical motion and absence of external forces
15 p2547 A69-30259

Two dimensional turbulent mixing with surface mass injection at supersonic and hypersonic speeds, noting velocity and temperature distributions
[AIAA PAPER 68-130] 16 p2770 A69-31883

Two dimensional model for analyzing turbulent separation and reattachment at blade trailing edge at supersonic speed
[ONERA-TP-678] 16 p2733 A69-32258

Infrasonic waves identified with supersonic auroral electrojets crossing zenith from northwest during sub-storm activity
16 p2780 A69-32303

Wind tunnel tests for static stability of Black Brant 4 vehicle second stage with flare and two fin flare combinations at supersonic speed
17 p2948 A69-34212

Heated supersonic beam study of He-Ar intermolecular potential, determining total elastic collision cross section as function of velocity in scattering chamber
19 p3377 A69-36183

Lateral and head-on interactions between plane shock wave and supersonic wedge, showing solution dependent on apex angle and incident flow Mach number
19 p3239 A69-36398

Drag measurements for sharp and blunt-nosed bodies shot into wind tunnel supersonic gas counterflows, discussing shock waves for different configurations
19 p3239 A69-36401

Three dimensional velocity field disturbed by shock wave traveling across slender wing at supersonic speed
19 p3242 A69-36797

Shock wave parameters from meteoric body moving at high supersonic speeds through atmosphere, calculating specific heat ratio
19 p3428 A69-36841

Structural and aerodynamic developments in attached inflatable decelerators for deployment of payload at supersonic speeds
[AIAA PAPER 68-929] 21 p3647 A69-39015

SUPERSONIC STRIKE AIRCRAFT U ATTACK AIRCRAFT

SUPERSONIC TEST APPARATUS

Microwave-plasma interaction instrumentation for supersonic channel constructed to investigate turbulent boundary layers formed over ablating heat shield materials
19 p3294 A69-35754

Control system concept for axisymmetric supersonic inlet operation in mixed compression mode noting test results
[AIAA PAPER 68-581] 20 p3585 A69-37151

SUPERSONIC TRANSPORTS

NT BOEING 2707 AIRCRAFT

NT CONCORDE AIRCRAFT

Human engineering program plans for Phase 3 of SST Development Program in accordance with airframe and engine contracts
01 p0019 A69-10451

Navigation system for American SST noting use of Doppler radar and inertial navigation
02 p0278 A69-12238

Avionics technology and systems for future SST aircraft noting improved air traffic control systems
02 p0279 A69-12364

Safety problems of jumbo jet airbus and SST, discussing operational safety procedures and techniques
03 p0365 A69-12882

Alpha numerical and symbolic information combined for head up display (HUD) systems, providing pilot with takeoff director
03 p0379 A69-12885

Swing wings on combat aircraft and SST, discussing suitability for aircraft carriers and problems in aerodynamic balance
03 p0367 A69-13677

Response to technical, social and political criticism of U.S. SST program
[AIAA PAPER 68-1024] 04 p0689 A69-14794

Aircraft propulsion by wake regeneration, noting supersonic transport ogee layout with maximum drag fraction
05 p0811 A69-15555

SST System Safety Program, discussing cosmic radiation and aerodynamic heating
06 p1041 A69-16838

Boeing SST designs, discussing performance, flying qualities and operational characteristics of configurations
06 p0868 A69-17830

Concorde and Boeing supersonic transport overland sonic booms, discussing social, political and legal reactions
06 p0868 A69-17899

Design, metallurgical and manufacturing problems of titanium application in supersonic C5 and SST engines
09 p1570 A69-22062

Potential hazards of government sponsored technology, examining SST and fluoridation projects and weather problems
10 p1811 A69-23392

Soviet supersonic transport Tu 144, describing wing unit, fuselage, passenger accommodation, tail unit, landing gear, power unit engine nacelle and navigation
10 p1634 A69-23838

Acoustical, psychological, sociological and political aspects of human reaction to SST sonic booms over populated areas, tabulating Boeing and Concorde boom intensities
14 p2408 A69-29151

Human tolerance to SST sonic booms through scheduled community exposure, discussing physiological effects and acceptability level
14 p2541 A69-29153

SST fuselage response to reverberant and turbulent boundary layer noise calculated for computing equivalent reverberant acoustic fields
15 p2549 A69-30302

Statistical correlation of temperature and tail-wind data for London-New York route at 50 mb for SST operation
15 p2651 A69-30690

Mass supersonic air transport physiological problems, reporting findings of FAUST committee concerning ozone toxicity, pressure drops, sonic booms, time zone physiology, etc
15 p2556 A69-31225

Turbulence and SST, discussing subsonic accidents, probability of encountering gust induced accelerations, turbulence at cruise altitudes, radar storm return and mountain waves
16 p2808 A69-32368

Location effect of power plants on aft-mounted supersonic cruise exhaust nozzles at transonic speeds in flight and wind tunnel
[AIAA PAPER 69-427] 16 p2734 A69-32769

Experimental SST terminal for satellite L band communications/surveillance ATC system, establishing terminal requirements for NASA and FAA studies
17 p2932 A69-34118

Airport facilities planning for conventional jet, STOL and SST aircraft ground handling, stressing facilities economy and transportation subsystems
[AIAA PAPER 69-808] 19 p3289 A69-35623

Passenger transport cruising at low supersonic speeds without sonic boom generation on ground, discussing overpressures, signature characteristics and corridor widths
[AIAA PAPER 69-776] 19 p3244 A69-35647

Supersonic transport aviation fuel thermal stability measurement data correlated with data deduced from heat transfer measurements
19 p3393 A69-36210

Titanium monocoque fuselage reinforced by composite boron filaments in polyimide resin matrix tested for SST applications, noting weight savings over all titanium structure
[AIAA PAPER 69-763] 19 p3329 A69-36298

Supersonic transport aircraft impact on air traffic control in Eurocontrol area, discussing climb, acceleration, cruise and descent
19 p3370 A69-36653

Cosmic radiation exposure of passengers and crew in supersonic transport at high altitude
22 p4002 A69-40093

Modified tailed delta configuration selection for U.S. SST, discussing power plant installation choice
[RAES PAPER 17] 22 p3863 A69-40496

Planning for safety of future supersonic air traffic including financing and coordination activity of government and industry
22 p4054 A69-41131

Safety implications of technological developments in aviation, discussing standards and statistical data for supersonic transports and jumbo jets
22 p3867 A69-41134

SST stratospheric environment problems, discussing temperature effects on fuel consumption and convective turbulence effect on flight safety and efficiency
22 p3867 A69-41141

XB-70 aircraft test data as applied to SST safety, describing aircraft design, flight characteristics, instrumentation, takeoff and landing, etc
22 p3868 A69-41143

SST flight crew operational requirements to achieve maximum human efficiency and man/machine compatibility, discussing pilot role, advanced flight instrumentation, etc
23 p4107 A69-41820

Solar flare radiation hazard to SST crew and passengers, discussing onboard and ground based warning systems and ICAO requirements
23 p4063 A69-41830

Atmospheric variability at proposed flight levels, analyzing meteorological requirements of SST operation

tions, discussing annual cycles in stratospheric circulation
24 p4251 A69-42711

SST contribution to commercial aircraft transportation, discussing economic and operational aspects, decision making process leading to fixed wing design, etc
[AAS PAPER 69-323] 24 p4252 A69-42869

Flight simulator with large lateral motion for large and supersonic transport aircraft, emphasizing reproduction of cockpit accelerations due to supersonic engine thrust loss
24 p4297 A69-43044

Localizer acquisition system quasi-optimization technique based on time optimal control theory, with application to SST ILS problem
24 p4348 A69-43312

Heat tolerance in case of SST aircraft air conditioning failure, discussing physiological and psychomotor reactions and time curves for metabolic activity levels
24 p4277 A69-43382

SST range-payload improvement by emphasizing Ti alloys honeycomb and trusscore sandwich panels fabrication for structural boxes in wing and empennage
24 p4324 A69-43436

Elastomers for SST aircraft applications, discussing properties evaluation, material selection, sealant requirements, etc
24 p4338 A69-43455

Sonic boom signatures produced by diverse SST configurations during cruise, indicating aircraft length as overpressure limit factor
24 p4253 A69-43661

SUPERSONIC TURBINES

Pressure ratio effect on supersonic turbine nozzle performance during off-design regime operation, noting effect of low specific heat gas ratio
23 p4203 A69-42250

SUPERSONIC WAKES

Model for asymptotic separated flow in wake behind broadside of bluff body, discussing separation point, interaction, reattachment, base flow and near wake
02 p0188 A69-11986

Discrete vortices in two dimensional subsonic and supersonic wake, determining Strouhal numbers, frequencies and flow velocities with aid of HF cinematography
02 p0191 A69-12587

Turbulent front structure of axisymmetric compressible wake at supersonic speeds, measuring intermittency factor distribution
03 p0419 A69-13949

Flow measurements in near wake of 7 degree half angle cone at free stream Mach number 4.3, noting pressure measurements
[AIAA PAPER 69-186] 06 p0863 A69-18068

Mean flow measurements in supersonic wake of slender two dimensional body at zero incidence and heat transfer rate, noting predictability from similarity analysis
11 p1817 A69-24281

Supersonic wake flow visualization, obtaining direct photographs of various smoke streamlines
[AIAA PAPER 69-346] 13 p2200 A69-28281

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air
[AIAA PAPER 69-347] 13 p2263 A69-28282

Near wake in axisymmetric supersonic flow past slender body with/without base injection, obtaining pressure, temperature, Mach number, velocity and concentration distributions
14 p2389 A69-29017

Supersonic wake recirculation flow over rearward facing two dimensional steps and blunt bases
14 p2389 A69-29031

Mean near wake flow of adiabatic two dimensional wedge at Mach 4 with tripped turbulent boundary layers and base mass addition
16 p2733 A69-32147

Mixed supersonic/subsonic type steady wake flow fields in flat based slender bodies, using finite difference method
[AIAA PAPER 69-649] 17 p2892 A69-33468

Method of characteristics for computing supersonic jets and wakes with given boundary pressure distribution
[ONERA-TP-721] 18 p3121 A69-34636

SUPERSONIC WIND TUNNELS

Pressure oscillation production in wind tunnel by hinged plates in test section walls to test jet engine inlets under controlled conditions
02 p0229 A69-12537

Short cylindrical diffusers efficiency in supersonic wind tunnel with exchangeable nozzles with conical supersonic section
03 p0365 A69-14220

French supersonic recycling wind tunnel for short duration experiments
07 p1116 A69-19288

Turbulent boundary layers on flat wall of supersonic wind tunnel, determining velocity profiles, thicknesses and skin friction coefficients
10 p1680 A69-23642

Short duration tube wind tunnel supersonic testing noting Saturn S-IC base heating and solid propellant rocket base burning tests
[AIAA PAPER 69-335] 13 p2242 A69-28277

Supersonic boundary layer acoustic characteristics measured in wind tunnel on cylindrical model with several forebody configurations
[AIAA PAPER 69-344] 13 p2249 A69-28277

Continuous supersonic plasma wind tunnel obtained using magnetic Laval nozzle made by modification of Q device normal magnetic field configuration
15 p2589 A69-30909

Inlet produced dynamic distortion and effects on stall margin of J-85 turbojet engine from supersonic wind tunnel tests
[AIAA PAPER 69-487] 16 p2840 A69-32676

Supersonic cascade wind tunnel /ONERA/ for supersonic and transonic compressors profiles studies
17 p2895 A69-33591

Error analysis for pressure measurements in blow-down supersonic tunnel
19 p3292 A69-35728

Skin friction balance in Mach 5 wind tunnel with high heat transfer, measuring shear forces
19 p3292 A69-35734

Supersonic blowdown wind tunnel operating at Mach numbers obtained by fixed nozzles for aerodynamic optimization of wings and bodies
20 p3510 A69-37422

Panel flutter testing in supersonic blowdown wind tunnels, analyzing model and test chamber layout
21 p3847 A69-39859

SUPINE POSITION

Pulmonary ventilation and perfusion in normal supine subjects before and during exposure to lower body negative pressure measured using Xe-133
17 p2909 A69-33180

Vertical vibrations effect on test subjects in supine position, noting human tolerances and mood changes
19 p3260 A69-35986

Pulmonary capillary blood flow pulse of healthy men in supine position recorded by nitrous oxide/plethysmograph and phonocardiogram
24 p4259 A69-42638

SUPPLYING

Mathematical formula for estimating cost and efficiency of parachuting supplies, noting shock load reduction
07 p1053 A69-19140

SUPPORT SYSTEMS

NT GROUND OPERATIONAL SUPPORT SYSTEM

NT GROUND SUPPORT SYSTEMS

Automatic support systems development and capabilities with recommendations for future R and developments
03 p0411 A69-13190

Flight test support design, developing measure of performance of test environments stated in weapon or space system terms
05 p0742 A69-15804

Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture
[AIAA PAPER 69-305] 09 p1478 A69-22377

Automatic support systems for advanced maintainability - IEEE Conference, St. Louis, November 1968
11 p1863 A69-25059

Multipurpose test system analysis emphasizing support section containing self test elements, power monitoring and control, interconnection techniques and packaging
11 p1864 A69-25069

Mathematical model for prediction of automatic test equipment utilization and determination of time for performance of intended test function
11 p1865 A69-25074

Optimized automated system for direct support maintenance of AH-56A subsystem equipment
11 p1865 A69-25075

Data relay satellite systems for support of NASA R and D missions, discussing communications between satellites and to mission control

11 p1839 A69-25296

Tracking and data acquisition networks and communications systems for support of space missions, studying data processing, unified S Band System and Data Relay Satellite System

12 p2028 A69-25933

Lever support systems for telescopes noting tilt compensation, acceleration balance and problems of friction, pivot viscosity, thermal effects and weight

12 p2057 A69-26410

Optical tests of Hale telescope mirror and support system at Palomar, noting various maladjustments and malfunctions

12 p2057 A69-26411

Axial support systems for large astronomical mirrors, considering gas support system for flat mirror submerged and floating in isostatic liquid

12 p2057 A69-26412

Sinusoidal tension and compression radial support system for large solid disk primary mirror, noting pivot design and pad bonding adhesive

12 p2057 A69-26413

Large mirror support systems definition in terms of axial location and radial position

12 p2057 A69-26414

Lick telescope support system for 120 inch mirror, noting use of levers and counterweights concept

12 p2058 A69-26415

Isaac Newton telescope, describing support of 98 inch mirror, structure between fabricated cell steel surface and mirror and tests with air bag support

12 p2058 A69-26416

Support system for McDonald 107 inch telescope mirror, adopting Couder design using lily pad single lever supports for axial thrust

12 p2058 A69-26417

Axial support system for Canadian 150 inch telescope mirror, discussing flexural and shear analyses and ring supports repositioning for balancing shear

12 p2058 A69-26418

Axial counterweight lateral support system with ternary symmetry for European Southern Observatory telescope mirror

12 p2058 A69-26419

Axial support system for controlling thermal distortion of 82 inch heliostat mirror for Kitt Peak solar telescope

12 p2058 A69-26422

Integrated Logistics Support (ILS) cost effectiveness, discussing management of systems elements in addition to prime equipment including computer programs, training, maintenance, etc

15 p2722 A69-31126

Boron epoxy strut prototype for support system of advanced nuclear flight stage with nonintegral cryogenic tankage configuration, achieving weight reduction

19 p3354 A69-35516

Missile and space support planning, objectives, technology development, functions, maintenance and in-flight maintainability

19 p3295 A69-36327

Space transportation cost saving options including booster systems, spacecraft/payload systems and support systems, discussing recovery and launching operations

21 p3857 A69-39690

Mariner Mars 1969 spacecraft real time test support system and recorded data analysis including routing to printers, CRT displays and incremental plotters [AIAA PAPER 69-982]

22 p3907 A69-40362

Multisupport suspension arrangements for reducing reflector surface weight-loading distortion in steerable parabolic radio telescope antennas

23 p4149 A69-42128

Wind tunnel model one component magnetic support and balance system for sphere drag investigation at subsonic Mach numbers [AIAA PAPER 68-401]

24 p4298 A69-43714

SUPPORTS

Integral equation solution for plate with internal support

03 p0528 A69-13799

Liquid flow systems dynamic response to periodic disturbances of system structural supports

05 p0747 A69-16073

Rotor shaft mounted on number of bearings and carrying masses and inertia angular precession and critical speeds, considering gyroscopic moments, rotary inertia and shear deformation [ASME PAPER 69-VIBR-54]

10 p1805 A69-24154

Large astronomical mirrors support and testing - Conference, Tucson, December 1966

12 p2055 A69-26406

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models [AIAA PAPER 69-350]

13 p2243 A69-28284

SUPPRESSORS

NT ECHO SUPPRESSORS

Amber suppressors conversion to ochre suppressors in RNA of bacterium or bacteriophage using uracil mutagen

07 p1068 A69-19493

Graphs determining interference levels for optimum shielding, suppression, signal parameters and waveforms for pulses, step functions, CW signals and for military technology

12 p2030 A69-26471

Meteorological radar dead zone diminished by using hybrid electronic waveguide suppression system to eliminate antenna sidelobe reflections

16 p2791 A69-32281

Forced vibration testing of complex continuous systems, demonstrating suppression of certain resonant frequencies due to laboratory techniques

18 p3114 A69-34422

SURFACE COATINGS

U COATING

SURFACE COOLING

Relationship between cooled surface temperature and pressure self oscillation frequency during heat transfer to turbulent fluid flow, showing temperature variations

01 p0173 A69-10094

Film cooling by subsonic gas injection of air through porous flat plate into 2.9 Mach air flow, noting wall temperatures

03 p0413 A69-12994

Transpiration cooling of porous flat plate by injection of carbon dioxide or air into carbon dioxide and air free streams

03 p0413 A69-12996

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments [AIAA PAPER 68-1154]

03 p0533 A69-13669

IR observations of lunar crater and maria enhanced thermal emission during eclipse, constructing model of cratered surface to analyze thermal behavior

04 p0654 A69-14656

Heat transfer characteristics of single lines of circular air jets impinging on concave cylindrical surfaces, discussing nozzle target spacing effect [ASME PAPER 68-WA/GT-1]

05 p0848 A69-16137

Angular distribution measurements of visible and near IR radiation reflected from carbon dioxide cryodeposits formed on liquid nitrogen cooled surface in vacuum [AIAA PAPER 69-63]

06 p0959 A69-18131

Effects of multidimensional flow through porous matrices in mass transfer cooling, analyzing one dimensional model for blunt axisymmetric surfaces [AIAA PAPER 69-149]

06 p1038 A69-18179

Mass transfer cooling of high velocity surfaces in gaseous environment noting applications to atmospheric entry

13 p2377 A69-28146

Flat surfaces downstream of heated section and porous strip, determining film cooling effectiveness and heat flux from heat transfer coefficients ratios

20 p2631 A69-37096

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments [AIAA PAPER 68-39016]

21 p3851 A69-39016

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects [ASME PAPER 69-HT-44]

24 p4409 A69-43517

Laminar, transition and turbulent boundary layer heat transfer measurements along wall in thermal entrance region of high temperature turbulent airflow through cooled tube [ASME PAPER 69-HT-8]

24 p4414 A69-43560

SURFACE CRACKS

Temperature field and stress state in elastic plane with temperature insulated arc shaped crack

01 p0164 A69-10078

Stress-strain behavior of crazes in glassy polymers, discussing crack propagation, craze formation and failure and molecular weight effects

01 p0102 A69-10915

Crack tip plastic flow effect on strain energy release rate, considering Dugdale model for yielded crack [ASME PAPER 68-WA/MET-17]

05 p0838 A69-16155

Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilayer insulator

09 p1441 A69-21840

Stress intensity magnification factors in surface flawed tension plates and notched round tension bars, evaluating fracture toughness

10 p1797 A69-23080

Stresses and displacements in half plane with edge crack given as eigenfunction expansions using Wiener-Hopf technique

11 p1987 A69-25438

Craze formation and shear yielding considered for glassy polymers in terms of stress field requirements

17 p2993 A69-34169

Eddy current machine /nondestructive testing device/ for aircraft structures surface cracks detection

21 p3719 A69-38391

Meridional crack problem for cylindrical and spherical shells solved for uniform membrane load and bending moment, obtaining stress intensity components

22 p4046 A69-41041

Flaw determinations accuracy from measuring ultrasonic shear wave reflection peak intensities

24 p4397 A69-42756

SURFACE DEFECTS

Surface fatigue significance in sliding wear studied from damage on copper single crystal using electron microscope techniques

01 p0085 A69-10368

Fractures in refractory metals surface layers due to Q switched laser pulses

11 p1899 A69-25402

Coherent optical flaw detection and surface microstrain measurement techniques including holographic interferometry, optical correlation and diffraction

12 p2180 A69-26305

Incipient stress corrosion damage detection in aluminum alloys, using Rayleigh wave attenuation

12 p2114 A69-26306

Imperfection surface effect on buckling load of circular cylindrical shell under axial compression, locating limit points of postbuckled states

13 p2362 A69-28122

Glass fibers strength in relation to surface defects, comparing behavior of flawless and commercial fibers

22 p3974 A69-41039

SURFACE DIFFUSION

Turbine blade loading in terms of surface diffusion and loading factors, discussing tandem and jet flap blades and vortex generators [ASME PAPER 68-WA/GT-11]

05 p0812 A69-16136

Tantalum diffusion layer on refractory cobalt and nickel base alloys analyzed by electron microprobe [ONERA-TP-665]

06 p0941 A69-17097

CW helium-neon laser used to detect and measure vibration frequencies of uniform diffuse surfaces

09 p1515 A69-21430

Harmonic analysis for computing diffusing matter with periodically varying surface concentration applied to electrical insulators degradation by atmospheric moisture

15 p2592 A69-31057

Aluminum oxide relative grain boundary energy and surface diffusion coefficient, considering thermal grooving of bicrystals with symmetrical tilt boundaries

17 p2993 A69-34191

Al effect on B and Cr diffusion in protective coating on Cr-Ni heat resistant alloy, noting thermochemical kinetics for homogeneous layers

19 p3345 A69-36157

Heat resistance evaluation of ZrSi₂-K alloy subjected to multicomponent surface diffusion alloying combinations of Al, B, Cr, Si, Zr

19 p3345 A69-36159

Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects

21 p3803 A69-38973

Boron tribromide-oxygen reaction kinetics effects on IC base diffusion uniformity, correlating uniformity with electrical properties

24 p4360 A69-42760

SURFACE DISTORTION

Yield surface after prestraining under radial loading, analyzing formation of yield corner

01 p0166 A69-10303

Thermostructural analysis of large flexible paraboloid antenna indicates RF losses due to thermal distortions significant for X band and higher transmissions [AIAA PAPER 68-333]

02 p0345 A69-12372

Nickel structure alterations during interaction with high speed air flow at elevated temperatures

05 p0783 A69-16812

Radio wave propagation over smooth cylindrical surface with specified boundary impedance, discussing diffraction loss and effect of surmounted obstacle
08 p1273 A69-20024

Draining liquid surface dip formation in tanks of arbitrary shapes and drain hole positions
09 p1483 A69-21999

Reflection interferometry for visual evidence of surface deformation of rock and metal samples using two beam Fizeau fringe system
09 p1496 A69-22012

Acoustic holographic measurement of surface deformation generated by sound waves impinging on gas-liquid interface, discussing acoustic amplitude components
10 p1695 A69-23542

Plane surface finite area deformation tensors in continuum mechanics permitting separation of volume and shape changes in constitutive equations
11 p1994 A69-25603

Bending surface of shells under crosswise load analyzed by moire method, considering rotating cylindrical surfaces
15 p2713 A69-31056

Cylindrical shell load carrying capacity under axial compression, considering middle surface initial distortions influence
23 p4228 A69-41989

Multisupport suspension arrangements for reducing reflector surface weight-loading distortion in steerable parabolic radio telescope antennas
23 p4149 A69-42128

Structural analysis program for obtaining steerable antenna surface deflections at various altitude angles and wind conditions as design parameters
23 p4230 A69-42129

Parkes paraboloid radio telescope structural performance, using rapid survey instrument to measure surface deformations for optimum focusing determination
23 p4231 A69-42130

Compressible fluid unsteady flow past deformable surface, constructing metric for surface and obtaining metric tensor coefficients
24 p4243 A69-42586

SURFACE ENERGY

Surface charge distribution in silicon p-n junctions noting luminescence of microplasmas and inhomogeneous properties
02 p0294 A69-11629

Surface radiation balance measurements in India during IQSY, discussing diurnal, seasonal and spatial variations of net radiation
02 p0307 A69-11820

Field effect in Ge and Si, noting relation between dependence of space charge on surface level charge and on surface potential
07 p1199 A69-18682

Relative free energies of crystal zones of tungsten using field electron microscope, determining surface energy anisotropy from Wulff construction
08 p1330 A69-20139

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain
09 p1614 A69-21883

Ceramics strength and fracture behavior in terms of modified Griffith equation, discussing effective surface energy and initial crack size
11 p1907 A69-25238

Solid titanium surface energy determination, taking into account grain boundaries effect on accuracy
12 p2113 A69-26045

Surface free energy of solid Mo measured by Udin zero-creep method at high temperatures, noting low value due to residual impurity adsorption
12 p2117 A69-27137

Free electron model for electron work functions and number density distributions and surface potentials in metals
14 p2504 A69-29009

W single crystals cleavage cracks by spark discharge, showing effective surface energy dependence on crack initiation and propagation temperatures
15 p2637 A69-30226

Continuum fracture concept indicating essential surface energy interpretation difference in otherwise similar adhesive and cohesive failures
22 p3974 A69-40760

Negative surface potential effect on noise and photoconductivity in Ge doped p-type InSb single crystals at low temperature in vacuum
24 p4362 A69-43738

SURFACE EROSION

SURFACE FINISHING

Diffusion zones in filament reinforced metal matrix composites, using metallographic technique
01 p0103 A69-11269

Mechanical finishing abrasion induced plastic deformation microwinning observed in thin stainless steel films by transmission electron microscopy
02 p0251 A69-11542

Nucleate pool boiling heat transfer of liquid nitrogen from circular disks with different surface conditions including copper and nickel mirror finishes, roughness and coatings
02 p0352 A69-12207

Surface preparation effect on stress corrosion cracking of type 310 stainless steel wires in boiling aqueous magnesium chloride solutions
03 p0444 A69-13311

Inception of nucleate boiling with liquid nitrogen, noting surface finish effects
[ASME PAPER 68-WA/PID-10]
05 p0848 A69-16167

Thermochemical surface finishing trends, discussing methods to obtain complex diffusion layers
05 p0769 A69-16540

Surface treatment effect on weld porosity causes and removal in VT5-1 Ti alloy argon arc welding
06 p0945 A69-17897

Surface edge preparation of titanium alloy sheets for argon shielded arc welding
06 p0932 A69-17898

Surface finish and hardness effects on wear life of inorganic solid lubricant film
[ASLE PREPRINT 68AM 7C-3]
07 p1139 A69-18623

Surface preparation effects on Ni-Cr-Fe alloy boundary friction studied by repeated sliding of cylinders on hard Pd-Pt-Au alloy cylinder
[ASLE PREPRINT 68AM 6D-4]
07 p1139 A69-18625

Aluminum and aluminum alloys surface treatment prior to adhesive bonding, discussing degreasing, anodization, shear and bond strengths
07 p1141 A69-19312

Halocarbon solvent for application of chlorosilane finish to heat cleaned glass fabric for reinforcement of plastic, noting relative humidity effect
08 p1341 A69-20513

Comparative performance of niobium cylindrical thermionic converters with vapor deposited rhenium, stressing emitters surface preparation
09 p1438 A69-21816

Glass fibers size, finish and surface treatment identification by pyrolysis attenuated total reflectance IR spectroscopy
09 p1448 A69-22315

Oxide ceramics finishing processes, discussing leaching, machining, surface finishing, strengthening by compressive surface layers and joining
09 p1510 A69-22350

Structural imperfections of CdSb single crystals undoped and doped with tellurium and indium noting etching techniques, grain boundaries and impurities
11 p1938 A69-25030

Thermochemically synthesized high melting micropowders grinding by vibrational method and classification for polishing and finishing applications
12 p2113 A69-26256

Construction techniques for lightweight mirrors for secondaries, considering optical finishing and thermal expansion
12 p2058 A69-26420

Aspherical surfaces formation from spherical by removing part of substrate by means of tool mask for lapping nonuniform wear of surface
12 p2102 A69-26597

Metal electrolyte system for electrochemical machining in sodium chloride solution for achieving dimensional control
13 p2268 A69-27521

Thermionic converter improvements by electronegative additives and emitter surface finishes, noting cesium oxide, heat treatments with electropolishing, electroetching, etc
14 p2397 A69-29173

Mathematical model of mechanical wear in surface friction based on approximation of cross section profiles, using Fokker-Planck equation for distribution function
14 p2455 A69-29331

Substrates ultraclean surface preparation methods, examining crystal cleaving and crushing, heating, chemical cleaning, ion bombardment, etc
14 p2455 A69-29348

Stainless steel biaxial residual surface stresses from grinding and finish machining determined by dissection technique
[ASME PAPER 68-WA/MET-9]
14 p2455 A69-29437

Electrical and photoelectrical properties of semiconductor heterojunctions prepared by Ge epitaxy on gallium arsenide bases, showing dependence on base surface treatment
15 p2667 A69-30074

X ray diffractometer stress analysis of WC-Co cermets, discussing surface preparation and heat treatment
16 p2802 A69-32333

Lunar based optical workshop and repair facility using ion beam technique to polish and repair optical element surfaces
18 p3113 A69-34243

Electrical discharge machining effect on heat resistant alloys surface finish, noting volt-ampere characteristics
18 p3147 A69-34547

Finish turning cutting speed effects on titanium alloy surface layers
18 p3148 A69-34548

Beryllium bonding, evaluating various surface preparations and adhesives
19 p3320 A69-35561

Spray cleaning and deoxidizing of Al surfaces for structural bonding using sulfuric acid-sodium dichromate deoxidizer, noting tests with proprietary solutions
19 p3321 A69-35564

Isothermal and thermal martensite transformations on polished surfaces of Fe-Ni-Mo alloys
19 p3344 A69-35983

Soviet monograph on metal fatigue in aircraft structures, discussing effects of temperature, loading, residual stresses, surface finish and contact corrosion
20 p3622 A69-37231

Titanium surface cleaning and descaling in preparation for machining, discussing acid pickling, mechanical abrasion, conditioning cycles, etc
20 p3549 A69-37434

Plasma arc systems and applications, noting transferred and nontransferred jets with emphasis on plasma spraying, surfacing, welding and cutting
[SBAC PAPER 18]
20 p3550 A69-37453

Corrosion and stress effects separation in stress corrosion of Al-Zn-Mg-Cu alloy, considering machined surface finishing role
21 p3747 A69-39435

Friction characteristics during diamond honing of different steel grades, determining lubricating and cooling liquids effect on friction coefficient
22 p3958 A69-41170

Outgassing rates of stainless steel and Al with different surface treatments, including glass bead shot blasting, electropolishing, baking and vacuum cleaning
22 p3958 A69-41215

Corrosion resistant bonding materials, discussing metal-to-metal adhesive primers, Al honeycomb core and foil finish
24 p4334 A69-43421

SURFACE GEOMETRY

Impulse and kinetic energy transfer in rarefied gases analyzed on basis of kinetic theory, considering surface curvature effect
01 p0173 A69-10093

Solid body surface roughness influence on radiative properties, deriving expressions relating radiative properties to surface roughness parameters
02 p0350 A69-11575

Calculation method for surface aircraft structures by treating normal forces and bending moments as unknown values
04 p0677 A69-14839

Ablation surface patterns and resulting roll torques and roll behavior of hypervelocity vehicles
[AIAA PAPER 69-180]
06 p1036 A69-18051

Finding and representing graphically intersections of double curvature surfaces with planes within scope of digital computer design
08 p1278 A69-19921

Free surface of electrically conducting liquid in gradually varied supercritical regime in horizontal rectangular channel
08 p1362 A69-20273

Static, kinematic and elastic basic equations of shell theory integrated into differential equation for minimal surface helical shells
10 p1793 A69-22886

Aspherical surfaces formation from spherical by removing part of substrate by means of tool mask for lapping nonuniform wear of surface
12 p2102 A69-26597

Maximum principle for infinitesimal deformations of convex surface with nonnegative Gaussian curvature, noting application to rotation and displacement diagrams

13 p2361 A69-27741

Object shapes automatically classified from reflected radio signals, considering correlation description of object effective dispersion surface diagram

14 p2411 A69-28917

Necked tension specimens profiles for rigid-plastic nonhardening materials determined from compatibility equation for displacements and unloading rate

15 p2704 A69-30292

Shock tube hot flow duration, contact surface configuration and boundary layer thickness

15 p2590 A69-30297

Geometric shape of lunar profile from annular phase of 20 May 1966 annular solar eclipse coronagraph plates, applying Fourier series and Pascal limaçon approximation

15 p2686 A69-30531

Dynamic characteristics of local slope winds, considering thermal and geometrical effects of underlying surfaces

15 p2648 A69-30577

Sloping helicoid median surface with given parameters, obtaining equilibrium equations, elasticity and formulas relating deformations to displacements

15 p2714 A69-31197

Optimum surface for thick delta wing in hypersonic flow obtained by variational method, assuming closed leading and trailing edges

16 p2731 A69-31559

Nonlinear free surface effects in low gravity tank draining, finding domains of validity for linearized and nonlinear analyses

[AIAA PAPER 69-680]

17 p2953 A69-33450

Hyperbolic EM microwave field used for contactless measurements of parabolic antenna surfaces

19 p3281 A69-35766

Wave equation of electromagnetic field of optical resonator with arbitrary mirrors, utilizing Schrodinger equation and equivalent mechanical system

19 p3333 A69-35880

Cylindrical concave surface quality control by contactless comparison with reference surface, using interferometer with Twyman system and continuous laser

19 p3311 A69-36196

Nose bluntness effect on hypersonic flow for slender blunt bodies with arbitrarily shaped lateral surfaces at small attack angle

19 p3239 A69-36402

Geometrical model for surface contact area, noting influence of nonlimitations on friction coefficient in elastic deformation

19 p3329 A69-36494

Lunar gravitational potential and lunar surface radius vector binomial series coefficients determination from Luna 10 data used for lunar surface shape calculations

20 p3596 A69-37308

Moire technique for gaging surface deformations or surface configuration differences by optical interference patterns

21 p3726 A69-39775

Double cellular surface geometry effect on dispersion and coupling impedance of two dimensional periodic resonator slow wave structure

23 p4140 A69-42048

Steady constant density two dimensional flow in laminar boundary layer over permeable curved surfaces, showing effects of suction or blowing

23 p4153 A69-42399

Contact stress distribution between two-dimensional finite nearly rectangular elastic bodies with general surface configurations for surface load expressed in trigonometric series

[ASME PAPER 69-APMW-9]

24 p4402 A69-43104

Chaplygin equation applied to eddy flow past semicylindrical surface, discussing stagnation points and boundary value problems

24 p4245 A69-43477

Monte Carlo calculation of free molecular flow over concave spherical surface, considering partial diffuse reflection and imperfect energy accommodation

24 p4248 A69-43592

Shear stress and free molecular drag for gas flow along concave cylindrical surface oriented at angle of attack, analyzing multiple surface collisions effect

24 p4249 A69-43660

SURFACE IONIZATION

Thermal metal-plasma thermodynamic equilibrium, using surface ionization of inner and outer potentials

and work function, discussing ion and electron extraction

06 p0979 A69-17249

Cesium plasma produced inside hot cylindrical tantalum cavity at 1400 K by contact ionization at wall while obtaining electrons from internal filament

06 p0927 A69-17707

Plasma sheath-boundary interactions, analyzing emission, reflection and surface ionization effects on current densities and heat fluxes for cesium and argon

08 p1369 A69-20818

Luminous discharge at nonabsorbing surface when exposed to single pulse ruby laser beam, suggesting photoionization in surface layer

08 p1327 A69-21021

Surface ion behavior on planar semiconductor devices determined by measuring effect of time, humidity, temperature, voltage and previous testing history

10 p1743 A69-23173

Sr and La ionization on crystal surfaces of W and polycrystalline W, discussing temperature effect on oxidation and work function

12 p2142 A69-26113

Field ionization at metal surfaces as rearrangement collision, considering anisotropic electron tunneling probabilities produced by Fermi surface

17 p3015 A69-32821

SURFACE LAYERS

NT MONOMOLECULAR FILMS

Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface

01 p0136 A69-10253

Absorption of linearly polarized light in reflecting surface layer of collisionless plasma, calculating layer lifetime for reflection of light

01 p0127 A69-10283

Sliding surface tracks from hardened steel sliders on flat PTFE examined for molecular orientation with electron microscope

01 p0085 A69-10369

Mercury radio emission phase dependence, discussing brightness temperature value approximation and surface layer properties

02 p0314 A69-11640

Surface layer effects on conductivity of vacuum deposited gold films, studying resistance variations with film thickness

02 p0300 A69-12625

Similarity theory results for turbulent diffusion in atmospheric surface layer compared with concentration measurements from Project Prairie Grass

02 p0276 A69-12695

Gettering effect in silicon of phosphosilicate glass surface layer and underlying phosphorus layer on gold and copper

03 p0487 A69-13640

Brittle surface films role in stress-corrosion phenomena in various environments

03 p0448 A69-13873

Stray fields and domain dynamics in Gunn effect semiconductors covered with dielectric sheets

03 p0491 A69-13988

Scattering from thin conducting sheet obstacle on cylindrical surface

03 p0399 A69-14253

Vacuum carburization of surface layers of transition metals

04 p0614 A69-14572

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies

04 p0614 A69-14578

Viscoelasticity effect on tensile stress in absorption layer for free surface uniaxial motion

04 p0676 A69-14705

Stationary vertical distribution of weightless radioactive substance in surface air layer, accepting two layer exponent law for vertical turbulent diffusion coefficient

04 p0593 A69-15091

Gray tone differences between undisturbed lunar surface and darker ejecta observed around Surveyor 1 footpads, discussing possible albedo differences

04 p0660 A69-15124

Surface photovoltaic effect in copper electroplated single crystal CdS solar cells, discussing Fermi level and Hall effect

05 p0704 A69-15958

Thermal potential P and Q smoothness on surfaces, proving relevant theorems

05 p0849 A69-16452

Gas adsorption on solids, discussing statistical mechanical theory assuming localized adsorption for

first adlayer and nonlocalized mobile layer adsorption on top

06 p0980 A69-17387

Oxide impurity effects causing potential shifts in Si covered by thick oxide layer studied with metal-oxide-Si electrical measurement and radiochemical analysis

07 p1072 A69-18272

Fine structure and geology of lunar surface from Luna, Ranger, Surveyor and Orbiter data

07 p1212 A69-18547

Field effect in Ge and Si, noting relation between dependence of space charge on surface level charge and on surface potential

07 p1199 A69-18682

Quantitative radar determinations of radio wave scattering cross section of lunar surface layer

07 p1087 A69-19621

Optical parameters for system of isotropic nonabsorbing film on isotropic absorbing substrate determined by ellipsometric method, noting Si optical constants

07 p1201 A69-19648

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

09 p1555 A69-21472

Air layer between target and instrument effect on earth surface temperature conducted with airborne radiometers

09 p1536 A69-22166

Recombination rate dependence on nonequilibrium charge carriers concentration at semiconducting surface

09 p1559 A69-22646

Lead sulfide single crystals and polycrystalline films growth studied by electron microscopy during vacuum deposition on NaCl and other substrates

10 p1743 A69-23002

Impurity heterogeneities in unoxidized and oxidized silicon slices from electron probe X ray microanalyzer, discussing thermal oxidation effects

10 p1743 A69-23171

Interfacial charges in MOS transistors determined as function of surface potential by measuring channel conductance as function of temperature

10 p1744 A69-23178

Chemical composition effect on glass fibers strength, discussing reasons for increased surface layer strength

10 p1717 A69-24045

Parallel flow of viscous liquid film with free surface down inclined plane, noting growth of initially infinitesimal amplitude waves and finite amplitude wave stability

11 p1869 A69-24891

Electrical conductivity of space charge surface layer in semiconductors with many-valley energy spectra of current carriers, discussing scalar relaxation time

11 p1937 A69-24915

Structure of epitaxial single crystal layers of CdS vacuum deposited on mica surface at various temperatures

11 p1939 A69-25709

Lunar surface layer structure by statistical analysis of data concerning craters and stones distribution as shown by lunar orbiter photographs

12 p2154 A69-25816

Etched surfaces inhomogeneity of n-type GaAs single crystals, noting oxide layers formation

12 p2142 A69-25980

Annealing effects on titanium oxidation kinetics, indicating no relation between oxide formation and diffusion anisotropy of oxygen

12 p2112 A69-26039

Fracture surfaces of thermally toughened glass plates using Cranz-Schardin spark camera, confirming internal front lead over front in surface layers

12 p2118 A69-26194

Lunar surface layer temperature field dynamics obtained from stable periodic solution to parabolic differential equation with nonlinear nonautonomous boundary conditions

12 p2157 A69-26281

Atmospheric turbulent energy spectra in boundary surface layer, considering homogeneous axisymmetric model in presence of temperature and velocity gradients

12 p2067 A69-26355

Radiophase mapping utilizing VLF radio signals to detect conductive sheets and surface impedance of earth

12 p2075 A69-26982

Optimal thickness of inhomogeneous absorption layer subjected to normally incident plane monochromatic wave treated as Mayer-Boltz variational problem

13 p2297 A69-27381

Hydrodynamics of large scale atmospheric circulation, analyzing interactions between different scales and between atmosphere and underlying surface

13 p2253 A69-27849

Corrections for atmosphere thickness needed for satellite measurements of underlying surface temperature

13 p2293 A69-27850

Physical limit model of fatigue in metals and alloys to determine stress producing plastic flow in surface layer

14 p2461 A69-28913

Turbulent heat exchange coefficient radiation absorption and diurnal vertical variations effects on temperature field in surface layer of sea and atmospheric boundary layer

14 p2472 A69-29462

Rigid obstacle unsteady motion in compressible fluid with load applied to surface layer, deriving numerical solution of pressure expansion

14 p2430 A69-29480

Vacuum carburization of surface layers of transition metals

15 p2638 A69-30273

Cr-Si diffusion layers on Ti, noting results of roentgenographic and metallographic studies

15 p2638 A69-30279

Normal modes stability analysis of fluid layer adjacent to flat plate submerged in liquid, considering effects of interfacial surface tension and buoyant forces [AIAA PAPER 69-386]

15 p2590 A69-30476

Turbulent heat and momentum fluxes spectra measured in atmospheric ground layer, describing changes as function of height and stratification conditions

15 p2649 A69-30648

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

15 p2669 A69-30717

Gas laser cutting of thin carbon films on thick pyrex glass and ceramic substrates

15 p2635 A69-31037

Metal oxide semiconductor structural model usefulness in understanding behavior near transition region, discussing surface inversion layer properties, surface mobility theory, etc

16 p2757 A69-31612

Temperature field in plate heated at one end and situated in solidifying gas, leading to gas layer formation by sublimation

16 p2878 A69-31957

UHF propagation in spherically stratified superrefractive troposphere with trapping surface layer, discussing distant field strength dependence on refractivity profile

16 p2752 A69-32388

Secondary electron emission from gas covered metal surfaces, discussing results of neutral beam investigations

17 p3008 A69-33000

Martian surface features and climate with emphasis on atmospheric surface layers, assessing Mariner 4 data

17 p3029 A69-33040

Surface layer role in strengthening of iron determined from examining temperature dependence of internal friction during thermomechanical treatments

17 p2991 A69-33939

Graphical representation of friction stresses produced on mechanical parts surface layers, using mathematical model based on Poisson ratio and friction coefficient

19 p3329 A69-36723

Static theory of fibrous surface media based on continuum mechanics, neighboring fibers noninteraction principle and additivity of mechanical properties

19 p3447 A69-36858

Aluminizing and operational effects on surface layer and core of first and second stage turbine blades

20 p3561 A69-37370

Soviet collection of papers on physics of atmospheric boundary layer covering wind profile, turbulent energy balance, etc

20 p3571 A69-37694

Wind velocity below 100 meters from Laikhtman atmospheric boundary layer model, solving equations for horizontally homogeneous, stationary and nonadvective air flow

20 p3571 A69-37695

Microstructure and X ray structure compared for two and three component chromide, titanide and silicide diffusion layers on Nb, discussing phase composition

20 p3563 A69-37820

Steady state vertical distribution of small ions in ground layer assuming atmospheric dynamic and thermal

sublayers, calculating air resistance and electric field potential

21 p3715 A69-38836

Oxygen pressure effect on oxide layer composition on W surface by secondary ion-ion emission

21 p3746 A69-39071

Matter surface distribution in general relativity, deriving matching conditions

22 p3982 A69-40753

Piezoelectric characteristics of surface layers of Ba titanate single crystals, using static and dynamic electromechanical methods

22 p3995 A69-41156

Ion sputtering method for making electrodes in thermionic energy converters, discussing alumina and W surface layers preparation

23 p4170 A69-42259

Surface films effect on friction coefficient of sodium chloride and Zn single crystals under normal pressure loads, noting film thickness role

23 p4170 A69-42343

Structural changes in subsurface layer and surface microgeometry factors of metal fatigue failure, explaining crack formation and propagation

24 p4395 A69-42559

Ellipsometric liquid immersion method for optical parameters determination of system with nonabsorbing surface film on absorbing substrate

24 p4316 A69-43321

SURFACE NAVIGATION

Navigational instruments developments during past fifty years emphasizing land, marine and air navigation aids

01 p0112 A69-10311

Ship navigation by altitude and azimuth measurements of artificial earth satellite, discussing position and reference errors and synchronous satellite advantages

[UN PAPER 68-95247] 01 p0112 A69-10461

Navigation Service Satellite System for aiding aircraft and ships at sea in Pacific Ocean, noting equipment and functions

[UN PAPER 68-95251] 01 p0112 A69-10470

Marine requirements possible satisfaction by using space techniques to improve long range communications to achieve safety at sea and shipping operations efficiency

01 p0161 A69-10503

Navy Navigation Satellite System TRANSIT providing all-weather continuous worldwide service for military and civil users

02 p0277 A69-11753

Maritime and aeronautical developments - Conference, Paris, April 1967

02 p0192 A69-11886

Navigation by satellite systems, discussing vehicle position determination and communications link for traffic control with comment on French space program

02 p0278 A69-11912

SPOT /Speed, Position and Track/ transoceanic traffic surveillance and navigation system for aircraft and marine users

03 p0463 A69-13234

Meteorological satellites data for safe navigation of ships, discussing techniques to overcome difficulties in interpreting ice and cloud photographs

[UN PAPER 68-95776] 06 p0916 A69-17028

Shipboard direction finder calibration accuracy, emphasizing radio operator training

06 p0897 A69-17533

Marine and aircraft satellite navigation techniques, discussing equipment requirements, related performance characteristics and limitations

08 p1349 A69-21198

Navy Navigational Satellite System for position location accuracy in marine and oceanographic exploration applications

[AIAA PAPER 68-471] 13 p2295 A69-27247

Hyperbolic marine and air navigation including TACAN, pulse modulation, rotating hyperbolic fields, sector beacons and all-weather landing aids

13 p2296 A69-27334

Space vehicles and marine navigation using navigation satellites, radar, Doppler navigation, etc

13 p2296 A69-27918

Simultaneous observations of altitudes of stars and moon for determination of longitude without time by navigators

14 p2479 A69-29855

Navy Navigation Satellite System /NAVSAT/ applications, considering nonmilitary marine and air all-weather navigation and positioning

14 p2479 A69-29856

Accuracy improvement of method of averages applied to equations of small motions and disturbances on two rotor gyrocompass on ship performing circular maneuvers

18 p3139 A69-35378

Correlation role in navigation satellite analysis noting reduction in ephemeris error effects [AAS PAPER 68-145]

21 p3761 A69-39222

Worldwide communication system via synchronous satellites for aeronautical, maritime and land mobile services

23 p4114 A69-41355

Surface and aerospace navigation by VLF radio network, discussing Omega transmitting station location operational modes and daytime-nighttime accuracies [AAS PAPER 69-405]

24 p4347 A69-42834

SURFACE PRESSURE

U PRESSURE

SURFACE PROPERTIES

NT ADHESION

NT COEFFICIENT OF FRICTION

NT INTERFACIAL TENSION

NT SKIN TEMPERATURE [NON-BIOLOGICAL]

NT SPECTRAL REFLECTANCE

NT WALL TEMPERATURE

Dielectric surface coatings effect on transmission and loss properties of silicon-microstrip microwave transmission lines

01 p0041 A69-10201

Electrical properties of gold-gallium arsenide n-type junctions investigated for influence of crystallographic orientation of surface and charge carrier density

01 p0138 A69-10432

Chemical vapor deposition of beryllium metal coatings noting thickness, purity and processing effects on surface properties

01 p0097 A69-10644

Sulfide addition agents for diester lubricating grease and organic resin solid film lubricants, noting formulation and tests for steel and molybdenum

01 p0102 A69-10907

Specific effective scattering area on lunar surface using Luna 13 signals from Oceanus Procellarum measured with radar employing antenna with narrow radiation pattern

01 p0158 A69-11312

Radiant heat transfer prediction methods checked for validity and accuracy by irradiation measurements with materials of various surface properties [ASME PAPER 68-HT-42]

02 p0351 A69-12206

Free surface motion and stress measuring instrumentation, describing plate impact one dimensional strain configuration for determining mechanical properties under stress wave propagation

02 p0344 A69-12290

Structure of /111/ single crystal Si surface after chemical-mechanical polishing and ultrahigh vacuum annealing, noting presence of Fe impurity

02 p0301 A69-12660

Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance

03 p0368 A69-13126

Martian surface properties, discussing limonites prevalence and dust layer evidence as causes for reddish color

03 p0509 A69-13357

Penetration type soil analyzer used by Luna 13 automatic lunar station for mechanical strength of lunar surface

03 p0430 A69-13424

Alloy elements effect on spreading of liquid titanium and zirconium alloys on graphite

03 p0446 A69-13573

Electromagnetic wave diffraction at uniformly expanding sphere solved by Kirchhoff method

03 p0397 A69-13719

Electrochemical oxidation of fuels in liquid ammonia, evaluating electrode surfaces as catalysts [ECS PAPER 212]

03 p0382 A69-13857

Physical and mechanical properties of surfaces and interfaces - Conference, Raquette Lake, New York, August 1967

03 p0448 A69-13867

Surface effects on metals mechanical properties, discussing dislocation dynamics and resulting effects on macroscopic plastic behavior

03 p0448 A69-13869

Surfaces role in superplasticity, demonstrating rate of neck growth dependence on surface irregularities

03 p0449 A69-13879

Chemical treatment effects on mechanical properties of titanium alloy tubes

03 p0434 A69-13914

Lunar magnetic moment and surface field, discussing Explorer 35 field measurements

03 p0514 A69-14005

Electromagnetic theory of surface radiation properties, analyzing specular reflectance of optically smooth surfaces

04 p0684 A69-14357

Oxygen surface densities measured by method based on characteristic X ray production by 100 kev protons

04 p0631 A69-14446

Lunar transient luminous events and eclipse anomalies, proposing solid surface and gas luminescence as explanation

04 p0653 A69-14615

Quasi-specular bistatic radar measurements of oblique scattering properties of lunar surface using telemetry carrier from Explorer 35 as lunar orbiting radar beacon

04 p0655 A69-14657

N-type Si surface photopotential, conductivity and capacitance during anodic oxidation in absolute ethylene glycol

04 p0643 A69-15260

Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals

04 p0619 A69-15391

Plane shear strain measurement by means of properly oriented strain gages on surface and proper disposition of gages in Wheatstone bridge circuit

04 p0603 A69-15498

Dynamic compatibility conditions for shock wave collision with material discontinuity surface and for superposing two shock waves propagating in opposite directions

05 p0745 A69-15867

Peripheral surface damage effects on epitaxial GaAs bulk diodes breakdown characteristics, noting measurements on mechanically and chemically prepared elements

05 p0733 A69-16561

Polycarbonate surface stiffness increase associated with fatigue induced by repetition of loads

06 p0946 A69-17206

IR radiative heat transfer in nongray gases for non-black bounding surfaces, considering diatomic gases with single vibration rotation band

06 p1033 A69-17559

Titanium surface impurities effect on porosity in welds, proposing machining immediately before welding as solution

06 p0945 A69-17894

Ablation surface patterns and resulting roll torques and roll behavior of hypervelocity vehicles [AIAA PAPER 69-180]

06 p1036 A69-18051

Thermochemical and mechanical ablation mechanisms for Apollo heat shield material, comparing surface thermochemistry computer program and arc plasma tunnel data

06 p1038 A69-18149

Cross hatching on various body surfaces due to periodic surface pressure fluctuations, discussing origin from counterrotating longitudinal vortices in boundary layer

06 p0915 A69-18213

Semiconductor current carriers surface recombination rates determined from photomagnetic effect

07 p1198 A69-18505

Field effect in p-type gallium arsenide single crystals as characteristic of surface electron energy state spectrum

07 p1199 A69-18686

Radiation emission factors determination of polished metallic surfaces

07 p1242 A69-18952

Metal bath surface conditions for floating aluminum trioxide inclusions in pure iron and carbon steels

07 p1167 A69-19342

Surface environment effects on mode of microcrack formation during fatigue of Al single crystals, noting surface void formation mechanism

07 p1235 A69-19387

Free surface strain increment components on high carbon steel compression specimens to estimate tensile plastic instability onset, noting ductile fracture criterion

08 p1328 A69-19891

Small amplitude surface irregularities effect on backscattering properties of radar calibration metal sphere, using full wave boundary perturbation method

08 p1273 A69-20027

Nb-Zr-Cr alloys solidus surface and isothermal sections, using optical pyrometry, microstructural and X ray analyses

08 p1333 A69-20440

Silicon carbide fiber surfaces nature and interaction with coupling agents, epoxy and resin components, noting chemical and electron microprobe analysis

08 p1341 A69-20515

Surface structures determination by energy analysis and low energy electron diffraction of scattered electron

09 p1554 A69-21340

Albedo over Antarctic, measuring solar radiation reflected by surface and atmosphere by Eppley radiometer

09 p1484 A69-21404

Electron irradiation effect on surface potential of thermally grown silicon dioxide layers, noting conductivity and annealing effects

09 p1557 A69-21743

Surface characterization on chemical vapor deposited tungsten, evaluating grain size effect

09 p1558 A69-21810

Partial pole figures in vapor deposited and wrought cylindrical tungsten specimens, noting random surface produced by orientation

09 p1558 A69-21811

Face effect in p- and n-type gallium antimonide single crystals doped with zinc and tellurium

09 p1558 A69-21870

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile

[AIAA PAPER 69-142]

09 p1560 A69-21900

Incompressible fluid nonlinear oscillations in rectangular basin analyzed by Green function for mixed problem, calculating velocity potential and free surface approximations

09 p1483 A69-22711

Elastic Cosserat plate and shell theory, considering constitutive equations imitating transversely isotropic material and elastic deformations

10 p1798 A69-23147

Shallow impurity states in semiconductors, calculating bulk and surface energy eigenvalues in Si and Ge

10 p1745 A69-23361

Surface density of carbon foils measured accurately by determining trapped carbon dioxide pressure after burning in pure oxygen

10 p1746 A69-23663

Surface atomic structure effects on polar faces in InSb semiconductor crystal established from measurements of contact potential difference by dynamic capacitor

10 p1747 A69-23965

Aluminum bonded structures corrosion resistance through adhesive primers and surface treatments

10 p1700 A69-24088

Modified Diggelen photometric method in lunar topography, analyzing surface brightness and inclinations in mare regions and Korolev thalassoid

11 p1959 A69-24724

Dislocation structure and surface deformation markings correlation analyzed on fatigued Al electron microscope foils

11 p1905 A69-25184

Static pressure measurements at surface of sharp plate in supersonic flow during gas/liquid jet injection

11 p1821 A69-25479

Etched surfaces inhomogeneity of n-type GaAs single crystals, noting oxide layers formation

12 p2142 A69-25980

Heat treatment effects on molybdenum-rhenium alloy field emission and surface structure in alpha and sigma phase regions

12 p2113 A69-26041

Limits for Martian surface materials established by comparing visible and IR spectra with laboratory spectra

12 p2156 A69-26225

Ruby crystal optical homogeneity and relation to main laser emission characteristics, discussing optical and structural surface properties

[IEEE PAPER U-7]

12 p2106 A69-26322

Surface dissipation effect induced by end electrodes on drift instabilities in cold ion plasma column described by differential equation with constant coefficient

12 p2138 A69-26710

Rarefied plasma potential fluctuations when bounded by surface having complex conductivity and dispersing properties

12 p2139 A69-26712

Microscopic mechanisms in fracture surface markings, using electron fractography cleavage, fatigue, stress corrosion cracking, microvoid coalescence and tear ridge formation

13 p2274 A69-27224

Germanium surface IR radiation absorption in vacuum at low temperatures, obtaining modulated interval reflection spectra

13 p2317 A69-27879

Radiative heat transfer, discussing electromagnetic theory, transfer between surfaces and simultaneous conduction, convection and radiation

13 p2376 A69-28140

Spacecraft surfaces bidirectional reflectance flux distribution applications to space thermal control computations

[AIAA PAPER 68-26]

13 p2222 A69-28216

Electronegativity and work function relationship from thermodynamic and quantum mechanics standpoint, describing electrons structure by spin orbitals localized around lattice sites

14 p2505 A69-29263

Thermionic converters semiconducting collector surfaces, evaluating work functions of nickel-chromium steel and aluminum trioxide collectors

14 p2506 A69-29269

Image formation with arbitrary holographic surfaces achieved by reversing direction of propagation of diverging wave

14 p2450 A69-29582

Surface brightness distribution in comet Arend-Roland tall from diffusion model and photometric investigation of photographs obtained by 40-cm astrograph

15 p2684 A69-30519

Planar bipolar transistors degradation under thermal and ionizing radiation stresses, analyzing surface recombination currents of silica films and silica-silicon interfaces

15 p2625 A69-30826

Hydrogen laser operation time reduction attributed to hydrocarbon formation on inner surface of storage flask, promoting atomic hydrogen recombination

15 p2634 A69-30942

Flight instrument package for change of energy absorption and energy radiation of vehicle surfaces during various phases of space vehicle mission

15 p2613 A69-31269

Martian bright surface areas identified as homogeneous powder having opaque grains, discussing hydrated iron oxides contributions to observed optical properties

16 p2855 A69-31660

Semiconductor impressed voltage preconditioning, considering problems involving surface properties

16 p2758 A69-31713

Laminar-turbulent transition in boundary layer on thermally decomposing surface, discussing gasification rate, Reynolds number effects, heat transfer and turbulence onset mechanism

16 p2878 A69-31951

Steady deflagration of homogeneous monopropellant in condensed phase, considering nonequilibrium surface condition for mass decomposition rate

[WSCI PAPER 69-6]

16 p2830 A69-32347

Surface state density determination as function of surface potential in MIS capacitors, discussing MIS capacitance method theory and computer programs

16 p2827 A69-32556

Luminous particles volumetric concentration calculation based on limiting surface density to determine bulk density in cometary head

17 p3032 A69-33189

Apparent thermal radiation properties for one dimensionally rough surface, discussing variance with property models employed in engineering analysis of radiant transfer

[AIAA PAPER 69-622]

17 p3071 A69-33271

Thin surface films effect on radiative properties of metal surfaces determined by thin film optics, noting dependence on refractive index

[AIAA PAPER 69-623]

17 p3072 A69-33283

Spectral reflectivity differences/color differences/on lunar surface in visible region, indicating compositional difference origins

17 p3037 A69-33653

Lunar conditions differing from simulations in laboratories, examining surface, physicochemical properties and friction

18 p3113 A69-34241

Fluid velocities at earth core surface inferred from magnetic data, considering velocity constraints and diffusion contributions to secular change

18 p3129 A69-34951

Carburization structure on surface of Mo and Nb castings cast in graphite molds showing changes in plastic properties of metals

18 p3156 A69-35019

Machining processes effect on surface integrity of machine parts and effects on product quality

18 p3149 A69-35129

Anomalous phenomenon in resistance and magnetoresistance of cleaved InAs surface, plotting temperature and magnetic field variation effects, proposing explanation of anomaly

19 p3388 A69-36543

Surface tension of simple liquids consisting of interacting spherical particles, considering density variation in liquid-vapor phase transition zone

19 p3452 A69-36725

Heat and mass transfer on vertical surface under combined free and forced convection, solving laminar boundary layer equations by stream function

19 p3453 A69-36844

Cultured mammalian cell growth morphology studied in situ with scanning electron microscope, discussing surface morphology changes during mitotic cycle of Chang liver cells

20 p3467 A69-37100

Surface pressure, skin friction and heat transfer measurements on sharp flat plates and wedges in low density hypersonic flow, noting slip velocity

20 p3458 A69-37186

Rarefied molecular gas flow past permeable surface, determining reflection law and flow parameters

20 p3459 A69-37438

Collector efficiency limitation of surface barrier-limited photoconductors attributed to photogenerated carrier diffusion into electrode

20 p3583 A69-37732

Lunar surface scattering properties at 2.5 cm wavelength determined using computerized backscattering diagram and equations for obtaining scattering data

20 p3606 A69-37971

Boundary layer flow past permeable surface, generalizing integral equations for case with suction

21 p3691 A69-38573

Depth dependent variations in texture in Nb due to inhomogeneous plastic deformation during cold rolling

21 p3744 A69-38737

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases

21 p3736 A69-38962

Electromechanical effect dependence on CdS semiconductor surface state, noting relationship between microhardness and discharge current

21 p3781 A69-39072

Absorption constant and reflectivity coefficient on semiconductor samples with nonideally prepared surfaces, calculating measurement errors

21 p3782 A69-39240

Stress concentrations in metals determined through surface properties measurements, correlating local electrochemical potentials and metal-metal oxide junction parameters

21 p3747 A69-39326

X ray diffraction as nondestructive technique for measuring residual surface stress

21 p3845 A69-39476

Radar reflection techniques for planetary surface studies, considering surface properties effects on reflectivity and reflected wave characteristics, instrumentation and data for moon and planets

21 p3811 A69-39509

Focal plane observation of granulation phenomena on scattering surface illuminated by coherent light from gas laser

21 p3741 A69-39575

Holographic interferometry for surface strain and vibrations visualization, describing photographic recording techniques

22 p3945 A69-40244

Hoba meteorite surface radioactive isotope composition measured, finding terrestrial age from Ni-59 activity

22 p4021 A69-40411

Supercavitating flow past thin hydrofoils, determining flow velocity or acceleration potential near free surface

22 p3933 A69-41023

Heat transfer and surface thermal conduction characteristics of contact of two solid bodies, discussing pressure effect, measurement and analytical techniques

23 p4237 A69-41327

Silicate glass impurity droplet formations on alumina single crystals polished surfaces analyzed by electron microprobe as function of high temperature

23 p4176 A69-41597

Holographic interferometry for measuring small static displacements of diffusely reflecting surfaces

23 p4167 A69-42185

Free convection from vertical surface using perturbation method

24 p4407 A69-42916

Lunar surface material mechanical properties from Surveyor observations, analyzing grain size, rock density, internal friction, cohesion and bulk density compared to Luna observations

24 p4383 A69-42962

Instantaneous response TV system application to observing solar surface granulation, noting advantages over photometric measurements

24 p4389 A69-43711

SURFACE REACTIONS

Spatial and kinetic distributions of molecules reflected by surface in rarefied atmosphere, discussing mathematical model

01 p0122 A69-10041

Kinetics of vaporization of metals with surface subjected to incident radiation flux noting pulse duration

02 p0350 A69-11577

Electron paramagnetic resonance study of interaction between adsorbed nitric oxide and NaY and deca-terized Y zeolites surfaces, considering catalytic activity

02 p0205 A69-11900

Asymptotic laminar boundary layer in compressible gas in presence of normal and tangential velocity components at body surface

02 p0231 A69-12138

Aged boric acid coated silica reaction vessels, showing reduced surface effects and high reproducibility in oxidation reactions

02 p0205 A69-12322

Surface and interface phenomena in engineering technology, determining mechanical or electronic properties

03 p0434 A69-13868

Surface effects on mechanical properties of crystalline and vitreous materials, considering environmental effects on dislocation mobility

03 p0454 A69-13870

EPR investigation of free radicals formed during mechanical fracture and gamma irradiation, discussing recombination rate and reaction rate with oxygen

03 p0434 A69-13871

Metal surface degradation by constant density laser radiation, computing screening effect

03 p0442 A69-14221

Interaction of rarefied gas with solid surface, analyzing accommodation coefficients, energy and impulse exchange as function of atomic bulk size

04 p0632 A69-14991

Interaction of gas atoms with solid surface, giving mathematical model assumptions

04 p0632 A69-15008

Gas accretion on neutron star surface as energy source for X ray radiation

05 p0814 A69-15847

Lunar surface gas adsorption mechanism for lunar atmosphere absence

05 p0824 A69-16062

Prediction technique for surface effect causing Si bipolar transistors gain degradation under ionizing radiation

06 p0976 A69-16879

Surface roughness influence on interaction between gas flow and solid surface for case of diffuse and specular reflection, noting role of inclination angle

06 p0910 A69-17342

Drift field photovoltaic cell performance with bulk and surface recombinations

06 p0870 A69-17473

Mechanism for laser surface damage of glasses working through optical absorption, fluorescence, chemical reaction by quenching and breakdown

06 p0935 A69-17771

Photographic study of burning metalized composite propellant under acceleration, noting burning rate augmentation by heat transfer from alumina particles retained on propellant surface [AIAA PAPER 69-173]

06 p0983 A69-18151

Asymptotic wave equation application conditions in describing field behavior near caustic surface, using Airy functions

07 p1076 A69-18520

Field effect in Ge and Si, noting relation between dependence of space charge on surface level charge and on surface potential

07 p1199 A69-18682

Surface recombination rate and retardation field effects on diffusion current in mesa diodes with low level injection

07 p1105 A69-19008

Surface plasmon excitation by tunneling electrons in GaAs-Pb junctions, discussing conductance at bias voltages, plasmon energy and concentration

07 p1200 A69-19402

Surface effects at interface between linear and nonlinear media representing transmission lines of low pass filter type

07 p1088 A69-19752

Dielectric surface loading on GaAs for suppressing traveling high field domain mode oscillations

08 p1371 A69-19913

Gas adsorption of molecular oxygen and hydrogen on molybdenum surface using collector section of field emission retarding potential analyzer

08 p1268 A69-20171

Propagation modes in corrugated cylindrical waveguides determined by imposing nonisotropic surface reactance boundary condition at corrugated walls

08 p1284 A69-20259

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies [AIAA PAPER 69-270]

09 p1565 A69-21252

Liquid surface active media /kerosene, water, castor oil/ effect on strength of V notched polymethylmethacrylate specimens

09 p1528 A69-21852

Face effect in p- and n-type gallium antimonide single crystals doped with zinc and tellurium

09 p1558 A69-21870

Oxygen depletion effect in chemical reactions between pyrolysis gases and air stream on surface recession of charring ablators [AIAA PAPER 68-302]

09 p1622 A69-21982

Static characteristics of transistors dependence on current carriers surface recombination in inactive base region, noting strong electric field influence

09 p1464 A69-22287

Surface recombination efficiencies on metals measured as function of exposure time in steady Oseen flows, providing step-function increase in oxygen atom concentration

10 p1726 A69-23526

Laminar flow stream containing periodic fluctuation of mass fraction of chemical species over flat plate with reactive surface

11 p1831 A69-24284

Surface-active additives effect on crystallization kinetics of sil type glasses, discussing surface tension

11 p1907 A69-25032

Uranyl ions interaction with phospholipid and cholesterol monolayers, using surface pressure and potential measurements

11 p1832 A69-25641

Electrolytic hydrogen evolution reaction on Al covered by thin oxide in aqueous buffered acetate solutions

11 p1832 A69-25674

Reflection of moving rarefied AR plasma from surface of nickel cylinder inserted into gas discharge tube

11 p1934 A69-25710

Fatigue strength reduction in Ti alloy in sliding friction contact with metallic materials caused by fretting corrosion

12 p2113 A69-26125

Modes and mechanisms of wear covering adhesive, abrasive and corrosive wear, surface fatigue and fretting corrosion

13 p2265 A69-27231

Alloying effect on surface oxides determined from photoelectric polarization measurements for Ti-Nb and Ti-Ni

13 p2275 A69-27292

Electronic structure of clean metallic interfaces, considering electron, ion and surface interactions for metal-vacuum interface

13 p2321 A69-28008

Nondrifting n-p-n semiconductor current gain dependence on surface recombination rate

13 p2236 A69-28547

Electron work function profile determined for polycrystalline Mo and W single crystals with and without Cs vapors by emission microscope and photomultiplier

14 p2507 A69-29276

Lunar surface gas adsorption mechanism for lunar atmosphere absence

15 p2680 A69-30261

Stellar magnetic field generation by convective motions of surface layers of slowly rotating stars

15 p2688 A69-30559

Rayleigh assumption validity for wave scattering by analytic periodic surface predicated on solutions

analytic continuation across boundary, discussing Green function role
15 p2652 A69-30673

Interface friction and adhesion of alloys workpieces and die materials under pressure and temperatures typical of plastic deformation
15 p2629 A69-30902

Microslip between concentrated contacts and design charts for maximum pressure, closing-in of contacting bodies and optimized shapes, giving computer programs
15 p2629 A69-30903

Reacting gas ignition by sudden contact with heated noncatalytic surface, deriving heating time and transferred heat amount by Blasius perturbation method
16 p2878 A69-31955

Kinetic theory and gas-surface interactions for upper atmospheric density measurements by mass spectrometers, pressure gages and satellite drag, detailing adsorption effect
16 p2776 A69-32089

Rocket exhaust plume flow fields studied for vehicle effects taking into account nozzle boundary layer, coalescence shock and nonisotropic flow [AIAA PAPER 69-569]
16 p2842 A69-32696

Dielectric overcoating effects on electromigration Al interconnections, showing dependence on thickness and surface passivation
17 p2935 A69-32889

Surface chemistry of plastics reinforced with strong fibers, stressing need for investigating coupling films, catalysts and metallic ions role in coupling compounds chemisorption
17 p2992 A69-33655

Quartz fiber adhesion to Re measured in LEED flow energy electron diffraction/ apparatus for clean and O layer surfaces, noting brittle fracture
18 p3156 A69-35182

Surface alloying of high melting point metals in Al melts, noting prior oxidation enhancement and simplifying of coloring techniques
19 p3328 A69-36158

High energy neutral molecule beam for gas-surface interaction studies generated in electron bombardment ion source
19 p3376 A69-36176

Low and moderate energy gas molecule-solid surface interactions, using molecular beams
19 p3376 A69-36177

Reactive scattering from solid surfaces, discussing atom beam reaction of O with heated Ge and Si single crystals
19 p3377 A69-36178

Wall boundary condition model modification applied to molecular beam-solid surface scattering, noting qualitative agreement with observed distributions
19 p3377 A69-36179

Gas molecules scattering by solid surface for monoenergetic and Maxwellian beams, discussing model with different values for magnitude and velocity direction
19 p3377 A69-36181

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites
19 p3377 A69-36182

Gas-surface energy transfer experiment on OGO-F satellite, measuring upper atmosphere kinetic energy flux to determine accommodation and drag coefficients, density, etc
19 p3255 A69-36680

Low pressure ethylene decomposition on high temperature W ribbon surface
19 p3265 A69-36729

Low pressure ethylene decomposition on high temperature Re ribbon surface
19 p3266 A69-36730

Oxygen influence on low pressure ethylene decomposition on high temperature tungsten and Re ribbons surface
19 p3266 A69-36732

Interface electron transport phenomena in stress corrosion, expressing defect movements in terms of electron energy dynamics
19 p3349 A69-36889

Reactivity of hydrogen with surface of Ti-Al-V alloy under fatigue cycling at ambient and cryogenic temperatures
20 p3557 A69-36960

Oxygen environment influence on Inconel X-750 surface deformation and cracking during fatigue related to chemisorption and oxidation
20 p3558 A69-36966

Turbulent boundary layer of injection gas flow calculated past surfaces with pressure gradient
20 p3513 A69-37091

Turbulent skin friction coefficients of compliant surfaces on flat plates determined as function of speed for different materials
21 p3695 A69-39039

Thermal stresses and displacements in long isotropic hollow cylinder heated on part of outer curved surface, analyzing temperature distribution
21 p3838 A69-39166

Dispersion relations for surface plasma oscillations in normal metals for single and multiple films taking into account retardation effects, noting dielectric function
22 p3992 A69-40419

Unsteady aerodynamic heating at stagnation region including surface combustion in arc heated high enthalpy wind tunnel
22 p3860 A69-40597

Germanium single crystals etching with water vapor and hydrogen sulfide in hydrogen flow system, studying concentration, pressure and temperature effects on surface reactions
22 p3970 A69-40737

Diamond shaped surface ablation patterns development mechanism for several ablation materials of ground test and recovered flight vehicles [AIAA PAPER 68-671]
23 p4059 A69-41891

Surface chemistry effect on physical properties of pressure sintered Be metal, suggesting surface alloying approach by powder metallurgical techniques
24 p4332 A69-42963

Intense heat exchange narrow zones on blunted semicone surfaces in hypersonic gas flows ascribed to large Reynolds numbers
24 p4246 A69-43494

SURFACE ROUGHNESS

On-axis gain of parabolic reflector antennas with rough reflecting surfaces as function of surface deviation, correlation distance, area and wavelength
01 p0041 A69-10246

Radiation models using discrete radiator ensembles having applications to analysis of forward and backscatter from rough surfaces, clutter and chaff models, etc
01 p0030 A69-10556

Turbulence characteristics up to 150 m above ground, noting surface roughness length directional dependence, longitudinal turbulence spectra and turbulent energy budget
01 p0110 A69-10695

Static pressure field induced by steady subsonic flow of compressible inviscid fluid through two dimensional duct with statistically distributed wall roughness
01 p0062 A69-11279

Roughness effect on microwave emissivity according to geometric optics with application to moon and Venus
02 p0207 A69-12017

Nucleate pool boiling heat transfer of liquid nitrogen from circular disks with different surface conditions including copper and nickel mirror finishes, roughness and coatings
02 p0352 A69-12207

Plane electromagnetic wave scattering from slightly rough surface tilted away from reference plane, noting polarization effects
03 p0395 A69-13625

Randomly rough surface physical and geometrical remote determination by polychromatic bistatic radar
05 p0721 A69-16572

Energy spectra and angular dependence characteristics of electromagnetic wave scattered on statistically uneven surface studied by vector form of Kirchhoff integral
09 p1459 A69-22635

Polarization effects of scattered coherent light on laser imagery, determining surface roughness and angle of incidence effects photographically on basis of Fung theory
11 p1896 A69-24849

Optical data processing techniques and phase contrast method variations for statistics of surface roughness
12 p2079 A69-25910

Natural unbroken tektite surface examination by interferometry, discussing fringe patterns for pit shapes and sizes
12 p2173 A69-27175

LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
13 p2246 A69-27537

Radar backscatter analysis for Arctic ice identification, deriving ice surface roughness factors from Kirchhoff-Huygens principle
14 p2416 A69-29530

Coherence-polarization in remote sensing by microwave and laser means, analyzing scattering functions of rough surfaces
14 p2448 A69-29532

Load support and leakage from microasperity lubricated face seals, developing hydrodynamic lubricant films [ASLE FICFS PREPRINT 21]
15 p2622 A69-30500

Monograph on Prandtl number effect on heat transfer and pressure loss in artificially roughened channels
15 p2717 A69-30934

Laminar boundary layer control on two dimensional body by combined blowing and suction in presence of roughness, noting skin friction reduction [AIAA PAPER 68-641]
17 p2957 A69-34015

Rough wall turbulent boundary layer development in pipe flow determined for different roughness geometries in zero and adverse pressure gradients
18 p3125 A69-35387

LF spectrum analysis of hydrodynamic flow near-wall pressure pulsations over rough surfaced wall
20 p3518 A69-38203

SURFACE ROUGHNESS EFFECTS

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeys Kirchhoff approximation
01 p0032 A69-10886

Radial face seals lubricating mechanism noting surface waviness effect on film thickness fluctuations
01 p0087 A69-10910

Terrain influence in ground wave propagation evaluated by two dimensional diffraction and scattering problems, using Airy type wave functions [AFCL-68-0212]
01 p0033 A69-10970

Runway roughness effects on aircraft, formulating relationship between weight and resonant frequency through simple harmonic motion analogy
01 p0057 A69-11274

Heat transfer dependence on direction of heat flow in stainless steel/aluminum interfaces, showing surface roughness and flatness influence
01 p0177 A69-11406

Thermodynamics in homogeneous steady state fog over rough terrain representing absolutely absorbing surface
02 p0274 A69-11442

Solid body surface roughness influence on radiative properties, deriving expressions relating radiative properties to surface roughness parameters
02 p0350 A69-11575

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
02 p0207 A69-11669

Surface structure effect on flux penetration and AC losses in superconductive niobium
02 p0298 A69-12031

Surfaces role in superplasticity, demonstrating rate of neck growth dependence on surface irregularities
03 p0449 A69-13879

Surface smoothness of laser beam holes, discussing possible damage and technology recommendations
04 p0606 A69-14607

Scattering of electromagnetic waves from rough surface moving with uniform velocity
04 p0560 A69-15213

Emissivity of rough metallic surfaces with preserved profile similarity, showing independence to roughness height
05 p0845 A69-15894

Real liquid turbulent flow of two parallel eddy streams between two parallel walls with given periodic roughness
05 p0747 A69-16034

Directly backscattered light /echoes/ from dielectric plane surface with roughness and volume scattering, comparing indicatrices with moon echo
06 p0887 A69-17173

Surface roughness influence on interaction between gas flow and solid surface for case of diffuse and specular reflection, noting role of inclination angle
06 p0910 A69-17342

Elastic contact between two parallel cylinders with rough surfaces noting contact area, spots and stress distribution
06 p1023 A69-17373

Model for spectral bidirectional reflectance of rough surface producing good agreement with experimental data
[AIAA PAPER 69-64] 06 p0959 A69-18125

Diffuse reflection of electromagnetic waves by rough random surface using probabilistic method and statistical distributions 07 p1075 A69-18280

Stationary viscous incompressible fluid flow past rough surface, noting solution stability and friction stress determination for given pressure gradient 07 p1119 A69-18751

Sliding friction technique to determine contact area and surface microtopography between abraded metals and polymers 08 p1319 A69-19994

Wind velocity and shear stress profiles above surface with changed roughness, using mixing length theory 08 p1346 A69-20311

CW helium-neon laser used to detect and measure vibration frequencies of uniform diffuse surfaces 09 p1515 A69-21430

Correlation produced magnetoplasma mode in potassium confirmed by measurement of real part of surface impedance 10 p1728 A69-23168

Surface radio wave scattering propagating along rough surfaces, measuring emission during transformation into space waves 10 p1658 A69-23952

Turbulent boundary layer in lower atmosphere downwind of abrupt change of surface roughness, determining surface shear stress and roughness height 12 p2125 A69-26014

Regular and noise signal scattering by uneven surface determined by correlation functions, assuming monochromatic components scattering obeying Kirchhoff approximation 12 p2031 A69-26650

Tolerable surface roughness for transition stability in incompressible laminar boundary layer, including analysis of two and three dimensional roughness shape effects 12 p2063 A69-26774

IR spectroscopic observations of moon to interpret molecular vibration spectra in terms of molecular composition, discussing rock surface roughness effects 13 p2341 A69-27582

Roughness effects on boundary layer transition up to Mach 16 in hotshot wind tunnel
[AIAA PAPER 68-377] 13 p2242 A69-28213

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results 13 p2224 A69-28700

Light diffusive reflection from rough surface measured as function of angle of incidence in presence of specular component by goniospectrophotometer 14 p2485 A69-29171

Doppler echo from random rough surface, discussing average power return, frequencies, amplitudes, antenna beamwidth and radar data correlation 14 p2413 A69-29488

Laminar boundary layer control by combined blowing and suction, analyzing surface roughness influence concerned with underwater vehicle skin friction reduction
[AIAA PAPER 69-387] 15 p2591 A69-30477

Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness
[ASLE FICFS PREPRINT 15B] 15 p2620 A69-30484

Rayleigh assumption validity for wave scattering by analytic periodic surface predicated on solutions analytic continuation across boundary, discussing Green function role 15 p2652 A69-30673

Combined distribution density of elevations and slopes for illuminated areas of stable statistically homogeneous random surface exposed to parallel rays beam 15 p2569 A69-30948

Flow over uniformly rough surface in planetary boundary layer from mixing length wind spiral model, using surface shear stress and wind direction data 17 p2997 A69-33153

Mixing length model to relate turbulent shear stress to mean velocity field within planetary boundary layer above surface roughness change 17 p2997 A69-33154

Turbulence measurements and roughness effects on viscous drag reduction with polymer solution in pipe flow, discussing friction factor, wall velocity profile, etc 17 p2951 A69-33252

Apparent thermal radiation properties for one dimensionally rough surface, discussing variance with property models employed in engineering analysis of radiant transfer
[AIAA PAPER 69-622] 17 p3071 A69-33271

Angular dependence of lunar nighttime IR radiation by invariant tensor techniques, noting surface roughness effect on radiation pattern
[AIAA PAPER 69-597] 17 p3032 A69-33276

Directional characteristics of lunar IR radiation accounted for by crater model
[AIAA PAPER 69-598] 17 p3033 A69-33285

Shape and surface roughness effects on turbulent ablation of reentry body nose tip, noting recession rate
[AIAA PAPER 69-717] 17 p2952 A69-33435

Critical review of Deriugin theory of scattering from rough lamellar surfaces using separation of variables method, discussing energy conservation violation 17 p2930 A69-33885

Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness 18 p3127 A69-34421

Macroscopic roughness effect on surface radiation characteristics for special cases 18 p3229 A69-34711

Machining processes effect on surface integrity of machine parts and effects on product quality 18 p3149 A69-35129

Friction coefficient increase caused by metal surface textures anisotropic effect on friction force 18 p3149 A69-35151

Coherent light scattering from rough surface, studying effects of target tilt, translation and rotation on speckle patterns produced 18 p3174 A69-35281

Solid surface roughness influence on reflection of thermal energy molecular jets, showing shock determined by incidence angle 19 p3377 A69-36180

Terrain radar returns emphasizing surface roughness influence in man-made target backscattering, determining radar cross section with radar range equation 20 p3490 A69-37646

Book on heat transfer from horizontal heating surfaces to stationary boiling liquids, heating surface roughness effect and bubble formation 20 p3633 A69-37917

Angular dependence of ocean surface-cloudless atmosphere reflectance for solar radiation studied with digitized camera signals from ATS 1 satellite 21 p3704 A69-38372

Reflection indicatrices of rough surface subjected to heat radiation for stationary and variable incidence angle, noting spatial distribution 21 p3847 A69-38455

Planetary boundary layer top formation, considering particle velocity, earth surface roughness role, geostrophic wind, etc 21 p3715 A69-38566

Diffuse reflection of UV radiation from rough metallic surfaces, noting irregularities 21 p3770 A69-38796

Electromagnetic wave scattering from rough layer with plane and rough interfaces, determining scattering cross sections from electrical field and power density 21 p3677 A69-39459

Turbulent Hartmann flow between rough walls in transverse magnetic field, determining field influence on resistance coefficient 22 p3989 A69-40255

Surface roughness effects on equilibrium temperature of isolated adiabatic plane surface illuminated by collimated and uniform solar flux 22 p4050 A69-40558

Radial velocity errors in high dispersion astronomical spectrographs in terms of variable spectral shifts along plate produced by mirror surface irregularities 23 p4167 A69-42189

Surface texture effects, discussing metallic and elastomeric contacts, measurement, profile, model parameters, adhesion, hysteresis, lubrication, squeeze films, macroelastohydrodynamics and randomness 23 p4170 A69-42359

Terrain surface irregularities influencing electromagnetic wave propagation in inhomogeneous atmosphere, using perturbation calculation 24 p4281 A69-42611

Prandtl number influence on heat transfer and pressure drop characteristics of roughened channels, determining friction factor 24 p4407 A69-42915

Rough surface skin-friction relations expanded to provide turbulent boundary layer growth prediction in pressure gradient 24 p4304 A69-43580

SURFACE STABILITY

Bubble motion inside liquid in spherical cavity, allowing for bubble surface deformation 03 p0418 A69-13812

Surface wave stability for horizontal layer of incompressible dielectric fluid in electric field, noting viscosity effect 04 p0638 A69-15192

Parametric instability of horizontal surface of ideally conducting or very high dielectric constant liquid in varying perpendicular electric field 06 p0957 A69-17524

Surface instabilities at tangential discontinuity between media caused by beam-plasma interaction: deriving dispersion relation 11 p1931 A69-25365

Dependence of convection in planetary interior upon magnitude of Rayleigh number for rigid and free surfaces 12 p2155 A69-26200

Thin walled cylindrical shells deflections under axial impact load, assuming deformations resembling cylindrical surface bending 18 p3217 A69-34599

Surface stresses in rotating asymmetric profiled disks and axial deflection effects computed theoretically and compared to measurements on photoelastic models 19 p3447 A69-36862

Contact stability of hollow cylinder compressed between parallel planes measured optically, compared to approximation of elasticity theory 23 p4162 A69-41416

Surface accuracy of large diameter radio telescopes maintained by uncoupling reflector surface from backup structure, using active compensation 23 p4149 A69-42136

SURFACE TEMPERATURE

NT SKIN TEMPERATURE [NON-BIOLOGICAL]
NT WALL TEMPERATURE

Relationship between cooled surface temperature and pressure self oscillation frequency during heat transfer to turbulent fluid flow, showing temperature variations 01 p0173 A69-10094

IR optics for indicating dynamic mechanical component reliability via surface temperature variations 01 p0085 A69-10295

Satellites use in meteorology, noting monsoon rain forecasting through mesoscale sea surface temperatures of Indian Ocean
[UN PAPER 68-95555] 01 p0109 A69-10502

Aerial radiation temperature measurement, damping factor of atmosphere and determination of ground and water surface temperatures by radiometry 01 p0110 A69-10693

Numerical analysis of temperature variation of spherical spinning satellite with and without radiatively coupled inner shell containing heat source 01 p0162 A69-10761

Lunar surface temperatures and thermal characteristics from Surveyor 5 thermal engineering data gathered during lunar days, eclipse and nights 02 p0321 A69-12227

Venus atmosphere from Mariner 5 and Venera 4 data, discussing surface temperatures and pressures, cloud top region, McElroy model and maximum wind velocities 02 p0330 A69-12800

Surface temperature of flat plate cooled convectively and insulated by circular spot, determining effects of spot radius and Biot number 03 p0531 A69-12863

Surface temperature thermal fluxmeters used in measurements of shock tubes
[ONERA-TP-648] 03 p0427 A69-12876

Surface temperatures for Galilean satellites of Jupiter calculated through corresponding lunations, assuming synchronous orbits with respect to Jupiter 03 p0513 A69-13776

Temperature determination of subjacent surface from airborne measurements of outgoing radiation in earth atmosphere in 10 to 12 micron interval 03 p0424 A69-13933

Aircraft cockpit and surface temperatures after solar radiation exposure in desert, showing inadequacies of meteorological data for thermal stress predictions 03 p0381 A69-14077

Earth surface temperature change quantitative determination due to Milankovitch insolation variations 03 p0426 A69-14232

Lithium metal spray structural cooling system for refractory materials
[AIAA PAPER 68-358] 04 p0688 A69-15509

- Binary mixture condensation on cooled vertical plate, formulating predictive theory based on conservation laws and other physical principles
[ASME PAPER 68-WA/HT-21] 05 p0847 A69-16124
- Nucleate pool boiling heat transfer data extended to relate effect of heating surface characteristics
[ASME PAPER 68-WA/HT-22] 05 p0847 A69-16125
- Molten salts thermal diffusivity measurement method at temperatures above melting point
[ASME PAPER 68-WA/ENER-5] 05 p0848 A69-16161
- Step function factor for laminar heat transfer from rotating disk with surface temperature changing stepwise in uniform forced stream 06 p1029 A69-17003
- Radiating surface temperature and total atmospheric moisture content determinations based on meteorological earth satellite measurements of outgoing radiation in IR 06 p0952 A69-17988
- Solid body surface temperature relation to heat flux during cooling by fluid flow solved on computer 07 p1241 A69-18923
- Nonaxisymmetric temperature field of unbounded hollow cylinder with moving heating boundary, expanding surface temperature into Fourier series 07 p1241 A69-18924
- Gas pressure control in xenon lasers, using variable temperature surface partially insulated from liquid nitrogen coolant 07 p1155 A69-19090
- IR camera determining surface temperatures, discussing construction and space applications 08 p1315 A69-20455
- Steady motion through rarefied gas of circular cylinder due to surface temperature difference 08 p1305 A69-20888
- Laser produced blast wave expansion measured by microwave technique, obtaining surface temperature and electron density 09 p1514 A69-21324
- Temperature profiles and heat transfer coefficients in two phase liquid-liquid stratified laminar flow of variable immiscible film thickness with surface evaporation 09 p1622 A69-21904
- Air layer between target and instrument effect on earth surface temperature conducted with airborne radiometers 09 p1536 A69-22166
- Surface temperature rise of solution treated austenitic steel measured during double repeated rotating bending fatigue tests at room and elevated temperatures 10 p1711 A69-23393
- Peaked electron emission from nickel surface with large work function under laser radiation, discussing emission pulses, electron currents and surface temperature time variations 10 p1703 A69-23572
- Horizontal surface heat transfer coefficient under simultaneous free and forced convection calculated as function of temperature head, air flow velocity and area 10 p1810 A69-24085
- Differential catalytic thin film heat gate for measuring surface temperature variations and ionized flow heat transfer, noting insulating boundary layer thickness 11 p2002 A69-25231
- Venus atmosphere chemical composition, surface temperature and pressure obtained by Venera 4 and Mariner 5 12 p2155 A69-26129
- Lunar surface temperature distribution measured by IR pyrometer, predicting temperature rise due to Lunar Excursion Module landing 13 p2341 A69-27583
- Heat and mass transfer conditions in ablation of shear thinning and thickening fluids at stagnation point
[ASME PAPER 67-HT-78] 13 p2374 A69-27778
- Free convection heat transfer from heated inclined flat plate in air, studying effects of angular positions 13 p2375 A69-27794
- Optical measurement method for burning surface temperature of condensed systems, realizing radiation from surface of combustion by light guide of monocrystalline aluminum oxide 13 p2379 A69-28453
- Comet Ikeya-Seki phenomena near perihelion interpreted from mean surface and ice nucleus internal layers temperatures 14 p2523 A69-29706
- Radiation in atmospheric circulation, considering radiative equilibrium, cloudiness and surface interactions, surface temperature and heat input 14 p2477 A69-29826
- Surface temperature measurements to deduce surface heat fluxes, noting dependence on environment and sensor characteristics 15 p2716 A69-30379
- Late type cool degenerate stars nonobservability or rarity in terms of internal energy available for radiation from surface 15 p2681 A69-30423
- Expression relating gas density, radial velocity and temperature at comet nucleus surface to nucleus surface temperature, applying results to unsteady sublimation process 15 p2684 A69-30521
- Dynamic characteristics of local slope winds, considering thermal and geometrical effects of underlying surfaces 15 p2648 A69-30577
- Temperature of underlying surface and moisture content of atmosphere from satellite thermal radio emission measurements 15 p2648 A69-30641
- Pure hydrogen stellar atmosphere nonLTE models, calculating surface temperature rise due to H alpha line effect on continuum energy balance 15 p2693 A69-30777
- Thermoelastic stress in semiinfinite elastic medium due to discontinuous temperature distribution over free surface, solving associated heat conduction problem 15 p2712 A69-31006
- Thermoelastic stresses in isotropic circular cylinder with surface locally heated by external Newtonian heat source, considering various heat transfer conditions 15 p2714 A69-31178
- Thermal conductivity of semiinfinite rod with insulated surface and constant internal heat source, considering finite heat propagation rate 15 p2719 A69-31181
- Israel research on space data for meteorological purposes, describing automatic picture transmission data and errors in surface temperature determination by satellite radiometry 15 p2650 A69-31422
- IR measuring techniques for water surface temperature remote sensing 15 p2617 A69-31543
- Venus microwave spectrum analyzed by comparing various thermal and nonthermal emission models, discussing surface temperature and atmospheric composition 16 p2853 A69-31597
- Chemical reaction between combustible solid fuel surface and oxidizer-containing gas in space capsule 16 p2877 A69-31896
- Ammonium perchlorate pyrolysis by convective surface heating, monitoring IR emission as measure of surface temperature
[WSCI PAPER 69-23] 16 p2832 A69-32361
- Ammonium perchlorate linear pyrolysis by convective surface heating, discussing propellant deflagration models
[AIAA PAPER 69-501] 16 p2835 A69-32758
- Linear pyrolysis of polymethyl methacrylate to verify Cantrell model and surface temperature determination method 17 p3017 A69-33132
- Mathematical model for determining time dependent terrain surface temperatures and radiances, considering radiative transfer convection, evaporation, ground vegetation temperature, etc
[AIAA PAPER 69-592] 17 p3071 A69-33263
- Earth surface heat flow pattern measurement and distribution techniques, considering relation to surface features and tectonic movements of crust
[AIAA PAPER 69-589] 17 p2961 A69-33284
- Ocean and water surface temperature measurement by IR remote sensing from aircraft and satellites, discussing accuracy and data correction
[AIAA PAPER 69-590] 17 p2973 A69-33286
- Lunar surface thermal characteristics revised from analysis of error sources in daytime lunar surface temperatures derived from Surveyor 5 compartment data
[AIAA PAPER 69-594] 17 p3033 A69-33287
- Temperature distribution in shadowed lunar craters formulated in Fredholm integral equations, showing constant temperature and correction for soil thermal inertia
[AIAA PAPER 69-595] 17 p3033 A69-33291
- Lunar surface brightness temperatures from IR observations, determining thermal emission directional characteristics to infer surface temperatures from Surveyor data
[AIAA PAPER 69-593] 17 p3033 A69-33302
- Mars surface temperature calculated by applying Humphrey formula for planetary radiation energy, finding mean annual values of temperature for different albedo 17 p3034 A69-33412
- Subsurface Martian temperature from sinusoidal temperature variation theory for semiinfinite homogeneous medium, plotting amplitude, mean surface and diurnal soil temperature curves 17 p3034 A69-33413
- Particulate thermophysical lunar soil model for measuring lunation nighttime and eclipse cooling, noting applicability to IR surface brightness temperature of Mercury hot pole 18 p3191 A69-34303
- Gas phase ignition shock tube analysis of solid propellant taking into account changing surface temperature and fuel vapor consumption 18 p3183 A69-34463
- Sea surface temperature remote sensing by Nimbus 2 satellite using TV camera and medium and high resolution IR radiometer 18 p3130 A69-35057
- Transient calibrations for Ge surface thermocouple heat flux sensors used in hypervelocity impulse tunnel 19 p3292 A69-35725
- Calibration of inertial and surface temperature heat transfer transducers for hotshot and shock tube measurements developed and tested at ONERA
[ONERA-TP-683] 19 p3305 A69-35726
- Wavelength-surface temperature relationship of ruby laser, discussing thermal control of emission wavelength 20 p3552 A69-36967
- Long range weather forecasts attempt from relation between northern Atlantic Ocean water temperature anomaly and monthly satellite cloud data changes 20 p3569 A69-36987
- Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc 20 p3549 A69-37374
- Heat transfer coefficient and flow patterns of horizontal circular plate for various Rayleigh numbers, noting surface temperature 20 p3632 A69-37523
- Gas heat transfer on turbine interblade channel surfaces and working blade end surfaces at operating Reynolds and Mach numbers 21 p3849 A69-38858
- Temperature distribution determined for leading edge, convex and concave parts of turbine blade porous wall with effusion cooling 21 p3850 A69-38860
- Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows 21 p3759 A69-39114
- Constant surface heating of half space with temperature dependent thermal conductivity 21 p3851 A69-39292
- Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation
[AIAA PAPER 69-1024] 22 p3923 A69-40394
- Stochastic model extension of interface temperature of solids in sliding contact to include transients, noting interface activities dependence 22 p3955 A69-40404
- Surface roughness effects on equilibrium temperature of isolated adiabatic plane surface illuminated by collimated and uniform solar flux 22 p4050 A69-40558
- Mars atmosphere response to surface temperature changes by radiative and convective heating, noting strong solar control of mean wind distribution 23 p4212 A69-41614
- Pyrometer for turbine rotor blades surface temperature measurement, considering purged, line-of-sight viewing tube and signal processing to reject C particles interference
[SAE PAPER 690431] 23 p4165 A69-41649
- Laminar boundary layer in steady compressible gas flow past plane wing profile, studying surface temperature and suction effects 23 p4058 A69-41709
- Temperature distribution on surfaces of close binary stars as basis for predicting variation of monochromatic reflection effect 24 p4387 A69-43350
- Natural convection local heat transfer on constant heat flux inclined surfaces for water and air in laminar, transition and turbulent regimes
[ASME PAPER 69-HT-C] 24 p4410 A69-43526

Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface
[ASME PAPER 69-HT-1] 24 p4414 A69-43564

SURFACE TENSION **U INTERFACIAL TENSION** **SURFACE TO AIR MISSILES**

Portable UHF telemetry receiving station for medium range surface-to-air missiles testing, analyzing antenna coverage over water and system prediction allowing variable parameters
23 p4122 A69-41780

SURFACE TO SURFACE MISSILES **U INTERCONTINENTAL BALLISTIC MISSILES** **U MINUTEMAN ICBM** **U POLARIS MISSILES** **U V-2 MISSILE**

SURFACE VEHICLES **NT AIRCRAFT CARRIERS** **NT CAPTURED AIR BUBBLE VEHICLES** **NT CRAWLER TRACTORS** **NT LUNAR MOBILE LABORATORIES** **NT LUNAR ROVING VEHICLES** **NT LUNAR SURFACE VEHICLES** **NT NUCLEAR POWERED SHIPS** **NT ROCKET PROPELLED SLEDS** **NT TANK TRUCKS** **NT TRUCKS** **NT WALKING MACHINES**

Time difference position determination system for space, surface and airborne vehicles, describing application to satellite navigation and air traffic control
08 p1348 A69-21066

Skirts on hovercraft, noting rough water drag, plough in and overturning, and skirt oscillation and wear problems
10 p1634 A69-23629

Ground access routes between business districts and airports compared for passenger transport modes
[AIAA PAPER 68-1072] 12 p2059 A69-26773

Time difference position determination system for space, surface and airborne vehicles, describing application to satellite navigation and air traffic control
22 p3977 A69-39874

Computer system functional requirements for autonomous Martian surface roving vehicle, emphasizing vehicle motion control system
[AIAA PAPER 69-980] 22 p3907 A69-40360

SURFACE WAVES **NT BAROCLINIC WAVES** **NT GRAVITY WAVES**

Electron plasmas near plane metallic surfaces, determining transmittance and reflectance of incident light waves and surface waves dispersion characteristics
02 p0286 A69-11788

Moving window analysis digital technique for complex seismic surface waves in presence of noise and multimode propagation
02 p0243 A69-12006

Dispersion relations of axisymmetric and dipolar surface modes propagation along inhomogeneous plasma columns on dispersion relations
02 p0289 A69-12242

Finite amplitude surface wave excitation in infinitely deep ideal fluid by moving pressure, noting phase velocity increase with amplitude
03 p0466 A69-13277

Electroacoustic amplifier based phonon devices, using surface waves on piezoelectric materials to speed radar data real time processing
03 p0394 A69-13353

Direct amplification of ultra and hypersonic surface waves in semiconducting crystals of wurtzite group, taking into account drift effects and boundary conditions
03 p0490 A69-13925

Surface impedance variation effect on surface wave propagation along rod waveguide
04 p0576 A69-14761

Surface wave stability for horizontal layer of incompressible dielectric fluid in electric field, noting viscosity effect
04 p0638 A69-15193

Surface waveguide composed of inhomogeneous dielectric thin film used as low loss transmission line
05 p0731 A69-16294

Critical electron drift velocity threshold in surface wave amplification in semiconductor in magnetic field, noting partial effect of diffusion
05 p0810 A69-16648

Bounded and spatially separated plasmas wave oscillations stability in magnetic field, observing hydrodynamic slipping and drift instability
06 p0963 A69-16903

Dispersion equation for dipolar surface waves in uniform cold lossless infinitely long magnetoplasma column in free space, obtaining numerical and asymptotic solutions
06 p0968 A69-17774

Surface wave propagation on circular plasma column moving in axial direction in free space region
06 p0968 A69-17775

Surface plasma waves excitation by light and decay into photons applied to nonradiative modes
07 p1188 A69-18278

Period fluctuations in ionospheric plasma resonance amplitude, proposing hypothesis in terms of quasi-electrostatic surface waves guided by antenna wire
07 p1125 A69-18847

Ray-optical description for point source excited surface waves in stratified anisotropic media
07 p1079 A69-18918

Boresight error in missile radome-antenna combination due to reflection and surface wave effects
07 p1111 A69-19536

Forced surface wave resonances in dielectric free 45 degree triangular grid circular waveguide phased arrays
08 p1282 A69-20038

Ray path geometry derived by Poynting vector to calculate surface fields due to creeping waves in sphere planes
08 p1274 A69-20046

Fresnel formulas for surface plasma waves excitation by light in thin metal foil embedded between dielectric layers, discussing transmissive and absorptive resonances
08 p1372 A69-20290

Interfacial charge relaxation oversteability in tangential electrical field, discussing electromechanical polarization surface waves propagation and dielectrophoretic orientation of liquids in zero gravity space
08 p1353 A69-20792

Earth upper mantle wave velocity structure based on surface wave dispersion, noting low velocity layers thickness
09 p1491 A69-22153

Microwave frequency room temperature acoustic surface wave propagation losses in lithium niobate measured by laser light deflection, discussing propagation and insertion losses
10 p1703 A69-23511

Dynamic mode electromagnetic surface waves on axially magnetized single crystalline YIG and polycrystalline ferrite rods
10 p1746 A69-23513

Slow electromagnetic wave propagation along cold collisionless cylindrical plasma in axial magnetic field, noting surface wave metamorphosis into bulk waves
10 p1739 A69-23659

Surface radio wave scattering propagating along rough surfaces, measuring emission during transformation into space waves
10 p1658 A69-23952

Computer calculated phase velocities for surface wave and waveguide modes given for circular waveguide filled with inhomogeneous electron plasma
11 p1844 A69-24437

Surface wave reflection from free ends of ideally conducting rods forming semiinfinite grid to study rod delay systems and wave-duct antennas
11 p1833 A69-24438

Parallel flow of viscous liquid film with free surface down inclined plane, noting growth of initially infinitesimal amplitude waves and finite amplitude wave stability
11 p1869 A69-24891

Surface instabilities at tangential discontinuity between media caused by beam-plasma interaction, deriving dispersion relation
11 p1931 A69-25365

TEM-DUAL surface wave propagation in coaxial cable with stratified dielectric structure to reduce attenuation calculated by addition theorem to Bessel functions
11 p1856 A69-25659

Asymptotic solution of two dimensional problem of elastic impact of bars, showing longitudinal and surface waves decay with time
11 p1996 A69-25737

Characteristic equation for corrugated surface wave line loaded with uniformly spaced thin metallic disks excited in E mode, considering spacing and groove depth
12 p2028 A69-25899

Unsteady surface and internal waves diffraction induced by source in ideal incompressible fluid, obtaining solutions in form of convolution and transfer functions
12 p2061 A69-25953

Surface wave patterns of truncated conical shape with free edges attributed to mechanical properties
12 p2178 A69-26093

Electrical equivalent circuit for piezoelectric generation and detection of transient and sinusoidal ultrasonic waves by interdigital electrodes
12 p2039 A69-26308

Surface waves effect on electromagnetic waves: coherent reflection from plasma-vacuum boundary, describing polarization and angular and spectral distributions
12 p2031 A69-26309

Visual observation of surface vibration nodal patterns by incoherent light illumination of object, noting holography
12 p2099 A69-27109

Optical surface wave propagation on thin dielectric film waveguides, noting applications to integrated optical data processors
13 p2229 A69-27609

Wave propagation on heavy fluid surface forming splashes in container with vertical walls
13 p2247 A69-27719

Plane TM surface waves supported by plane ungrounded magnetoplasma slab with magnetostatic field parallel to two parallel interfaces and perpendicular to propagation direction
13 p2308 A69-27909

Wave parameters in coupled parallel surface wave transmission lines and dielectric waveguides, discussing phase velocities and spatial beat period
13 p2223 A69-28573

MHD waves and oscillations in cylindrical plasmas column contained by longitudinal magnetic field, noting dispersion equations
14 p2489 A69-28737

Finite amplitude surface wave excitation in infinitely deep ideal fluid by moving pressure, noting phase velocity increase with amplitude
14 p2482 A69-28789

Coupled mode theory for surface wave propagation along tapered cylindrical dielectric rod, considering radiation field effects
14 p2422 A69-29559

Production method for fabricating HF surface wave interdigital electrode transducers, discussing pattern replication, etching, etc
14 p2455 A69-29573

Acoustic bulk-surface wave transducer for shear longitudinal wave transformation in nonpiezoelectric material at HF
15 p2607 A69-30169

Lagrange expansion theorem for shielded surface waves, obtaining modal functions and power flows
16 p2750 A69-31949

Electronic-ultrasonic amplifiers with external electron stream and longitudinal or surface wave studies for damping influence, deriving dispersion equation
16 p2761 A69-32069

Diffraction of axisymmetric electromagnetic wave at surface discontinuity of impedance cylinder forming core of coaxial waveguide
16 p2761 A69-32479

Surface wave study techniques, discussing digital moving window analysis of group and phase velocity and use of time variable filters
16 p2784 A69-32579

Seismic surface wave observations analyzed by applying moving window method to orthogonal detector recordings permitting lateral refraction measurement wave separation, etc
16 p2784 A69-32579

Statistical characteristics of wind wave development in initial stage, obtaining distribution functions and frequency spectrum for various velocities and temperatures
18 p3167 A69-35349

Acoustic surface waves on thin film for pulse compression radar dispersive delay line, describing delay characteristic synthesis and control
19 p3267 A69-35929

Transient phenomena in bounded dispersive medium emphasizing surface wave propagation, discussing space and surface waves excitation in bounded cold magnetoplasma
20 p3494 A69-37849

Laser profilometer to measure sea wave profile from airborne platform, describing transmitter receiver and signal processor
21 p3739 A69-39469

Coupling coefficients and excitation increment determined for nonlinear interactions of surface waves in nonisothermal semibounded plasma
22 p3990 A69-40799

Asymmetric surface waves in radial spiral structures above conducting plane, analyzing spiral thickness and plane influence on dispersion and energy characteristics

22 p3916 A69-40951

Laplace-Carson integral transforms for analyzing surface waves generated by central impact of two elastic bodies

23 p4226 A69-41702

Directional couplers applied to excitation of non-propagating surface wave antennas, examining ridge slot system

23 p4139 A69-41946

Digital analysis of surface wave observations, discussing moving window, multiple filter, multicomponent recording, time variable filtration and cross-correlation techniques

23 p4157 A69-42018

Electrode interactions effects in interdigital surface wave transducers on piezoelectric materials, using Fourier analysis

24 p4312 A69-42615

Surface wave terms found in long wavelength limit during solution of initial value problem for semiinfinite hot plasma

24 p4356 A69-43364

SURFACES

Subsonic lifting surface theory including leading edge, discussing singularities in solution of integral equation for determination of aerodynamic properties [AIAA PAPER 69-37]

06 p0865 A69-18167

Monograph on sound generation by turbulence and surfaces in arbitrary motion, discussing sound and multipole fields and governing equations

13 p2247 A69-27974

SURFACTANTS

Hyperoxia and pulmonary surfactant washout in pulmonary compliance measurements of rats subjected to 100 percent diatomic oxygen before asphyxial death

21 p3659 A69-39066

Air and saline P-V curves of rat lungs after hyperoxia, comparing hyperoxia effects to surfactant washout on pulmonary compliance

23 p4081 A69-41440

SURGERY

Visceral afferent pathways influence on vasopressin secretion, ADH levels and urinary excretory patterns of dogs during surgical stress

05 p0708 A69-15970

SURGES

Circulation, geometry and viscosity effects on speed of surge in bathtub vortex

05 p0744 A69-15718

Transformer inrush transients control by selection of core material, primary turn number and trigger circuitry

06 p0894 A69-17221

Solar flares and surges origin, discussing role of supergranular convection, field gradients and spicules

06 p0994 A69-17437

Solar disk surge distribution difference between eastern and western disk parts

06 p0995 A69-17440

Compressor surge effect on mixed compression inlet flow from numerical solution of one dimensional unsteady inviscid flow equations in variable area duct [AIAA PAPER 69-484]

16 p2841 A69-32682

Surges statistical properties observed in Sweden /1957-1967/ noting latitude distribution pattern, radio emission association, rate dependence on solar cycle, etc

18 p3204 A69-35393

SURGICAL INSTRUMENTS

Surgical radiolesion in human brain by high energy protons

03 p0374 A69-13501

SURVEILLANCE

U SPACE SURVEILLANCE [GROUND BASED]

U SPACE SURVEILLANCE [SPACEBORNE]

SURVEILLANCE RADAR

Adaptive detection mode for surveillance radar, using detection threshold proportional to spatially sampled clutter level estimates for regulation of false alarm probability

01 p0026 A69-10178

Automated real time monoradar surveillance system based on azimuthal monotonicity of radar plots and flexible tracking strategies

03 p0383 A69-12872

Listen-in feature, allowing general aviation aircraft equipment to receive airborne SSR reply signals, provides air to air proximity warning

03 p0464 A69-13247

Synchronous servomotor for parabolic antenna of surveillance radar, discussing motor size and optimum gear ratio determination

08 p1274 A69-20108

Electronic multibeam switching X band antenna system design with separate transmitting and receiving antennas for use on continuous wave surveillance radar

08 p1289 A69-20967

Airborne ILS marker beacon receivers and secondary surveillance radar transponder using microelectronic equipment, noting thermal dissipation problems [AGARDOGRAPH-114]

08 p1292 A69-20991

Digital simulation optimizing parameters of digital equipment to measure target azimuths in pulsed surveillance radar system, establishing optimum echo pulse quantization threshold

15 p2563 A69-30138

Direction finding accuracy of pulsed radar with binary-quantized detector signals, discussing azimuth minimum variance and quantization threshold optimization

15 p2566 A69-30333

Air traffic control ground equipment developments including radio direction finders, surveillance radar, interconsole marking, etc

18 p3168 A69-34806

Imaging radar applications noting military surveillance, navigation assistance, iceberg detection, sea rescue operations, all-weather traffic surveys, terrain mapping, etc

20 p3491 A69-37649

Beam shape loss /BSL/ for electronically steerable array in search mode, determining optimum search beam locations from BSL computations

20 p3506 A69-37717

Computer controlled automatic radar for survey through 360 degrees in azimuth and zero to 60 degrees in elevation

21 p3677 A69-39566

SURVEYING

U SURVEYS

SURVEYOR LUNAR PROBES

Surveyor lunar scientific payload and results, discussing TV camera, soil mechanics and surface sampler, alpha scattering instrument, small magnets and surface analysis

06 p1001 A69-17162

Surveyor scientific instruments and operation on moon, reviewing TV camera, alpha scattering instrument and surface sampler [JPL-TR-32-1358]

08 p1312 A69-19850

Surveyor electronic engineering design for lunar environment, discussing vacuum and temperature effects

11 p1958 A69-24633

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position [SMPTE PAPER 105-71]

12 p2078 A69-25771

Surveyor lunar landing procedures and results including instrumentation, lunar topography, selenology, chemical and physical properties, solar corona and earth laser output observations

15 p2681 A69-30324

Alpha-scattering experiments by Surveyor missions, studying hypothesis regarding lunar origin of eucrites and howardites

20 p3597 A69-37341

Surveyor spacecraft instrumentation, describing TV camera design and operation, photographic requirements and techniques, lunar surface characteristics, etc

22 p4011 A69-40043

Lunar surface material mechanical properties from Surveyor observations, analyzing grain size, rock density, internal friction, cohesion and bulk density compared to Luna observations

24 p4383 A69-42962

SURVEYOR PROJECT

Surveyor scientific instruments and operation on moon, reviewing TV camera, alpha scattering instrument and surface sampler [JPL-TR-32-1358]

08 p1312 A69-19850

Landing shock attenuation system for Surveyor spacecraft, describing hydraulic cylinder and piston arrangement for damping, computerized shock absorber design and landing process simulation [ASME PAPER 69-DE-54]

14 p2530 A69-28848

Spacecraft lunar observations, especially data from Surveyor landings

18 p3205 A69-35410

Surveyor thermal vacuum test data comparison with flight results indicating performance prediction reliability of earth-based tests for vacuum and lunar environments

19 p3430 A69-36016

SURVEYOR 1 LUNAR PROBE

Crater distribution and population curves for Surveyor 1 vicinity, discussing Flamsteed P ring floor characteristics

21 p3800 A69-38675

SURVEYOR 5 LUNAR PROBE

Surveyor 5 alpha particle backscattering instrument measurement, TV pictures of lunar surface elemental composition and magnetic and mechanical measurements

02 p0317 A69-12023

Magnetic experiment on Surveyor 5 revealing magnetic material presence in Mare Tranquillitatis, discussing analogy to powdered basalt

02 p0321 A69-12226

Lunar surface thermal characteristics revised from analysis of error sources in daytime lunar surface temperatures derived from Surveyor 5 compartment data [AIAA PAPER 69-594]

17 p3033 A69-33287

SURVEYOR 6 LUNAR PROBE

Surveyor 6 magnet experiment following lunar landing, noting presence of magnetic material in Sinus Medi indicating basaltic composition

02 p0317 A69-12015

Landing shock struts of Surveyor 6, emphasizing silicone liquid springs role as absorbers and stabilizers

20 p3466 A69-38180

SURVEYOR 7 LUNAR PROBE

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations [SMPTE PAPER 105-72]

12 p2078 A69-25772

Photogrammetric calibration of Surveyor 7 stereo mirror based on vector analysis [JPL-TR-32-1390]

13 p2263 A69-28199

SURVEYS

NT GEODETIC SURVEYS

Earth resources technology satellite global survey system carrying multispectral sensors in long life space platform

21 p3720 A69-38623

SURVIVAL

Survival analysis based on probability theory for design of air cushion vehicle to determine height for operating over open sea

01 p0008 A69-10027

Terrestrial microorganism survival in space aboard Gemini satellite, discussing lethal effects of solar radiation

01 p0018 A69-11087

Ionospheric and stratospheric UV radiation effects on survival of microorganisms

01 p0018 A69-11088

Mathematical model for estimating microbial survival in heat sterilization of spacecraft, including environmental and time cumulative effects

05 p0707 A69-15941

Survival and personal equipment - Conference, San Diego, October 1968

06 p0877 A69-16952

Physiological or survival training emphasizing psychological approach

06 p0879 A69-16965

Human survivability in severe light plane slow speed accidents due to stalling, turning, takeoff or approach, discussing crash load vectors and magnitude [SAE PAPER 690336]

11 p1822 A69-24492

Survival rates of continuously cultivated Chlorella plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique

22 p3876 A69-40275

Rat survival rate after prolonged gradually decreased body temperature without motion restraint or kept in fixed position

22 p3877 A69-40278

Third generation jet aircraft safety, discussing accident prevention and survival

22 p4054 A69-41142

Aircrew Arctic survival situation simulation experiments with survivors staying close to aircraft and walking across difficult terrain from emergency location

23 p4088 A69-41810

Satellite system survival probability expressed as function of launch probability, time and number of satellites available [AIAA PAPER 67-324]

24 p4249 A69-43665

SURVIVAL EQUIPMENT

Survival and personal equipment - Conference, San Diego, October 1968

06 p0877 A69-16952

Physiological approach to tests and evaluation of aviation survival equipment, noting human reactions study under extreme conditions

06 p0877 A69-16953

Automatic inflators for life jackets and survival gear in emergencies activated after submersion in water

06 p0877 A69-16955

Survival of aircrew after successful ejection over water and boarding life raft

06 p0878 A69-16958

Radar detector for survivors, using inexpensive microwave mixer detector crystal

06 p0878 A69-16964

Life raft thermal protection against exposure of aircrews to cold, noting chemically fueled heaters and IR reflective liners

06 p0883 A69-17841

Passenger and crew members escape from aircraft following water accidents, discussing ditching, evacuation, survival and rescue facilities

08 p1254 A69-20453

Insulated one man life raft for sea survival in arctic or subarctic conditions, evaluating thermal protection with endurance time and rectal temperature

12 p2020 A69-26550

Passenger safety during aircraft accidents in Arctic, discussing survival equipment and methods

23 p4107 A69-41811

Crew survival insurance under emergency situations during manned space flight, discussing Apollo abort system refinements

[AAS PAPER 69-469] 24 p4272 A69-42848

SUSCEPTIBILITY [MAGNETISM]

U MAGNETIC PERMEABILITY

SUSPENDING [HANGING]

NT MAGNETIC SUSPENSION

Sensor suspension, damping and signal readout through use of fluids with applications to rate and acceleration sensors

[AGARDGRAPH-118] 08 p1257 A69-20949

Four gimbal Cardan suspension gyroscope kinematics for nonperpendicular arrangement

09 p1502 A69-22705

Dynamic stability of double pendulum with vibrating point of suspension, obtaining differential equations of motion by Lagrange equations application in averaging method

11 p1884 A69-24768

Land gyrocompass on torsional suspensions in liquid filled chamber, considering design and operation in terms of precession theory

13 p2259 A69-27431

Stratospheric winds effect on instrument package suspended from high altitude balloon, discussing package displacements, yarn shapes and air drag characteristics

17 p2961 A69-33612

Mean drift rates of single and two rotor gyroscopic linear acceleration integrators mounted on irregularly rocking base

18 p3135 A69-34586

SUSPENDING [MIXING]

Diffusion of suspended particles in isotropic turbulence field of dispersed medium

02 p0234 A69-12579

Dielectric constants of nonconducting composite suspensions of spheres and parallel cylinders in terms of filler particles, matrix and volume fraction

13 p2287 A69-28677

Model for mixing and combustion of compressible particle laden ducted flows

[AIAA PAPER 69-460] 16 p2880 A69-32650

Turbulent process employing product constituents dilute suspensions in inert carrier/Quickmix/ to obtain solid propellant mixtures, discussing plant design and analysis, economics, etc

[AIAA PAPER 69-517] 17 p2978 A69-33033

Self ignition of solid/fluid particles suspended in gas flow, discussing heat transfer coefficient, critical temperatures, etc

17 p3070 A69-33142

SUSPENSION SYSTEMS [VEHICLES]

Rocket sled incorporating magnetic suspension system

15 p2585 A69-30361

Briteye battlefield illumination flare configuration, candle power, burn duration and hot air balloon-type suspension system

20 p3461 A69-37166

SUSPENSIONS

Flow theories of fluids with elastic deformation of substructure, treating suspensions of irregularly shaped deformable particles

05 p0752 A69-16738

Spectrum of light scattered by particles suspended in turbulent fluid

07 p1157 A69-19417

Gaseous suspensions of thermionic emitting particles assessed as MHD working fluids in large scale MHD electric power generators

10 p1738 A69-23491

Size and velocity measurements of particles suspended in gas expanding from nozzle into vacuum simulating cometary two phase flow with evaporation

10 p1674 A69-23686

Similarity solution for flow of fluid-particle suspension over disk rotating at constant velocity, solving differential equations for flow velocity distributions

11 p1867 A69-24280

Weak shock waves relaxation time and amplitude and acoustic velocity as functions of thermorelaxing media

15 p2590 A69-30103

Carrying cables shape optimization for suspended structures under load, using minimum weight criterion

18 p3212 A69-34354

Similitude applied to dynamics of disperse media, discussing role of dimensionless numbers in mechanics of suspensions and two phase flows in porous media

19 p3300 A69-36775

Heat and mass transfer in gas suspension, studying suspended particles effects on heat transfer by irreversible thermodynamics

[ASME PAPER 69-HT-34] 24 p4410 A69-43528

SUSTAINER ROCKET ENGINES

U RL-10-A-1 ENGINE

SWAGING

Extrusion variables influence on microstructure and hardness level of Ti-Al-Sn compared with recrystallization behavior after cold swaging

[ASM PAPER W9-8.2] 21 p3729 A69-38660

SWAN BANDS

Electronic transition moment for C /Swan/ bands measured in shock tube in carbon dioxide and argon mixtures

02 p0285 A69-12833

Transition probabilities for radiative lifetime of Swan and Mulliken diatomic C bands calculated from lifetime data using Franck-Condon factors

15 p2694 A69-30789

SWEAT

Thermal radiation effects on cutaneous vasomotor and sudomotor control of human organism

[AGARDGRAPH-111] 08 p1265 A69-20672

Psychological, physiological and biochemical responses to controlled diets, determining regional and total body sweat composition of men working in temperate environment

10 p1644 A69-23314

Skin temperature change rate influence on sweating in male subjects, discussing role of central thermosensitive structures

22 p3874 A69-40210

Antidiuretic hormone /ADH/ and bradykinin effects on human thermal and cholinergic sweating after subdermal injection in forearm, abdomen and leg

23 p4077 A69-41311

SWEAT COOLING

Transpiration cooling of porous flat plate by injection of carbon dioxide or air into carbon dioxide and air free streams

03 p0413 A69-12996

Dynamic processes of heat and mass transfer in transpiration cooling of gas flow

04 p0684 A69-14355

Transpiration cooling of reentry vehicle nosetips, noting two dimensional aspects of porous wall coolant flow and matrix-coolant energy exchange

[AIAA PAPER 69-96] 06 p1039 A69-18212

Transpiration air cooled blading to test and design small gas turbine at 2500 F inlet, discussing cascade and full stage component

[SAE PAPER 690035] 07 p1203 A69-18310

Transpiration cooling effect on turbine stator blade performance determined by annular cascade tests, using data to establish empirical correlation for loss coefficient

[ASME PAPER 69-GT-39] 09 p1432 A69-22487

Temperature variations at porous wall surface as function of transpiration coolant flow rate

11 p2002 A69-25334

Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation

13 p2212 A69-28628

Mode transition characteristics of free burning argon electric arc with transpiration cooled anode, noting current blowing parameter

[AIAA PAPER 69-696] 17 p3011 A69-33451

Temperature distribution determined for leading edge, convex and concave parts of turbine blade porous wall with effusion cooling

21 p3850 A69-38860

Gaseous injection effect on laminar boundary layer hypersonic flow around transpiration-cooled blunt bodies analyzed by integral method and Newtonian model

21 p3644 A69-39000

Heat transfer characteristics in evaporative, transpiration cooled porous systems

21 p3851 A69-39000

Monograph on aerodynamic studies of effusion cooled turbine blades covering turbulent boundary layers, gas turbine performance, experimental design etc

[AIAA PAPER 69-871] 21 p3786 A69-39800

Radiation equilibrium temperature measurements downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel

24 p4248 A69-43588

SWEATING

U PERSPIRATION

SWEDEN

Swedish space research report to COSPAR covering organization and publications

15 p2724 A69-31451

SWEPT ANGLE

NT LEADING EDGE SWEEP

NT SWEEPBACK

Flow through turbine stage with inclined guide vanes at moderate Mach numbers, discussing exit blade angle formula for swept cascades

15 p2547 A69-30570

Vortex breakdown on slender sharp edged and modified delta wings with varying sweep angles investigated in wind tunnel using schlieren system for flow visualization

[AIAA PAPER 69-778] 19 p3237 A69-35644

SWEPT FREQUENCY

X-band swept frequency oscillator using Gunn diode and ferrite phase shifter

05 p0734 A69-16573

Swept-frequency complex return-gain response of injection locked oscillator over locking bandwidth, detecting and correcting phase errors between injection-locked diode oscillators

07 p1100 A69-18645

Sweep frequency measuring setup for adjusting equalizers in carrier transmission systems

11 p1841 A69-25639

ISIS A satellite fixed and sweep frequency ionograms indicating electron density variations, ionospheric resonances and Cerenkov radiation

15 p2604 A69-31416

High resolution swept frequency reflectometer suitable for impedance matching in waveguides or coaxial lines

16 p2759 A69-31940

Swept frequency microwave measurements in simulated reentry environments using dielectric layers, glow discharge plasma and aperture antenna-plasma layer model

[AIAA PAPER 69-701] 17 p2920 A69-33461

Sweep frequency ionospheric topside sounder design for Alouette and ISIS satellites, discussing influence of experiment requirements and spacecraft limitation and environments

20 p3507 A69-37859

Swept frequency X band reflectometer for measuring antenna properties in simulated reentry environments

[AAS PAPER 69-282] 24 p4313 A69-42861

SWEEPBACK

NT LEADING EDGE SWEEP

Aerodynamic characteristics of delta wings for supersonic flow at large angles of attack, showing sweep back angle influence on drag coefficient

02 p0191 A69-12583

SWELLING

Seal swell prediction methods extended to include three dimensional solubility parameter concept

[ASLE PAPER 68-LC-21] 07 p1171 A69-19306

SWEPT FORWARD WINGS

U TRAPEZOIDAL WINGS

SWEPT WINGS

NT DELTA WINGS

NT TRAPEZOIDAL WINGS

Laminar flow on swept low drag suction wings at high Reynolds numbers

05 p0696 A69-15553

Visual investigation of flow field at swept wing, measuring pressure distribution at stall fence and vortices formation 06 p0858 A69-17341

Maximum downwind and crosswind vertical wind shear in boundary layer, noting effect on swept wing jet aircraft landing 06 p0951 A69-17790

Shear field pattern theory modified to apply to determination of sweptback wings, calculating stress development 10 p1801 A69-23645

Power plant installation on swept winged transport aircraft, discussing interference drag sources, high lift problems, unorthodox installations, nacelle effects, etc 17 p2898 A69-33214

Amplified boundary layer oscillations and transition at swept flat nosed wing attachment line with/without boundary layer suction analyzed by wind tunnel tests 17 p2890 A69-33251

Swept wing attachment line boundary layer, measuring skin friction in full turbulence and velocity profiles with and without trip wire 17 p2958 A69-34047

Wind tunnel tests of swept wing fighter aircraft for transonic buffet onset lift coefficient resulting from camber and leading and trailing edge deflection [AIAA PAPER 69-793] 19 p3238 A69-36297

WEPTBACK TAIL SURFACES

Mach 8 flow field effects and forces on small delta tail surfaces mounted on body of revolution at various angles of attack [AIAA PAPER 68-891] 22 p3859 A69-40539

WEPTBACK WINGS

U DELTA WINGS

U TRAPEZOIDAL WINGS

WIMMING

Telemetered heart rate response to progressively increased distance swimming competition compared with equidistance running events for change patterns, magnitude and recovery 23 p4100 A69-41444

SWINGBY TECHNIQUE

Jupiter swingby flight mode application to probe missions requiring solar polar regions overflight at close perihelion distances 19 p3401 A69-35915

Interplanetary swingby trajectory correcting maneuvers for space vehicles return to earth after planet orbiting with emphasis on singular points 19 p3427 A69-36613

Venus swingby and direct Mercury trajectories analysis for optical imaging from flyby missions [AAS PAPER 69-258] 24 p4380 A69-42860

SWIRLING

Swirl flow through single and multistage Carnot shock diffuser, analyzing relation of pressure rise and diffuser aspect ratio 02 p0230 A69-11616

Stability of inviscid swirling flow with finite axial velocity components and nonvanishing radial density gradients, noting criterion for infinitesimal disturbances 08 p1305 A69-20851

Von Karman swirling flow problem differential equations solved by extending Serrin existence theorems 14 p2432 A69-29676

Swirl decay of turbulent flow in tubes, showing decrease with increasing axial Reynolds number and independence of initial swirl angle 16 p2772 A69-32170

Monograph on turbulent isothermal swirl-free jets and turbulent swirling flames, studying mixture and propagation in free space 17 p3068 A69-32996

Flow rate of ideal fluid ejected from swirl injector taking into account radial component of flow velocity at nozzle exit 19 p3297 A69-35820

Swirl influence on choking constraint in transonic flow through nozzle throat [AIAA PAPER 68-693] 23 p4151 A69-41887

Laminar flow swirling motion in circular duct, studying separation and reversal 24 p4301 A69-43355

SWIRLING WAKES

U TURBULENT WAKES

SWITCHES

NT CAPACITANCE SWITCHES

NT CRYOTRONS

NT ELECTRIC RELAYS

NT ELECTRIC SWITCHES

NT FLUID SWITCHING ELEMENTS

NT SWITCHING CIRCUITS

NT THERMOSTATS

Automated patching system design for analog and hybrid computers to reduce number of switches required 16 p2756 A69-32551

SWITCHING

NT BEAM SWITCHING

NT MAGNETIC SWITCHING

NT MICROWAVE SWITCHING

Minimization algorithm for complex and switching functions using unique identifiers on Karnaugh map 16 p2764 A69-31710

Electrical switching in thin film arsenic selenium telluride semiconducting glass diodes, observing formation of liquid phase and conducting filaments 16 p2760 A69-32017

LF switching in wall attachment type digital fluid amplifiers, studying visual and quantitative values for switch pressure and flow as function of geometric variables [ASME PAPER 69-FLCS-31] 21 p3649 A69-38604

Time optimal control of soft spring showing switching locus changes 24 p4289 A69-42955

SWITCHING CIRCUITS

NT FLUID SWITCHING ELEMENTS

Capacitance variation in junction varactors with linear graded, abrupt and hyperabrupt junctions, storage switching diodes and storage varactors 01 p0038 A69-10168

Schmitt trigger current-voltage characteristic for determining switching behavior and switching point temperature, examining formulas and equivalent circuits 01 p0039 A69-10171

Electro-optic Q switch using lithium niobate as electro-optic material, comparing performance to conventional device using potassium deuterium phosphate 01 p0089 A69-10184

Chemical phenomena during explosions of wires in various gaseous atmospheres, using apparatus with electronic crowbar for current flow regulation 01 p0081 A69-10680

Delayed response in threshold switching from reset state in ferrite memory cores consisting of magnesium compounds [IEEE PAPER 16.4] 01 p0045 A69-10719

Semiconductor switching diode, evaluating operation with nonlinear time delay equivalent circuit 01 p0046 A69-10747

Reduction of ATR switch pulse peak in automatic frequency control system of radar station 01 p0047 A69-10784

Tunnel diode oscillations in switching mode due to sinusoidal voltage excitation, discussing critical applied signal frequency separating switching and oscillation modes 02 p0213 A69-11535

Step recovery switching silicon transistor combining planar and mesa technologies, discussing charge storage and fall times 02 p0215 A69-11937

Malfunction elimination in asynchronous fluidic switching circuit by locating static hazards 02 p0195 A69-12080

Retrodirective antenna array with switched Butler matrix feed 02 p0223 A69-12813

Laser with passive Q switching with Faraday cell switch, studying induced recombination and Mandelstam-Brillouin scattering 03 p0435 A69-12983

Analysis and design of synchronous filter compatible with microelectronics requirements, switching N monolithic RC thin film devices to signal source of resistance 03 p0403 A69-13206

Transistor-transistor logic switching circuits design for use in frequency dividers with variable division ratios in frequency processing systems 05 p0729 A69-15963

Insulated junction integrated circuit transistor operation with various terminal connections corresponding to diode switching of transistor 05 p0730 A69-16217

Gallium arsenide electro-optic switch measuring signal time response to radiation step of homogeneously broadened carbon dioxide, He and nitrogen laser amplifier 05 p0773 A69-16293

Radiation tests on Ovonic threshold switches performed with fast neutrons and broadband X rays 06 p0978 A69-16891

Semiconductor glasses use for electronic devices 06 p0980 A69-17714

Logic circuit for semiconductor current gain sensing switch 07 p1113 A69-19744

DC/AC collectorless step electric motors operation and commutation circuits 09 p1442 A69-21860

Pulse generator switch consisting of avalanche transistors in series, describing voltage production and transmission, trigger pulse jitter and pulse amplitude 09 p1468 A69-22589

Reduction of ATR switch pulse peak in automatic frequency control system of radar station 10 p1661 A69-23113

Jittering delay of triggering circuit driven by ramp signals of different finite slopes, noting tunnel diode discriminators and regenerative feedback loop circuits 11 p1858 A69-24568

Output pulse parameters of short pulse thyristor generator as function of time constant, considering rise time of switch-on process 11 p1846 A69-24615

Electrons conduction and switching in noncrystalline semiconductors, discussing localized states and thermally activated hopping 11 p1938 A69-25239

Ultrawideband DC transistor amplifier for pulsed switching circuits with subnanosecond risetimes, discussing multistages with feedback dipoles, transient response and drift problems 11 p1854 A69-25612

Antenna switch for cascading and separating RF channels of high power wideband broadcasting systems 11 p1854 A69-25617

System switch, separating RF bands according to frequency and polarization for simultaneous transmission from parabolic horn antenna 11 p1854 A69-25618

AC diode switching circuits employed as threshold elements in functional rectifiers for approximating nonlinear functions 11 p1857 A69-25717

Fabrication procedure for microwave epitaxial GaAs diodes applicable for switching purposes 12 p2035 A69-25831

Broadband plasma waveguide switch application extended to 26-40 GHz range, discussing isolation, cold loss, switching time, trigger signal and ionized plasma 12 p2036 A69-25938

P-n-p planar epitaxial germanium microwave transistor used as amplifier in 1-4 GHz range and as high speed switch, summarizing design, fabrication and characterization 12 p2037 A69-25940

Electronic switching circuits controlled by binary counter triggers for variable passband filters 12 p2040 A69-26489

Brushless DC motor with commutation control by magnetic position sensor scanned at HF 12 p2017 A69-26894

MOS unitoron switching circuit operation subjected to nonlinear load, using analytic approximations of current-voltage characteristics 13 p2234 A69-28507

Small signal transient characteristics of semiconductor diodes analyzed by charge method, studying processes during p-n junction diode switching at low currents 14 p2419 A69-28918

MOSFET/unitoron/ switching circuits classification in terms of load curve shapes obtained with different output connections of load elements 15 p2574 A69-30122

Semiconductor rectifiers economic life testing with synthetic circuits utilizing thyristor switch 15 p2579 A69-31041

High voltage thin film transistor, discussing design criteria, fabrication, I-V characteristics and switching speed 16 p2757 A69-31614

Networks of ideal inductors, capacitors and periodically operated switches with no energy loss, deriving frequency-power formulas from response functions 18 p3111 A69-34682

Photon actuated switch consisting of 10 input binary logic gate and solid state relay to reduce aerospace vehicles self generated noise 20 p3505 A69-37289

Chalcogenide semiconductor film switches time parameters, showing delay time decrement with thickness decrease and voltage increase 21 p3780 A69-39045

MSI 12 bit digital to analog converter in integrated circuit form using MOS switching circuit
[AIAA PAPER 69-968] 22 p3906 A69-40349

Duty cycle IC generator for switching regulators, discussing construction, resistive and dielectric films fabrication, applications, etc 23 p4073 A69-42293

Minimization algorithm for switching systems synthesis, describing design of mass spectrometer curve function generator and autonomous shift register 23 p4146 A69-42535

Symmetrically regulated AC/DC converters power characteristics improved by switching in phase rectifiers twice during control cycle 24 p4254 A69-42570

Nonblocking switching networks operating in ordinary and in simultaneous switching regime, including control algorithms for optimal space communication 24 p4289 A69-43138

On-off limit cycle controllers for reaction-jet controlled systems, investigating delay effects 24 p4291 A69-43271

SWITCHING FUNCTIONS U BOOLEAN FUNCTIONS

SWITCHING THEORY

AM phase locked states switching behavior of PM He-Ne lasers, considering isotope mixtures effect 20 p3552 A69-36994

Second order suboptimal control systems with time varying coefficients, calculating switching curves for quadratic cost functional 21 p3825 A69-39634

SWITZERLAND

Swiss space research report to COSPAR covering upper atmosphere studies, solar wind, etc 15 p2723 A69-31427

Automatic, semiautomatic and manually operated parachute release systems used in Switzerland 24 p4252 A69-42911

SWIVELS

Aerodynamics of flap balanced swivel airfoils, discussing lift curve slope, incidence change response and application of control forces and movements 03 p0364 A69-13908

SYMBOLIC PROGRAMMING

ASTRE programming language applicability to maximum memory information treatment in aerial navigation 03 p0401 A69-14180

Computer programming language for three dimensional geometry at symbolic level, noting use for placement problems 05 p0724 A69-16382

Specialized mathematical machine for expanding matrix determinants and solving combinatorial problems, discussing symbolic circuit 09 p1460 A69-21782

Symbolic language and assembly program for Roseau computer, discussing mnemonic code and program operation 20 p3502 A69-37397

SYMBOLS

Thermal physiology standardized symbols compilation for units of measurement 23 p4078 A69-41317

SYMMETRICAL BODIES

NT AXISYMMETRIC BODIES
NT BODIES OF REVOLUTION
NT CELESTIAL SPHERE
NT CONICAL BODIES
NT CYLINDRICAL BODIES
NT ELLIPSOIDS
NT FAIRINGS
NT LENTICULAR BODIES
NT PARABOLIC BODIES
NT POINCARÉ SPHERES
NT ROTATING CYLINDERS
NT ROTATING SPHERES
NT SLENDER CONES
NT SPHERES
NT STREAMLINED BODIES
NT TORUSES

Free transonic gas flow incident on symmetrical profile at angle of attack with given velocity at infinity calculated using difference scheme 11 p1820 A69-25469

Flexural vibrations of unstiffened doubly symmetric cylindrical tubes, obtaining natural frequencies of simply supported rectangular tube 15 p2703 A69-30210

Rayleigh criteria extension for boundary layers of rotationally symmetrical bodies with curved meridian, utilizing orthogonal coordinate system 19 p3298 A69-36309

SYMMETRY NT GAUGE INVARIANCE

Asymmetry causes on cosmogonic scale in view of symmetry in small space-time regions /microworlds/ determinable within framework of Einstein theory 14 p2516 A69-28866

Antimatter in universe, presenting arguments for microscopic and macroscopic symmetries 17 p3006 A69-33578

Two point tensor function symmetries of nonlocal cohesive finite elastic materials determined from atomic lattice theory, obtaining Green function 19 p3444 A69-36798

Transfer matrix symmetry about secondary diagonal in vibration analysis useful for computer programming 22 p4040 A69-39938

SYMPATHETIC NERVOUS SYSTEM

Pharmacological tools in autonomic nervous system research, discussing norepinephrine biosynthesis, storage, release and inactivation in mammals 02 p0200 A69-12722

Sympathetic neurohormones measurement in plasma of race car drivers 07 p1067 A69-19424

Sympathetic nerve activity inhibition due to afferent baroreceptor nerves reflexes, studying carotid sinus and aortic nerves as pathways to vasomotor center 20 p3479 A69-38073

Sympathetic nerve liberated noradrenaline increasing melatonin synthesis, using C 14 tracer for monitoring 22 p3871 A69-40051

Reflex activity of single preganglionic sympathetic fibers during coronary occlusion in cats, discussing left third thoracic /T3/ ramus communicans 23 p4084 A69-41460

Electrical stimulation effects of carotid sinus on sinus rate and atrioventricular conduction for vagi and sympathetic nerves interruption to heart in dogs 24 p4257 A69-42629

SYMPATHOMIMETICS

U ADRENERGICS

SYMPTOMS U SIGNS AND SYMPTOMS

SYNAPSES

Synaptic configurations in neuropil of planarian *Dugesia dorotocephala* brain, discussing neurotransmitters at phyletic level 16 p2741 A69-31555

SYNCHROCYCLOTRONS

Radiological properties of high energy proton beams from synchrocyclotron in tumor treatment and neurosurgery 03 p0373 A69-13495

Proton beams uniformity available at NASA synchrocyclotron designed for radiation biology research by simulating space radiation environment 05 p0742 A69-15992

600 Mev proton synchrocyclotron at Space Radiation Effects Laboratory for space radiation environment simulation, discussing beam energy spread 16 p2814 A69-32201

SYNCHRONISM

NT BIT SYNCHRONIZATION NT FREQUENCY SYNCHRONIZATION

Multiple transmission principles, examining linear systems, synchronous and asynchronous codes and channel interference 01 p0026 A69-10068

Noise resistance investigation of period synchronization systems described by Markov chains, determining phasing error for circuits 01 p0031 A69-10881

Synchronization in coded communication systems, considering phase lock loop and square wave correlation function 03 p0383 A69-12871

Adaptive processing limited memory receiver for synchronous detection of signals of unknown amplitude 03 p0400 A69-13228

Synchronization problem for quasi-harmonic oscillator with nonlinearity in form of cubic parabola, discussing existence and stability of periodic solutions 04 p0578 A69-15136

Synchronization of generators of finite dimensional forces, discussing mechanism of almost conservative dynamic objects on basis of influence matrix 05 p0793 A69-15779

High speed streak camera synchronization with shock tube process involving nonreacting gases or mixtures in pressure chamber 06 p0926 A69-17499

Beam modulation resynchronization at large signal levels by TWT circuit wave to enhance efficiency 07 p1094 A69-18422

Pulse synchronism of solid state lasers Q switched by means rotating prism, discussing pulse shifting to obtain radiation in filaments 07 p1147 A69-18488

Synchronizing ruby and Nd-glass laser pulses by means of passive bleachable dye solution liquid switch 07 p1147 A69-18530

Synchronization errors effects on performance of compression-line demodulator, increasing mean square error in measuring instantaneous frequency and locking probability 08 p1271 A69-19922

Mode locked laser operation, noting output and applications to optical communication, high speed photography, nonlinear optics and frequency standard 09 p1518 A69-22128

Simultaneous transmission of information signals and pseudonoise synchronization waveforms in common bandwidth [IEEE PAPER 67-TP-1173-COM] 10 p1655 A69-23532

Solid state synchro data interfaces for angular information, noting synchro to digital and digital to synchro conversion techniques and synchro repeaters 11 p1842 A69-24543

Worldwide clock synchronization by geostationary satellite transponder relaying VHF signals from reference clock, noting accuracy of radio propagation delay prediction 12 p2080 A69-26053

Cosmic triangulation by geometrical synchronization of astrometric satellite observation, with precise times unavailable 12 p2158 A69-26432

Noise resistance of period synchronization systems described by Markov chains, determining phasing error for circuits 12 p2031 A69-26645

Latent desynchronization, discussing life system and distortion, body rhythms coordination, circadian rhythms and adaptation to new system of time 15 p2557 A69-31457

Airborne clock used to synchronize atomic clocks at different locations, discussing equipment and error sources 17 p2975 A69-33593

Synchronization of generators of finite dimensional forces, discussing mechanism of almost conservative dynamic objects on basis of influence matrix 18 p3173 A69-35031

X ray stroboscope for moving objects in penetrating irradiation, considering synchronization of radiation receiver 18 p3138 A69-35114

Discrete information transmission synchronization in communication systems concerning optimal signal detection, HF, phase and coded synchronization, etc 18 p3104 A69-35264

Optimum power allocation for RF carrier phase error and synchronization error in two channel system 19 p3274 A69-36283

Gas laser oscillation mode selection and self synchronization based on separation in two mirror cavity with nonlinear absorption 19 p3336 A69-36355

Schwarzschild metric properties in synchronous reference system, using succession of Schwarzschild interval holonomic transformations as function of gravitational radius 22 p3982 A69-41063

Subjects confined in caves for two to six months to note physiological rhythms time evolution and associated desynchronization and resynchronization 23 p4107 A69-41818

Magnetospheric stable charged particle beams for pearl pulsations and discrete VLF radiation in geomagnetic field, attributing synchronization to space charge 23 p4206 A69-41851

Error probability bounds for self synchronized binary PSK communication systems, simulating decision feedback, phase doubling and maximum likelihood systems 23 p4128 A69-42501

SYNCHRONIZATION U SYNCHRONISM

SYNCHRONIZED OSCILLATORS

AM and FM noise in mutually synchronized oscillators 02 p0220 A69-12449

Injection phase locking for synchronizing oscillators and reducing FM noise 02 p0220 A69-12450

Direct and indirect synchronization of pulsed oscillator with interrupted synchronizing signal for spectral purity of output waveform and locking range of system
03 p0404 A69-13301

Synchronization problem for quasi-harmonic oscillator with nonlinearity in form of cubic parabola, discussing existence and stability of periodic solutions
04 p0578 A69-15136

Phase measurement using phase lock loop, voltage controlled oscillator and synchronous counter
05 p0722 A69-16766

Stable limiting cycles of laser resulting from mutual synchronization of phase shifted oscillation modes
07 p1158 A69-19752

Phase synchronized oscillators in microwave frequency multipliers with improved SNR
09 p1464 A69-22113

Sporadic noise, false fronts and other noise effects on phase of output oscillations of resonance apparatus
09 p1460 A69-22641

Two oscillator signal combiner based on mutual synchronization, providing output signal free of phase jumps or amplitude fluctuations
11 p1849 A69-24928

Tunnel diode self excited SHF oscillators synchronization, deriving single frequency generation conditions
11 p1849 A69-24955

Gunn oscillators synchronizing by injecting HF external signal, discussing oscillator fabrication techniques, phase synchronization, etc
11 p1856 A69-25636

Digital phase-shift control of locked oscillator
12 p2052 A69-26382

Pull-in oscillator for random noise coincident with synchronizing and frequency shift signals, discussing circuit parameters effect on signal discrimination and noise suppression
12 p2044 A69-27101

Frequency memory in cavity controlled Gunn oscillators, discussing loop gain and bandwidth dependence on oscillation mode and bias voltage
13 p2229 A69-27677

Synchronized backward wave oscillator transmitting tube for space communication stations
13 p2232 A69-28058

Phase and amplitude changes of arbitrary-Q self excited oscillator under external disturbance, using differential equations
13 p2300 A69-28574

Reference oscillator synchronization inaccuracy influence on SNR at output of correlation receiver during reception of signals with pseudonoise modulation
15 p2563 A69-30141

PCM oscillator synchronization system stability, considering sampled model by digital nature of equipment
15 p2565 A69-30171

Carpitron locked oscillator with wide electronic tuning range, describing CW operation characteristics and application to ground station microwave transmitters
23 p4135 A69-41302

SYNCHRONIZERS

Book on synchros application and design covering telemetry, torque and control systems, synchro circuits, resolvers as computer elements, etc
21 p3681 A69-38450

SYNCHRONOUS COMMUNICATION SATELLITES
U SYNCOM SATELLITES

SYNCHRONOUS DETECTORS
U CORRELATORS

SYNCHRONOUS METEOROLOGICAL SATELLITE

Meteorological application of ATS observations in form of time lapse movies of weather in motion, describing camera and data flow
[AIAA PAPER 68-1094] 12 p2174 A69-26804

SYNCHRONOUS MOTORS

Synchronous servomotor for parabolic antenna of surveillance radar, discussing motor size and optimum gear ratio determination
08 p1274 A69-20108

Nonstatic gyroscope nonlinear oscillations caused by swaying of synchronous gyromotor rotor
13 p2264 A69-28438

SYNCHRONOUS SATELLITES

NT EARLY BIRD SATELLITES
NT SYNCOM SATELLITES

Mechanically despun VHF antenna for spin stabilized synchronous satellites, detailing electrical and mechanical design
01 p0161 A69-10350

Geostationary satellite transmissions for educational purposes
[UN PAPER 68-95533] 01 p0028 A69-10494

Worldwide navigation system consisting of synchronous satellites equipped with pulse modulated microwave transmitters
[UN PAPER 68-95205] 01 p0113 A69-10514

Aircraft navigation using synchronous satellites based on position location by intersection of two circles with centers below satellites
01 p0114 A69-11011

Satellite communications with emphasis on European programs, discussing synchronous satellites, Europa 2 rocket and Saros and Symphonie projects
02 p0207 A69-11910

Multijet electrothermal systems for attitude control and stationkeeping of synchronous communications satellite
[AIAA PAPER 67-723] 02 p0305 A69-12375

Path length and path length rate variations in synchronous satellite communications link
04 p0561 A69-15448

Optimum spacing of communication satellites on inclined circular synchronous orbits, applying figure 8 packing schemes
04 p0562 A69-15458

Perturbations of stationary orbital vehicles of arbitrary latitude due to earth triaxiality, noting control by low thrust rocket engine
05 p0823 A69-16037

Dioscures system for international air traffic control and navigation over North Atlantic by means of two geostationary satellites
[UN PAPER 68-95832] 06 p0954 A69-17063

Active magnetic coils for attitude control of synchronous satellites by computer simulation and laboratory tests
06 p1017 A69-17944

Predictor determining future position of TDMA/Time Division Multiple Access/ synchronous satellite communications system satellite from previously received bursts
07 p1076 A69-18553

OMEGA position location equipment /OPLE/ test data to demonstrate feasibility of using OMEGA navigational system in conjunction with synchronous satellites
07 p1176 A69-19135

Channel multiplier spectrometer for low energy electrons and protons at synchronous altitude on ATS-E satellite
[IEEE PAPER 3C-5] 07 p1135 A69-19199

Synchronous orbit attainment with continuous electric propulsion, noting payload ratio dependence on various parameters and changing orbit inclination
[AIAA PAPER 69-275] 09 p1586 A69-21265

Orbiting Data Relay Network communications system provides continuous wideband communication between ground and earth orbiting spacecraft via synchronous satellite repeaters
[AIAA PAPER 68-432] 09 p1455 A69-21989

Scintillation fading of VHF beacons on synchronous satellites, noting amplitude fluctuation depth and rate
09 p1457 A69-22461

Synchronous and near synchronous satellites for communication systems, discussing stationkeeping and low thrust propulsion
09 p1458 A69-22468

TV broadcasting from synchronous satellites direct to ordinary UHF receivers in 1980s
11 p1833 A69-24529

Cosmic ray cut-off energy for synchronous satellites computed by trajectory tracing method using magnetospheric model
11 p1949 A69-24860

Worldwide clock synchronization by geostationary satellite transponder relaying VHF signals from reference clock, noting accuracy of radio propagation delay prediction
12 p2080 A69-26053

Antenna circular array for synchronous communications satellites, discussing directional patterns, super-gain ratio, element spacing, etc
13 p2225 A69-27184

Synchronous satellite TV broadcasting systems in UK, discussing equipment, transmission problems and economic factors
13 p2220 A69-27830

First order secular and aperiodic perturbations in Keplerian orbital elements of synchronous satellite due to earth gravitational field eccentricity
14 p2521 A69-29466

Satellite space navigation system providing three component position in geodetic coordinates instantly and accurately on or near earth
15 p2650 A69-30088

Satellite orbits obtained by tracking by synchronous satellites, discussing accuracy for low altitude satellites
15 p2698 A69-31340

Dioscures project for worldwide telecommunications, air traffic control and navigation by satellites, discussing technical, operational and economic characteristics
16 p2749 A69-31601

Electrically propelled TV satellite control maneuvers to reach target position in synchronous circular orbit from spiral ascent trajectory
16 p2868 A69-31935

Ion propulsion applied to geostationary satellites attitude control, discussing thrust levels, cesium ionization, colloidal propulsion, etc
16 p2837 A69-32068

Europa 3 rocket design, comparing 2 ton geostationary satellites and 700 kg satellite conceptions
17 p3045 A69-33095

Orbital and attitude control tests for PAS /two stage perigee-apogee synchronous satellite/ in conjunction with booster Europa 2, discussing functional configuration
17 p3048 A69-33238

Microthrusters thrust requirements for attitude control and orbital transfer of gravity gradient geostationary satellite
17 p3019 A69-33336

Solar cell radiation damage during 416.8 days in synchronous orbit on satellite ATS 1, discussing radiation shields
19 p3253 A69-35704

Feasibility of automatic stationkeeping for synchronous satellites by using solar sailing techniques and low thrust systems
[AAS PAPER 68-151] 19 p3429 A69-35950

Educational TV coverage extension via synchronous satellites to areas of limited coverage, emphasizing South American countries
19 p3268 A69-36163

Nationwide TV system using synchronous communication satellite proposed for India, discussing antenna, modulation, multiplexed channels and educational aspects
19 p3275 A69-36413

Stationkeeping motion effect on synchronous satellite orbit determination accuracy analyzed by two dimensional model, finding position uncertainty
20 p3595 A69-37218

Satellite tracking and orbit determination accuracy for system of two synchronous geostationary satellites
[AIAA PAPER 68-449] 21 p3674 A69-39019

Doppler tracking of near synchronous DODGE satellite from single frequency data, noting error sources
[AAS PAPER 68-128] 21 p3674 A69-39202

Automatic stationkeeping /geosynchronization/ for maintaining satellite in circular synchronous orbit at all geocentric longitudes for prolonged time with low fuel consumption
21 p3805 A69-39213

Near equatorial near synchronous satellite orbits determined by supplementing spherical harmonics representation of earth gravitational field with polynomial force model representation
[AAS PAPER 68-141] 21 p3806 A69-39234

Sun-moon short term disturbances effect on synchronous equatorial navigation satellite orbits, noting fuel expenditure
[AIAA PAPER 69-927] 21 p3761 A69-39356

Electromagnetic attitude control system for Lincoln Experimental Satellite 5 in near-synchronous equatorial orbit, noting onboard error detection in closed control loop
21 p3827 A69-39755

Particles integral and differential fluxes spectral distribution calculation for determining radiation load for synchronous satellite
22 p4035 A69-39909

Synchronous communications satellite launch constraints for fixed time or node, noting application to IDCSP/A mission and sun angle, occultation and transfer orbit
[AIAA PAPER 68-445] 22 p4036 A69-40543

Spacecraft phase array designed for use on synchronous communication satellite, discussing low structural weight packaging and unfurling problems and helix approach
22 p3915 A69-40705

Aperture efficiency, weight and control power requirements for hybrid matrix arrays in synchronous satellite applications, calculating residual array gains
22 p3915 A69-40707

Worldwide communication system via synchronous satellites for aeronautical, maritime and land mobile services

23 p4114 A69-41355

Tracking and Data Relay Satellite System with synchronous orbit satellites to relay data between low altitude earth orbital spacecraft and mission control centers

23 p4120 A69-41755

RFI effects of earth based emitters on operation of geosynchronous satellites for data relay from near earth orbiting satellites, noting frequency assignments

23 p4120 A69-41757

Liquid fuel propulsion systems for geostationary satellites, discussing transfer orbits, payload increase and required thrust for various satellite trajectories [DGLR-69-014]

23 p4202 A69-41929

Aircraft navigation by geostationary satellites, discussing Dioscures project

24 p4280 A69-42568

Remote manipulator spacecraft system for refurbishing synchronous communication satellite, emphasizing compatibility with standard shroud Titan 3C launch vehicle

24 p4297 A69-43041

SYNCHROTRON NOISE

U ELECTROMAGNETIC NOISE

SYNCHROTRON RADIATION

Power radiated in magnetoionic mode by electron spiraling in magnetoplasma

02 p0309 A69-12720

Type 4 bursts mobile spectrum of september 14, 1966 interpreted by considering plasma effects on synchrotron emission mechanism

02 p0309 A69-12754

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons

03 p0500 A69-13079

Synchrotron radiation excitation in system of relativistic monoenergetic electrons rotating in cold magnetoactive plasma

03 p0476 A69-13383

Radiation intensity from system of monoenergetic relativistic electrons in plasma, discussing maser effect in coherent synchrotron radiation

03 p0500 A69-13407

Ionized medium effect on polarization of synchrotron radiation from monoenergetic distribution of electrons

04 p0648 A69-14420

Gyro synchrotron emission spectrum and intensity from energetic solar electrons radiating in coronal magnetic fields applied to type IV solar radio bursts

04 p0650 A69-15529

Magnetobremstrahlung /synchrotron/ and Compton radiation of ultrarelativistic particles, radiation reabsorption and magnetic field measurement

06 p0962 A69-17245

Synchrotron radiation from trapped high energy electrons in Van Allen belt

06 p0992 A69-17324

Particle flux and dose rates in Jupiter Van Allen belts based on assumed synchrotron radiation from trapped electrons in dipole magnetic field

[AIAA PAPER 69-18]

06 p0997 A69-18129

Monoenergetic relativistic electrons stream gyrating along cold magnetoactive plasma with pitch angle radiatively unstable with respect to synchrotron radiation

07 p1191 A69-18958

Synchrotron radiation from relativistic electrons in magnetosphere, calculating variation with frequency and height of lines of force

08 p1306 A69-20182

Solar moving type 4 burst emitting synchrotron radiation, noting electron acceleration in collisionless shock wave in corona

09 p1578 A69-22058

Synchrotron and X ray emission generation from upper chromosphere electrons during solar flares

09 p1580 A69-22203

Incoherent synchrotron radiation by relativistic electrons gyrating in cold magnetoactive plasma rederived, correcting errors

10 p1741 A69-23858

Synchrotron radiation amplification by monoenergetic electron stream helically gyrating in static magnetic field of cold plasma, discussing amplification rate frequency dependence

11 p1931 A69-25361

Frequency spectrum, time variations and polarization of source of synchrotron radio emission with ex-

panding components flying apart at relativistic velocities

12 p2155 A69-26207

RF synchrotron radiation emitted by electrons trapped in geomagnetic fields above auroral zones, discussing electron flux and cosmic background

12 p2151 A69-26949

Io as unipolar inductor, analyzing interaction with Jupiter magnetosphere and decimetric synchrotron radiation

13 p2337 A69-27552

Radiative relaxation of relativistic particle distribution undergoing synchrotron radiation and reabsorption, discussing self absorbed radio source model

13 p2327 A69-27572

Synchrotron spectrum radiated by relativistic electrons below Razin cut-off, considering relation to radio spectra curvature of variable extragalactic sources

13 p2339 A69-27573

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics

13 p2315 A69-28451

Radio galaxies and quasars X ray emissions, calculating radiation fluxes produced by scattering of synchrotron radiation quanta at relativistic electrons

14 p2509 A69-28761

Radio noise of auroral origin analyzed from Northern and Southern Hemisphere reports indicating correlation with auroras, magnetic activity, sunspot cycles and synchrotron radiation

14 p2411 A69-29108

Synchrotron radiation and reabsorption theories

15 p2674 A69-30421

Electron energy distribution determination from electron synchrotron radiation spectrum for various magnetic field configurations within radio source

15 p2655 A69-30546

RF synchrotron emission from electrons trapped in earth magnetic field observed by satellite, using magnetospheric environment model

18 p3128 A69-34948

Ultrarelativistic electron acceleration in Crab Nebula maintaining synchrotron spectrum, obtaining power from compressional motion damping, gyrorotation effect and pitch angle anisotropy removal

19 p3424 A69-36336

Radio emission from Sco XR-1 shown as synchrotron radiation of relativistic electrons in low density region surrounding denser core producing X ray

20 p3597 A69-37334

Synchrotron radiation and reabsorption for rapidly moving cloud of relativistic particles, considering errors

21 p3772 A69-39513

Synchrotron radiation HF cut-off resulting from electrons with anisotropic pitch angle distribution for type IV solar radio bursts

22 p4006 A69-40577

Pitch angle distribution of cosmic ray electrons in decreasing magnetic field for waves in ionized plasma, noting anisotropy due to synchrotron radiation

22 p4006 A69-40642

Type II and type III solar radio burst relation to plasma instability associated with coherent synchrotron deceleration of electrons, discussing resonant power exchange

22 p4007 A69-40898

SYNCHROTRONS

UHF high power klystron for DESY synchrotron, discussing design, short circuited load operation, phase variations and optimum RF outputs

07 p1096 A69-18434

SYNCOM SATELLITES

NT EARLY BIRD SATELLITES

Attitude determination and hydrogen peroxide control system for spacecraft orientation in Syncom, Early Bird and ATS

[AIAA PAPER 67-532]

09 p1610 A69-21988

Solar thermal vacuum test for space flight qualification of military spin stabilized synchronous orbit communications satellite

15 p2587 A69-30391

Geostationary satellite TV broadcasting to small contiguous areas with separate programs, discussing communication distribution problems

22 p3902 A69-41252

SYNDROMES

U SIGNS AND SYMPTOMS

SYNOPTIC MEASUREMENT

Synoptic observations of F 2 layer in magnetically conjugate regions, comparing critical frequencies

06 p0919 A69-17723

Synoptic charts of chromosphere, giving position and magnitude of sunspots, faculae and prominences during synodic revolution of sun

08 p1379 A69-20391

Solar magnetic fields distribution regularity with autocorrelation analysis of magnetic synoptic charts

08 p1394 A69-20391

Synoptic criteria combined with qualitative criteria for CAT diagnostics from analysis of turbulent zones responsible for bumpiness in upper troposphere

14 p2474 A69-29771

Relation between radar echoes spatial extent and synoptic conditions with reference to various forms of weather significance for aviation

14 p2474 A69-29771

Cosmic ray observations on synoptic scale, discussing equipment and programs of IQSY world array of monitor stations

15 p2673 A69-30001

Synoptic observations of F 2 region in magnetically conjugate regions of Kerguelen and Archangel, comparing critical frequencies during magnetic and ionospheric disturbances

16 p2784 A69-32619

Horizontal and vertical ozone distributions synoptic study, comparing soundings made on both sides of Atlantic

16 p2786 A69-32623

Synoptic study of worldwide VLF electromagnetic wave fields distribution above ionosphere from Ariel observations

21 p3717 A69-39261

Synoptic remote sensing oceanography from shipboard aircraft and spaceborne platform, discussing fisheries [AAS PAPER 69-062]

24 p4307 A69-42821

SYNOPTIC METEOROLOGY

Meteorological rocket soundings and global synoptic observations, noting influence of atmospheric middle region

[UN PAPER 68-95405]

01 p0109 A69-10488

Passive and active transmitters and receivers of electromagnetic radiation in earth orbital satellites to collect pictorial or numerical data to study hydrology [UN PAPER 68-95333]

01 p0064 A69-10488

Meteorological satellite observations value to Southern Hemisphere [UN PAPER 68-95213]

01 p0109 A69-10511

Satellites use in French space meteorology, discussing evolution, achievements, Eole project, etc.

02 p0275 A69-11911

Meteorological satellites for atmospheric data collection applicable to weather forecasting and synoptic analysis

02 p0277 A69-12771

NOMAD buoy telemetry system for synoptic oceanographic and meteorological data, using digital processing and dual frequency transmissions

03 p0391 A69-13221

Synoptic density maps for postreentry altitude derived from constant pressure charts and horizontal gradients

04 p0626 A69-14901

Interpretation technique for weather satellite photographs of spatially coherent cloud distributions

04 p0628 A69-15091

COSPAR manual on stratospheric temperature and wind measurements, discussing synoptic and time variation study by Arcas and Loki-Judi meteorological sounding rocket systems

05 p0752 A69-15701

Meteorological satellites in weather forecasting, contrasting satellite data continuity to discreteness of synoptic charts

[UN PAPER 68-95760]

06 p0949 A69-17031

Weather forecasting using statistical technique and Subsynchronous Advection Model of Weather Bureau, discussing mathematical background for various early morning predictions

08 p1345 A69-20291

Synoptic meteorological predictions using statistical dynamic approach, considering probability distributions and nocturnal temperature decay

08 p1345 A69-20301

Computerized objective analysis of meteorological variables based on weight determination involving autocorrelations

08 p1345 A69-20301

Synoptic process predictability, discussing forecasting of large and small scale processes by mathematical formulas and statistical description

12 p2126 A69-26571

Earth TV pictures from Molniya 1 communication satellite, showing advantages of high orbit over low

- orbit photography for global weather analysis and forecasting
13 p2292 A69-27729
- Mean seasonal atmospheric and synoptic circulation types examined by criterion for identifying analog types
13 p2295 A69-28652
- Satellite radiation maps for synoptic analysis regarding world weather maps, discussing front, intertropical convergence zones and typhoon location
14 p2473 A69-29729
- Flight regularity and safety in complex meteorological situations, noting synoptic forecasting advantages over inertial forecasting
14 p2475 A69-29740
- Time spectra of wind velocity, temperature, pressure and turbulent heat transfer and momentum in synoptic region
14 p2476 A69-29823
- Synoptic meteorological conditions effect on stellar images vibration and on relationship between vibration and zenith distance
15 p2647 A69-30164
- Ozone soundings data obtained over Australia and Colorado to obtain vertical picture of synoptic climatology of ozone at midlatitudes
15 p2649 A69-30898
- Alpine effects on wind field at synoptic scale using potential-vorticity equation, discussing deflection angle dependence on potential temperature distribution
15 p2650 A69-31445
- Air motion and precipitation patterns in travelling wave depression, considering Doppler radar data, rainfall rates, orographic influences, etc
18 p3166 A69-34419
- Classification of synoptic processes, discussing condensation of parameters characterizing state of atmosphere
18 p3166 A69-34815
- Satellite synoptic meteorological data collection systems, discussing configurations, global location requirements and digital code platforms position determination [AIAA PAPER 68-1095]
21 p3819 A69-39029
- Soviet book on synoptic climatological and heliogeophysical long term weather forecasts, discussing monthly and seasonal anomalies, sun-earth interrelations, solar corpuscular elements, etc
21 p3759 A69-39523
- Radiative cooling models for various midlatitude synoptic features, including stationary front and cyclones
24 p4343 A69-43064
- SYNTHESIS**
- Element synthesis in stars of galactic halo as possible explanation for heavy elements presence in supermassive objects
07 p1219 A69-19296
- Synthetic lubricants characteristics and aircraft applications, describing common products and properties
18 p3163 A69-35481
- Tryptic pentapeptide Asp-Glu-Leu-Thr-Lys synthesis showing relation to Gm/a/ antigen of human gamma g-globulin
24 p4279 A69-42712
- Synthesis of second order nonlinear differential equations reducible to linear third order equations for application to vibrations field
24 p4342 A69-43702
- SYNTHESIZERS**
- U CHEMICAL REACTORS
- SYNTHETIC ARRAYS**
- Analysis and optimization of side-looking synthetic aperture radars carried out for resolution, SNR and least squares estimation of target field
08 p1277 A69-20960
- Mechanical collimator using random aperture arrays for celestial observation at extreme UV and X rays
19 p3313 A69-36489
- Phase error in synthetic aperture radar, discussing tolerance level, sources classification and effect on average response, resolution and ambiguity function
20 p3490 A69-37642
- Synthetic aperture radio telescopes analysis, noting resolution and sensitivity at radio wavelengths for correlator array in supersynthesis mode operation
21 p3677 A69-39512
- SYNTHETIC FIBERS**
- NT DACRON [TRADEMARK]
NT GLASS FIBERS
- Transversely isotropic elastic solid approximation for oriented fibers of polyethylene, nylon, polyethylene terephthalate and polypropylene, measuring elastic compliances
09 p1528 A69-21504
- Book on ceramic fibers and fibrous composite materials as structural reinforcements covering dynamic testing of fine filaments and whiskers, material characterization, etc
12 p2118 A69-26340
- Fiber polymer composite flexible insulating materials properties and applications stressing synthetic organic fibers
13 p2286 A69-27989
- Carbon fiber reinforced plastics properties improvement by applying organosilanes, discussing silanol bond formation
16 p2803 A69-31806
- Silicon nitride staple fibers synthesis, development and characterization, noting tensile strength and sonic modulus
19 p3354 A69-35517
- Flame resistant organic fiber in cross linked polymer structure, discussing properties and aerospace applications
24 p4337 A69-43424
- SYNTHETIC RESINS**
- NT ACRYLIC RESINS
NT EPOXY RESINS
NT PHENOLIC RESINS
NT POLYAMIDE RESINS
NT POLYESTER RESINS
NT POLYMETHYL METHACRYLATE
NT THERMOPLASTIC RESINS
NT THERMOSETTING RESINS
- Mechanical behavior of synthetic layer coatings for damping instrumental vibration and noise
01 p0168 A69-10399
- Polyfluoroethylene resin breakdown under uniaxial tension, considering continuity disruption
13 p2286 A69-28321
- Resin impregnated fiber reinforced expandable structures used for automatic cure or rigidizing in space and initially small compact packages on earth
19 p3433 A69-35585
- SYNTHETIC RUBBERS**
- U ELASTOMERS
U STYROFOAM [TRADEMARK]
U THIOPLASTICS
- SYSTEM FAILURES**
- Survival analysis based on probability theory for design of air cushion vehicle to determine height for operating over open sea
01 p0008 A69-10027
- Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
01 p0085 A69-10210
- Mathematical model constructed for behavior of multicomponent system subject to cannibalization
01 p0086 A69-10651
- Guaranteed estimations of system reliability for systems with incomplete element reliability data
02 p0251 A69-11652
- Book on laws of failures in technical equipment with emphasis on quantitative description and practicality of reliability theory, discussing redundancy problems
03 p0433 A69-13009
- Reliability system design, emphasizing circuit design analysis, failure drifts and component failure modes by use of computer programs [ECAP, CIRC and IMAG]
04 p0608 A69-15224
- Dual processor checkout system providing isolation of malfunctioning unit from memory and ensuring decision making by operative unit
04 p0568 A69-15361
- Threshold failure levels of semiconductor diodes and transistors due to pulse voltages
06 p0977 A69-16883
- Mechanical, electromagnetic and chemical signatures monitoring and analysis during system operation
06 p0932 A69-17875
- System safety analysis for V/STOL aircraft, discussing fault-tree technique role in fail-safe design [AIAA PAPER 69-216]
07 p1056 A69-19575
- Operational reliability of manual and automatic flight control systems and components and current safety standards
08 p1255 A69-20720
- Postselection estimation of component reliability in multicomponent systems, considering cases of binomial and exponential distributions of random variables
08 p1322 A69-21099
- Computerized simulation of time dependent reliability of multicomponent system based on statistical model of component breakdown
08 p1277 A69-21100
- Computer programs for systems statistical reliability characteristics using reliability tests and time to failure data, giving optimal breakdown probability functions
08 p1322 A69-21101
- Reliability of individual components of multicomponent systems under variable loads, using asymptotic distribution of minimal values
08 p1322 A69-21103
- Failure distribution functions based on Eyring component aging model, including failure probability density function for Weibull and gamma type distributions
08 p1322 A69-21104
- Catastrophic failures in logic circuit and system design, considering thermal effects, complexity, statistical methods and computer use
08 p1299 A69-21107
- Reliability terms for electrical apparatus, equipment and systems, indicating need for international standardization
08 p1292 A69-21108
- Electronic components reliability tests, determining correlation between material quality and failure
08 p1293 A69-21109
- Failure mechanisms in semiconductor, discussing imperfections, fabrication errors and electrical, thermal and mechanical stresses
08 p1294 A69-21117
- Automatic transistor reliability testing system based on measured data and reliability research
08 p1294 A69-21119
- Bayesian reliability growth model with random variable parameters, discussing multimode failures
09 p1504 A69-21912
- Stochastic model for calculating expected component failures in transient state from Weibull distribution failure data for first generation
09 p1504 A69-22149
- Onboard test and fault isolation design for airborne systems considering tradeoff parameters for optimum reliability, performance and cost [AIAA PAPER 69-306]
09 p1434 A69-22389
- Algorithm in fault detection and isolation, discussing test optimization for complex systems or structures subject to failure
10 p1698 A69-22978
- Symptom pattern observation technique for flight data analysis, discussing in-flight symptoms and SPOT chart in aircraft maintenance
10 p1669 A69-22982
- Reliability characteristics of service life determination, noting exponential distribution of failure time value
10 p1662 A69-23319
- Microwave tube development, discussing cold cathodes, ferrite and semiconductor integration into tubes, tube failure physics, etc
11 p1847 A69-24745
- Optimization of control systems with allowance for failures of elements in parallel operation, noting application to vehicle with clustered propulsion system
11 p1966 A69-25331
- Computer programs for linear systems fault isolation, discussing technique theory and limitations
12 p2040 A69-26568
- Probability analysis by methods simplifying calculations or providing bounds on reliability of complex system
12 p2103 A69-26751
- Transistorized amplifiers reliability estimated from step by step failures during operation in intense external environment
12 p2043 A69-26886
- Procedures and facilities applicable to sonic environmental testing of flight vehicles, discussing sonic energy sources in vehicles and potential failure modes
12 p2060 A69-26939
- Failure engineering analysis of electromechanical switching devices, discussing preanalysis planning, open-ended data sheets, etc
13 p2231 A69-28043
- Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
14 p2453 A69-28747
- Reliability and efficiency improvements for thermionic converters at JPL, giving failures analyses
14 p2397 A69-29175
- Thermionic converter components reliability under mechanical load and failure models, showing probabilistic nature of failures
14 p2400 A69-29227
- Electronic systems packaging substitution method for optimized malfunction isolation at succeeding levels to final discard-at-failure
14 p2420 A69-29494
- Electronic components reliability by failure rates and drift behavior, assuming probabilities product rule and exponential law of life distribution
15 p2626 A69-30835

Complex systems reliability, describing uses of computer programs in analysis of circuit design, component failure modes and faults due to drifts

15 p2572 A69-31042

Research and development planning and control models based on subjective probability estimates for failing projects identification

15 p2721 A69-31072

Arbitrary single gate failures diagnosis in combinational logic circuits not requiring fault table construction

15 p2583 A69-31112

Military systems trouble documentation and evaluation, emphasizing computerized monitoring of reliability and maintainability

15 p2722 A69-31121

Similarity between semiconductor discrete devices and integrated circuits, considering materials, processing and failure modes

15 p2580 A69-31128

Long life repairable equipment reliability and mean time between failure with limited life components and material in normal life maintenance environment

15 p2581 A69-31134

Metal oxide semiconductor integrated circuits, showing failure rates and degradation causes

16 p2759 A69-31851

Large scale integrated circuits reliability with emphasis on multilayer metalization, designing test vehicles for failure mechanisms

17 p2935 A69-32887

Automatically controlled dynamic systems reliability estimation in terms of failure probability illustrated with autopilot-aircraft case

17 p3001 A69-33144

Airborne electric power systems maintenance aids, describing design and operation of annunciator for establishment and display of system failure causes

17 p2905 A69-34112

System state phase modeling as method for evaluating safety and reliability by analysis of system states in mission phases through logic diagram

18 p3142 A69-34480

Steady state availability of system with limited repairable spares for online units, considering statistical dependence among similar units

18 p3144 A69-34493

Avionic subsystems warranty costs estimates, considering reliability prediction and hardware recycling

18 p3232 A69-34506

Reliability demonstration by MIL-STD-781 for equipment failure and success, proposing useful alternatives

18 p3145 A69-34507

Failure detection methods, discussing percent checkout, failure sensitivity, undetectable failures, etc

18 p3146 A69-34511

Lunar Orbiter Parts Program for selection and control of electronic and electrical parts, discussing reliability and flight failures

18 p3207 A69-34520

Reliability block diagrams for laser systems, discussing failure modes of solid state, semiconductor and gas lasers

18 p3151 A69-34523

System reliability with allowable downtime, calculating probability of on-line units staying operational during mission time using conditional availability

19 p3326 A69-36002

Integrated test program based on mission requirements, failure mode and effects analysis with feedback from testing to design and development functions

19 p3327 A69-36014

Hydraulic systems incipient failure detection, discussing destructive cavitation, component defects, human error, etc

19 p3255 A69-36018

Failure data role in management of launch operations reliability program

19 p3294 A69-36022

Availability measure defined in terms of maintenance demand rate and mean downtime for cost prediction involving various parameters

19 p3327 A69-36036

Aircraft structures design, discussing reinforced sandwiches and composites, failure mechanisms, non-destructive testing and fabrication

19 p3438 A69-36325

Soviet book on fluid contamination influence on aircraft hydraulic systems operational reliability covering friction, particle size, filtration, etc

21 p3649 A69-39530

Performance prediction of terrestrial communication system based on experimental radio and

meteorological program at 11 GHz, discussing transmission loss

22 p3900 A69-40680

Summation methods for multiple damages caused by static fatigue in glass fiber reinforced plastics under stepwise loads

22 p3974 A69-40748

Liapunov stochastic stability direct method analog used for estimating reliability of redundant systems with constant recovery time

23 p4144 A69-41953

Hot spot failure modes in solar cell arrays noting protection through I-V characteristic control

23 p4142 A69-42273

Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling

23 p4070 A69-42274

Space vehicle flight performance of Ni-Cd batteries noting reliability, consistency and predictability

23 p4072 A69-42285

NDT techniques relation to engineering design problems with failure potential, discussing management planning and cost analysis

24 p4318 A69-42769

Automatic system failure sequence statistical analysis, considering randomly time variable external effects

24 p4289 A69-42953

Aerospace systems failures caused by stress corrosion, fatigue, overload, improper designing or inadequate processing control

24 p4323 A69-43428

SYSTEM LIFE

U RELIABILITY

SYSTEMIZATION

U SYSTEMS ENGINEERING

SYSTEMS ANALYSIS

Multilevel optimization techniques for dynamic systems control evaluated, developing second level Newton-Raphson controller

01 p0051 A69-10440

Theory for stability of steady motions of system with cyclic coordinates applicable to total damping

01 p0151 A69-10567

Soviet collection of articles on analysis and synthesis of automatic control systems

01 p0051 A69-10793

Comparative analysis of variable structure adaptive systems and time optimal system for control of plant described by differential equation

01 p0052 A69-10795

Determination of plant differential equation from time characteristics

01 p0053 A69-10804

Random order linear homing systems analyzed by frequency methods employing method of proportional navigation, noting use of transfer functions

01 p0113 A69-10805

Spacecraft voltage-limited charging system for sealed secondary batteries, discussing operating characteristics and battery parameters

01 p0013 A69-11010

Modal substitution method for free vibration analysis of large discrete undamped dynamic systems

02 p0338 A69-11747

Rotational motion of system of particles related to existence of reference frame to eliminate coupling terms between internal and rotational motion

02 p0280 A69-11867

Matrix transformation applications in dynamic system theory and stability test

02 p0281 A69-11943

Off-axis circle criterion for frequency domain stability of feedback systems with single monotonic nonlinearity, noting relation to Popov criterion

02 p0225 A69-11969

Linear filter performance degradation due to modeling error in estimate of state vector of stochastic linear dynamic systems

02 p0225 A69-11971

Pulse transfer function estimation for single input and output linear stationary discrete systems using iterative algorithm and quasi-linearization method

02 p0225 A69-11972

Higher order differential operators description and derivation of analytical mechanics for holonomic and nonholonomic systems and impact phenomena

02 p0281 A69-12199

Book on dynamics of linear and nonlinear systems covering mathematical methods for control system design

02 p0225 A69-12228

Frequency of periodic solutions of autonomous nonlinear systems determined by method using Duffing approximation

02 p0348 A69-12612

Stability properties of discrete-continuous feedback control systems with signal dependent sampling

02 p0226 A69-12734

Statistical analysis of unsteady dynamic systems describable by unstable differential equations containing random parameters

03 p0408 A69-12940

Tracking conditions for observability of nonlinear controlled systems with smooth characteristics

03 p0409 A69-13061

Tracking breakdown probability during unsteady operation of nonlinear automatic control systems analyzed by statistical linearization techniques and Fokker-Planck equation

03 p0409 A69-13070

Statistical linearization coefficients for arbitrary nonlinearities in automatic control systems via techniques applying characteristic functions

03 p0409 A69-13071

Plant identification procedures by stepwise approximation and least squares methods

03 p0409 A69-13072

Systems analysis application to determination of C-5 effectiveness noting loading, productivity and effectiveness analysis computer programs [SAE PAPER 680729]

03 p0379 A69-13440

Nonlinear system on-line identification in presence of noise, using stochastic methods and analog equipment

03 p0401 A69-13764

Low visibility aircraft landing, discussing total system approach, modern electronic developments, collision avoidance, safety and air traffic control

03 p0465 A69-13853

Synthesis of optimal second order systems with linear control

03 p0410 A69-13864

Systems analysis in aerospace engineering by adding motion pictures and TV techniques [SMPT PAPER 104-17]

04 p0596 A69-14359

Collection of papers on engineering applications of digital computers, examining programming, numerical methods and design and simulation problems

04 p0563 A69-14514

Multivariable automatic control systems stability, discussing applicability of Nyquist theorem and alternate frequency criterion

04 p0581 A69-14601

Invariance principle application in gyrostabilizer systems, noting effect of external disturbances and system noise

04 p0597 A69-14603

Stability of nonlinear time varying feedback systems, using passive operator technique

04 p0583 A69-15110

Quadratic control problem with energy constraint, discussing approximate solutions for application to optimal control

04 p0583 A69-15111

Global and nonglobal stability of continuous systems with multiplicative feedback

04 p0583 A69-15112

AN/TSC-54 military satellite communications terminal for contingency deployment, discussing design, system tradeoffs and performance [AIAA PAPER 68-439]

04 p0579 A69-15367

Defect localization in complex plants applied to damage cause determination and economic criteria

05 p0767 A69-15765

Equations of motion of nonholonomic mechanical systems in Poincare-Chetaev variables

05 p0793 A69-15778

Stabilization of steady motions of nonlinear controlled systems with two purely imaginary roots, using Liapunov stability theory

05 p0794 A69-15790

Nonlinear system identification by learning model, assuming discrete on-line operation and Hammerstein form

05 p0737 A69-15805

Stability theorems for discrete linear circulatory systems with N degrees of freedom for static and dynamic loss of stability in presence of velocity dependent forces

05 p0836 A69-15875

Fluidic component descriptions and systems synthesis, discussing mathematical, graphical and linear models

05 p0705 A69-16007

- Identification of nonlinear control systems, determining nonlinearities in differential equation by curve fit or iteration method
[ASME PAPER 68-WA/AUT-19] 05 p0738 A69-16173
- Analytical measure of quality of controllability for linear dynamic system and computational procedure for maximizing adjustable structural parameters
[ASME PAPER 68-WA/AUT-4] 05 p0738 A69-16182
- Discrete time positive real functions defined for analyzing system stability with memoryless feedback
05 p0739 A69-16349
- Motion stability analysis of system represented by differential equation having continuously differentiable functions as continuously acting disturbances
05 p0794 A69-16450
- Invariant subspaces, controllability and observability of linear dynamic systems
05 p0740 A69-16597
- Stability of time varying systems by construction of multipliers with prescribed phase characteristics
05 p0740 A69-16598
- Stability analysis of nonlinear and time varying discrete feedback systems
05 p0740 A69-16600
- Microwave antennas simulation by optical systems based on Huygens-Kirchhoff approximation, noting application to antenna analysis, synthesis and radiation patterns
05 p0736 A69-16780
- Stability and weak oscillations of systems with distributed parameters, using method based on representation of characteristic equation in power series
06 p0956 A69-16822
- Synthesis of linear controlled systems with variable parameters, reducing parameter determination problem to Chebyshev approximation of relations between linear components
06 p0899 A69-16829
- Circuit and system theory - Conference, University of Illinois, October 1968
06 p0901 A69-17394
- Deterministic pattern classification algorithms, discussing abstraction problem, stochastic algorithms, minimum error scheme and modified least squares scheme
06 p0892 A69-17395
- Analysis and synthesis of optimal linear time invariant systems with uncertain or unknown parameters, considering mean square error
06 p0902 A69-17405
- L super P stability conditions for nonlinear time varying feedback systems derived with transformation technique and small gain theorem
06 p0903 A69-17411
- Optimizing radiating system consisting of radially diverging conical heat removing projections attached to cooled isothermal sphere
06 p1033 A69-17603
- Discrete time, single input, stepping extremum control system with input disturbance and output measurement noise, discussing computer simulation and dimensional analysis
07 p1114 A69-18287
- Learning matrices applied to mathematical relationship establishment during adaptation stage between input and output of adaptive systems
07 p1088 A69-18387
- Bandwidth limited PCM/PSK/PM telemetry system performance analysis for developing S band telemetry, including coherent and noncoherent detectors
07 p1081 A69-19098
- Pneumatic instrumentation line transfer function approximated by system model for simplifying reactor control system analysis
[IEEE PAPER 2D-6] 07 p1059 A69-19190
- Qualitative V/STOL air traffic control requirements, discussing airborne and ground data, procedures and equipment categories
[AIAA PAPER 69-211] 07 p1177 A69-19552
- System safety analysis for V/STOL aircraft, discussing fault-tree technique role in fail-safe design
[AIAA PAPER 69-216] 07 p1056 A69-19575
- Periodic solutions of autonomous system oscillations with many degrees of freedom based on Poincare method applied to Liapunov systems
07 p1183 A69-19680
- Book on application of systems analysis to government operations covering concepts, methods, benefit functions, optimization, etc
08 p1422 A69-19842
- Secondary acquisition systems analysis by semiMarkov process model, defining minimum average acquisition time
08 p1270 A69-19852
- Wolf and generalized Parseval theorems applied to transformation of integral equation to S-plane in systems analysis
08 p1271 A69-19865
- Control systems digital simulation based on coupling of prediction correction procedure with integration and differentiation procedure, discussing simulation errors
08 p1296 A69-20110
- Incoherent m-ary frequency shift keying (MFSK)/system analysis concerning automatic time synchronization
08 p1274 A69-20133
- Adaptation process of management systems from point of view of control system philosophy
[AIAA PAPER 68-807] 08 p1422 A69-20197
- Differential method with invariance principle used to analyze nonlinear invariant systems, determining physical realizability conditions
08 p1296 A69-20234
- Variational techniques for unstable problems including input determination in system with known impulse response and measured output
08 p1342 A69-20350
- Identification method for cyclic plants operating in mode characterized by recurrence of initial conditions, giving numerical results and error assessment
08 p1298 A69-20421
- Book on systems analysis techniques covering mathematical models, optimization, signal theory, linear and nonlinear systems, estimation, computerized simulation, etc
08 p1298 A69-20461
- Second order system response with variable damping computed by stepwise numerical integration
08 p1418 A69-20849
- Avionic systems development, discussing criteria for realization of operational requirement and engineering product satisfying requirement
[AGARDOGRAPH-114] 08 p1317 A69-20982
- Digital computer simulation and analysis of control loops for ion thruster control
[AIAA PAPER 69-239] 09 p1564 A69-21240
- Electrical analogs with passive elements in combination with stepping switches for simulation of plants with distributed parameters
09 p1471 A69-21436
- Laplace transform applied to linear array analysis and synthesis, discussing transform singularity correspondence to array structure
09 p1532 A69-21600
- Almost periodic systems stability criteria derived from differential inequalities and Liapunov function, considering existence and uniqueness
09 p1532 A69-21612
- Linear systems analysis by generalized numbers method, discussing algorithms for manual or computer analysis
09 p1472 A69-21778
- Stability of systems with periodic parameters, relation to automatic control systems and frequency characteristics role
09 p1473 A69-21855
- Final motions of Hamiltonian conservative systems, analyzing Liouville type, homogeneous and similar systems
09 p1540 A69-21882
- Mathematical model, analog computer simulation and information comparison of closed Brayton cycle systems for power conversion
[ASME PAPER 69-GT-50] 09 p1442 A69-22479
- Signal flow graphs based on matrix methods, discussing loop currents, systems orientation and transfer functions
09 p1475 A69-22600
- Stability and local parametric synthesis conditions of programmed optimal control established for optimal control problem within fixed interval
09 p1475 A69-22666
- Stability conditions for nonlinear pulse width and pulse time modulation systems, considering pulse element properties and system continuous part frequency characteristic
09 p1476 A69-22672
- Dynamic programming method to achieve optimal control of discrete systems with lagging control variables, considering structural properties
09 p1476 A69-22674
- Reliable operation duration distribution shown to be arbitrary for standby system consisting of basic device and n devices in nonloaded standby condition
09 p1513 A69-22676
- Crash protection of flight data recorders, aircraft accident investigation, systems analysis, environment and enclosures
10 p1691 A69-23248
- Torsiograph systems analysis for rotors angular acceleration recording, discussing dynamic characteristics, system, environmental problems, etc
10 p1692 A69-23252
- Federal Government budgeting, discussing systems analysis, planning-programming, etc
10 p1811 A69-23351
- Federal Government systems politics and budgeting, noting dichotomies, time dependence, taxonomy, etc
10 p1811 A69-23352
- Federal Government policies analysis, discussing disadvantages of planning-programming-budgeting system /PPBS/ 10 p1811 A69-23353
- Broadband double balanced mixer/modulators compared with single balanced and unbalanced mixer/modulators
10 p1665 A69-23876
- Optimal control of time invariant uncontrollable linear systems, noting asymptotic stability
10 p1666 A69-23887
- Aircraft and fuel supply system functional compatibility requirements and analysis noting gasolines, fuel tanks, valves, fuel transfer and metering
[SAE PAPER 690308] 11 p1825 A69-24503
- Drift elimination in linear system identification using binary m-sequences by crosscorrelating over two periods of output
11 p1834 A69-24547
- Nonstationary vibrations of mechanical systems subjected to harmonic or external limited energy source excitations
11 p1975 A69-24739
- Electronic systems and component reliability in space, considering electric parameter variation effects
11 p1848 A69-24867
- Stochastic approximation procedure minimizing mean square error criterion for system identification, estimation and decomposition of mixtures
11 p1842 A69-24934
- Multipurpose test system analysis emphasizing support section containing self test elements, power monitoring and control, interconnection techniques and packaging
11 p1864 A69-25069
- GO/NO/GO logic synthesis for probability functions development for systems operational readiness tests
11 p1843 A69-25078
- Differential equations describing system stability with delay in functional space
11 p1919 A69-25093
- Computer techniques application to radio engineering functions related to system performance, layout engineering, frequency coordination and administration, discussing decision parameters interrelationship
11 p1840 A69-25313
- Computer simulation application to electronic systems, discussing design, performance optimization, implementation and environmental effects
11 p1843 A69-25319
- Periodic solutions of quasi-linear self contained system with several degrees of freedom in case of commensurate frequencies, showing coordinates functions breakdown
11 p1920 A69-25749
- Small gas turbine Brayton cycle analysis treating component efficiencies as dependent variables in examining single stage radial compressor and turbine aerodynamic configuration
[IME PAPER 5] 12 p2147 A69-25794
- Service life of system predicted by identifying and testing system variables of mission phases, using obtained data in statistical estimation
12 p2101 A69-25970
- Higher root loci of polynomials for multivariable systems with coefficients polynomials of real parameter
12 p2048 A69-26073
- Multivariable automatic control system consisting of similar local subsystems studied by transforming system equations into equivalent diagonal form
12 p2048 A69-26076
- Liapunov functions applied to stability analysis of nonlinear multivariable direct and indirect control systems with time lags
12 p2048 A69-26079

Dynamic behavior of nonlinear continuous multivariable systems represented by equations derived from block diagram, stressing digital computer properties

12 p2049 A69-26081

Dynamic properties and reliability of linear time invariant multivariable control systems

12 p2051 A69-26093

Book on nonlinear systems analysis and design covering parameter mapping, symmetrical, transient and forced oscillations and stability analysis

12 p2129 A69-26121

Steady modes of operation analysis for optimal single channel differential relay system with inertial controlled plant, assuming constant rate varying plant input

12 p2052 A69-26278

Complete observability in linear time invariant systems decoupled via state-variable feedback, deriving sufficient conditions

12 p2053 A69-26514

Redundant systems reliability prediction for single mission in standby mode or without standby, using failure states concept and birth-death equations

12 p2102 A69-26569

WSEIAC /Weapon System Effectiveness Industry Advisory Committee/ formula, analyzing correctness within Markovian limitations and reward systems extension

12 p2102 A69-26570

Research and development organizations under pressure of corporate assessment and systems management approach, suggesting core-technology structure and training

12 p2192 A69-26732

Terrain photography applications and analysis including remote sensing of photographic systems and photointerpretation

12 p2098 A69-27006

Nonlinear systems disturbed by random white noise analyzed by Fokker-Planck equation for probability density in state space

12 p2124 A69-27141

Relay control systems limit cycle calculations, comparing classical differential equation, Laplace transformation and state and phase space analysis methods

13 p2238 A69-27396

Mathematical relations presented for parameters of technological, transport and information systems reliability and life expectancy

13 p2268 A69-27436

Liquid metal MHD power plant system tested under open and closed loop conditions for liquid circulation

13 p2208 A69-27510

Conditions governing application of reduced Nielsen equations to anholonomic systems dynamics, discussing kinetic energy function

13 p2288 A69-27924

Flux, density and pressure variations with position in vacuum system /nonuniform gas distribution/, discussing causes and consequences

13 p2299 A69-28019

Inelastic structural system stresses, strains and displacements analyzed by differential stress-strain relationships, using finite element method [AIAA PAPER 68-291]

13 p2364 A69-28208

Tracking conditions for observability of nonlinear controlled systems with smooth characteristics

14 p2424 A69-28751

Tracking breakdown probability during unsteady operation of nonlinear automatic control system analyzed by statistical linearization techniques and Fokker-Planck equation

14 p2424 A69-28752

Statistical linearization coefficients for arbitrary nonlinearities in automatic control systems via techniques applying characteristic functions

14 p2424 A69-28753

Differential equation with finite jump type discontinuities

14 p2424 A69-28811

Rotary oscillatory solution of parameterized system with stable unexcited motion using successive approximations

14 p2482 A69-28812

Control systems synthesis for nonlinear plants with known Liapunov functions and constraints, considering stability

14 p2424 A69-28819

Optimal linear control systems with time limits on transient processes synthesized by reducing optimization to algebraic equations solution

14 p2425 A69-28820

Linear control design to synthesize system with prescribed spectrum, deriving formula yielding control coefficients as function of eigenvalues

14 p2425 A69-28821

Stable operation of pulsed system with signal modulated pulse frequency described by nonlinear integral equation

14 p2425 A69-28909

Root locus method for nonlinear systems analysis, determining existence, stability and parameters of periodic solutions

14 p2445 A69-28919

Axial variation analysis of heat generation rate, temperature, voltage, current density and emitter heat flux in thermionic converter, emphasizing application to long diodes design

14 p2401 A69-29228

Identification method for cyclic plants operating in mode characterized by recurrence of initial conditions, giving numerical results and error assessment

14 p2427 A69-29659

Multivariable linear time-variant systems noninteracting control problem, discussing realization by state variable feedback

15 p2582 A69-30024

Sinusoidal perturbation extremal control system stability, using harmonic balance principle to obtain periodic solutions of system differential equations

15 p2582 A69-30616

Theory for stability of steady motions of system with cyclic coordinates applicable to total damping

15 p2690 A69-30737

Expression derived for arbitrary system subjected to external loading, using Cauchy equations for relationship between external plane forces and internal stresses

15 p2713 A69-31018

Pontryagin maximum principle applied to time optimal control of autonomous second order system with constant coefficients and differentiation in transfer function numerator

15 p2583 A69-31059

Cost effectiveness of DOD/military systems, discussing principles and analytical model with case study

15 p2722 A69-31125

System estimation methods compared for rational boundaries of lower confidence limit, discussing variables/attributes error propagation

15 p2722 A69-31135

Asymptotic solutions of optimum control for systems with constraints as linear differential equations and quadratic type functional

15 p2583 A69-31234

Asymptotic Liapunov stability of perturbed solutions to weakly coupled multifrequency systems

15 p2654 A69-31258

Stability of steady circular motions in systems with hidden variables analyzed by using Lejeune-Dirichlet theorem

16 p2804 A69-31621

Nonlinear discrete on-off system phase plane system analysis by motion separation method

16 p2763 A69-31628

Nonlinear nonconservative systems asymptotic stability analysis, emphasizing Zubov construction procedure for Liapunov functions

16 p2873 A69-32059

Book on quasi-linear equations systems and application to gasdynamics, including problems involving systems of quasi-linear hyperbolic equations with two independent variables

16 p2771 A69-32113

Book on correlation theory of statistically optimal systems covering linear continuous, discrete, nearly optimal, nonlinear, decision element and adaptive systems

16 p2764 A69-32114

Absolute stability, stability in whole and engineering stability in reference to Liapunov stability applicability

16 p2874 A69-32244

Nonlinear vibrations of mechanical two degrees of freedom system during resonance described using Krylov-Bogoljubov method to obtain differential equations solutions

16 p2875 A69-32255

Popov type graphic criterion for determining absolute stability of modulation systems

16 p2764 A69-32440

Popov and Sandberg graphic methods for determining absolute stability of nonautonomous systems, noting role of single nonzero eigenvalue in matrix

16 p2765 A69-32441

Turbojet engine open and closed loop boundary control systems performance during maximum penetration

of prohibited operating area induced by HF external disturbances [AIAA PAPER 69-543]

16 p2841 A69-32600

Digital simulation computer stability analysis scheme premised on use of perturbed transient responses

17 p2944 A69-32870

Mechanical systems differential equations of motion solution behavior, discussing program constraints

17 p3053 A69-33000

Book on systems analysis covering electrical networks, structural and space mechanics, vibrations and acoustics, feedback control, functions extrema, etc.

17 p2944 A69-33000

Helicopter engine dynamic analysis, discussing modeling techniques, rotor responses and turbospeed control simulations and transition from mathematical models to hardware components [AHS PAPER 332]

17 p2946 A69-33550

Linear computer-controlled closed loop systems sensitivity analysis, deriving estimation error increment covariance to demonstrate quality deterioration under perturbed initial conditions, parameters, etc.

17 p2944 A69-33747

Multiple input and output nonlinear time invariant feedback system under almost constant inputs

17 p2944 A69-33747

Nonresonance parametric phenomena in distributed systems, discussing interaction between signal and parameter wave at superlight velocity

17 p2928 A69-33860

Nonlinear differential equations describing one degree of freedom systems oscillations, allowing for dry friction and internal friction in elastic element

17 p3007 A69-33910

Nonlinear differential equations of mechanical systems with restoring forces approximated by odd power displacement functions and energy dissipation approximated by displacement and velocity functions

17 p3007 A69-33910

Bernoulli distribution and Monte Carlo method for electrical load analysis in designing electric power generation and distribution

17 p2905 A69-34090

Technology or Research Quantitative Utility Evaluation /TORQUE/ system genesis and operation, with implications affecting R and D

17 p3077 A69-34130

Single freedom vibratory system response to imposed displacement harmonic excitation, analyzing response in terms of constrained system modes

17 p3067 A69-34130

System state phase modeling as method for evaluating safety and reliability by analysis of system states in mission phases through logic diagram

18 p3142 A69-34480

Failure mechanisms time and stress dependence relationships

18 p3144 A69-34490

Steady state availability of system with limited repairable spares for online units, considering statistical dependence among similar units

18 p3144 A69-34490

Flight performance analysis of space systems discussing preparation, implementation and communication

18 p3206 A69-34500

Operational system effectiveness information for reconnaissance drone system including test flights discussing application to reliability and maintainability in project management

18 p3232 A69-34500

Failure rate data role in reliability analysis and design optimization

18 p3147 A69-34510

Mechanical drives effectiveness for large antenna tracking/communications systems evaluated in terms of reliability and availability

18 p3100 A69-34520

Computer simulation model for Saturn 5 prelaunch system reliability analysis, using Bayesian techniques

18 p3207 A69-34520

Slide methods for duplex parallel and switchover redundant mission availabilities based on cost, reliability and maintainability

18 p3147 A69-34530

Parametric variations of nonlinear system moving in medium with nonlinear drag, using Bogoljubov-Krylov asymptotic method

18 p3171 A69-34560

Exponential boundedness of system motion for Lur'e type forced systems, using quadratic Liapunov functions

18 p3164 A69-34670

State space structure of model reference adaptive control and parameter tracking systems subject to noise
18 p3111 A69-34686

Numerical procedure for testing absolute stability and positive realness of free dynamic systems based on Routh algorithm
18 p3112 A69-34689

Thermoelectric converter systems optimization by geometry independent functions
18 p3093 A69-34782

Expected occurrences mathematical model for flight system availability under uncertainty
18 p3210 A69-35083

Advanced Meteorological Sounding System /AMSS/ for measurements up to 150,000 ft, discussing configuration, characteristics, radiosonde, ranging, telemetry data ground equipment and test
18 p3108 A69-35102

Hypercorrelation concept for statistical characterization and structuring of systems with application to management models, discussing multiport systems
18 p3236 A69-35236

Parametric and forced oscillations analogy for analyzing dynamic behavior of oscillatory systems with time dependent parameters
18 p3175 A69-35322

Autonomous system steady motion with rotating phase and deviating argument solved by successive approximation over infinite time interval
18 p3175 A69-35323

Automatic control system transient response oscillatory and aperiodic components calculation using open loop system transfer function
18 p3112 A69-35458

Shuttle VTOL airport access system analysis for New York area
[AIAA PAPER 69-804]
19 p3288 A69-35592

Stability of interrelated linear dynamic control systems with distributed parameteres evaluated by using differential equations
19 p3286 A69-35892

Evaluation method for strapdown spacecraft guidance systems on automated interplanetary missions, using cost and system performance efficiency probability model
[AIAA PAPER 68-828]
19 p3370 A69-35953

Power subsystem weight effects on temperature ratio of Rankine type cycle, discussing method for rapid estimation
19 p3254 A69-35957

Systems effectiveness view from project and organization management viewpoint
19 p3454 A69-36006

Subsystem designs evaluated on basis of human reliability metric to select desirable design configurations
19 p3261 A69-36026

Computerized system-safety fault trees, discussing drawing, configuration control and simulation program
19 p3280 A69-36029

Maintainability and maintenance analysis in managing integrated logistic support /ILS/ system
19 p3455 A69-36035

Bayesian confidence limits for systems reliability, considering exponential and unspecified life distribution subsystems
19 p3328 A69-36041

System effectiveness for reliability and maintainability achievement, analyzing people, organizations, value systems and accomplishment criteria in development program
19 p3455 A69-36044

Stochastic models for calculating optimal elastoplastic one dimensional systems
19 p3438 A69-36313

Self rotary motions of nearly conservative systems with one degree of freedom, deriving periodic solution of equation for phase trajectories
19 p3374 A69-36466

Steady resonance operation modes of nonlinear oscillatory and rotational systems described by differential equations with deviating argument, using averaging procedure
19 p3374 A69-36469

Optimal structural parameters of radar digital ranging servosystems derived from reproduction error, including computer simulation data
19 p3278 A69-36593

ATC systems analysis including airports, ground access and air transportation
19 p3371 A69-36866

Soviet collection of papers on vestibular analyzer physiology
20 p3467 A69-37240

Book on systems cost effectiveness covering methodology, system cost models, economics, etc
20 p3640 A69-37533

Remote sensing systems costs, benefits and economic evaluation
20 p3493 A69-37742

Gust absorber system configuration flight tests and analysis, emphasizing application to delta wing aircraft [ONERA-TP-698]
20 p3462 A69-37753

Avionics system analysis, engineering, design, fabrication and testing problems
20 p3545 A69-37929

Book on mathematical foundations of systems analysis covering calculus, linear algebra, linear and nonlinear programming and major applications
21 p3754 A69-38576

Optimum and suboptimum synchronizers for extracting bit synchronization from binary data, showing performance dependence on pertinent system parameters
21 p3673 A69-38923

Mathematical model of probability of errorless human performance for time continuous tasks for use in systems reliability analysis
21 p3664 A69-38971

Numerical procedure for structural systems analysis, discussing computer application to hydrodynamic, electric, magnetic, thermodynamic, elastostatic and elastodynamic problems
[AIAA PAPER 67-955]
21 p3839 A69-39216

Integrated systems testing for unmanned spacecraft electromagnetic compatibility, discussing identification and elimination of interference sources
21 p3683 A69-39438

Performance characteristics of multivariable model reference adaptive systems synthesized by Liapunov method analyzed using computer simulation
22 p3919 A69-41201

Parabolic equation and equation systems with relaxed assumptions involving coefficients of first derivatives and unknown function, demonstrating Pogorzelski fundamental solutions validity
23 p4180 A69-41408

Systems analysis method for determining spacecraft remote sensors earth resources survey effectiveness by integrating specifications, mapping requirements and orbital characteristics
23 p4163 A69-41567

Teleological systems behavior modeling based on input, output, goals, operation duration, etc
23 p4134 A69-42059

Antenna losses produced by metal space frame radome determined by considering end effects, member junctions circulating currents, mutual scattering and near field effects
23 p4149 A69-42127

Electromagnetic compatibility /EMC/ quantification in system effectiveness by decision analysis technique, constructing conceptual model
23 p4145 A69-42227

Space power systems analysis, using computer program to correlate systems characteristics with mission parameters for automated satellite repair vehicle and space stations
23 p4068 A69-42240

Systems analysis of Rankine cycle nuclear- electric potassium space power system using Li cooled fast reactor and high temperature turbine inlet
23 p4189 A69-42266

Positive cyclic systems of linear differential equations, proving existence and projective uniqueness of solution having positive n components for all t
24 p4340 A69-43131

General purpose computer program for synthesis of multivariable systems decoupled by state feedback
24 p4294 A69-43307

Two level systems with overall performance as explicit function of first level performance, defining equivalence condition to prove coordinability for nonadditive case
24 p4294 A69-43308

SYSTEMS ENGINEERING

Survival analysis based on probability theory for design of air cushion vehicle to determine height for operating over open sea
01 p0008 A69-10027

Subsystems of ESRO research satellites Td 1 and Td 2, discussing telecommunication, attitude control, power supply and temperature control design and functions
01 p0160 A69-10031

Airline area navigation system functions for developing map type pictorial display system including digital computer, cockpit control unit and microfilm charts
01 p0112 A69-10453

Navigation services satellite systems including position determination, communication and telemetry for ships and aircraft
[UN PAPER 68-95363]
01 p0113 A69-10479

Space system engineering courses background, objectives and results at MIT and Stanford University dealing with applications of space technology
[UN PAPER 68-95870]
01 p0178 A69-10485

Antenna performance optimization, considering gain dependence on diameter, feed, tolerances, noise temperature, etc
[UN PAPER 68-95813]
01 p0043 A69-10517

Soviet book on design of multidimensional automatic control systems, covering structural circuit synthesis and individual element characteristics
01 p0053 A69-10995

Soviet book on automatic control and telemechanics in hydrometeorological measurements covering sensors, transducers, amplifiers, etc
01 p0111 A69-10997

Ground-air-ground communications system using pseudonoise through satellite and central ground based control facility, discussing system advantages, SNR and modulation schemes
01 p0033 A69-11009

Structural weight fraction factor analysis leading to improvements in materials and structures
[AIAA PAPER 68-331]
01 p0011 A69-11021

Symmetrical design of short ferrite Faraday rotator using matrix representation, noting matching to rectangular waveguide
01 p0048 A69-11034

Biological life support system based on continuous algae seaweed cultivation as link of closed ecological system, discussing design and performance
01 p0020 A69-11077

Cryogenic engineering - Conference, Brighton, England, May 1968
01 p0056 A69-11144

Liquid hydrogen circulation pump design emphasizing heat leaks
01 p0087 A69-11148

Liquid hydrogen and LOX boost pump design for Centaur missile and liquid hydrogen and LOX chill-down pump design for Saturn 4B missile
01 p0087 A69-11149

Cryopump design suitable for attachment as replacement for diffusion or ion pumps
01 p0088 A69-11155

Integrated circuit piezoelectric systems limitations and advantages
01 p0049 A69-11413

Laser gyro applications including guidance, navigation and control problems
02 p0248 A69-11741

Wolf Trap life detector design to sample and culture Martian surface dirt for microorganism growth
02 p0201 A69-11769

Reliability of operational satellite systems consisting of two single purpose satellites in interchangeable orbits, discussing outage and replacement
02 p0333 A69-11805

Algorithm minimaxing performance index and sensitivity of controller design with and without saddle point
02 p0224 A69-11966

Stabilization system for klystron automatic frequency control, noting use in voice communication microwave generators and resonance spectroscopy
02 p0216 A69-12096

Finned tube radiators optimum design for waste heat removal from space power plants
02 p0354 A69-12664

Automatic support systems development and capabilities with recommendations for future R and D developments
03 p0411 A69-13190

Multimode propagation communications system /MMPCS/ utilizing digital computer to implement intermittent system
03 p0389 A69-13191

OMEGA radio navigation system optimization, emphasizing implementation of phase modulation to ensure lane identification
03 p0463 A69-13212

Fourier synthesis procedure optimized to design of large time bandwidth product dispersive filters employing nondispersive tapped delay lines
03 p0403 A69-13217

Design evolution of mechanically despun antenna systems from ATS to INTELSAT, discussing RF and control systems
03 p0403 A69-13239

Point to point millimeter wave communication system design, discussing propagation and data transmission
03 p0405 A69-13723

Design and principles of operation of SHF electron-optical multiply stable storage elements with dynamic attributes of states
03 p0441 A69-13982

Electronic scanning radar systems design, discussing beam types, bandwidth, tracking, target acquisition, etc
04 p0556 A69-14301

HAPDAR-TACOL phased array radar design, discussing array patterns and multitarget tracking performance
04 p0556 A69-14324

Hybrid mode Ku-band mixer steering electronic scanning phased array design
04 p0572 A69-14325

H plane waveguide Y circulators engineering design based on circulation equations
04 p0575 A69-14460

Collection of papers on engineering applications of digital computers, examining programming, numerical methods and design and simulation problems
04 p0563 A69-14514

Computer programs for engineering analysis, design and simulation, presenting point selection program for curve plotting
04 p0563 A69-14516

Planar linkages kinematic synthesis and design, using Newton-Raphson iteration technique to solve nonlinear equations
04 p0604 A69-14517

Book on control systems theory and applications covering artificial intelligence, linear stochastic systems, trajectory decomposition, etc
04 p0581 A69-14567

Fluid stability, viscosity, compressibility, gas solubility and lubricating properties determination for high temperature hydraulic systems
04 p0550 A69-14662

Current antenna system technology, particularly airborne and spaceborne applications
04 p0576 A69-14767

Corrugated impedance antennas synthesized, using model in impedance surface form
04 p0577 A69-14786

Sensitivity models for adaptive and self adaptive systems design
04 p0582 A69-14797

Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility
04 p0630 A69-14799

Apollo guidance, navigation, stabilization and control subsystems, detailing inertial, optical and computer units for data processing and collecting
04 p0665 A69-14881

Servosystems components design, discussing detector, corrector, amplifier and motor
04 p0550 A69-15181

Water removal unit design for electrolyte reaction accumulation in hydrogen oxygen fuel cell systems
04 p0552 A69-15316

Graphics system using computer configuration connected by conventional voice lines, noting hardware and components
04 p0566 A69-15343

Lockheed hybrid computer system, describing features implemented by modifying and augmenting digital batch processing system
04 p0567 A69-15349

Hybrid executive development based on digitally oriented software, explaining assembly language routing
04 p0567 A69-15351

Device and logic/system designers and design aids interaction, emphasizing engineering trends in large scale integration area using MOS arrays
04 p0568 A69-15356

Simulation design of multiprocessor system to provide air traffic control capabilities through use of real time operations
04 p0629 A69-15365

Stability derivative estimation at subsonic speeds for preliminary design engineer
05 p0700 A69-15545

Unified design approach for second generation air cushion craft based on existing first generation craft
05 p0701 A69-15567

Mathematical model to design weight optimized silicon-germanium solar flat plate thermoelectric generator as spacecraft auxiliary power source in near sun missions
05 p0704 A69-15674

Design and performance equations for panel type solar thermoelectric generator, based on single thermocouple as generator unit
05 p0704 A69-15675

Systems science and cybernetics - IEEE Conference, San Francisco, October 1968
05 p0741 A69-15801

Central test evaluation group as part of systems engineering of large systems
05 p0742 A69-15803

Flight test support design, developing measure of performance of test environments stated in weapon or space system terms
05 p0742 A69-15804

Book of engineering compendium on nuclear radiative shielding, discussing radiation sources, attenuation methods, induced heat generation, ducts and voids in shielding technology and design
05 p0791 A69-15830

Soviet book on design of aircraft engine component and subsystem elements, emphasizing aligning, locking and sealing methods, torque transmission, etc
05 p0812 A69-15864

Multiradar system development for total view of air situation from single air views, using digital computers interconnected with central computer
05 p0719 A69-15932

Product development process diagram, systems engineering checklists and program plank as devices to assist product manager
05 p0850 A69-16146

Minimum sensitivity deadbeat sampled data control system design by frequency domain technique, using two controllers
05 p0738 A69-16177

Digital computer interface systems design for simulation, control, instrumentation and data processing, discussing hybrid computer linkages
05 p0723 A69-16195

System/360 Continuous Modeling Program, detailing input language, user-defined functions and documentation
05 p0723 A69-16196

Design theory of esaki diodes relation to internal parameters of degenerate semiconductors, discussing Fermi level position and maximum state density in purity band
05 p0732 A69-16298

Efficient life support systems for prolonged space missions, discussing scientific and experimental research
06 p0879 A69-17040

Satellite and space communications and data transmission systems, emphasizing improvements in amount and rate of information for future requirements
06 p0886 A69-17045

Multivariable self adaptive control system design using sensitivity methods, obtaining adaptation stability by Liapunov synthesis
06 p0900 A69-17352

Learning control system design, using a priori information in subgoal selection, control situation grid extensions and controller initialization
06 p0900 A69-17355

Adaptive control of reflective satellite communication system
06 p0887 A69-17356

Digital simulation design for linear dynamic systems, noting role of digital transfer function
06 p0906 A69-17491

Attitude control system design problems for earth oriented satellites
06 p0105 A69-17586

Engineering designs and hardware required for low risk flight of long duration manned space stations
06 p1007 A69-17601

Systems engineering activities in manned space flight involving design, development, manufacture, test and operation of Mercury, Gemini and Apollo flight systems
06 p1016 A69-17602

Interplanetary Pioneer spacecraft development and systems engineering aspects
06 p1017 A69-17605

Collection of Soviet papers on radio engineering
06 p0889 A69-17796

Automatic air traffic control systems design, development and application to civil and military aviation
06 p0955 A69-17858

Injector design based on MHD injector component performance, establishing minimum diffuser nozzle area
06 p0872 A69-17923

Flexible vehicle control, using cybernetic model for system design and response
[AIAA PAPER 69-115] 06 p0108 A69-18054

Astrodynamic data compilation for use by systems engineer for mission planning
[AIAA PAPER 69-124] 06 p0101 A69-18059

Thermionic energy converter theory and efficiency, discussing design considerations to improve performance
07 p1057 A69-18221

Design and performance of large vacuum system with central control desk to study plasma dynamics, discussing visual monitoring at desk
07 p1116 A69-18292

Boeing 2707-300 Mach 2.7 supersonic transport, discussing flight controls, hydraulic system, environmental controls, operational characteristics, flight deck and instrumentation
07 p1052 A69-18277

Book on vacuum system design covering getter ion pumping, cryogenic pumping, liquid nitrogen handling, residual gas analyzers, etc
07 p1180 A69-18544

P-n channel MOS triode fabricated by doped stepped-oxide method, obtaining p-channel enhancement
07 p1100 A69-18622

Control-display panels design for accurate response with electronic and mechanical equipment, showing display stimulus and control response correspondences in rectangular configuration arrangement
07 p1070 A69-18907

Adaptive airborne VHF/UHF transmitter system, discussing design, ground isolation, current limiting, internal telemetry, wideband frequency response, real time video signals, etc
07 p1106 A69-19114

Communication satellite system design by use of baseband equation relating SNR after detection to CNR at detector input
07 p1085 A69-19180

Reliability in aeronautics and astronautics, discussing safety, economic cost of technical delays and effect on public, air transport, design, development, testing, utilization, etc
07 p1053 A69-19287

System reliability influence on air accidents resulting from pilot errors, unforeseen obstacles, breakdowns and atmospheric effects
07 p1054 A69-19288

Radomes developments for supersonic/hypersonic aircraft and missiles, considering conditions imposed by speed and by electronic requirements
07 p1171 A69-19508

Integrated radome antenna system design /radant/, comparing electrical performance with conventional systems
07 p1109 A69-19513

Radome materials with superior dielectric and temperature characteristics for constructing high tolerance microwave multiband radome
07 p1109 A69-19514

Symmetrical three layer A and B type sandwich reflectionless radomes design for multifrequency operation and insertion phase delay
07 p1110 A69-19522

Dielectric radome designs for operation at harmonically unrelated frequencies in C and K bands, discussing sandwich structure of A and B types
07 p1110 A69-19523

Cordierite application to radomes for high velocity engines, discussing dielectric properties at microwave frequencies, mechanical properties, temperature control and fabrication
07 p1168 A69-19525

Radome design and manufacture, considering airborne requirements, antenna systems and electromagnetic energy, with emphasis on ceramic material melting, forming, grinding and finishing
07 p1142 A69-19526

Scanning beam landing systems for VTOL aircraft
07 p1178 A69-19631

Material design problems in small gas turbines, discussing engine performance sensitivity, thinness of rotor-blade and stator-vane trailing edges, dimensional tolerances, etc
[ASM PAPER D8-16.2] 07 p1204 A69-19661

Radiation effects on integrated circuits, stressing components design for maximum tolerance
07 p1113 A69-19779

- Transponders for communication satellites, discussing design constraints, reliability and transmission capacity increase
08 p1279 A69-19905
- Adaptive primary feed system for wide angle beam scanning from parabolic reflector antenna, using Fourier transformation to obtain uniform power distribution
08 p1279 A69-19908
- Design aspects of 20 ft air transportable satellite earth station
08 p1272 A69-19926
- Bounds on electric field outside radiating system determined for application to UHF and VHF systems design, considering microwave breakdown
08 p1273 A69-20026
- U.S. policy for commercial surface effects ships regulation, discussing operational, construction and design requirements
08 p1254 A69-20199
- Nonlinear controller design by dynamic programming method, discussing block diagram
08 p1296 A69-20236
- Compromise control in system with two hierarchy levels interrelated via lower level subsystems optimality criteria found by solving global criterion problem
08 p1297 A69-20415
- Aircraft head-up display systems emphasizing all-weather operations and equipment characteristics
08 p1315 A69-20451
- Flapper-nozzle type electrohydraulic amplifier design with emphasis on elements and subsystems
08 p1256 A69-20459
- Hard-drawn steel wire wound pipes and tanks, properties and design calculation, discussing laminates and permissible stress
08 p1414 A69-20487
- Nondestructive testing methods application to fiber-bonded composites, noting X ray diffraction, radiography and ultrasonics
08 p1339 A69-20498
- Plastic composite reinforcements with boron, silicon carbide, graphite, single crystal alumina and laminating resins, discussing properties and fabrication
08 p1340 A69-20503
- Stellar identification system using onboard sighting equipment and computer mathematical methods
08 p1347 A69-20657
- Decision oriented automatic data processing systems design, noting quantity and quality of upward directed information to management
08 p1423 A69-20733
- Bounds for real and imaginary parts of dynamic moduli of composite viscoelastic systems
08 p1417 A69-20824
- Response optimization of feedback control systems with reference to single settlement time-constant ideal determined for error evaluation
08 p1298 A69-20855
- Nuclear power supply with in-core thermionic reactor for space power source and use in satellite TV, discussing theory, design and components
08 p1350 A69-20871
- Design of ruby laser for stability, lifetime, maintenance and safety requirements of commercial users, discussing power, pulse duration and beam divergence
08 p1327 A69-20881
- Collection of articles on fluid control components and systems design
08 p1256 A69-20948
- Wullenweber arrays with extended frequency ranges, discussing design considerations and performance characteristics
08 p1288 A69-20962
- Electronic multibeam switching X band antenna system design with separate transmitting and receiving antennas for use on continuous wave surveillance radar
08 p1289 A69-20967
- Electronically phased array antenna system design optimization and testing for application to spin stabilized satellites
08 p1289 A69-20969
- Wideband array antenna IF time delay steering realization, showing steering independence of bandwidth
08 p1290 A69-20974
- Low temperature hydrogen fuel cells and basic-electrolyte batteries design, discussing electrolyte concentration regulation by elimination of water formed
08 p1258 A69-21027
- Motor design for operation in ultrahigh vacuum, discussing absence of convection cooling, outgassing avoidance, lubrication impossibility and oxygen absence as design parameters
08 p1377 A69-21028
- Cold hydrogen and basic electrolyte cells at CGE research center, discussing single cell batteries, reagent chambers and auxiliary control systems
08 p1259 A69-21039
- Optimum integration of aircraft equipment, subsystems and computer mechanizations for low cost navigation system consistent with mission requirements
08 p1348 A69-21065
- Large scale electronic systems configuration compatibility concept, discussing modular line replaceable units (LRU)/assigned set of numbers
08 p1322 A69-21154
- Landing gear requirements for aircraft design, discussing tire pressure, wheel arrangement, brakes for loading and aircraft weight
08 p1255 A69-21161
- Statistical approach to design and management, discussing multiple regression analysis, attributes, intuition, probability, simulation and applications
08 p1344 A69-21162
- Dual-rotor high-bypass-ratio CF6 turbofan engine design and development programme and growth
08 p1377 A69-21163
- Pulsed MPD arc jet electric propulsion system requirements, examining physical constraints, pulse duration, duty cycle, power network structural details, etc [AIAA PAPER 69-269]
08 p1560 A69-21215
- Low density Hall ion thruster with application to Van Allen probe and orbit-to-orbit transfer [AIAA PAPER 69-281]
08 p1562 A69-21229
- Communication satellite system design for operation with frequency bands above 10 GHz, noting wideband communication
08 p1450 A69-21284
- Contactors for helium in dilution refrigerator mixing chamber, discussing design and thermal resistance determination
08 p1493 A69-21429
- Ion laser construction, detailing water cooled quartz tubes, electrodes, adjustable mirrors, etc
08 p1515 A69-21487
- Rocket vehicle inertial attitude reference system, discussing flight control
08 p1609 A69-21618
- Filtering system for xenon arc solar simulator to provide operation at air-mass-two /average sea level/ sunlight
08 p1476 A69-21648
- Maxson multibeam antenna design for noninteracting beams, considering beam shapes and positions and applications
08 p1463 A69-21676
- Gamma ray scattering gauge design optimum parameters to measure Mars atmospheric density
08 p1495 A69-21842
- Electric propulsion design, considering effects of weight, impedance matching, beam voltage regulation and operating point variations in formulating system mass and reliability [AIAA PAPER 69-254]
08 p1569 A69-21879
- Fluidic component application to propellant tank pressurization and controller design [AIAA PAPER 68-629]
08 p1442 A69-21980
- Pressure vessel design to alleviate hydrogen embrittlement of steels for shock tunnel drivers [AIAA PAPER 68-367]
08 p1477 A69-21993
- Collection of papers on designing components of gyroscopic systems covering moment sensors, floating devices, bearings, etc
08 p1497 A69-22101
- Aircraft gust alleviation system for minimizing weighted sum of normal acceleration and pitch rate response by limiting control surface deflections
08 p1434 A69-22279
- Vacuum engineering problems during booster rocket engine ground tests, simulating flight environment [TR-781-O]
08 p1570 A69-22300
- Explosive forming, discussing optimum parameters for model and prototype parts and subscale forming criteria for aluminum ellipsoidal domes
08 p1512 A69-22371
- Onboard test and fault isolation design for airborne systems considering tradeoff parameters for optimum reliability, performance and cost [AIAA PAPER 69-306]
08 p1434 A69-22389
- Air backflow in nuclear exhaust system duct for ground testing of NERVA engines, noting overpressure effect [AIAA PAPER 69-325]
08 p1479 A69-22390
- Stationary controller design for linear time varying control systems with state variables not always accessible for feedback
08 p1474 A69-22443
- Electronic systems partitioning in preparation for MOS large scale integration for system performance and cost improvement
09 p1466 A69-22451
- Correlation between responses of linear systems for transient input as performance criterion for servomechanisms
09 p1475 A69-22536
- Nonlinear one element control system design based on correlation between responses of linear systems
09 p1475 A69-22537
- Heat release in combustion chambers of propulsion and lift engines considering various parameters of materials and design problems
09 p1625 A69-22619
- High performance silicon carbide backward diode, discussing device design and operational characteristics
09 p1470 A69-22787
- On job training of logistic publications engineers, emphasizing technical publications and system engineering and development for Minuteman program
09 p1811 A69-22977
- Probability of completing countdown in single malfunction encounters, considering development of industry and government guidelines
09 p1792 A69-22979
- Electroexplosive devices design for extreme conditions, considering igniter, delay and functioning systems
09 p1751 A69-23020
- Electroexplosive element design for safe reliable devices in liftoff and space environment, considering stray electric currents, RF fields and electrostatic discharges
09 p1752 A69-23022
- Saturn 5 holddown and service arm electrical system design program optimized by integrating reliability and maintainability at initial design phase [AIAA PAPER 69-309]
09 p1670 A69-23043
- Waveguide Y circulator electrodynamic parameters by design algorithm and computer programs
09 p1661 A69-23108
- Flight data recorders history and regulations, discussing parameters and design of systems
09 p1691 A69-23247
- Telemetry monitor systems for high speed rotating equipment, discussing data recording, transmission, decoding, thin-thick film microtechniques, etc
09 p1692 A69-23249
- Test facility automation, discussing pretest preparations, test operations, data reduction and system planning
09 p1671 A69-23260
- Maintenance recording systems for aircraft fleet, discussing operations objectives and research, data collection and implementation using systems engineering
09 p1671 A69-23261
- Fluid rotor angular accelerometer design for stabilization and control, noting applications to centrifuge speed and thruster gas consumption
09 p1633 A69-23273
- Blowdown wind tunnel designed for studying closed cycle MHD converters, describing subsystems
09 p1673 A69-23474
- Electrical, thermal and mechanical requirements in design of Landing Radar Electronic Assembly for Apollo Lunar Module
09 p1663 A69-23537
- Displacement and acceleration criterion for synthesizing optimum linear vibration isolator systems subject to random input [ASME PAPER 69-VIBR-44]
09 p1807 A69-24182
- Design management in next century covering computer methods, market needs, etc
11 p2004 A69-24371
- Aircraft electronic proximity warning devices applications, discussing compatibility in ATA collision avoidance system [SAE PAPER 690340]
11 p1914 A69-24496
- Digital data transmission techniques and complex instrumentation systems design noting control, identification, synchronism and error reduction
11 p1834 A69-24545
- Estimation system distinction from adaptive system, discussing network of adaptive estimation systems
11 p1858 A69-24937
- Hardware and software as single entity in small scale programs, describing English language oriented program code of Controller /Programmer/ Evaluator
11 p1864 A69-25062

High speed automatic test sets and rapid repair procedures under adverse conditions for individuals of relatively low technical skill

11 p1851 A69-25063

Single purpose, multipurpose and multistation automatic test systems for production and maintenance

11 p1864 A69-25068

Hardware-software interface defined for design of computer controlled test system, discussing criteria for designing economical systems

11 p1842 A69-25071

Mathematical model for prediction of automatic test equipment utilization and determination of time for performance of intended test function

11 p1865 A69-25074

Onboard checkout system concept, discussing philosophy, requirements, underlying considerations, system description, development and techniques of system selection

11 p1866 A69-25081

Automatic system self test technique known as central integrated test subsystem /CITS/ for logically testing avionics systems

11 p1866 A69-25083

Monograph on computer aided air traffic control systems design, discussing air navigation, man-machine relations, equipment requirements, programs, plan position color display, etc

11 p1914 A69-25085

Real time/process computer interface with electric power systems, discussing compatibility, reliability, etc, problems in connection with management and engineering personnel

11 p2004 A69-25302

Computer techniques application to radio engineering functions related to system performance, layout engineering, frequency coordination and administration, discussing decision parameters interrelationship

11 p1840 A69-25313

Computer simulation application to electronic systems, discussing design, performance optimization, implementation and environmental effects

11 p1843 A69-25319

Computer design for booster/satellite control, discussing systems reliability, low power and tradeoffs

11 p1843 A69-25320

Thermionic converter SD-4 design and performance tests covering emitter, collector and Cs reservoir temperatures and power efficiency

11 p1827 A69-25398

Spacecraft design for minimization of structure interaction with control system, noting susceptibility of extendible booms to solar environment

11 p1967 A69-25500

Multidimensional mode shapes and frequencies of 100 ft space erectable parabolic antenna

11 p1994 A69-25532

Optimal multivariable linear control system design, based on Pontryagin principle using Laplace transform method, providing good approximation to finite interval controllers

11 p1861 A69-25663

Testing machines for metallic materials, discussing design criteria and application to tensile strength, vibration and durability test machines [DVL-865]

11 p1889 A69-25682

Multidimensional self adjusting systems design by achieving parametric invariance, using sensitivity theory

11 p1861 A69-25711

Lifting entry concepts for return from earth orbit, discussing deceleration, heating and heat protection

11 p1968 A69-25720

Planetary imaging systems design problems illustrated by Mars orbiter reconnaissance, discussing radiation effect on film, shielding, stereo method comparisons, color bands, etc [SMPT PAPER 105-78]

12 p2078 A69-25770

Control technology advancement effects on gas turbine design and application, integrating control scheme, modularization and commonality, system design and energy input and load control

12 p2146 A69-25786

Gas turbine fuel and control systems for two and three shaft engines in military and civilian aircraft including helicopters [IME PAPER 12]

12 p2147 A69-25796

Solar cells operation in space flight, considering Si photoelectric cells characteristics and complete systems construction for spacecraft power supplies

12 p2015 A69-25865

Large scale integrated circuit accumulator chip as control element for design of digital system by design automated techniques

12 p2037 A69-25942

Technological feasibility of satellite based global data relay service for small users

12 p2028 A69-25949

Optimal controllers analytical design for closed loop systems with pure time delay in actuating mechanism using differential equations

12 p2045 A69-25959

Automatic control system design for optimality in sense of nonstatistical quality criterion for disturbances of given class, considering additive noise

12 p2045 A69-25964

Digital computer-aided reliability engineering methods for electronic equipment design and analysis

12 p2037 A69-25973

Optimal control of multivariable complex systems through multilevel /hierarchical/ structure, discussing coordination problems

12 p2049 A69-26082

Third order multivariable control systems calculation with linear differential equations describing plant for design and digital optimization

12 p2049 A69-26085

Time optimal controls for multivariable linear systems by computer programming of iterative calculations /Neustadt and fast convergence methods/

12 p2050 A69-26090

Discrete linear optimal control system with quadratic performance index synthesized by dynamic programming method, obtaining matrix equations

12 p2050 A69-26091

Canonical representation of multivariable control system in state space using matrix of differential operators acting on vectors of input-output quantities

12 p2051 A69-26094

Monograph on physicotchnical principles of takeoff monitoring systems for large aircraft covering taxiing, safety control systems design, analog simulation, etc

12 p2128 A69-26119

Book on nonlinear systems analysis and design covering parameter mapping, symmetrical, transient and forced oscillations and stability analysis

12 p2129 A69-26121

Fourth angle driving law for different four gimbal systems used for simulation display and inertial platform isolation

12 p2055 A69-26265

Concorde SST equipment and systems noting microelectronics, automatic control, inertial navigation, head-up displays, linear instruments and hydraulic systems

12 p2091 A69-26360

Budapest University satellite radio observation APT station design, equipment and methods

12 p2059 A69-26449

Beryllium oxide semiconductor thermistor for temperatures to 2500 K, discussing construction materials and test results

12 p2092 A69-26478

Soviet book on electric ignition systems for piston and jet engines and design aspects of different types of ignition systems

12 p2146 A69-26756

Helicopter stabilization systems design using optimal control theory to obtain multivariable feedback controller

12 p2014 A69-26764

Inertial guidance system synthesis for infantry missile with 1 n mile range against small hardened targets requiring 3 ft maximum miss distance

12 p2129 A69-26791

Systems design of airframe structures taking into account material characteristics noting structural stability, shell postbuckling, fail-safe designs, etc

12 p2186 A69-26833

Space propulsion system design with consideration for launch and mission requirements, noting upper stage structural design and computer techniques

12 p2148 A69-26834

Book on optimal control covering types of systems, practical optima, signal properties, Bellman dynamic programming and Pontryagin maximum principle

12 p2054 A69-26919

Aesthetic preservation of visual amenities in countryside by proper antenna design without affecting performance or cost

12 p2044 A69-26924

Man machine interactive structural analysis using digital computer with CRT display, detailing design

12 p2035 A69-27098

Optimal design of rectangular frames for stability

13 p2358 A69-27209

Self acting gas lubricated bearings design procedures and comparison with oil lubricated bearings [ASME PAPER 68-LUBS-10]

13 p2265 A69-27267

Design optimization for gas lubricated spiral groove spool bearing based on narrow groove theory, analyzing static and dynamic characteristics for motion in axial direction [ASME PAPER 68-LUBS-12]

13 p2266 A69-27270

Designs and capabilities of digital processing systems for automatic air traffic control radar information stressing future use of display for computerized control

13 p2295 A69-27332

Tactical air navigation system redesign with integrated circuits, obtaining weight reduction and improved performance and reliability

13 p2227 A69-27380

Passive adaptive sampled data control system with conditional feedback, discussing transfer function reduction and minimization of external disturbances and internal parameter variations effects

13 p2238 A69-27390

MHD generators semihot wall duct, discussing structural design, ceramic insulation elements brazing, temperature control, electrodes, working fluid, etc

13 p2372 A69-27473

Liquid flow MHD alternating current generators design, considering induced current in rotor and resulting magnetic field in pole gap

13 p2206 A69-27495

Single wavelength design with compensation compared to multiwavelength design without compensation for liquid metal MHD induction converter, discussing optimization

13 p2207 A69-27504

Engineering assessment and flight testing of aircraft systems in UK, discussing operational reliability, etc

13 p2201 A69-27539

Canadian air cushion vehicle industry, considering materials, design, production, tests, components and quality control

13 p2381 A69-27544

Soviet monograph on design and theory of linear induction pumps for liquid metals covering electromagnetic phenomena, optimized dimensions, etc

13 p2209 A69-27926

Large power systems integration in manned space stations, discussing design, selection and application criteria

13 p2209 A69-27939

Spaceborne optical telescopes requirements and development including mirror material and construction, optical design, servocontrol, etc

13 p2261 A69-27946

Stratoscope II unmanned balloon-borne telescope design, detailing pointing, focusing and thermal characteristics

13 p2261 A69-27956

Latching high-voltage reed relays in satellite instrumentation systems

13 p2231 A69-28047

Microminiature latching relay design and manufacturing cost

13 p2232 A69-28049

Systems design value analysis including alternate solutions to cost effectiveness for design development and production phases

13 p2383 A69-28097

U.S. Navy Numerical Value Rating System computing method of selecting lowest cost design approach to accomplish specific function

13 p2383 A69-28098

Flexible skirt design for air cushion vehicle consisting of semicylindrical elements and permitting horse power and cost reductions

13 p2203 A69-28179

High pressure AC arc heater system design criteria, discussing magnetic field, chamber gas flow, stabilizing elements, etc [AIAA PAPER 69-348]

13 p2243 A69-28283

Power supply subsystem for TD1/TD2 satellites with solar cells, discussing design including standby battery for solar eclipse periods

13 p2209 A69-28481

Finite automaton used to construct minimum automaton with periodic structure, discussing representability of regular events

13 p2239 A69-28553

CENFAM radar receiving system for meteoric and upper atmospheric data on amplitude, range and direction of meteor echoes through interferometer pairs

13 p2354 A69-28649

H plane waveguide Y circulators engineering design based on circulation equations

14 p2418 A69-28831

Parameters optimization in electronic equipment design, considering parameters and efficiency criteria as additive elements functions of dimensional chain
14 p2418 A69-28835

Lubrication systems for high speed machinery, discussing wet and dry sump arrangements, gearbox heat rejection, oil flow requirements, X-22A aircraft, etc
[ASME PAPER 69-DE-65] 14 p2454 A69-28845

S-band telemetry capability of Easter Test Range, discussing relationship to Telemetry Rehabilitation Project, major system decisions and performance characteristics
14 p2410 A69-28878

Space Ground Link Subsystem as S-band communication link within Air Force Satellite Control Facility including unified telemetry, tracking and command systems
14 p2427 A69-28879

VHF to UHF telemetry bands transition implemented by Naval Weapons Center
14 p2411 A69-28880

Optically swept glass slab laser design, discussing pulse length and peak power
14 p2457 A69-28930

Magnetosensitive quartz element with suspended magnet and two mirrors for recording magnetic variations
14 p2446 A69-29084

Automatic control circuit zero drift compensation during external disturbance, using algorithm for computer minimizing of losses caused by control and response inaccuracy
14 p2425 A69-29140

Fast and thermal thermionic reactor systems characteristics including fissile material, components mass, power output and flattening and design features
14 p2480 A69-29182

Primary isotope thermionic electric power module design, considering various assemblies
14 p2398 A69-29190

Actinium fueled thermionic generator design and characteristics, noting emitter temperature and material
14 p2399 A69-29192

Single cell fission powered thermionic converters design and testing
14 p2399 A69-29195

Thermionic converter SO-4 design and in- and out-of-pile test results, presenting diode performance at various times
14 p2399 A69-29196

Thermionic electrogenerating element (EGE) design optimization, considering one dimensional linear geometry with thin walled cylindrical sheath cathode
14 p2400 A69-29224

Soviet research on thermionic energy conversion, advantages and applicability in various fields
14 p2405 A69-29279

He-Ne lasers operation at 6328 Å, discussing optimum design parameters for power, life and stability
14 p2459 A69-29429

Aircraft design synthesis requirement definition in hardware commitment, discussing error effects of weight, aerodynamics and propulsion
14 p2392 A69-29432

Pressure, temperature, vibrations and structural stresses data acquisition system for aeronautical applications
14 p2450 A69-29686

C-141 Category IIIB all weather landing system, discussing system concept, components, operations and performance
14 p2479 A69-29701

Plasma diagnostics facilities design, circuit diagrams and operation based on Q switched ruby laser and optical recording system
14 p2461 A69-29782

Homodyne frequency converter design using microwave oscillator with bitonal frequency modulation
14 p2451 A69-29801

MHD generator design with electric conductivity waveform at small magnetic Reynolds numbers
14 p2405 A69-29911

Plane linear induction pump design optimization without short circuiting bus bars, allowing for MHD effects induced by traveling magnetic field
14 p2405 A69-29913

Systems engineering approach to aerospace product defects minimization, discussing scope, contract development, mainstream functions, component development, design data and subsystem integration
15 p2719 A69-30085

Measurement system for recording of small localized temperature changes in brain
15 p2606 A69-30152

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system
15 p2671 A69-30323

Design and efficiency for signal-time compressors of spectral analyzers using electron beam tubes with charge storage
15 p2576 A69-30351

Pulse generator to accommodate electronic system testing to shock response spectrum by simulating real world shock environment
15 p2585 A69-30360

Solar simulator with xenon and krypton lamps designed for thermal balance tests, power conversion and material degradation experiments
15 p2586 A69-30383

Martian entry test facility for real size entry systems, discussing design, fabrication and operation
15 p2587 A69-30390

Back pressure control system for heat leak evaluation tests of cryogenic containers, discussing component selection and error analysis
15 p2702 A69-30397

Independent testing laboratory management, outlining requirements specialized to fit continued growth conditions
15 p2720 A69-30402

Boeing A-7000 Solar Simulator for Space Environment Simulation Laboratory, noting output characteristics
15 p2588 A69-30403

Resonant fixtures used for mechanical amplification of vibrator output to desired test levels
15 p2588 A69-30404

Defense integrated management engineering system at California Naval Air Rework Facility
15 p2588 A69-30427

Gas barrier seal design producing varying unit loading on conventional contact seal faces, including geometric stability and test results
[ASLE FICF PREPRINT 26] 15 p2621 A69-30495

Electrical engineering, Volume 3, communications, covering special theories, systems components, telecommunication, electroacoustics, digital and analog computers and programming
15 p2568 A69-30619

Design and electrical features of microwave measurement system for solid state spectroscopy, discussing waveguides, signal source, detector, etc
15 p2610 A69-30709

Flexible aluminum elliptical waveguide design, discussing installation, economy and electrical characteristics
15 p2578 A69-30798

Microslip between concentrated contacts and design charts for maximum pressure, closing-in of contacting bodies and optimized shapes, giving computer programs
15 p2629 A69-30903

Integrated Logistics Support (ILS) cost effectiveness, discussing management of systems elements in addition to prime equipment including computer programs, training, maintenance, etc
15 p2722 A69-31126

Automatic multichannel system for turbine blades static tests, discussing operation principles, component sections, programmed tape and vibration modes
15 p2672 A69-31209

Primary-secondary radar (SECAR) integration for air traffic control, discussing problems of simultaneous display, transmission synchronization, signal multiplexing, etc
15 p2570 A69-31222

Hydraulic regenerative servoamplifier system for electrohydraulic actuator design, discussing specifications and test results
15 p2553 A69-31294

Optimizing control system design using fluidic digital circuitry and FM type transducers
15 p2583 A69-31296

Fluidic control systems for industrial applications, discussing fluidic solutions to process problems
15 p2553 A69-31297

Wideband multiplexers design with directional filters, discussing operational characteristics
15 p2581 A69-31524

Power supplies for ruby, YAG and glass lasers, emphasizing design equations and component selection
15 p2636 A69-31527

Analytical method for designing pressure circular bearings verified by experiments concerning loading capacity
16 p2792 A69-31560

Time and space on-line simulation of analog, digital and hybrid block diagram systems
16 p2755 A69-31709

Multipad externally pressurized spherical bearing fed with incompressible fluid for satellite attitude control systems tests
16 p2793 A69-31728

Manned space stations role in future space plans, discussing prototypes and conceptual design
16 p2866 A69-31736

NERVA engine cooldown system for emergency shutdowns using high pressure liquid H followed by gaseous H warmup and liquid N cooldown
[AIAA PAPER 69-512] 16 p2810 A69-31846

Global satellite communication networks design by computer simulation, discussing politicechnical interface problems, ground stations, atmospheric factors, system optimization, etc
16 p2750 A69-31852

FM/FM telemetry system for high altitude rocket research, using independent subcarrier oscillator for each measurement transmitted with individual frequency modulation
16 p2750 A69-31853

German ground station commercial receiving system for satellite broadcast reception
16 p2766 A69-31855

Ground station command transmission equipment for German AZUR satellite, describing components based on NASA Tone Digital Command System
16 p2759 A69-31856

Data processing for scientific rocket research, considering pulse counters, multiplexers, converters and programmers
16 p2755 A69-31858

Book on soviet An-24 aircraft construction and exploitation covering fuselage, powerplant, controls, fire prevention, air conditioning, maintenance, etc
16 p2735 A69-32112

Iris microphotometer with measurement and reference beams traversing plate in neighboring regions designed for stellar images measurement
16 p2790 A69-32225

Absolute stability, stability in whole and engineering stability in reference to Liapunov stability applicability
16 p2874 A69-32244

Low temperature fuel cell with mixed oxidizer and fuel and fuel cell based on water radiolysis under alpha and gamma radiation
16 p2740 A69-32425

Servosystems components design, discussing detector, corrector, amplifier and motor
16 p2741 A69-32431

Retrodirective antennas for spacecraft, discussing design, operations and applications
16 p2762 A69-32557

Integrated circuits effect on electronic equipment design and production technology
16 p2762 A69-32578

Design philosophy for cost reductions on future space transportation systems, exemplifying application to booster system for earth orbital logistics
[AIAA PAPER 69-439] 16 p2882 A69-32654

Water moderated beryllium reflected reactor design for testing NERVA or Rover type fuel elements in nuclear environment, noting core location
[AIAA PAPER 69-513] 16 p2810 A69-32656

Systems approach in turbofan engine design acoustic evaluation, discussing noise sources and radiation patterns
[AIAA PAPER 69-491] 16 p2839 A69-32667

Subsonic diffuser design, discussing flow distortion and turbulence levels and pressure loss characteristics
[AIAA PAPER 69-449] 16 p2843 A69-32700

First generation nuclear flight stage with 75000 lb thrust NERVA flight engine, discussing applications design and hardware options
[AIAA PAPER 69-534] 16 p2810 A69-32707

Test rig vehicle design for noise research on single stage high bypass ratio fans for quieter turbofan powerplants
[AIAA PAPER 69-492] 16 p2767 A69-32727

Orbital refueling techniques, discussing vapor-liquid interface stability, pressurant requirements, transfer line chilldown, propellant transfer dynamics, dielectrophoresis, suction speed estimating and system tradeoffs
[AIAA PAPER 69-564] 16 p2869 A69-32733

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design,

analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
[AIAA PAPER 69-549] 16 p2845 A69-32759

Molded composites application to engine components, discussing turboprop reduction gear case design using polymer matrix boron composite
[AIAA PAPER 69-466] 16 p2795 A69-32763

Rocket performance optimization by extending injector design technology to high performance injectors for space storable FLOX/LPG propellants
[AIAA PAPER 69-506] 16 p2846 A69-32778

Antenna systems design for ISIS-A scientific satellite, discussing antenna array of 13 radiators for telemetry, command, beacon and experimental purposes
17 p2918 A69-33030

Equipment- and program-type methods for solving automatic digital control systems synthesis problems, evaluating efficiency based on accuracy
17 p2933 A69-33120

Soviet collection of articles on theoretical and experimental investigations of strength of mechanical engineering structures
17 p3056 A69-33190

VTOL transport aircraft, discussing systems integration problems, feasibility and time scale of introduction into service, noise and safety, etc
17 p2897 A69-33207

D-2 satellite stabilization system design and development, noting mission to determine hydrogen distribution around earth
17 p3046 A69-33223

Optimal design for improving thermal performance of existing spacecraft thermally actuated louvers by increasing open-to-closed emittance ratio
[AIAA PAPER 69-627] 17 p3071 A69-33269

Microphonic noise measuring systems for airborne radar system design for noise reduction
17 p2937 A69-33628

Equipment environmental conditions tabulated to assist engineer in preliminary design considerations and in planning test programs for specimens
17 p2910 A69-33661

Nonrecirculating wind tunnel configuration with minimum atmospheric wind disturbances for V/STOL vehicles aerodynamic testing
[AIAA PAPER 68-398] 17 p2947 A69-34024

Avionics systems with integration and federation applied to integrated light attack avionics system/ILAAAS/ design to provide navigation, weapon delivery and flight control
17 p2976 A69-34057

Electronic computers for avionics system design in terms of technology, performance and cost, discussing reliability prediction and failure rate data
17 p2976 A69-34058

Multispectral imaging remote sensors, analyzing energy sources affecting systems synthesis
17 p2977 A69-34064

Airborne data processing systems reliability, discussing software and hardware reconfiguration techniques and man-machine interface problems
17 p2977 A69-34072

Doppler inertial system with remote attitude capability, detailing sensor operation by airborne computers
17 p3002 A69-34097

Cost optimization in converting brush type to brushless aircraft AC power systems, using analog computer to determine modifications
17 p2905 A69-34109

Rotary power transformer design for spin stabilized spacecraft power system, discussing efficiency and advantages
17 p3050 A69-34111

Solid state broadband RF power amplifier for airborne HF radio, eliminating total servosystem and all higher voltage components
17 p2942 A69-34114

Integrated circuit ultrahigh speed analog to digital converter, discussing interactions at high digital rates and video bandwidths
17 p2943 A69-34125

Pivotal computer operations in Apollo NASA Communication Network, describing UNIVAC computers in use and design considerations
18 p3100 A69-34267

Soviet book on hydraulic servo drive covering design and performance, static and dynamic characteristics and stability problems
18 p3093 A69-34356

Quantitative and qualitative reliability programs for commercial and aerospace products, considering Failure Effect Management System
18 p3143 A69-34486

Fluctuations effect in flow problems analyzed by waiting line theory to improve systems design based on operational needs
18 p3145 A69-34495

Operations research methods applied to systems effectiveness study, using key decision models with optimized alternatives
18 p3145 A69-34503

Failure rate data role in reliability analysis and design optimization
18 p3147 A69-34516

OGO program failure rate analysis with respect to cost, schedule and performance tradeoffs, considering component and systems design and reliability, prelaunch feedback, etc
18 p3207 A69-34519

Failure mode and effect analysis integrating design and reliability engineering, discussing management controls and interdisciplinary coordination
18 p3147 A69-34526

Slide methods for duplex parallel and switchover redundant mission availabilities based on cost, reliability and maintainability
18 p3147 A69-34531

Plastics behavior under loading and performance prediction, considering engineering design applications
18 p3161 A69-34609

Optimum automatic system for controlling helicopter formation flight, stressing transient response Q factor and transmission ratios
18 p3090 A69-34656

Extreme disturbance analysis and optimum performance and design problems for structural and mechanical dynamic systems, basing solutions on linear, nonlinear and dynamic programming
18 p3106 A69-34663

Electronic data processing facilitating engineering design development work, including computer programming
18 p3106 A69-34838

Automatic celestial navigation, discussing star trackers design, mathematics of celestial fix and relationship to errors and physical and environmental constraints
18 p3169 A69-34852

Computer-aided design application to mass property engineering, describing repetitive mathematics functions, design information retrieval and display, automated synthesis, etc
[SAWE PAPER 795] 18 p3107 A69-34863

Halon 1301 fire extinguisher for burning spilled hypergol on Apollo/Saturn LM adapter, discussing concentration requirements and exposure hazards
18 p3094 A69-35062

Educational TV satellite system design for U.S. in 1970s
18 p3235 A69-35076

Multistage systems high reliability design, describing branch and bound computer method for optimal resource allocation of redundant components
18 p3148 A69-35081

Biosatellite attitude control systems design development and flight test results for payload perturbing effects, discussing simulation activity
18 p3210 A69-35094

Advanced Meteorological Sounding System (AMSS) for measurements up to 150,000 ft, discussing configuration, characteristics, radiosonde, ranging, telemetry data ground equipment and test
18 p3108 A69-35102

Three dimensional morphology of systems engineering, using model for applications in taxonomy, new activities sets discovery and systems science curriculum design
18 p3236 A69-35235

Lockheed C-5 Galaxy aircraft avionics systems with Doppler inertial navigation equipment to operate with precision without ground based aids
18 p3104 A69-35465

L-1011 Tri-Star aircraft systems and safety provisions, discussing automatic flight control system, propulsion, noise reduction, galley, coat storage and cabin window shades
[AIAA PAPER 69-828] 19 p3243 A69-35598

Large area Si solar cell arrays design, considering environment, cell layout, thermal expansion, coverslides fabrication, costs, etc
19 p3253 A69-35708

Equivalent circuit demonstrating noise reduction through input transistor integration into passive receiving antenna, stressing circuit loss control and preamplification role
19 p3281 A69-35764

System reliability evaluation based on failure analysis illustrated with examples covering initial requirements through parts production monitoring and control
19 p3454 A69-35782

Strapdown inertial reference unit system for inflight reliability and maintainability, discussing design areas components
19 p3370 A69-35800

Automatic systems for complex plant control, discussing synthesis of complex control systems
19 p3286 A69-35808

Book on statistical communication and applications to radio and radar systems technology to provide guidelines for design decisions
19 p3267 A69-35900

Digital computer controlled antenna positioning system computing spacecraft tracking trajectory from given parameter input set
19 p3267 A69-35997

Ground controlled remote manipulator spacecraft system to perform unmanned satellite orbital maintenance, discussing refurbishment, laboratory simulation, system cost effectiveness and feasibility
19 p3430 A69-36001

System approach to reliability demonstration, discussing design and impact on levels, risks, requirements, testing, cost and incentives
19 p3327 A69-36003

Optimized contracting for systems engineering management, discussing industry views, scope, application, depth, procurement and performance measurement
19 p3454 A69-36005

Cost model to trade off competing systems designs for space communications, navigation, operational availability and ballistic missile defense
19 p3454 A69-36007

System engineering to select hydraulics subsystem for advanced fighter aircraft by cost effectiveness analysis, noting maintainability and reliability
19 p3254 A69-36012

Man machine interface problems in C-5 equipment and system design
19 p3261 A69-36024

Subsystem designs evaluated on basis of human reliability metric to select desirable design configurations
19 p3261 A69-36026

System components for spatial discrimination implementation scheme, discussing IR detector arrays and optical imagery processing
19 p3373 A69-36055

Optical instruments optimal design for given requirements, discussing tradeoff studies of airborne reconnaissance scanner, spaceborne rendezvous sensor and track-while-scan radiometers
19 p3310 A69-36065

EKG signal transmission to hospital during cardiac patient transportation by emergency vehicle, noting prototype system construction and tests
19 p3262 A69-36271

Biotelemetry system as candidate prototype of generalized system for clinical applications
19 p3262 A69-36272

Computer program designing multiplex taper to minimize FM/FM telemetry system carrier threshold SNR, examining noise behavior of multiplex system stages for system performance
19 p3273 A69-36273

Optimum receiver design for binary coded data detection in two channel space communication system, discussing phase error distribution and optimum decision function
19 p3275 A69-36286

Missile and space support planning, objectives, technology development, functions, maintenance and in-flight maintainability
19 p3295 A69-36327

Commercial satellite communication ground station at Arvi, India, discussing system design, operation and international standards
19 p3275 A69-36412

Optimum aerological network design, discussing atmospheric model, numerical analysis, data acquisition, weather forecasts, rms measurement error, etc
19 p3364 A69-36505

Space age metals supply and demand relationships, discussing system engineering criteria for maximum efficiency
19 p3346 A69-36635

Italian cross radio telescope noting added phase shifters to N-S arm, transistorized receiving system and modified data processing
19 p3295 A69-36643

- Computer-algorithm elements required for engineering design and invention problems including design requirements, selection of spaces for variables using computerized heuristics, etc 19 p3280 A69-36666
- He-Ne laser communication feasibility experiments, discussing modulation, detection, operating parameters, etc 19 p3279 A69-36756
- Detector radiometer design for radio astronomical measurements in 0.7-2 mm range, discussing sensitivity 19 p3285 A69-36877
- Radar design for target detection, tracking and identification, modeling plasma effects on radar cross section of reentry vehicles based on wave-plasma interactions 20 p3485 A69-36925
- Vibration absorber incorporating polymer spring/damping elements for attachment to complex main system, noting butyl rubber as effective and convenient damper material 20 p3620 A69-36996
- Book on solenoid magnet design covering magnetic and mechanical aspects of resistive and superconducting systems 20 p3464 A69-37145
- Soviet book on theory and design of turbocompressors covering gas dynamic cascade theory, thermodynamics and aerodynamics, viscous gas flow, etc 20 p3459 A69-37238
- A scope laser radar system using Q switched solid state laser pulses, discussing configuration and performance 20 p3487 A69-37283
- Data handling system design for large astronomical satellite /LAS/, discussing spacecraft configuration, basic aims, program functions, subsystems, signal flow, flight repair, etc 20 p3501 A69-37390
- Geometrical configuration for synthetic aperture terrain imaging radar scanning system, noting scanning methods in range and azimuth directions 20 p3489 A69-37634
- Synthetic aperture terrain imaging radar system optimal design, considering noise-free and random noise conditions using least squares method and signal to noise ratios 20 p3489 A69-37639
- Recording devices for storing bandwidth data in time sequence, studying design parameters using light beam recorder implemented with CRT for read-in process 20 p3540 A69-37640
- Technological systems engineering effectiveness assurance elements, discussing roles of engineering, operations research, data utilization, production and installation, etc 20 p3550 A69-37709
- Parallel wire antenna array design for specified pattern using matrix methods and method of moments for self and mutual impedances and required excitations 20 p3507 A69-37847
- C-5A transport landing gear assembly design, illustrating air turbine kneeling-drive module 20 p3466 A69-38179
- Design concepts and principles of systems for monitoring of Concorde flight control actuators, considering servo control, control interconnections and control input system 20 p3467 A69-38190
- Maintainability as design requirement in system specifications and contracts, noting MIL-STD-471 program of maintainability demonstration tests 20 p3551 A69-38268
- Book on synchro application and design covering telemetry, torque and control systems, synchro circuits, resolvers as computer elements, etc 21 p3681 A69-38450
- Compressible fluid flow characteristics in turbomachine stage, discussing simplified radial equilibrium method as basis for design 21 p3643 A69-38457
- Microwave frequency measuring instruments design solutions for electric measurements reduction to length measurement 21 p3720 A69-38563
- Admissible controls set for discontinuous stochastic automatic control systems, deriving mean optimal averaging of controls 21 p3770 A69-38855
- Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests [AIAA PAPER 68-610] 21 p3768 A69-39219
- Error propagation and tolerance analysis in design and reliability engineering and stress analysis 21 p3842 A69-39303
- Integrated sensor controllers for missile directional control, discussing test results for two different systems [AIAA PAPER 69-837] 21 p3761 A69-39368
- Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources [AIAA PAPER 69-848] 21 p3762 A69-39378
- Model performance index /PI/ providing criterion for approximating one dynamic flight control system by another based on geometrical representation of linear autonomous systems [AIAA PAPER 69-885] 21 p3764 A69-39410
- NF106B-VST model follower flight control system, discussing design criteria/performance index, rigid/elastic math model development, flight test evaluation, hardware design, etc [AIAA PAPER 69-886] 21 p3764 A69-39412
- Lifting body stability augmentation systems design, development, ground tests and flight data including frequency response, limit cycle and structural resonance [AIAA PAPER 69-887] 21 p3647 A69-39413
- Optimum filter design for noisy analog feedback system with forward and feedback disturbances, using mean square error criterion between signal and data 21 p3687 A69-39449
- Superconducting magnets for MHD generators, discussing design, construction and operation problems 21 p3782 A69-39478
- Soviet book on self adaptive systems design, operational principles and analysis and synthesis methods 21 p3687 A69-39532
- Laser design for smooth emission frequency retuning, discussing equations for laser field oscillations, two photon resonance, tensor analysis, quantum emission, etc 21 p3739 A69-39539
- Light sources with uniform variable luminance field designed for calibrating cameras used in space exploration 21 p3726 A69-39580
- Dornier ASTRID attitude stabilization system design for spinning rocket nose cone with instrument payload, using first stage biaxial inertial platform and second stage star tracker 21 p3826 A69-39639
- Spacecraft attitude acquisition/reorientation and stabilization controller design implemented by control moment gyro, proposing control algorithm using control actuator nonlinearity 21 p3826 A69-39641
- Space vehicles optimal pulsed control systems statistical synthesis, considering structural constraints on operation, memory capacity and algorithm coefficients 21 p3767 A69-39651
- Parse-implement approach to digital systems design, combining systems level /conceptual/ and engineering environmental level /physical/ viewpoints 21 p3680 A69-39663
- Launch vehicle cost reduction by minimizing software, fabricating in commercial shops and avoiding sophistication, parts and acts of man 21 p3857 A69-39688
- Launch systems evolution, cost reduction breakthrough approach and application to future space transportation 21 p3857 A69-39692
- Reusable Crew Module, Reusable Orbital System and Reusable All Systems options for low cost space transportation system 21 p3827 A69-39693
- Book on maintainability principles and implementation methods covering program implementation, quantitative factors, maintenance concept, tradeoff techniques, design liaison, etc 21 p3734 A69-39815
- Hybrid microelectronic modules, using basic thermal design guidelines 22 p3910 A69-39952
- Correlation protected ILS implementing conventional ILS with no operational restrictions on air traffic control, taking into account changing terminal conditions 22 p3978 A69-39963
- Optical and mechanical systems of Wrocław Observatory Lyot type coronagraph for prominence observations in H alpha line 22 p3943 A69-39999
- Planning, design and implementation of reliability testing facility, investigating phases of project life cycle 22 p3954 A69-40033
- Short range telemetering strain gage system with astable multivibrator transmitter for measuring intercoupling displacement and shaft torque 22 p3946 A69-40314
- Closed Loop Ionogram Processor /CLIP/ on-line computer processing system for ionospheric data [AIAA PAPER 69-952] 22 p3904 A69-40334
- Real time multiprocessing telemetry ground support integrated system design with expanded definition of hardware/software decision tradeoffs [AIAA PAPER 69-971] 22 p3907 A69-40351
- Automated design system producing wire format data for cabling avionics subsystems of light attack aircraft [AIAA PAPER 69-976] 22 p3912 A69-40356
- Representative data of actual forces and moments applicable to large spacecraft attitude control system for typical crew activities obtained through simulation programs [AIAA PAPER 69-1006] 22 p3921 A69-40380
- Systems approach to avionics optimization, discussing instruments, devices, display and automation techniques [RAES PAPER 6] 22 p3946 A69-40487
- Complex program management emphasizing systems engineering management, noting applications to aeronautical systems [RAES PAPER 9] 22 p4053 A69-40489
- Linear flight control system synthesis by using optimal control theory associated with quadratic performance index 22 p3864 A69-40588
- Adaptive control system synthesis for reducing computation labor for controlled inertialess plant, reproducing probability density function to describe unknown parameters 22 p3918 A69-40739
- Optimum linear adaptive design of dominant-type systems with large parameter variations assuring system response within prescribed bounds by reducing internal noise sensitivity 22 p3918 A69-41011
- Suboptimal linear regulators design method yielding feedback controller for multivariable linear systems subject to parameter variations 22 p3918 A69-41012
- Boeing 747 safety engineering program, discussing organization, design review, system safety, systems design-analysis and tests 22 p4054 A69-41136
- Automation of single pass electric spark machining of high alloy steels and hard alloys, including anodic-mechanical profiling, cutting and drilling 23 p4168 A69-41308
- Millimeter wave pseudorandom coded CW meteorological radar for precipitation drop size spectrum analysis and cloud studies, discussing overall system design 23 p4115 A69-41531
- Aircraft gas turbine engine lubricant evaluation and systems design from standpoint of effective oil life and lubricant stability requirements [SAE PAPER 690424] 23 p4200 A69-41648
- Turbomachinery periodic structures design to improve tolerance to inflow distortion and resonant oscillatory flows, considering large amplitude pressure waves propagation [SAE PAPER 690388] 23 p4201 A69-41666
- SDP-3 small serial computer for engineering experiment on IMP spacecraft, discussing design modifications to improve performance 23 p4133 A69-41737
- Flexible format adaptive telemetry encoder design, discussing system design and implementation technique with modular units 23 p4119 A69-41748
- IBM 360-50 computer with I/O terminals to process PCM and analog data from Modular Auroral Probe series of sounding rockets on real time basis 23 p4133 A69-41764
- Potential energy modeling method for optimal design of structural systems with diverse performance criteria, giving truss design example 23 p4228 A69-41923
- Ammonia resistojet thruster, describing ammonia physicochemical properties and systems characteristics of pulsed mode operation and continuous thrust resistojets 23 p4203 A69-41931
- Microwave bandpass step filters, listing structural dimensions and design parameters 23 p4139 A69-41947

Structural features and performance of 300 ft steerable receiving antenna, discussing aiming error, aperture efficiency, azimuth and altitude drive
23 p4148 A69-42121

Feasibility studies to optimized design for 440 ft steerable filled-aperture radio and radar telescope, discussing parabolic configuration, radome selection, etc
23 p4148 A69-42123

High sensitivity communication system design consisting of radome enclosed steerable antenna, 500 kw transmitter and microwave configuration compatible with low noise receivers
23 p4149 A69-42131

Freon boiler designed for Rankine cycle heater fired on hydrocarbons with over 2000 F flame front temperature, considering radiant/convective heat transfer
23 p4068 A69-42239

Radioisotope thermoelectric generators (RTG)/design and performance analysis method applied to generators using Si-Ge Air-Vac type thermocouples
23 p4188 A69-42260

ISOTEC thermoelectric generators for space power, describing design features, operation, power output and radioisotope heat source
23 p4189 A69-42270

Satellite communication system high speed sequential decoder design, discussing parameters, simulation and test results on satellite channels
23 p4131 A69-42523

Space vehicle multibeam Cassegrain antenna system design meeting radiometric mapping requirements in microwave frequency range, discussing mounting, degrees of freedom, etc
[ONERA-TP-713]
23 p4143 A69-42527

Optimum integration of aircraft equipment, subsystems and computer mechanizations for low cost navigation system consistent with mission requirements
23 p4186 A69-42538

PCM telemetry system for transferring information from many remote sources to single local processing point
24 p4281 A69-42620

NDT techniques relation to engineering design problems with failure potential, discussing management planning and cost analysis
24 p4318 A69-42769

Satellite data management systems design, considering user-designer cooperation aspects for space programs
[AAS PAPER 69-366]
24 p4417 A69-42806

Hybrid display for data visual display using electroluminescent and thermochromic technologies for wide range of ambient illumination
24 p4313 A69-42899

Pneumatic driving system for heart assist or total replacement pumps, discussing design features and performance characteristics
24 p4273 A69-42983

Vienna 60 inch telescope concept and design, discussing optical systems possible combinations under local conditions
24 p4314 A69-43000

Display system design principles and procedures, discussing checklists, formal procedures and behavior theory
24 p4274 A69-43017

Decision process model for man-machine decision task structuring by system designers
24 p4274 A69-43018

Spacecraft single wall cryogenic storage system, discussing cost, pressure vessel and components, thermal and performance characteristics
24 p4393 A69-43045

Multichannel spectral line receiver for 210 ft Australian radio telescope with front ends covering wide frequency range
24 p4283 A69-43115

PCM satellite communication systems signal power and frequency bandwidth requirements, noting PCM-psk superiority over FDM-FM
24 p4283 A69-43200

Launch vehicle control system synthesis based on mode control theory state variable formulations
24 p4394 A69-43278

Quasi-optimum control law for aircraft landing control system design based on Friedland technique, evaluating effectiveness by computer simulation
24 p4253 A69-43280

State variable feedback design of m-input, m-output time invariant linear systems requiring noninteraction and exact transfer functions, considering coupled core nuclear reactor
24 p4294 A69-43315

F-111D computer complex to provide selective functional redundancy and flexibility to accommodate mechanization changes
[AIAA PAPER 68-837]
24 p4285 A69-43719

SYSTEMS STABILITY

Integer programming method for optimizing constrained reliability problems with several system failure modes
20 p3504 A69-37069

Damped linear system asymptotic stability inferred from dynamical equation structure, considering matrix eigenvalues and Thomson-Tait-Chetaev stability theorem
20 p3623 A69-37531

Viscoplastic thermomechanically coupled systems stability, considering effects of heat transfer to surroundings and heat capacity in material regions below yield
20 p3625 A69-37591

Rocket body elastic vibrations, liquid fuel supply oscillations and engine thrust vibrations effects on system stability
20 p3617 A69-37604

Phase and amplitude stability measurements in airborne pulse Doppler radar
20 p3492 A69-37711

Linear nonstationary system with singular point analyzed for stability necessary and sufficient conditions using Riemann-Mellin conversion integrals and Laplace transforms
21 p3685 A69-38451

Nonlinear computing schemes examined for necessary and sufficient conditions of stability as derived from Mikhailin linear operators and Frechet derivatives
21 p3678 A69-38746

Algorithms testing characteristic polynomials and differential equation classical stability relations
21 p3755 A69-38925

Linear and nonlinear differential equations systems stability and instability problems, describing procedures and theorems for solutions
21 p3755 A69-38960

Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation
[AIAA PAPER 69-856]
21 p3823 A69-39384

Stability of nonlinear systems with state variable feedback applied to fuel valve servomechanism
21 p3687 A69-39460

Stability contours for sampling and delay effects analysis in analog/digital hybrid simulation loops, considering compensation quality over simulated system natural modes
21 p3680 A69-39609

Stable linear system/shaping filter/synthesis transforming stationary white noise into random process having given covariance function
21 p3688 A69-39661

Damping effects on elastic systems stability under nonconservative forces, correlating stability and quasi-stability regions
22 p4040 A69-39981

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions
22 p3980 A69-40108

Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
22 p3917 A69-40116

Dynamic systems stability with two degrees of freedom, determining second order time dependent integrals valid near periodic orbit
22 p4013 A69-40123

Book on convergence in calculation of elastically deformable aircraft structures and continua, covering matrix displacement method and stepwise linearized computational technique
22 p4044 A69-40619

Automatic phase control system stability range determination in piecewise linear approximation and in presence of proportional integrating filter
22 p3918 A69-40956

Minimax sensitivity criteria used to synthesize filters for estimating state of first order plant subject to dynamic and/or statistical parameters uncertainties
22 p3918 A69-41016

Book on systems stability with random parameters, considering linear and nonlinear control systems, with application to stochastic approximation
23 p4181 A69-41510

Bounded input-output stability for lumped distributed systems by poles examination in S plane, con-

sidering transient response of linear time invariant systems
23 p4144 A69-41510

System asymptotic motion stability for given parameter values using algorithms with aid of R functions
23 p4191 A69-41710

N-th order differential systems using first approximation, finding conditions for bounded solutions, solutions asymptotic to zero and stability
23 p4181 A69-41710

Liapunov stochastic stability direct method analog used for estimating reliability of redundant systems with constant recovery time
23 p4144 A69-41910

Dynamic characteristics of nonlinear discrete systems by motion division method, using discontinuous Liapunov function for stability criteria
23 p4144 A69-41910

Combined automatic control systems stability having principal coordinates related by loading equation
23 p4145 A69-42370

Invariance conditions for steady and unsteady systems by differential method compared to variational approach
23 p4145 A69-42370

Sufficient conditions derived for absolute stability of dynamic systems containing nonlinear functions of several state variables
23 p4145 A69-42440

Nonlinear time varying feedback control system stability applied to damped Mathieu equation
23 p4146 A69-42470

Pointing vector and angular rate relationships for various optical elements, discussing analytical model development for precision electro-optical stabilization systems
23 p4131 A69-42540

Frequency condition for ensuring stochastic stability of one dimensional discrete feedback control system containing linear dynamic part and inertialess nonlinear component
24 p4288 A69-42670

Digital analysis of nonlinear control systems dynamic stability under small perturbations, using linearized differential equations
[IS-ERI-71]
24 p4285 A69-42980

Adaptive control function technique to design lateral stability augmentation system for hypothetical manned lifting body entry vehicle
24 p4394 A69-43300

Distributed parameter systems stability as internal and input-output property, describing Liapunov functional construction
24 p4293 A69-43300

Frequency domain stability criteria for open and closed loop distributed parameter linear time invariant systems
24 p4294 A69-43300

Stability of linear systems with convolution operators in forward loop and time-varying gain in feedback loop analyzed for frequency- and time- domain conditions
24 p4295 A69-43310

Stellar system differential rotation effect on gravitational instability with distribution propagating in rotation axis direction
24 p4388 A69-43630

SYSTOLE

Systolic murmurs and flight personnel evaluation noting phonocardiographic definition and tracings of specific systolic murmurs
09 p1445 A69-22720

Blood pressure fluctuations in multiple extra systole during tilt table studies for flying fitness of pilot
10 p1645 A69-23370

SYSTOLIC PRESSURE

Pneumograms and EKG used to determine heart beat, respiration rates and systolic index of cosmonauts during Voskhod 2 flight
07 p1062 A69-18580

Cat hearts ventricular pressure curves dv/dt and dp/dt correlated with left heart ventricle mechanical performance
23 p4095 A69-42070

Sinus outflow relationship to oxygen content in anterior cardiac vein blood and right ventricle systolic pressure
23 p4098 A69-42100

T

SHAPE

Miniaturized E-Tee three port circulator with wide bandwidth, noting negligible effect of static field small variations on performance
08 p1291 A69-20980

T shaped radio astronomical array, discussing time sharing technique providing simultaneous observation capability and merits of T and cross configuration telescopes
20 p3507 A69-37837

TAURI STARS

IR object discovered during T Tauri objects and diffuse nebulae study, discussing peculiarity
04 p0655 A69-14665

Polarimetric observations of polarization percentage and position angle changes in T Tauri stars, confirming stellar polarization association with emission spectra
15 p2694 A69-30882

53 ENGINE

T-53 engine operation in U.S. Army helicopters noting design problems from compressor blade failure, sand and dust erosion and bearing and lubrication malfunctions
[AHS PAPER 215] 07 p1203 A69-18867

TABLES [DATA]
NT MATHEMATICAL TABLES

Charts summarizing daily solar phenomena, cosmic rays, geomagnetic variation, ionosphere, radiowave propagation and airglow observations in Japan
02 p0315 A69-11732

Tabular reduction of crystal structure chemical information for metals and semiconductors for material selection use
02 p0295 A69-11786

Equations, tables and charts for shock drag parameter in determination of shock wave drag of body in supersonic free stream of ideal gas
02 p0188 A69-11862

Book containing 1960-1965 /including IQSY/ chronological tables of solar and geophysical events, discussing solar activity, geomagnetic, ionospheric, auroral and cosmic ray research
02 p0321 A69-12165

Monograph on orbit computation of doubly photographed meteors employing method of least squares, giving computer programs and tables of data printout
02 p0324 A69-12495

Equations for self oscillating mode of operation for O-type backward wave generator with electrostatically focused electron beam and finite values of amplification parameter
03 p0407 A69-13986

Handbook on metabolism and nutrition containing tables, charts and diagrams on food composition, material incorporation into organism, energy exchange and end products
04 p0553 A69-14908

Flammability handbook for plastics noting characteristics, behavior under fire conditions and various fire hazard reduction mechanisms, tables, drawings, manufacturers, suppliers, etc
04 p0620 A69-14952

Hardness reference data for metals and nonmetals, using hardness test results for data reliability
04 p0617 A69-15033

Thermodynamic function tables for 30 gases under ideal gas conditions up to 6000 K
04 p0686 A69-15153

Book on thermodynamic and thermochemical tables with charts on thermodynamic properties, physical chemistry and gas dynamics
04 p0688 A69-15459

Book on plate formulas and tables for designing structure components of various geometrical shapes and thickness covering bending, compression, loading, etc
05 p0833 A69-15726

Table of equivalent widths of isolated lines with combined Doppler and collision broadened profiles
05 p0796 A69-15747

Photoelectric observation of Sco X-1 variations with 91-cm reflector, tabulating results and estimating accuracy
06 p1008 A69-17695

Grey and very grey thermochemical tables for C-H and C-H-O species
[WSCI PAPER 68-38] 06 p0885 A69-17795

IR solar spectrum tables and graphs covering 10,657-12,857 A
06 p1008 A69-17809

Absolute coordinates of 906 lunar features derived and tabulated, eliminating errors due to atmospheric turbulence by using 120 lunar negatives
07 p1213 A69-18612

Elevated temperature mechanical properties data for commercially produced super-strength alloys supplemented by product description tables
08 p1328 A69-19913

Specific gravity data for olivine-pyroxene and enstatite chondrites, aerolites, siderites, amphoterites, pallasites and Butler meteorites
08 p1389 A69-20262

Solar system elements abundance compilation based on carbonaceous chondrites and nucleosynthesis in stars
08 p1401 A69-20903

Zinc oxidation in weakly alkaline media, discussing basic properties of electrochemical cells containing zinc
08 p1268 A69-21050

Stars closer than five parsecs including binary systems, luminosity, spectral type and mass
08 p1407 A69-21130

Tables of effective electron cross sections and macroscopic coefficients, Volume 1, covering hydrogen and rare gas molecular and atomic interactions with electrons
09 p1541 A69-21579

Radio telescopic survey for OH emission at 1667 MHz in interstellar dust clouds for catalog compilation, tabulating results
09 p1603 A69-22267

Electrical devices for detonation initiation in pyrotechnic equipment for space applications, tabulating characteristics
10 p1749 A69-23006

Specific heats of oxygen at coexistence from triple point to critical point and corresponding values for liquid phase
10 p1808 A69-23187

Tabulating experimental constant volume specific heats of fluid oxygen from triple point to 300 K at pressures to 350 atm
10 p1808 A69-23188

LOX thermodynamic properties from triple point to 250K and pressures to 350 atm, tabulating at uniform densities and temperatures
10 p1808 A69-23189

Photometric consequences of reflection effect in close binaries, tabulating light curves
10 p1776 A69-23218

Table of computerized three place E-M solutions for Kepler equation, noting revision of Astrand table
10 p1777 A69-23395

Six color stellar photometry of 159 field stars including subdwarfs, high velocity stars and 50 Hyades stars, tabulating color data
10 p1788 A69-24122

Environmental requirements of military specifications tabulated according to tests for altitude, temperature, vibration, shock, humidity, temperature/altitude, etc
11 p1862 A69-24331

Lithophile elements relationship in chondrites and basaltic achondrites, tabulating Ca-Al ratios and Ca, Al, Ti, Zr, Sr, Ba and Sc percentages
11 p1954 A69-24360

Orbital parameters changes computation in table form for binary systems with more massive component mass decrease
11 p1962 A69-25120

Comet Berbon and minor planet positions photographically recorded /1964-1967/
11 p1962 A69-25121

Tabulation of definite and indefinite integrals of products of error function with elementary and transcendental functions
12 p2121 A69-26395

Atmospheric models for electromagnetic scattering of monochromatic IR and microwave radiation by natural suspensions as hazes clouds and precipitation
12 p2030 A69-26467

Population densities, pumping rates, lifetimes, etc, of singly ionized krypton ion laser
12 p2109 A69-26638

Photoelectric and visual minima tabulated for eclipsing binaries, calculating light elements
12 p2160 A69-26853

Dwarf and subdwarf stars limb darkening tables for unblanketed nongray radiative model atmospheres
12 p2171 A69-27153

UBV observations of long period variable stars using reflecting telescope and refrigerated photocell with standard filters
12 p2172 A69-27156

Born-Mayer parameters simplifying computation of interatomic potential, tabulating numerical values for 104 mononuclear pairs of neutral ground state atoms
13 p2301 A69-27453

Regression coefficients obtained from satellite cloud observations applicability in constructing geopotential fields, tabulating coefficients obtained from ground stations
13 p2292 A69-27731

Spectrometric and photometric investigation of spectral characteristics of large sunspot 45 degrees from solar disk center, tabulating characteristics of 134 spectral lines
13 p2218 A69-28324

Solar radio emission data during IGY covering solar terrestrial disturbances, broadband bursts, solar indices, etc
14 p2513 A69-29321

Radial velocities of southern OB stars and supergiants noting tabulation of information
14 p2519 A69-29368

Provisional elliptic orbit computed for asteroid Floirac using Gauss-Encke and least squares method, tabulating residuals and ephemeris
14 p2521 A69-29585

17 November 1966 Leonids return, tabulating data from previous returns starting with October 899
14 p2525 A69-29715

Applied function theory, Volume 6, Tables of theta functions and elliptical functions with examples, Part I
14 p2471 A69-29774

Approximate ionization potentials for high ionization stages of elements with atomic numbers 31 to 92 obtained by binding energy calculations
14 p2488 A69-29923

Titanium corrosion resistance data tabulated for various environments and chemicals including salt solutions, organic chemicals and ionizable fluoride compounds
14 p2466 A69-29931

Photoelectric comet observation techniques, tabulating narrow and wideband filter combinations for determining parameter Q for various cometary spectral emissions
15 p2684 A69-30522

Solid state and gas lasers operational parameters tabulation including pulse durations, powers, energy flux densities, electric and magnetic field strengths, etc
15 p2633 A69-30708

Photoelectric /UBV/ photometry of Cepheids in Cygnus and Monoceros noting sequence stars near Nova Cyg 1948
15 p2692 A69-30772

Canum Venaticorum variable A star spectrum, listing all lines observed between 5000 and 6650 A
15 p2692 A69-30773

Observations of 123 southern radio sources made with two element variable spacing interferometer, tabulating and graphing results
15 p2696 A69-31166

Flux densities at 2695 MHz for radio sources, tabulating measured data, discussing spectral distribution indices
15 p2696 A69-31206

Revised proper motions for semiregular and RV Tauri variable stars tabulated from meridian observations and photographic positions, discussing computation methods
15 p2696 A69-31221

Photography of laser echoes on satellites, tabulating results
15 p2570 A69-31311

Photoheliographic data tabulation of sunspots positions and areas for 1961 obtained from various astronomical observatories
15 p2700 A69-31490

Monograph on proper motions of RR Lyrae variables, discussing data acquisition analysis
15 p2700 A69-31493

Quasi-stellar and related objects emission and absorption red shifts tabulation suggesting absorption lines origin
15 p2701 A69-31532

Air refractivity variations across horizontal and vertical boundary planes between two air masses of slightly different temperatures
17 p3028 A69-32880

Equipment environmental conditions tabulated to assist engineer in preliminary design considerations and in planning test programs for specimens
17 p2910 A69-33661

13 color narrow band photometry of 1000 bright stars in tubular form, discussing sample points, Balmer discontinuity, absolute energy calibration, etc
17 p3038 A69-33692

Red shift table for six galaxies near Coma Cluster from spectrograms of absorption lines
17 p3044 A69-34182

Parkes catalog of 1780 radio sources, noting inclusion of data concerning polarization, source structure, optical identifications, etc
17 p3045 A69-34199

UBV photoelectric investigation on southern globular clusters NGC 2808 and 1851, presenting star magnitudes and colors in tabular form and estimating reddening
18 p3190 A69-34290

Four color photometry data of late F type stars in general catalog tabulated with columns for HD and GC numbers, apparent visual magnitude, etc
18 p3195 A69-34430

Radio sources spectrum measurement results at cm wavelengths in tabular form, noting flux density relationship to frequency
18 p3200 A69-35132

Polar cap absorption effects on VLF transmission phase and amplitude in tabular form
18 p3103 A69-35185

Pulsars measured parameter data tabulation including right ascension, declination pulse repetition period, showing sources distribution and clusters
18 p3202 A69-35211

Solar activity /Madrid 1967/, detailing Wolf numbers, sunspots, chromospheric faculae, H filaments and prominences
18 p3202 A69-35290

Celestial spectra forbidden lines tabulated by element and ionization stages, describing laboratory spectrum analysis programs
19 p3421 A69-36212

Nova Delphini 1967 /HR Del/ observations in UPX-YZV photometric system, tabulating color indices
19 p3426 A69-36564

Minor planets osculating elements computer calculated and tabulated
20 p3596 A69-37309

Definitive orbit of comet 1943 I determined from photographic and visual observations
20 p3596 A69-37310

Comet Arend-Roland 1957 III orbit elements computer calculated and tabulated from worldwide observations, taking into account orbital perturbations caused by major planets
20 p3596 A69-37311

Minor planets positions computer calculated and tabulated from Tashkent 1963 and 1964 astrophot observations, stating time and equatorial coordinates
20 p3596 A69-37312

Minor planets positions computer calculated and tabulated from 1966 and 1967 Crimean astrophot observations, using Yale catalog reference stars
20 p3570 A69-37313

IC 4499 cluster variable stars coordinates in tabular form, showing high percentage of short period
20 p3598 A69-37462

X ray data in 44-80, 8-16 and 1-8 A bands telemetered by Solrad 9 satellite
20 p3588 A69-37473

Periods and magnitudes of RR Lyrae variable stars in M 2 cluster, tabulating photometric characteristics
20 p3599 A69-37477

Tabulated results of photographic plate measurements of minor planets positions at Leiden observatory /1938-1964/
20 p3605 A69-37789

Luminosity calibration for subluminescent stars and space density of blue subluminescent stars south of declination minus 45 degrees based on white dwarfs and binaries
20 p3612 A69-38160

MK spectral types for bright southern O and B stars
20 p3612 A69-38161

Photodetector responses to radiant energy from many stars tabulated for various photocathode materials and silicon detector
21 p3800 A69-38680

Modulation envelopes, tables of profiles and harmonic components for modulated waves in electrical and communications problems
21 p3673 A69-38778

Discreteness of distances to extragalactic objects, tabulating red shift values from Wilson formula for galaxy clusters
21 p3802 A69-38843

Cosmic radiation altitude profiles, giving tabulation of counting rates obtained by SPARMO flights at different locations
21 p3791 A69-39253

Tabulation of solar UV spectrum features between 3650 and 3000 A from intercomparison of photoelectric records and Second Revised Rowland, indicating wavelength relocations
22 p4014 A69-40146

Thermal conduction by electrons in stellar matter, presenting opacity tables for H, He, C and red giant cores and solar composition
22 p4014 A69-40147

Hydrogen high level transition probabilities formula, giving two tables of oscillator strengths
22 p3983 A69-40149

Atlas of H II regions in 20 nearby galaxies
22 p4015 A69-40153

Hartree-Fock calculations for wavelengths of K alpha X ray transitions, tabulating configuration and term energies, dipole integrals and relative multiplet strengths
22 p3984 A69-40156

Finding list of spectral type A7 stars and earlier in region at south galactic pole compiled from prism survey data
22 p4021 A69-40436

Tabulation of Uranus observations of Sao Paulo Observatory astrolabe in 1968, giving special attention to East and West passages during night
22 p4031 A69-40912

Photoelectric observations of eclipsing binary 32 Cygni during 1968 eclipse using standard UVB color filters, tabulating results of UVB photometry
22 p4032 A69-40946

Tabulated numerical values of Burgess general formula for computing dielectronic recombination rates
23 p4207 A69-41281

Tabulated photoelectric photometer measurements of Nova Vulpeculae 1968 No. 1
23 p4208 A69-41290

Faint OB stars data tabulation between Carina and Centaurus, noting open clusters and MK classification
23 p4211 A69-41488

Tabulated spectroscopic observations of Be stars included in Merrill and Burwell catalog
23 p4213 A69-41720

Interferometrically measured wavelengths tabulated for Th lines in 2747-4572 A range, using liquid nitrogen cooled hollow cathode lamp and Fabry-Perot interferometer
23 p4191 A69-42150

Radiative transfer theory applied to layer cloud with normal liquid moisture content, discussing volume extinction, scattering and absorption coefficients, etc
23 p4184 A69-42177

Equivalent width measurements of Arcturus IR line spectra using Fourier transform spectroscopy, tabulating results
23 p4222 A69-42453

Tabulation of photographic and photoelectric spectrophotometrically obtained relative spectral line intensities for planetary nebula IC 5217, discussing interstellar absorption
24 p4376 A69-42663

Extragalactic radio sources flux densities at 5009 MHz tabulated, ascribing accuracy variations to uncertainty in receiver gain and dish efficiency
24 p4382 A69-42922

Fluid logic feedback control circuit synthesis using synthesis table, describing procedure to assign memory valves and switching signals
24 p4292 A69-43290

TABS [CONTROL SURFACES]

Aerodynamic control surface/trim tab coupling coefficients in subsonic two dimensional unsteady flow using matrix method valid for motion involving harmonic oscillations
17 p2895 A69-33597

TABULATING

U TABULATION PROCESSES

TABULATION

Tabular listing of Soviet satellites, spacecraft, probes and rockets launched between October 1957 and October 1967
13 p2355 A69-27359

TABULATION PROCESSES

Data tabulation and calculation for atmospheric refraction between 5-40 km based on GOST standard atmosphere
15 p2646 A69-30160

TACAN

Tactical air navigation system redesign with integrated circuits, obtaining weight reduction and improved performance and reliability
13 p2227 A69-27389

Tacan navigation system developments including data transmission, links to airborne computers and traffic control transponders
17 p3003 A69-34181

TACHISTOSCOPES

Topographic distribution of cortical potentials produced with tachistoscope and by stroboscopic stimulation, studying occipital and frontal difference
22 p3884 A69-40819

TACHOMETERS

Transistorized tachometer for rotational speed measurement and overspeed protection of automotive internal combustion engines
12 p2090 A69-26213

TACHYCARDIA

Human heart chronotropic reactions during centrifuge acceleration tests up to tolerance limit establishing sinus tachycardia in various degrees
22 p3877 A69-40242

Heart rate measurements in ski jumpers with radiotelemetric system revealing tachycardia during climbing and emotional stress
23 p4078 A69-41313

Cardiovascular effects of hypoxia in conscious anesthetized dogs in environmental chamber discussing artery pressure, tachycardia, stroke volume and cardiac output
23 p4078 A69-41313

TACKINESS

Elastomeric adhesives diffusion theory, tack increasing methods, cast polymer films, properties and applications in shoe manufacturing and sealants
14 p2468 A69-29344

TACTICAL AIR NAVIGATION

U TACAN

TACTICS

Tactical aspects of pursuit and evasion, emphasizing analysis of conceptual framework and construction of analytic models
03 p0457 A69-13899

Optimum evasion tactics for aircraft pursued by missile, using steepest ascent method for maximization of distance of closest approach
06 p0866 A69-17400

FM tactical radios frequency assignments rule, considering transmitter-receiver and interfering transmitter-receiver distances, equipment power, information transfer probabilities, etc
23 p4126 A69-42227

TACTILE DISCRIMINATION

Prolonged visual deprivation effect on pressure sensitivity of finger, forearm, neck and leg, noting effect after restoration of normal visual stimulation
13 p2210 A69-28311

Visual and tactual interaction in judgments of vertical in dark room experiments, discussing effects of various reference systems
24 p4271 A69-42755

Interpolated position and orientation perception by vision and active touch
24 p4275 A69-43110

Sensory information processing model for tactile perception using array of airjet and piezoelectric stimulators applicable to display design and nervous system investigation
24 p4276 A69-43277

TAGGING

U MARKING

TAIL ASSEMBLIES

Aerodynamic stick force and speed characteristics of various horizontal tails and elevator trimmers, noting zero stick force case
09 p1434 A69-22597

Conical flow past cruciform wing-body and tail-body systems, considering various positions of leading edge with respect to Mach cone
15 p2548 A69-31000

Aerodynamic aspects of tail rotor design and structural dynamics of stiff inplane configurations discussing blade natural frequencies
[AHS PAPER 342] 17 p3059 A69-33500

Tail rotor aerodynamics, discussing ambient conditions, maximum thrust, precession effects, fin interference, noise reduction, etc
[AHS PAPER 300] 17 p2895 A69-33544

Bird impact resistance of polyurethane foam filled tailplane
17 p2901 A69-33664

Statistical weight estimation equations developed by constrained regression analysis, noting application to vertical tail of cargo/transport aircraft
[SAWE PAPER 762] 18 p3220 A69-34877

Tail plane shape for optimal damping of rotational motion and elastic torsional deformations of aircraft body about longitudinal axis using calculus of variations
21 p3647 A69-38845

TAIL PLANES
U HORIZONTAL TAIL SURFACES

TAIL SURFACES
U HORIZONTAL TAIL SURFACES
U SWEPTBACK TAIL SURFACES

TAILLESS AIRCRAFT
U F-106 AIRCRAFT

TAILORING
U DESIGN

TAILS [ASSEMBLIES]
U TAIL ASSEMBLIES

TAKEOFF
NT VERTICAL TAKEOFF
Drag and spray effects due to slush and water on runways during aircraft takeoffs
01 p0011 A69-11048
Heligyro type takeoff and landing maneuvers, discussing M 211 takeoff jet thrust, pressure ratio, tip speed, etc
04 p0547 A69-14816
Control and recording device for parameters and information relating to takeoff and landing, using detection elements and cross wire on runway
08 p1347 A69-20780
Jet aircraft runway friction due to mud and water noting relation to takeoff length
17 p2903 A69-34216
STAN integral weight and balance system providing aircrews with takeoff gross weight and CG data [SAWE PAPER 755]
18 p3136 A69-34882
Takeoff and landing analysis digital computer program [TOLA] developed by Air Force Flight Dynamics Laboratory for quantitative performance analysis [AIAA PAPER 69-810]
19 p3289 A69-35630
Aircraft takeoff airborne phase trajectory analysis, deriving expressions for projection angle, velocity, path length and instantaneous altitude
19 p3247 A69-35817
Refused takeoff as critical maneuver in ground operations during jet transport accident investigation, emphasizing pilot anticipation of conditions and preplanning actions [SAE PAPER 690378]
23 p4062 A69-41654
Booster engines for thrust augmentation of commercial transports, considering tradeoffs in takeoff distance, payload, range, safety and noise patterns [SAE PAPER 690381]
23 p4201 A69-41667

TAKEOFF RUNS
Monograph on length requirements for takeoff and landing of jet transports covering airport classification, roll distance formulas and long range transport performance nomograms
08 p1301 A69-20717
Monograph on physicochemical principles of takeoff monitoring systems for large aircraft covering taxiing, safety control systems design, analog simulation, etc
12 p2128 A69-26119
Accelerate-stop criteria examined from human engineering standpoint, discussing flight simulator study of pilot reaction times for transition to rejected takeoff configuration [AIAA PAPER 69-772]
19 p3244 A69-35650
Runway grade relation to jet aircraft takeoff length
19 p3296 A69-36874
STOL takeoff optimal trajectory maximizing altitude at given runway distance, using aircraft models [AIAA PAPER 69-935]
21 p3649 A69-39427
Takeoff indicator design based on solution of equilibrium equation for forces acting on aircraft along drag axis
24 p4253 A69-43085

TAKEOFF SYSTEMS
U AIRCRAFT LAUNCHING DEVICES

TANDEM ROTOR HELICOPTERS
U CH-46 HELICOPTER
U CH-47 HELICOPTER

TANDEM WING AIRCRAFT
NT X-22A AIRCRAFT
Tandem airfoils wing-tail interaction flutter analysis, using three dimensional vortex lattice aerodynamic theory [AIAA PAPER 69-57]
06 p1028 A69-18105

TANGENTS
Error analysis involved in calculating tangent functions defined by nonlinear differential equation solution, using digital differential analyzer
13 p2225 A69-27968

TANK GEOMETRY

Draining liquid surface dip formation in tanks of arbitrary shapes and drain hole positions
09 p1483 A69-21999
Tank configurations allowing for sloshing in liquid fuel reaction control system in spinning satellite
18 p3219 A69-34796
Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects [AIAA PAPER 69-1004]
22 p3921 A69-40378

TANK TRUCKS
Fueling procedures for Boeing 747 aircraft, discussing design and operation of large capacity fuel trucks
10 p1674 A69-23631

TANKS [CONTAINERS]
NT CYLINDRICAL TANKS
NT FUEL TANKS
NT PROPELLANT TANKS
NT SPHERICAL TANKS
NT STORAGE TANKS
NT WING TANKS

Hard-drawn steel wire wound pipes and tanks, properties and design calculation, discussing laminates and permissible stress
08 p1414 A69-20487
Optimal control of vibrations of liquid in cylindrical container with vertical generatrix and flat bottom, using dynamic programming
21 p3694 A69-38849
Optimal control of liquid vibrations in rectangular container moving in horizontal direction, deriving algebraic equations system for optimal functional
21 p3694 A69-38854

TANTALUM

Anomalous discontinuous stress relaxation in sintered tantalum
02 p0265 A69-12003
Tantalum diffusion layer on refractory cobalt and nickel base alloys analyzed by electron microprobe [ONERA-TP-665]
06 p0941 A69-17097
Dissociation of hydrogen on tantalum using modulated molecular beam mass spectrometry
06 p0960 A69-17107
Diffusion coefficient of interstitial oxygen atoms in tantalum by elastic energy dissipation measurements as temperature function, discussing relaxation effect
07 p1168 A69-19452
Saturation electron emission characteristics from incompletely outgassed Ta wire emitters immersed in Cs vapor using plasma anode technique, noting oxygen effects
09 p1437 A69-21812
Diffusion coefficients of carbon in tantalum, niobium and vanadium by sectioning method, using carbon 14 as tracer
11 p1906 A69-25575
Flexure of Ta and Nb thin rectangular specimens during high temperature oxidation, showing stress generation due to O dissolution into metal surface [ECS PAPER 87]
15 p2641 A69-31541
Ta single crystal growth condition by zone melting, discussing orientation and purity relationship
16 p2803 A69-32490
Ta type I and II wire resistance in transverse magnetic field during superconducting to normal transition, discussing strain and impurity effects
17 p3016 A69-33791
Single crystal Ta and Ta base bcc solid solution strengthening and weakening as function of temperature and strain rate
23 p4178 A69-42358

TANTALUM ALLOYS

Omega phase and beta solid solution in Zr-V-Ta alloys quenched from 900 C
02 p0263 A69-11850
Work hardening characteristics of Ta and Ta-base alloy single crystals as function of temperature and interstitial concentration
05 p0778 A69-15758
Coated refractory tantalum alloy as ductile, weldable material for application on hypersonic aircraft or reusable reentry vehicles at high temperatures
09 p1526 A69-22326
Tungsten disilicide coated Ta-W alloy oxidation mechanisms, comparing coatings protective properties at high temperatures
13 p2280 A69-28137
Nb-Ta alloys oxidation kinetics at high temperature and structure and composition of oxide films and scale layers, discussing anomaly in oxidation rate temperature dependence
14 p2464 A69-29650

Optical constants of Ta-W and Nb-Mo measured in IR and visible ranges as function of incandescent temperatures
17 p2990 A69-33574
Heat treatment effect on superconducting properties of deformed Nb-Ta alloys, noting critical current density
19 p3345 A69-36303
Oxidation resistant silicide coatings for tantalum and tungsten alloys at elevated temperatures
21 p3730 A69-38673

TANTALUM CARBIDES

Preparation and properties of NbC-WC and TaC-WC carbides, analyzing hardness, resistivity, thermal expansion and dihedral angle
05 p0782 A69-16796
Controlled solidification in Co-Ta-C system to develop pseudobinary eutectic mixture containing TaC crystals aligned parallel to growth direction [ONERA-TP-673]
07 p1167 A69-19339
Book on hard alloy properties, discussing bending and compression properties, tensile, torsional and impact strength, wear resistance and thermal shock resistance
12 p2111 A69-25902
Integral normal emissivity of Ta and Hf carbides at temperatures from 1300 to 3000 K measured by radiation method in vacuum
15 p2640 A69-30984
Orientation relationships between phases in Co-Ta pseudobinary eutectic alloy, discussing Co fcc-hcp allotropic transformation [ONERA-TP-714]
17 p2988 A69-33395

TANTALUM COMPOUNDS

Niobium hydride and tantalum hydride formation using metal powders, noting solid phases during dehydrogenating
09 p1448 A69-21599
Analytical, IR absorption and polarographic analysis of cyclic niobium IV and tantalum V/esters
11 p1832 A69-24575

TANTALUM NITRIDES

Thin film tantalum nitride resistors technology and production, evaluating projected reliability of resistance circuits as function of operating and environmental conditions
15 p2628 A69-30846

TAPE MERGING

U DATA PROCESSING
U MAGNETIC TAPES

TAPE RECORDERS

Pseudorandom scanned TV signal distortion due to flutter and skew introduced by tape recorder, computing system SNR for distortion as additive random noise
01 p0033 A69-10999
Tape recorder for simultaneous double channel recording of physiological experiments, describing circuit modifications and additional circuits
07 p1131 A69-18640
Rotary head units used in telemetry magnetic recorders, explaining concepts and advantages of rotary scanning
07 p1077 A69-18826
High reliability magnetic tape recorders for satellite, aircraft and drone applications
07 p1133 A69-19104
Compatibility requirements and considerations of range telemetry tape crossplay operations, discussing major classes
07 p1133 A69-19117
Effects, measurement and analysis of flutter in instrumentation recorders
07 p1133 A69-19118
Magnetic tape recording of ultrasonic test information with oscilloscope used for playback
07 p1117 A69-19697
Magnetic tape recorder/reproducer for FM analog test data
10 p1691 A69-23233
Dual inertia magnetic tape recorder/reproducer combining low wideband flutter and low time base errors
10 p1693 A69-23289
Spacecraft data storage requirements, discussing use of servo-driven tape recorders in data processing systems
18 p3107 A69-35096
Buffer shift register with feedback control during tape recorder playback to obtain variable delay to compensate for recorder time base error
19 p3312 A69-36284
Tape recorder premission calibration requiring standard and external test instruments
20 p3546 A69-38233

High speed tape transport characteristics, discussing capstan design, negative progression, reel-capstan interface, etc

23 p1465 A69-41776

TAPER

U TAPERING

TAPERED COLUMNS

Magnetic field plane radiation patterns for tapered dielectric rod antennas computed by Schelkunoff principle, noting taper angle effect on lobes

09 p1464 A69-22097

TAPERED WINGS

U SWEPT WINGS

TAPERING

Tubular metal parts and assemblies, discussing forming, forming, beading, tapering and step drawing

03 p0435 A69-13918

Power law taperings for minimizing peak to trough deflection of cross section of strip bent longitudinally into cylindrical surface

06 p1023 A69-17374

Short multiconical TE sub 01 mode X band taper for connecting two different diameter circular waveguides

09 p1468 A69-22604

Postbuckling of rectangular plates with exponential variation in thickness, analyzing large deflection equations using dynamic relaxation method

15 p2704 A69-30291

Radiation field of tapered dielectric rod antenna by Schelkunoff equivalence principle, investigating input impedance variation with axial length and taper angle

21 p3681 A69-38444

TARE (DATA REDUCTION)

U DATA REDUCTION

TARGET ACQUISITION

Optimal distribution of search effort for moving target location, suggesting Markovian decision models

01 p1014 A69-10653

Moving target indicator /MTI/ performance degradation by limiting clutter analyzed for various pulse cancellers and verified by time-domain Monte Carlo simulation

03 p0390 A69-13198

Moving window radar detector design for moving targets, giving chart for SNR derivation to obtain given detection probability

04 p0558 A69-15073

Upper wind observation and computation accuracy, comparing radar and slide rule instrument errors

06 p0950 A69-17788

UHF telemetry flight tests at White Sands Missile Range, discussing multipath and target scintillation problems

07 p1082 A69-19116

Experimental circuit for simulating radar target tracking system based on split range gating, noting tracking role of error signal

08 p1300 A69-20109

Open loop suboptimal control for linear time dependent tradeoff between energy expenditure and probability of target set entry

11 p1860 A69-25443

Radar SEP /spherical error probable/ for defining error ellipsoid in three dimensional accuracy and CEP /circular error probable/ for defining two dimensional accuracy

13 p2221 A69-27963

Probability matrix for n order transition independent of decision taking method, applying fundamental matrices to analysis of mean number of false targets

14 p2410 A69-28836

Statistical distribution functions for radar cross section of flying aircraft

14 p2414 A69-29500

Binary-quantized signal packet center for target azimuth determination, discussing antenna radiation pattern role

15 p2566 A69-30332

Target trajectories determination based on radar data with allowance for association between neighboring readings, using statistical characteristics obtained with Markov chains

15 p2566 A69-30335

ASTRID high altitude sounding rockets orientation system aligning payload cones to target outside earth atmosphere, discussing software simulation with analog and digital computers, etc

17 p3001 A69-33424

Kormoran airborne missile weapon system for attacking sea-going targets, discussing navigation guidance, radar tracking and homing system

17 p3050 A69-33697

Associative processor applied to interceptor radar system, noting processing time independence from target number and compatibility with real time systems

17 p2931 A69-34071

Onboard hybrid computer for helicopter fire control system, generating turret pointing angles and corrections

17 p2934 A69-34074

Closed loop target tracking system generating error signals for aligning target with tracking axis

19 p3310 A69-36063

Active interferometer controlled telemetry tracking system for missile range, discussing automatic target acquisition, dish feed, costs and optimized data-channel antenna patterns

19 p3271 A69-36253

Moving target indication, discussing target motion effects dependence on Doppler imaging radar scan rate and compression ratio

20 p3490 A69-37644

Single stage rocket control and trajectories for maximum target strike probability within given range

21 p3818 A69-38857

Targeting technique for Atlas/Centaur Mariner Mars 1969 mission, noting suitability to flyby, orbiter or landing interplanetary missions

[AIAA PAPER 69-881]

21 p3764 A69-39407

Guidance control systems for moving plants pursuing targets, basing design on target characteristics and plant phase coordinates

21 p3687 A69-39643

Asymmetry method for precision alignment of rectilinear systems, using laser light diffraction behind misaligned target

21 p3742 A69-39781

Optimal flight regime determination for variable mass body pursuing target by straddling method, presenting motion equations and approximate solutions

21 p3818 A69-39819

Horizontal tracking eye movements response to unpredictable constant velocity target motions with or without saccadic position corrections recorded by contact lens optical lever

22 p3881 A69-40856

Hand and thumb exercise effects on acquisition tracking task performance

23 p4101 A69-41453

Compound fading exponential /CFE/ clutter model for radar target detection, describing automatic detection applications

23 p4117 A69-41604

Radar detection performance evaluation procedures based on integration, collapsing and fluctuation losses estimates for swirling target models and partially correlated targets

23 p4132 A69-42547

Policies and controller design for pursuing vehicle developed in terms of pursuit-evasion differential games

24 p4341 A69-43295

Optimal allocation of pulses for array radar tracking large number of targets simultaneously, using discrete time maximum algorithm

24 p4283 A69-43311

TARGET DRONE AIRCRAFT

NT FIREBEE 2 TARGET DRONE AIRCRAFT

Firebee 2 /BQM-34E/ turbojet-propelled recoverable supersonic aerial target construction, performance prediction and missions

09 p1434 A69-21901

Multiple drone aircraft automatic control system, discussing preprogrammed mission path and controls of altitude, plan position and velocity

14 p2392 A69-29495

TARGET PENETRATION

U TERMINAL BALLISTICS

TARGET RECOGNITION

Visual sonar target detectability probability function of retinal position and brightness contrast

02 p0203 A69-12218

Space surveillance radar system sensor misassociation of one space object for another, noting applicability to sonar and optical sensors

02 p0210 A69-12388

Digital modified discrete Fourier transform Doppler radar processor for tactical aircraft

03 p0389 A69-13196

Automatic sequential detector for noncoherent moving target indicator radar, describing noise and clutter residue control

03 p0389 A69-13197

Passive linear FM pulse compression radar systems: detection capability compared with matched filter performance

03 p0390 A69-13211

Weighted pulse trains for clutter suppression during radar target detection

04 p0562 A69-15444

Multiple target monopulse radar signal processing technique

04 p0562 A69-15474

Electronically scanned X band array used as receiving antenna for target recognition radar

04 p0562 A69-15474

Sonar receiver reduced averaging processing: presence of extended and point targets compared with full averaging processor

04 p0562 A69-15474

Filter effectiveness in improving air to ground target identification performance on TV display

06 p0887 A69-17210

Individual differences and relation to Witkin concept of perceptual style in target identification in aerial photographs

06 p0880 A69-17210

Limiting speed for target tracking hypersonic vehicles due to electrons formation through aerodynamic heating, calculating allowable flow conditions, maximum speeds and electron distribution

07 p1086 A69-19509

Input signal history analysis in recognition of moving or changing objects based on classification definitions and Wald sequential analysis

08 p1297 A69-20419

Alphanumeric characters to identify radar targets on PPI display for air traffic control, considering technique for reducing smear

09 p1495 A69-21675

Coherent optical target recognition through randomly turbulent medium for imaging system offsetting image degradation due to turbulence

11 p1894 A69-24470

Airborne IR line scanning systems for latent forest fire detection, discussing discrimination module for automatic identification of hot targets

12 p2193 A69-26994

Airborne IR remote sensing techniques for fire detection, considering marginal and submarginal targets

12 p2098 A69-26995

Input signal history analysis in recognition of moving or changing objects based on classification definition and Wald sequential analysis

14 p2427 A69-29657

Optimal radar receivers and waveforms with limited dynamic range for detecting point target masked by thermal noise and clutter returns

17 p2921 A69-33625

Radar target simulator approximating pulse radar receiver output for evaluating amplitude-sensing video target detection devices

17 p2921 A69-33629

Intermittent noise effects on human target detection to test neutral ratio dependence on noise intensity level, noting attention flexibility

17 p2911 A69-34008

Spectral reflectances of objects and vegetative backgrounds to generate color photographic technique increasing detection sensitivity and rate

18 p3133 A69-34247

Target discrimination from background, discussing spatial, spectral, temporal and polarization effects

19 p3373 A69-36054

System components for spatial discrimination implementation scheme, discussing IR detector arrays and optical imagery processing

19 p3373 A69-36055

Object discrimination based on IR spectral differences, reviewing calibrated radiometers, relative spectrometers and imaging sensors

19 p3373 A69-36056

Thermal IR imaging devices for shape recognition and target position, emphasizing optical mechanical image or object plane scanners using point detectors

19 p3310 A69-36064

Luminescence effects on apparent size and shape of foveally fixated targets of various forms

19 p2359 A69-36458

Radar design for target detection, tracking and identification, modeling plasma effects on radar cross section of reentry vehicles based on wave-plasma interactions

20 p3485 A69-36925

Monograph on selection of radar echoes from nearly colocated reflection centers, discussing guided missile multiple target resolution

22 p3899 A69-40533

Grating size effect on threshold of grating pattern for various colors of illumination and target orientations
22 p3879 A69-40840

Visual suppression association with smooth following and saccadic eye movements in tracking slow moving target
22 p3879 A69-40842

Visual backward masking experiment for studying overlapping and nonoverlapping contours of target and masking stimuli straight line
22 p3879 A69-40843

Human peripheral retina contrast sensitivity determined by measuring psychophysically for sinusoidal grating target describing luminance effects
22 p3882 A69-40870

Assignment algorithm for target recognition in multiradar tracking systems
22 p3902 A69-41250

Book on new concepts in radars covering ideal reception, moving targets, autocorrelation, SNR, amplitude distribution, clutter, etc
24 p4283 A69-43168

TARGET SIMULATORS
Radar target simulator approximating pulse radar receiver output for evaluating amplitude-sensing video target detection devices
17 p2921 A69-33629

TARGET THICKNESS
Thermal-neutron flux generated by high energy protons in water moderator surrounding thick targets calculated as function of position
02 p0279 A69-11837

Charge exchange collisions in ground state and ionic hydrogen incident on cesium vapor, measuring beam components after passage through target
08 p1356 A69-20737

Hypervelocity impact of spheres on thin targets studied with numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model
[AIAA PAPER 69-357] 13 p2366 A69-28290

Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing
[AIAA PAPER 69-375] 13 p2367 A69-28305

TARGETS
NT RADAR TARGETS
NT TARGET DRONE AIRCRAFT
Target production device for deuterium plasma clouds in vacuum with Q switched neodymium laser
01 p0090 A69-10222

Electromechanical retracting pedestal for solid target injection into vacuum system and ionization by focused Q switched laser beam
03 p0439 A69-13105

Transient response of targets subjected to hypervelocity impacts and quantitative aspects of impact process, noting study of wax targets interiors
07 p1234 A69-19380

Image tube storage target mesh electrode structure and transmission data for electron beams of various velocities, noting secondary electron redistribution control
11 p1848 A69-24749

TASK COMPLEXITY
Manual control using matched manipulator technique, noting control task complexity decrease and improved performance
02 p0202 A69-11951

Component total task relationships, analyzing simple and sequential practice effects with aid of Melton Complex Coordinator
02 p0203 A69-12214

Displays and controls requirements in manned spacecraft to integrate man into vehicle system, noting man capability for task diversity
08 p1312 A69-19968

Human information processing rates during one and two axis compensatory tracking tasks with secondary auditory task
10 p1650 A69-23880

Target displacement and track coherence in pursuit tracking tasks experiments for human performance studies
11 p1829 A69-24737

Model for temporal structure of human behavior from analysis of temporal information treatment in subjective synchronization task
12 p2025 A69-27084

ESRO 1 satellite centralized control system, discussing housekeeping system responsible for task execution in connection with power supply
15 p2702 A69-31083

Mission task performance oriented approach to winged helicopters flying and handling qualities, considering wings and horizontal stabilizers influence
[AHS PAPER 360] 17 p2900 A69-33522

Ergonomics and aviation medicine, discussing biotechnological aspects of information in man machine systems and observation tasks
17 p2915 A69-33770

Color coding effect on alphabetic filing names, comparing first and second letter codes and no color code condition
17 p2916 A69-34004

Human performance reliability, testing mathematical model application and implications of time to first error concept by vigilance task
18 p3097 A69-34478

Reliability tasks vs product reliability, discussing differences in effectiveness and management programming
18 p3143 A69-34484

Factor analysis of complex perceptual-motor performance of man, measuring speed, flexibility, balance and strength
18 p3098 A69-35085

Complex program management emphasizing systems engineering management, noting applications to aeronautical systems
[RAES PAPER 9] 22 p4053 A69-40489

Human performance on button pressing task with fixed ratio fixed interval reinforcement schedules
23 p4081 A69-41439

Human mental performance impairment at simulated 8000 ft altitude indicated in increasingly difficult tests
23 p4102 A69-41680

Basic task archetypes in man-computer problem solving including detection, planning, optimization, designing, etc
24 p4274 A69-43019

TASK SEQUENCERS
U CONTROL EQUIPMENT
U SEQUENTIAL CONTROL

TASKS
U AUDITORY TASKS
U VISUAL TASKS

TASTE
Human taste perception mechanism and taste system anatomy
21 p3652 A69-38783

TAURUS CONSTELLATION
Taurus A 21 cm absorption line frequency decrease during optical path approach to sun, discussing gravitational and electromagnetic origin
04 p0661 A69-15148

Celestial X ray sources astronomy, discussing emission mechanism in 2 to 100 kev range and balloon observations in Cygnus and Taurus constellations
05 p0817 A69-16715

Taurus A flux density measurement at 4.3 mm with 36-ft antenna at National Radio Astronomy Observatory to determine spectrum unambiguously
09 p1591 A69-21450

Continuous radiation spectrum of Taurus A in far IR using indium antimonide detector of Rollin type
09 p1597 A69-22156

Preliminary observations of Tau-A, Cas-A and Cyg-A with multiple-element interferometer
10 p1777 A69-23397

Crab Nebula radio emission spectrum in decimeter wavelength range indicating emission spectral index decrease from Taurus A
10 p1784 A69-23941

Reddened M supergiant 119 Tauri IR spectra and IR absorption by CO and SiO molecules in stellar atmosphere and silicate mineral in interstellar grains
10 p1786 A69-24104

Proper motions of low luminosity stars in Hyades cluster, noting photoelectric observations
12 p2152 A69-25797

Revised proper motions for semiregular and RV Tauri variable stars tabulated from meridian observations and photographic positions, discussing computation methods
15 p2696 A69-31221

Zeta Tauri shell spectrum radial velocity measurement results compared with extrapolated seven year curve by Delplace
20 p3599 A69-37471

Balloon-borne proportional counters to measure X rays intensity and spectral distribution from Taurus X-1 and Cygnus X-1
20 p3593 A69-38153

TAUTOMERS

Mass spectra peaks of N-Acyl-2-indolinols fragmentation processes upon electron impact, noting compounds predominance in open chain tautomer gas phase
15 p2561 A69-30407

TAYLOR INSTABILITY

Taylor column existence in compressible atmosphere, discussing baroclinicity and stratification effects in earth and Jupiter atmospheres
02 p0326 A69-12697

Numerical solution of axisymmetric incompressible viscous fluid flows about rotating cylinder, Taylor vortex between cylinders and through labyrinth seal
03 p0419 A69-13990

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow
05 p0745 A69-15780

Rayleigh-Taylor instability for interface between two uniform superposed fluids under combined effect of horizontal and vertical magnetic fields
07 p1182 A69-19275

Rayleigh-Taylor instability in synchronous liquid metal MHD generators, showing stabilization by channel positioning and threshold power rating
13 p2307 A69-27508

Turbulent diffusion and Rayleigh-Taylor instability in inhomogeneous flow of combustion gases circulating through magnetic field
13 p2310 A69-28032

Rayleigh-Taylor instabilities in two fluid hydraulic model, noting perturbation direction and Lorentz forces effects on instabilities growth time
13 p2310 A69-28033

Gas compressibility influence on laminar to turbulent boundary layer transition determined using Taylor hydrodynamic finite perturbation model
14 p2389 A69-28974

Numerical approximation of Taylor vortices in viscous incompressible fluid flow between concentric rotating cylinders, using truncated eigenexpansions
15 p2593 A69-31518

Taylor vortices calculated as branching solutions of nonlinear Navier-Stokes boundary value problem
17 p2958 A69-34152

Secondary steady flow /Taylor vortices/ between rotating cylinders, discussing development due to stability loss of Couette flow
18 p3123 A69-35032

Incompressible electrically conducting fluid in presence of magnetic field and Coriolis forces, analyzing Rayleigh-Taylor instability by variational principles
20 p3577 A69-38195

Electrohydrodynamic Rayleigh-Taylor bulk instability in initially static stratified fluid under electric stress
20 p3578 A69-38235

Naimark theorem extended to class of nonself-adjoint eigenvalue problems in hydrodynamic stability, considering Orr-Sommerfeld equation and Taylor stability problem
21 p3754 A69-38426

Taylor instability nonlinear oscillations, obtaining uniform solutions for wavenumbers near and larger than cut-off
21 p3693 A69-38703

Cylindrical bubbles stability in vertical pipes from photographs, describing wake, spacing, pressure pulsations and convection cells effects
[ASME PAPER 69-HT-28] 24 p4411 A69-43540

Taylor Goertler vortex formation effect on heat transfer through boundary layer on concave wall
[ASME PAPER 69-HT-3] 24 p4414 A69-43563

TAYLOR SERIES
Bernard convective flow as function of Rayleigh and Taylor numbers in thin variable rotating silicone oil layer determined by flow photographs
13 p2377 A69-28172

Taylor expansion applied to solution of nonlinear simultaneous algebraic equations in analyses of nonlinear structural systems using finite differences or elements
15 p2711 A69-30871

Taylor series expansion used in correcting quantized digital coefficient errors in hybrid feedback control system
18 p3111 A69-34687

Controlled-variable prediction display based on Taylor series computation, describing acceleration system simulator and human operator performance
19 p3313 A69-36414

Jacobi polynomial series analytical expansion, studying relationship to Taylor series singular points
21 p3757 A69-39537

Differential approximation for radiant energy loss in nonequilibrium plasma generated from truncated Taylor series expansion of radiation source function
22 p3988 A69-40102

TEACHING U EDUCATION TEARING

Drop-weight tear tests dependence on specimen thickness and metallurgical properties
09 p1503 A69-21389

Fracture toughness of AlZnMgCu alloys, employing sharp notch tension, tear and precracked Charpy impact tests
16 p2800 A69-31780

Thickness direction tensile properties, ultrasonic attenuation and mild steel plate lamellar tearing in multipass fillet joints measured by weld cracking test
24 p4320 A69-42942

TECHNICAL WRITING

Scientific and technical information flow sources, showing DOD user need within defense industry and importance of local work environment
02 p0204 A69-12219

TECHNIQUES U METHODOLOGY

TECHNOLOGIES NT BIOTECHNOLOGY NT MILITARY TECHNOLOGY

Technology and education - Conference, Los Angeles, September 1968
10 p1668 A69-22971

Technological forecasting by intuitive forecasts, consensus methods, analogy, trend extrapolation and structural models
13 p2382 A69-28040

Technology and social progress - ASS Conference, Washington, D.C., March 1968
17 p3076 A69-34039

Relative technological standing of U.S. and Europe, discussing meaning and existence of technology gap
17 p3076 A69-34040

Delphi technique of technological forecasting used for R and D planning
20 p3639 A69-37353

Technical problem solving model based on tape recorded protocols of engineers engaged in R and D project
20 p3640 A69-38020

U.S. aerospace technological forecasting involving space flight, air transport and V/STOL aircraft
22 p4052 A69-39930

TECHNOLOGY FEASIBILITY SPACECRAFT

Space simulation tests in TFS/Technological Feasibility Spacecraft/program, discussing two interplanetary cruise modes and deorbit mode selected for simulation
02 p0227 A69-11757

Technology Feasibility Spacecraft/TFS/sterilization and bioassay program during assembly, analyzing sampling and cleaning procedures
09 p1446 A69-22358

TECHNOLOGY UTILIZATION

Microwave applications of monolithic and hybrid semiconductor circuit technologies, considering cost and performance
01 p0039 A69-10188

Aerospace technology role in economic and social benefits
[UN PAPER 68-95321] 01 p0178 A69-10467

Space technology contributions to medical problems, discussing organization and achievements of biochemical application program of NASA
[UN PAPER 68-95417] 01 p0020 A69-10471

Space applications program including communications and navigation meteorology, earth resources survey and geodesy
[UN PAPER 68-95437] 01 p0178 A69-10472

Space system engineering courses background, objectives and results at MIT and Stanford University dealing with applications of space technology
[UN PAPER 68-95870] 01 p0178 A69-10485

Space techniques for application to civil aviation, discussing air to ground communications, air traffic monitoring and navigation and weather forecasting by satellite
[UN PAPER 68-95349] 01 p0179 A69-10490

Small earth stations in future communication satellite systems, discussing applications, characteristics and equipment
[UN PAPER 68-95751] 01 p0028 A69-10492

Satellite TV systems for India, alternatives and costs
[UN PAPER 68-95750] 01 p0028 A69-10495

Marine requirements possible satisfaction by using space techniques to improve long range communications to achieve safety at sea and shipping operations efficiency
01 p0161 A69-10503

Aerospace research applications in agriculture and forestry, discussing information acquisition for worldwide coverage
[UN PAPER 68-95393] 01 p0065 A69-10504

British contributions to communication satellite earth station technology covering antennas, low noise amplifiers, traveling wave tubes and threshold extension demodulators
[UN PAPER 68-95843] 01 p0054 A69-10507

NASA Technology Utilization Program, discussing information dissemination
[UN PAPER 68-95313] 01 p0179 A69-10512

Earth surveying methods by artificial satellites, discussing applications to undeveloped regions
[UN PAPER 68-95793] 01 p0065 A69-10523

Integrated circuit manufacturing status, discussing raw materials, crystal imperfections, surface damage, epitaxy and diffusion techniques
01 p0045 A69-10650

Applied magnetics - IEEE Conference, Washington, D.C., April 1968
01 p0045 A69-10712

NASA LOX and liquid hydrogen barges, discussing storage tank design, acceptance testing and operating conditions
01 p0056 A69-11150

MHD technology applications to industry and cost and performance of MHD generators
01 p0013 A69-11394

Heterojunction band model and carrier transport mechanisms emphasizing applications to heterophotodiodes, solar cells and hetero field effect transistors
02 p0294 A69-11598

Aerospace management technology transferability to problems of society and government
02 p0355 A69-11754

Electromagnetic wave generation in 0.2-3mm range, noting applications to physics, biology and technology
02 p0250 A69-12247

Stabilization and control techniques for future unmanned commercial space vehicles, emphasizing application of projected technological advances in instrumentation
[AIAA PAPER 67-878] 02 p0334 A69-12367

Flexible printed circuitry electrode arrays fabrication for surface cortical potentials recording in animals
02 p0204 A69-12601

European space programs requirements for satellite launch autonomy/independence from U.S. and U.S.S.R., discussing satellite applications for resource surveys, weather forecasting, etc
02 p0335 A69-12682

Educational TV satellites, considering stationary ASCEND system with high power transmitters
02 p0335 A69-12747

SPOT/Speed, Position and Track/transoceanic traffic surveillance and navigation system for aircraft and marine users
03 p0463 A69-13234

Aerospace research and development projects selection and planning for success in manufacturing competition
03 p0393 A69-13252

NASA Space Application Program strategy, discussing research and development trend toward complexity, versatility and multidisciplinary use of larger spacecraft
03 p0511 A69-13427

Iron meteorites and possible utilization by primitive man, noting long resistance to decay
03 p0515 A69-14033

National programs relationship to progress in technological societies
03 p0536 A69-14245

Aeronautical service satellites, considering communications, surveillance for navigation, traffic control, collision avoidance and search and rescue, weather and border control functions
04 p0666 A69-15295

Electron beam process application to welding, machining and assembling in automobile mass production
04 p0608 A69-15484

Technological base for planning space flight missions to obtain data on earth resources, detailing earth resources technology satellites/ERTS/
05 p0830 A69-15921

Photovoltaic solar cell power technology application to space use and exploration
[ASME PAPER 68-WA/SOL-1] 05 p0705 A69-16121

Manned space flight programs, discussing U.S. technological, scientific and practical contributions
06 p1001 A69-17012

Stimulating effects of space hypersonic experiments on technical and scientific progress, discussing step degassing, welding, electroforming and geological applications
[UN PAPER 68-95459] 06 p0857 A69-17089

Commercial orbital space stations economics and potential markets, considering fisheries, ocean transportation, air traffic control, resources surveys, pollution reduction, etc
06 p1007 A69-17596

Fiber optics evolution, discussing industrial and medical applications
06 p0958 A69-17671

Fiber optics technology, discussing fabrication and applications involving light carrying/incoherent and image carrying/coherent/fibers
06 p0958 A69-17671

Technological forecasting role in company growth planning via Delphi technique
06 p1044 A69-17877

Laser applications to situations requiring highly bunched high power density light beams
06 p0938 A69-18012

Aircraft and spacecraft guidance and control technology including computers, optimum and Kalman filtering, strapdown inertial navigation, sensors and test pads
[AIAA PAPER 69-72] 06 p0956 A69-18136

Manned orbital space stations design, purposes and applications, balancing costs against benefits
06 p1019 A69-18237

Atomic, ionic and molecular gas lasers applications, population reversal conditions and processing technology
07 p1143 A69-18250

Large scale integration of monolithic integrated circuits as interconnected circuits on semiconductor
07 p1090 A69-18372

Additive processing technique for fabrication of single sided, double sided and multilayer printed circuit boards
07 p1100 A69-18621

Soviet book on Ti alloys covering production technology, applications, metallochemistry, phase transformations and metallurgy
07 p1160 A69-18760

Titanium applications in metallurgy, galvanic technology and chemistry making use of corrosion resistant properties
07 p1161 A69-18767

Two stage sodium thermal reduction of Ti tetrachloride to metallic Ti, determining process parameters
07 p1164 A69-18785

Production technology of sheets, forgings and drop forgings from Ti and Ti alloys, discussing gas saturation prevention and plastic deformation
07 p1164 A69-18786

Soviet pipe production technology from Ti and Ti alloys, considering properties and methods improvement
07 p1164 A69-18787

Refractory metal alloys metallurgy and technology - Conference, Washington, D.C., April 1968
07 p1164 A69-18790

Precision monolithic circuits fabrication techniques, describing differential amplifier design incorporating emitter feedback and direct DC errors compensation
07 p1102 A69-18875

Rotary engines, discussing scissor, eccentric rotor, multiple rotor and revolving block types
07 p1203 A69-18910

Aircraft communications, navigation and identification, discussing role of satellites, common waveform modulation and electronics technology
07 p1085 A69-19178

Aircraft and spacecraft guidance and control technology including computers, optimum and Kalman filtering, strapdown inertial navigation, sensors and test pads
[AIAA PAPER 69-72] 07 p1177 A69-19179

Book on fluid mechanics fundamentals and applications covering incompressibility and compressibility effects, viscosity, hydrostatics, aerostatics, one dimensional, potential, turbulent flow and boundary conditions
07 p1121 A69-19376

Processing techniques for fabrication of ceramic radomes from alumina and silica

07 p1142 A69-19527

Technology of titanium for C-5A aircraft, discussing structural and functional components and machining, welding, forging, etc
[ASM PAPER D8-26.2]

07 p1143 A69-19672

Computer graphics and manufacturing, discussing man computer system for transformation of blueprint to numerically controlled machine tape with no time delay

07 p1089 A69-19741

MOS technology developments for higher speeds in logic circuits

07 p1113 A69-19765

Silicon on sapphire semiconductor technology for diode arrays used as read-only memories, discussing capacitance, resistance and pattern encoding by laser

07 p1113 A69-19767

Data transmission techniques for aerospace and industrial applications, discussing radio link

08 p1271 A69-19906

National tasks in civil aeronautical research and development noting technological and social factors

08 p1422 A69-20171

Laser welding in nonconventional applications and tiny components

08 p1319 A69-20203

Development of materials in aerospace structures and propulsion systems, discussing superelastic alloys, graphite fibers, composites, refractory metals and processing techniques

08 p1332 A69-20306

Composite materials based on carbon and boron filaments, discussing application in turbine blades, propeller and helicopter rotor blades and airframe components

08 p1341 A69-20601

Electroslag welding using plasma jets with powdered material, discussing various parameters

08 p1321 A69-20766

Metal oxide semiconductor technology and applications, discussing gates, analog computers, switching circuits and inverters

08 p1286 A69-20833

Complex digital computers designed for Apollo spacecraft missions, discussing construction techniques
[AGARDOGRAPH-114]

08 p1279 A69-20990

Integrated circuit production, development and research in Germany
[AGARDOGRAPH-114]

08 p1292 A69-20994

Triodes reliability for space application, emphasizing RH 7 Cc used during Mariner 4 expedition

08 p1295 A69-21122

Large scale electronic systems configuration compatibility concept, discussing modular line replaceable units/LRU/assigned set of numbers

08 p1322 A69-21154

Airborne digital computers for optimization of aircraft control and monitoring functions, discussing avionics and circuit technology

08 p1349 A69-21194

Marine and aircraft satellite navigation techniques, discussing equipment requirements, related performance characteristics and limitations

08 p1349 A69-21198

Microwave silicon technology applied to fabrication of high gain high efficiency transistor

09 p1462 A69-21410

Roll diffusion bonding technique for permitting complex design of coldplates and radiators of spacecraft electronic equipment

09 p1504 A69-22066

Holographic technique application to radio and sound wave ranges, discussing incoherent holography development to overcome difficulties in image reconstruction of stationary objects

09 p1498 A69-22133

Hybrid circuit technology application to packaging electronic systems

09 p1508 A69-22336

Thick film hybrid circuit technology and equipment reviewing conductors, resistors, and insulator inks

09 p1508 A69-22337

Domestic satellite system for carrying maximum traffic by full use of rocket technology including Saturn 5 type propulsion systems, antennas, frequencies, etc

09 p1458 A69-22467

Frequency selective mechanical filter and LCR circuits and applications, noting inductances in solid state and thin film technology

09 p1467 A69-22558

Lasers industrial manufacturing applications, discussing processing operations and measurement and inspection techniques

09 p1521 A69-22783

Laser theory and operations including types and applications

10 p1702 A69-23384

Potential hazards of government sponsored technology, examining SST and fluoridation projects and weather problems

10 p1811 A69-23392

Fluidics technology including applications, construction and mountings

10 p1636 A69-23401

Fluidic control technology compared to other control modes, describing fluidic functions and devices

10 p1636 A69-23402

Aircraft technology for hypersonic speed range including swept wing, engine design, composite materials, lift-drag ratio, considering weight, efficiency, STOL requirements

10 p1634 A69-23598

Laser applications to high temperature, gas dynamical and plasma phenomena

10 p1741 A69-23809

Cryogenic Technology - Conference, Chicago, June, 1967

10 p1810 A69-24014

Cryogenic applications including maser amplification, IR detection and superconductivity, discussing systems optimization and cost reduction

10 p1665 A69-24017

Aluminum alloys role in aerospace technology, discussing temperature characteristics, gas absorption, weldability, purity, etc

11 p1903 A69-24518

Spray cooling techniques for thermal protection of aerospace structures including lithium spray cooling, vapor collection and condensation, etc

11 p1966 A69-24532

Laser application to welding, drilling and other processes involving material removal for microelectronic circuits and components fabrication

11 p1846 A69-24600

Single frequency Ar ion laser for deep field holography noting thermal compensation, servo stabilization, operating mode, high power and high coherence

11 p1895 A69-24689

Remote geoscience sensing using properties of radar return noting scatterometry, imagery, altimetry and penetration measurements

11 p1835 A69-24692

Imaging radar systems for employment on small spacecraft, fabricating small lightweight radar systems packages with integrated circuit techniques

11 p1835 A69-24695

Laser beam welding effectiveness for TWT with coaxial input and output lines

11 p1896 A69-24741

Computer techniques application to radio engineering functions related to system performance, layout engineering, frequency coordination and administration, discussing decision parameters interrelationship

11 p1840 A69-25313

Book on reentry and planetary entry physics and technology covering entry dynamics, thermodynamics, radiation, ablation and heat transfer

11 p1967 A69-25573

Space propulsion by radioisotope energy noting thermal heating, thruster configurations, propulsion system, mission capabilities and current thruster technology

11 p1914 A69-25591

Limitations of N-port concept in microwave technology, proposing definitions to avoid contradictions

11 p1841 A69-25624

Mechanical engineering applications to aerospace flight, discussing stability and piloting problems and experimental methods

11 p1824 A69-25672

Gallium arsenide materials technology, discussing solution and vapor-phase epitaxy and liquid encapsulation as related to crystal growth and purification

12 p2141 A69-25834

Satellite technology for government and defense communications systems, noting effects of rainfall attenuation, weather and solar interference on performance and reliability

12 p2028 A69-25932

Technological feasibility of satellite based global data relay service for small users

12 p2028 A69-25949

Holography theory and applications including imaging, Fourier transforms and interferometry

12 p2086 A69-26169

Electron beam welding of Lunar Module Descent Engine, emphasizing variable area injector element and manifold assembly problems and techniques

12 p2102 A69-26621

Remote sensing technology application to improving range resource inventories, discussing aerial photography, optical, IR and radar scanning, etc

12 p2098 A69-26992

Methodology for technical feasibility and economic analysis of remote sensing applications

12 p2193 A69-27013

Hard superconductors technology, stressing metallurgical processing factors effect on properties of niobium alloys and intermetallic compounds

12 p2103 A69-27120

Navy Navigational Satellite System for position location accuracy in marine and oceanographic exploration applications
[AIAA PAPER 68-471]

13 p2295 A69-27247

Multiband aerial photography utilization for evaluating urban housing quality compared with present data collection methods

13 p2260 A69-27607

Application satellites effects on European economy

13 p2382 A69-27834

Spaceborne optical telescopes requirements and development including mirror material and construction, optical design, servocontrol, etc

13 p2261 A69-27946

Book on integrated circuits covering fabrication techniques, basic semiconductor theory, thin film, monolithic, compatible circuits, packaging, etc

14 p2419 A69-29002

Book on subdivision of aircraft structural design covering technology, economics, working conditions, performance, etc

14 p2456 A69-29860

Space technology difficulties, achievements and applications

14 p2527 A69-29895

Digital computers for aircraft engines control, discussing economic assessment, advantages and basic control system

15 p2671 A69-30323

Collection of papers on radar theory and technology, Volume 2, covering radar tracking, measurement, target acquisition, trajectory analysis, etc

15 p2565 A69-30330

Thin film tantalum nitride resistors technology and production, evaluating projected reliability of resistance circuits as function of operating and environmental conditions

15 p2628 A69-30846

Lasers and holography applications in astronomy including high resolution spectrographic diffraction gratings manufacture and astronomical objects photographic pictures evaluation

15 p2610 A69-30880

Semiconductor technology including radar, Gunn and limited space charge accumulation oscillators, phase locked antennas, data processing and solid state computerization

15 p2581 A69-31521

Earth resource satellites, discussing mapping, land evaluation, geological observation, agricultural and hydrological applications, electromagnetic spectrum information, sensors and photographs

16 p2881 A69-31763

Mg alloys applications to construction, discussing strength-to-weight ratio of cast and wrought alloys

16 p2801 A69-31787

Gas laser application to magnetospectroscopy of graphite, Bi, As and pyrolytic graphite single crystals

16 p2796 A69-31822

Aeromedical developments by NASA biomedical applications program applied to general medical equipment including cardiac sensors, surgical sterilization, ballistocardiograph, etc

16 p2882 A69-32430

Retrodirective antennas for spacecraft, discussing design, operations and applications

16 p2762 A69-32557

Integrated circuits effect on electronic equipment design and production technology

16 p2762 A69-32578

Broadband continuously variable phase shifter with microstrip construction, describing phase rotation via stripline connected directional couplers

16 p2763 A69-32582

Scanning electron microscopy of devitrifying solder glass seals for hermetic packages, biased integrated circuits and metallization corrosion

17 p2936 A69-32892

Composite modified cast-double-base rocket propellants with large proportions of metallic fuel and oxidizer, discussing application rocket propulsion

17 p3017 A69-33349

Laser technology and effects on materials fracture

17 p2989 A69-33557

Cryogenic technology applications - Conference, Chicago, June 1968

17 p3006 A69-33679

Commercial utilization of space - Conference, Dallas, May 1967

17 p3041 A69-34043

Commercial utilization of space technology, discussing cost reduction and role of NASA Apollo Program

17 p3043 A69-34044

General technology history, stressing space technology and programs influencing developments in other fields

17 p3076 A69-34045

Electronic computers for avionics system design in terms of technology, performance and cost, discussing reliability prediction and failure rate data

17 p2976 A69-34058

Fluidic system applications to turbojet propulsion control, thrust stabilization control, temperature sensing, normal shock sensing, pressure ratio sensing, supersonic air inlet control and flight control

17 p2904 A69-34070

Laser technology applications stressing engineering, control, communications, medicine, space sciences, holography, computers, etc

17 p2984 A69-34163

Polymer selection and plastics contribution to technologies, noting trend toward improved performance at elevated temperatures

18 p3161 A69-34610

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 2

18 p3233 A69-35055

Large solar array systems in space, discussing design and operation

18 p3094 A69-35056

Manned spacecraft earth resource sensing, discussing advantages and applications in agriculture, forestry, geography, hydrology, oceanography and geology

18 p3208 A69-35058

Aerospace technology application to commercial aviation system for cost effectiveness in functions expansion, phase-over, installation, maintenance and operation, discussing added information functions

18 p3108 A69-35069

Space, technology and society - Conference, Cocoa Beach, Florida, March 1969, Volume 1

18 p3234 A69-35070

NERVA program technological developments usability in nonspace industrial community

18 p3170 A69-35075

Space exploration influence on science education, showing NASA instructional materials for teachers in biology, chemistry, physics, mathematics, industrial arts, etc

18 p3235 A69-35077

Aerospace management technology transfer, discussing conceptual contributions, planning, administrative and evaluation methods

18 p3236 A69-35086

Aerospace biomedical technology transfer analysis, discussing spinoff, popular interest, transfer barriers, etc

18 p3236 A69-35104

NASA technology utilization program for civilian economy benefit, discussing scientific and technical documentation and transfer across industrial, disciplinary and regional boundaries

18 p3236 A69-35105

Military aircraft design, discussing reduction of specialization bias and timely application of technical advances

18 p3092 A69-35137

Technological possibilities of gravity free production in space environment, discussing containerless manufacture of glass, liquid metal manipulation and defect free fibers

18 p3206 A69-35490

Electronics applications of superconductivity including inductors for energy storage, computer elements and magnets, cavities for microwave circuits, signal generators and detectors, etc

19 p3382 A69-35807

Solar electric thrust system technology concerning performance, thruster control system stability and method for solution

19 p3394 A69-35941

IR technology - Conference, Ann Arbor, June 1969

19 p3309 A69-36051

Industrial, scientific and commercial applications of NASA developed telemetry technology

19 p3455 A69-36258

Photovoltaic solar cell power technology application to space use and exploration [ASME PAPER 68-WA/SOL-1]

19 p3255 A69-36418

Automation application to rocketry, discussing process control in installations including control circuits and electronic direct digital control system

20 p3617 A69-37340

Laser research from theoretical stage to present, discussing applications

21 p3736 A69-38781

Superalloy technology applications to gas turbine engines

21 p3785 A69-38928

Powder metallurgy all inert processing method for producing nickel base superalloys forgings, discussing microstructure, reproducibility, mechanical properties, etc [ASM PAPER GG-8-3-3]

21 p3745 A69-38929

Nuclear rocket program status and plans, presenting NERVA reactor and engine system tests [AIAA PAPER 68-610]

21 p3768 A69-39219

Frequency assignment methods for Intelsat 2 and 3 communication satellites [AIAA PAPER 68-454]

21 p3674 A69-39226

Heat pipes for isothermal and adaptable energy transfer for space applications, discussing temperature control by fluid choice

21 p3852 A69-39475

Aerospace and marine corrosion technology - Conference, Los Angeles, July 1968

21 p3747 A69-39484

Lasers as tools for integrated circuits fabrication, noting roles of various laser operating parameters

21 p3742 A69-39705

Technology, design, development, qualification and operational elements noting effects on performance, economics and scheduling of nuclear vehicle [AIAA PAPER 68-591]

21 p3769 A69-39752

Gas lasers development and industrial applications, discussing output power, operation modes, etc

22 p3961 A69-40242

Holographic interferometry for surface strain and vibrations visualization, describing photographic recording techniques

22 p3945 A69-40244

Moire effect applications to stress analysis, enumerating advantages over conventional grid techniques

22 p4042 A69-40315

Communication satellite technology application to overlay network linking nationwide data machines for business mail service with virtually instantaneous delivery at low cost

23 p4117 A69-41669

B, silicon carbide, C and Be reinforcing fibers technology, thermal and physicomechanical properties, noting coating, surface defects and improvement over glass fibers

23 p4179 A69-42154

Carbon materials manufacture, properties and applications in space technology, discussing carbon fibers, textiles, graphite, pyrolytic carbon, composites and vitreous carbon

23 p4180 A69-42160

Technological forecasting as aid to aerospace planner in optimizing R and D resources allocation [AAS PAPER 69-105]

24 p4417 A69-42819

Technology flow for future manned earth orbit and lunar operations and planetary exploration [AAS PAPER 69-494]

24 p4380 A69-42840

TECTONIC MOVEMENT

U TECTONICS

TECTONICS

Lineament trend analysis of Gemini Red Sea synoptic terrain photography, noting computerized rotation from apparent to true angles

02 p0247 A69-12808

Tectonic map compiled for visible and far sides of moon, noting correlations between earth and moon tectogenesis

03 p0505 A69-12899

Martian diagonal and longitudinal-meridional canals mapped into grid systems, noting differences between Martian and lunar crusts tectonic activity

13 p2337 A69-27533

Earth surface heat flow pattern measurement and distribution techniques, considering relation to surface features and tectonic movements of crust [AIAA PAPER 69-589]

17 p2961 A69-33284

Photogrammetric instruments applied to determination of spatial position of tectonic surfaces by aerial photography

20 p3539 A69-37511

Standing waves on moon, discussing annular and radial structures of lunar craters and global tectonic patterns

20 p3604 A69-37565

Precambrian crustal geotectonic evidence of earth's radius expansion based on dated orogenic fold belts distribution

22 p3936 A69-40182

Tectonic classification of earth gravitational field based on mean gravity anomalies, correlating positive anomalies with Quaternary volcanism

23 p4154 A69-41318

TEE

U T SHAPE

TEFLON [TRADEMARK]

Pool boiling heat transfer from stainless steel coated with Teflon to produce nonwetted surfaces [ASME PAPER 68-WA/HT-12]

05 p0847 A69-16119

Teflon dielectric properties evaluated during fast laser beam heating, noting presence of C by microwave measurement

24 p4336 A69-43266

TEKTITES

NT AUSTRALITES

Boron in tektites determined by calorimetric technique for analysis of boron in silicates, comparing results with values from igneous and sedimentary parents

08 p1407 A69-20936

Geochemistry and element abundances for Henbury impact glass, Darwin glass and australites, noting evidence for meteorite impact on sandstone

08 p1407 A69-20937

Water content of tektites, impactites and artificial glass of tektite composition using IR absorption measurements

10 p1778 A69-23413

Natural unbroken tektite surface examination by interferometry, discussing fringe patterns for pit shapes and sizes

12 p2173 A69-27175

Lunar volcanism origin of tektite and pearlite, noting no cosmic ray effects

20 p3597 A69-37338

Tektite origin theories, discussing Surveyor experiments effects on lunar geology and Tektite origin

22 p4012 A69-40086

Geochemistry of tektites - Conference, Corning, New York, April 1969

23 p4209 A69-41340

Rb-Sr isotope patterns in tektites from Southeast Australian strewn field, studying Rb volatilization role in Rb-Sr isochron production

23 p4154 A69-41342

Darwin and Macedon impact glasses related to Far Eastern tektites through age determination by fission track technique

23 p4210 A69-41344

Fission track ages of tektites, australites and related glasses, considering errors due to annealing and etch pits

23 p4210 A69-41345

Tektites chemical composition showing minor concentration changes during melting used for parent material identification

23 p4210 A69-41346

Impact origin of Ivory Coast tektites and Bosumtwi Crater indicated by gamma ray spectrometric study of U, Th and K abundance patterns

23 p4210 A69-41347

Black magnetite bearing spherules extracted from tektites, and magnetic fractions of impact glasses, determined by reflecting microscope and electron microprobe

23 p4210 A69-41349

Ivory Coast microtektites chemical composition from electron microprobe analysis

23 p4211 A69-41351

Subsystems of ESRO research satellites Td 1 and Td 2, discussing telecommunication, attitude control, power supply and temperature control design and functions

01 p0160 A69-10031
 Frequency diversity for communication in fading environment, relating performance variance to between channel correlation variance

01 p0026 A69-10177
 World Weather Watch /WWW/ system and meteorological satellites, discussing observational networks, data centers, telecommunication facilities, research, education and training program

01 p0178 A69-10478
 Geostationary satellite transmissions for educational purposes

01 p0028 A69-10494
 Space research practical benefits in solar physics, radio astronomy, meteorology, radio physics, communications, etc

01 p0179 A69-10496
 Marine requirements possible satisfaction by using space techniques to improve long range communications to achieve safety at sea and shipping operations efficiency

01 p0161 A69-10503
 Automatic picture transmission station equipment including antenna, cavity filters, tape recorder, oscilloscope, facsimile system and kinescope

01 p0054 A69-10522
 Optimum modulation technique determination for single channel voice communication under severe noise conditions

01 p0029 A69-10526
 Sensitivity calculation for microwave receiver consisting of traveling wave tube preamplifier followed by square law detector and video amplifier

01 p0048 A69-11038
 Satellite communications with emphasis on European programs, discussing synchronous satellites, Europa 2 rocket and Saros and Symphonie projects

02 p0207 A69-11910
 Book on communication systems covering signal design, video signals, communication satellites and threshold decoding techniques

03 p0383 A69-12867
 Sequential signal design for feedback channels, emphasizing single set subject to peak and average power constraints in time continuous transmission

03 p0408 A69-12868
 Synchronization in coded communication systems, considering phase lock loop and square wave correlation function

03 p0383 A69-12871
 Low altitude satellite relay system, discussing modulation, antennas, frequency plans, telemetry, tracking, command and earth terminals

03 p0391 A69-13241

Intelsat application satellites, considering economy and global telecommunication

03 p0535 A69-13592
 European launcher program analyzed from point of view of telecommunication and cost

03 p0520 A69-13593
 Point to point millimeter wave communication system design, discussing propagation and data transmission

03 p0405 A69-13723
 Economic and technical advantages and disadvantages of satellite telecommunications, discussing Telstar intercontinental TV transmission and Soviet Molniya system

04 p0662 A69-15328
 Digital signal processing in radar, sonar and communication

05 p0718 A69-15749
 Satellite telecommunications, discussing Australian experience, ground stations location, national network and international cooperation

06 p0886 A69-17066
 Project Symphonie, discussing stationary communication satellite, coverage, frequencies and characteristics

06 p0886 A69-17072
 Communication satellites application to domestic live TV, telephone and data communication and long distance telecommunication in Canada

06 p0887 A69-17075
 Adaptive control of reflective satellite communication system

06 p0887 A69-17356
 Minimum operational characteristics for airborne VHF communication systems, discussing FCC requirements and system performance

07 p1077 A69-18638
 Data compression techniques compared for use in communications systems to minimize required number of samples and bits per sample

07 p1077 A69-18758
 World satellite telecommunications network, discussing recommendations with reference to signal transmission, acoustic echoes, etc

07 p1079 A69-18942
 Eole satellite and meteorological balloons telecommunications used to study wind distribution in Southern Hemisphere and other atmospheric parameters

07 p1084 A69-19134
 Communication satellite system design by use of baseband equation relating SNR after detection to CNR at detector input

07 p1085 A69-19180
 Optimum linear feedback code for additive noise systems with average power constraint on transmitter to increase channel capacity

07 p1085 A69-19181
 Soil resistivity survey at earth telecommunication installation site to determine optimal grounding or electrode system

07 p1117 A69-19348
 Transponders for communication satellites, discussing design constraints, reliability and transmission capacity increase

08 p1279 A69-19905
 Incoherent m-ary frequency shift keying /MFSK/ system analysis concerning automatic time synchronization

08 p1274 A69-20133
 Air traffic development related to control systems advances, discussing telecommunications effect and radio navigation systems enabling pilot to determine position

08 p1347 A69-20598
 Project Dioscures for permanent air traffic control centers, positive telecommunication links and satellite navigation

08 p1347 A69-20779
 Communication satellite systems role in world telecommunication network, discussing traffic type, volume and routing, earth stations location and capacities and orbit selection

09 p1449 A69-21271
 Extraterrestrial cosmic emissions responsible for background noise of communications engineering, discussing factors affecting frequency sharing with other services

09 p1586 A69-21294
 Belier rocket launching facilities in Guiana, describing pads, tracking system, telecommunications network, etc

09 p1477 A69-22161

INTELSAT for design, construction, launching and maintenance of global communication satellites, noting transponders

09 p1457 A69-22466
 Synchronous and near synchronous satellites for communication systems, discussing stationkeeping and low thrust propulsion

09 p1458 A69-22468
 Minimum error probability and optimal system regime relationship to noise rejection in memoryless communication investigated for limited repeated transmissions

09 p1459 A69-22639
 Skorsky HH-3F helicopters electronic equipment, discussing communication and navigation aids, search and recovery missions, etc

10 p1662 A69-23222
 Navigation accuracy and telecommunications system capacity interrelationships in economical improvement of air traffic control system over North Atlantic

10 p1723 A69-23704
 Electrical engineering, Volume 3, communications, covering special theories, systems components, telecommunication, electroacoustics, digital and analog computers and programming

15 p2568 A69-30619
 Dioscures project for telecommunication, ATC and navigation by satellites to provide continuous position determination

15 p2651 A69-30691
 Global communication techniques and trends, discussing radio telephone and telegraph, submarine systems, satellite communications, line of sight links, tropospheric scatter, waveguide transmission, etc

16 p2750 A69-31755
 Global satellite communication networks design by computer simulation, discussing politico technical interface problems, ground stations, atmospheric factors, system optimization, etc

16 p2750 A69-31852
 Linear feedback additive noise communication systems formulated in terms of arbitrary operations at transmitting and receiving points

17 p2944 A69-33626
 Pivotal computer operations in Apollo NASA Communication Network, describing UNIVAC computers in use and design considerations

18 p3100 A69-34267
 Mechanical drives effectiveness for large antenna tracking/communications systems evaluated in terms of reliability and availability

18 p3100 A69-34522
 Phase modulation in pseudo-noise ionospheric communication system for reducing F region CW signal fading

18 p3104 A69-35308
 Environment effect on scientific and telecommunication equipment mounted on exploratory probe during Venus atmosphere entry for acceleration loading in design

19 p3431 A69-36037
 Satellite telecommunication systems coordination, discussing transformation feasibility of consortium or international organ into international organization

20 p3637 A69-37120
 Modulation envelopes, tables of profiles and harmonic components for modulated waves in electrical and communications problems

21 p3673 A69-38778
 Civil cargo aircraft characteristics and development trends, discussing cargo and passenger traffic management, communications network, etc

22 p3863 A69-40427
 PCM role in FDM-FM short haul low density cable communications systems used in exchange area and tactical military systems

22 p3900 A69-40678
 Performance prediction of terrestrial communication system based on experimental radio and meteorological program at 11 GHz, discussing transmission loss

22 p3900 A69-40680
 Telecommunication systems used in airline industry and reorganization requirements for efficient operation

23 p4114 A69-41356
 High sensitivity communication system design consisting of radome enclosed steerable antenna, 500 kw transmitter and microwave configuration compatible with low noise receivers

23 p4149 A69-42131
 Communications - IEEE Conference, Boulder, June 1969

23 p4127 A69-42500

TELEGRAPH SYSTEMS
 NT FREQUENCY SHIFT KEYING

NT PHASE SHIFT KEYING
NT RADIO TELEGRAPHY
NT TELETYPEWRITER SYSTEMS

Phototelegraphic transmission of holographs of objects in many shades through channel with limited number of signal levels

11 p1889 A69-25549

Satellite system TDM techniques and prototype equipment capable of combining 12 unrelated start-stop and synchronous telegraph channels

NT PULSE FREQUENCY MODULATION
NT PULSE FREQUENCY MODULATION
TELEMETRY
NT RADIO TELEMETRY

Multichannel telemetering device for magnetically suspended or free flight wind tunnel models noting strain gage pickups, switching and auxiliary circuits [ONERA-TP-643]

02 p0226 A69-11623

Adaptive multiplex telemetry use in scientific satellite data management

02 p0212 A69-12817

Stored program control for polynomial data compression in telemetry application

03 p0400 A69-13220

NOMAD buoy telemetry system for synoptic oceanographic and meteorological data, using digital processing and dual frequency transmissions

03 p0391 A69-13223

Digital data processing equipment for space flight PCM telemetry

03 p0393 A69-13290

Ghost project for gathering weather data by balloons and transmission of data to central data processing stations by satellite

03 p0520 A69-13621

Upper and lower bounds on mean reduced error of pulse code telemetering systems operating by binary code

03 p0396 A69-13687

Telemetered data obtained by Iantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance

05 p0830 A69-16056

Telemetry capability of Air Force Western Test Range noting acquisition, tracking, data processing and display and data reduction

05 p0743 A69-16304

Conversion of range telemetry systems /CORTS/ program noting installations and standardization

05 p0743 A69-16306

Computer oriented telemetry data processing systems designed to condition raw telemetry data for further processing by other systems

05 p0727 A69-16770

French program of space geodesy, discussing spatial triangulation, telemetry, dynamic geodesy, Diapason and Diademe experiments [UN PAPER 68-95834]

06 p0917 A69-17071

Multiring antenna arrays for space telemetry and communication, analyzing distant field, radiation resistance, directive gain and mutual impedance

06 p0899 A69-17827

Mariner 1969 high rate telemetry system portions pertinent to combinatorial mathematicians, discussing coding and encoding

06 p0890 A69-17862

Kwajalein Missile Range UHF telemetry conversion program using S band antennas with three channel monopulse autotrack systems

07 p1077 A69-18829

Telemetry - Conference, Los Angeles, October 1968

07 p1079 A69-19092

Multifunction Receiver System rationale, concepts, background requirements and technical justifications for tracking, telemetry and ranging data acquisition by Goddard Center

07 p1081 A69-19101

OMEGA 4 100-k Hz ground station telemetry system for acquiring and processing outputs up to 23 FM and two TDM signals applied simultaneously from instrumentation recorder

07 p1105 A69-19103

Airborne S-band telemetry antennas for omnidirectional patterns of polarization component, discussing design, pattern measurements and application

07 p1106 A69-19112

Sun as calibration signal source for L and S band telemetry, discussing receiving system noise temperature determination and antenna gains

07 p1082 A69-19113

Miniature power amplifier stage for telemetry transmitters, discussing equipment size and weight reduction methods and hermetic envelope

07 p1106 A69-19115

Compatibility requirements and considerations of range telemetry tape crossplay operations, discussing major classes

07 p1133 A69-19117

High data rate coherent telemetry systems synthesis, discussing multiphase modulation and demodulation to achieve bandwidth requirements

07 p1083 A69-19123

Mariner 1969 multimission high rate deep space telemetry system design, hardware and application

07 p1083 A69-19125

Frequency division multiplex telemetry technique with double sideband-quadrature carrier multiplexing system, discussing data signals, channels and distortion

07 p1084 A69-19131

Double sideband suppressed carrier FM telemetry system as airborne data recorder, discussing noise, environmental conditions, laboratory and flight tests

07 p1084 A69-19132

Telemetry with unrestrained animals, discussing radio tracking of game animals and instrumentation requirements for studying green sea turtle goal finding ability

07 p1071 A69-19136

Receiving systems for digital telemetry signals from spacecraft, analyzing receiver performance by statistical methods

08 p1276 A69-20591

Digital telemetry from spacecraft, discussing on-board processing, data compression, coding, sequence detection and receivers

08 p1276 A69-20592

Maintenance telemetering, tracking and telecommand for developmental and operational satellites, discussing possibilities of frequency sharing between satellites and terrestrial services

09 p1451 A69-21290

Technical characteristics of spacecraft telemetering, tracking and telecommand systems, stressing links between earth stations and spacecraft

09 p1451 A69-21291

Channel output SNR optimization in AM/FM telemetry system by using automatic gain control, discussing AGC time response and general characteristics

09 p1454 A69-21799

UHF telemetry conversion program at Pacific Missile Range, describing antenna, receive-record and separation display systems

09 p1454 A69-21800

Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-IC stage, using IR radiation data

10 p1653 A69-23049

Telemetry monitor systems for high speed rotating equipment, discussing data recording, transmission, decoding, thin-thick film microtechniques, etc

10 p1692 A69-23249

Flight test telemetry data processing system designed for C-5

10 p1660 A69-23269

Real time computer controlled telemetry system readiness testing and validation, describing automatic closed loop checkout methods and remote display controller

10 p1660 A69-23270

FM/AM telemetry circuits with three axis piezoelectric accelerometer for measurements during impact tests of soft landing models

10 p1654 A69-23279

Ruggedized ballistic range telemetry system survivability and in-flight stability after gun launching, presenting temperature, strain and stagnation point pressure measurements

10 p1654 A69-23281

Telemetry data channel gain and phase correction with frequency response calibration technique using digital filtering

10 p1654 A69-23291

Electrical servopositioning of telemetry reception antenna for tracking satellites, considering weight, stability, etc

11 p1852 A69-25118

Space electronics, telemetry, antennas, computers - IEEE Conference, Cocoa Beach, Florida, November 1968

11 p1837 A69-25288

Telemetry system sensitivity as function of noise figure, noting SNR and noise and bandwidth effects on system information handling capability

11 p1840 A69-25308

Data processing system for satellite telemetry signals, describing hardware construction and operation, data readout, etc

11 p1840 A69-25423

Single channel pressure telemetry unit for chronic implantation into cardiac chambers or major blood vessels in unrestrained animals for measuring ventricular pressure

11 p1831 A69-25642

Communication systems in interplanetary space covering telemetry, remote control, Doppler and distance measurements, coherent PCM/PSK/PM demodulation, deep space network, etc

12 p2027 A69-25875

Sampled data multichannel telemetry using pseudorandom sequences generated by linear shift registers

12 p2028 A69-25922

ESRO 1 communication system and telemetering system compared to ESRO 2

13 p2220 A69-27749

Optimum time for telemetry data transmission by system using feedback combined with error correcting codes

14 p2412 A69-29428

Optical carrier single channel telemetry system providing complete electrical isolation between shock tube data acquisition and data recording instrumentation

14 p2449 A69-29561

Temperature measurement miniature telemetry transmitter

15 p2607 A69-30156

Balloon for in situ measurements of atmospheric optical parameters using two axis sun pointer, spectropolarimeter and airborne telemetry

15 p2615 A69-31288

Automatic quantitative checkout equipment for telemetry circuit of Diamant satellite booster before launching

16 p2750 A69-31727

Electromagnetic interference correction for airborne telemetry, illustrating actual and simulated data for interfering source signatures identification

16 p2754 A69-32575

Tracking and data acquisition systems for spacecraft and ground link through command, telemetry and tracking, noting data relay satellites, etc

17 p2919 A69-33371

Multichannel pressure telemetry system for base pressure measurements on small wind tunnel models, considering proximity effects on transducer-telemetry units

19 p3305 A69-35727

Telemetering - IEEE Conference, Washington, D.C., April 1969

19 p3268 A69-36237

Meteor burst communication channel parameters for low data rate telemetry, considering signal amplitudes, decay, duty cycle, multipath, phase stability, trail location and variations

19 p3271 A69-36250

Backfire antenna radiation characteristics and physical dimensions for tracking and telemetry applications, including five element array model

19 p3271 A69-36251

Sounding rocket S band telemetry antenna operation, proposing quasi-isotropic pattern criterion to reduce effects of shadowing and interference

19 p3271 A69-36252

Active interferometer controlled telemetry tracking system for missile range, discussing automatic target acquisition, dish feed, costs and optimized data-channel antenna patterns

19 p3271 A69-36253

Telemetering by reflex klystron accelerometer and seismometer with on air or coaxial cable signal transmission

19 p3272 A69-36255

Laser and quasi-laser pulse modulation technique for global satellites telemetry system

19 p3272 A69-36257

Industrial, scientific and commercial applications of NASA developed telemetry technology

19 p3455 A69-36258

Buffer storage for telemetry nonstationary video data compression, analyzing requirements, predictor algorithm and variable aperture control using simulation

19 p3272 A69-36260

Precompression automatic wild point rejection from sampled telemetry data for data compressors evaluated by digital computer simulation

19 p3273 A69-36263

Cross correlation and probability metric in coded sequential detection telemetry system, giving optimum parameters, overflow and error probabilities using computer simulations

19 p3273 A69-36266

Nonlinear filter theory applied to digital telemetry binary processes, using continuous time stochastic process

19 p3274 A69-36281

Block coded telemetry systems design for phase coherent space communication employing double conversion superheterodyne phase locked receivers

19 p3277 A69-36487

Analog telemetry signals generalizing frequency and pulse position modulations over coherent channels, noting added degrees of freedom function

20 p3492 A69-37713

Telemetered data obtained by lantar 1 automatic ionospheric laboratory, detailing argon-ion plasma engine performance

20 p3618 A69-37966

Ruby laser goniometric and telemetric echoes by photographing Geos satellites

21 p3671 A69-38335

Book on synchros application and design covering telemetry, torque and control systems, synchro circuits, resolvers as computer elements, etc

21 p3681 A69-38450

Thermal design of missile mounted S band telemetry transmitter package based on temperature control system, using heat-of-fusion characteristics of wax material

22 p3909 A69-39945

Maximum errors of telemetering systems under inter-channel transient distortions in multistage amplifier of video signals

22 p3899 A69-40250

Short range telemetering strain gage system with stable multivibrator transmitter for measuring inter-coupling displacement and shaft torque

22 p3946 A69-40314

Real time multiprocessing telemetry ground support integrated system design with expanded definition of hardware/software decision tradeoffs

[AIAA PAPER 69-971] 22 p3907 A69-40351

Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center

22 p3919 A69-40352

Monopulse telemetry tracking system, describing equipment and mobile operation

22 p3900 A69-40681

Telemetering - Conference, Washington, D.C., September 1969

23 p4117 A69-41734

Programmable data handling and telemetry systems for scientific satellites, noting system checkout, spacecraft integration, software and ground data processing

23 p4132 A69-41735

Wideband FM telemetry transmitters for S band, using symmetrical discriminator

23 p4119 A69-41741

Digital telemetry link coding as English language analogy, developing block code scheme combining bit, word and block error detection and correction methods

23 p4119 A69-41745

Wideband telemetry recording error compensator for reducing flutter and interchannel time-base error in magnetic tape instrumentation

23 p4137 A69-41775

Telemetering Standards Coordination Committee annual report

23 p4241 A69-41782

Digital transition tracking symbol synchronizer for low SNR coded telemetry systems, discussing phase locked loop analysis and phase detector simulation by Monte Carlo method

23 p4130 A69-42513

TELEMETRY AUTO REDUCTION SYSTEM

U DATA REDUCTION

TELEPHONY

European regional satellite communication systems, discussing EUROVISION TV program broadcasting and multiple access telephony

03 p0395 A69-13585

Satellite communication channel number and distribution optimization, obtaining malfunction probability for telephone service communication system

[UN PAPER 68-95772] 06 p0886 A69-17030

Frequency modulation methods and multiple access for communication satellite systems, considering bandwidth for space station transponder

09 p1449 A69-21274

Preemphasis applications compared in active communication satellite systems for frequency division multiplex telephony and for TV

09 p1449 A69-21275

Carrier energy dispersal in communication satellite telephony and TV systems, noting attendant RF bandwidth increase as function of distortion

09 p1450 A69-21277

Noise rejection in multichannel telephone signal reception with FM and multiplexing, determining SNR dependence on SNR at receiver input

09 p1459 A69-22640

Mean-minute thermal noise intensity distribution in telephony channels of tropospheric radio relay systems

14 p2412 A69-29425

Global communication techniques and trends, discussing radio telephone and telegraph, submarine systems, satellite communications, line of sight links, tropospheric scatter, waveguide transmission, etc

16 p2750 A69-31755

TELEPHOTOMETERS

U TELEPHOTOMETRY

TELEPHOTOMETRY

Eight color narrow band photometry of bright stars, discussing band system, instrumentation, data and calibration

02 p0313 A69-11487

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth

14 p2447 A69-29404

TELESCOPES

NT ASTRONOMICAL TELESCOPES

NT HELIOMETERS

NT MANNED ORBITAL TELESCOPES

NT PARTICLE TELESCOPES

NT RADIO TELESCOPES

NT REFLECTING TELESCOPES

NT REFRACTING TELESCOPES

NT SCHMIDT CAMERAS

NT SPECTROSCOPIC TELESCOPES

NT STRATOSCOPE TELESCOPES

NT X RAY TELESCOPES

Image averaging time effects on modulation transfer function /MTF/ of system comprising telescope objective and horizontal propagation path in turbulent atmosphere

06 p0890 A69-17806

Balloon flights for testing remote sensor systems prior to space flight, considering return beam vidicon and tracking telescope suitability for experimentation

22 p3865 A69-40806

Ni plated 40-cm lightweight Al alloy telescope mirror, noting weldment stress relief by annealing

23 p4164 A69-41624

TELETYPEWRITER SYSTEMS

Multimode propagation communications system /MMPCS/ utilizing digital computer to implement intermittent system

03 p0389 A69-13191

TELEVISION CAMERAS

Apollo lunar TV camera for real time pictures during all phases of Apollo lunar landing mission, describing camera tube, circuitry and optics

07 p1133 A69-19137

Surveyor scientific instruments and operation on moon, reviewing TV camera, alpha scattering instrument and surface sampler

[JPL-TR-32-1358] 08 p1312 A69-19850

Silicon diode array camera tube modified to permit X ray images to be displayed on TV monitor

09 p1463 A69-21845

Real time 2000 line TV camera with 40 MHz bandwidth, 1600 line vertical resolution and 1000 line horizontal resolution

[SMPT PAPER 105-73] 12 p2077 A69-25769

Surveyor 7 TV system in photon integration mode, analyzing slow scan vidicon storage characteristics and dark current limitations

[SMPT PAPER 105-72] 12 p2078 A69-25772

Low light level slow scan Owl TV camera system with secondary electron conduction camera tube for satellite-borne observation of auroral light emission

12 p2079 A69-25904

Rocket trajectory determination by tracking on-board light source against star background with image orthicon TV system

12 p2033 A69-26965

Apollo 8 photooptics, considering TV camera and broadcasts, photographic equipment and visual observation

15 p2609 A69-30469

Apollo 10 field sequential color TV system, describing camera modifications, systems design and equipment compatibility problems

18 p3101 A69-34810

Image dissector meteorological cameras, discussing ATS-III and Nimbus systems, high resolution camera and multispectral cameras

18 p3137 A69-35101

Narrow angle high resolution TV camera design and testing for Mariner 6 and 7 Mars flyby missions, noting computer drawn spot diagrams

19 p3307 A69-35808

TV camera tubes with electron beam scanning adapted to IR imaging, emphasizing vidicon

19 p3311 A69-36069

Lunar TV camera for Apollo missions, discussing operational requirements and design

23 p4162 A69-41478

TELEVISION EQUIPMENT

NT IMAGE DISSECTOR TUBES

Systems analysis in aerospace engineering by adding motion pictures and TV techniques

[SMPT PAPER 104-17] 04 p0596 A69-14359

Monolithic HF circuits stability in TV and HF devices noting need for appropriate amplifiers

07 p1103 A69-18883

Stellar identification system using onboard sighting equipment and computer mathematical methods

08 p1347 A69-20657

Nondestructive ultrasonic, spectroscopic and TV test methods reducing time for inspection and increasing reliability of turbines

17 p2978 A69-33330

X ray TV system with electronic-optical converter and X ray vidicon for industrial defectoscopy

18 p3138 A69-35113

TV-optical observations of asteroid Icarus, discussing installation, photographs and position

21 p3719 A69-38402

TELEVISION RECEIVERS

Laser display technology, discussing experimental systems, light sources, modulation and scanning

03 p0431 A69-13850

Earth station system for ground based communications with Intelsats 2 and 3 noting antennas, receivers, transmitters and power supplies

05 p0741 A69-15667

Ground station receiving antenna design and size for indirect distribution of TV programs by geostatic satellites

10 p1654 A69-23389

TELEVISION RECEPTION

Laser color TV projection-display system using moving mirrors and dual polarization scanner

07 p1137 A69-19740

TV test chart for evaluating Surveyor lunar spacecraft TV system covering resolution, photometric and colorimetric response and sun angular position

[SMPT PAPER 105-71] 12 p2078 A69-25771

TELEVISION SYSTEMS

NT CLOSED CIRCUIT TELEVISION

NT COLOR TELEVISION

NT EDUCATIONAL TELEVISION

NT SATELLITE TELEVISION

NT SPACECRAFT TELEVISION

Filter effectiveness in improving air to ground target identification performance on TV display

06 p0887 A69-17210

Image intensifier-vidicon closed circuit TV network for auroral cinematography at low light levels

06 p0925 A69-17382

TV system producing images with 5000 line resolution, proposing application in Earth Resources Observation Satellite

07 p1131 A69-18552

Laboratory measurement data of low light level TV performance converted to anticipated real world performance data

07 p1132 A69-18948

Cockpit TV-radar for providing pilots with navigation, weather and traffic data, discussing safety factors and radar picture transmission quality

[SAE PAPER 690327] 11 p1833 A69-24506

Crab Nebula pulsar detection by TV camera with image intensifier at focus of astronomical telescope, detailing instrumentation and observations

11 p1962 A69-25251

Nationwide TV system using synchronous communication satellite proposed for India, discussing antenna, modulation, multiplexed channels and educational aspects

19 p3275 A69-36413

Two channel TV Cassegrain telescope, describing color separation system for obtaining integral and monochromatic images of astronomical objects
20 p3547 A69-38309

Image intensifiers and orthicons, plumbicons, vidicons as photoelectric devices in TV auroral observation from ground stations and jet aircraft
21 p3706 A69-38484

Earth resources satellite /ERS/ TV camera configurations, return beam vidicon camera characteristics and devices for TV picture reproduction on film
21 p3720 A69-38619

Computer controlled TV cloud recognition equipment on meteorological satellites, discussing multistep process of automatic perspective distortion corrections by onboard computer
22 p3977 A69-40004

Low light level TV systems for military uses, describing design and operation of various image intensifier tubes
22 p3945 A69-40141

Mariner Mars 1969 TV system environmental test and calibration program
22 p3920 A69-40372

Distribution system for TV driving signals proposed for single synchronized system for all TV centers, describing decoder circuits
24 p4282 A69-42745

Instantaneous response TV system application to observing solar surface granulation, noting advantages over photometric measurements
24 p4389 A69-43711

TELEVISION TRANSMISSION

Digital computer system for storing, processing and displaying TV pictures
01 p0077 A69-10024

Direct TV broadcasting from satellites with incoherent thermionic reactor and electrical propulsion [UN PAPER 68-95559]
01 p0114 A69-10466

Satellite TV systems for India, alternatives and costs [UN PAPER 68-95750]
01 p0028 A69-10495

Satellite educational TV, considering program distribution, satellite characteristics, ground terminals design, reliability, quality, programming and costs [UN PAPER 68-95827]
01 p0029 A69-10499

Pseudorandom signal TV signal distortion due to flutter and skew introduced by tape recorder, computing system SNR for distortion as additive random noise
01 p0033 A69-10999

Spacecraft device for photographing and transmitting TV pictures noting limitations and spatial conditions adaptations
02 p0207 A69-11829

Satellite TV transmitter power requirements for adequate direct broadcasting field strength in existing UHF TV bands
03 p0394 A69-13578

Fourier coding method for coding images for digital transmission, achieving bandwidth reduction for televised images
04 p0556 A69-14429

Soviet book on multichannel and TV signals transmission over radio relay links using microwave tropospheric scatter propagation
04 p0558 A69-14919

Economic and technical advantages and disadvantages of satellite telecommunications, discussing Telstar intercontinental TV transmission and Soviet Molniya system
04 p0662 A69-15328

Analog FM subcarrier modulation selected for real time TV picture transmission via electro-optic space communication system
04 p0562 A69-15474

Optical heterodyne communication experiments in TV signal transmission [IEEE PAPER J-5]
05 p0720 A69-16319

Quality control for TV transmissions via communication satellites, considering transmission accuracy improvement and error measurement automation [UN PAPER 68-95773]
06 p0886 A69-17047

Satellite educational TV capabilities, applications and planning [UN PAPER 68-95355]
06 p0887 A69-17078

Communication satellites in synchronous equatorial orbit for two types of educational TV, discussing picture quality, modulation, power, bandwidth and system costs
06 p1017 A69-17624

Satellite TV broadcast application for communication and education, discussing costs and benefits in single and multimission combinations
07 p1244 A69-18678

TV transmission antenna radiation patterns measured with helicopter flown equipment and Decca navigation equipment
08 p1274 A69-20130

Direct radio and TV broadcasting from satellite-borne radio transmitter to general public, giving visibility, gains, frequencies and bandwidths tables
09 p1586 A69-21286

Cockpit TV-radar for providing pilots with navigation, weather and traffic data, discussing safety factors and radar picture transmission quality [SAE PAPER 690327]
11 p1833 A69-24506

TV broadcasting from synchronous satellites direct to ordinary UHF receivers in 1980s
11 p1833 A69-24529

Phototelegraphic transmission of holographs of objects in many shades through channel with limited number of signal levels
11 p1889 A69-25549

Parametric frequency converter consisting of mixer head in bridge circuit with varactors for 12 GHz TV transmitters
11 p1854 A69-25614

Wave propagation in 11.7-12.7 GHz range studied for application to TV transmission, describing emitter, omnidirectional antenna and receiving station
11 p1841 A69-25637

Synchronous satellite TV broadcasting systems in UK, discussing equipment, transmission problems and economic factors
13 p2220 A69-27830

TV transmission of two dimensional transparency hologram with reduced resolution requirements on camera tube, eliminating zero order terms
17 p2974 A69-33401

Spectral analyzer for structural noise spectrum of scanning ray TV transmitter
17 p2939 A69-33909

Apollo 10 field sequential color TV system, describing camera modifications, systems design and equipment compatibility problems
18 p3101 A69-34810

Electro-optical crystals resonance modulator for coherent light beams and microwave frequencies, describing application to multichannel TV transmission system
19 p3266 A69-35763

TV picture and newspaper pages simultaneous transmission via earth satellite /Orbit/, measuring SNR and crosstalk
19 p3277 A69-36567

Geostationary satellite TV broadcasting to small contiguous areas with separate programs, discussing communication distribution problems
22 p3902 A69-41252

Nonlinear encoding for picture transmission using nonlinear analog to digital converter
23 p4119 A69-41747

Effective color TV transmission via satellite using PCM/PSK modulation, noting dependence on available equipment, bandwidth, desired error rate and SNR
23 p4130 A69-42520

Distribution system for TV driving signals proposed for single synchronized system for all TV centers, describing decoder circuits
24 p4282 A69-42745

TELEGEN THEORY

U GYRATORS
U NETWORK ANALYSIS
U NETWORK SYNTHESIS

TELLURIC CURRENT MICROPULSATIONS

U MICROPULSATIONS

TELLURIC CURRENTS

Large amplitude Pc 1 events at College, Alaska, noting more ionospheric cosmic noise absorption accompanying large events [AFCL-69-0059]
02 p0244 A69-12397

Air-earth current and conductivity measurements, noting greater conduction current at one mile altitude
05 p0758 A69-16419

Solar flare influence on potential gradient and air-earth current properties at high mountain stations
05 p0759 A69-16634

Earth currents and magnetic field variations recording in period range 10-200 sec, computing power density spectra on analog computer
10 p1682 A69-23593

F 2 layer drift relation to current systems of dynamo region confirmed at middle and high latitudes
10 p1682 A69-23611

Dynamo action produced magnetospheric currents in ionosphere computable without knowing real horizontal ionospheric current system
10 p1685 A69-23836

Equatorial electrojet role in electromagnetic induction at magnetic dip equator, applying Price theory for space gradients
13 p2252 A69-27515

Magnetospheric field configuration in midnight meridian, considering cavity boundary surface area trapping region currents and tail sheet current
13 p2252 A69-27515

Terrestrial electrical conductivity measurement from electromagnetic field variations determination from geomagnetic sounding
20 p3522 A69-37054

Optical pulsations in aurora, studying relations to pulsations in geomagnetism, telluric currents, X rays from aurora and variations in primary particles flux
21 p3708 A69-38443

Sayan Sun Observatory experimental equipment for discussing instruments for solar observation, earth currents measurement and cosmic ray neutron components recording
22 p3943 A69-39994

TELLURIC FIELDS

U ELECTRIC FIELDS

TELLURIC LINES

Electron transition probability of oxygen molecules determined using weak bands telluric lines photoelectric recordings
03 p0420 A69-132761

Telluric lines halfwidth and depth dependence on observation point altitude and intervening air mass, determining absorption line contours for isothermal atmosphere
03 p0512 A69-136954

NASA atlas of IR solar spectrum, reporting B and 4 meter spectrometer recordings over band containing methane telluric absorptions
06 p1008 A69-178101

Electron transition probability of oxygen molecules determined using weak bands telluric lines photoelectric recordings
14 p2487 A69-287844

Instrumental profile determination for high resolution stellar spectrograph, using profiles of telluric oxygen bands obtained from emission line observations
21 p3721 A69-386961

Trial and error procedure applied to instrumental profile of Liege Solar Atlas, convoluting instrumental profile with telluric A band profile
21 p3722 A69-386961

TELLURIDES

NT BISMUTH TELLURIDES
NT CADMIUM TELLURIDES
NT INDIUM TELLURIDES
NT LEAD TELLURIDES
NT MERCURY TELLURIDES
NT TIN TELLURIDES
NT ZINC TELLURIDES

Tunnel junctions of narrow gap GeTe and wide gap GaAs, noting current voltage characteristics similar to those in Schottky barrier
06 p0980 A69-17770

IR spectral transmittance and physicochemical properties of tellurite glasses with vanadium and cerium oxides, showing polymer chains in structure
14 p2468 A69-29329

Thermoelectric parameters of polycrystalline p-type bismuth antimony telluride and bismuth antimony tellurium selenide solid solutions
15 p2668 A69-30629

Heat conductivity of liquid and solid gallium telluride in steady state regime, using graphite cylindrical device
16 p2824 A69-31572

TELLURIUM

Magnetoresistance of tellurium single crystals with various current carrier concentration at liquid helium temperatures
06 p0978 A69-16986

Vapor deposited tellurium thin films orientation, noting effect of characteristic spiral chain structure along c-axis
08 p1373 A69-20891

Current controlled negative differential resistivity observed during current-voltage measurements made with p-type Te at 77 K
09 p1557 A69-21747

Tellurium doping effect on phonon diffusion in GaSb, discussing thermal conductivity at low temperatures
12 p2142 A69-26294

Heat treatment effects on Te-doped GaAs, using photoluminescence and carrier concentration measurements to study defects formed
16 p2825 A69-31708

TELLURIUM ALLOYS

- Thermoelectric properties of GeTe-GaTe system, analyzing phase diagrams, solid solution formation, substitutions and zone structure influence
01 p0138 A69-10404
- Electrodeposition of Te-containing Permalloy films with uniaxial magnetic anisotropy, noting electrolyte composition and film structure
11 p1935 A69-24332

TELLURIUM COMPOUNDS

- NT BISMUTH TELLURIDES
NT CADMIUM TELLURIDES
NT INDIUM TELLURIDES
NT LEAD TELLURIDES
NT MERCURY TELLURIDES
NT TELLURIDES
NT TIN TELLURIDES
NT ZINC TELLURIDES
- Semiconductor properties of indium telluride alloys, conductivity and Hall effect
21 p3779 A69-38580

TEMPER [METALLURGY]

- Zirconium corner of Zr-Fe-Nb phase diagram, studying alloy tempering at various temperatures
02 p0263 A69-11851

TEMPERATE REGIONS

- Temperate latitude sporadic E origin and structure - Conference, Vail, Colorado, June 1968
01 p0069 A69-11156
- Time and latitude variations of blanketing sporadic E of different intensities
01 p0070 A69-11159
- Blob existence in temperate latitude sporadic E from ionosonde and VHF oblique incidence measurements
01 p0070 A69-11162
- Cause and structure of temperate latitude sporadic E - Conference, Vail, Colorado, June 1968, Volume 2
01 p0072 A69-11169
- Midlatitude sporadic E layer, examining hypothesis of wind action on metallic ions and metallic ion accumulation caused by gravity waves
01 p0072 A69-11173
- Self maintenance of absolute angular momentum in atmosphere as explanation of subtropical jet stream origin
15 p2647 A69-30192
- Zonal winds in temperate latitude analyzed as function of latitude and month from GHOST balloon flights in Southern Hemisphere at 200 mb
17 p2997 A69-33163
- Geomagnetic pulsations with intensity maximum at midlatitudes, noting north to south decreasing trend
20 p3522 A69-37059
- Ion production rates vertical distribution and temporal changes at midlatitudes during solar activity minimum and maximum above F 2 layer
20 p3525 A69-37656
- F 2 layer midlatitude positive disturbances observed during IGY on quiet and disturbed days, noting positive to negative transition latitudes
20 p3527 A69-37674
- Ion layer separation in temperate-zone sporadic E, obtaining layer shape by superimposition of density distributions
20 p3535 A69-38106
- Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption
22 p4008 A69-41104

TEMPERATURE

- U AMBIENT TEMPERATURE
U ATMOSPHERIC TEMPERATURE
U BODY TEMPERATURE
U COMBUSTION TEMPERATURE
U CRITICAL TEMPERATURE
U CURIE TEMPERATURE
U FLAME TEMPERATURE
U FLASH POINT
U HIGH TEMPERATURE
U IGNITION TEMPERATURE
U ION TEMPERATURE
U IONOSPHERIC TEMPERATURE
U LOW TEMPERATURE
U LUNAR TEMPERATURE
U OPERATING TEMPERATURE
U PLANETARY TEMPERATURE
U PLASMA TEMPERATURE
U ROOM TEMPERATURE
U SKIN TEMPERATURE [BIOLOGY]
U SKIN TEMPERATURE [NON-BIOLOGICAL]
U STAGNATION TEMPERATURE
U SURFACE TEMPERATURE
U WALL TEMPERATURE

TEMPERATURE COMPENSATION

- Atmospheric temperature corrections for measurements by rocketsonde and balloonsonde with thermistor, noting dissipation factors and thermal time constants
01 p0081 A69-10697
- Linearizing circuit for low velocity hot-wire anemometry, using analysis of transistor circuit to generate desired function
06 p0927 A69-17701
- Semiconductor strain gage balance with temperature compensation for conventional wind tunnels
10 p1672 A69-23265
- Quartz oscillator with electronic temperature compensation, noting reduced size, weight and power consumption
14 p2420 A69-29398

TEMPERATURE CONTROL

- Liquid fluidic amplifiers combined into controller for modulating coolant temperature to control flight suit temperature automatically
02 p0202 A69-11923
- Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
03 p0368 A69-13127
- Thermistors for total optical radiation pyrometer and for temperature control system based on radiation pyrometer, noting thermistor response and control circuit
04 p0601 A69-15119
- Synthesis of simulated aircraft cabin pure fluidic temperature control system [ASME PAPER 68-WA/FE-30]
05 p0705 A69-16103
- Scaled models for spacecraft thermal control, considering radiation-conduction-convection heat transfer [SAE PAPER 690196]
07 p1116 A69-18304
- Explorer 40 satellite mathematical model and verification testing for close spacecraft flight temperature predictions [SAE PAPER 690202]
07 p1239 A69-18305
- Fabrication welding with maraging steels with emphasis on minimizing heat input
08 p1320 A69-20407
- Human body heat loss control during water immersion, discussing insulative garments and technologies of energy conversion systems [AGARDOGRAPH-111]
08 p1267 A69-20681
- Energy source for space environments based on compact cold hydrogen-oxygen fuel cell, discussing heat control and water elimination methods
08 p1260 A69-21041
- Earth reflected solar radiation and stability of satellite thermal control coatings, noting intensity distribution shifting toward UV region and coatings degradation rate
09 p1579 A69-22174
- Miniature fluidic oscillator temperature sensors evaluated in gas turbine engine nozzle, discussing temperature control and related signal error compensation and temperature averaging [ASME PAPER 69-GT-70]
09 p1572 A69-22512
- Multichannel miniature telemetry for vibration, strain and temperature measurements in high speed machinery by solid state encapsulated devices
10 p1654 A69-23251
- Human body temperature regulating factors in low temperature environment, studying metabolism, lung ventilation and onset of shuddering
10 p1648 A69-23298
- Cryostat design, discussing vapor and radiation shielding, construction and insulation materials, safety features, cost considerations, etc
10 p1810 A69-24015
- High power TWT tube cooling in space vehicle, discussing thermal control system based on heat pipe radiator
11 p1847 A69-24747
- Passive thermal control system for space suit use in extravehicular environment, discussing skin temperature control at varying heat flow rates
12 p2023 A69-26549
- Mathematical model for melting of finite paraffin slab based on method on numerical computer solution of heat conduction equations for thermal control devices
12 p2190 A69-26785
- Heat pipe boil-off control system for reducing cryogenic boil-off during long term space storage
12 p2191 A69-26793

- Spacecraft surfaces bidirectional reflectance flux distribution applications to space thermal control computations [AIAA PAPER 68-26]
13 p2222 A69-28216
- Combined hypoxic hypoxia and high ambient temperature found relieving strain on humans by increasing heat release by evaporation
13 p2212 A69-28628
- Self thermostatic phase-change coatings for active and passive spacecraft temperature control, discussing temperature dependent changeability in solar absorptance
14 p2530 A69-29434
- Spray deposition of low emittance gold thermal control coatings on aerospace structures
15 p2618 A69-30310
- Thermal control coatings for solar cells of solar probe Helios
16 p2867 A69-31741
- Constant temperature heat pipe for thermal control of spacecraft components by direct coupling to external radiator [AIAA PAPER 69-632]
17 p3070 A69-33262
- Simulated solar wind environment effects on zinc oxide/potassium silicate and lanthanum oxide/potassium silicate spacecraft thermal control coating pigments [AIAA PAPER 69-642]
17 p2991 A69-33273
- Mars lander thermal control system design parameters including environment, power duty cycle and lander size and weight [AIAA PAPER 69-610]
17 p3072 A69-33274
- Heat pipe application to thermal equalization around ATS-E solar cell mounting panels, comparing predicted and actual performance [AIAA PAPER 69-630]
17 p3072 A69-33277
- Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions [AIAA PAPER 69-617]
17 p2914 A69-33278
- Heat transfer suppression techniques in high temperature low density fiberglass insulation for flight vehicles [AIAA PAPER 69-606]
17 p3072 A69-33279
- UV irradiation effects on ZnO spacecraft thermal control coating pigments, discussing photo-Hall, luminescence and electron paramagnetic resonance measurements [AIAA PAPER 69-639]
17 p2992 A69-33288
- Gas products evolved from selected thermal control coating materials during UV radiation in vacuum, noting permanent reflectance loss [AIAA PAPER 69-640]
17 p2992 A69-33289
- Heat pipe devices applied to radiative body heat transfer in space suit temperature control [AIAA PAPER 69-619]
17 p2914 A69-33293
- Planetary lander model thermal design, analysis and testing, emphasizing lightweight multilayer insulation, discussing thermal/vacuum testing [AIAA PAPER 69-612]
17 p3049 A69-33296
- Parametric thermal control weight and power requirements for spacecraft life support systems, considering number of cabins, crew activity, heating, cooling and regeneration [AIAA PAPER 69-621]
17 p2914 A69-33305
- Forge to determine refractory metals formability and ductility at high temperature in protective pressure
17 p2945 A69-33419
- Thermal control system for AZUR research satellite, tabulating extreme flight temperatures and permissible temperature range from simulation test data
17 p2903 A69-33427
- Solar probes design for 0.3 to 0.1 AU perihelion distance, considering thermal control, power supply, communications, altitude control and alternative configurations
17 p3050 A69-33797
- Temperature control below 5.2 K based on servoing He pressure above bath
18 p3136 A69-34641
- Thermal control of Mars entry capsule with fiberglass honeycomb sandwich shell analyzed with and without aft thermal curtain, emphasizing cruise-flight phase [AIAA PAPER 68-1082]
19 p3429 A69-35949
- Bessel function applied to unsteady axisymmetric problem of heat conduction in thermally controlled coaxial cylinders with different physical properties
19 p3448 A69-35981
- Wavelength-surface temperature relationship of ruby laser, discussing thermal control of emission wavelength
20 p3552 A69-36967
- Second surface mirror used as coating for spacecraft thermal control
20 p3632 A69-37290

Electronic equipment thermal control, describing design and use of heat pipes
22 p4049 A69-39944

Thermal design of missile mounted S band telemetry transmitter package based on temperature control system, using heat-of-fusion characteristics of wax material
22 p3909 A69-39945

High voltage power supply electronic subsystem for electric propulsion of ATS-D satellite, describing packaging, temperature control and performance in simulated space environment
22 p3999 A69-39948

Reliability demonstration testing equipment, describing temperature chamber design and instrumentation, overall facility planning, etc
22 p3954 A69-40034

Temperature control instrumentation accuracy in terms of static errors and dynamic errors minimizing costs
22 p3954 A69-40037

Temperature program generation for test chambers, describing temperature programmers and readout, verification and recording systems
22 p3954 A69-40038

Circadian variations in human temperature regulation, measuring peripheral and rectal temperatures and peripheral heat and arterial blood flows in clothed resting males
22 p3872 A69-40201

Exercise-temperature regulation in men under constant submaximal workload at various simulated altitudes, discussing exercise core temperature equilibrium level setting mechanisms
22 p3891 A69-40219

Dynamic characteristics of temperature control systems using crystal oscillators determined by nonlinear automatic control theory
22 p3869 A69-40254

Computer optimization of spacecraft optical coatings for temperature control, using finite element analysis and matrix inversion
[AIAA PAPER 69-979] 22 p4050 A69-40359

Thermal scale modeling for space hardware development from managerial and engineering viewpoints
[AIAA PAPER 69-1010] 22 p3922 A69-40383

Spacecraft electronic components operating junction temperature control, considering role of thermal resistance in controlling radiative and conductive transfer
[AIAA PAPER 69-1015] 22 p3922 A69-40387

Thermal control coatings, windows and mirrors for 1973 Mars Viking Lander vehicles under simulated Martian surface conditions
[AIAA PAPER 69-1023] 22 p3923 A69-40393

Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation
[AIAA PAPER 69-1024] 22 p3923 A69-40394

Gases effects on UV irradiated thermal control materials spectral reflectance, discussing tests and photolysis mechanisms
[AIAA PAPER 69-1025] 22 p3923 A69-40395

Autotransformer with static tap changer to provide varying power levels for controlled gradual heating of aircraft window to avoid thermal shock
22 p3869 A69-40414

Solid state chemical heat sources aboard unmanned planetary landing vehicles to maintain batteries and experiments operability during cold planetary nights
23 p4070 A69-42275

Temperature control by heat pipe using noncondensing gas with methanol to vary thermal resistance and mathematical model to describe heat source temperature variations
23 p4240 A69-42307

Multiple outlets for reducing stratification-induced liquid propellant supply temperature rise, preventing cavitation problems in supply pumps
[AAS PAPER 69-395] 24 p4363 A69-42830

Turbine rotors temperature reducible by increasing air cooling system flow rate
24 p4364 A69-43081

TEMPERATURE DISTRIBUTION

Random temperature fields in plates and shells in thermal contact with two media with temperatures as separable random space-time functions
01 p0173 A69-10077

Mach-Zehnder interferometer for studying temperature distribution and heat transfer in turbulent jets, noting temperature dependence on jet thickness at different angles of attack
01 p0005 A69-10101

Steady state problem of convective heat transfer in half space with boundary conditions of third kind
01 p0174 A69-10103

Continuous wave solid state lasers active elements temperature fields calculated by differential equations
01 p0089 A69-10105

Titanium alloy VTZ-1 recrystallization and oxidation processes studied by heating within 700- 1200 C temperature range
01 p0094 A69-10214

Internal temperature distributions of present and proposed calorimeter geometries operating at high pressure and extreme heating rates compared, using one and two dimensional heat conduction programs
01 p0079 A69-10299

Free convection from partially uniformly heated and partially insulated vertical flat plate, discussing dimensionless velocity, temperature, heat flux and axial length parameters
01 p0175 A69-10331

Electric field effects on flame temperature variation, suggesting electrons active role in flame combustion reactions
01 p0176 A69-10389

Heat transfer between concentric cylinders at different temperatures measured for argon, neon and helium
01 p0177 A69-11403

Laminar natural convection of electrically conducting fluid under magnetic field, noting temperature profiles
01 p0134 A69-11407

Turbulence characteristics from light wave fluctuation measurements, discussing applications to small scale inhomogeneities in atmospheric temperature distribution
02 p0274 A69-11437

Turbulence conditions in atmospheric boundary layer within similarity theory, including wind velocity and temperature profile
02 p0274 A69-11447

Thermoviscoelasticity equation solution for class of dynamic problems, giving problem solution for half space with arbitrary temperature field boundary condition
02 p0336 A69-11554

Metallic dismountable thermionic converter enclosed in mica sealed vacuum chamber, giving I-V characteristics, optimal temperature of liquid cesium phase and output power
02 p0194 A69-11587

Procedure accounting for variable thermal conductivity and internal heat generation in temperature distribution prediction for waveguide ferrite slabs
02 p0215 A69-11877

Generalized unsteady temperature fields and stresses in crystalline plates using Fourier and Laplace transforms
02 p0340 A69-12044

Transient laminar boundary layer development on flat plate following impulsive start of surrounding fluid motion, obtaining temperature and velocity distribution relationship
[ASME PAPER 68-HT-10] 02 p0232 A69-12208

Critical points separating stable and unstable branches of equilibrium curve of nonlinear elastic systems, discussing flexible shallow conical shell in temperature field
02 p0341 A69-12256

Thermostructural analysis of large flexible paraboloid antenna indicates RF losses due to thermal distortions significant for X band and higher transmissions
[AIAA PAPER 68-333] 02 p0345 A69-12372

Gray radiation and conductive heat transfer in Oseen-like free mixing flow, computing temperature distribution by inversion integral
02 p0354 A69-12504

Brightness temperature maps for Jovian thermal radiation obtained through 8-14 micron window of atmosphere
02 p0309 A69-12715

Zonal temperature and spectral characteristics of stratospheric circulation, noting westward rotation of second harmonic
02 p0246 A69-12759

Plane inhomogeneous thermal stress in isotropic elastic circular infinitely long cylinder produced by plane unsteady temperature distribution
02 p0349 A69-12826

Three dimensional unsteady heat conduction and temperature distributions in finite hollow circular cylinder under time dependent boundary conditions of second kind
03 p0530 A69-12861

Steady state temperature distribution in heat generating fluid in plug flow in circular tube with arbitrary inlet and wall temperature distribution
03 p0530 A69-12862

Variational technique for determination of temperature fields due to nonuniform heat transfer over surface of heat producing body
03 p0531 A69-12862

Turbulent mixing of scalar fields such as temperature or concentration noting fine structure, number and distribution of zero gradient points and minimal gradient surfaces
03 p0414 A69-13113

Velocity dispersion and temperature anisotropy with respect to magnetic field direction, discussing inertial solar wind cooling effects
03 p0500 A69-13527

Temperature and current distribution in avalanche silicon p-n junctions
03 p0487 A69-13637

Controllable states of elastic heat conductors analyzing deformations and temperature fields
03 p0529 A69-13937

Ion and atom temperature distribution for two fluid model of Ar plasma in cylindrically symmetrical water stabilized electric arc column
03 p0481 A69-14155

Stressed state periodic problem in infinite strip under combined pressure and temperature field effect
04 p0673 A69-14497

Constant thickness disk temperature field for inhomogeneous boundary conditions, considering roots of characteristic equations determination
04 p0685 A69-14498

Scaled solar and gray-body temperature distributions models compared to determine stellar atmosphere
04 p0653 A69-14626

IR observations of lunar crater and maria enhanced thermal emission during eclipse, constructing model of cratered surface to analyze thermal behavior
04 p0654 A69-14656

Temperature distributions, thermal stresses and natural frequencies of radial vibrations in thin circular cylindrical shells
04 p0675 A69-14704

Mean temperature distribution through inner and outer regions of turbulent boundary layer with injection through heated porous wall
04 p0685 A69-14729

MHD channel flow temperature distributions with Hall effect, using formulation for momentum and energy equations
04 p0635 A69-14746

Electron, ion and neutral particle temperatures of upper atmosphere
04 p0592 A69-14975

Temperature distribution over receiving layer of absorption edge image transformer, discussing thermal conduction influence on performance of thin film IR image receiver
04 p0631 A69-15280

Approximate method to determine nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature
04 p0688 A69-15409

Temperature distribution and thermal stresses in liquid filled cylindrical shell
04 p0682 A69-15413

Water and heat removal unit for hydrogen/oxygen fuel cell systems, discussing temperature distribution and heat and liquid transport
05 p0704 A69-15676

Variational methods applied to unsteady heat flow, describing approximate method for unsteady temperature field in heat conducting body
05 p0845 A69-15794

Quantitative analysis of nonsteady temperature field in long cylinder for sudden heating of semiinfinite axisymmetric lateral surface
05 p0845 A69-15797

Plane thermal stress distribution determined around holes under steady temperature distribution, using complex variable approach
05 p0836 A69-15877

Coupled heat equation to calculate transient and steady state temperature distributions in viscoelastic solids under cyclic deformations
05 p0836 A69-15878

Finned radiation emitter tube unsteady state temperature field as function of working body temperature and emitter geometry
05 p0846 A69-15898

Heat transfer, temperature and velocity profiles in circular free jet can be described by heat conduction type equations
05 p0747 A69-16032

- Mathematical problem of MHD thermal entrance regions for parallel plate channel solved by Galerkin method
[ASME PAPER 68-WA/HT-10] 05 p0803 A69-16118
- Transient temperature distribution for finite slab in phase transformations via single face temperature changes
[ASME PAPER 68-WA/HT-37] 05 p0848 A69-16128
- One dimensional integral solution for cylindrical source generated transient temperature field and relation to thermal diffusivity of brain tissue
06 p0879 A69-17085
- Sensible heat exchange from Gemini and Apollo space suits determined in environmental test facilities, presenting data for heat flux distributions
06 p0880 A69-17089
- Temperature distribution for static stellar corona in presence of magnetic field, noting energy flow process
06 p1002 A69-17316
- Temperature distributions and thermal stresses in bimetallic I-beam structures with dissimilar materials for skins and webs and with kinetic heating inputs
06 p1024 A69-17610
- Approximate expression for temperature distribution during heat transient in infinite solids of plane, cylindrical and spherical geometry
06 p1025 A69-17779
- Blade to rotor heat transfer in turbines determined from temperature distribution of rod in medium with nonuniform temperature
06 p1034 A69-17870
- Computer program for predicting temperature distribution and heat transfer through coated and uncoated window systems of aerospace vehicles
[AIAA PAPER 68-28] 06 p1038 A69-18178
- Theta pinch plasma electron density and temperature distributions measured using Thompson scattering of laser light and plasma bremsstrahlung
06 p0972 A69-18220
- Digital computer methods and numerical techniques to evaluate temperature distributions in spacecraft structures, discussing thermal modeling
[SAE PAPER 690199] 07 p1239 A69-18301
- Constant thickness fin with arbitrarily distributed heat sources optimized using approximate physical model and closed form solution of field equation
[SAE PAPER 690198] 07 p1239 A69-18302
- Temperature distribution in low pressure magnesium vapor-oxygen diffusion flames, discussing environmental conditions and visible radiation
[WSCI PAPER 68-20] 07 p1241 A69-18367
- Contour map of southern Milky Way at 1410 MHz obtained using 210 ft radio telescope at Parkes, Australia
07 p1214 A69-18667
- Nonaxisymmetric temperature field of unbounded hollow cylinder with moving heating boundary, expanding surface temperature into Fourier series
07 p1241 A69-18924
- Boundary value problem of temperature field and heat conduction in transparent media heated by laser radiation producing thermoelastic stresses leading to breakdown
07 p1149 A69-18925
- Planetary wave-zonal flow interaction interpretation in terms of potential vorticity eddy transport, deriving zonal wind change and temperature field
07 p1126 A69-19037
- Radial distribution of azimuthally averaged temperature and amplitude vacillation characteristics in rotating differentially heated fluid annulus determined by multiprobe technique
07 p1126 A69-19040
- Steady state thermal stress distributions near external crack in solid, treating temperature distributions with respect to plane of crack
07 p1232 A69-19172
- Dynamic internal thermal shock in spherical shells of arbitrary thickness, considering uncoupled dynamic thermoelasticity problems with spherically symmetrical temperature fields
07 p1236 A69-19471
- Shear stress at wall, averaged velocity field and turbulent heat transfer coefficients in straight smooth non-circular channels used to compute temperature fields
07 p1243 A69-19734
- Semilogarithmic law of velocity and temperature for turbulent flow in circular channel, examining analogy between momentum and energy transfer
08 p1420 A69-19877
- Thermal gradients in artificial satellites, considering heat exchange among various points of closed cavity surface by gray body diffuse radiation and reflection
08 p1421 A69-20157
- Electron temperature and electron density variations with radial distance in 10 MHz electrodeless ring discharge in H, noting electric field
08 p1361 A69-20230
- Metallic particle ignition in oxygen containing media, obtaining temperature curves and vaporization rates
08 p1375 A69-20343
- Suction effect on temperature distribution and heat transfer in plane Couette flow and laminar flow in circular pipe
08 p1303 A69-20371
- Low latitudes observations of 21 cm line of H I in galactic center direction, giving contours maps of brightness temperature
08 p1392 A69-20562
- Continuous variate duration estimates by Markov process, giving example of surface air temperature conditional probability distribution
08 p1346 A69-20731
- Ar-H plasma arc radial temperature distribution determined by photoelectric spectroscopy in visible range
08 p1366 A69-20758
- Steady motion through rarefied gas of circular cylinder due to surface temperature difference
08 p1305 A69-20888
- Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods
[AIAA PAPER 69-244] 09 p1566 A69-21260
- Temperature and displacement fields in unbounded elastic space due to instantaneous point heat source action
09 p1621 A69-21495
- Atmospheric humidity effect on efficiency of geomagnetic field scales with taut-strip suspension and temperature fluctuation
09 p1494 A69-21518
- Temperature profiles variability for data obtained by rocketsonde thermistors launched with small time and spatial separation
09 p1494 A69-21644
- Upper atmosphere temperature distribution estimation on basis of twilight zenith sky intensity measurements, discussing influence of various parameters on accuracy
09 p1487 A69-21653
- Velocity and temperature fields in Newtonian fluid in motion past stationary obstacle in gravitational field, noting similarity parameters reduction
09 p1429 A69-21686
- Circular central shading effect on energy distribution parameters of paraboloidal mirrors, noting reflected radiant flux power limitation
09 p1436 A69-21804
- Temperature distribution for thin plate heated by source of arbitrary motion and strength and governed by Sturm-Liouville boundary conditions
09 p1622 A69-21906
- Spectrographic observations indicating temperature range within individual filaments of Cygnus Loop, noting agreement with stratified models
09 p1607 A69-22430
- Fuel control systems using emulsified fuel, noting exposure effects and temperature and pressure characteristics
[ASME PAPER 69-GT-40] 09 p1571 A69-22486
- Thermal approach to pulsating combustion, determining temperature-time variation, frequency and pressure from mathematical model
09 p1625 A69-22694
- Plane thermal stress field in discontinuous temperature distribution within isotropic linear elastic circular cylinder of infinite length
10 p1793 A69-22884
- Steady laminar boundary layer flow calculations extended to temperature boundary layer for given heat flow or temperature distribution at wall
10 p1808 A69-22915
- Pulsed and CW lasers glass crystals temperature fields determination, including tangential and axial thermal stresses
10 p1702 A69-23428
- Temperature field calculation in infinite plate with heat transfer coefficient and ambient temperature arbitrary functions of time
10 p1809 A69-23430
- Electron temperature distributions in Ar-K plasma of simulated Faraday type MHD generator for current distributions, determining current density distribution experimentally
10 p1734 A69-23453
- Heating system providing symmetrical temperature field and specimen self centering for thermal resistance tests
10 p1696 A69-23845
- Heat propagation in discharge plasma heated by magnetosonic wave, constructing transverse temperature profile
10 p1741 A69-23896
- Finite difference method for calculating lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature
10 p1722 A69-23967
- Xenon pulse discharge plasma temperature distribution, spectral brightness density and light absorption across quartz tube section, noting temperature drop near wall
10 p1742 A69-24081
- Emissivity of screened tube in presence of heat conducting connecting pieces between tube and screen
11 p1997 A69-24229
- Monograph on comparison of various methods for experimental determination of temperature fields in laminar burner flames
11 p1999 A69-24635
- Temperature field in thin walled rods with spiral coil cross section in solar radiation, considering radiant heat exchange
11 p1999 A69-24779
- Vertical air flow asymmetrical distribution ascribed to cyclone motion and thermal inhomogeneity by studying spiral cloud configurations in cyclone area
11 p1912 A69-24829
- Steady heat flow in cylindrical bodies with curvilinear rectangular cross sections, solving equation in form of Fourier series according to trigonometric functions
11 p2000 A69-24974
- Optical and radio measurements of electron temperature of H II regions obtained from brightness ratio of hydrogen line and continuum, considering isothermal model
11 p1950 A69-25110
- Holography for temperature distribution measurement around heated wire, using He-Ne laser
11 p1887 A69-25197
- Carbon dioxide temperature distribution, absorption and concentration as functions of molecular dissociation behind shock wave determined by measuring IR bands intensity
11 p1873 A69-25226
- Free convection boundary layer flow past vertical flat plate analyzed for nonlinear wall temperature distributions using series solutions
11 p2002 A69-25243
- Brightness temperature distributions from intensity interferometric measurements reconstructed by computation
11 p1888 A69-25256
- Initial nonuniformity effect of temperature distribution in main stream on efficiency of cooling by air injection through slit or porous collar
11 p2002 A69-25338
- Low power gradient uniform electric arc column in cross flow and transverse magnetic field, analyzing temperature, velocity, pressure and magnetic field distribution
11 p1933 A69-25556
- Unsteady temperature field and thermal stresses for anisotropic and orthotropic plates heated by heat sources and having Newton law heat transfer
12 p1777 A69-25992
- Atmospheric models for exospheric temperatures of Mars and Venus based on photoionization heating efficiency
12 p2155 A69-26020
- Temperature regime of pulsed laser with pump lamp located in cylindrical rod cavity, discussing adiabatic and nonadiabatic pumping
12 p2104 A69-26025
- Thermal stresses in hollow finite circular cylinder having smooth rigid insulating cover on curved surfaces and temperature distribution on plane ends
12 p2180 A69-26268
- Lunar surface layer temperature field dynamics obtained from stable periodic solution to parabolic differential equation with nonlinear nonautonomous boundary conditions
12 p2157 A69-26281
- Focusing power of hyperbolic gas lens for light beam waveguides, noting temperature distribution measurements and pole separation
12 p2107 A69-26392

Dynamic energy balance in positive column of electric arc, integrating expression to determine temperature time dependence

12 p2137 A69-26535

Lunar thermal anomalies in various craters observed during lunar night by IR methods, with data suggesting hot and cold regions

12 p2171 A69-27092

Correlation between temperature and stress field in thermal buckling of square viscoelastic Maxwell plates under random temperature

12 p2188 A69-27113

Dense plasma jets in flowing HF flame discharges, discussing energy balance and longitudinal and radial temperature distribution

12 p2140 A69-27127

Numerical solution to partial differential equations describing helical discharge in Ar with gas injection, discussing initial temperature distribution and radial distribution effects

12 p2141 A69-27131

Blade material temperature variation observed in turbojet engine during air bleed of varying intensity and duration

13 p2325 A69-27444

Lunar surface temperature distribution measured by IR pyrometer, predicting temperature rise due to Lunar Excursion Module landing

13 p2341 A69-27583

Far IR and millimeter solar continuum, analyzing flatness of limb darkening curves and brightness temperature near minimum

13 p2341 A69-27591

Height and temperature vertical variability in mid and upper stratosphere determined from constant pressure charts /1964-1966/

13 p2290 A69-27637

Greenhouse effect in Venusian atmosphere, discussing cause of vertical temperature distribution established by Venera 4 probe

13 p2345 A69-27690

Cellular convection in horizontal gas layer analyzed for causes of vertical air circulation and effect of vertical temperature profile

13 p2291 A69-27725

Unsteady temperature distribution in solid sphere with variable internal heat source and surface subjected to variable heat flux

13 p2373 A69-27773

Transient one dimensional temperature distribution determined for bodies with internal heat generation and nonlinear boundary condition, using Biot variational method [ASME PAPER 68-HT-6]

13 p2374 A69-27775

Heat transfer and temperature distribution in thin fins with stochastic root temperature due to excitation by stochastic and Markov processes [ASME PAPER 68-HT-35]

13 p2374 A69-27780

Triangular profile circular fins efficiency determined from differential equations solution governing temperature distribution

13 p2375 A69-27790

Velocity and temperature profiles in gaseous turbulent boundary layer above liquid surface used to study liquid film cooling heat transfer

13 p2375 A69-27792

Soviet book on temperature regime of free atmosphere above Northern Hemisphere covering aerological data processing, statistical estimates, latitudinal and seasonal variations

13 p2294 A69-27934

Thermionic converter matched with solar cells analyzed for parabolic mirrors, assuming heat conduction power supply to cathode and uniform temperature distribution

13 p2209 A69-27970

Laminar temperature and velocity profiles near plane rectangular surface for free supersonic flow, solving partial differential equations for mass, momentum and energy conservation

13 p2309 A69-28025

Thermal shock temperature distribution and thermal stresses in finite circular disk subjected to instantaneous point heat source

13 p2363 A69-28130

Creep stresses and displacements in conical membrane shells at small angle of attack to supersonic flow field, discussing temperature distributions

13 p2364 A69-28205

Eddy diffusivities ratio for heat and momentum by mixing length theory, using Mach-Zehnder interferometer for temperature profiles

13 p2380 A69-28497

Asymmetric spherical temperature field reconstruction based on measuring temperature and derivatives at two points of field

14 p2537 A69-28888

Periodicity of magnetothermal oscillations in pressure annealed pyrolytic graphite compared with hole carriers

14 p2504 A69-29005

Electron and ion temperatures height variations in sporadic E layers, noting effects of neutral gas temperature changes

14 p2440 A69-29127

Heat conduction and Navier equations solved for temperature distribution and displacements in elastic solids, considering time dependent boundary conditions, body forces and heat generation

14 p2535 A69-29364

Turbulence and temperature fluctuations spectral characteristics in thermally stratified atmosphere determined for various wave numbers, using energy and mass transfer functions

14 p2472 A69-29402

Turbulent heat exchange coefficient radiation absorption and diurnal vertical variations effects on temperature field in surface layer of sea and atmospheric boundary layer

14 p2472 A69-29462

Acoustic sounding of atmospheric structure, utilizing energy backscattered from temperature fluctuations in turbulent regions

14 p2448 A69-29527

Temperature behavior of resonant and antiresonant frequencies as function of electromechanical coupling and overtone order in piezoelectric resonators

14 p2421 A69-29542

Comet Ikeya-Seki phenomena near perihelion interpreted from mean surface and ice nucleus internal layers temperatures

14 p2523 A69-29706

Tropospheric and stratospheric temperature distribution in 1965 summer and winter from radiosonde and rocket data

14 p2442 A69-29725

Atmospheric heat exchange and circulation simulated by rotating containers, reproducing temperature field and dynamic structure above large area

14 p2478 A69-29840

Radial distribution functions for dense hydrogenous plasma near ionization temperature by solving Percus-Yevick equations

14 p2502 A69-29998

Spectroscopic determination of temperature fields in water and transpiration cooled constricted Ar arc jets at atmospheric pressure

15 p2657 A69-30155

Device for fatigue testing turbine disk models in unsteady temperature fields with radial and axial nonuniformity produced by HF heating

15 p2583 A69-30208

Titanium alloy VT3-1 recrystallization and oxidation processes studied by heating from 700-1200 C

15 p2637 A69-30270

Turbulence coefficient in layers between main isobaric surfaces based on wind and temperature fields analysis

15 p2648 A69-30646

Thermoelastic stress in semifinite elastic medium due to discontinuous temperature distribution over free surface, solving associated heat conduction problem

15 p2712 A69-31006

Thermal stresses and displacements in isotropic inhomogeneous rotating circular disk with axle hole under steady temperature field

15 p2712 A69-31016

H beta line for measuring radial temperature distribution in cylindrical hydrogen arc at one atm and to 150 A current in high temperature range

15 p2671 A69-31101

Half maximum temperature of diatomic gases determined by extending relation between specific heat and molecular dissociation to diatomic molecules [DVL-899]

15 p2656 A69-31102

Radiative energy transfer through nongray absorbing and emitting medium generating heat with graphical presentation of temperature distribution and flux

15 p2718 A69-31153

Temperature distributions in layer with internal heat source and turbulent fluid flow cooling, deriving differential heat transfer equations

15 p2718 A69-31169

Thermal stresses in circular cylinder with regularly distributed cavities, establishing distribution laws for temperatures and stresses

15 p2714 A69-31196

Similarity criteria for plastic deformation theory body under pressure and nonuniform temperature field, considering strength calculations

15 p2714 A69-31212

Internal gravity waves suggested as possible cause of anomalous mesospheric temperatures

15 p2601 A69-31218

Alpine effects on wind field at synoptic scale using potential-vorticity equation, discussing deflection and dependence on potential temperature distribution

15 p2650 A69-31241

Cholesteric liquid crystal film application to test surfaces for thermal mapping, giving technique for pattern determination

15 p2631 A69-31248

Temperature profiles in laminar boundary layer with endothermal reaction investigated using nitrogen plasma jet in rarefied gas wind tunnel

16 p2821 A69-31284

Two dimensional turbulent mixing with surface mass injection at supersonic and hypersonic speeds, noting velocity and temperature distributions [AIAA PAPER 68-130]

16 p2770 A69-31818

Temperature distribution of solid spherical satellite under solar radiant heating solved by variational calculus or point matching methods

16 p2877 A69-31919

Temperature field in plate heated at one end and situated in solidifying gas, leading to gas layer formation by sublimation

16 p2878 A69-31919

Time, temperature and transformation curves for Ti-6Al-4V alloy by dilatometry, hardness measurements, X-ray diffraction and micrography, discussing martensite and beta-alpha transformations

16 p2802 A69-32181

Spontaneous and stimulated aspects of light scattering by absorbing media, relating refraction index to temperature variations and external stresses

16 p2798 A69-32444

Jet stream blocking process simulation using geostrophic system of equations, considering effects of orography and contrast heating due to land-sea distribution

16 p2809 A69-32606

Ozone and temperature profiles influence on atmospheric radiation intensities measurement by satellite in five spectral regions, noting pressure broadening effect

16 p2786 A69-32633

Polarization of light from atmospheres of Mira variables, suggesting temperature variations over stellar surface

16 p2866 A69-32822

Upper atmospheric gas density and temperature distribution diurnal and seasonal variations calculated from satellites orbiting time changes

17 p2959 A69-32922

Temperature field, strains and stresses induced in thin circular disk by unsteady heat source, noting time effect and resonant vibrations

17 p3054 A69-33002

Linear heat flux in thin composite plate with internal point source, assuming no heat transfer at surface and neglectable temperature changes

17 p3068 A69-33112

Powdered oxidizer and infusible polymer binder combustion at various pressures, studying gaseous phase temperature field by optical color analysis

17 p3069 A69-33113

Earth surface heat flow pattern measurement and distribution techniques, considering relation to surface features and tectonic movements of crust [AIAA PAPER 69-589]

17 p2961 A69-33288

Temperature distribution in shadowed lunar crater formulated in Fredholm integral equations, showing constant temperature and correction for soil thermal inertia [AIAA PAPER 69-595]

17 p3033 A69-33299

Nonuniform wall radiation production of radiative equilibrium temperature and flux distributions in gray medium, discussing various approximation methods of solution [AIAA PAPER 69-633]

17 p3072 A69-33299

Nonlinear partial differential equations solutions of theory of thin elastic spherical shells subjected to temperature fields and external loading

17 p3067 A69-34144

Superposition method for predicting tube wall temperatures with gas property and heating rate axial variation, noting application to gas flow problems

18 p3227 A69-34311

Tropical circulation long term mean values of wind and temperature fields, momentum and heat flux

from weather stations data, noting consistent pattern and energy source

18 p3165 A69-34418

Collocation method applied to solving contact thermoelasticity problem for short thick walled hollow cylinder attached to thin elastic shell in axisymmetric temperature field

18 p3217 A69-34595

Convective heat flux from nonisothermal surface by temperature superposition method with Spalding function as turbulent heat transfer coefficient, noting wall temperature

18 p3229 A69-34836

Unsteady temperature field in plane skin of aerodynamic body in case of temperature dependent thermophysical characteristics of skin material

18 p3092 A69-34982

Temperature distribution around radiating sphere in homogeneous gas medium with molecular heat transfer, solving energy transport equation

18 p3231 A69-35325

Statistical regularization for determining vertical atmospheric temperature profile from measurements of earth radiation in 15 micron carbon dioxide band

18 p3167 A69-35339

Solar microwave emission heliographic distribution during pronounced geomagnetic recurrence, noting brightness temperature nonuniformity due to coronal depression through polytropic models for solar wind

18 p3188 A69-35396

Dynamical effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star

19 p3403 A69-35966

Nighttime F 2 region temperature distribution under geomagnetically calm and disturbed conditions calculated from Alouette 1 satellite data

19 p3304 A69-36623

Autocorrelation function for unsteady temperature and stress fields in bar located in gas stream leaving combustion chamber

19 p3440 A69-36685

Electric models optimization for heat exchange systems based on mathematical similarity between equations describing temperature and electrical potential fields

19 p3256 A69-36717

Wall temperature distributions predicted in turbulent boundary layer with arbitrary pressure gradients, basing calculations on Spalding function solutions

19 p3302 A69-36853

Local heat transfer coefficients determined from temperature distribution on porous walls, deriving mathematical expressions for various surface geometries and transfer modes

20 p3630 A69-36977

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region

20 p3594 A69-37020

Temperature and fluid distribution in porous solid subjected to large suction, convective heating and radiative cooling on one surface

20 p3514 A69-37225

Stability loss nonaxisymmetric distribution in elastic annular plates under axisymmetric heating, using Ritz method to determine critical temperature

20 p3623 A69-37327

Temperature fields and stresses in heat resistant ceramic coatings, illustrating alumina coating on Mo to calculate heating rate

20 p3565 A69-37359

Heated body cooling off study via temperature field isothermal lines visualization on TV screen

20 p3539 A69-37437

Stress strain state in thin circular elastoplastic disks under axially symmetric transient temperature distribution, noting moving annular plastic deformation region

20 p3629 A69-38028

Temperature structure of nongray planetary atmospheres, discussing scattering and absorption of solar energy by gas molecules, cloud aerosols and ground

20 p3615 A69-38258

Temperature distributions and heat transfer in thermal entrance region for Hartmann liquid flows under constant pressure gradient between parallel electrically conducting walls at rest

21 p3847 A69-38442

Stress determination in materials with creep in presence of nonuniform temperature field

21 p3833 A69-38571

Heat transfer coefficients, boundary layer thicknesses and temperature and velocity distributions in free convection boundary layer in closed axisymmetric volumes

21 p3848 A69-38634

Asymptotic method applied to nonlinear equations, determining thermal conductivity coefficient for temperature distribution in moving anisotropic media

21 p3848 A69-38642

Steady state temperature fields and thermal stresses determined in finite cylindrical shell by optimal parameters of reinforcing circular rib

21 p3834 A69-38714

Temperature distribution determined for leading edge, convex and concave parts of turbine blade porous wall with effusion cooling

21 p3850 A69-38860

Thermal stresses and displacements in long isotropic hollow cylinder heated on part of outer curved surface, analyzing temperature distribution

21 p3838 A69-39166

Velocity and temperature distribution curves in turbulent boundary layer formed by natural convection on isothermal vertical plate, using Prandtl and Nusselt numbers

21 p3852 A69-39430

Instantaneous frozen layer thickness and temperature profile in solidified layer obtained by iteration technique

21 p3852 A69-39433

Finite difference method for calculating Lee waves incident on obstacle with arbitrary vertical distribution of main flow horizontal velocity and temperature

21 p3759 A69-39653

Velocity and temperature profiles at Prandtl number values obtained for unsteady laminar free convection on infinite vertical plate with stepwise varying temperature

21 p3853 A69-39681

Monograph on electrically heated turbulent flames in cylindrical combustion chamber, investigating temperature distribution and stability

21 p3853 A69-39707

Temperature field in deflector cooled turbine blades for nonstationary regimes, considering heating of cooling air, thermal conductivity and thermophysical coefficient changes

21 p3786 A69-39718

Earth temperature distribution using various models, noting excess of total heat production in interior vs heat flow during planet history

21 p3718 A69-39732

Temperature field in system of coaxial cylinders by solving heat equation with corresponding initial and boundary conditions

21 p3855 A69-39855

Circulation and temperature fields indices used for studying tropospheric-stratospheric interactions during stratospheric warming at constant pressure levels

22 p3977 A69-39929

Thermoelectric power generator with variable thermal conductivity and electrical resistivity, obtaining steady state temperature distribution, power output and thermal efficiency

22 p3868 A69-40131

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits

[AIAA PAPER 69-1012] 22 p3922 A69-40385

Boltzmann equation analysis used to study near surface electron temperature for weakly ionized plasmas, showing nonequilibrium absorption layer governing electron temperature profile

22 p3989 A69-40528

Thermal structure of middle atmosphere, discussing heat sources and sinks, photochemical theories of ozone distribution, IR radiative transfer, etc

22 p3940 A69-40537

Curvature and temperature distribution in nonrotating long solid cylinders under solar radiation in interplanetary space

22 p4043 A69-40546

Ionic excited states statistical equilibrium populations calculated for various electron densities and temperatures including effects of dielectronic, radiative and three body recombinations

22 p3985 A69-40666

Heat conduction equation applied to thermospheric heating in auroral zone to account for local temperature and density variations, introducing horizontal transport mechanisms

22 p3941 A69-40717

Absorptivity of nonuniformly heated thin walled cylindrical radiator with central radiating hole, calculated by forward-reverse and integral methods

23 p4238 A69-41332

Thermal inertia index of semiconductor thermistor with one dimensional temperature field taking into account conductive heat transfer

23 p4163 A69-41556

Prismatic beam stress-strain state under steady temperature field, deriving stresses, displacements and elastic curve equations

23 p4227 A69-41708

Dimer bond energies analysis in Mg and Ca dimer molecules, approximating characteristic temperatures and virial coefficients

23 p4195 A69-42210

Hot gas flow through multilayer cylindrical shells, calculating temperature fields in walls

24 p4407 A69-42588

Multiple outlets for reducing stratification-induced liquid propellant supply temperature rise, preventing cavitation problems in supply pumps

[AAS PAPER 69-395] 24 p4363 A69-42830

Mixing length theory including eddies axial motion, discussing turbulent field of temperature or concentration

24 p4407 A69-42917

Creep buckling time of simply supported column under nonuniform temperature distribution over cross sections

24 p4400 A69-43053

Temperature distribution on surfaces of close binary stars as basis for predicting variation of monochromatic reflection effect

24 p4387 A69-43350

Electron temperature distribution across shock wave in weakly ionized plasma, noting variable ionization across wave

24 p4356 A69-43362

Plane Poiseuille flow with nonlinear temperature distribution, studying vortex type secondary flow onset due to buoyant forces

[ASME PAPER 69-HT-37] 24 p4411 A69-43533

Temperature distributions in heat pipe wicks as function of liquid thermal conductivity

[ASME PAPER 69-HT-23] 24 p4412 A69-43545

Heat finite propagation velocity effects on temperature distribution and heat flux for step temperature change at semiinfinite body surface

[ASME PAPER 69-HT-1] 24 p4414 A69-43564

TEMPERATURE EFFECTS

Temperature dependent isomer shift and anharmonic binding of Sn 119 in niobium stannide, measuring Mossbauer recoil free fraction

01 p0134 A69-10009

Temperature evolution velocity parameter effect on behavior of elastoviscoplastic solids, noting demonstration by work hardening tests at variable temperatures

[ONERA-TP-644] 01 p0164 A69-10036

Substructural void formation in tungsten powder metallurgy as function of annealing temperature for doped, undoped and electron beam melted material

01 p0093 A69-10061

Posistors heat capacity investigated as temperature function, showing maximum heat balance corresponds to Curie temperature

01 p0038 A69-10098

Temperature dependence of hot electron drift velocity in silicon at high electric fields, using space charge perturbation theory

01 p0135 A69-10120

Shock loading history effect on solid state response of iron meteorites to annealing at moderate temperatures permits deductions about thermal history

01 p0149 A69-10134

Hall effect in ferrites, determining classical and spontaneous Hall coefficients, electrical resistance, temperature effects and current carrier properties

01 p0135 A69-10185

Silicon p-n junction avalanche current temperature dependence calculation by considering space charge current and multiplication factor as function of temperature

01 p0136 A69-10245

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions

01 p0136 A69-10255

IR optics for indicating dynamic mechanical component reliability via surface temperature variations

01 p0085 A69-10295

Nichrome bars production dispersion hardened by alumina and zirconia inclusions, noting extrusion temperature influence

01 p0085 A69-10397

Satellites use in meteorology, noting monsoon rain forecasting through mesoscale sea surface temperatures of Indian Ocean

[UN PAPER 68-95555] 01 p0109 A69-10502

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influenced by appearance of thermal noise

01 p0152 A69-10578

Irradiation influence on chromium transition temperature explained by defect clusters and embrittling impurity redistribution

01 p0095 A69-10604

Strain hardening of alpha titanium studied for effects of grain size, strain rate, temperature and purity

01 p0095 A69-10610

Pressure and temperature dependence of slow crack growth in hardened steel in gaseous hydrogen environment

01 p0096 A69-10612

Grain boundary gas bubbles growth in chemically vapor deposited tungsten as function of annealing time, temperature and fluorine content

01 p0097 A69-10646

Liquid copper electrical conductivity temperature dependence at very high temperatures from magnetic diffusion and flux penetration measurements, noting explosion wires role

01 p0119 A69-10673

Probability characteristics of temperature and supply voltage dependent parameters of semiconductor equipment

01 p0047 A69-10783

Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures [ASLE PREPRINT 68AM 7C-2]

01 p0087 A69-10912

Isothermal secant and tangent bulk moduli of silicon fluids and correlation with pressure, volume and temperature

01 p0102 A69-10913

Ar atom transition probabilities in 5000-6000 angstrom range, noting effect of nonuniform source temperature

01 p0125 A69-10963

Low temperature effects on calf thymus deoxynucleoprotein, crystalline egg albumin and fibrillar actin, noting molecular weight and viscosity changes

01 p0018 A69-11089

Prestraining of stainless steel En58b sheet at room and cryogenic temperature, noting effect on tensile properties

01 p0099 A69-11151

Neutral gas temperature variations effect on electron-ion temperature height profile in tidally generated sporadic E layer with wind shear of gravity wave origin

01 p0073 A69-11176

Strain measurements in pure polycrystalline Ti at constant temperature and strain, considering creep and elastic aftereffects

01 p0101 A69-11363

Welding procedure for avoiding hydrogen cracking in high strength steels, stressing hydrogen escape from weld deposits

01 p0088 A69-11398

Temperature dependence of thermal conductivity coefficient and specific heat of sublimating heat proof materials

02 p0350 A69-11580

Effective temperature values of ozone used to determine onset time and disturbance height in ionosphere

02 p0238 A69-11670

Graphite specific heat temperature dependence at low temperatures, noting Wigner effect for neutron irradiation

02 p0269 A69-11782

Alpha recombination coefficient of molecular helium ions measured in helium afterglow plasmas as function of electron density and gas temperature

02 p0283 A69-11834

Isothermal sections construction of Zr-V-Ni system phase diagram from study of alloys at 1000, 700 and 500 C

02 p0263 A69-11848

Zirconium corner of Zr-Fe-Nb phase diagram, studying alloy tempering at various temperatures

02 p0263 A69-11851

Temperature dependence of semiconductivity of sintered polycrystalline EuO from current-voltage characteristics, measuring activation energy

02 p0296 A69-11875

Nitronium perchlorate thermal decomposition under overpressure of He and O between 80 and 170 degrees noting weight loss processes and crystal phase change

02 p0303 A69-11897

Temperature dependence of A and C periods of Y crystal lattice at 77 to 300 K, discussing preparation of Y films and anomalous thermal expansion

02 p0298 A69-12047

Deformation temperature and reduction effects on structure and properties of cylindrical specimens of various titanium alloys

02 p0266 A69-12124

Plate temperature oscillation effects on forced convection laminar viscous incompressible MHD boundary layer flow from semiinfinite flat plate

02 p0288 A69-12143

Sulfospinel polymorphism at high temperature and pressure and pressure-temperature phase relations

02 p0266 A69-12162

Gaseous and liquid H refractive index variations with pressure and density below room temperature, noting Lorentz-Lorenz function variations

02 p0281 A69-12180

Mechanical thermal stresses effects during laser flash illumination of GaAs, discussing temperature dependence of radiative recombination

02 p0256 A69-12245

Aluminum deformation at various strain rates and temperatures under combined stress, comparing results with theoretical predictions

02 p0343 A69-12282

Pressure and temperature dependence of isotropic elastic moduli of polycrystalline alumina, noting Grueneisen parameter, equation of state and Debye temperature

02 p0268 A69-12407

Wake temperature turbulent fluctuation decay rates deduced from atomic oxygen recombination chemiluminescence

02 p0190 A69-12525

Organic dye laser frequency variation with temperature, noting absorption and fluorescence spectra

02 p0258 A69-12617

Temperature dependence of electron beam pumped GaAs laser threshold current density and emission spectra, noting doping effects

02 p0260 A69-12683

Exothermal effects during sintering of nickel-aluminum powder mixture

02 p0269 A69-12838

Exothermal effects during sintering of nickel-aluminum powder mixture, showing role of liquid phase decomposition and intermetallics

02 p0269 A69-12843

Strain rate and temperature effect on flow stress of 7075 aluminum bars

03 p0443 A69-13120

Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs

03 p0484 A69-13282

Pressure induced microwave absorption in molecular N for various temperatures, determining dielectric loss, absorptivity and quadrupole moment

03 p0472 A69-13317

Ferromagnetic ordering effect on gadolinium dialuminate thermoelectric power, measuring temperature dependence of power and electrical resistivity

03 p0485 A69-13322

Exciton distribution in semiconductors below Bose condensation temperature differing from diffusion distribution

03 p0486 A69-13415

Inactivation by heavy ions of esterase activity of dried trypsin as function of temperature during irradiation

03 p0372 A69-13483

Electrolytic deposits of titanium, vanadium and alloys from molten salts, discussing formation conditions, velocity and properties

03 p0446 A69-13574

Temperature dependence of internal friction in molybdenum wire in moderate and high temperatures

03 p0446 A69-13576

Thermal forcing role in diurnal oscillation of planetary boundary layer wind above sloping terrain

03 p0462 A69-13682

Spontaneous emission of gadolinium ferrite polycrystals, discussing temperature dependence

03 p0487 A69-13731

Glass fiber reinforced plastics aging behavior under heat and weathering influence

03 p0454 A69-13823

Temperature dependence of He-Ne laser output at various wavelengths over low temperature range

03 p0441 A69-13845

Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons

03 p0489 A69-13889

Temperature dependent far IR absorption of ferroelectric sodium nitrite, discussing single and multiphonon processes

03 p0490 A69-13900

Empirical relation between B-V color and radiative temperature by observing eclipsing variables undergoing total eclipses

03 p0469 A69-13900

Pressure rise and thermal conductivity in cylindrical hydrogen plasma column in axial magnetic field, assuming local thermal equilibrium

03 p0479 A69-13900

Temperature dependence of isotope thermotransport in liquid K and Rb using steel capillary cells

03 p0533 A69-13900

Temperature dependence of O VIII Lyman alpha Lyman beta radiation ratio in solar corona, noting coronal temperature

03 p0516 A69-14000

Mathematical model derivation for observed atmospheric tide phenomena, taking into account thermal and other effects

03 p0426 A69-14000

Powdering temperature effect on mesh size, structure and mechanical properties of pressed semiinfinite sintered Al-Cr and Al-Fe alloys

03 p0452 A69-14100

Dilatometer for measuring thermal expansion of solid bodies over temperature range at various gas media pressures

03 p0432 A69-14150

Constants in formulas describing temperature and pressure dependence of thermodynamic characteristics of high temperature monatomic ionized gases for positive ions

03 p0473 A69-14150

Emissivity and other radiative characteristics of stainless steel oxides heated to various temperatures in air

03 p0453 A69-14150

Radiative recombination in p-n junctions in InP at various temperatures

03 p0492 A69-14160

Photoluminescence measurements of p-type thermal conversion in GaAs grown from silica boats, noting compensation by copper and shallow acceptors

04 p0639 A69-14400

Superconductivity of electron beam evaporated tungsten films by X ray and electron diffraction techniques, discussing temperature dependence of energy gap

04 p0640 A69-14400

Aging of iron-nickel-titanium alloys during heating in reverse martensitic alpha to gamma transformation process, investigating phase parameter changes

04 p0613 A69-14550

Internal friction temperature effects on amplitude dependence in niobium and molybdenum

04 p0614 A69-14630

Nimonic alloys high temperature annealing effect on dislocation structure stability created by thermochemical treatment, using transmission microscopy

04 p0615 A69-14630

Structural changes and cold shortness of molybdenum in deformation

04 p0615 A69-14630

Thermal and ablative lag induced by periodic heat input to oscillating flat plate in high velocity flow showing crossover from dynamically stabilizing to destabilizing condition as oscillation frequency increases

[AIAA PAPER 67-336]

04 p0685 A69-14720

Precipitation hardening effects on Al-Zr recrystallization with Fe and Si additions, noting peak hardness increment with decrease in aging temperature

04 p0617 A69-14930

Temperature dependence of partial pressure of saturated As vapor over solid solutions of InAs-GaAs of different composition

04 p0642 A69-14930

Temperature dependence of viscosity and density in molten thallium sulfide, noting structural changes in absence in short range order

04 p0643 A69-14990

Permittivity and loss tangent of unsaturated styrene polyester copolymers at various temperatures and frequencies

[ONERA-TP-662]

04 p0621 A69-15110

Diminished RF intensity of neutral hydrogen line near radio source W 49 due to diminished kinetic temperature of gas

04 p0662 A69-15250

Temperature dependence of Hall coefficient, conductivity and carrier mobility in manganese doped indium antimonides

04 p0643 A69-15257

Temperature dependence of electrical properties of In and Cu doped CdSb single crystals prepared by zone refining

04 p0643 A69-15264

Refractive index temperature dependence of cadmium sulfide single crystals grown from gas phase

04 p0644 A69-15268

Uniaxial compression load effect on activation energy in p-type GaSb single crystals

04 p0644 A69-15269

Low temperature spectral distribution of impurity induced photoconductivity in p-type InSb crystals prepared by zone refining

04 p0644 A69-15270

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon

04 p0619 A69-15392

Low density polyurethane foam with and without honeycomb as ablative material for reentry vehicles, discussing oxidation resistance

04 p0688 A69-15513

Argon-K plasma electrical conductivity as function of electric current density at 1400-2400 K

05 p0798 A69-15614

Work hardening in quenched fully hardened and overaged Mg-Mn alloy single crystals as function of temperature and strain rate

05 p0778 A69-15757

Work hardening characteristics of Ta and Ta-base alloy single crystals as function of temperature and interstitial concentration

05 p0778 A69-15758

Cross slip model for work hardening of nickel aluminate crystals, discussing temperature dependence

05 p0779 A69-15760

Thermal self focusing of argon laser beam passing through lead glass

05 p0771 A69-15819

Frequency dependent shear modulus for hexachlorobiphenyl measured under rare gas infusion at 5-25 C and from ambient atmospheric to 4000 psi

05 p0796 A69-15912

Liquid oxygen shear viscosity dependence on temperature and pressure obtained by measuring electrical characteristics of immersed torsional vibrating crystal

05 p0846 A69-15916

Microorganisms and viruses susceptibility to sterilization by ionizing radiation, heat and combination of radiation and heat, considering space materials damage elimination

05 p0713 A69-15947

Bending equations for shallow elastic three layer asymmetric shell with different isotropic layers and transversely isotropic rigid filler at various temperatures

05 p0840 A69-16197

Glass lasers, discussing neodymium properties in glass, flexibility of glass in size, shape and optical excellence, temperature coefficient of index of refraction, etc

05 p0772 A69-16227

Thermal self actions of CW laser beams in solids and liquids with wind or convection flow, discussing self focusing and defocusing

05 p0774 A69-16311

Thermal self defocusing effect of laser beam in self focusing liquids, measuring refractivity changes by high speed double exposure holography

05 p0775 A69-16320

Semiperfect gases with enthalpy dependent only on temperature, discussing validity of concept and Joule experiment on equivalence of heat and work

05 p0848 A69-16336

Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K

05 p0707 A69-16359

Electrical properties of n-type Cd tin arsenide single crystals with impurity concentrations at various temperatures

05 p0809 A69-16375

Hot working temperature effects on Rene 63 mechanical properties and microstructures, using tensile and stress rupture tests, electron microscopy and X ray diffraction analysis

05 p0781 A69-16446

Ruby laser characteristics at 78 K, discussing emission threshold, optimum feedback, modes, etc

05 p0777 A69-16546

High temperature effects on gallium arsenide crystals current carriers lifetime, discussing recombination characteristics and impurity photoconductivity

05 p0809 A69-16551

Double diffused Si transistors, discussing temperature dependence of gain, injection efficiency, emitter and base regions energy gaps and excess noise

05 p0733 A69-16558

Electromagnetic properties associated with presence of overlapping bands in pure superconductors, discussing temperature dependence

05 p0810 A69-16802

Temperature dependence of Josephson critical current in superconductor model having anisotropic energy gap

05 p0810 A69-16803

Electron radiation damage in MOSFET devices using bias temperature treatments

06 p0976 A69-16877

Temperature effects on primary photocurrent of base collector and collector substrate junctions of isolated transistors from microcircuits

06 p0977 A69-16881

Metal heating by laser, noting heating rates exponential increase with time due to optical characteristics changes

06 p0932 A69-16915

Law of corresponding states applied to temperature dependence of viscosity of rarefied gases

06 p0957 A69-16918

Temperature dependence of n-InSb Hall coefficient and resistivity, noting increase in conductivity with degree of compensation associated with electrical breakdown

06 p0978 A69-16990

Charge carrier lifetime measured in intrinsic conductivity range of Cd doped InAs to define recombination mechanism, relating temperature dependence to surface impurities recombination

06 p0979 A69-16997

Thermal problems in biotechnology - ASME Conference, New York, December 1968

06 p0879 A69-17084

Temperature dependence of dynamic viscoelastic properties of plasticized epoxy resins

06 p0946 A69-17125

Thermal management of integrated circuits design, noting dependence on circuit and component configurations and parameter variations

06 p0894 A69-17217

IC selection for minimum thermal effects, discussing speed, power dissipation, maximum operating frequency and noise threshold

06 p0894 A69-17219

Austenitic Fe-Ti alloys sulfur solubility and internal sulfidation rate computed, noting stronger Ti-S interaction with temperature decrease and sulfur diffusion role

06 p0942 A69-17226

He-Ne laser gain dependence on temperature noting influence of pumping conditions, discharge tube filling and geometry

06 p0934 A69-17260

Data on muons indicating temperature effect diurnal maximum and pressure corrected daily variation

06 p0924 A69-17294

Laminar natural convection in enclosed rectangular cavity, discussing temperature gradient effects

06 p1033 A69-17556

Two dimensional stress distribution changes around rectangular hole with rounded corners for varying internal pressure and temperature

06 p1025 A69-17611

High transmittance long fiber optics, presenting data on special transmission as function of temperature

06 p0958 A69-17677

CW laser mode steady excitation and narrow bandwidth obtainable by highly stable pumping and stable temperature of active element

06 p0934 A69-17681

Temperature dependence of laser induced damage in plastic Q switch made of polyethylmethacrylate and vanadyl phthalocyanine for ruby laser

06 p0936 A69-17777

Linear approximation of ionization instability in disk channel of nonequilibrium MHD generator, calculating interatomic collisions frequency as function of temperature

06 p0871 A69-17911

Ignition of binary mixtures of hydrocarbons at high and minimum ignition temperatures of components

06 p1035 A69-17935

Microwave absorption and scattering by atmospheric precipitation as function of temperature and water droplet size

06 p0954 A69-17997

Thermally induced vibration and flutter of flexible spacecraft boom, discussing stability by considering boom as cantilever beam

[AIAA PAPER 69-21] 06 p0869 A69-18144

Calibration curve for constant temperature hot-wire anemometer, taking into account high wire temperature and gas pressure effects

06 p0930 A69-18218

Polycrystalline W steady state creep rate at high temperatures noting effects of stress, grain size and subgrain size

07 p1158 A69-18241

Richardson constant and tunneling effective mass for thermionic and thermionic field emission in Schottky barrier diodes

07 p1089 A69-18247

Thermally excited oscillation experienced by OGO 4 boom antenna demonstrated by mathematical model, showing nonplanar coupled bending-torsion oscillation by solar radiation

07 p1227 A69-18333

Frequency variation during oscillation pulse in avalanche transit time diodes, discussing related thermally dependent diode voltage rise

07 p1098 A69-18459

Technique for obtaining flawless silicon single crystal films on sapphire bases by vacuum deposition, noting base temperature effect on film quality

07 p1198 A69-18509

Temperature dependence of conversion coefficients and sensitivity of n-type InSb detectors in millimeter and submillimeter ranges

07 p1199 A69-18683

Electrical resistance and Hall coefficient measurement in InAs-GaAs solid solutions system, giving temperature dependence of electron mobility

07 p1199 A69-18689

Titanium vanadium martensite decomposition kinetics during heating, showing shearing process and dependence on temperature during quenching

07 p1163 A69-18778

Oxygen diffusion parameters in beta-titanium measured by successive layer removal, noting lattice constant dependence on temperature

07 p1163 A69-18783

Section pressing from Ti alloy, noting procedure and temperature dependent deformation parameters effect on microstructure and properties

07 p1164 A69-18788

Temperature sensitivity of frequency of integrated oscillators, giving design method for achieving temperature compensation

07 p1103 A69-18882

Optical pumping at high temperatures using spin exchange signals for RF spectroscopy

07 p1148 A69-18893

Laser beam absorption induced index changes associated with thermal blooming observed in iodine doped carbon tetrachloride, using Mach-Zehnder interferometer

07 p1149 A69-18899

Water vapor absorption line for nitrogen and oxygen mixtures with frequency measurements at various pressures and temperatures, discussing attenuation and line breadth

07 p1184 A69-18911

Pumping power effect on He-Ne laser amplification factor dependence on temperature and discharge currents

07 p1149 A69-18935

Impurity atoms effects on Cu diffusion and solubility in GaAs, determining Hall coefficient temperature dependence and conductivity

07 p1199 A69-19009

Magnetic susceptibility of InP-GaAs solid solutions at various temperatures and for varying GaP content

07 p1200 A69-19013

Diurnal thermal wave form driven by harmonically oscillating ground temperature in nongray atmosphere, calculating results for terrestrial and Martian atmospheres

07 p1126 A69-19036

Response of stably stratified atmosphere to differential heating across coastlines

07 p1126 A69-19038

Ceramic radomes for hypervelocity aerospace vehicles, considering wide temperature environment effects on stability and properties

07 p1171 A69-19511

Pressure-temperature dependence of nitrogen solubility in tungsten at 2400-3000 C

07 p1168 A69-19602

Plasticity theories for nonisothermal loading, considering plastic strain

07 p1237 A69-19681

Breakdown regularity of metals having different crystal structure, considering metal lifetime dependence on stress magnitude and test temperature
08 p1328 A69-17973

Mental and physical human performance characteristics under thermal loads noting admissible temperatures and endurance limits
08 p1263 A69-19940

Dislocation climb theory of steady state creep, noting necessity of self diffusion mechanism in any high temperature creep theory
08 p1329 A69-20000

Solution annealing and aging time and temperature effects on precipitation in quenched and aged beryllium
08 p1330 A69-20008

Thermal faceting of tungsten single crystal surfaces in oxygen, using vibrating-capacitor work function probe with low energy electron diffraction
08 p1330 A69-20137

Oxidation kinetics of niobium titanium alloy in air and oxygen at 1000 C, analyzing nitrogen and pressure effects
08 p1331 A69-20193

Oxidation kinetics of niobium titanium alloy in air and oxygen between 650 and 1000 C, analyzing activation energies and nitrogen effects
08 p1331 A69-20194

Phase identification and microstructural effects of gaseous nitrogen reaction with binary Nb-Ti alloys at 1000 C
08 p1331 A69-20195

Temperature dependence of polymethylmethacrylate deformation, yield and fracture in constant strain rate compressive and tensile tests
08 p1335 A69-20215

Temperature effect on phase stability and electrical length of braided coaxial cables, considering dielectric constant and mechanical length
08 p1283 A69-20225

Alkali metals electrical resistivity variation with temperature calculated in free electron approximation with Kreeb model for phonon spectrum
08 p1372 A69-20229

Spacecraft component heat sterilization, discussing heat effects on electrical connections, polymers and adhesives
08 p1284 A69-20267

Wall temperature influence on intensity of transverse flow of three dimensional laminar boundary layer resulting from transverse pressure gradient
08 p1251 A69-20274

Temperature dependence of single crystal elastic constants of nickel aluminide determined by ultrasonic wave propagation measurement
08 p1332 A69-20288

Synoptic meteorological predictions using statistical dynamic approach, considering probability distributions and nocturnal temperature decay
08 p1345 A69-20300

Ammonium perchlorate decomposition kinetics at high temperatures by measuring loss of weight in samples and gas evolution
08 p1375 A69-20339

Cobalt chromium high temperature oxidation and scale formation
[ECS PAPER 413] 08 p1332 A69-20363

Cobalt chromium alloys high temperature oxidation kinetics, discussing thermographic study of oxidation rate and oxygen pressure role
[ECS PAPER 413] 08 p1332 A69-20364

Thermally activated processes influence on dislocation interaction and on temperature dependence of flow stress in niobium single crystals
08 p1333 A69-20446

Hydrogen solubility in solid and liquid phases of nickel-molybdenum and nickel-tungsten alloys at high temperatures
08 p1333 A69-20448

Emission spectrum of laser employing electron-vibrational transitions in samarium doped calcium difluoride crystal, noting spectrum shift with increasing crystal temperature
08 p1326 A69-20544

Tensile and creep behavior of nickel at 600 C after oxidation at 1200 C, correlating results with structural differences caused by oxidation
08 p1333 A69-20556

Collection of papers on thermal problems in aerospace medicine covering intense heat, cutaneous vasomotor and sudomotor control, water immersion, etc
08 p1263 A69-20667

Temperature dependence of dissociative recombination and molecular ion formation in decaying He, Ne and Ar plasmas in discharge tube energized with capacitor bank
08 p1356 A69-20741

Recombination rate of electrons in high pressure helium-like plasma with gas temperature fixed at 300 K and electron temperature varied between 300-2000 K
08 p1356 A69-20742

Thermodynamics of nonsimple elastic materials with two temperatures, showing temperature and stress difference proportional to heat supply
08 p1422 A69-20847

Gas transport coefficients dependence on density and temperature, noting experimental results for Ne and molecular N and H
08 p1353 A69-21009

Catastrophic failures in logic circuit and system design, considering thermal effects, complexity, statistical methods and computer use
08 p1299 A69-21107

Second breakdown in semiconductors, studying thermal feedback connected with temperature time dependence of junction electrical properties
08 p1294 A69-21115

Second breakdown mechanisms in transistors, describing electrical and physical characteristics and effects of design and structural defects on resistance to initiation
08 p1294 A69-21120

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence
08 p1374 A69-21186

Temperature dependence of energy gap in gallium arsenide and gallium phosphide from absorption measurements
09 p1553 A69-21330

Structural and optical properties of vacuum deposited GaP films at below 240-850 C
09 p1554 A69-21332

Convective MHD channel flow in vertical channel subjected to temperature and pressure gradients, discussing wall conductance effects on flow rate and heat transfer
09 p1545 A69-21441

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects
09 p1555 A69-21470

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature
09 p1555 A69-21472

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes
09 p1555 A69-21475

Heat flux effect on laminar boundary layer separation in supersonic flow stressing free interaction zone
09 p1429 A69-21690

Nitrogen diffusion coefficients in TiN and alpha-Ti determined by metallographic and roentgenographic analyses, establishing linear equations for temperature dependence
09 p1523 A69-21736

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration
09 p1523 A69-21740

Temperature effect on work function minimum of cesiated tungsten single and polycrystal surfaces, using vibrating capacitor technique
09 p1558 A69-21809

Bismuth bolometer as sensor recording IR radiation for thermal radiation fluctuations in atmosphere caused by temperature inhomogeneities
09 p1490 A69-21868

Refractory compounds static strength temperature dependence at high temperatures measured in reference to melting temperature
09 p1523 A69-21873

Stress formulation of thermoelasticity in simply connected body, noting uniform temperature change influence on stress components
09 p1617 A69-22007

Silicon carbide filaments strength at high temperatures noting vapor deposition, mechanical properties and applications
09 p1524 A69-22072

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states
09 p1617 A69-22078

Temperature dependence of high melting point metals mechanical properties
09 p1525 A69-22138

Heat resistant alloys plastic deformation, studying stress/strain systems, strain divisibility, strain rate and temperature effects, etc
09 p1504 A69-22141

Thermodynamic analysis of engines and heat pump operating within negative absolute temperatures, noting work increase by throttling
09 p1623 A69-22212

Mass spectrometric determination of pyrolysis products generated from heated polymer samples
09 p1448 A69-22315

Thermal models for Jupiter and Saturn corresponding to completely convective structure, using De Maizus state equations
09 p1607 A69-22411

Thermal effects on modulation sensitivity and inherent AM percentage as functions of modulation frequency in IMPATT oscillators
09 p1468 A69-22515

Cathode material effects on temperature coefficients for glow discharge tubes, noting running voltage pressure characteristics
09 p1468 A69-22601

Intrinsic absorption temperature dependence in doped p-InSb, discussing forbidden transitions
09 p1559 A69-22648

Temperature effect on pulsed laser action on electron transitions in diatomic molecules for rotational relaxation, discussing excitation mechanisms
09 p1520 A69-22654

Pulsed plasma production when focusing Q switched laser on solid target surface, noting high temperature effects and optical diagnostics methods
09 p1520 A69-22656

Liquid laser gain measurement via luminescence intensity, noting optical pumping thermal effect
09 p1520 A69-22683

Ion pairing effects of cyclooctatetraene anion radical, studying electron spin resonance spectra temperature dependence
10 p1651 A69-22938

Oxidation effects on creep and fatigue properties of metals noting time and temperature roles
10 p1708 A69-22998

Negative creep in austenitic steel samples explained as possible redistribution of elements inside austenite grains at high temperatures
10 p1708 A69-22999

Primary explosives tested for effects of shock, friction, heat and electrical discharges
10 p1750 A69-23010

Aluminum alloy crack propagation and fracture patterns as function of temperature under high strain amplitude and low strain rate
10 p1709 A69-23071

High temperature effect on fatigue deformation and fracture of nickel base superalloy in single crystal and columnar grained forms
10 p1709 A69-23073

Probability characteristics of temperature and supply voltage dependent parameters of semiconductor equipment
10 p1661 A69-23112

High temperature acclimation, climates with heat dissipation problems and hibernation or torpor effects on metabolic depression in homeotherms
10 p1642 A69-23121

Learned behavior performance failure in hypothermia as temperature dependent phenomenon using rat, guinea pig, chinchilla, mouse, gerbil and hamster
10 p1643 A69-23124

Radiation resistance of animals in hibernation and hypothermia, noting temperature dependence of protective effect
10 p1643 A69-23126

Transient characteristics of negative resistance zinc alloy diodes, investigating temperature effects
10 p1662 A69-23157

Porous structures, using spherical tungsten powders, discussing metallurgy, sintering, temperature effects and performance characteristics in ion engines
10 p1710 A69-23166

N enhancement silicon MOST saturation current as function of temperature
10 p1743 A69-23175

Surface charge exchange in metal oxide silicon capacitors generated at low temperatures by surface state free carrier trapping
10 p1744 A69-23179

Venus atmosphere origin, discussing high temperature effects and chemical composition via space probe and terrestrial observations
10 p1775 A69-23183

- Nitrogen solubility in molten niobium and molybdenum at high temperatures in argon flow
10 p1710 A69-23213
- Neat alpha styryl azide transformation into 2-phenylazirine, 3,6-diphenylpyridazine and 2,5-diphenylpyrrole after one month at room temperature in brown glass bottle
10 p1651 A69-23307
- Psychological, physiological and biochemical responses to controlled diets, determining regional and total body sweat composition of men working in temperate environment
10 p1644 A69-23314
- Three layer vacuum deposited silicon monoxide films current voltage and conduction current density temperature dependence
10 p1745 A69-23324
- Composition and sintering temperature cooling effects on fracture properties of W-Ni-Fe alloys, using electron microscope fractography
10 p1711 A69-23333
- Temperature vs compactness relationship in NbC compacts having nonstoichiometric composition and approximately equal specific surface, determining self diffusion coefficients
10 p1711 A69-23337
- Creep of high purity Nb-Mo alloys in 800-1300 C range and at 1500-13000 lb/square inch stresses, giving activation energy for creep
10 p1711 A69-23375
- Surface temperature rise of solution treated austenitic steel measured during double repeated rotating bending fatigue tests at room and elevated temperatures
10 p1711 A69-23393
- Fatigue behavior of plastics classified noting temperature rises, crack initiation, etc
10 p1716 A69-23394
- Solid propellant motors nozzle design, analyzing structural and material problems, high temperature exhaust gases effects, thermal insulation, etc
10 p1716 A69-23403
- Excitation and ionization relaxation of cesium seeded argon gas computed for stepwise increase of electron temperature
10 p1732 A69-23444
- Velocity and temperature influence on discharge characteristics of K seeded argon plasma flow at 1 atm pressure
10 p1733 A69-23449
- Rare gas-alkali plasma electrical conductivity dependence on gas temperature and preionization to determine optimum operating conditions for MHD generator
10 p1733 A69-23451
- Pressure and temperature effects on electrical conductivity of dense plasma ejected from Laval nozzle
10 p1739 A69-23492
- Heat and humidity endurance limits in man
10 p1645 A69-23494
- Temperature effects on phosphorescence lifetimes and intensities of aromatic hydrocarbons in polymethyl methacrylate, estimating activation energy for thermally activated nonradiative decay mode
10 p1652 A69-23523
- IR radiation effects in cadmium sulfide crystals with green edge emission at low temperatures, discussing luminescence, photoconductivity and conductivity glow curves
10 p1746 A69-23565
- Very low temperature dependence of thin single crystal Al plates electrical resistance, noting Umklapp processes contribution
10 p1711 A69-23620
- Elastic-plastic deformations /strains/ amplitudes measured at high cycle temperatures in thermal fatigue tests
10 p1801 A69-23844
- Chromium-rhenium-boron ternary system using X ray diffraction and microstructure analysis, establishing phase equilibria at high temperatures
10 p1715 A69-24054
- Electron concentration and temperature dependence on gas temperature as factor determining He-Ne laser output at 6328 A
10 p1706 A69-24078
- Nebular abundances allowing for temperature variations in nebula along line of sight, correcting changes in electron temperature along path of observation
10 p1787 A69-24116
- Presprayed metal films influence on visibility and contact resistance of GaAs prior to fusing in Sn, In and lead contacts
10 p1748 A69-24214
- Temperature and strain rates effect on delayed yield and failure of plasticized epoxy resin
10 p1717 A69-24218
- Near boundary zones in VT15 Ti alloy not involved in beta phase decomposition during aging below 500 C attributed to vacancy concentration decrease
11 p1902 A69-24275
- Pacific atmospheric circulation and Pacific equatorial sea temperature winter anomalies, noting Hadley circulations, northeast westerlies, trade winds and Walker circulation
11 p1911 A69-24322
- Universe origin, discussing big bang theory, effects of expansion time and temperature on elementary particles, RF quanta, etc
11 p1953 A69-24352
- Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants
11 p1956 A69-24398
- Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
11 p1957 A69-24403
- Small microwave antenna calibration by method of two black bodies exposed to different temperatures, reducing influence of cloudiness and humidity
11 p1844 A69-24450
- Microsectioning technique applied to measurement of diffusion coefficients of Cr 51 in polycrystalline Nb at 1220-1766 K temperature range
11 p1903 A69-24577
- Book on strength and failure of viscoelastic materials covering linear and three dimensional polymers or polymer-based materials, flexibility and temperature effects
11 p1970 A69-24610
- Temperature effect on amplification factor of box type dynode system of photoelectron multipliers made of alloy AMGK, using single electron method
11 p1846 A69-24626
- Surveyor electronic engineering design for lunar environment, discussing vacuum and temperature effects
11 p1958 A69-24633
- Young modulus temperature dependence and order-disorder transformations in ternary nickel alloys
11 p1904 A69-24705
- Explosive reactions between hydrogen and oxygen flashed in presence of nitrogen dioxide, chlorine or bromine as sensitizers, considering thermal contribution
11 p1832 A69-24878
- Beryllium properties and processing including magnesiothermal reduction, powder purity, oxygen content, grain size and temperature effects on mechanical properties
11 p1904 A69-24897
- Annealing effects on cold rolled titanium sheets, noting changes in Young modulus and characteristics of recrystallized titanium
11 p1904 A69-24899
- Thermal expansion coefficients of Nb-Zr-Ti alloy and plexiglass at 10-300 K from dilatometric measurements
11 p1905 A69-24917
- Microcracking susceptibility studies of Inconel 718 weld heat affected zones, noting hot ductibility, weld circle patch and fillerless fusion welding tests
11 p1905 A69-24933
- Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects
11 p1981 A69-24943
- Residual thermal stresses and plastic strains at hole edges in perforated plates, considering heating and rapid cooling
11 p1982 A69-24947
- Hydrogen effect on temperature dependence of tensile strength and stress rupture strength of Ti alloys, considering annealing, quenching and aging
11 p1905 A69-24962
- Glass fiber reinforced plastics tensile strength at low and high temperatures
11 p1907 A69-25181
- Temperature and stress dependence of microstrain and microyielding in polycrystalline W for range of impurities and dislocations, considering transition to macrostrain
11 p1905 A69-25183
- Ignition dynamics of solid materials with differing kinetic and thermophysical parameters, emphasizing temperature growth during chemical reaction leading to ignition
11 p2000 A69-25188
- Thermal conductivity of polycrystalline beryllium oxide as function of temperature and pressure in argon or helium atmosphere, discussing heat transfer mechanism
11 p1906 A69-25225
- Ionization equilibrium for ions of solar abundant elements between C and Ni calculated as function of electron temperature
11 p1928 A69-25262
- Electrostatic probe measurements in gas warmer than probe, demonstrating applicability of continuum theory for highly negative probe
11 p1930 A69-25274
- Temperature effects on noise levels in field effect transistors, discussing Lorentz spectrum
11 p1853 A69-25391
- Enthalpy excess thermodynamic functions of binary gas mixtures based on stationary diffusion thermoeffect in tube
11 p2003 A69-25552
- Plasticity increase of molybdenum alloys during precipitation of second phase at high temperatures due to lattice defects redistribution and plastic deformation
11 p1906 A69-25685
- Thermal EMF in indium phosphide crystals as function of temperature, electron concentration and magnetic field strength, determining effective mass of electrons
11 p1939 A69-25690
- Boundary conditions for time dependent temperature variations of calorimeter operating in regular thermal regime
11 p2003 A69-25702
- Hydrogen viscosity temperature dependence at constant density below room temperature
11 p2003 A69-25704
- Statistical rules for seasonal forecasts based on temperature and precipitation deviations analysis in long term climatological records, considering sunspot cycle role
12 p2125 A69-25895
- Resonant vibrational energy transfer between specific mode of carbon dioxide and N molecules at high temperatures, monitoring IR emission
12 p2131 A69-25984
- Nimonic alloy single crystals strengthening during plastic deformation, analyzing jump phenomenon at high and low temperatures
12 p2112 A69-26038
- Ni-Ti alloy intergranular deformation at constant tension within wide temperature range
12 p2113 A69-26044
- Acoustic wave generation in neutral particle component of weakly ionized gas by variation of electron temperature with low power RF signal
12 p2134 A69-26096
- Inelastic interactions cross sections of slow electrons with adsorbed particles on W surface as function of temperature in surface bond vibrational region
12 p2132 A69-26114
- Neutron irradiation and temperature effects on ferrite and Permalloy memory cores hysteresis loops
12 p2142 A69-26259
- Tellurium doping effect on phonon diffusion in GaSb, discussing thermal conductivity at low temperatures
12 p2142 A69-26294
- Fatigue life of Al alloy thin laminated sheets, considering cyclic frequency and temperature effects
12 p2180 A69-26359
- Thermal effects in large mirrors, considering temperature gradients parallel to reflecting surface or to optical axis
12 p2056 A69-26408
- Dislocation mobility temperature dependence in n-type indium antimonide, noting role of covalent interatomic bonds
12 p2143 A69-26453
- Optical absorption cell with variable path length and temperature for measuring absorption coefficients of gases at low and high temperatures
12 p2093 A69-26482
- Weightlessness and higher g values effects on caloric and rotational nystagmus
12 p2020 A69-26551
- Incandescent cathode temperature effect on He-Ne laser output, ascertaining mixture parameters, cathode voltage and power dependence on discharge current
12 p2109 A69-26716
- Nonlinear structure undergoing arbitrary load history including temperature variations solved by computerized force and subordinated step procedure
12 p2185 A69-26823
- Time and temperature dependence of plastic properties of fiber reinforced phenolic heat shield materials
12 p2119 A69-26825

Steady state small signal input impedance of low power planar transistor as function of temperature and operation mode

12 p2042 A69-26878

Time delay in temperature controlled transistorized time delay circuit determined by transistor unsteady thermal processes

12 p2043 A69-26883

Temperature effect on tensile brittle fracture stress of polycrystalline tungsten

12 p2116 A69-27135

Resistance type bonded strain gages for seven adverse environments, discussing installations and transducers

12 p2099 A69-27165

Temperature effects on polarization degree, threshold current and delay of radiation from GaAs laser diodes with diffused Zn

13 p2227 A69-27328

Room temperature WC-Co compacts oxidation resistance in air noting increase with preliminary sintering temperature

13 p2275 A69-27345

Neutron irradiated Nb single crystals tensile tested over temperature range, discussing athermal radiation hardening

13 p2275 A69-27368

Temperature effects on mechanical properties and fracture behavior of lamellar Ni-nickel titanide intermetallic eutectic alloy showing dependence on intermetallic constituent

13 p2277 A69-27406

Low cycle fatigue crack initiation in Ti-6Al-4V at room and high temperatures and in aqueous salt environment

13 p2278 A69-27413

Niobium aluminide-niobium germanide alloys superconductivity and heat treatment influence on critical temperature

13 p2316 A69-27659

Cellular convection in horizontal gas layer analyzed for causes of vertical air circulation and effect of vertical temperature profile

13 p2291 A69-27725

Bolt materials selection criteria in design of high strength lightweight joints, showing fatigue curves and temperature effects

13 p2268 A69-27758

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides

13 p2317 A69-27875

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures

13 p2271 A69-27888

Temperature effects on photosensitivity spectra of cadmium telluride thin films

13 p2318 A69-27889

Supplementary absorption and Hall effect temperature dependence in solid solutions of gallium arsenic phosphide

13 p2318 A69-27894

Conduction band structure in GaSb noting temperature dependence

13 p2319 A69-27899

Lunar surface environmental factors including molecular gas behavior under weak gravity and low atmospheric density, radiation and temperature effects, meteorite bombardment, etc

13 p2352 A69-27904

Polymeric insulation materials, discussing intrinsic properties dependence on temperature and atmosphere, stressing effect on aging

13 p2285 A69-27985

Electrical properties of electron beam evaporated Ti, Zr and Hf films as function of substrate temperature, material and film thickness

13 p2321 A69-28010

Outgassing rates of multifoil insulation materials for sealed vacuum systems measured over temperature range as function of pumping time

13 p2299 A69-28016

W, Mo and heat treatment effects on phase composition and heat resistance of ferrite and austenitic steels

13 p2283 A69-28487

Temperature factor effect on transition from laminar to turbulent flow in boundary layer of plate

13 p2251 A69-28558

Magnetic properties of ferrites with garnet structure, discussing temperature effect on magnetic states of Gd, Li, Y and Lu sublattices

13 p2323 A69-28564

Materials surface thermal stress analysis by strain gauges, considering behavior during rapid temperature changes

13 p2264 A69-28599

Effective temperature values of ozone used to determine onset time and disturbance height in ionosphere

13 p2257 A69-28701

Temperature effects on propagation of HF internal and surface waves in bounded plasma, deriving dispersion equations

14 p2410 A69-28733

Compressed ammonium perchlorate combustion rate and pressure requirements established from initial temperature effects

14 p2508 A69-28914

Thermoclastic stress-strain state of infinite circular cylindrical shell with elasticity modulus temperature dependence expressed by exponential function

14 p2532 A69-28980

UV radiation decreased transmittance through quartz exposed to plasma at high temperature and pressure, showing dependence on heated surface layer absorption

14 p2490 A69-29159

Pulsed lasers with pure carbon dioxide and mixture with N and He, discussing inversion mechanism, peak emission power and gas temperature effects in different modes

14 p2458 A69-29162

Thermionic converter stability as function of cesium pressure, heat input, reservoir temperature, load voltage or resistance

14 p2402 A69-29236

Work function measurements of polycrystalline W, Re and Ni disks in high pressure cesium plasma for low probe temperature range

14 p2506 A69-29266

Temperature dependent aging mechanisms in deformed Mo alloys during annealing, using transmission electron microscope

14 p2463 A69-29312

Strain rate and temperature effects on sintered molybdenum sheets strength and elongation characteristics

14 p2464 A69-29322

Emission spectrum width of solid state lasers as function of temperature, investigating effects of active medium parameters, pumping and cavity

14 p2459 A69-29389

Low temperature thermal expansion coefficients and linear contraction of metal alloys from liquid hydrogen to room temperature tabulated as function of temperature

14 p2464 A69-29400

Short time creep rupture behavior of austenitic stainless steel at high temperature ranges, noting rupture times various stresses and data correlation [ASME PAPER 68-WA/MET-2]

14 p2464 A69-29439

Chemical reaction-rate theory for creep tests, analyzing extrapolation equations for time-to-rupture dependence on temperature and stress

14 p2464 A69-29442

Nb-Ta alloys oxidation kinetics at high temperature and structure and composition of oxide films and scale layers, discussing anomaly in oxidation rate temperature dependence

14 p2464 A69-29650

W shear moduli at high temperatures measured by forced torsional vibration in wide frequency ranges, discussing grain boundary effects

14 p2465 A69-29651

Temperature dependence of elastic constants of highly and weakly doped n- and p-type GaAs

14 p2508 A69-29655

Irregular data obtained by radiosondes in winter for charts of high isobaric levels, noting stratospheric temperature effects on radiosonde ascent height

14 p2473 A69-29731

Spectrometric characteristics of He, H and molecular H ion recording counters as function of temperature

14 p2452 A69-29811

Processing characteristics of wrought Co base alloys, discussing thermomechanical treatment effects, yield strength, ductility, etc

14 p2456 A69-29892

Validity range of nuclear quasi-equilibrium approximation for stellar silicon burning, discussing time rates of nuclear abundance changes and temperature effect

14 p2529 A69-29984

Elastic microwaves propagation attenuation along lithium niobate crystals trigonal axis at various temperatures

15 p2665 A69-30040

Majority carrier lifetime temperature dependence obtained from photoconductivity measurements of p-type GaAs crystals doped with Ge

15 p2666 A69-30050

Scientific satellite 1 solar cell panels power output dependence on temperature and spin calculated and compared with results for outdoor sunlight

15 p2552 A69-30050

Cold worked high purity Mo wire recovery after plastic deformation at room temperature, considering electrical resistivity decrease as function of annealing temperature

15 p2636 A69-30084

Strain aging of polycrystalline Nb containing interstitial impurities as function of temperature, discussing interstitials role in recovery substages

15 p2636 A69-30190

Device for fatigue testing turbine disk models in unsteady temperature fields with radial and axial nonuniformity produced by HF heating

15 p2583 A69-30201

Shock hardening in Ni at high pressure observed by electron microscopy showing dominating thermal effects on microstructure

15 p2637 A69-30222

W single crystals cleavage cracks by spark discharge showing effective surface energy dependence on crack initiation and propagation temperatures

15 p2637 A69-30226

Titanium alloys fatigue properties at various temperatures using notched and unnotched specimens, considering vibrational fatigue strength and notch sensitivity

15 p2637 A69-30227

Self lubricating bearings lifetime calculated as function of lubricant in pores and consumption rate, noting temperature effects

15 p2618 A69-30281

Plasma arc characteristic and radiation at high pressure and temperature showing strong electrical field strength and radiation increases with pressure

15 p2659 A69-30377

Organic and inorganic fabric reinforcements effects on thermal properties of composites noting thermal conductivity, diffusivity, specific heat constants and temperature ranges

15 p2642 A69-30466

Solid lubricant films friction and wear life determined under various conditions of contact, temperature, load and atmosphere [ASLE PREPRINT 69AM 6C-1]

15 p2619 A69-30471

Heat resistant Fe and Cu alloys creep index affected by temperature, testing time and specimen grain size

15 p2639 A69-30569

N precipitation kinetics in deformed Nb, finding constant in rate equation dependent on temperature and correlated to precipitates nature

15 p2639 A69-30585

Temperature effects on magnetomechanical damping in Fe, Ni and mumetal, noting behavior difference due to domain structures

15 p2639 A69-30586

Maximum strengthening due to second phase precipitation within operating temperatures maintainable to 20 hr during aging of Nb-Hf-O and Nb-Zr-O alloys

15 p2640 A69-30632

Theory of temperature dependent magnon energies in antiferromagnets based on spin wave operator expansion of Hamiltonian, taking into account dynamical interaction between waves

15 p2668 A69-30684

Dispersoids and temperature effect on coercive force of 19 Co base and 10 Fe plus 27 percent Co base

15 p2669 A69-30689

Statistical correlation of temperature and tail-wind data for London-New York route at 50 mb for SST operation

15 p2651 A69-30690

Gold diffusion and solubility in indium phosphide, analyzing temperature and vapor pressure effects

15 p2669 A69-30715

N type surface layer in p type sample noting effect on Hall constant and relationship to temperature

15 p2669 A69-30717

Temperature dependence of conductivity and Hall constant of GaAs single crystals with nickel impurity, noting diode structure and I-V curve shapes

15 p2669 A69-30720

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influences by appearance of thermal noise

15 p2691 A69-30748

High temperature effects on electron and X ray irradiated MOS transistors for space charge analysis and defects in silica films

15 p2625 A69-30828

Temperature dependence of intermolecular interaction averaged potentials with respect to vibrational states

15 p2655 A69-30982

Friction effects on friction couples made of two different nonferrous alloys, discussing temperature regime difference effects on microgeometry and structure

15 p2629 A69-31027

Electrical resistance and temperature coefficient dependence on phase composition of Ti, Zr and Nb carbides

15 p2641 A69-31047

Temperature and electron number density behind reflected shock in helium gas in T tube, noting Z pinch discharges

15 p2593 A69-31161

Fiberglass reinforced plastic tensile strength dependence on vibration time and temperature and vibrational effect on modulus of elasticity

15 p2643 A69-31203

Nonresonant absorption and dispersion of microwaves by gases, studying gaseous mixtures, relaxation parameters, anomalous dispersion and temperature effects

15 p2654 A69-31219

Refractory materials based on BN and silicon nitride, studying effect of sintering conditions and chemical composition on mechanical properties

15 p2643 A69-31244

Escherichia coli B/r survival in high vacuum at different temperatures irradiated with UV or X rays tested as colony forming ability

15 p2557 A69-31388

Solid lubricants on molybdenum disulfide base at various temperatures and low pressures, noting film mass losses and possible use with organic materials under high vacuum

16 p2793 A69-31561

Lattice component of heat conductivity in n-type cadmium arsenide at low temperatures by suppressing electron component of conductivity with strong transverse magnetic field

16 p2824 A69-31568

Electrical conductivity of cesium iodide single crystals with anion and cation impurities noting temperature dependence

16 p2824 A69-31573

Gallium phosphide Schottky barrier diodes, discussing construction and metals used, barrier height relationships to impurity concentration and temperature, rectifying characteristics and internal quantum efficiency

16 p2757 A69-31613

Acoustic velocities in polymethylmethacrylate measured as functions of frequency, temperature and pressure, comparing data obtained with equation of state high pressure determinations

16 p2825 A69-31695

Thermal stability of Hastelloy Alloy C-276 determined from time and temperature tests for corrosion and grain boundary precipitation

16 p2799 A69-31719

Inert gas diffusion of Xe 133 in aluminum and titanium at various temperature ranges, showing effects of recrystallization, plastic deformation and phase transformations

16 p2800 A69-31775

Aluminum alloys high temperature creep effects distinguished from effects of long period at high temperature, discussing tensile test data and deformation-time curves

16 p2800 A69-31781

Creep rate and temperature effect on creep resistance shown in direct correlation with Al-Mg alloys strength by long term high temperature tests

16 p2801 A69-31782

Slow forming forging and extrusion required for Ti alloys, discussing mechanical properties as function of beta transformation temperature

16 p2793 A69-31786

Natural vibration of isotropic plates in temperature field with nonuniform distribution over plate

16 p2871 A69-31891

Approximate expression for temperature dependent radiative heat flux in optically thin gas, considering reentry body hypersonic flight

16 p2877 A69-31892

Carbon dioxide dissociation relaxation times measured in shock tube at 1900-2400 K and 1.5-2.5 km/sec

16 p2766 A69-31910

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability

16 p2873 A69-32131

Initial temperature effects on flame propagation velocity in turbulent flow of homogeneous gasoline-air mixture under realistic conditions

16 p2837 A69-32138

Removal rate of reaction water from fuel cells by diffusion-condensation procedure as function of temperature and electrolyte concentration

16 p2736 A69-32200

Reaction rate constants of ion-molecule interchange reaction as function of temperature, flow velocity, activation energy and constant part of steric factor P

16 p2747 A69-32312

Polycrystalline BeO sound velocities determined as function of pressure and temperature using pulse superposition method

16 p2802 A69-32338

Noctilucent clouds seasonal frequency, considering meteor shower effects and temperature dependence role

16 p2781 A69-32453

Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range

16 p2827 A69-32482

Air refractivity variations across horizontal and vertical boundary planes between two air masses of slightly different temperatures

17 p3028 A69-32880

Al interconnections discontinuities at integrated circuit contact windows observed by scanning electron microscope, noting catastrophic failure and Si presence

17 p2936 A69-32893

Low temperature creep mechanisms, discussing thermal activation of dislocation slip in perfect crystals

17 p2985 A69-32909

Creep tests on polycrystalline Be and Be alloy at various temperatures and stresses

17 p2986 A69-32912

Temperature field, strains and stresses induced in thin circular disk by unsteady heat source, noting time effect and resonant vibrations

17 p3054 A69-33021

In-process annealing and warm working temperature effects on long time creep rupture properties of Mo alloys tested in vacuum furnace

17 p2987 A69-33076

Low cycle fatigue behavior prediction for 304 and 306 stainless steels based on temperature and strain rate ratio to tensile ductility

17 p2987 A69-33079

Flame front structure and combustion rates of gases as function of temperature dependence of thermal conductivity, diffusion coefficients, density and molecular weight

17 p3069 A69-33136

Temperature and pressure effects on flame propagation rates, burning time and combustion zone length in turbulent flows of homogeneous gas mixtures

17 p3069 A69-33140

Guarded disk type emissometer for hemispherical emittance measurements of sample materials in 88 to 420 K range based on steady state calorimetry

17 p2973 A69-33280

Thermal analysis of opacified fibrous insulation systems, discussing heat transmission, heat transfer and thermal conductivity relations to compression load and temperature

17 p3072 A69-33282

Temperature effects on fracture of various alloys, presenting strength and toughness values tested at cryogenic temperatures

17 p2990 A69-33567

Optical constants of Ta-W and Nb-Mo measured in IR and visible ranges as function of incandescent temperatures

17 p2990 A69-33574

Yttrium desorption from W wire by strong electric field, noting electron work function or temperature increase effects on desorption field

17 p3015 A69-33631

Flame propagation mechanism on plastic fuel in oxygen-nitrogen atmospheres with variable pressures and at different initial fuel temperatures, discussing safety and ignition problems

17 p3074 A69-33662

Heat treatment effect on stress corrosion cracking of ternary Al-Zn-Mg alloys noting aging strength, solution temperature, quenching rate and alloy content

17 p2990 A69-33676

Gravimetric and IR absorption spectra analysis for determining heat resistance and chemical changes in organosilicon resins during heating

17 p2992 A69-33744

X irradiation and temperature effects on flour beetle Tribolium confusum/ pupae, noting wing abnormalities and pupal stage duration

17 p2910 A69-33748

Facility for determining energy dissipation in materials under cyclic stresses or strains for wide range of temperatures

17 p2946 A69-33925

Facility for studying energy dissipation in refractory materials during fatigue tests in vacuum at various temperatures, describing principal components

17 p2947 A69-33926

Surface layer role in strengthening of iron determined from examining temperature dependence of internal friction during thermomechanical treatments

17 p2991 A69-33939

Refractive indices for various glasses obtained as function of wavelengths and temperature, using spectrometer as collimator

17 p3007 A69-34158

Creep rate-stress-temperature relations for powder metallurgy rhenium, discussing activation energy

17 p2991 A69-34186

High speed transient pressure measurement, emphasizing forcing function measurement

18 p3133 A69-34244

Carbon dioxide flowing gas laser pumped by thermally excited nitrogen, discussing power gain and absence of chemical and charged particle effects

18 p3151 A69-34264

Temperature and pressurization effects on tensile and compressive properties of polycrystalline arc-cast W

18 p3154 A69-34273

Gaseous diffusion coefficients during argon, krypton, oxygen and nitrogen diffusion into helium measured by gas chromatography

18 p3099 A69-34280

Temperature dependence of metal elastic properties including thermal strains effect on stress field, yield stress changes and elastic modulus variations

18 p3212 A69-34353

Ball bearing lubrication simulation by rolling disk apparatus, emphasizing surface slip and related thermal effects alterable by geometric expansion

[ASME PAPER 69-LUBS-16]

18 p3140 A69-34380

Shock wave propagation induced by nonuniform instantaneous internal heating of nonlinear elastic strain hardening solid material

[SAWE PAPER 69-APM-17]

18 p3214 A69-34393

Shock wave studies of gaseous NO thermal ionization in Kr as function of temperature, using time-of-flight mass spectrometer

18 p3099 A69-34464

Accelerated temperature tests, calculating temperature behavior of hazard rates and activation energy from failure data using computer simulation

18 p3117 A69-34509

Computer program and component part models for nonlinear DC circuit simulation at various temperatures

18 p3108 A69-34525

Carbide phase growth rate in Mo-TiC alloy with particle size distribution maintained over time- temperature spectrum, noting diffusion and interface controlled processes

18 p3155 A69-34632

Heat sensitive paints thermophysical characteristics determined by nonstationary heat conditions method

18 p3161 A69-34697

Thermoelectrical leg product specification /TELPs/ apparatus and data reduction technique for determining temperature dependent thermoelectric properties of material

18 p3093 A69-34783

Plastics thermal properties and industrial structural applications dependency on temperature

18 p3161 A69-34839

Ion and temperature effects on lower ionosphere refractive index for VLF radio wave propagation

18 p3102 A69-34971

Gas turbine areas calculation of through flow cross sections for temperature deformations and blades elongation

18 p3184 A69-34987

Thermal coefficient of optical glasses refractive index determined by interferometry, noting relation to glass chemical composition

18 p3172 A69-35013

Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon

18 p3156 A69-35020

Sublimation of various compressed naphthalene wind tunnel models analyzed in supersonic air flow, discussing effects of temperature and model configurations

18 p3231 A69-35121

High temperature air spectral absorption indices determined at different pressures and temperatures

18 p3231 A69-35122

Magnetic sublattices interactions in gadolinium ferrite garnet, estimating magnetization level temperature dependence

18 p3183 A69-35155

Temperature and pressure effect on cobalt base alloy cavitation in liquid sodium, using vibratory apparatus and loss rate contour diagram

18 p3157 A69-35184

Nb corner of Nb-Mo-Cr alloy phase diagram and oxidizability in air at high temperature

18 p3157 A69-35248

TiNi compound alloying with Al and Fe, considering effect on hot hardness at various temperatures

18 p3157 A69-35249

Secondary recrystallization in cold rolled molybdenum foil as function of temperature using electron microscopy and diffraction

18 p3157 A69-35253

Dislocation structure of pure polycrystalline nickel subjected to high temperature creep, using electron microscopy following cold working and room temperature annealing

18 p3157 A69-35254

Fiberglass-reinforced plastics longitudinal and transverse strain relations at various temperatures

18 p3163 A69-35366

Sigma phase and temperature effects on toughness of austenitic stainless steel weldments

18 p3150 A69-35429

Annealing temperature effect on Ni-Ti alloys internal friction, noting peak connected with solid solution grain boundaries

18 p3158 A69-35443

Preprogrammed deformation temperature influence on Ni creep strength, emphasizing smoothly changing loads effects

18 p3160 A69-35455

Recrystallization limit effects on coarse grain growth in aluminum alloys extruded sections, studying roles of additives, extruding temperature and heat treatment duration

18 p3160 A69-35472

Mechanical properties associated with 55-Nitinol memory effect, presenting stress-strain and electrical resistivity as function of temperature

19 p3340 A69-35523

Unfilled Pyrrone prepared from powder into molded parts for flexural tests at elevated temperatures observed for stability to electron irradiation in air

19 p3356 A69-35529

Polyperfluoroalkyleneimido(perfluoroalkylene) amide synthesized by reaction of perfluoroalkane dinitriles with ammonia or diamidine, giving elastomers of varying strength and elongation, noting thermal stability

19 p3264 A69-35535

Ablative materials thermal protection characteristics at low heating rates evaluated by convective heating tests, stressing polyurethane foam composite

19 p3357 A69-35536

Directionally solidified Co-Nb eutectic alloys mechanical properties and magnetic performance for elevated temperature space applications

19 p3341 A69-35542

Glass encased electronic components with conformal coatings, considering glass breakage at low temperature

19 p3281 A69-35547

Focused Gaussian laser beam expansion due to thermal changes in refractive index of air, noting focused spot area increase with pulse energy

19 p3330 A69-35601

Schottky barrier diodes for high temperature operation prepared on n type GaP single crystals, studying I-V and C-V characteristics

19 p3381 A69-35681

Solar cell characteristics at low temperatures, noting efficiency increase with decreasing temperature

19 p3251 A69-35691

Energy dissipation of solder-covered and solderless solar cells with TiAg contacts as function of storage time, temperature and humidity

19 p3253 A69-35706

Stress relaxation of heat-resistant steels as function of equal stress during different elevated temperatures, applying results to time residual stress prediction

19 p3342 A69-35778

Laminar flow of viscous compressible fluid with density dependent on temperature, calculating steady state Navier-Stokes equations using vector function

19 p3297 A69-35852

ZnS-CdS crystals luminescence during varied forbidden bandwidth, discussing two photon and ruby laser excitation and temperature dependence

19 p3331 A69-35866

Creep behavior of dispersion strengthened Nb base bcc alloy, studying temperature and stress effects on steady state creep rate

19 p3343 A69-35924

Ti-Al alloys yield and fracture characteristics as function of high exposure temperatures, studying causes of embrittlement

19 p3344 A69-35927

Power subsystem weight effects on temperature ratio of Rankine type cycle, discussing method for rapid estimation

19 p3254 A69-35957

Ar 39-Ar 40 method using neutron activation and inert gas mass spectrometry to investigate meteoritic thermal histories

19 p3412 A69-36105

Thermal rare gas release from mineral separates of Mocs meteorite, using method giving activation energies as function of temperature

19 p3419 A69-36141

Dynamic recrystallization in Ni and Ni-Fe alloys during torsional high temperature deformation

19 p3344 A69-36147

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys

19 p3344 A69-36151

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties, emphasizing effect of primary structure

19 p3328 A69-36152

F center formation and X ray and photostimulated F-band luminescence in europium ion-activated potassium halides as function of temperature and X ray dosage

19 p3383 A69-36164

Molecular N rotational temperature effect on rare gases scattering cross section

19 p3377 A69-36184

Tempering time and temperature effect on microstructure, superconductivity, tensile strength and electrical conductivity of recrystallized Nb-Ti alloy

19 p3345 A69-36302

Heat treatment effect on superconducting properties of deformed Nb-Ta alloys, noting critical current density

19 p3345 A69-36303

Lunar interior chemical heterogeneity determined from model taking into account pressure, temperature and composition effects

19 p3425 A69-36421

Transient recombination lifetimes in n-type float zone Si from 4.2 K to room temperature, obtaining electrical and photoconductivity values

19 p3383 A69-36447

Exciton line broadening in II-VI compound semiconductors, discussing thermal broadening of n equals one exciton associated with LO phonon-induced scattering

19 p3386 A69-36524

Injection lasers threshold characteristics, studying temperature and doping level effects on current density and radiation energy

19 p3337 A69-36527

Temperature effects on threshold current density, emission wavelength and polarization of PbSe diode lasers

19 p3337 A69-36533

Power, efficiency and temperature dependence of emission spectra and threshold current density in electron beam pumped GaAs laser, noting doping concentration

19 p3338 A69-36538

Voltage and temperature dependence of zero-bias anomaly in GaAs p-n junction at 0.40-60 K, investigating voltage dependence of differential resistance

19 p3388 A69-36542

Anomalous phenomenon in resistance and magnetoresistance of cleaved InAs surface, plotting temperature and magnetic field variation effects, proposing explanation of anomaly

19 p3388 A69-36543

Temperature dependence of g-value in spin resonance in partially degenerate region in pure n-type InSb and InAs

19 p3389 A69-36549

Transport mechanism in amorphous Ge film deposited on glass substrates studied by measuring piezoresistance as function of temperature during pure nitrogen immersion

19 p3391 A69-36559

Cadmium sulfide-selenide single crystals reflection coefficient polarimetric measurement, observing reflection peaks relationship to absorption spectral temperature dependence

19 p3391 A69-36607

Undoped n-type gallium arsenide single crystals edge emission spectral band shape dependence on crystal type and ambient temperature

19 p3392 A69-36610

Thermal effects on viscoelastic structure response to applied loads, using equations for thermomechanics, linear and nonlinear thermoviscoelasticity and nonisothermal creep theorem

19 p3440 A69-36657

Vanadium thermistor fabrication influence on resistance jump at phase change temperature of vanadium dioxide, reproducing parameters by heat treating doped vanadium pentoxide

19 p3256 A69-36718

Titanium alloys wear and fatigue resistance as functions of time and temperature of nitriding by purified nitrogen

19 p3347 A69-36743

Body relations in continuum mechanics of solids, examining temperature influence varying in time and space

19 p3444 A69-36805

Weak shock wave structure in temperature relaxation media determined using theory of sound absorption in fluids

19 p3301 A69-36842

Quench rate effect on martensite start temperature and fine structure of Fe-C and Fe-C-Ni steel, using transmission electron microscopy

20 p3557 A69-36956

Nb-Ti-C alloys electrical resistivity and thermal EMF noting nearly linear variations with temperature

20 p3558 A69-36976

Spectral emissivity measurement of ablating phenolic graphite heated by subsonic air stream to high temperature to simulate reentry condition

20 p3565 A69-37187

Soviet monograph on metal fatigue in aircraft structures, discussing effects of temperature, loading, residual stresses, surface finish and contact corrosion

20 p3622 A69-37231

Residual tensile stress distribution during plasma spraying determined as function of temperature field in blank

20 p3548 A69-37328

Electrocaloric effect from 78-130 K on crystalline potassium dihydrogen phosphate, showing quadratic dependence on applied field /and polarization/ in paraelectric phase

20 p3583 A69-37343

He-Ne laser temperature condition optimization based on calculation and experiment

20 p3553 A69-37356

Temperature effect on grain size, crystal orientation, microhardness and heat resistance of diffusion Si coatings on Mo

20 p3560 A69-37361

Diffusion processes, composition and structure of vapor deposited Ni coatings on Nb substrate, plotting intermetallic compounds growth against temperature

20 p3560 A69-37366

Silicon carbide compact coatings deposition on graphite by silicon tetrachloride, H and benzene gaseous mixture, relating layer thickness to temperature and process duration

20 p3566 A69-37368

Solar corona Fe XII emission spectral lines relative intensity analyzed as function of temperature electron density

20 p3603 A69-37548

Temperature effect on electron concentration steady distribution in F 2 layer

20 p3525 A69-37657

Transient thermal stresses in heat treated elastic-perfectly plastic disks with temperature dependent yield stress, considering stress distribution sequence and residual stresses

20 p3629 A69-37974

Desinent cavitation on hemispherical nosed bodies in water at various temperatures and velocities, considering isothermal case for surface nuclei
[ASME PAPER 69-FE-1] 20 p3516 A69-37986

Hall coefficient and conductivity measured as function of temperature for liquid Au, Cu and Ag tellurides and liquid alloy systems Bi-Te and Ti-Te
20 p3584 A69-38024

Hugoniot equation of state of shock loaded W determined at room temperature and 950 C
20 p3564 A69-38127

Elements nucleosynthesis during thermonuclear burning of carbon at series of temperatures and for several initial compositions
20 p3612 A69-38163

Nitrogen diffusion coefficients in TiN and alpha-Ti determined by metallographic and roentgenographic analyses, establishing linear equations for temperature dependence
20 p3564 A69-38214

Carbides and silicides temperature coefficient of electrical resistivity and Hall constant plotted as function of metal carbides solid solutions concentration
20 p3585 A69-38216

Temperature dependence of stimulated light power from GaAs junction lasers operated at constant bias current above threshold
21 p3734 A69-38437

Fe crystals dislocations dynamic behavior during plastic flow development, describing stress and temperature effects on dislocations propagation and interactions
21 p3833 A69-38569

Structural changes during annealing of W and Mo single crystals deformed by rolling, using X ray diffraction topography methods with two crystal spectrometer
21 p3742 A69-38583

Automated rebound resilience apparatus for polymer dynamic mechanical properties studies over wide temperature range, using photoelectric device
21 p3689 A69-38593

Metal deformation dynamics at elevated temperatures, discussing closed loop electrohydraulic testing machine for stress relaxation and strain rate sensitivity
21 p3689 A69-38595

Heat resistance and strength properties of porous Ni-base cermet materials with mica additions under high temperature oxidation
21 p3751 A69-38615

Alpha Ti thermally activated tensile deformation, studying flow stress dependence on strain, temperature and strain rate
[ASM PAPER W9-4.2] 21 p3729 A69-38659

Equilibrium absorption and desorption rates of carbon dioxide-argon mixtures from silica gel measured as function of temperature using gas dynamics method
21 p3848 A69-38707

Thermal effects of resonant coupling hydromagnetic oscillations in inhomogeneous finite-beta plasmas, obtaining equations for coupling modes between Alfvén and magnetosonic waves
21 p3776 A69-38710

Age hardening response of Mg-Th-Zr alloy at 60-450 C, discussing peak strengthening, superlattice formation, precipitation processes, etc
21 p3743 A69-38735

Flow stress temperature dependence of Ni-Cr-Al alloys consisting of gamma prime dispersion in Ni base solid solution
21 p3744 A69-38738

Thermal energy effects on life processes, discussing living cell metabolism, biochemical reactions, enzyme action and protein catalytic functions, etc
21 p3652 A69-38782

Chromatographic analysis of products formed during induction period of 2-methylbutane gaseous oxidation in flow system at low temperatures and long residence times
21 p3669 A69-38798

Diurnal variations of cosmic ray neutrons corrected for barometric and temperature effects by harmonic analysis
21 p3791 A69-38840

Temperature influence of homogeneous kerosene-air mixture on flame stabilization by mechanical and gas dynamic baffle systems
21 p3850 A69-38859

Temperature response of semiconductor thermistors as temperature sensing element, determining time constant from dimensions and experimental data
21 p3723 A69-38888

Phase softening transformations heat resisting alloys during cyclic heating, using X ray and electron microscope analyses
21 p3746 A69-38957

Phase plasticity in Ti-O alloy as function of temperature in alpha Ti and TiO, noting role of increased oxygen diffusion mobility
21 p3746 A69-38959

Breakdown mechanism in GaAs, Si and CdSe semiconductors under intense light pulses ascribed to thermal impact
21 p3737 A69-39042

S doped GaSb single crystals prepared by Crochalski method studied for temperature dependence of resistivity and Hall coefficient
21 p3781 A69-39048

Se activation energy dependence on crystals composition and Se concentration, based on Hall coefficient temperature dependence in gallium arsenic phosphides
21 p3782 A69-39141

Active medium temperature effect on semiconductor laser emission spectra composition, discussing amplification coefficient frequency dependence at various temperatures
21 p3738 A69-39146

Ti-V martensite decay during heating, noting temperature dependence of elastic moduli and electrical conductivity
21 p3746 A69-39160

Hard space suit temperature history during lunar operational task simulation
21 p3666 A69-39182

Design features comparison and operation principles of gas strain gauges in application to structures, emphasizing independence of temperature variations in pneumatic circuits
21 p3725 A69-39324

Superconducting cavity X band oscillator designed for study of stability and spectral purity dependence on temperature
21 p3683 A69-39453

Temperature, applied stress and pressurization effects on materials corrosion by liquid F and F containing oxidizers
21 p3748 A69-39485

Chemical and thermal behavior of materials corrosion in propellant exhaust gases with analysis of reactions involving hydrogen, nitrogen, water, carbon dioxide, etc
21 p3784 A69-39489

Dilute solution of He 3 in He 4 near absolute zero measured for viscosity, showing temperature effect
21 p3772 A69-39582

Arbitrary form temperature rate wave growth and decay, determining differential equation governing wave amplitude
21 p3853 A69-39671

Thermal dissociation of chlorine trifluoride behind incident shock waves as function of temperature using UV absorption spectroscopy
21 p3670 A69-39739

Al discontinuous deformation noting role of intergranular boundary surface at low temperatures
21 p3750 A69-39789

Time-temperature method modified for combining stress relaxation data with stress or strain into single correlation curve, analyzing isothermal relaxation data
21 p3846 A69-39812

Free convection of capillary fluid at vertical plate, allowing for temperature dependence of viscosity coefficient
21 p3854 A69-39843

Temperature-vorticity analogy for viscous two dimensional fluid flow extended to compressible flows, noting enthalpy and shear stress analogy
22 p3929 A69-39892

High E modulus, structure, strength and temperature characteristics of reinforcement fibers, considering B, silicon carbide, C and Be
22 p3951 A69-39907

Short period creep and relaxation in various heat resistant alloys under heat treatments and loads, determining temperature dependence of cyclic thermal instability
22 p3969 A69-40071

Multicomponent Nb alloy creep and rupture strength under loads after heat treatment, determining creep rates dependence on temperature
22 p3969 A69-40073

Transient temperature response of cylindrical composite energy storage devices with thermal conductivity, density and specific heat independent of temperature
22 p3868 A69-40132

Bcc metals strengthening and alloy softening mechanisms, studying temperature and additives effects
22 p3970 A69-40166

Seasonal effects on energy expenditure during rest and exercise at controlled ambient temperatures, noting effects on heart rate
22 p3890 A69-40211

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
[AIAA PAPER 69-1033] 22 p3924 A69-40401

Accelerated test parameters estimated maximum intensity, studying temperature effects on test results
[AIAA PAPER 69-1036] 22 p3925 A69-40403

Pressure and temperature effects on reversal transitions of stishovite, noting meteoritic impact formation at Meteor Crater, Arizona
22 p4021 A69-40412

Differential capacitance transducer measuring small displacements in heated transformer oil, air, castor oil or glycerin
22 p3946 A69-40439

Spacecraft booms thermally induced vibration and flutter, considering damping and solar exposure effects
22 p4043 A69-40545

Thermal buckling of skew plates clamped along all edges under radiant heating, measuring various characteristics, solving differential equations by difference method
22 p4044 A69-40599

Vapor pressure measurements on liquid fluorine from triple to critical point at one degree K intervals
[NAS-NRC PAPER H-2] 22 p3998 A69-40624

Engineering alloys electrical resistivities measurement at various temperatures, noting temperature and heat treatment effects
[NAS-NRC PAPER D-5] 22 p3970 A69-40633

Ionization formula linking nitrogen ion charge density ratio to plasma temperature
22 p3990 A69-40714

Pure quadrupole resonance spectrum of iodine-127 in solid stannic iodide measured in specific temperature range at atmospheric pressure
22 p3986 A69-40726

Wear resistant Ti carbide based cermets with alloy steel binder, noting electrical and heat conductivity dependence on composition and temperature
22 p3971 A69-40919

Heat transfer coefficient of turbulent air flow found independent of temperature head during cooling
22 p4051 A69-41026

Strain induced creep equation for hardened materials for fixed temperature and stresses range, noting application to steel and Al alloys
22 p3971 A69-41033

Fluorescence properties of nucleotides, polynucleotides and phosphorylated derivatives as function of temperature, pH and ionic strength
22 p3898 A69-41078

SST stratospheric environment problems, discussing temperature effects on fuel consumption and convective turbulence effect on flight safety and efficiency
22 p3867 A69-41141

Dielectric constant and IR spectra of Ba titanate single crystals doped with hydroxyl, showing dependence on temperature and crystal thickness
22 p3995 A69-41157

Waveguide-resonance investigation of temperature dependence of dielectric constant and paraelectric dispersion of Ba and Sr titanate single crystals at millimeter wavelengths
22 p3995 A69-41158

Temperature dependence of heat capacity of Ba and Sr titanate solid solutions in ferroelectric phase transition region
22 p3996 A69-41162

Partial differential equation for creep process in plane stressed metals, interrelating strain, rate, stress tensors, temperature and time
22 p4048 A69-41268

Oxygen supersaturation in unstirred blood under temperature effects, noting tension loss during stirring
23 p4077 A69-41296

Thermal diffusivity measurement by nonsteady state methods, discussing time and temperature variables in heat flow differential equation
23 p4237 A69-41326

Thermal conductivity and specific heat of groups of liquid substances as functions of temperature, giving curves, tables and conversion factors
23 p4238 A69-41336

Gaseous absorption cell variable attenuator for carbon dioxide laser radiation at specific wavelength, using forced convection to eliminate thermal defocusing effects
23 p4172 A69-41396

Human sweat glands reflex responses to diverse skin cooling rates in hot room, discussing bath temperature step decrease effect on lower limb

23 p4082 A69-41446

Cerebrospinal fluid /CSF/ formation in male monkeys as function of fluid pressure at third ventricle level following temperature stress and feeding

23 p4084 A69-41469

Creep strength as function of oxygen pressure for Ni at 510 and 600 C, dropping creep rupture life to plateau of nearly constant life

23 p4176 A69-41504

Inelastic collision cross sections for low energy interactions among electrons, ions, atoms and molecules determined as function of temperature, using approximate methods

23 p4194 A69-41520

Mars atmosphere response to surface temperature changes by radiative and convective heating, noting strong solar control of mean wind distribution

23 p4212 A69-41614

Photoionization rates temperature dependence in upper atmosphere for O atoms and molecules and N molecules from computer calculations, allowing for earth sphericity

23 p4157 A69-41857

Supercritical elastic states in convex shells produced by load in presence of thermal flux, noting no flux effect on states

23 p4228 A69-41970

Temperature influence on mechanical properties and creep curves of fiberglass reinforced textolites compared with data from elasticity theory

23 p4179 A69-41993

Mechanical properties of fiberglass reinforced textolite at normal temperature, noting applicability of elasticity formulas

23 p4179 A69-41994

Temperature dependence of action potential, isometric tension development and relaxation rate of mammalian myocardium at low temperature, considering Ca ions role

23 p4092 A69-42060

Temperature dependence of afferent and efferent spontaneous activity of spinal cord, using filament recordings from ventral and dorsal roots in anesthetized cats

23 p4093 A69-42066

Spinal cord temperature effect on stretch responses of muscle spindle endings of triceps surae, anterior tibialis and extensor digitorum longus in anesthetized cats

23 p4093 A69-42067

Analog computer used to correct body plethysmographic chamber signal distortion due to inspired/expired air temperature and humidity differences

23 p4111 A69-42081

Spinal cord temperature influence on stretch response of tonic and phasic alpha-motoneurons by filament recordings from ventral roots in anesthetized cats

23 p4098 A69-42099

Cold working and aging effects on mechanical properties of TiAl-V including creep and temperature effects

[DGLR-69-002] 23 p4177 A69-42163

Atomic spectrophotometry to monitor O atom formation rate behind shock waves in oxygen-argon mixtures, noting dissociation over 2850-5550 K temperature range

23 p4194 A69-42209

Nb single crystals oxidation in dry oxygen at high pressure and temperature indicating suboxide platelets existence as function of temperature

23 p4177 A69-42357

Single crystal Ta and Ta base bcc solid solution strengthening and weakening as function of temperature and strain rate

23 p4178 A69-42358

Deflections of heated circular plates with or without concentric circular hole and with different boundary conditions and temperature distributions

23 p4234 A69-42412

Praseodymium germanides resistivity and thermal EMF temperature dependence determined, discussing Hall effect, thermal expansion coefficient, melting point microhardness, etc

23 p4199 A69-42467

Isometric contraction tension after sudden isotonic to isometric contraction mode change in cat papillary muscle, discussing temperature effects, tension development changes, etc

24 p4258 A69-42631

Electron irradiation-temperature dependence of introduction rate and room temperature annealing of carrier-removal defects in Li-doped Si

24 p4360 A69-42647

Hybrid display for data visual display using electroluminescent and thermochromic technologies for wide range of ambient illumination

24 p4313 A69-42899

Ni-Nb alloys precipitates tetragonal structure as function of time and temperature using electron and X ray diffraction

24 p4331 A69-42903

Model of moon accumulated at low temperatures, discussing lunar surface layer characteristics

24 p4383 A69-42936

Matrix method for analyzing elastic structures linear transient response to time dependent loads and temperature change

24 p4399 A69-42988

InTe phase formation in thin film composed of two InTe phases, showing dependence on annealing in high vacuum and substrate temperature

24 p4361 A69-42994

Serrated flow characteristics in gold-indium solid solutions at various strain rates and temperatures

24 p4361 A69-43028

High temperature anelastic effect in Mo single crystals ascribed to internal friction peak due to electronic interactions between dislocations and C interstitials

24 p4332 A69-43031

Creep buckling time of simply supported column under nonuniform temperature distribution over cross sections

24 p4400 A69-43053

Turbine blade edge cooling efficiency, investigating Reynolds number and gas temperature to cooling air ratio influence

24 p4364 A69-43082

High temperature single crystal X ray studies of natural Fe-rich orthopyroxene, detecting high-low clinopyroxene inversions

24 p4311 A69-43218

Stress analysis of incompressible solid propellant rocket charges by point matching technique, considering differential thermal shrinkage and axial acceleration cases

24 p4402 A69-43263

Temperature dependence of equilibrium solid solubility of C in Au, Cu and Ag foils with respect to graphite

24 p4334 A69-43413

Real shear modulus and mechanical damping characteristics of cured adhesives measured for temperature effect, using torsion pendulum apparatus

24 p4338 A69-43460

Stagnation temperature determined in transition and free molecule region of rarefied gas flows from critical mass flow dependence on temperature and stagnation pressure

24 p4408 A69-43492

Charring ablator char zone nonequilibrium flow and chemical reaction kinetics as function of temperature, using thermal environment simulator

24 p4409 A69-43512

Numerical program solving partial differential equations parabolic system for internal turbulent gas flow extended to flows undergoing circular tube laminarization by heating

[ASME PAPER 69-HT-52] 24 p4409 A69-43520

Low pressure arc discharge motion between concentric electrodes in transverse magnetic field, noting Lorentz, stationary and retrograde modes due to temperature nonequilibrium

[AIAA PAPER 68-708] 24 p4359 A69-43644

Mechanism for pink afterglow accompanying microwave discharge in pure nitrogen, emphasizing gas kinetic temperature role

24 p4353 A69-43749

Lunar radio emission constant component in presence of heat flow from interior, using stratified model of surface structure with two variants

24 p4390 A69-43788

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio

24 p4391 A69-43793

TEMPERATURE GRADIENTS

Operational and integral heat balance method to obtain exact and approximate solution for monotonic heating of two layer unbounded plate

01 p0174 A69-10097

Numerical analysis of temperature variation of spherical spinning satellite with and without radiatively coupled inner shell containing heat source

01 p0162 A69-10761

Cryogenic plants for space simulation chambers, examining processes for cooling shroud below 100 K at given temperature differences

01 p0057 A69-11154

Alkali metal vapors thermal conductivity determination by temperature difference dilatometric measurement

02 p0247 A69-115799

Correlation between CAT and thermal gradient increase at standard isobaric levels found to be potential forecasting tool

02 p0275 A69-11818

Rms approximation validity limits for satellite temperature variances by deriving equations for thin insulated plate in space

02 p0352 A69-12211

Diffusion effect on particle buildup in deionizing steady plasma flux linked to plasma concentration in presence of electron temperature gradients

02 p0291 A69-12483

Plane Couette flow stability in heated nonlinear viscous fluid flowing between horizontal plates heated to different temperatures

02 p0235 A69-12828

Noninstantaneous, nonlocal nonlinear responses of momentum and energy flows to thermodynamic forces in single component simple fluid with memory

03 p0413 A69-12921

Temperature drop in combustion chamber of open cycle MHD power plant due to added potassium carbonate as function of various parameters

03 p0369 A69-14162

Earth surface temperature change quantitative determination due to Milankovitch insolation variations

03 p0426 A69-14232

Drifting temperature fluctuations in semiconductors in presence of strong electric field

04 p0643 A69-15256

Thermal transpiration for performance prediction and development of gas pump

[ASME PAPER 68-WA/ENER-4] 05 p0706 A69-16162

Laminar natural convection in enclosed rectangular cavity, discussing temperature gradient effects

06 p1033 A69-17556

Superconducting flux-flow resistivity minimum in Pb-Tl alloy, discussing thermal dissipation associated with temperature gradients across moving fluxoid

07 p1198 A69-18642

Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient having layer thickness greater than penetration depth of heat waves

07 p1241 A69-18696

Thermal disturbance radiative decay time in carbon dioxide at low pressures and for nonzero vibrational relaxation times

07 p1215 A69-18843

Annual temperature variation in lower tropical stratosphere, noting effect of equatorial upward motion

07 p1126 A69-19043

Nonhomogeneity effect on transverse vibrational frequency of uniform beams

08 p1413 A69-20413

Skin temperature and cutaneous pain during warm water immersion, refuting subcutaneous thermal gradient hypothesis for stimulation of heat pain

08 p1267 A69-20683

Monograph on heat transfer coefficients of polystyrene foams noting contribution of gas conduction, convection and radiation to total heat transfer

08 p1421 A69-20716

Linear perturbation theory to predict instability threshold conditions caused by electric field in poorly conducting liquid subject to vertical temperature gradient

08 p1352 A69-20790

Electroconvective instability produced by uniform electric field in poorly conducting fluid under stabilizing vertical temperature gradient, noting heat flow increase

08 p1352 A69-20791

Laser rubies emission characteristics operating at different temperatures in common resonator, studying kinetics for pumping powers

08 p1327 A69-21076

Zero sensitivity integrated RC filter circuits design, exploiting capacitors and resistors property of having same temperature coefficient

08 p1300 A69-21174

Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution

08 p1374 A69-21187

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

09 p1555 A69-21473

Temperature profiles variability for data obtained by rocketsonde thermistors launched with small time and spatial separation

09 p1494 A69-21644

Temperature gradient in semiconvective region, examining molecular weight distribution in mixing due to overstability

09 p1596 A69-22057

General relativistic models of massive hot nonrotating stars with adiabatic temperature gradients consisting of ideal gas and radiation mixture

09 p1605 A69-22416

Excess velocity and temperature decay laws in axisymmetric jet in transverse flow obtained via jet momentum and heat conservation equations

10 p1679 A69-23568

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model

10 p1722 A69-23973

Monograph on internal structure of sun corona covering variations in intensity and width of coronal lines, inhomogeneity, quasi-homogeneous and anisothermic coronas, etc

11 p1961 A69-25103

Nondestructive thermal tests using liquid crystals thermal sensitivity for measurement of temperature changes and visualization of temperature gradients

11 p1892 A69-25293

Temperature variations at porous wall surface as function of transpiration coolant flow rate

11 p2002 A69-25334

Temperature variation effects on heat transfer in laminar tube flow, taking into account constant wall temperature and heat flow density

12 p2189 A69-25762

Temperature variation and heat transfer in fins and relations between heat-flux-density and temperature difference

12 p2190 A69-25763

Linearized steady state equations of motion solved for boundary conditions of fluid lying between horizontal planes with temperature varying horizontally

12 p2066 A69-26134

Thermal stresses induced in plate plane by temperature gradient varying in space and time calculated using Mach-Zehnder interferometer, determining stress intensity factors

12 p2089 A69-26189

Thermal effects in large mirrors, considering temperature gradients parallel to reflecting surface or to optical axis

12 p2056 A69-26408

Limiting pressure for deflagration related to initial solid temperature of single crystals and pressed pellets of ammonium perchlorate

13 p2324 A69-27364

Cellular convection suppression by parallel vertical thermally conducting walls inserted into bottom-heated fluid, analyzing effect on critical Rayleigh number

13 p2374 A69-27782

Vortices interaction effect on vertical turbulent heat flow in atmosphere boundary layer, determining dependence of vortex mean vertical temperature gradient

13 p2293 A69-27841

Simple fluids viscosity dependence on density analyzed by molecular theory, exemplifying with liquid argon

13 p2299 A69-28036

Thermionic converter cathode and anode temperatures difference during start-up heating and under normal operational conditions

14 p2400 A69-29226

Low voltage arc in thermionic cesium vapor diode with lengthy electrodes and temperature variations along emitter, discussing plasma and current density distributions

14 p2402 A69-29244

Temperature disturbance amplification in laminar natural convection boundary layer formed on vertical flat surface measured with hot-wire anemometers

14 p2436 A69-29575

Stratospheric turbulence producing bumpiness up to 18 km developing at levels characterized by abrupt changes in vertical temperature gradients

14 p2474 A69-29737

Measurement system for recording of small localized temperature changes in brain

15 p2606 A69-30152

Creep rates measurement errors at low stresses in intermediate temperature range, examining log creep rate vs log stress plot in Cr-Mo steel

15 p2639 A69-30599

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

15 p2669 A69-30718

Operating conditions influence on thermal stability of DC plasmatron arc to obtain high temperature source

15 p2663 A69-30994

Atmospheric temperature and vertical gradient in E region based on measured instantaneous wind profiles

15 p2603 A69-31399

Temperature gradients effect on ion flute mode in low beta plasma having density gradients in x direction, obtaining instability condition

16 p2819 A69-31689

Bubble boiling onset in forced fluid flow, deriving equations for calculating minimum temperature difference between wall and fluid, discussing applicability range

16 p2878 A69-31954

Nonlinear generation of sum and difference frequency components in magnetoplasma current density due to alternating electric fields, electron density and temperature gradients

16 p2821 A69-32036

Virtual temperature change with respect to height of saturated air rising during water vapor condensation, discussing actual temperature and precipitation factor

16 p2808 A69-32454

Electromigration role in material accumulation and depletion forming regions in Au film conductors, discussing regions origin from and correlation with thermal gradients along conductor

17 p2936 A69-32896

Temperature jumps at gas-solid interface in shock tube calculated by one dimensional approximation of thermal boundary layer behind reflected shock wave

17 p2949 A69-33023

Lower solar corona composition changes due to pressure and thermal gradients calculated with multicomponent diffusion equations

17 p3030 A69-33059

Heat transfer from cylindrical copper surface to liquid helium at 4 degrees K, discussing temperature fluctuations in nucleate boiling region

17 p3074 A69-33780

Temperature fluctuations in solar photosphere, noting transition from convective to radiative energy transport

17 p3040 A69-33810

F1 layer observation at 80-87 degree solar zenith angles explained by additional ionization maximum development in presence of temperature gradients

17 p2967 A69-33985

Buoyant plumes and thermals defined as vertical motions produced under gravity by density or temperature contrast between incompressible source fluid and environment

18 p3122 A69-34917

Channel heat transfer determination based on thermal conductivity coefficients as functions of temperature gradients in channel wall materials

18 p3230 A69-34988

Silicon and boron carbides wettability with liquid metals during contact reactions at various temperatures, discussing wetting mechanism

18 p3156 A69-35153

Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution

18 p3183 A69-35156

Long term creep rupture data based on short term tests in form of Larson-Miller time-temperature curves

18 p3150 A69-35422

Body relations in continuum mechanics of solids, examining temperature influence varying in time and space

19 p3444 A69-36805

Structure, composition and temperature of Venus atmosphere from spacecraft measurements and ground based observations

20 p3614 A69-38256

Temperature gradient effect on plasma stability in maximum J configuration

21 p3776 A69-38711

Phase softening transformations heat resisting alloys during cyclic heating, using X ray and electron microscope analyses

21 p3746 A69-38957

Transient heat transfer single blow temperature response functions characterized by first moment of downstream-upstream fluid temperature difference, showing curve matching applications

21 p3851 A69-39291

TEMPERATURE MEASUREMENT

Unsteady baroclinic planetary atmosphere boundary layer turbulent states with various pressure and temperature gradient distributions, using boundary layer model

21 p3760 A69-39659

Heat flow through ocean floor by measuring temperature gradient and thermal conductivity in ocean sediment

21 p3718 A69-39733

Cascade thermoelectric heat pump reducing temperature gradient in legs of element near cold junction and reducing Joule heating in cold junction area

22 p3869 A69-40133

Ionized He and Ar plasmas nonequilibrium nozzle flows, noting temperature difference between electron gas and atom-ion gas, calculating flow parameters

22 p3861 A69-41047

Mass diffusion and heterogeneities in compression chamber gas mixture in shock tube ascribable to pressure and temperature gradients

23 p4146 A69-41547

Stress analysis in elastic bodies induced by axisymmetric strains in presence of mass forces and temperature gradients, obtaining equilibrium equation

23 p4229 A69-41997

Temperature control by heat pipe using noncondensing gas with methanol to vary thermal resistance and mathematical model to describe heat source temperature variations

23 p4240 A69-42307

Transition temperature depression in rotating liquid He based on increased inertial density of excitations

23 p4192 A69-42335

Temperature gradients effects on GaAs crystals grown by Bridgman method

23 p4199 A69-42469

Central circulatory responses of humans to rapid skin temperature changes during continuous exercises

24 p4258 A69-42633

Lower atmospheric temperature continuous radio measurement as function of altitude, calculating temperature gradient

24 p4342 A69-42677

Equator-to-pole temperature gradient relation with planetary pressure belts, comparing observational data with theoretical circulation criterion

24 p4345 A69-43149

Monte Carlo method applied to heat transfer in rarefied gas flow between parallel plates involving temperature jump in Knudsen layer

24 p4246 A69-43490

TEMPERATURE INDICATORS

U INDICATING INSTRUMENTS

TEMPERATURE INVERSIONS

NT CENTRIFUGING STRESS

NT INTERFACIAL TENSION

NT STRUCTURAL STRAIN

NT VOLUMETRIC STRAIN

Volumetric and allotropic changes during heating in electrolytic cobalt multiple phase transformations

12 p2114 A69-26455

Vaporizer temperature and collision efficiency correlation data for magnesium oxide-argon dilute diffusion flames studied for determining inverse temperature dependence

13 p2380 A69-28461

Photospheric radiation field role in temperature inversion of stellar chromospheres with dominant H ion opacity, postulating mechanical energy dissipation

20 p3613 A69-38173

TEMPERATURE MEASUREMENT

Two element interferometer observing Saturn, Uranus and Neptune at 3.12 cm, determining equivalent black body disk temperature

01 p0148 A69-10052

Cooled probes for gas measurements in high pressure arc jets, hypersonic wind tunnels, rocket motors, scramjets and similar severe environments

01 p0078 A69-10150

Atmospheric temperature and airglow spectra from IR measurements noting OH bands, atmospheric structure between 10 and 200 km at midlatitude and atmospheric absorption

[UN PAPER 68-95471] 01 p0108 A69-10464

Aerial radiation temperature measurement, damping factor of atmosphere and determination of ground and water surface temperatures by radiometry

01 p0110 A69-10693

Atmospheric temperature corrections for measurements by rocketsonde and balloonsonde with thermistor, noting dissipation factors and thermal time constants

01 p0081 A69-10697

Jovian atmospheric rotational temperature from rotational lines in methane band
01 p0153 A69-10856

Heat flow measurement from moon interior planned for Apollo missions to determine temperature increase rate with depth during lunar year
[AAS PAPER 68-207] 02 p0313 A69-11482

Line reversal and excitation temperatures in low pressure flames
02 p0350 A69-11709

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
02 p0230 A69-11979

Solar continuum intensity determination in middle IR, obtaining solar disk center brightness temperature measurement by comparison with black body model
02 p0318 A69-12041

Temperature and pressure measurements in low temperature combustion of n pentane covering slow reaction and cool flame regions
02 p0353 A69-12321

Cosmic microwave background radiation measurement, discussing measurement techniques for antenna temperature at microwave frequencies
02 p0210 A69-12431

Microwave radiometer with two reference temperatures, discussing overall stability of design, sensitivity and airborne design for operation in X band [DVL-895] 02 p0220 A69-12435

Measured noise temperature in argon tubes vs theoretical electron temperature for gas discharge noise sources
02 p0210 A69-12437

Compensation method for measurement of mismatched noise source effective temperature independent of reflection coefficient, noting error analysis
02 p0210 A69-12441

Dense plasma temperature determination by gamma ray resonance scattering
02 p0291 A69-12481

Brightness temperature maps for Jovian thermal radiation obtained through 8-14 micron window of atmosphere
02 p0309 A69-12715

Jupiter, Venus and Mars 8.6 mm radio emission, obtaining average disk brightness temperatures
02 p0327 A69-12716

Lunar thermal radiation measurements at 8.6 and 3.2 mm wavelengths, noting brightness temperature-time relationship in curves and as Fourier components
02 p0327 A69-12717

Vertical wind velocity structure and turbulent heat flux temperature measurements over steppe and sea, noting underlying surface influence
03 p0458 A69-13270

Temperature determination of subjacent surface from airborne measurements of outgoing radiation in earth atmosphere in 10 to 12 micron interval
03 p0424 A69-13933

Thermionic emission and dispersion of plasma created by monopulse of laser radiation focused on solid target, discussing plasma temperature determination methods
03 p0441 A69-14141

High temperature measurement based on spectral line displacement and broadening due to Stark effect, noting diagrams for O, Na, Mg, Al and Si at various temperatures
03 p0481 A69-14146

Time resolved electron number density and electron temperature in decaying plasma using laser interferometer
03 p0432 A69-14187

Balloon observations of solar far IR spectrum and brightness temperature
04 p0652 A69-14419

Electron radiation temperature measurement in carbon dioxide laser with N and He additions by microwave technique, noting average electron energy and optical gain
04 p0611 A69-14445

Airborne radiometric /8 to 14 micron/ temperature measurements, determining emissivities of ocean, stratus clouds, desert and snow
04 p0592 A69-14653

Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
04 p0598 A69-14916

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line
04 p0638 A69-15368

Temperature measurement of moving droplets, noting influence of thermocouple electrode stability
04 p0688 A69-15423

Venus observation at 4.52 cm showing 654 K mean brightness temperature, negligible phase variation and polarization indicates thick atmosphere
05 p0818 A69-15601

Ionospheric electron temperature probe analysis based on Japanese Kappa rocket data
05 p0761 A69-15701

COSPAR manual on stratospheric temperature and wind measurements, discussing synoptic and time variation study by Arcas and Loki-Judi meteorological sounding rocket systems
05 p0752 A69-15706

Spectral line reversal method of measuring high temperatures of gases
05 p0761 A69-15763

Molten salts thermal diffusivity measurement method at temperatures above melting point [ASME PAPER 68-WA/ENER-5] 05 p0848 A69-16161

Gravity waves observed by ionospheric temperature measurements in F region
05 p0754 A69-16262

Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments
05 p0755 A69-16268

Langmuir probe experiment measurement of upper region electron temperature on Explorer 32 conflict with Jicamarca Radar Observatory measurements
05 p0756 A69-16283

Simultaneous and independent measurement of thermal conductivity, thermoelectric power and electric resistivity, applying method to cadmium arsenide-zinc arsenide system
05 p0764 A69-16338

Ion temperature diurnal variations at 250-475 km obtained from Thomson scatter spectra
05 p0757 A69-16407

Radiation effects on NERVA out-of-core instrumentation, discussing cryogenic temperature measurements and transducer measuring pressure at gamma heating rates
06 p0956 A69-16882

Stratospheric temperature, wind and ozone concentration measurement during solar eclipse by sounding rocket system
06 p0916 A69-17008

Low pressure fuel system and turbine rotor blade temperature measurement method for Concorde Olympus 593 engine [ASME PAPER 68-GT-63] 06 p0984 A69-17187

Microwave radiometer for measuring mesosphere and stratosphere temperature as function of altitude using atmospheric oxygen line
06 p0924 A69-17247

Line reversal temperature measurement technique, calculating error and outlining correction methods for flames with cool boundary layers and flames containing solid particles
06 p1035 A69-17929

Radiating surface temperature and total atmospheric moisture content determinations based on meteorological earth satellite measurements of outgoing radiation in IR
06 p0952 A69-17988

Book on fundamentals of temperature, pressure and flow measurements covering standards, calibration, moving fluid effects, transient effects and installations in fluids and solids
07 p1131 A69-18410

Barrier capacitance of semiconductor diodes for exact temperature measurement, discussing application to temperature to frequency converters
07 p1100 A69-18556

Optical device for measurement of temperature changes with height in upper atmosphere by rockets or satellites
07 p1132 A69-18676

Ultrasonic thermometry for nuclear reactors based on temperature dependence of sound velocity in solids, discussing simulation experiments [IEEE PAPER 1C-4] 07 p1134 A69-19186

Thermocouple and optical methods for temperature profile measurement in slow burning flat hydrogen-nitrogen-oxygen flame at atmospheric pressure
07 p1242 A69-19489

Degree of population inversion and inverse temperature measurement in medium
07 p1137 A69-19761

Dimensions, temperature and electron density of quiet solar corona from radio interferometer measure-

ments, noting activity and temperature at solar maximum and minimum
08 p1393 A69-205737

Skin and subcutaneous temperature during exposures to intense thermal radiation, discussing estimation of subcutaneous temperature from skin temperature data [AGARDOGRAPH-111] 08 p1264 A69-206717

Ar-H plasma arc radial temperature distribution determined by photoelectric spectroscopy in visible range
08 p1366 A69-207581

Jet engine gas flow, temperature, velocity and pressure measurements by analog and digital systems
08 p1316 A69-208699

Mean temperature values accuracy determined from fixed period values by frequency graphs, discussing deviations from mean
09 p1534 A69-21511

Automatic measuring device for short term air temperature and wind velocity fluctuations leading to air mixtures propagation
09 p1535 A69-21515

Differential brightness of night airglow spectrum, obtaining rotational temperature by comparison with synthetic spectra
09 p1488 A69-21656

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics
09 p1609 A69-21775

Reproducibility of thermionic converters performance, comparing volt-ampere characteristics with reservoir and collector temperature
09 p1437 A69-21813

Atmospheric molecular oxygen temperatures from photoelectric recordings of absorption bands, analyzing relaxation process and photoeffects in oxygen molecules
09 p1490 A69-21863

Shock heated helium plasma temperature measurements by spectroscopy compared to Rankine-Hugoniot calculations including ionization effect
09 p1548 A69-21963

Air layer between target and instrument effect on earth surface temperature conducted with airborne radiometers
09 p1536 A69-22166

Emission-absorption intensity ratio temperature measurements of diatomic molecules under thermal nonequilibrium conditions, considering rotational population distribution during vibration temperature measurement
09 p1623 A69-22255

Resistance temperature transducers and thermocouples covering characteristics, readout and design for aerospace requirements
10 p1690 A69-23225

Ultrasonics for automatic measurements of temperature and elastic moduli above 5000 F
10 p1694 A69-23373

Low temperature optically thick boundary layers influence on spectroscopic temperature measurements in plasma MHD channels
10 p1731 A69-23434

Prolateness of Venus radius on basis of satellite microwave temperature measurements, chemical compositions and ice cap model
10 p1784 A69-23958

Monograph on comparison of various methods for experimental determination of temperature fields in laminar burner flames
11 p1999 A69-24635

Holography for temperature distribution measurement around heated wire, using He-Ne laser
11 p1887 A69-25197

Nondestructive thermal tests using liquid crystals thermal sensitivity for measurement of temperature changes and visualization of temperature gradients
11 p1892 A69-25293

Shock wave structure in gas mixtures, discussing velocity and temperature undershoot and overshoot
11 p1874 A69-25356

Spectral brightness temperature of shock waves in air measured at 220-800 nm, obtaining 9-14 km/sec shock waves by detonating explosives
11 p1877 A69-25755

Monograph on schlieren-optical technique for plasma beam temperature measurements using photoelectric scanning device
12 p2134 A69-26120

Formulas derived for tropospheric equivalent noise temperature as function of frequency, noting applicability to thermal radiation from rain
12 p2032 A69-26704

Hydrogenic transition derived excitation temperatures for Wolf-Rayet stars of WC sequence
12 p2160 A69-26904

Previsual detection of vigor loss and mortality signs in ponderosa pine trees subject to bark beetle attack
12 p2098 A69-26993

Rocket observations of visible and UV dayglow, using electron density and temperature measurements for emission rates of various excitation mechanisms
12 p2076 A69-27108

Diffusion and mass flow in steady state magnetically stabilized helium arc plasma effects on spectroscopic determinations of electron temperature, discussing degree of ionization
12 p2141 A69-27146

Hayashi effect modifications due to high opacity stellar atmosphere or presence of molecular hydrogen dissociation zone, discussing pressure dissociation role
13 p2342 A69-27594

Temperature measurement associated with bubbles leaving heat source in subcooled pool boiling carbon tetrachloride analyzed, using high speed motion pictures by schlieren optical system
[ASME PAPER 68-HT-47] 13 p2374 A69-27779

Thermocouples dynamic response attached to thin skinned model under constant heating rate, considering error reduction in temperature measurement
13 p2375 A69-27785

Free convection heat transfer from heated inclined flat plate in air, studying effects of angular positions
13 p2375 A69-27794

Temperature measurement of plasma consisting of combustion products in MHD duct, measuring spectral line contours by Fabry-Perot interferometer for accuracies
13 p2309 A69-28023

Diagnostic measurements in nonequilibrium nozzle flows compared to finite rate expansion calculations, measuring pressure, temperature and density
[AIAA PAPER 69-328] 13 p2200 A69-28263

Fluorescence stimulated by high energy electron and ion beams, determining vibrational temperature and concentration of molecular oxygen in high enthalpy wind tunnel flows
13 p2302 A69-28265

Heat conversion coefficients and initial temperature of active elements of solar powered electric devices
13 p2209 A69-28314

Structure and thermometry of solar interior from measuring neutrino fluxes intensities emitted by unit mass
13 p2333 A69-28434

Optical measurement method for burning surface temperature of condensed systems, realizing radiation from surface of combustion by light guide of monocrystalline aluminum oxide
13 p2379 A69-28453

Rocket grenade measurements of earth atmosphere, finding lowest temperature in Alaska
13 p2255 A69-28637

Vertical wind velocity structure and turbulent heat flux temperature measurements over steppe and sea, noting underlying surface influence
14 p2471 A69-28778

Temperature measurement for aircraft gas-turbine engine development
14 p2509 A69-28886

Asymmetric spherical temperature field reconstruction based on measuring temperature and derivatives at two points of field
14 p2537 A69-28888

Blue continuum emission from hot carbon dioxide measured in shock tube, discussing applications to temperature measurement of gases containing carbon dioxide
14 p2427 A69-29014

Balmer jumps for B star temperature scale, discussing relation between observed Balmer jumps and observed U-B color indices
14 p2518 A69-29132

Actinium fueled thermionic generator design and characteristics, noting emitter temperature and material
14 p2399 A69-29192

Microwave brightness temperatures for downward viewing over open seas from above atmosphere, using tropospheric model containing homogeneous layer clouds
14 p2415 A69-29515

Temperature measurements - Conference, Hawthorne, California, April 1969
15 p2606 A69-30151

Measurement system for recording of small localized temperature changes in brain
15 p2606 A69-30152

Temperature measurement miniature telemetry transmitter
15 p2607 A69-30156

Electro-optical measurements to determine intermolecular interaction temperatures in organic liquids compressed by shock waves
15 p2561 A69-30264

Sky cosmic radio emission absolute temperature measured at decimeter wavelengths and at two zenith angles to minimize atmospheric influence
15 p2687 A69-30544

Global mean monthly charts for IR radiation temperature, based on Cosmos 144 satellite data
15 p2596 A69-30643

Argon electric arc axis temperature measurements, showing current and tube diameter ratio dependence
15 p2662 A69-30977

High gas stream temperature levels and distributions from transient and intermittent probe measurements
15 p2612 A69-31268

Passive temperature indicators for maximum temperatures attained within rocket nozzle ablative materials
15 p2613 A69-31273

Thermocouples precision used for measuring metal temperatures of cooled jet engine turbine buckets
15 p2613 A69-31274

Temperature measurements of neutral polar atmosphere at 120-170 km using artificial Na clouds
15 p2606 A69-31448

Conditions behind incident and reflected shock waves in shock tube calculated from initial pressure, density, temperature and shock speed
15 p2593 A69-31487

Cholesteric liquid crystal film application to test surfaces for thermal mapping, giving technique for flaw pattern determination
15 p2631 A69-31507

Airstream parameters /temperature and velocity/ of turbulence intensity in jet core at tube exit and behind grids measured by He diffusion method
16 p2771 A69-31959

Electron temperature time variation measurement in plasma-beam discharge by method based on single spectral line
16 p2822 A69-32115

Electron beam rotational temperature, noting discrepancies between experimental values and iterative calculations due to secondary electron effects
16 p2814 A69-32175

Ammonium perchlorate pyrolysis by convective surface heating, monitoring IR emission as measure of surface temperature
[WSCJ PAPER 69-23] 16 p2832 A69-32361

Temperature and flow measurements in jet engine combustion chamber, discussing design and calibration of gasdynamic thermometer, double thermocouple and flow probe
17 p2945 A69-32947

Fluid amplifier with sudden widening applied to various computer tasks, utilizing for detection and measurement of viscosity, temperature and sonic or rotational velocity
17 p2903 A69-33010

Temperature determination of thick flat plate rotating in space in solar flux with one surface insulated compared with Apollo heat shield results
[AIAA PAPER 69-614] 17 p3071 A69-33266

Ocean and water surface temperature measurement by IR remote sensing from aircraft and satellites, discussing accuracy and data correction
[AIAA PAPER 69-590] 17 p2973 A69-33286

Mars surface temperature calculated by applying Humphrey formula for planetary radiation energy, finding mean annual values of temperature for different albedo
17 p3034 A69-33412

Subsurface Martian temperature from sinusoidal temperature variation theory for semiinfinite homogeneous medium, plotting amplitude, mean surface and diurnal soil temperature curves
17 p3034 A69-33413

IR radiometer to measure Jupiter atmospheric temperature by calculating certain constituents heat radiation levels through Planck formula assuming black body properties
17 p2974 A69-33425

Pressure and temperature surveys of Mach 27-47 nozzle boundary layer at Ames M-50 He tunnel, determining velocity profiles, wall friction coefficient, etc
[AIAA PAPER 69-686] 17 p2953 A69-33441

Contact thermocouples to measure temperature of wall exposed to radiation, evaluating errors
17 p2975 A69-33596

Particulate thermophysical lunar soil model for measuring lunation nighttime and eclipse cooling, noting applicability to IR surface brightness temperature of Mercury hot pole
18 p3191 A69-34303

Temperatures of radiantly heated sun and shade leaves of white oak measured in low speed wind tunnel, considering differences in convective heat dissipation
18 p3095 A69-34540

Ducted fan engine turbine air flow rate and frontal gas temperature determined from air temperature/pressure measurements behind compressor and engine fuel flow
18 p3086 A69-34986

Low density plasma electrical conductivity determined by temperature and electron density measurements, using Ohm law
18 p3181 A69-35072

Resistance thermometers operation characteristics and applications, noting sensor metals, true temperature and instrumentation errors
18 p3139 A69-35480

Static temperature measurement in arc-tunnel tests producing high velocity air streams by duplex scanning IR spectrometer
19 p3294 A69-35752

Integrated circuits failure analysis techniques utilizing pin-to-pin curve tracer tests and thermal measurements
19 p3282 A69-35786

Structural parameters selection for thermocouples with butt-weld electrodes, developing mathematical basis for thermoelectrode length to measure unstable gas temperatures
19 p3311 A69-36197

Heat transfer problem involving temperature determination of body and ambient medium, deriving existence and uniqueness theorems for boundary value problems in curvilinear regions
20 p3631 A69-36991

High gas stream temperatures determination from short exposure probe based on inferring temperature from transient response of sensor
20 p3536 A69-37005

Vibrational temperature of low density nitrogen measured by electron beam method, discussing relationship to ratio of integrated vibrational band intensities
20 p3579 A69-37222

Plasma coating formation mechanisms and parameters, studying metal surface and deposited particles temperatures, spraying time effects, etc
20 p3549 A69-37374

Japanese meteorological sounding rocket for atmospheric temperature and wind from 60 km down to balloon observation level, discussing principles and payload separation
20 p3543 A69-37795

Excitation temperatures and OH microwave line optical depths measured for dust clouds, discussing optical absorption lines and LF radio absorption
20 p3611 A69-38147

Methane abundance and rotational temperature of Jupiter, considering effects of line saturation
20 p3613 A69-38174

Carbon dioxide band in Venus spectrum by dispersion analysis, deriving rotational temperature
20 p3614 A69-38254

Fourier heat equations functional corrections for determining temperatures of plate and cylinder heated simultaneously by radiation and convection
21 p3848 A69-38641

IR spectrum of NML Cygnus star using rapid scanning Michelson interferometer, estimating temperature from CO bands
21 p3800 A69-38678

Temperature potentials in cylinder of known radius, investigating optimal heating regime and thermal kinetic factor effect on maximum potential magnitude
21 p3837 A69-39089

Satellite determination of underlying surface temperature by IR spectroscopy, measuring emitted radiation in atmospheric windows
21 p3759 A69-39114

Solid metal oxide particles temperature in premixed flames determined from intensity/ wavelength plots of continua
21 p3852 A69-39592

Heat flow through ocean floor by measuring temperature gradient and thermal conductivity in ocean sediment
21 p3718 A69-39733

Monograph on hot wire anemometer measurements of velocity and temperature turbulence, discussing flow characteristics, calibration, etc
22 p3951 A69-41256

Pyrometer for turbine rotor blades surface temperature measurement, considering purged, line-of-sight viewing tube and signal processing to reject C particles interference
[SAE PAPER 690431] 23 p4165 A69-41649

Jet engine combustion temperature measurements by thermocouples or gas analysis noting errors involved
23 p4165 A69-41650

Ion temperature measurement in rarefied multicompartment plasma by temperature relation to ion beam divergence rate, comparing results to pyrometric measurements
23 p4196 A69-41839

Calorimetry-thermometry discrepancy during prolonged exercise in hot dry environment, measuring rectal temperature with increasing exposure time
23 p4098 A69-42104

Two fluid heat pipe performance, measuring temperatures and condenser end vapor pressures for two thermal power input conditions
23 p4240 A69-42306

Lower atmospheric temperature continuous radio measurement as function of altitude, calculating temperature gradient
24 p4342 A69-42677

Thermal calculations of objects near lunar surface, considering IR emission directivity effects
24 p4385 A69-43254

Radiation equilibrium temperature measured downstream of transpiration cooled gas flow near slender cone vertex in continuous flow hypersonic tunnel
24 p4248 A69-43588

TEMPERATURE MEASURING INSTRUMENTS

NT OPTICAL PYROMETERS

NT PYROMETERS

NT RADIATION PYROMETERS

NT RESISTANCE THERMOMETERS

NT THERMOCOUPLE PYROMETERS

NT THERMOMETERS

Thermographic phosphor technique to provide transient temperature measurements in impulse wind tunnel
01 p0078 A69-10152

Alkali metal vapors thermal conductivity determination by temperature difference dilatometric measurement
02 p0247 A69-11579

Fluid temperature sensor generating output differential pressure proportional to temperature of fluid entering device
02 p0249 A69-12089

Acoustical thermometer-interferometer to measure air temperature between 20 and 50 km
03 p0429 A69-13269

High temperature directional reflectance measurements of ablative materials as function of sample temperature using paraboloid reflectometer
[AIAA PAPER 68-25] 04 p0604 A69-15512

Telemetry technique utilizing thermocouple sensors for base heating determinations on free flight blunt cone in shock tunnels, noting electrical noise reduction
[AIAA PAPER 68-407] 04 p0604 A69-15514

Flow field in fluidic temperature sensor using schlieren and shadowgraph techniques
[ASME PAPER 68-WA/FE-29] 05 p0763 A69-16102

Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere
05 p0766 A69-16755

Automatic remotely operated sodium D line reversal temperature measuring apparatus, analyzing systematic errors
06 p1035 A69-17932

Pyroelectric thermometry for measurements at low temperatures with emphasis on calorimetry, discussing pyroelectric coefficients, dielectric constants and resistivities
09 p1493 A69-21423

Rapid low level commutator for temperature measuring circuit with thermocouples, discussing construction and performance
11 p1884 A69-24758

Differential catalytic thin film heat gauge for measuring surface temperature variations and ionized flow heat transfer, noting insulating boundary layer thickness
11 p2002 A69-25231

Acoustical thermometer-interferometer to measure air temperature between 20 and 50 km
14 p2445 A69-28777

Thermistor instrument for remote sensing, magnetic synchronous recording and linear display of temperature
14 p2449 A69-29562

Radiation method for temperature and heat flux measurement, discussing transducer with thermopile as sensor
15 p2607 A69-30154

High speed picture thermography in nondestructive testing, describing IR scanning frame rate and thermal image recording
15 p2618 A69-30316

Surface temperature measurements to deduce surface heat fluxes, noting dependence on environment and sensor characteristics
15 p2716 A69-30379

TEMPERATURE PHOTOMETERS

U PHOTOMETERS

TEMPERATURE PROBES

Thermoelectric radiometer for transient radiant flux short duration pulse measurement, using thermally induced depolarization of polymer film dielectric
[AIAA PAPER 68-403] 02 p0250 A69-12392

Meteorological rocket probes in Spain for wind and temperature measurements, including stratospheric circulation data
11 p1877 A69-24519

Transistorized assembly for amplification of signals emitted by platinum film probes in shock tubes, discussing application to chronometric device triggering
11 p1887 A69-25095

Construction and calibration of combined temperature and pressure probe for compressible flow
13 p2242 A69-28226

High gas stream temperature levels and distributions from transient and intermittent probe measurements
15 p2612 A69-31268

Water cooled split-flow probe measuring enthalpy of high temperature subsonic streams
15 p2614 A69-31275

Thermocouple probe measurement error evaluation by parallel plate analytical model
16 p2789 A69-31903

Miniature probe with short time response for total temperature profile measurements in hypersonic turbulent boundary layer on wall of hypersonic tunnel nozzle
19 p3293 A69-35751

High gas stream temperatures determination from short exposure probe based on inferring temperature from transient response of sensor
20 p3536 A69-37005

TEMPERATURE PROFILES

Approximate boundary controllability for heat equation by considering temperature variation with time
01 p0173 A69-10008

Atmospheric temperature profiles by regularizing algorithm, discussing influence of random errors in measured radiation and kernel of integral equation on interpretation accuracy
02 p0274 A69-11448

Heat transfer through vertical plane layer for various Prandtl numbers, discussing velocity and temperature profiles and effects of aspect ratio, Grashof and Rayleigh numbers
[ASME PAPER 68-WA/HT-4] 05 p0846 A69-16115

Radial temperature profile in induction coupled argon plasmas at low and atmospheric pressures
06 p0964 A69-17193

Mathematical techniques for treating satellite based atmospheric data involving radiative transfer equation inversion, noting scattering and temperature measurement problems
06 p0957 A69-17618

IR spectrometer for Nimbus meteorological satellite for terrestrial spectral radiance data for atmospheric temperature profiles
06 p0926 A69-17621

Relaxation method for inversion of full radiative transfer equation, determining temperature profile in atmosphere from outgoing radiance
[JPL-TR-32-1351] 06 p0922 A69-17805

Fluid flow longitudinal temperature profiles for inclusion in heat transfer computer program
[AIAA PAPER 69-30] 06 p1038 A69-18174

Modified schlieren interferometer for quantitative investigation of free convection boundary layer temperature profiles
07 p1130 A69-18263

Combined radiation and conduction heat transfer equation applied to temperature profile around opaque hollow sphere and in solid condensed gas layer
[SAE PAPER 690197] 07 p1239 A69-18303

Temperature profile and power density distribution in metastable level of ruby laser rod during pumping in air
07 p1150 A69-18937

Thermocouple and optical methods for temperature profile measurement in slow burning flat hydrogen-nitrogen-oxygen flame at atmospheric pressure
07 p1242 A69-194898

Temperature profile calculations for high pressure electric arcs using diffusion approximation for radiative flux density, taking energy transfer into account
08 p1420 A69-201484

Temperature profiles and heat transfer coefficients in two phase liquid-liquid stratified laminar flow of variable immiscible film thickness with surface evaporation
09 p1622 A69-21904

Temperature profiles and frequency driftings of VHF telemetry transmitters for Saturn S-IC stage, using IR radiation data
10 p1653 A69-23049

Temperature pulsations radial distribution in plasma jet using plasmatron without mixing chamber
10 p1729 A69-23432

Nozzle flow temperature patterns of relaxing combustion gases compared at different temperatures and pressures, using kinetic-chemical calculations
[DVL-896] 10 p1809 A69-23644

Viscosity-temperature chart for hydrocarbons permitting linear extrapolations into low viscosity high temperature regions
10 p1753 A69-23975

Elastic and elastoplastic strains in materials under various loadings, determining temperature variations by thermoelectric method and verifying by tensile tests
11 p1985 A69-25178

Power law profiles of mean wind velocity and temperature in thermally stratified shear flow, considering dependence on thermal stability and Richardson number
11 p1874 A69-25381

Ionosphere temperature profiles, discussing heating and cooling of electron gas and ion gases and thermal balance
12 p2063 A69-25903

Temperature vertical profiles rms deviations calculated from temperature measurements during unstable atmospheric stratification
13 p2293 A69-27847

Sealed and unsealed relay coils temperature rise at simulated outer space air pressure levels
13 p2231 A69-28048

Upper atmosphere winds and temperature measurements from rocket grenade, discussing TMA experiments
15 p2598 A69-31317

Electrical and thermal conductivities of high pressure arc plasmas from I-V characteristics and radial temperature profile
16 p2817 A69-31644

Ozone soundings in upper stratosphere, discussing vertical temperature profiles relationship to vertical ozone profiles
16 p2787 A69-32640

Nonlinear least squares optimization program applied to atmospheric temperature sounding, solving for temperatures at various altitudes from simulated carbon dioxide intensity measurements
17 p2960 A69-33156

Temperature profiles and associated wind profiles obtained with Jimsphere/FPS-16 radar system at Cape Kennedy, discussing remote CAT detector assessment
17 p2999 A69-33739

Miniature probe with short time response for total temperature profile measurements in hypersonic turbulent boundary layer on wall of hypersonic tunnel nozzle
19 p3293 A69-35751

Inelastic collisions and radiation effects on transport properties and shock structure in high temperature gases, obtaining density and temperature profiles
19 p3448 A69-36149

Flame acceleration data applied to unburnt gas boundary layer analysis, discussing velocity and temperature profiles, layer thickness variation and expansion phase backflow
19 p3450 A69-36359

Orthogonal functions for determining atmospheric vertical temperature profile from satellite measurement of earth outgoing radiation in carbon dioxide absorption band
19 p3303 A69-36409

Wind and temperature profiles in Ekman boundary layer, using numerical integrations of dynamic equations including time derivative terms
19 p3363 A69-36501

Thermosphere temperature shape parameters from probe flights, showing dependence on hour angle
20 p3534 A69-38088

Temperature measurement in and near opposed-jet diffusion flame subjected to electric field, discussing flame behavior at low mass flow rate

21 p3852 A69-39597

Temperature fluctuations in microwave background radiation from primeval perturbations compared with perturbations from discrete radio sources

21 p3815 A69-39611

TEMPERATURE SCALES

Lyman alpha wing opacity effect on temperature scale and helium content in F and G subdwarf atmospheres

09 p1607 A69-22431

Negative absolute temperatures physical meaning confirmed mathematically using statistical physics

18 p3231 A69-35403

TEMPERATURE SENSORS

NT THERMISTORS

Fluid temperature sensor generating output differential pressure proportional to temperature of fluid entering device

02 p0249 A69-12089

Fluidic type temperature sensor for total temperature measurement for hypersonic aircraft in atmosphere

05 p0766 A69-16755

Error analysis of high resolution balloon-borne temperature sensor and comparison of temperature data with simultaneous rawinsonde measurements

09 p1494 A69-21642

High temperature sensors for gas turbines, discussing thermocouples and radiation pyrometer to sense turbine hardware

[ASME PAPER 69-GT-30]

09 p1501 A69-22492

Compressor inlet temperature /CIT/ sensors, describing bimetal strip and liquid expansion aspirated types

[ASME PAPER 69-GT-18]

09 p1571 A69-22499

Miniature fluidic oscillator temperature sensors evaluated in gas turbine engine nozzle, discussing temperature control and related signal error compensation and temperature averaging

[ASME PAPER 69-GT-70]

09 p1572 A69-22512

Fluidic temperature sensors for measuring turbine inlet temperature on large turbine engine

[AIAA PAPER 69-544]

16 p2792 A69-32692

Fluidic sensors for jet engine control, analyzing convergent divergent nozzles, vortex and acoustic oscillators for pressure and gas temperature measurements

[AIAA PAPER 69-542]

16 p2843 A69-32699

Cryogenic liquid level temperature transducer with radiantly heated thermocouple sensitive element

17 p2975 A69-33670

Sea surface temperature remote sensing by Nimbus 2 satellite using TV camera and medium and high resolution IR radiometer

18 p3130 A69-35057

Transducer with single crystal Ge for high heat flux measurement, noting calibration by direct conduction

19 p3307 A69-35748

Thin film temperature sensor material, response time, substrate material and flight instrumentation for rocket-borne application

22 p3950 A69-41229

Spacecraft solar cell near-maximum power operation by tracking optimum value with array temperature sensor

23 p4075 A69-42303

TEMPERING

Transitional hexagonal omega phase of Ti-Fe alloys quenched in water and tempered

03 p0451 A69-13999

Tempering time and temperature effect on microstructure, superconductivity, tensile strength and electrical conductivity of recrystallized Nb-Ti alloy

19 p3345 A69-36302

TEMPLATES

Bending of weightless thin elastic beams clamped to circular template by external force

12 p2181 A69-26572

TENSILE CREEP

Four specimen vacuum device for simultaneous tensile creep tests at 1200 C, discussing linear and thermal expansion

07 p1116 A69-19318

Rupture times in analysis of creep tensile instability in uniformly pressurized thin walled membrane shells of revolution, comparing two criteria

07 p1234 A69-19378

Polycrystalline Re high temperature plastic deformation during tensile creep, including activation energy and substructure dislocation study

13 p2280 A69-27767

Ronay effect in reversed cyclic torsion or tension in thin cylindrical viscoelastic tube showing creep under sustained load

20 p3625 A69-37596

TENSILE DEFORMATION

Fatigue strength reduction of structural steels fatigued in rotating bending after tensile deformation

03 p0450 A69-13916

Tensile deformation properties of copper single crystals strengthened by fine dispersions of BeO particles

08 p1334 A69-20575

Deformation processing of superalloy gas turbine components, studying ingot characteristics, alloy segregation effect and thermomechanical properties [SAE PAPER 690101]

09 p1503 A69-23557

Polyurethane foam high velocity deformation properties, discussing results of dynamic uniaxial stress tension and compression tests

11 p1907 A69-25648

Ni-Ti alloy intergranular deformation at constant tension within wide temperature range

12 p2113 A69-26044

Tensile and creep deformation of fiber reinforced composites consisting of Mg-Li alloy matrix with high strength precipitation hardening stainless steel wire

17 p2986 A69-33073

Plastic tension of axisymmetric sample involving necking and small inhomogeneity, assuming Tresca yield condition and associated flow law

19 p3446 A69-36847

Transverse vibrations of isotropic solid rectangular beam with secondary effects of rotary inertia and shear deformation retained

21 p3832 A69-38447

Alpha Ti thermally activated tensile deformation, studying flow stress dependence on strain, temperature and strain rate

[ASM PAPER W9-4.2]

21 p3729 A69-38659

Tension tests of polycarbonate plates grooved at various angles, demonstrating necking dependence on mechanical instability

21 p3753 A69-39809

Solid solutions precipitation effect during deformation process on static and dynamic tensile tests of Al alloy by electric resistance measurement

22 p3972 A69-41082

Desorption of hydrogen and methane from Al, Mg and Nb under room temperature tensile deformation in ultrahigh vacuum

23 p4176 A69-41541

TENSILE PROPERTIES

Charge materials purity found to increase beta-Ti alloys properties

01 p0094 A69-10216

Prestraining of stainless steel En58b sheet at room and cryogenic temperature, noting effect on tensile properties

01 p0099 A69-11151

Zr-Be-Nb alloys mechanical tensile properties above room temperature for low concentrations of Be and Nb

02 p0262 A69-11845

Composite tensile-failure modes, discussing failure load prediction, experimental data and statistical analysis of stress concentration effects

[AIAA PAPER 68-173]

02 p0347 A69-12514

Polymer films tensile properties after exposure to gamma radiation in vacuum, noting chain scission and cross linking

[ASME PAPER 68-WA/RP-6]

05 p0783 A69-16160

Sintered W-Ni-Fe alloys strength and precipitation hardening characteristics for various compositions and cooling conditions

05 p0782 A69-16798

Fiber orientation and morphology effect on tensile behavior of aluminum-nickel whisker reinforced aluminum

06 p0939 A69-16943

Free surface strain increment components on high carbon steel compression specimens to estimate tensile plastic instability onset, noting ductile fracture criterion

08 p1328 A69-19891

Tensile characteristics of discontinuous unidirectional fiber reinforced glass-epoxy composites and filament wound material, discussing alignment and interfacial bonding

08 p1339 A69-20496

Tensile and creep behavior of nickel at 600 C after oxidation at 1200 C, correlating results with structural differences caused by oxidation

08 p1333 A69-20556

Unidirectionally solidified eutectic composite of Al and Cu-Al intermetallic, noting tensile properties at room and high temperatures

10 p1708 A69-22995

Charge materials purity found to increase beta-Ti alloys properties

15 p2638 A69-30272

Composition effect on tensile and flexural moduli of composites containing randomly distributed fibrous strands, establishing strength-composition relationships

17 p2991 A69-32960

German monograph on yttrium addition effects on tension and compression behavior of Nb and Mo at high temperature in vacuum

17 p2990 A69-33570

Electron beam welds orientation effects on tensile and deformation properties of strengthened and welded austenitic stainless steels

18 p3151 A69-35432

Smooth and notched tensile properties of Fe-Ni alloys in liquid Hg, discussing ductility and toughness

20 p3563 A69-38025

Polystyrene melt tensile viscosity prediction from shearing viscosities, using rheological network rupture theory

21 p3753 A69-39730

Thickness direction tensile properties, ultrasonic attenuation and mild steel plate lamellar tearing in multipass fillet joints measured by weld cracking test

24 p4320 A69-42942

TENSILE STRENGTH

Maraging steels ductile and strength characteristics with increased Co and Mo as function of Ni content, tempering method and aging

01 p0098 A69-10731

Fiber-fiber interaction effect on stress distribution and tensile strength of discontinuous aligned fiber composites

01 p0171 A69-11261

Long term atmospheric corrosion test program for aluminum and magnesium base alloys, comparing tensile strength of exposed and control specimens

01 p0100 A69-11353

Rapidly heated ablative reinforced plastics strength and stress-strain properties, considering heat shield designs

02 p0347 A69-12512

High temperature tensile strengths of uncoated boron filament and filament coated with silicon carbide

02 p0270 A69-12731

Metal composite materials, discussing strengthening mechanism for inclusion of high elastic coefficient and creep limit fibers in weak ductile matrices

02 p0268 A69-12750

Plastic deformation and bursting pressure of thin rupture disk as related to tensile strength

06 p1020 A69-17129

Computer analysis for optimizing size and shape of thin walled axisymmetric elastic rings, plates and shells with respect to tension, rigidity and weight

06 p1026 A69-18017

Tensile strength of alloys under high pressure of hydrogen and helium, discussing embrittlement

07 p1169 A69-19667

Microstructure relationship to tensile strength and creep resistance in Zn-Ni-Ti alloy extrusions, discussing role of finely dispersed intermetallic particles

08 p1329 A69-20002

Retained austenite content control, strain aging and ausforming to improve toughness of high strength martensitic stainless steel without strength loss

08 p1330 A69-20010

Tensile strength of glass-fiber reinforced epoxy resin laminates subjected to fluctuating tension, discussing crack density dependence on fatigue stress cycles

08 p1338 A69-20494

Failure criteria for predicting filamentary composite strength under uniaxial and combined stresses from properties and fabrication process considerations

09 p1611 A69-21479

Tensile strengths and elasticity moduli of graphite fibers produced from textile organic thread, discussing application to composites, ablative and fiber reinforced materials

09 p1529 A69-22071

Silicon carbide filaments strength at high temperatures noting vapor deposition, mechanical properties and applications

09 p1524 A69-22072

Adhesive bonded lap joint strength dependence on adherend mechanical properties under conditions of homogeneous adherend and cohesive failure

09 p1530 A69-22317

Prepreg based on S glass with HTS finish and B staged epoxy resin, discussing tensile strength and moisture exposure

09 p1530 A69-22327

Gas turbine blade materials after long term service, analyzing tensile, impact and stress rupture properties and microstructure

[ASME PAPER 69-GT-12] 09 p1527 A69-22503

Material selection for structures under vibration loads, analyzing fatigue strength on basis of stress susceptibility and relationship with tensile strength

09 p1620 A69-22574

Strength of laminated glass filament reinforced plastic material in biaxial loading, discussing strength theories

10 p1794 A69-22943

Potential testing methods for corrosion induced changes in materials, discussing mechanical properties, corrosion fatigue and cracking and creep

10 p1713 A69-23822

Hydrogen effect on temperature dependence of tensile strength and stress rupture strength of Ti alloys, considering annealing, quenching and aging

11 p1905 A69-24962

Glass fiber reinforced plastics tensile strength at low and high temperatures

11 p1907 A69-25181

Yield to ultimate tensile strength ratio of titanium alloys subjected to thermomechanical treatment

11 p1906 A69-25683

Tensile strength and failure loading evaluation for structure, discussing stresses in neighborhood of crack, crack toughness measurement and fracture mechanics

12 p2176 A69-25861

Three dimensional network of closely spaced oxide particles for Al strengthening investigated by transmission electron microscopy and tensile tests

13 p2276 A69-27371

High strength alloys stress corrosion cracks, analyzing tensile ligament instability from plastic flow tests of bulk/compression/specimens

13 p2277 A69-27404

Reversion and drawing techniques for ultrahigh strength ductile maraging steel wire without excessive deformation

13 p2278 A69-27412

Grain size effect on room temperature tensile strength of alpha-titanium analyzed by tensile testing and electron transmission

13 p2280 A69-27766

Ferrous and nonferrous metals shock tensile strength by elastic contact dynamometer, noting diagram shape dependence on stress growth rate

14 p2464 A69-29314

Strain rate and temperature effects on sintered molybdenum sheets strength and elongation characteristics

14 p2464 A69-29322

Thermocompression joints strength measured using friction test, centrifuging and microtensile tests

15 p2573 A69-30081

Maraging steel tensile strength increased, plasticity and toughness properties decreased with Ti content increase

15 p2639 A69-30630

Fiberglass reinforced plastic tensile strength dependence on vibration time and temperature and vibrational effect on modulus of elasticity

15 p2643 A69-31203

Multiple repair welding effects on AL welds tensile strength, using conductivity measurements to monitor strength

15 p2631 A69-31509

Electrical conductivity, hardness, ultimate tensile strength and yield strength correlations of age hardenable Al alloys by eddy current methods

15 p2641 A69-31513

Photoelasticity testing of stress gradient factor on notched tensile specimens

17 p3052 A69-32982

Temperature and pressurization effects on tensile and compressive properties of polycrystalline arc-cast W

18 p3154 A69-34273

Oriented glassfiber reinforced plastics elastic moduli and tensile strength along anisotropic axes determined nondestructively, considering component content and material porosity

18 p3162 A69-35359

Nb single crystals plastic deformation influencing tensile strength, noting rolling directions

18 p3160 A69-35454

Silicon nitride staple fibers synthesis, development and characterization, noting tensile strength and sonic modulus

19 p3354 A69-35517

High modulus graphite epoxy composite material laminates fabricated and tested, correlating filament strength variation effect with composite tensile strength

19 p3354 A69-35518

Measuring elastic modulus and tensile strength of high modulus graphite fibers including comparative data, error sources and full strand test

19 p3355 A69-35520

Graphite fiber NOL rings and biaxial wound pressurized cylinders tested at ambient and cryogenic temperatures for tensile and cyclic fatigue properties

19 p3355 A69-35521

Polyperfluoroalkyleneimidoyleperfluoroalkylene-amidine synthesized by reaction of perfluoroalkane dinitriles with ammonia or diamidine, giving elastomers of varying strength and elongation, noting thermal stability

19 p3264 A69-35535

Tensile and stress rupture strengths of diffusion bonded Ni superalloys, using spin tests of simulated hollow turbine disks

19 p3320 A69-35559

Crystal twinning directional effect on Mg alloys tensile yield strength degradation, investigating recovery methods

19 p3341 A69-35583

Silicon carbide coated boron fiber reinforced /Bor-sic/ Al composites tensile strength and elastic properties

19 p3344 A69-35926

Polymer fibers tensile strength improved using sectional orientation strengthening at controlled temperature and tension conditions

19 p3358 A69-35984

Low strain rate effects on metals yield and tensile strength

20 p3563 A69-38063

Texture hardening combined with age hardening for biaxial strength improvement of Ti-Al-V alloy, discussing applications to spherical pressure vessels

21 p3729 A69-38662

Extreme value statistics used to determine minimum acceptable tensile strength of wire command links in TOW antitank missiles

24 p4318 A69-42642

Fracture and tensile properties of electron beam welded Al alloy for pressure vessels compared to gas tungsten arc welding results

24 p4319 A69-42941

Static and cyclic tensile fatigue of alumina by ring test method, measuring time to failure

24 p4334 A69-43343

Tensile strength improvement in Al-B composites by heat treatment to T6 condition and subsequent cold rolling

24 p4334 A69-43449

TENSILE STRESS

Plastic zone generation by slots cut in tensile test specimens before and during loading, discussing redistribution

01 p0098 A69-10762

Microscopic cleavage strength of high nitrogen steel notched bars determined from critical tensile stress criteria using elastoplastic analysis method

01 p0169 A69-10765

Composite material mechanical failure due to detachment of microfiber ends from elastic matrix while under tension

01 p0171 A69-11259

Elastic properties of epoxy resins, deriving relation by considering different shear properties in tension and compression

01 p0103 A69-11268

Dynamic tensile stress-strain curves for annealed Al, Cu and Fe at constant strain rates, describing experimental method

03 p0524 A69-13065

Dead-end microcracks stress fields, studying positive /tensile/ and negative /compressive/ nature dependence on crack size

04 p0674 A69-14548

Shear type fracture formation mechanism in tensile test specimens of Ti alloys, noting transition in macrogeometry

04 p0617 A69-15076

Load carrying capacity of V notched bars under axially symmetric tensile load, verifying influence of distance between two equal notches

04 p0680 A69-15169

Statistical model for tensile fracture of parallel fiber composites based on stress criterion for crack propagation

[ASME PAPER 68-WA/RP-7]

05 p0783 A69-16159

Hydrostatic tension test of brittle material using spherical specimen bonded into center of cube matrix material

05 p0784 A69-16444

Photoelastic study of interaction between overlapping parallel cracks in tensile stress field

05 p0842 A69-16444

Statistical processing of oscillograms of instantaneous values of wire tension during winding, determining stress characteristics

06 p0927 A69-17604

Transient heat evolution response to reapplied stress of alloys plastically predeformed at 4.2 K attributed to thermally softened defect structures

07 p1165 A69-18949

Vibration characteristics of rectangular plate with fatigue crack and subject to tensile load, applying results to crack propagation in fuselage panels

08 p1413 A69-20743

Tensile stress and energy-to-break values compared for glass-fortified thermoplastic resins, discussing notched and unnotched Izod impact

08 p1337 A69-20488

Displacements and stress intensity as function of crack length for compact tension specimen, considering load line and crack edge

09 p1503 A69-21391

Crack stability under mechanical and thermal stresses, noting critical tensile stress and thermal insulating character of crack

10 p1794 A69-22894

Ultrasonic technique for metal surface and near surface residual stress measurement, emphasizing aluminum alloys

10 p1794 A69-23052

Buckling deformation and stress fields around central slits in photoelastic models and metal sheets under tensile load

10 p1796 A69-23069

Yield points compared for axial and biaxial tensile loading of aluminum alloy sheets

10 p1801 A69-23845

Compact device for low temperature neutron irradiation of deformed specimens under tensile stress, emphasizing specimen carrier

11 p1862 A69-24901

Flat bar optimal cross section under tensile stress applied to minimize stress in large structural components using elasticity theory

11 p1986 A69-25203

Stresses and displacements in half plane with edge crack given as eigenfunction expansions using Wiener Hopf technique

11 p1987 A69-25438

Compressive and tensile creep of metals, discussing compressive stress, void nucleation, barreling specimen shape and platen lubrication

12 p2175 A69-25836

Plane stress state in plate with different glide modulus during tension and compression, considering axisymmetrical deformations

12 p2178 A69-26003

Sinusoidal tension and compression radial support system for large solid disk primary mirror, noting pivot design and pad bonding adhesive

12 p2057 A69-26411

Temperature effect on tensile brittle fracture stress of polycrystalline tungsten

12 p2116 A69-27113

Nonlinear theory for whirling of heavy string under constant axial tension, considering orbitally stable modes for eigenvalues of rotation

13 p2359 A69-27266

Spherical stress wave reflected from plane surface discussing tensile stress in target

13 p2366 A69-28229

Critical rotation rates of homogeneous shaft with two bearings under tension, considering shaft mass stretching force magnitude and console disk gyroscopic effect

13 p2269 A69-28332

Ferrous and nonferrous metals shock tensile strength by elastic contact dynamometer, noting diagram shape dependence on stress growth rate

14 p2464 A69-29314

Materials and structural failures under short time compressive loadings, showing structural response to tensile stresses produced by rarefaction waves

15 p2639 A69-30366

Griffith crack in thin plate opened by uniform tension at infinity, discussing effect of ties on stress intensity factor

15 p2710 A69-30800

Plane strain and stress compared for elastoplastic
racked plate in work hardening tension
15 p2710 A69-30811

Plastic expansion in metals due to alternating tor-
sional and static tensile loading
16 p2875 A69-32291

High strength fibers and composite materials for
structural design, considering anisotropy and low ul-
timate tensile strain
16 p2802 A69-32380

Machine for testing vibration stability of polymer
samples subject to tension or compression, noting sta-
bility of plastic during vibration lower than during
static loading
17 p2972 A69-33043

Machine for testing high temperature creep under
variable tensile-compressive stress while maintaining
specimen stability, noting discrepancy between creep
strains in heat resistant alloy
17 p3054 A69-33044

Tension-torsion-compression load testing machine of
technological possibilities and accuracy
[ONERA-TP-596]
17 p2945 A69-33065

Static tensile stresses effect on energy dissipation in
alloys used in compressor blades found dependent on
composition and heat treatment
17 p2991 A69-33934

Mean stresses effect on fatigue strength by
specimens vibratory/tensile mean stress diagram com-
bining Goodman line and Gerber parabola merits with
increased accuracy
17 p3067 A69-34197

Cantilever truncated conical shell stability under ten-
sile stresses solved by strain energy technique
18 p3216 A69-34574

Mechanical machine for fatigue testing flat samples of
thin walled structures under tension and at various
frequency ranges
18 p3118 A69-34833

Stability loss of shells of revolution under axial ten-
sion and radial pressure, considering shells of Gaussian
curvature, calculating critical force
18 p3222 A69-34976

Boundary conditions of orthotropic shell stability
under external pressure and axial tension, analyzing
critical pressure by strain energy method
18 p3222 A69-34977

Tension, bending and buckling torsion in thin walled
beams described by extended beam model considered
as one dimensional continuum
18 p3224 A69-35296

Thin brittle plastic shells mechanical properties differ-
ing under tension and compression described by
solving differential equations in successive approxima-
tion
18 p3224 A69-35327

Fiberglass-reinforced plastics longitudinal and trans-
verse strain relations at various temperatures
18 p3163 A69-35366

Creep behavior of dispersion strengthened Nb base
bcc alloy, studying temperature and stress effects on
steady state creep rate
19 p3343 A69-35924

Keyway stresses in shafts under tension, bending and
torsion, using frozen stress photoelastic technique
19 p3445 A69-36827

Stress distribution in tension specimen notched on
one edge obtained photoelastically for several notch
depth to specimen width ratios, noting Neuber theory
agreement
19 p3447 A69-36859

Residual tensile stress distribution during plasma
spraying determined as function of temperature field in
blank
20 p3548 A69-37328

Viscoelastic materials gradual resilience loss under
tensile stress, discussing mathematical relations
between stress, loading time, elastic deformation and
experimental verification
20 p3625 A69-37600

Tensional and torsional forced vibration tester for
viscoelastic plastic materials under tensile strain
21 p3720 A69-38591

Rectangular plate under biaxial tension stress
analyzed to determine onset of necking and stress-
strain state
22 p4039 A69-39913

Residual stress effect on strength of oriented glass
fiber reinforced plastics under transverse and longitu-
dinal tension
22 p3973 A69-40745

Initial stress dependence on tensile load in glass fiber
reinforced plastic rings during winding
22 p4045 A69-40749

Stress-strain state in infinite medium with cavity
under triaxial tensile force obtained from integrodif-
ferential equation deduced from equilibrium equation
23 p4226 A69-41703

Isometric recording device for tensile stresses on
muscle preparations in vitro, based on differential
transformer
23 p4111 A69-42056

Sand erosion behavior of metals and plastics in air
blast rig under varying exposure time, angles of impact
and tensile stress
24 p4363 A69-42787

TENSILE TESTS

Creep and stress rupture strength of unidirectional
glass fiber reinforced plastics, using tensile tests
01 p0101 A69-10080

Composite material mechanical failure due to
detachment of microfiber ends from elastic matrix
while under tension
01 p0171 A69-11259

Mechanical properties of titanium physically vapor
deposited by electron beam high rate evaporation, not-
ing results of tension testing
03 p0443 A69-13117

Evaluation tests of fixed frequency variable tension
vibroscope for filaments and wires, noting instrument
errors and corrections
04 p0599 A69-15018

Shear type fracture formation mechanism in tensile
test specimens of Ti alloys, noting transition in
macrogeometry
04 p0617 A69-15076

Strain dependent modulus and Poisson ratio
behavior of CTPB propellant, performing stress relaxa-
tion tests
04 p0646 A69-15510

Hydrostatic tension test of brittle material using
spherical specimen bonded into center of cube of
matrix material
05 p0784 A69-16434

Plastic fractures of age hardened aluminum alloys
analyzed by tensile tests and electron fractography,
considering stresses, surface and intergranular effects
07 p1166 A69-18961

High temperature vacuum tensile test device for con-
tinuously direct recording various stress-strain diagram
rates by interchangeable dynamometer scale
07 p1117 A69-19319

Foil type strain gage for measurement of tangential
strains along circumference of hole in plate under
uniaxial and equibiaxial tension
08 p1314 A69-20258

Four point flexure, ring flexure and NOL ring tension
tests for evaluation of composite material mechanical
properties
09 p1499 A69-22308

Deformation of thermoplastics under tensile loading,
discussing types of loading
10 p1716 A69-22942

Crack propagation in plates and shells subjected to
bending and direct loading, noting plate analysis
modification for crack touching on compression side
10 p1795 A69-23061

Elongational viscosity coefficient determined from
tensile measurements of materials under applied stress
10 p1681 A69-23976

Stress corrosion cracking of Ti-6Al-4V alloy tensile
tested in anhydrous methanol by electron fractography
and diffraction, noting hydrogen embrittlement
11 p1903 A69-24576

Plastic strains in aluminum alloy under biaxial tensile
and combined tensile and torsion tests, discussing small
elastoplastic deformation theory
11 p1905 A69-24948

Elastic and elastoplastic strains in materials under
various loadings, determining temperature variations
by thermoelectric method and verifying by tensile tests
11 p1985 A69-25178

Testing machines for metallic materials, discussing
design criteria and application to tensile strength,
vibration and durability test machines
[DVL-865]
11 p1889 A69-25682

Hydrogen embrittlement of stainless steel and effects
on mechanical properties, discussing martensitic phase
role
12 p2115 A69-26616

Neutron irradiated Nb single crystals tensile tested
over temperature range, discussing athermal radiation
hardening
13 p2275 A69-27368

End constraints and length/width ratio influence on
composites off axis tensile tests, considering rigid
clamping with/without end rotation
13 p2286 A69-28667

Rolling direction tensile tests of alloy steel plate dis-
playing various fracture configurations over distinct
temperature ranges, noting stress state, void formation
and anisotropy
[ASME PAPER 68-WA/MET-1]
14 p2464 A69-29440

Impact testing machine with dropping load, noting
provision for sample fastening to reduce reflected ten-
sile wave effect
15 p2583 A69-30286

Necked tension specimens profiles for rigid-plastic
nonhardening materials determined from compatibility
equation for displacements and unloading rate
15 p2704 A69-30292

Thick walled pressurized cylinder fatigue test results
compared with axial tension and rotating beam tests on
same material
15 p2709 A69-30676

Titanium alloy tensile specimens tests in air,
methanol and anhydrous methanol environments at
known stress-strain-time relations examined by frac-
tography and high resolution electron diffraction
16 p2799 A69-31718

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting
tensile, fretting and abrasion tests on stressed and ther-
mal cycled specimens
[AIAA PAPER 69-585]
16 p2803 A69-32760

Fracture strength of Al alloys, discussing tests for
tensile properties, linear elastic fracture mechanics
techniques, yield strength, corrosive media, etc
17 p2989 A69-33555

Testing machine for in vacuo tensile testing of tubu-
lar metallic specimens at high temperatures and low
pressures
18 p3117 A69-34604

Tensile tests on time dependent Pb and cellulose
nitrate, including stress-strain curve prediction from
creep test data
19 p3445 A69-36829

Reinforcement unbonding onset in composite
materials determined by continuous dynamic moduli
and damping measurements of tensile specimens
20 p3511 A69-37761

Finite element analysis and strain gage results to ver-
ify end constraint on off-axis tensile coupons and to
design test specimen
20 p3628 A69-37775

Tensile strength of glass and graphite fibers for fiber
reinforced plastics /FRP/ tested with modified balance
type and strain gage type tensile testers
21 p3753 A69-39799

Tension tests of polycarbonate plates grooved at
various angles, demonstrating necking dependence on
mechanical instability
21 p3753 A69-39809

High temperature electronic tensile testing device
utilizing SCR to study strain rate effect on metals prop-
erties
21 p3727 A69-39811

Grids applied to plastic samples for strain measure-
ment using moire fringe method, comparing tensile test
results with Linley extensometer
22 p4042 A69-40312

Uniaxial tensile testing machine to operate under
combined creep and fatigue conditions for studying
dislocation structure changes in metals and alloys at
high temperature
22 p3926 A69-40441

Tensile cryostat for low temperature strain measure-
ment, discussing design, insulation and vacuum sealed
environment for heat leak reduction
[NAS-NRC PAPER J-3]
22 p3947 A69-40627

Tensile test facility for specific strain rate range, ap-
plying impact load to sample end with high speed
striker accelerated by explosive energy
23 p4147 A69-41710

Fracture toughness and crack propagation in an-
nealed aircraft titanium alloys tested per ASTM
procedure, comparing results with high strength steels
and aluminum alloys
23 p4177 A69-42165

Cylindrical steel specimens high strain rate tensile
tests, using Malvern theory for ideal elastoplastic and
work hardened materials
23 p4236 A69-42529

Room temperature tensile tests determining failure
modes and defect influence on diffusion welds of unal-
loyed Ti, using electron microscopy and fractography
24 p4331 A69-42939

Tensile tests on fiber reinforced plates with circular
holes, studying fiber orientation effects
24 p4404 A69-43602

TENSIOMETERS

Tensiometric aerodynamic balances in great velocity
ranges, discussing measurements, elastic elements and

TENSION TESTERS

tensiometric balance construction and measuring errors nature

05 p0762 A69-15922

Muscle function measurement in astronauts using electromyogram, electrocardiogram and isometric tension at fixed percentage of maximum voluntary contraction

23 p4103 A69-41684

TENSION TESTERS

U TENSILE TESTS

TENSOR ANALYSIS

Invariant theory of gravitational radiation, using impulse energy tensor

02 p0332 A69-12835

Inhomogeneities in materially uniform simple bodies described in terms of third order tensor field, treating contorted aeolotropy

05 p0833 A69-15728

Tensor partial differential equations having spherical symmetry, examining covariant differentiation and contraction of tensors

07 p1123 A69-18807

Brans-Dicke scalar-tensor theory, showing radiative Riemann tensor existence in absence of usual spin-2 gravitational waves

07 p1216 A69-18894

Second order tensor describing deformation of particles of continuum determined by functional, noting invariance restrictions

08 p1416 A69-20690

Plasma conductivity tensor components in crossed fields calculated by Boltzmann kinetic equation, noting influence of magnetic field presence

09 p1546 A69-21565

Geometrized theory of combined gravitational and electromagnetic fields, using metric tensor of four dimensional Riemannian continuum to describe both fields

09 p1540 A69-22134

Relativistic energy momentum tensor of electromagnetic field in moving multicomponent dispersive media and instability of wave

10 p1653 A69-23193

Green tensor construction for systems of linear differential equations with constant coefficients

11 p1996 A69-25730

Dynamic relaxation method for elastic deformation in mirrors, using tensor equations of elasticity in nonorthogonal curvilinear coordinates

12 p2187 A69-26890

Turbulent fluid flow analysis described by Navier-Stokes equations, introducing asymmetric tensors for anisotropic cases

13 p2297 A69-27289

Tensor conductivity measured and analyzed for MHD generator duct with electric and magnetic fields

13 p2309 A69-28026

Tensor analysis of four photon interaction in rarefied plasma in magnetic field, determining cubic current of plasma wave self action

13 p2314 A69-28444

Nondeformable closed contour spatial gear kinematics using matrix tensor method suitable for computer programming

15 p2713 A69-31020

Fourth rank tensors analysis describing nonlinear optical effects for 32 classes of crystalline substances

19 p3334 A69-35882

Space transitions identified with asymptotic solutions at system field equations transition points

19 p3445 A69-36811

Isotropic strain tensor general theory based on isotropy between second order asymmetric tensors reducible to finite form

20 p3624 A69-37584

Holor algebra with tensor notations applied to elastic structures/discrete systems/, discussing inertia and stiffness tensors

21 p3831 A69-38415

Laser design for smooth emission frequency retuning, discussing equations for laser field oscillations, two photon resonance, tensor analysis, quantum emission, etc

21 p3739 A69-39539

Tensor analysis of brushless DC motor controlled by transistors, discussing torque phase, torque variation phase and efficiency phase characteristics

24 p4255 A69-42678

TENSOR FIELDS

U TENSORS

TENSORS

NT STRESS TENSORS

Asymptotic behavior of curvature and conformal curvature tensors on asymptotically flat space-time

01 p0116 A69-10393

Tensor character of fictitious potential function introduced to approximate locally tangent actual potential function, discussing planetary gravitational anomaly observation from orbiting vehicles

[AAS PAPER 68-198] 02 p0312 A69-11476

Magnetoionic propagation of signals in magnetosphere using Maxwell equations and tensor quantities, linking to Hall, transverse and longitudinal conductivities

[ONERA-TP-593] 02 p0236 A69-11617

Electric field induced IR absorption and Raman scattering by optical phonons in centrosymmetric crystals, discussing tensor coefficients

02 p0295 A69-11779

Green tensor for collisionless plasma, emphasizing relations between outgoing and ingoing electric fields

02 p0293 A69-12745

Electromagnetic and gravitational tensor fields in Riemannian space, generalizing Maxwell and Bel-Robinson tensors

03 p0467 A69-13755

Conformal change and connection relations in Einstein unified field theory, noting tensor applications

03 p0467 A69-13756

Viscosity coefficient tensor in terms of autocorrelation functions, using linear reaction theory of mechanical disturbances

05 p0794 A69-15785

Plane surface finite area deformation tensors in continuum mechanics permitting separation of volume and shape changes in constitutive equations

11 p1994 A69-25603

Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristic of pulverized material representing gravitational fields

13 p2298 A69-27796

Anisotropic scattering of current carriers in semiconductors, obtaining general expression for mobility tensor with variational principle

14 p2508 A69-29667

Conductivity tensor of collisional plasma in magnetic field, basing method on iterative procedure

14 p2503 A69-29999

Electrical conductivity tensor of many component collisional relativistic plasma in magnetic field and near equilibrium, expressing collisional part as momentum integral

14 p2503 A69-30000

Viscosity coefficient tensor in terms of autocorrelation functions, using linear reaction theory of mechanical disturbances

18 p3173 A69-35037

Relativistic tensor theories of gravitation in flat space with Neumann and Newton forms of gravitational potential, deriving expressions to estimate differences perceived by observer

19 p3373 A69-36204

Two point tensor function symmetries of nonlocal cohesive finite elastic materials determined from atomic lattice theory, obtaining Green function

19 p3444 A69-36798

Guiding center Vlasov equation derived dielectric tensor of collisionless plasma, obtaining dispersion relation of Alfvén waves in warm plasma

23 p4197 A69-42416

TERBIUM

Nonradiative transfer of excitation energy between mixed trinuclear complexes of Tb and Eu ions with lactose in aqueous solution

01 p0023 A69-10288

TERMINAL BALLISTICS

Perforation and penetration mechanisms of Styrofoam slabs, using impact tests with free falling and rifle powered projectiles

01 p0165 A69-10115

Meteoroid penetration detector development program for spacecraft construction, discussing design, materials and environmental tests

02 p0338 A69-11749

Trailing camera technique to photograph impact and projectile penetration into earth materials from above and behind test vehicle

02 p0227 A69-11760

Terradynamic research program for studying instrumented projectile penetration of terrestrial materials

02 p0228 A69-11767

Transient response of targets subjected to hypervelocity impacts and quantitative aspects of impact process, noting study of wax targets interiors

07 p1234 A69-19380

Projectile impacts into laminated targets consisting of plastic layers backed by Al substrates using SHAL code with hydrodynamic elastoplastic distortion model

[AIAA PAPER 69-356] 13 p2366 A69-28235

High pressure Hugoniot points made by hypervelocity gas gun, using laser beams to measure impact velocity and pressure transducer for impact stress

[AIAA PAPER 69-358] 13 p2264 A69-28232

Hypervelocity impact dynamics on copper cube targets imbedded with nickel wires, discussing terminal positions, Vickers hardness, flow fields, etc

[AIAA PAPER 69-368] 13 p2367 A69-28231

Aluminum double sheet target penetration resistance determined by studying high velocity pyrex glass impact effects on front/rear sheets and spacing

[AIAA PAPER 69-375] 13 p2367 A69-28230

Cylindrically shaped projectiles low velocity impact upon horizontal surface of dry commercial Ottawa sand mass, estimating penetration for soft landing

21 p3839 A69-39232

TERMINAL FACILITIES

Redevelopment program for Newark airport noting runway construction, underground fuel system and passenger terminal complex

01 p0057 A69-11272

Fitting airport interfaces to air traffic, considering bottleneck elimination

05 p0742 A69-15915

Cost estimating relationships for vertiports and airports, comparing terminal costs per passenger for each facility

[AIAA PAPER 69-208] 07 p1245 A69-19566

Mathematical models for outgoing traffic flow in airport terminal used for determining service requirements

09 p1476 A69-21433

Air cargo transportation in 1970s, discussing Boeing 747 and Lockheed 500 super airfreighters, terminal rates, marketing, etc

13 p2381 A69-27333

Air cargo terminal materials handling, discussing computer control, off-airport consolidation, packaging, etc

13 p2239 A69-27332

Experimental SST terminal for satellite L band communications/surveillance ATC system, establishing terminal requirements for NASA and FAA studies

17 p2932 A69-34111

Airport planning for large aircraft loading of passengers, baggage and cargo containers

17 p2948 A69-34201

Aircraft design determined by airport environment and facilities defined as pavement strength, passenger and baggage loading and aircraft handling, noting noise abatement

17 p2948 A69-34201

Airport performance, noise and aircraft utilization influence on aircraft design and operating costs stressing takeoff distance, obstacle clearance and noise regulations

17 p2948 A69-34211

Air terminals plans for 1975 aircraft and air traffic based on runway configurations

[AIAA PAPER 69-805] 19 p3288 A69-35599

Airport alternate facilities, restrictive flight schedules and fee schedules for relieving airport congestion during peak traffic hours

[AIAA PAPER 69-820] 19 p3453 A69-35599

Mass transit rail service between Manhattan and Kennedy Airport using Long Island Railroad mainline route, discussing baggage handling and time schedules

[AIAA PAPER 69-803] 19 p3453 A69-35599

Air travel and population growth requiring large structures for office buildings, airport passenger terminals and aircraft servicing facilities

[AIAA PAPER 69-809] 19 p3289 A69-35622

Airport facilities planning for conventional jet STOL and SST aircraft ground handling, stressing facilities economy and transportation subsystems

[AIAA PAPER 69-808] 19 p3289 A69-35622

FAA ARTS-III terminal air traffic control system reliability and maintainability, discussing module addition

19 p3370 A69-36000

Jumbo jet passenger loading devices including overwing bridges, transporters and terminal integration

20 p3511 A69-37919

Air traffic systems and diminishing airspace capacity problems requiring additional airport facilities and STOL aircraft

22 p3925 A69-40422

Airport location effect on facilities supply factors including atmospheric, environmental and economic conditions

22 p3926 A69-40431

Handling and processing function in air freight transportation, discussing system design approaches, cargo terminals, materials handling systems and containerization

22 p4053 A69-40483

Airport standards analysis for safe, efficient air carrier operations including airport funding, safety programs for runways and terminal facilities

22 p4054 A69-41144

Terminal facilities planning for STOL service to meet traffic demand, considering site selection, runway alignment, aircraft noise, ground accessibility, etc [SAE PAPER 690421]

23 p4147 A69-41645

Airport terminal planning, considering expansion, automation, backup measures, layout problems and solutions, etc [SAE PAPER 690399]

23 p4147 A69-41661

Air space saturation, urban surface transport network enlargement necessity and expeditious passenger processing and baggage handling

24 p4296 A69-42567

General aviation airport application as freight consolidation terminals to reduce ground handling costs, circumvent air and ground traffic problems, etc

24 p4419 A69-43047

TERMINAL GUIDANCE

Multiengine Martian soft lander guidance and control system design with single engine failure accommodation based on six degrees of freedom computer simulation

02 p0277 A69-11740

Virtual or projected miss distance for assessment of missile homing impairment effects, deriving expression based on kinematics

04 p0629 A69-15517

Electronic terminal guidance requirements for all-weather VTOL operations, suggesting future first generation landing system

08 p1348 A69-21064

Optimal navigation system for supersonic Concorde aircraft, discussing in-flight and terminal navigation methods

14 p2480 A69-29859

Law for time variations of modulus-restricted control action at trajectory end, two point boundary value problem solution and use of Pontryagin principle

18 p3175 A69-35324

Manual procedures for midcourse and terminal guidance, discussing onboard optical measurements and calculations

19 p3368 A69-35792

Subsonic glide landing approach guidance for unpowered lifting vehicles, using perturbation feedback and approximation of heading and position coordinates [AIAA PAPER 69-865]

21 p3763 A69-39391

Electronic terminal guidance requirements for all-weather VTOL operations, suggesting future first generation landing system

22 p3978 A69-39875

TERMINAL VELOCITY

Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles

03 p0521 A69-13670

Terminal velocities of dust particles for two Venus atmospheric models from Mariner 5 and Venera 4 data, obtaining vertical wind velocity requirements

06 p1001 A69-17172

Drop test method to obtain subsonic terminal velocity and base pressure data for planetary entry probe configurations

19 p3238 A69-35959

TERMINATING

U STOPPING

TERMINOLOGY

Reliability terms for electrical apparatus, equipment and systems, indicating need for international standardization

08 p1292 A69-21108

TERNARY ALLOYS

Chemical vapor deposition of W-Mo-Re ternary alloys from hydrogen reduction of fluorides on Cu or Mo substrates

01 p0096 A69-10642

Metallographic analysis of Zr corner structure in Zr-Al-Mo system phase diagram, plotting monovariant and nonvariant equilibria reactions

02 p0261 A69-11840

Zr corner of phase diagrams and microstructure, hardness and microhardness of Zr-Al-Nb system alloys

02 p0261 A69-11841

Zirconium corner of Zr-Al-Cr system phase diagram within concentration limits from 1350-700 C, considering corrosion resistance

02 p0262 A69-11842

Metallographic and radiographic analysis of zirconium corner in Zr-Be-Nb system, discussing phase transformation during quenching

02 p0262 A69-11843

Zr-Be-Nb alloys mechanical tensile properties above room temperature for low concentrations of Be and Nb

02 p0262 A69-11845

Isothermal sections construction of zirconium corner of ternary phase diagram of Zr-Mo-V system from microstructure of cast and quenched alloy specimens

02 p0262 A69-11846

Structure of zirconium corner of Zr-V-Ni system phase diagram, using metallography, hardness and microhardness methods

02 p0262 A69-11847

Alloying additions effect on mechanical properties of Zr-V-Nb system

02 p0263 A69-11849

Zirconium corner of Zr-Fe-Nb phase diagram, studying alloy tempering at various temperatures

02 p0263 A69-11851

Zirconium corner of Zr-Cu-Mo phase diagram, using microstructure analysis of hardness and microhardness measurements, discussing plasticity variations and corrosion resistance

02 p0263 A69-11852

Fe, Ni and Cr influence on corrosion resistance and mechanical properties of Zr-Cu-Mo system alloys

02 p0263 A69-11853

Zirconium corner in Zr-Nb-Cu phase diagram, plotting isothermal sections for high temperatures

02 p0263 A69-11854

Oxidation resistance of Zr-Nb-Mo alloys at high temperature in air or water

02 p0264 A69-11857

Isothermal sections of Zr corner of Zr-Mo-Ta system phase diagram at high temperatures, noting composition vs hardness and omega phase

02 p0264 A69-11858

Isothermal sections of Zr corner of Zr-Mo-Ti phase diagram at various high temperatures, noting corrosion resistance in air and water

02 p0264 A69-11859

Isothermal sections of Zr-Ni-Nb system phase diagram at high temperatures, determining principal type of projection on concentration triangle

02 p0264 A69-11860

Isothermal sections of Zr corner of Zr-Nb-Cr system phase diagram at high temperatures, noting variation of stability with concentration

02 p0264 A69-11861

Al/Zn/Mg alloys preprecipitation, discussing Guinier-Preston and critical zone sizes and reversible vacancy trap

03 p0447 A69-13613

Aging of iron-nickel-titanium alloys during heating in reverse martensitic alpha to gamma transformation process, investigating phase parameter changes

04 p0613 A69-14558

Heat treatment effects on stress corrosion cracking resistance of Al-Zn-Mg alloys, using cantilever loading in aqueous solution

04 p0617 A69-14933

Be, Ce, V and Ti additions effect on oxidizability of cast, forged and cold worked Nb-Cr-Mo alloys

04 p0618 A69-15081

Solid phase equilibria in nickel-aluminum-scandium system at 1000 C

05 p0779 A69-15833

Nitrogen solubility in liquid Fe-Cr-Ni alloys increases with increased Cr concentration between 1550-1700 C and at one atm N pressure

06 p0942 A69-17229

Alloying elements effect on nitrogen solubility in liquid Fe-Cr-Ni alloys, defining quantitatively changes in solubility

06 p0943 A69-17234

Surface preparation effects on Ni-Cr-Fe alloy boundary friction studied by repeated sliding of cylinders on hard Pd-Pt-Au alloy cylinder [ASLE PREPRINT 68AM 6D-4]

07 p1139 A69-18625

Ti-Al-V alloys phase diagrams for isothermal cross sections and polythermal cross sections with constant Al/V ratios

07 p1161 A69-18768

Ti-Zr-Sn alloys phase equilibria and interaction between titanium stannide and solid solution of Ti and Zr

07 p1162 A69-18770

Thermal and metallographic analyses of Ti-Zr-Al system vertical sections close to Ti-Al edge, considering phase equilibrium

07 p1162 A69-18771

Grain size dependence of yield, flow and fracture stresses of Fe-Co-V alloy for 77-298 K

07 p1166 A69-19264

Polycrystalline Mg-Th-Zr alloy precipitation hardening investigated by tensile and hardness tests and transmission electron microscopy

07 p1167 A69-19265

Controlled solidification in Co-Ta-C system to develop pseudobinary eutectic mixture containing TaC crystals aligned parallel to growth direction [ONERA-TP-673]

07 p1167 A69-19339

Czechoslovakian heat resistant iron-carbon-aluminum alloy Pyroferal, properties and applications

07 p1168 A69-19345

Forging and heat treatment parameters effect on Ti-Al-V alloy low cycle fatigue properties, relating crack initiation and propagation rates to microstructures [ASM PAPER D8-24.4]

07 p1169 A69-19669

Nb-Zr-Cr alloys solidus surface and isothermal sections, using optical pyrometry, microstructural and X ray analyses

08 p1333 A69-20440

Dislocation damping measurements made on Fe-18Cr-Ni alloys, noting damping relation to nickel content and stacking fault

08 p1334 A69-20576

Crystal lattice and orientation of precipitate responsible for hardening water quenched Ni-Cr-Nb alloy

08 p1369 A69-20852

Carbidothemic production of metals and binary and ternary alloys, discussing eutectic properties

09 p1514 A69-22731

Supersaturation of dissolved B in splat quenched Fe-Ni-B alloys, noting interstitial and substitutional B in martensitic and austenitic phases

10 p1707 A69-22987

Omega phase transformation in binary and ternary Zr alloys after water quenching from within /alpha plus beta/ phase region

10 p1707 A69-22988

V phase structure and V and E phase lattice constants for ternary systems /Ti, Zr, Nb or Ta-/Ni, Co or Fe-/Si or Ge/

10 p1708 A69-22992

Stress corrosion of nonage-hardenable Al-Mg-Cr alloy investigated for failure in absence of grain boundary precipitate, using notched specimens

10 p1709 A69-23055

Composition and sintering temperature cooling effects on fracture properties of W-Ni-Fe alloys, using electron microscope fractography

10 p1711 A69-23333

Initial aging stage in Fe-Ni-Ti alloys using diffuse X ray scattering with electron microscopy of thin foils

10 p1712 A69-23720

Chromium-rhenium-boron ternary system using X ray diffraction and microstructure analysis, establishing phase equilibria at high temperatures

10 p1715 A69-24054

Zirconium-rhenium-carbon ternary system, determining resistivity of melted alloys, discussing eutectic quasi-binary compounds

10 p1715 A69-24055

Thermal and microstructural analyses to determine phase interactions nature in Mg alloys of Mg- Nd-Al system

11 p1902 A69-24271

Superstructures in multicomponent alloys, transition mode and temperature, ordered state and atomic interactions

11 p1937 A69-24703

Young modulus temperature dependence and order-disorder transformations in ternary nickel alloys

11 p1904 A69-24705

Thermal expansion coefficients of Nb-Zr-Ti alloy and plexiglass at 10-300 K from dilatometric measurements

11 p1905 A69-24917

Matrix grain size relation to dispersed particle size distribution and Zener-McLean equation description of microduplex structure in superplastic Ni-Fe-Cr alloy

13 p2278 A69-27411

Low cycle fatigue crack initiation in Ti-6Al-4V at room and high temperatures and in aqueous salt environment

13 p2278 A69-27413

Heats of solution of Ag and Cu in dilute Ag-Cu-Sn alloys at 720 K, using liquid metal-solution calorimeter
13 p2279 A69-27759

Phase diagram for physicochemical study of CdSb-Ge cross section of Cd-Sb-Ge ternary system, discussing exo-endothermal fusion effects, microstructure, etc
14 p2503 A69-28975

Stress corrosion resistance of AlZnMgCu and AlZnMg alloys, discussing combinations of alloy composition, heat treatment and stable precipitation conditions
16 p2800 A69-31779

Heats of solution of Au and Cu in dilute Au-Cu-Sn alloys determined using liquid metal solution calorimeter, calculating self interaction coefficients
17 p2987 A69-33077

Heat treatment effect on stress corrosion cracking of ternary Al-Zn-Mg alloys noting aging strength, solution temperature, quenching rate and alloy content
17 p2990 A69-33676

Nb corner of Nb-Mo-Cr alloy phase diagram and oxidizability in air at high temperature
18 p3157 A69-35248

Isothermal and thermal martensite transformations on polished surfaces of Fe-Ni-Mo alloys
19 p3344 A69-35983

Heat treatment effects on mechanical properties of Ti-Fe and Ti-Fe-Al alloys
19 p3344 A69-36151

Glassy semiconductors from metallic alloy binary and ternary systems of sulfide, selenide and telluride noting properties
19 p3392 A69-36641

Electrochemical analysis of stress corrosion cracking in Al-Zn-Mg alloy, noting oxide film growth at grain boundary
19 p3351 A69-36899

Phase transformations and strengthening mechanisms in Ti-Al-V alloy
20 p3556 A69-36954

Processing variables influence on microstructure of extruded Ti-Al-Sn alloy, noting deformation by slip over temperature range
20 p3557 A69-36955

Reactivity of hydrogen with surface of Ti-Al-V alloy under fatigue cycling at ambient and cryogenic temperatures
20 p3557 A69-36960

Supersaturated solid solution decomposition in Ni-Cr-Ti system, discussing precipitation mechanism of eta phase
20 p3558 A69-36968

Nb-Ti-C alloys electrical resistivity and thermal EMF noting nearly linear variations with temperature
20 p3558 A69-36976

Ti-Al-V fasteners heat treated in beta field, showing superior mechanical properties to samples treated in alpha plus beta field
21 p3729 A69-38661

Texture hardening combined with age hardening for biaxial strength improvement of Ti-Al-V alloy, discussing applications to spherical pressure vessels
21 p3729 A69-38662

Age hardening response of Mg-Th-Zr alloy at 60-450 C, discussing peak strengthening, superlattice formation, precipitation processes, etc
21 p3743 A69-38735

Flow stress temperature dependence of Ni-Cr-Al alloys consisting of gamma prime dispersion in Ni base solid solution
21 p3744 A69-38738

Plastic deformation combined effect with aging on mechanical properties of phase-hardened austenitic Fe-Ni-Ti alloys
21 p3746 A69-38956

Ti-Al-V forgings macro/prior beta/ grain size and in-process thermal treatment effects on fatigue life [AIME PAPER S69-2]
21 p3732 A69-39470

Weldability of alloy Ni-Cr-Fe base-filler alloy combinations, noting threaded mold test and surface fissures
22 p3968 A69-39886

Aluminothemic reduction of Ti and Ni oxides for obtaining Ti-Ni-Al system
22 p3969 A69-40070

Heat treated Ti-Al-Fe alloys thermal, microstructural and X ray analyses of phase transformations in Ti-rich corner
22 p3969 A69-40074

Fusibility diagrams for Ti-Ta-Cr by determining specimens melting points after homogenization at various temperatures in argon
22 p3969 A69-40075

Equilibrium vapor compositions and activities over Fe-Cr-Ni alloys at 1600 C determined by collecting effusate from thoria Knudsen cells
23 p4175 A69-41503

Coherent matrix precipitates observation in Fe-Ni-Cr alloy by transmission electron microscopy, discussing yield strength and elongation dependence on aging conditions
23 p4176 A69-41508

Al-Mn-V ternary system equilibrium diagram at various aluminum concentrations determined by magnetic and microhardness measurements, microstructural observations and X ray analysis
24 p4330 A69-42601

TERNARY SYSTEMS

Zr-Be-Nb system oxidation resistance decrease at 650 degrees C ascribed to Be and Nb additions
02 p0262 A69-11844

Zirconium corner of Zr-Mo-Ni phase diagram using metallographic analysis, hardness and microhardness methods, constructing isothermal sections for high temperatures
02 p0264 A69-11855

Zirconium corner of Zr-Nb-Mo system phase diagram, using microstructure, microhardness, hardness and radiographic methods
02 p0264 A69-11856

Nickel-rich region of Al-Ni-Y ternary system, emphasizing identification of solid phase equilibria through analysis of equilibrated alloy specimens
02 p0265 A69-12004

Phase diagram and heat resistance relation for ternary titanium alloys, considering component interactions and dissolution and dispersion effects
02 p0268 A69-12357

Thermodynamic properties of binary and ternary liquid metal systems, noting electromotive force and vapor pressure measurements
07 p1165 A69-18939

Phase equilibria in V-Cr-C, Nb-Cr-C and Ta-Cr-C systems determined by microscope and X ray analyses
09 p1523 A69-21872

Correlation between interfacial tension in binary and ternary systems and reciprocal solubility of bulk phases, assuming concentration as function of thickness
09 p1448 A69-21909

Phase equilibrium in cast Zr-Re-B and W-Re-B systems using microscopic and X ray analysis
10 p1711 A69-23332

Preliminary natural aging effects on maximum strength properties obtained at various artificial aging temperatures for aluminum ternary alloy
11 p1905 A69-24921

Aluminum additive effects on copper-titanium alloy decomposition, discussing Guinier complexes, heterogeneous nucleation, plastic deformation and low temperature aging
11 p1905 A69-24922

Phase equilibria in ternary systems Nb-Fe-B and Nb-Co-B, determining structural types and lattice constants by using X ray and microstructural analysis
15 p2641 A69-31246

Chromium ternary systems phase diagrams and crystallographic structures, using heat treatment and X ray analysis
18 p3158 A69-35262

Cu-Cd-S photovoltaic cell models correlated, reporting spectral response and electron microprobe test results
19 p3382 A69-35682

In-Te-Se system alloys structure and semiconductor properties analyzed by X rays
21 p3779 A69-38579

Melt cooling rates effect on supersaturated solid solutions in Al ternary systems
21 p3745 A69-38955

Adsorption kinetics in ternary mixture of nitrogen, methane and hydrogen, using concentration-time/breakthrough/curves measurement on activated coconut shell charcoal [NAS-NRC PAPER H-4]
22 p3981 A69-40629

TERNARY SYSTEMS [DIGITAL]

U DIGITAL SYSTEMS

TERRADYNAMICS

Atmospheric circulation influence on earth rotation velocity, discussing estimation methods
02 p0236 A69-11641

Terradynamic research program for studying instrumented projectile penetration of terrestrial materials
02 p0228 A69-11767

Seismic wave generation, propagation, dispersion and attenuation in gravitating sphere having

homogeneous elastic mantle and liquid core, giving theoretical seismograms
02 p0243 A69-12019

Trouton-Noble experiment to detect motion of earth through ether by electromagnetic torque on charged suspended parallel plate capacitor, explaining null results
03 p0517 A69-14106

Mathematical theory of electromagnetic induction for spherical model of earth with conductivity distribution given by sine function
06 p0921 A69-17718

Royal Belgian Observatory studies on time, meridian, seismological and gravimetric services, latitude variation due to polar motion, terrestrial tides among geodetic satellites
08 p1306 A69-19929

Thermal convection in earth mantle with temperature and pressure dependent viscosity, considering mechanisms for fluid-like mantle
10 p1682 A69-23412

TERRAIN

Terrain influence in ground wave propagation evaluated by two dimensional diffraction and scattering problems, using Airy type wave functions [AFCRL-68-0212]
01 p0033 A69-109707

Spectral brightness of clouds and various terrains in visible and near IR regions measured from aircraft
06 p0953 A69-179911

Stellar image vibration dependence on zenith distances and terrain relief determined from stellar traces by 200 mm telescope
15 p2647 A69-30163

Steady state baroclinic boundary layer over two dimensional terrain in f plane, noting layer thickness dependence on stability and terrain slope
24 p4347 A69-43356

TERRAIN ANALYSIS

Aerial color photography for terrain analysis noting development of cameras, filters, high speed emulsions and processing equipment
01 p0077 A69-10023

Passive and active transmitters and receivers of electromagnetic radiation in earth orbital satellites to collect pictorial or numerical data to study hydrology [UN PAPER 68-95333]
01 p0064 A69-10481

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
02 p0207 A69-11669

Broadband null balancing microwave scanning radiometer using diode in feedback loop as reference noise source
02 p0221 A69-12457

Lineament trend analysis of Gemini Red Sea synoptic terrain photography, noting computerized rotation from apparent to true angles
02 p0247 A69-12808

Geophysical investigations on manned orbital space laboratories, discussing space photography, spectrophotometry, terrain pictures and aerosol layers
05 p0759 A69-16633

Relative orientation elements of aerial photographs determined by iteration method
05 p0765 A69-16708

Mars surface features identification from comparison of Mariner 4 and ground bases telescopic photographs
07 p1213 A69-18605

Space photography as sedimentological research tool demonstrated by space photographs application to projected Mars mission
09 p1490 A69-21797

Multispectral photographic determination of reflectance of environmental features from aerial spectral photographs, noting EROS program application
11 p1880 A69-24266

Signal processing and DC restoration in line scan devices used in land/water terrain analysis
12 p2096 A69-26980

Radiophase mapping utilizing VLF radio signals to detect conductive sheets and surface impedance of earth
12 p2075 A69-26982

Space photography for natural resource inventory, describing Gemini photographs role in assessing vegetation, geological, metal and soil resources in Western Hemisphere
12 p2097 A69-26987

Radar remote sensing for terrain data acquisition
12 p2098 A69-27005

Terrain photography applications and analysis including remote sensing of photographic systems and photointerpretation
12 p2098 A69-27006

Airborne IR surveys in engineering studies of terrain, discussing instrumentation technology, data interpretability, economic feasibility, etc
12 p2098 A69-27007

Microwave radiometric brightness temperature relationship to soil moisture content for estimating bearing strength
12 p2099 A69-27008

Side-looking airborne radars (SLAR) application to geological exploration of remote unmapped areas
12 p2099 A69-27009

Data analysis techniques for discrimination and identification of terrain surfaces from radar scatterometry information
12 p2099 A69-27010

Lunar topography harmonic analysis, noting sample point density and evenness variations effects on estimated coefficients
13 p2344 A69-27647

Terrain roughness effect on ionospheric radio wave absorption measurement data compared with theoretical results
13 p2224 A69-28700

Remote sensor imaging techniques for simultaneous radar, IR and visible electromagnetic spectra of extensive land areas, presenting two clustering algorithms for multiple images
14 p2448 A69-29533

Integrated landscape analysis with radar imagery for earth resources
15 p2608 A69-30454

Regional slope measurement from two monoscopic radar images of same terrain area, discussing accuracy and applications to geomorphology and hydrology
15 p2610 A69-30710

Digital method to produce radar reflectivity from analog audio frequency Doppler data extracted from terrain echo signal of CW scatterometer radar
15 p2572 A69-31111

European geostationary satellite orbit inclination and eccentricity modification for maximum observation time of Northern Hemisphere by high resolution IR radiometer
15 p2650 A69-31389

Mathematical model for determining time dependent terrain surface temperatures and radiances, considering radiative transfer convection, evaporation, ground vegetation temperature, etc
17 p3071 A69-33263

Gemini program for geologic orbital photography, discussing equipment used
18 p3131 A69-35274

Satellite IR hyperaltitude imagery for earth resources application, obtaining geological, meteorological and hydrological information
20 p3536 A69-36930

Aerial photography in geomorphological interpretations, noting advantages over conventional maps in slope microreliefs, soil erosion network and karst, glacial, aeolian and shore features
20 p3539 A69-37512

Geometrical configuration for synthetic aperture terrain imaging radar scanning system, noting scanning methods in range and azimuth directions
20 p3489 A69-37634

Synthetic aperture radar principles, using periodic pulse modulation to construct terrain imaging radar
20 p3489 A69-37635

Signal spectrum and SNR of synthetic aperture terrain imaging radar using model, including two dimensional signal and Gaussian additive noise
20 p3489 A69-37638

Synthetic aperture terrain imaging radar system optimal design, considering noise-free and random noise conditions using least squares method and signal to noise ratios
20 p3489 A69-37639

Signal amplitude no memory nonlinearity effect on performance of synthetic aperture terrain imaging radar systems and simulation of CRT film systems
20 p3490 A69-37643

Terrain radar returns emphasizing surface roughness influence in man-made target backscattering, determining radar cross section with radar range equation
20 p3490 A69-37646

Atmospheric phenomena effects on terrain imaging radar systems performance, discussing tropospheric turbulence and ionospheric irregularities
20 p3490 A69-37647

Imaging radar applications noting military surveillance, navigation assistance, iceberg detection, sea rescue operations, all-weather traffic surveys, terrain mapping, etc
20 p3491 A69-37649

Radar geoscience application, discussing radar return relation to illuminated terrain in detecting buried river channels
20 p3491 A69-37651

Orbital images for earth resources satellite mission planning using Mercury, Gemini and Apollo synoptic terrain photographs
21 p3721 A69-38632

Aerial remote sensing data for earth resources program including agricultural, geothermal/ geological tests, hydrological, water pollution and soil and flood water control observations
22 p3949 A69-40994

Terrain slope estimation of position errors of differential corrections in orthophoto production
22 p3951 A69-41245

Terrain surface irregularities influencing electromagnetic wave propagation in inhomogeneous atmosphere, using perturbation calculation
24 p4281 A69-42611

Electronic scanning and correlation techniques for terrain sensing required in automatic stereoperception
24 p4316 A69-43566

TERRAIN FOLLOWING AIRCRAFT

AH-56A helicopter manual and automatic terrain following and manual terrain avoidance systems, discussing nap-of-earth flight, design and simulation
17 p3002 A69-33544

Aircraft terrain-following algorithm for use with airborne general purpose digital computer, discussing simulation techniques and test results
19 p3366 A69-35625

Real time terrain following computer for C-5A transport, discussing automatic throttle system and speed bleedoff utilization
19 p3367 A69-35633

TERRESTRIAL DUST BELT

Stratospheric dust effect on twilight sky color, evaluating scattered radiation chromaticity for atmospheric models containing ozone
02 p0243 A69-12014

Stratospheric dust, discussing terrestrial and meteoritic origins, volatility of particles smaller than few microns, and light scattering and direct sampling measurements
09 p1608 A69-22689

Atmospheric optics by spacecraft and high altitude probes concerning ozone and aerosol distributions, scattering indicatrix polarization and dust cloud inhomogeneities
12 p2055 A69-25815

Satellite measurements of small particles near-earth space density compared with chemical estimates of terrestrial cosmic material, suggesting particles origin in meteoroid ablation
21 p3701 A69-38342

TERRESTRIAL MAGNETISM U GEOMAGNETISM

TERRESTRIAL RADIATION

Angular and spectral distribution of earth IR radiation near horizon from satellite observation and spectrograms
03 p0422 A69-13506

Latitude dependence of earth spectral radiation intensities, discussing satellite observations in equatorial and subtropical regions
03 p0422 A69-13507

Outgoing radiation field based on interpretation of broad sector radiometer measurements made from meteorological earth satellites
04 p0627 A69-15032

Solar and terrestrial thermal radiometer absolute calibration noting standards and methods
04 p0602 A69-15429

Earth X ray flux due to solar X rays reflected in atmosphere observed by Skylark rockets, noting observations of Sco XR-1 and Cen XR-2
04 p0649 A69-15440

Earth radiation effect on space vehicle, using diffusely radiating sphere model
05 p0824 A69-16053

Actinometric and nephelometric data on outgoing short wave radiation obtained by Cosmos 122 satellite, tabulating cloud cover data, digital radiation data and brightness curves
06 p0952 A69-17983

Double scattering effects of sky radiation and outgoing radiation balance in disturbed atmosphere, using homogeneous plane parallel atmospheric model
07 p1175 A69-18270

Meteorological satellites observation of energy exchange between earth and space, discussing planetary albedo, energy absorption and source and sink regions
07 p1127 A69-19261

Angular distribution of photon radiance of spherical satellite irradiated by Lambertian earth, assuming nonemissive satellite
08 p1311 A69-21095

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift
14 p2435 A69-29043

Meteorological elements variation from measuring earth radiation in different spectral regions by satellites, determining temperature and humidity profiles
14 p2477 A69-29828

Earth thermal emission intensity measured by two beam radiometer onboard Cosmos 149, noting discrepancy between empirical and theoretical transfer functions of atmosphere
15 p2596 A69-30651

Earth reflected radiation pressure and perturbing effect on satellites
15 p2599 A69-31324

Statistical regularization for determining vertical atmospheric temperature profile from measurements of earth radiation in 15 micron carbon dioxide band
18 p3167 A69-35339

Orthogonal functions for determining atmospheric vertical temperature profile from satellite measurement of earth outgoing radiation in carbon dioxide absorption band
19 p3303 A69-36409

Partial differential equation representing influence of radiative and turbulent transfers of atmospheric heat, based on absorption coefficients for terrestrial radiation
19 p3363 A69-36498

Earth radiation effect on space vehicle, using diffusely radiating sphere model
20 p3606 A69-37963

Radiative heat input to artificial satellite in orbit due to solar and earth radiations calculated and presented in graphs for satellite temperature calculation
22 p4006 A69-40589

Minimum air temperature forecast by terrestrial thermal or long wave radiation balance measurement, using radiometer data
23 p4184 A69-42211

TESSERAL HARMONICS

Satellite orbit selection for determining geopotential and spherical and tesseral harmonic coefficients, discussing propulsion systems and satellite observation cost feasibility
02 p0331 A69-12807

Satellite motion short period perturbations by earth gravitational field tesseral and sectoral harmonics
12 p2069 A69-26431

Tesseral harmonics of geopotential and station coordinates based on combined Baker-Nunn, laser and range and rate satellite data
15 p2601 A69-31372

TEST CHAMBERS

NT ANECHOIC CHAMBERS
NT PRESSURE CHAMBERS
NT VACUUM CHAMBERS

Atmospheric exposure chamber design for small animals, discussing dynamic and recirculating operations and gas scrubbing system
04 p0584 A69-14678

Vacuum pumping methods for large space simulation chambers, discussing cryopumping, economic and operational considerations
13 p2241 A69-28078

Space environment simulation for vacuum, solar radiation, heat sink and orbital motion, discussing oil contamination of optical surfaces
13 p2241 A69-28079

Molecular gas flows in containers for space environment simulation, discussing flux distribution
13 p2241 A69-28081

Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning
20 p3511 A69-38181

Panel flutter testing in supersonic blowdown wind tunnels, analyzing model and test chamber layout
21 p3847 A69-39859

Reliability demonstration testing equipment, describing temperature chamber design and instrumentation, overall facility planning, etc

22 p3954 A69-40034

EKG data telemetry from personnel to receiver located within same closed metallic chamber, discussing FM/AM and FM/FM systems

23 p4103 A69-41766

TEST EQUIPMENT

Structural testing in aircraft design, discussing costs, environmental conditions, test rigs and apparatus

01 p0170 A69-10864

Ball bearing test apparatus for evaluation of greases and solid lubricants at high temperatures [ASLE PREPRINT 68AM 7C-2]

01 p0087 A69-10912

Optimal layout of turbofan jet engines, discussing experimental rig for high thrust measurement [AIAA PAPER 67-416]

01 p0143 A69-11015

Mass spectrometer residual gas analyzer (RGA) for identifying and measuring subliminated substances from spacecraft construction materials, noting applications during vacuum testing

02 p0227 A69-11758

Automatic test equipment applicability to testing problems created by increasing complexity of communications equipment

03 p0410 A69-13189

Wind tunnel and test equipment for studying flow in straight airfoil lattices at Reynolds numbers 50,000-1,200,000 and Mach numbers 0.1-1.0

03 p0412 A69-13789

Fokker bond tester and structural details of different types of sandwich structure, giving attention to adhesive bonding of panels, adhesive application, etc

03 p0434 A69-13791

Machine for simultaneous creep and long term strength evaluation of multiple metallic specimens

04 p0584 A69-14537

Mass spectrometer leak testing by calibrated enclosure method for quantification of gaseous leaks in large complex systems

04 p0598 A69-14974

Dual processor checkout system providing isolation of malfunctioning unit from memory and ensuring decision making by operative unit

04 p0568 A69-15361

Test equipment for rapid automatic checkout and evaluation of automatic flight control systems on commercial and jet transport aircraft

05 p0742 A69-15883

Electronic system checkout in SAAB 37 Viggen, using computer controlled test equipment

05 p0726 A69-16767

Requirements for analysis and synthesis of diagnostic tests for detecting faults in combinational logic circuit

06 p0892 A69-17408

Automatic test set for measuring dopant concentration profiles in epitaxial films

07 p1130 A69-18245

Laboratory test stands for ignition, combustion and expansion processes experiments in hypergolic liquid fuels, noting minimal recombination gains

08 p1301 A69-20170

Tests and quality control equipment used in German aeronautical and astronautical industries

09 p1513 A69-22565

Optimum calibration interval program for determining test equipment calibration frequencies on basis of mean time between failures and acceptable reliability levels

10 p1699 A69-23288

Refractory metals testing at high temperatures in vacuum, discussing equipment modifications, temperature measurement and residual gas problems

10 p1714 A69-23848

Bending creep vacuum testing device for brittle materials at high temperatures, noting load variation capability

10 p1696 A69-23851

Shock testing methods using shock spectrum concept and description testing machines and instrumentation

11 p1862 A69-24408

Gun tunnel equilibrium piston technique by model analysis of piston weight, tunnel conditions and geometry

11 p1862 A69-25013

High speed automatic test sets and rapid repair procedures under adverse conditions for individuals of relatively low technical skill

11 p1851 A69-25063

Abbreviated Test Language for Avionics Systems /ATLAS/ as standard compiler input language for commercial airline automatic test equipment /ATE/

11 p1842 A69-25064

Electronic module testing with integrated hardware/software system, noting module test console and manual capabilities

11 p1864 A69-25065

Universal test equipment compiler /UTEC/ built for use with languages designed to control automatic test equipment

11 p1842 A69-25066

Modular designed automatic test system consisting of central computer controlled system with multiplexed remote test stations for depot level maintenance

11 p1864 A69-25067

Multipurpose test system analysis emphasizing support section containing self test elements, power monitoring and control, interconnection techniques and packaging

11 p1864 A69-25069

Compatibility effects of automatic test equipment on avionic hardware design

11 p1865 A69-25070

Hardware-software interface defined for design of computer controlled test system, discussing criteria for designing economical systems

11 p1842 A69-25071

Flexible control module for real time automated checkout requiring programming by personnel with strong software background

11 p1843 A69-25072

Mathematical model for prediction of automatic test equipment utilization and determination of time for performance of intended test function

11 p1865 A69-25074

Semiautomatic and automatic off-line module testing machines, comparing costs for different test populations

11 p1865 A69-25076

Minimum test error probability test limits for known test equipment and signal tolerances, developing semi-graphically single equation for calculation

11 p1865 A69-25079

Onboard test instrumentation for monitoring aircraft communication, navigation and identification systems, noting adaptive programming

11 p1866 A69-25080

Automatic system self test technique known as central integrated test subsystem /CITS/ for logically testing avionics systems

11 p1866 A69-25083

Geomagnetic field vertical and horizontal intensities measured using proton magnetometer with coil theodolite

11 p1889 A69-25435

Testing machines for metallic materials, discussing design criteria and application to tensile strength, vibration and durability test machines [DVL-865]

11 p1889 A69-25682

In-circuit diodes testing by semiautomatic low current regulated voltage test set

12 p2035 A69-25835

Kerr constant verification device to study electrooptic liquids properties

12 p2084 A69-26148

Alignment/test rig for head-up displays using laser light pencils

12 p2091 A69-26304

Precision optical systems tests, using two beam interferometer and CW gas laser to examine reflected or transmitted wavefront contours

12 p2092 A69-26421

Crossed beam apparatus with mass selected variable energy primary beam for study of angular and velocity spectra of ion-molecule reactions

12 p2092 A69-26477

Furnace for automatic high temperature cycling in controlled oxidizing environment

12 p2093 A69-26483

EEG monitor helmet for aircraft or flight simulator programs, discussing sensing and transmitting system

12 p2023 A69-26553

Equipment and test installations for turbojet noise studies, discussing noise from rotating parts, pure jet noise and air propagation of noise

13 p2325 A69-28589

Resonant fixtures used for mechanical amplification of vibrator output to desired test levels

15 p2588 A69-30404

Controlled electric field capacitance probes for non-destructive testing, discussing field projection pattern and direction effective depth of field, applications, etc

15 p2616 A69-31503

IR techniques for nondestructive testing, discussing applications to heat injection and generation and test equipment capabilities

15 p2630 A69-31508

Delta technique for ultrasonic weld inspection, noting ability to detect randomly oriented weld defects

15 p2631 A69-31509

Ultrasonic inspection systems to determine average record bond quality on all adhesive bonded assemblies of Saturn S-2 booster and Apollo Command and Service Modules

15 p2632 A69-31511

Helicopter wind tunnel testing, discussing solutions in terms of test procedures and test bed equipment

16 p2735 A69-32011

Test apparatus for determining radiative properties of Ar plasma as function of high temperature and pressure [AIAA PAPER 69-601]

17 p3010 A69-33318

Tire test machine for tire parameter determination in aircraft landing gear shimmy stability studies [AIAA PAPER 68-311]

17 p2902 A69-34029

Aircraft solid state electric system logic level tested functionally by built-in test equipment /BITE/ operated on ground during preflight tests

17 p2977 A69-34111

Magnetic field susceptibility testing method as defined in DOD Electromagnetic Compatibility Control documents MIL-STD-461 and MIL-STD-462

17 p2947 A69-34133

Testing machine for in vacuo tensile testing of tubular metallic specimens at high temperatures and low pressures

18 p3117 A69-34604

Thermoelectrical leg product specification /TELPS/ apparatus and data reduction technique for determining temperature dependent thermoelectric properties of material

18 p3093 A69-34783

Automatic ultrasonic inspection device search head, servomechanism and electronic system used for detecting weld defects and cracks

18 p3137 A69-35111

Hydraulic-powered self propelled six degree of freedom loading vehicle moving tests assembly to test chamber with high accuracy positioning

20 p3511 A69-38181

Metal deformation dynamics at elevated temperatures, discussing closed loop electrohydraulic testing machine for stress relaxation and strain rate sensitivity

21 p3689 A69-38595

Passively isolated and actively stabilized platform for inertial navigation components and systems tests [AIAA PAPER 69-863]

21 p3690 A69-39423

Reliability demonstration testing equipment, describing temperature chamber design and instrumentation, overall facility planning, etc

22 p3954 A69-40034

Temperature program generation for test chambers, describing temperature programmers and readout, verification and recording systems

22 p3954 A69-40038

Uniaxial tensile testing machine to operate under combined creep and fatigue conditions for studying dislocation structure changes in metals and alloys at high temperature

22 p3926 A69-40441

Spacecraft test equipment based on balancing and vibration testing machines, emphasizing mass distribution experimental determination

24 p4296 A69-42669

TEST FACILITIES

NT ANECHOIC CHAMBERS
NT BALLISTIC RANGES
NT BLOWDOWN WIND TUNNELS
NT CASCADE WIND TUNNELS
NT ENGINE TESTING LABORATORIES
NT ENVIRONMENTAL LABORATORIES
NT HOTSHOT WIND TUNNELS
NT HYPERVELOCITY WIND TUNNELS
NT LOW DENSITY WIND TUNNELS
NT LOW SPEED WIND TUNNELS
NT MISSILE RANGES
NT PLASMA JET WIND TUNNELS
NT ROCKET TEST FACILITIES
NT SHOCK TUNNELS
NT SLOTTED WIND TUNNELS
NT SUBSONIC WIND TUNNELS
NT SUPERSONIC WIND TUNNELS
NT TRANSONIC WIND TUNNELS
NT WIND TUNNELS

Upgrading wave superheater for evaluation of reentry materials

01 p0054 A69-10917

Remotely controlled explosives processing facility for handling unfamiliar sensitive materials, noting

safety aspects and inspection, testing, transporting and destroying techniques

02 p0226 A69-11523

Dry heat sterilization and ethylene oxide decontamination test equipment for bipropellant liquid propulsion system

02 p0228 A69-11764

Concorde structural tests, discussing ground test program for simulating flight temperature and stress conditions at 2.6/2.7 station of wing-fuselage section

02 p0193 A69-11892

Radar cross section laboratory, discussing experimental techniques, electromagnetic range and pulse, FM/CW and CW radars

03 p0385 A69-12912

NASA Plum Brook Reactor Facility /PBRF/ for determining radiation tolerance to support nuclear power application in space for propulsion and power

03 p0465 A69-13128

Undetected defects and false alarm probabilities for automatic test equipment, emphasizing quality and confidence limits

03 p0428 A69-13187

Facilities at High Down Test Site for testing Black Arrow launch vehicles, discussing mechanical and electrical equipment test procedures

04 p0585 A69-15041

Closed system toroidal electrogasdynamic facility proposed for reentry simulation, discussing velocity generation

04 p0585 A69-15323

Central test evaluation group as part of systems engineering of large systems

05 p0742 A69-15803

West German test facility for simulating artificial satellite rotation about center of mass

07 p1116 A69-18260

Concorde testing program, detailing materials, structure, systems, engine, wind tunnel and flight tests

07 p1054 A69-19294

Communication satellite ground test programs, discussing structural, electrical integration, thermal control and antenna pattern models for simulation tests

08 p1409 A69-19962

Design criteria for vibration testing facility in Rome, giving block diagram of equipment at facility

08 p1301 A69-20159

Testing station design for VTOL aircraft ground effects investigations

08 p1302 A69-20880

Flight research testing facilities at Arnold Engineering Development Center for rockets, turbojets, ramjet engines, aircraft, missiles, satellites and spacecraft

08 p1302 A69-20883

Electronic components reliability tests, determining correlation between material quality and failure

08 p1293 A69-21109

Drop-weight tear tests dependence on specimen thickness and metallurgical properties

09 p1503 A69-21389

Man in loop computer facility for programmers to check out flight programs in simulated space flight environment

09 p1479 A69-22384

Real time real temperature exhaust gas reingestion and structural heating test facility for jet lift V/STOL configurations

09 p1479 A69-22388

Neutron radiography facility for production non-destructive testing inspection of aerospace components, noting collimation, neutron/gamma ray ratio optimization and neutron source

10 p1699 A69-23051

Wideband acceleration instrumentation for Rover ground test facility liquid hydrogen turbopumps to study structural and flow induced vibrations

10 p1692 A69-23250

Test facility automation, discussing pretest preparations, test operations, data reduction and system planning

10 p1671 A69-23260

Computerized shake test facility for Saturn 5 moon rocket, describing data acquisition, magnetic tape units, X-Y plotters, display devices, etc

10 p1672 A69-23285

Mississippi Test Facility /MTF/ hardware data acquisition system error analysis from extensive simulated static firing tests

10 p1673 A69-23287

Argas test loop as model for MHD power plant study, discussing component testing including channel preionization and relaxation experiments

10 p1673 A69-23478

Aircraft steam catapult test facilities, noting construction and operational requirements

10 p1674 A69-24068

Modular designed automatic test system consisting of central computer controlled system with multiplexed remote test stations for depot level maintenance

11 p1864 A69-25067

Single purpose, multipurpose and multistation automatic test systems for production and maintenance

11 p1864 A69-25068

Minimum test error probability test limits for known test equipment and signal tolerances, developing semi-graphically single equation for calculation

11 p1865 A69-25079

Procedures and facilities applicable to sonic environmental testing of flight vehicles, discussing sonic energy sources in vehicles and potential failure modes

12 p2060 A69-26939

Rolls Royce noise and compressor test facility for continual lowering of engine sound pressure levels, considering sound generating mechanisms

13 p2240 A69-27616

Torsional testing facility for delayed elastic and non-recoverable strains in materials, noting application to diffraction limited reflecting optics

13 p2240 A69-27955

Segmented-electrode and Hall ducts tested on supersonic magnetoaerodynamic conversion rig, defining electrical model for boundary layer losses at electrode surfaces

13 p2311 A69-28034

Real time pressure simulation chambers for testing space vehicles, discussing slow and rapid evacuation and pumping systems

13 p2240 A69-28077

Three meter spherical volume heat balance test facility for space vehicles at European Space Technology Center, describing vacuum system, solar simulation, etc

13 p2241 A69-28080

Test facility for supersonic combustion at low static pressure using fuel and gas streams and optical scanning spectrometer

13 p2243 A69-28276

Heating facility for testing ablative heat shield material models in combined convective and radiative heating environment with constant or transient heating conditions

13 p2243 A69-28278

Equipment and test installations for turbojet noise studies, discussing noise from rotating parts, pure jet noise and air propagation of noise

13 p2325 A69-28589

Helicopter climatic testing, discussing component, systems and field tests and facilities

14 p2427 A69-29505

Sonic boom simulation methods using shock tube, booth type simulators, ballistic ranges and explosives, discussing unmanned data recorder as monitoring device

15 p2585 A69-30371

Space Environment Simulation /SES/ facility at Goddard Space Flight Center, discussing operations and maintenance

15 p2586 A69-30386

Martian entry test facility for real size entry systems, discussing design, fabrication and operation

15 p2587 A69-30390

Weapon systems integrated testing, determining test quantities as function of subsystems utilizing Neyman-Pearson confidence levels

15 p2619 A69-30400

Independent testing laboratory management, outlining requirements specialized to fit continued growth conditions

15 p2720 A69-30402

Boeing A-7000 Solar Simulator for Space Environment Simulation Laboratory, noting output characteristics

15 p2588 A69-30403

Reliability testing of development models during production, considering short term and large batch tests

15 p2579 A69-31036

Automated IR fatigue crack detection in sonic test facility capable of subjecting large aircraft or missile structures to intense sound fields

15 p2631 A69-31505

Test facility for qualification of satellite fairings jet-tisoning system, describing accelerating tower and recording and control instrumentation

16 p2765 A69-31739

Static, transient and in-space environmental tests at satellite structures and heat shield test facilities in Italy

16 p2765 A69-31750

Helicopter wind tunnel testing, discussing solutions in terms of test procedures and test bed equipment

16 p2735 A69-32075

Running test facility for study of aerodynamics and flight dynamics of V/STOL aircraft models

17 p2944 A69-32851

On-line central data processing system connected to time shared computer for recording data from test facilities, discussing hardware configuration, software considerations and advantages

17 p2932 A69-33106

Hydraulic tank for visualizing flows around stationary models, noting absence of wall effects

17 p2956 A69-33588

Specification requirements for space vacuum simulation, considering vacuum requirements for simulating various effects

17 p2946 A69-33659

Facility for determining energy dissipation in materials under cyclic stresses or strains for wide range of temperatures

17 p2946 A69-33925

Facility for studying energy dissipation in refractory materials during fatigue tests in vacuum at various temperatures, describing principal components

17 p2947 A69-33926

Test facility to determine factors influencing aerodynamic energy dissipation of cantilever rods oscillating in airstream

17 p2947 A69-33928

Moment of inertia measurements facility for spacecraft dynamic balancing operations at low angular rates

18 p3118 A69-34889

Air and space research at Goettingen Aerodynamic Testing Institute

19 p3295 A69-36684

Facility for evaluating thermal stability of heat resistant materials and cermets in constant temperature gas flow

20 p3565 A69-36979

Device for equipment insertion into space vacuum simulation chamber to minimize interaction with walls

20 p3510 A69-37405

Magnetic test facilities at ESTEC consisting of system for geomagnetic field compensation and facility for magnetization and demagnetization, testing ESRO satellite models

20 p3512 A69-38279

Test facility for space vehicles simulating outer space gas pressure, heat sink behavior and relative motion to sun, detailing design and operation

21 p3689 A69-38420

Space simulation facility assembly and operational testing

22 p3919 A69-39959

Planning, design and implementation of reliability testing facility, investigating phases of project life cycle

22 p3954 A69-40033

Telemetry data processing, describing designation, tasks and possibilities of data reduction laboratory attached to NASA Goddard Space Flight Center

22 p3919 A69-40352

Friction tests for Mariner Mars 1969 spacecraft mechanisms in ultrahigh vacuum molecular sink chamber, noting increased friction attributed to vacuum environment

22 p3920 A69-40374

Variable optical system with remote and continuous adjustment of beam for solar simulation, permitting maximum test facility utilization

22 p3920 A69-40375

Vacuum integrating sphere for measuring solar absorptance in space environment to determine thermal control coatings qualifications

22 p3923 A69-40392

Space simulator vacuum facility for optical satellite tests, construction, operation and maintenance, emphasizing noncontaminating environment and pumping systems

22 p3924 A69-40396

RF voltage breakdown facility for studying spacecraft antenna characteristics in space and planetary atmosphere environments

22 p3924 A69-40397

Three axis motion simulator for in-orbit spacecraft attitude control evaluation using earth, sun and star sensor references

22 p3924 A69-40398

Burner rig hot corrosion test facility for evaluating Ni-Co alloys used in gas turbine engines operating in marine environment

22 p3928 A69-40673

Outer space rocket plumes simulation facility combining low density wind tunnel and molecular sink pro-

TEST FIRING

- perties, discussing role of liquid nitrogen cooled dif-
fuser-precooler 22 p3928 A69-40731
- Tensile test facility for specific strain rate range, ap-
plying impact load to sample end with high speed
striker accelerated by explosive energy 23 p4147 A69-41710
- Thermoelectric generators performance and life
tests, describing JPL facilities and programs 23 p4188 A69-42263
- Research and development programs leading to heat
sterilizable spacecraft battery separator material,
describing bench tests 23 p4072 A69-42284
- Dynamic hot corrosion rig test for operating environ-
ment and alloy composition effect on sulfidation attack
during gas turbine fuel combustion 23 p4150 A69-42448

TEST FIRING

- NT STATIC FIRING
- Holography for optical analysis of hypersonic
aerodynamics in single shot firing tunnel 12 p2087 A69-26176

TEST METHODS

U TESTS

TEST PILOTS

- Aerospace research pilot school /ARPS/ to train ex-
perimental test and aerospace research pilots and
Manned Orbiting Laboratory /MOL/ astronauts 06 p0882 A69-17670

TEST PROGRAMS

U TESTS

TEST RANGES

- NT BALLISTIC RANGES
- NT MISSILE RANGES
- Telemetry capability of Air Force Western Test
Range noting acquisition, tracking, data processing and
display and data reduction 05 p0743 A69-16304
- Conversion of range telemetry systems /CORTS/
program noting installations and standardization 05 p0743 A69-16306
- Air Force Eastern Test Range data processing
systems perform real time operations during in- flight
phases of ballistic missiles and orbiting vehicles 05 p0727 A69-16772
- Safety requirements of test ranges, considering RF
hazards to electroexplosive devices 10 p1751 A69-23019
- Microwave antenna testing on small indoor ranges,
discussing reflectors and feeds for generation of ap-
proximately uniform plane waves for antenna illumina-
tion 11 p1852 A69-25314
- S-band telemetry capability of Easter Test Range,
discussing relationship to Telemetry Rehabilitation
Project, major system decisions and performance
characteristics 14 p2410 A69-28878

TEST STANDS

- Test facilities and techniques for low speed flight
problems of aircraft handling qualities, stability, control
and performance 05 p0741 A69-15575
- Sine wave oscillator circuits and performance pre-
diction for NERO thrust measurement test stand 08 p1300 A69-20155
- NERO thrust power measurement, discussing elec-
tromagnetic and strain-gage test stands 08 p1301 A69-20156
- Simulator for testing colloid microthruster,
discussing spacecraft interfaces and time of flight thrust
data [AIAA PAPER 69-314] 09 p1478 A69-22380
- Test stand final control element for fluid flow ap-
plication, noting analog control valve with digital to
analog conversion and digital actuator 10 p1671 A69-23259
- Gas turbine engine development data system based
on test stands subsystems and central computer 10 p1660 A69-23284
- Test stand for free oscillations frequencies and mode
shapes of truncated conical shells of revolution with
clamped edges and one free edge 17 p3058 A69-33202
- Test pad isolation characteristics mathematical
model to predict pad dynamic behavior [AIAA PAPER 69-860] 21 p3690 A69-39388
- Test stand for measurement of forces and moments
from thrust vector controlled rocket, analyzing dynam-
ic characteristics of hydrostatic supports 21 p3691 A69-39631

TEST VEHICLES

NT FLIGHT TEST VEHICLES

- UK hovercraft research covering internal/external
dynamics, propulsion systems and full scale tests 05 p0702 A69-16393
- Wing section of high lift/drag test vehicle for 2500 F
reentry, describing design, manufacture and testing 12 p2103 A69-26837
- Thermionic converter performance measured using
test vehicles with guard ringed collectors and variable
emitter-collector spacing 14 p2398 A69-29177
- Test rig vehicle design for noise research on single
stage high bypass ratio fans for quieter turbofan power-
plants [AIAA PAPER 69-492] 16 p2767 A69-32727

TESTERS

U TEST EQUIPMENT

TESTING

U TESTS

TESTING MACHINES

U TEST EQUIPMENT

TESTING TIME

- Components production process effect on reliability
based on values and functional relations of internal
parameters, noting influence on accelerated testing 08 p1319 A69-20346
- Heat resistant Fe and Cu alloys creep index affected
by temperature, testing time and specimen grain size 15 p2639 A69-30569
- Mesa-structure varactors /p-n junction generating
harmonics by nonlinear capacity variation/ reliability,
determining selection criterion and optimal test dura-
tion period 15 p2627 A69-30839
- Project management of Apollo short stack testing
project, discussing organization, planning, operations
and procurement to cut testing time 18 p3233 A69-34616

TESTS

NT THERMAL VACUUM TESTS

- Bubble leak testing of components to understand ef-
fects of gas and liquid viscosity, surface tension, pres-
sure differential and temperature 09 p1503 A69-21391
- Quality control tests for adhesives used in structural
parts including ultrasonic and nondestructive tests 09 p1513 A69-22564
- Caravelle aircraft halting tests with barrier net 10 p1674 A69-23706
- Test methods for telescope mirror, discussing polish-
ing, monitoring by Hartmann test and visual null test 13 p2259 A69-27205
- Equipment testing, discussing collaboration between
government agencies and independent environmental
testing laboratories 15 p2720 A69-30398
- Test measurement - Conference, New York, October
1968 15 p2612 A69-31267
- Fracture tests evaluated for transition temperature
welding procedures, residual stress, flaws and instru-
mentation 17 p2989 A69-33565
- Integrated test program based on mission require-
ments, failure mode and effects analysis with feedback
from testing to design and development functions 19 p3327 A69-36014
- Optimum number of test aircraft in test program to
predetermine endurance and service life of same air-
craft in serial production 21 p3647 A69-39098
- Reliability prediction accuracy through reliability
testing with reference to interplay between design,
manufacture, test programs, environmental conditions,
etc 22 p3952 A69-40023
- Implementation of MIL-STD-781 reliability test
specification from contractor viewpoint, detailing test
procedures /procedural, decision, reporting and cor-
rective action rules/ 22 p3952 A69-40025
- Reliability testing and parts screening of electronic
systems for best parts selection 22 p3953 A69-40029
- Blade and vane wall thickness measurements test
methods for gas turbine engine using ultrasonic gage
and thermoelectric comparator 24 p4312 A69-42753

TETHERED BALLOONS

- Agricultural and forestry applications of tethered
balloons, discussing observation angle effect on spec-
tral signature response and signal preprocessing 22 p4053 A69-40805
- Tethered polyethylene balloon carrying radio con-
trolled camera for time lapse photographs of wave
generated near shore currents 22 p3865 A69-40808
- Photographic platform applications of tethered bal-
loons, discussing powered systems for low and high al-
titudes and free balloons 22 p3865 A69-40811
- Aerostatic and aerodynamic characteristics of Darr
Vee tethered balloon system 22 p3865 A69-40813
- Mathematical model for ascent and descent of high
altitude tethered balloon, developing computer pro-
gram and deriving differential equations of motion [AIAA PAPER 68-942] 24 p4254 A69-43722

TETHERING

- Motion stability of two tethered unsymmetrical earth
pointing bodies in circular orbit, presenting nine
degrees of freedom differential equations of motions 02 p0324 A69-12507
- Relative motion of two bodies linked by flexible
weightless tether in artificial earth satellite orbit, simul-
ating extravehicular walk 19 p3427 A69-36618
- Mathematical model of astronaut motion and
spacecraft angular control during tethered reentry,
discussing conditions preventing spinning and colli-
sions 21 p3667 A69-39630
- Tethered orbiting interferometer configurations for
future Radio Astronomy Explorer satellites, discussing
gravitational stabilization and delta launching into orbit
as single payload [AAS PAPER 69-255] 24 p4313 A69-42859

TETHERLINES

- Equations of motion of point restricted tethered
parafoil for investigating longitudinal and lateral
dynamic stability 01 p0009 A69-10415

TETRACHLOROMETHANE

U CARBON TETRACHLORIDE

TETRAD THEORY

- Linear approximation of Moller condition for
reference frames interpretable as linear approximation
of field equation in tetrad theory of gravitation 08 p1351 A69-20287

TETRAFLUOROHYDRAZINE

- Monograph on kinetic study of fast gas reactions
with shock waves covering thermal decomposition of
nitrous oxide, hydrazine tetrafluoride and nitrogen
tetrafluoride 08 p1304 A69-20707
- Thermodynamic calculation of equilibrium constant
and homolytic dissociation degree of
tetrafluorohydrazine based on enthalpy and statistical
entropy 24 p4280 A69-42788

TETRAGONS

- U PARALLELOGRAMS
- U RECTANGLES
- U SQUARES [MATHEMATICS]

TETRAHEDRONS

- Curved tetrahedral and triangular elements in
matrix displacement method covering linear and non-
linear cases 08 p1415 A69-20631

TETRANITROTETRAZACYCLOOCTANE

U HMX

TETRAZOLES

- Aminotetrazole preparation to obtain tetrazole
derivatives and explosive salts 10 p1651 A69-23013

TETRODES

- Insulated gate tetrode with high drain breakdown
potential and low Miller feedback capacitance, noting
V-I characteristics 05 p0733 A69-16556
- Pulse frequency integral estimate devices with in-
tegrating chemotron tetrodes for automatic systems
metering applications 13 p2227 A69-27522
- Amplitude modulator with field effect tetrode
transistor /FETT/, discussing linear mode operation of
modulator circuit 14 p2420 A69-29459

- VHF and uHF MOS tetrode minimum noise factor computed as function of frequency by adding thermal noise sources to resistive parts of equivalent circuit
15 p2577 A69-30603
- Four terminal silicon planar p-n-p-n model operating as semiconductor small signal linear tetrode amplifier, discussing properties and mathematical models
18 p3109 A69-35293
- TETRYL**
Slowly exploding wires for igniting self sustaining deflagrations in PETN, RDX, HMX and tetryl, comparing circuit parameters for detonation initiation
01 p0141 A69-10678
- TEXAS**
Nocturnal development of air mass stratus clouds in Texas and mechanism of formation, discussing turbulent mixing theory
15 p2649 A69-30893
- TEXTBOOKS**
NASA Pilot Program in instructional monographs to provide up-to-date material from current research for engineering education
18 p3236 A69-35078
- TEXTURES**
Alloying elements and cold rolling deformation effects on formation of texture in Ti alloys, noting inhomogeneity
04 p0617 A69-15077
- Plastic flow anisotropy and texture shifting by rolling in Ti-Mo-V alloy, analyzing slip rotation, grain boundary shear and deformation mode
17 p2987 A69-33078
- Depth dependent variations in texture in Nb due to inhomogeneous plastic deformation during cold rolling
21 p3744 A69-38737
- Surface texture effects, discussing metallic and elastomeric contacts, measurement, profile, model parameters, adhesion, hysteresis, lubrication, squeeze films, macroelastohydrodynamics and randomness
23 p4170 A69-42359
- TFX AIRCRAFT**
U F-111 AIRCRAFT
- THALAMUS**
Ventral posterolateral potentials in anesthetized immobilized cats in response to electric stimulation of mesenteric nerves and mechanoreceptors, studying thalamus nucleus role
12 p2020 A69-26562
- Cortical and thalamic evoked activities changes during sensory conditioning of freely moving cat
22 p3872 A69-40160
- Neuronal organization of initial afferent inflow in thalamic visual center /lateral geniculate body /LGB/ of unanesthetized cats/, noting unit activity
22 p3879 A69-40845
- THALLIUM**
Electronic attenuation of 10 to 130 MHz longitudinal ultrasonic waves in superconducting high purity Ti, noting energy gap anisotropy
03 p0485 A69-13293
- Electronic attenuation of 10 to 130 MHz longitudinal ultrasonic waves in nonsuperconducting high purity Ti, noting anisotropy and measurements below 4.2 K
03 p0485 A69-13294
- Thallium whisker growth /compression or squeeze/ method
04 p0641 A69-14457
- Temperature dependence of viscosity and density in molten thallium sulfide, noting structural changes absence in short range order
04 p0643 A69-14998
- Deposited beta active thallium isotope materials angular distribution after vaporization by Q switched laser beam determined by target fragment recoil
21 p3737 A69-38992
- THAWING**
U MELTING
- THEODOLITES**
NT CINETHEODOLITES
Geomagnetic field vertical and horizontal intensities measured using proton magnetometer with coil theodolite
11 p1889 A69-25435
- Wind speed and direction determination accuracy of radar or theodolite methods
20 p3572 A69-37698
- THEOREM PROVING**
FORTRAN Deductive System to find solutions to theorem proving problems, discussing computer implementation
01 p0037 A69-10806
- Levinson duality theorem for linear programs in complex space proved on basis of duality theorem for linear programming in real space
04 p0623 A69-14947
- Conditions for solution existence for n differential equations and Liapunov functions
05 p0787 A69-16451
- Volterra equation generalization extended and applied to functional Volterra equations, proving theorem dealing with topological, quasi-compact and uniform spaces
08 p1342 A69-20268
- Oscillation theorems for linear self adjoint elliptic equations of even order 2m, discussing proofs dependence on Swanson comparison theorem
11 p1909 A69-24882
- Gravitational analog of Mariot-Robinson theorem, obtaining two related theorems with Newman-Penrose spinor formalism
11 p1919 A69-25097
- Unique solution proven for laminar boundary layer equations of flow of revolution in unsteady state
13 p2248 A69-28195
- Einstein second postulate concerning invariability of light vector in vacuum experimented for validity, using earth and moon as light rays launching and reflecting media
13 p2354 A69-28650
- Semidefinite Peano kernels of stable forms
15 p2644 A69-30450
- Theorem extending results of techniques for analytical solutions of nonlinear ordinary differential equations applied to terrestrial brachistochrone problem
20 p3575 A69-37205
- Second circle theorem for two dimensional irrotational flow of incompressible inviscid fluid in z plane
20 p3518 A69-38316
- Evolutionary hypoelliptic equations with real variable coefficients, analyzing positive solutions and application to parabolic equations
21 p3756 A69-39151
- Existence theorem for relation between solutions of systems of ordinary differential equations
23 p4182 A69-41959
- Nondiscrete locally compact group having noncontinuous irreducible representations, proving theorem
23 p4183 A69-42022
- Separation theorem for arbitrary nonlinear measurements to find optimal stochastic control without dynamic programming
24 p4291 A69-43269
- Intrinsic transport theorem for electrodynamics of continuous media, using Cartan method of exterior differential forms
24 p4350 A69-43368
- THEOREMS**

- THEORETICAL PHYSICS**
NT NEWTON THEORY
NT QUANTUM THEORY
Theoretical prediction for modified and hybrid plasma resonances discrimination, noting sensor axis angle to geomagnetic field
02 p0241 A69-11731
- Mathematical aspects of stability of equilibrium configurations
02 p0340 A69-11991
- Book on linear boundary value problems of mathematical physics based on Green function covering Hilbert spaces, integral equations and spectral theory of differential operators
04 p0625 A69-15232
- Soviet collection of papers on mathematical physics
11 p1915 A69-24759
- Collection of Soviet papers on mathematical physics
11 p1916 A69-24770
- Integral transforms in composite one dimensional space and application to boundary value problems of physics
11 p1910 A69-25574
- Einstein second postulate concerning invariability of light vector in vacuum experimented for validity, using earth and moon as light rays launching and reflecting media
13 p2354 A69-28650
- Einstein general theory of relativity, discussing evolution and disunity among physicists and philosophers on universal relativity of mechanical motion
14 p2483 A69-28857
- General relativity theory philosophical substance and meaning, discussing Einstein formulations and bases of classical, relativistic and quantum physics
14 p2483 A69-28859
- Invariants method and applications in classical and relativistic physics emphasizing theory of relativity, physical and mathematical theories relations and group theory applications
14 p2484 A69-28860
- Categorical structures in theoretical thinking for philosophical fundamental physical laws analysis, including space-time concept changes in classical physics and in theories of relativity
14 p2484 A69-28861
- Macroscopic space-time meaning in theoretical physics in terms of mathematical definition and philosophical concept
14 p2484 A69-28864
- Monograph on creation and evolution of physico-theoretical concepts of space, time and matter
16 p2812 A69-32110
- Scientific theories construction analyzed, including cognitive role of mathematics
20 p3575 A69-37012
- Information categories concept defined in relation to formulations of classical mechanics principles, considering theories of Newton, Gauss and Hertz
20 p3576 A69-37585
- THERAPY**
U CHEMOTHERAPY
U PSYCHOTHERAPY
U RADIATION THERAPY
- THERMAL ABSORPTION**
NT POLAR CAP ABSORPTION
Qualitative analysis of thermoelectric effects in transistors, describing heat absorption and release
12 p2042 A69-26880
- Thermal radiation effects on laminar free convection boundary layer of vertical flat plate, studying absorbing and nonabsorbing gases
[ASME PAPER 68-HT-43] 13 p2373 A69-27772
- Optical and thermal attenuation of current induced by low energy electron bombardment in CdS crystal
19 p3392 A69-36727
- THERMAL ACCOMMODATION COEFFICIENTS**
U ACCOMMODATION COEFFICIENT
- THERMAL BATTERIES**
Metal fluoride compounds as cathodes for use with mixed fluoride electrolyte /LiF-NaF-KF eutectic/ in thermal batteries
10 p1640 A69-23997
- Nuclear thermal and electrovoltaic batteries design and operation, discussing applications
20 p3464 A69-37288
- THERMAL BOUNDARY LAYER**
Schlieren method for studying rotating sphere heat transfer during natural convection
01 p0174 A69-10095
- Time dependent interaction of hot gas bubble with chemically reactive liquid stream, detailing thermal boundary layer theory
01 p0058 A69-10162
- Impinging jet flames on furnace hearth, analyzing thermal boundary layer characteristics and convective heat transfer rates
06 p1035 A69-17933
- Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient having layer thickness greater than penetration depth of heat waves
07 p1241 A69-18696
- Nonaxisymmetric temperature field of unbounded hollow cylinder with moving heating boundary, expanding surface temperature into Fourier series
07 p1241 A69-18924
- Incompressible laminar thermal boundary layer unsteady development from state of rest in vicinity of wall of obstacle subjected to unsteady thermal field
[ONERA-TP-680] 08 p1304 A69-20754
- Steady laminar boundary layer flow calculations extended to temperature boundary layer for given heat flow or temperature distribution at wall
10 p1808 A69-22915

THERMAL BUCKLING

Thermal stratification effect on wind structure in Ekman layer, assuming turbulent transfer and height dependence
13 p2290 A69-27390

Micro-layer thickness in nucleate boiling, studying liquid-vapor interface motion of growing bubble near heated surface
13 p2375 A69-27789

Numerical solutions of equations for high Prandtl number boundary layers in two dimensional flat plate incompressible flow with mass injection
13 p2249 A69-28238

Three dimensional thermal laminar boundary layer around body moving with constant acceleration in incompressible fluid, considering wall temperature and Prandtl number
13 p2380 A69-28631

Temperature disturbance amplification in laminar natural convection boundary layer formed on vertical flat surface measured with hot-wire anemometers
14 p2430 A69-29575

Flow and temperature boundary layers on longitudinally curved walls, giving higher approximation exact solutions
15 p2591 A69-30933

Temperature distributions in layer with internal heat source and turbulent fluid flow cooling, deriving differential heat transfer equations
15 p2718 A69-31169

Inlet thermal boundary layer thickness effect on conical nozzle heat transfer and boundary layer determined by operating nozzle with cooled/uncooled inlet [AIAA PAPER 69-474]
16 p2881 A69-32780

Temperature jumps at gas-solid interface in shock tube calculated by one dimensional approximation of thermal boundary layer behind reflected shock wave
17 p2949 A69-33023

Electron temperature and number density measured at atmospheric pressure in plasma thermal laminar boundary layer adjacent to cooled wall [AIAA PAPER 69-692]
17 p3011 A69-33446

Interferometric study of electron concentration and mass density profiles through ionized argon thermal end-wall layer formed in shock tube [AIAA PAPER 69-694]
17 p3074 A69-33477

Thermal boundary layer formed during laminar jet flow over flat porous plate, discussing temperature distribution and mass transfer at plate surface
21 p3854 A69-39846

Velocity and temperature boundary layers on plane wall developed by ideal shock tube flow for weak shock and expansion waves
22 p3932 A69-40894

Lower boundary approximation for theory of thermal laminar steady state boundary layer on isothermal immersed plate
23 p4150 A69-41334

THERMAL BUCKLING

Flutter analysis of plates with inplane boundary support flexibility exposed to transverse pressure loading or buckled by uniform thermal expansion
11 p1992 A69-25523

Correlation between temperature and stress field in thermal buckling of square viscoelastic Maxwell plates under random temperature
12 p2188 A69-27113

Thermal and athermal component of flow stress and deformation dynamics for Ti at low homologous temperatures determined by stress relaxation tests
21 p3749 A69-39598

Uniaxial tensile testing machine to operate under combined creep and fatigue conditions for studying dislocation structure changes in metals and alloys at high temperature
22 p3926 A69-40441

Thermal buckling of skew plates clamped along all edges under radiant heating, measuring various characteristics, solving differential equations by difference method
22 p4044 A69-40599

THERMAL COMFORT

Radiative, convective and evaporative heat losses and thermal comfort conditions for human beings, describing theoretically and empirically based equation
06 p0880 A69-17087

THERMAL CONDUCTIVITY

Polycrystalline corundum thermal conductivity coefficients determination, describing measuring procedures at low temperatures
01 p0101 A69-10108

Critique of paper on thermal conductivity of composite materials by long wave method
01 p0172 A69-11272

N dimensional extensions of finite difference scheme for solution of differential heat conduction equation, noting practical limit by truncation error considerations
01 p0107 A69-11365

Alkali metal vapors thermal conductivity determination by temperature difference dilatometric measurement
02 p0247 A69-11579

Temperature dependence of thermal conductivity coefficient and specific heat of sublimating heat proof materials
02 p0350 A69-11580

Procedure accounting for variable thermal conductivity and internal heat generation in temperature distribution prediction for waveguide ferrite slabs
02 p0215 A69-11877

Ti alloys anomalous variations in physical properties measuring electrical, thermal conductivity and thermal EMF
03 p0443 A69-13029

EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane
03 p0484 A69-13278

Lithium niobate crystals thermal properties measured at various temperatures
03 p0487 A69-13730

Pressure rise and thermal conductivity in cylindrical hydrogen plasma column in axial magnetic field, assuming local thermal equilibrium
03 p0479 A69-13967

Thermal conduction of chambers for selective and nonselective film detectors at low oburation frequencies
03 p0432 A69-14216

Temperature distribution over receiving layer of absorption edge image transformer, discussing thermal conduction influence on performance of thin film IR image receiver
04 p0631 A69-15280

Approximate method to determine nonstationary thermal fields in solid bodies with thermal capacity and thermoconductivity coefficient depending linearly on temperature
04 p0688 A69-15409

Subject classification bibliography for thermal contact resistance [ASME PAPER 68-WA/HT-18]
05 p0847 A69-16122

Transient method for measuring thermal properties of biological materials, concerning thermal conductivity, inertia and blood flow rate
06 p0879 A69-17086

Arc cloud thermal conductivity effects on discharge temperature and radiation intensity, solving energy balance equation
06 p0964 A69-17254

Viscous MGD channel flow in boundary layer approximation with heat conduction, transforming resultant partial differential equations set to system of ordinary differential equations
06 p0966 A69-17523

Thermal insulating characteristics of low conductance interstitial materials under compressive loads, noting carbon paper and wire screens [AIAA PAPER 69-25]
06 p1036 A69-18072

Thermal explosion criterion used for explosion/ignition delay of exothermic material surrounding heated wires having good thermal conductivity [WSCI PAPER 68-23]
07 p1240 A69-18359

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution
08 p1251 A69-20322

Energy consideration in electron beam welding, obtaining expression for penetration decrease in terms of thermal diffusivity [ECS PAPER 144]
08 p1320 A69-20360

Evaluation methods for DC electrical conductivity, heat conductivity and viscosity in plasmas
08 p1364 A69-20477

Soviet book on theory of heat conductivity covering physical principles of transfer and boundary value problems
08 p1421 A69-20647

Silicon dioxide glass thermal conductivity at very low temperature
09 p1493 A69-21426

Thermal conductivity, electrical resistivity and degree of blackness of refractory metals at high temperatures measured by Bode and Eger-Disselhorst methods
09 p1522 A69-21589

Homogeneous parabolic differential equation for heat transfer of two finite bodies in thermal contact solved by power series
09 p1532 A69-21628

Local axial voltage variation from one dimensional model applied to solve thermionic boundary conditions in two dimensional thermal analysis of converter
09 p1440 A69-21834

Variational calculation of coefficients of viscosity, thermal conductivity, thermal diffusivity and diffusion in binary mixture
11 p1997 A69-24285

Thermal conductivity of polycrystalline beryllium oxide as function of temperature and pressure in argon or helium atmosphere, discussing heat transfer mechanism
11 p1906 A69-25225

Turbulent viscosity and thermal conductivity coefficients for entire cross section of fluid flow including wall boundary layers
11 p1873 A69-25228

Wavelength of convective motions, discussing effects of lid heat conductivity on Rayleigh number
11 p2003 A69-25354

Thermal conductivity of hydrogen plasma in transverse magnetic field at high temperatures
12 p2133 A69-25765

Room temperature thermal conductivity of semiconducting alloys with stoichiometric distributions of vacancies in cation sublattice, discussing heat resistance
12 p2142 A69-25975

Comparative calibration characteristics determination, discussing absolute measurements method for thermal conductivity parameters
12 p2091 A69-26363

Model, assuming electron thermal conductivity contribution, applied to studying solar plasma discharge characteristics in presence of three dimensional thermal sources in solar corona
12 p2149 A69-26680

Heat transfer in solid bodies, deriving thermal conductivity equation and surface boundary conditions in presence of radiative energy transfer
13 p2373 A69-27584

Internal and external heat transfer instrumentation and equipment bioengineering, listing thermal conductivity and diffusivity of biological materials
13 p2213 A69-28150

Rigid heat conductor in continuum thermodynamics, discussing conductivity tensor symmetry and heat capacity positivity as restrictors
13 p2377 A69-28193

Thermal conductivity prediction technique for two and three phase solid heterogeneous mixtures
13 p2378 A69-28337

Heat flow resistance between solid bodies in contact in vacuum
13 p2378 A69-28338

EPR spectra and thermal conductivity measurement in excited organic semiconductor salt derivatives of tetracyanoquinodimethane
14 p2508 A69-29652

Thermal diffusivity and conductivity of rolled plane parallel spectrally pure palladium preheated in vacuum and high temperatures
15 p2636 A69-30045

Necessary and sufficient conditions for boundary point regularity in Dirichlet problem for heat conduction equation assuming Holder condition
15 p2716 A69-30047

Thermal conductivity coefficients in solar corona and chromosphere computed and tabulated for H plasma
15 p2694 A69-30788

Induced high pressure HF discharge parameters computed for Ar, O and N by using electrical and thermal conductivity functions
15 p2662 A69-30976

Air plasma electrical and thermal conductivity coefficients measured in wall stabilized DC arc at atmospheric pressure and high temperatures
15 p2663 A69-30979

Thermal conductivity of semiinfinite rod with insulated surface and constant internal heat source, considering finite heat propagation rate
15 p2719 A69-31181

Lattice components of heat conductivity and chemical composition relations of magnesium alloy solid solutions
16 p2824 A69-31567

Lattice component of heat conductivity in n-type cadmium arsenide at low temperatures by suppressing

electron component of conductivity with strong transverse magnetic field

16 p2824 A69-31568

Heat conductivity of liquid and solid gallium telluride in steady state regime, using graphite cylindrical device

16 p2824 A69-31572

Electrical and thermal conductivities of high pressure arc plasmas from I-V characteristics and radial temperature profile

16 p2817 A69-31644

Thermal contacts effects on optimum operating conditions of solar thermoelectric power generator, discussing losses due to low thermal conductivity coefficient of insulating layers

16 p2741 A69-32797

Flame front structure and combustion rates of gases as function of temperature dependence of thermal conductivity, diffusion coefficients, density and molecular weight

17 p3069 A69-33136

Thermal analysis of opacified fibrous insulation systems, discussing heat transmission, heat transfer and thermal conductivity relations to compression load and temperature

[AIAA PAPER 69-605] 17 p3072 A69-33282

Thermal contact resistance measurement at various ambient pressures compared with theoretical predictions with each parameter analyzed over interface by computer program

[AIAA PAPER 69-629] 17 p3073 A69-33299

Approximate equations for transonic viscous heat conducting gas flow past finite body of revolution

17 p2891 A69-33312

Terminal characteristics of composite superconductor, taking into account heat transfer to coolant, interface thermal contact resistance and superconductor size

17 p3007 A69-33792

Exact analytic solution for thermal conductance of two dimensional eccentric constriction in dimensionless numbers

18 p3228 A69-34375

Shock heated argon thermal conductivity studied by optical interferograms, deriving equation for measured mean value

18 p3228 A69-34459

Ti thermal diffusivity and conductivity at high temperatures measured from heat wave phase shift

18 p3156 A69-34699

Channel heat transfer determination based on thermal conductivity coefficients as functions of temperature gradients in channel wall materials

18 p3230 A69-34988

Thermal conductivity calculation for chemically reacting multicomponent gas mixture, comparing results from Brokaw method and simplified formula

20 p3483 A69-36974

Radiative heat transfer in polycrystalline cerium, studying photon thermal conductivity influence on lattice thermal resistivity

20 p3565 A69-36975

Thermal contact conductance of thermally thick specimens with thermocouples not located at interface

20 p3632 A69-37521

Correlating IR lunar nighttime temperature and bearing strength of lunar materials, using expressions of thermal conductivity and bearing strength of porous media in vacuo

20 p3613 A69-38248

Refractory materials thermal conductivity high temperature measurement technique, discussing sample geometry, furnace design, temperature modulation and computerized simulation

21 p3742 A69-38422

Thermal conductivity coefficient of gas mixtures at low temperatures obtained using quantum diffusion model and Chapman-Enskog method for Boltzmann equation

21 p3848 A69-38638

Experimental facility for studying heat conductivity of multicontact metallic and nonmetallic materials /plates/ in vacuum at low temperatures under various loads

21 p3721 A69-38639

Asymptotic method applied to nonlinear equations, determining thermal conductivity coefficient for temperature distribution in moving anisotropic media

21 p3848 A69-38642

Heat transfer coefficients evaluated from gas to rotating turbine blades in unsteady operation, using unsteady thermal conductivity and gradient methods

21 p3850 A69-38864

Viscosity, thermal conductivity and diffusion predicted for dilute nonpolar, polar and mixed gases, discussing methods for rotational relaxation collision numbers and resonant correction

21 p3850 A69-38951

Laplace transforms in heat conduction theory in three dimensional infinite homogeneous body

21 p3851 A69-39011

Approximate solution of unsteady thermal conductivity for plate with unlimited number of layers

21 p3851 A69-39083

Constant surface heating of half space with temperature dependent thermal conductivity

21 p3851 A69-39292

Temperature field in deflector cooled turbine blades for nonstationary regimes, considering heating of cooling air, thermal conductivity and thermophysical coefficient changes

21 p3786 A69-39718

Heat flow through ocean floor by measuring temperature gradient and thermal conductivity in ocean sediment

21 p3718 A69-39733

Effective thermal conductivity parallel to laminations and total conductance for combined parallel and normal heat flow in multilayer insulation

[AIAA PAPER 68-765] 21 p3853 A69-39763

Concentration distribution of admixture in semibounded jet propagating along nonheat conducting plate, obtaining concentration profiles for various thermal and diffusion Prandtl numbers

21 p3854 A69-39844

Navier-Stokes equations exact solutions for two dimensional steady flow of compressible viscous heat conducting perfect gas

22 p3929 A69-40117

Thermoelectric power generator with variable thermal conductivity and electrical resistivity, obtaining steady state temperature distribution, power output and thermal efficiency

22 p3868 A69-40131

Plasma thermionic diode figure of merit based on Hatsopoulos model altered to include thermal conduction and electrical resistance

22 p3869 A69-40134

Thermal conduction by electrons in stellar matter, presenting opacity tables for H, He, C and red giant cores and solar composition

22 p4014 A69-40147

Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results

[AIAA PAPER 69-1013] 22 p3922 A69-40386

Absolute thermal conductivity measurements on fluid normal H and fluid parahydrogen, noting apparatus and data graphical presentation along isotherms, isochores and isobars

[NAS-NRC PAPER D-1] 22 p3998 A69-40631

Thermal conductivity precision tests for refractory materials using ASTM method C 201-47, emphasizing sample preparation and calorimeter calibration

22 p3956 A69-40671

Forced convection liquid flow past heated flat plate with variable viscosity and thermal conductivity, analyzing velocity and temperature distribution in boundary layer

22 p4051 A69-40685

Porosity and composition effects on thermal conductivity of glass fiber reinforced plastics, noting tests of multilayer textolite sheets

22 p3973 A69-40747

Conductor material thermal conductivity contribution to self similar explosion in strong magnetic field, determining critical field strength

22 p3982 A69-41019

Analog problem solution for semiinfinite medium with Newtonian cooling at boundary, noting first term of asymptotic expansion in heat conduction equation

22 p4052 A69-41126

Thermal conductivity, Volume 2, covering fluids, thermal diffusivity, semiconductor materials, role in heat transfer, etc

23 p4236 A69-41323

Thermal conductivity relationship to heat transport coefficients for gases and liquids with charged or uncharged particles

23 p4237 A69-41324

Thermal conductivity measurements of fluids, considering contribution of radiation, convection, temperature jump and experimental arrangement eccentricity to errors

23 p4237 A69-41325

Heat transfer and surface thermal conduction characteristics of contact of two solid bodies,

discussing pressure effect, measurement and analytical techniques

23 p4237 A69-41327

Unsteady thermal conductivity calculated by approximate analytical method in simple shape bodies/infinite plate, long cylinder, sphere/ cooled or heated by thermal radiation

23 p4238 A69-41333

Thermal conductivity and specific heat of groups of liquid substances as functions of temperature, giving curves, tables and conversion factors

23 p4238 A69-41336

Transport coefficients in neutral gases, discussing fundamental relations of parameters in viscosity, thermal conductivity and self, pressure and thermal diffusion

23 p4193 A69-41514

Thermal conductivities /K/ of rock forming minerals reveals K as linear function of density for constant mean atomic weight

24 p4310 A69-43216

Contraststreaming self gravitating gas streams stability taking into account thermal conduction and radiation effects

24 p4388 A69-43638

THERMAL CONDUCTIVITY GAGES

Thermistor assembly apparatus for measuring coefficient of thermal conductivity of pure and binary mixture of gases

05 p0845 A69-15616

Simultaneous and independent measurement of thermal conductivity, thermoelectric power and electric resistivity, applying method to cadmium arsenide-zinc arsenide system

05 p0764 A69-16338

Column method of measuring thermal conductivity of CO and oxygen in 350-1500 degrees K temperature range, discussing error sources and data reliability

[AIAA PAPER 69-603] 17 p3073 A69-33298

THERMAL CONVECTION

U FREE CONVECTION

THERMAL CURRENTS

U CONVECTIVE FLOW

THERMAL CYCLING TESTS

Crack initiation and propagation in Ti alloys during thermal cyclic heating, noting influence of gas saturation

01 p0094 A69-10215

Vacuum heating and thermal cycling influence on mechanical and structural properties of aluminum sheets fabricated from sintered powder

02 p0266 A69-12126

Thermal cycling tests showing improvement in cadmium sulfide solar cell stability, noting effect of thermal cycling stresses

03 p0367 A69-13074

Elastoplastic element structural growth induced by thermal cycling analyzed as function of temperature and sustained axial load

[ASME PAPER 68-WA/MET-14] 05 p0837 A69-16067

Device for measurement of time to failure of brittle materials in thermal-endurance testing, noting shock wave

06 p0927 A69-17690

Thermal stability of refractory and cermet materials, analyzing small samples subjected to cyclic high energy radiative heating and air-water cooling

12 p2118 A69-26262

Homogenization of martensite formation in nickel 300 grade maraging steel, analyzing anisotropic transformation strains during thermal cycling

13 p2278 A69-27410

Concorde thermal fatigue resistance tested by alternate heating and cooling cycles simulating supersonic flight profile

13 p2241 A69-28102

Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling

13 p2365 A69-28252

Space environment simulation tests of cadmium sulfide thin film solar cells, noting output loss

14 p2405 A69-29538

Device for fatigue testing turbine disk models in unsteady temperature fields with radial and axial nonuniformity produced by HF heating

15 p2583 A69-30208

Crack initiation and propagation in Ti alloys during thermal cyclic heating noting influence of gas saturation

15 p2637 A69-30271

Mechanical testing of high temperature materials subjected to thermal cycling by high power pulsed laser beam

15 p2636 A69-31512

Hydrogen effects on ELI Ti-Al-Sn alloy, conducting tensile, fretting and abrasion tests on stressed and thermal cycled specimens

[AIAA PAPER 69-585] 16 p2803 A69-32760

Cumulative rapid thermal cycling influence on progressive disappearance martensitic transformation in 18 percent nickel maraging steel

18 p3155 A69-34650

Spacecraft and components testing methods critical reassessment, discussing cost reduction, vacuum and thermal cycle tests

18 p3118 A69-35082

Concorde structural tests emphasizing problems associated with thermal cycle, including fatigue test setup on complete airframe

[RAES PAPER 16] 22 p4043 A69-40495

Silicide and B-modified coatings on Mo, noting improved high temperature oxidation resistance under thermocycling

22 p3957 A69-40972

Silicon solar cell panels, studying roles of solder, interconnector metals and substrate materials in failures under thermal cycling

23 p4070 A69-42274

THERMAL DECOMPOSITION

U PYROLYSIS

THERMAL DEGRADATION

Low temperature grinding technique for IR spectra of propellants and binders in potassium bromide disks

01 p0082 A69-10892

Thermal time constant in Si diffused transistors decreases with increased neutron dosage

06 p0975 A69-16873

Thermogravimetric plastics analysis data applied as constants to degradation kinetics equations used in charring-ablator digital computer programs

09 p1529 A69-22312

Bearing deposition test for evaluating degradation characteristics of aircraft gas turbine engine lubricants

10 p1700 A69-24070

Polyester/ammonium perchlorate combustion, determining degradation rate by loss in weight method at different intervals

13 p2324 A69-28234

Planar bipolar transistors degradation under thermal and ionizing radiation stresses, analyzing surface recombination currents of silica films and silica-silicon interfaces

15 p2625 A69-30826

Composite polymers thermophysical properties at thermal destruction temperatures, noting increased heating rate effect on kinetic curves

18 p3161 A69-34696

Mechanical properties and thermal aging of laminated specimens of collimated B monofilament reinforced composites preimpregnated with polyimide resin

19 p3354 A69-35514

Thermal decomposition of molybdenum carbonyl, deriving general equations, noting agreement with experimental data

20 p3558 A69-37015

THERMAL DIFFUSION

Diffusional, thermal diffusional and thermal fluxes in multicomponent flames, discussing flame structure and reaction kinetics

01 p0175 A69-10144

Diffusion data in binary compound semiconductors, tabulating impurities, electrical behavior, temperature variations and diffusion coefficients

02 p0296 A69-11809

Mechanical properties of thermomodified layers obtained by vacuum chromizing of steel, establishing need to decarburize substrate material

03 p0450 A69-13913

Nonlinear and second order thermal diffusion of electrons in ionized gas

04 p0636 A69-14878

Heat diffusion in cylinder with heat sources creating axisymmetric temperature distribution, using Gauss hypergeometric function and Meijer G-function

04 p0687 A69-15188

Thermal diffusion coefficient and composition of gas mixtures by measuring gas flow rate in capillary tube as function of viscosity

04 p0688 A69-15410

Diffusion and thermal diffusion in mixture of Maxwellian gases, analyzing Onsager reciprocity relations

05 p0849 A69-16461

Thermochemical surface finishing trends, discussing methods to obtain complex diffusion layers

05 p0769 A69-16540

Energy consideration in electron beam welding, obtaining expression for penetration decrease in terms of thermal diffusivity

[ECS PAPER 144] 08 p1320 A69-20360

Automatic counter for concentration of cloud condensation nuclei in thermal diffusion chamber, measuring light scattering coefficient of cloud

09 p1494 A69-21640

Heat resistant alloying of niobium with group 4A, 5A and 6A elements, studying elements diffusion mobility dependence on melting point

09 p1525 A69-22144

Thermal diffusion and free thermal convection in fluids by diffraction interferometer, using laser for light source

10 p1702 A69-23431

Electronic properties of beryllium doped silicon studied with IR absorption spectroscopy and electrical measurements, describing Be thermal diffusion

10 p1747 A69-23989

Variational calculation of coefficients of viscosity, thermal conductivity, thermal diffusivity and diffusion in binary mixture

11 p1997 A69-24285

Enthalpy excess thermodynamic functions of binary gas mixtures based on stationary diffusion thermoeffect in tube

11 p2003 A69-25552

Theoretical model describing electrodynamic plasma properties of HF flame discharge in air, heating discharge envelopes by heat diffusion from discharge channel surface

12 p2140 A69-27125

Internal and external heat transfer instrumentation and equipment bioengineering, listing thermal conductivity and diffusivity of biological materials

13 p2213 A69-28150

Small disturbances distribution in flow parameters along two dimensional combustion zone of finite width using thermal diffusion theory

14 p2537 A69-28986

Green functions for Laplace, Poisson and transient heat diffusion equations solved by matrix multiplication

15 p2710 A69-30870

Thermal diffusion coefficient for fully ionized plasma containing mixture of arbitrary charge ions in topside ionosphere

16 p2775 A69-32084

Turbulent heat and mass diffusion in catalytic reactors for hydrazine decomposition, developing computer program to calculate temperature and reactant concentration distributions

16 p2846 A69-32768

Ti thermal diffusivity and conductivity at high temperatures measured from heat wave phase shift

18 p3156 A69-34699

Titanium alloys case hardened by diffusion of various metals at high temperatures, measuring increase in wear resistance

19 p3344 A69-36153

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

19 p3345 A69-36156

Boron thermal diffusion effects on plastic properties of pure Mo subjected to recrystallization

19 p3328 A69-36160

Transport coefficients in neutral gases, discussing fundamental relations of parameters in viscosity, thermal conductivity and self, pressure and thermal diffusion

23 p4193 A69-41514

THERMAL DIFFUSIVITY

Nonlinear diffusion of heat in semiinfinite wall having thermophysical characteristics dependent on temperature, showing dissymmetry between heating and cooling

01 p0177 A69-11404

Molten salts thermal diffusivity measurement method at temperatures above melting point

[ASME PAPER 68-WA/ENER-5] 05 p0848 A69-16161

One dimensional integral solution for cylindrical source generated transient temperature field and relation to thermal diffusivity of brain tissue

06 p0879 A69-17085

Thermal diffusivity and conductivity of rolled plane parallel spectrally pure palladium preheated in vacuum and high temperatures

15 p2636 A69-30045

Thermal diffusivity measurement by nonsteady state methods, discussing time and temperature variables and heat flow differential equation

23 p4237 A69-41323

THERMAL DISSOCIATION

Second virial coefficient of atomic nitrogen and oxygen, discussing thermodynamic properties of associating mixtures

03 p0473 A69-14119

Thermal dissociation of chlorine trifluoride behind incident shock waves at high temperature, discussing bimolecular reaction rate constant

[WSCI PAPER 68-40] 07 p1202 A69-18393

TiO gas dissociation energy data discrepancies, discussing high temperature vaporization and thermodynamic properties

08 p1268 A69-21010

Thermodynamic dissociation constants of alkylphenols in aqueous and methanol media based on UV spectroscopic analysis, noting anticarcinogenic properties

11 p1831 A69-24534

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings

12 p2190 A69-25894

Outgassing behavior of polymers in spacecraft by thermal-vacuum weight-loss and contamination tests

13 p2286 A69-28084

Aluminum, Cu, Ni and titanium oxides injection into axis of Ar thermal induction plasma, observing decomposition as function of distance traveled within plasma

13 p2315 A69-28451

Cyanogen molecules increase attributed to novae shell compression from analyzing absorption spectrum of DQ Hercules 1934 after brightness maximum

15 p2688 A69-30558

Ammonium perchlorate sublimation models, discussing low temperature decomposition influence on pressure dependence of sublimation rate

[WSCI PAPER 69-22] 16 p2832 A69-32360

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios

[AIAA PAPER 69-420] 16 p2841 A69-32685

Gladstone-Dale constants for dissociating high temperature oxygen determined for molecule and atom from density changes across shock

18 p3176 A69-34452

Thermal dissociation rate of HBr in Ar in 2100-4200 K temperature range by shock tube analysis, using IR emission and UV absorption

20 p3484 A69-37347

Thermal dissociation of chlorine trifluoride behind incident shock waves as function of temperature using UV absorption spectroscopy

21 p3670 A69-39739

THERMAL EFFECTS

U TEMPERATURE EFFECTS

THERMAL EFFICIENCY

U THERMODYNAMIC EFFICIENCY

THERMAL EMISSION

NT THERMIONIC EMISSION

Planetary nebulae radio emission, observed with pencil beam of radio telescope, confirming thermal spectrum at radio frequencies

01 p0157 A69-11291

Atmospheric water vapor content from summer-fall 1966 measurements of atmospheric radio wave absorption of thermal radio emission, describing experimental apparatus

02 p0274 A69-11439

Gases emissivity at high temperatures calculated for different gas layer thicknesses and atmospheric pressures, giving results in tabular form

02 p0285 A69-11567

Natural microwave radiation generation and propagation and wideband signal detection in problems connected with radio wave propagation, geophysics, radiometeorology and plasma physics

03 p0420 A69-12919

Poole-Frenkel model for internal field assisted thermal emission with compensation for relative densities of donor and acceptor sites

04 p0640 A69-14450

IR observations of lunar crater and maria enhanced thermal emission during eclipse, constructing model of cratered surface to analyze thermal behavior

04 p0654 A69-14650

Equation for calculating meteor shielded tubular panel heat radiators emissivity and weight optimization, considering surface thermal balance and temperature distribution

05 p0846 A69-15891

Radio astronomical methods for total atmospheric absorption of radio waves by atmospheric thermal radio emission measurements based on sky brightness temperature

05 p0723 A69-16779

Relation between satellite data concerning thermal microwave radiation and meteorological conditions in lower atmosphere for possible use in weather forecasting

06 p0953 A69-17995

Radio wave brightness temperatures and contrast characteristics in presence of clouds and precipitation

06 p0954 A69-17999

Antenna transmission and receiving system effects on radio brightness temperature measurements by airborne equipment

06 p0929 A69-18000

Radiation emission factors determination of polished metallic surfaces

07 p1242 A69-18952

Epithermal microwave radiation from plasma produced by PIG Reflex in magnetic field with mirror geometry, discussing radiation at harmonics of electron cyclotron frequency

08 p1370 A69-21019

Far IR source in galactic center detected at 100 microns, noting thermal emission of interstellar dust grains as possible mechanism

09 p1603 A69-22264

Coronal IR observations during solar eclipse revealing thermal emission zone at predicted interplanetary dust vaporization region

10 p1789 A69-24131

Silicon dioxide coated Al reflectance, solar absorptivity and total normal and hemispherical thermal emissivity, noting application to satellite temperature control

11 p1918 A69-24835

Vibrational relaxation frequency of asymmetric stretching mode of carbon dioxide determined by measuring rate of thermal emission in shock waves near 4.3 microns

11 p1922 A69-25128

Atmospheric thermal radio emission fluctuations effects on radio telescope sensitivity, evaluating dispersion at low angles to horizon

12 p2031 A69-26643

Thermal and free-free emission from planetary nebulae based on graphite grain model, discussing IR fluxes

12 p2172 A69-27158

Thermal emission from metal in contact with dielectric for cryogenic insulation applications

13 p2374 A69-27783

Current oscillations and electromagnetic radiation in low pressure cesium thermal emission converters using glass diode with plate geometry metal electrodes

14 p2402 A69-29246

Thermal emission converter, using Cs-Ba mixture in low voltage arc mode, detailing construction

14 p2403 A69-29247

Thermoemission converters /TEC/ cathode materials, discussing determination of local work function by electron microscope and delay curves methods

14 p2505 A69-29265

Temperature of underlying surface and moisture content of atmosphere from satellite thermal radio emission measurements

15 p2648 A69-30641

Earth thermal emission intensity measured by two beam radiometer onboard Cosmos 149, noting discrepancy between empirical and theoretical transfer functions of atmosphere

15 p2596 A69-30651

Integral normal emissivity of Ta and Hf carbides at temperatures from 1300 to 3000 K measured by radiation method in vacuum

15 p2640 A69-30984

Pyrolytic zirconium carbide emissivity during initial heating compared with results for specimens prepared by powder metallurgy

15 p2640 A69-30985

Venus microwave spectrum analyzed by comparing various thermal and nonthermal emission models, discussing surface temperature and atmospheric composition

16 p2853 A69-31597

Radiative heat transfer in nonisothermal media composed of spherical particles with complex refractive index emitting absorbing and scattering energy anisotropically, considering various geometries [AIAA PAPER 69-626]

17 p3073 A69-33297

Lunar surface brightness temperatures from IR observations, determining thermal emission directional characteristics to infer surface temperatures from Surveyor data

[AIAA PAPER 69-593] 17 p3033 A69-33302

Quantitative IR spectral emissivity measurements of NO between 300-800 K made in absorption, correlating observed absorptance with optical path length and gas pressure

17 p3009 A69-34156

Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness

18 p3127 A69-34421

Observations of W49 at 2800 MHz with East-West resolution, analyzing shape of thermal and nonthermal source

18 p3195 A69-34427

Thermal emission and spectral degree of blackness of W derived from electron motion equation

18 p3156 A69-34715

Solid cloud cover moisture content relation to outgoing thermal radiation, obtaining correlation coefficient and regression equations

23 p4184 A69-42488

Mars thermal energy emission measurement by Mariner 1969 IR radiometer, indicating frozen carbon dioxide cap and minimum temperature

24 p4384 A69-43196

Radio emission from diffuse thermal radio sources in northern Milky Way, giving contour maps

24 p4388 A69-43641

Seyfert galaxies IR radiation attributed to dust grains thermal emission of energy absorbed from galactic nucleus

24 p4374 A69-43741

THERMAL ENERGY

Information theory application to study of biologically stimulating effects of low ionizing radiation doses, thermal energy and other environmental factors

03 p0369 A69-13434

Thermal-chemical rocket based on thermal heating by energy input from nuclear fission process

03 p0496 A69-13666

Electrodynamic generator for direct conversion of moving dielectric medium potential or thermal energy to electric power

03 p0369 A69-14153

Thermal potential P and Q smoothness on surfaces, proving relevant theorems

05 p0849 A69-16452

Thermally activated processes influence on dislocation interaction and on temperature dependence of flow stress in niobium single crystals

08 p1333 A69-20446

Microscale fluctuations in interplanetary magnetic field, considering proton thermal energy and magnetic field energy densities

10 p1785 A69-24100

Two chamber DC arc heater with vortex stabilization, determining current-voltage characteristics and efficiency

13 p2244 A69-28557

Radiative and conductive heat transport mechanisms at cryogenic temperature applicable to thermal energy transport minimizing technique in containment system

17 p3074 A69-33680

Book on thermal processes of earth and moon covering heat generation and transfer, internal temperatures, gravitational energy, etc

19 p3401 A69-35887

Thermal energy rate constants of ion-molecule reactions in gaseous hydrogen, deuterium and HD, using ion cyclotron resonance method

20 p3578 A69-36934

Afterglow decay rates of Zn II laser lines in spontaneous emission measured, indicating thermal energy charge exchange excitation and CW oscillation

21 p3735 A69-38598

Thermal energy effects on life processes, discussing living cell metabolism, biochemical reactions, enzyme action and protein catalytic functions, etc

21 p3652 A69-38782

Thermotidal energy transfer from lower neutral atmosphere to and above lower ionosphere, considering tidal wave transmission mechanism

23 p4155 A69-41561

Incoherent object threshold light detection by quantum limited optical system in presence of radiant thermal energy

23 p4191 A69-42147

Radioisotope thermal energy /RITE/ source for integrated life support systems for two man 180 day space station mission, determining optimum material selection and design details

23 p4189 A69-42268

THERMAL ENERGY STORAGE

U HEAT STORAGE

THERMAL ENVIRONMENTS

Rms approximation validity limits for satellite temperature variances by deriving equations for thin insulated plate in space

02 p0352 A69-12211

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

03 p0506 A69-13088

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments [AIAA PAPER 68-1154]

03 p0533 A69-13669

Saturn fireball thermal environment associated with liquid propellant explosions, using analytical model

04 p0645 A69-14475

Thermal performance of pressure transducers, accelerometers, displacement transducers, resistance thermometers and control mechanisms for NERVA reactor

06 p0956 A69-16885

Space radiator dynamic model for predicting outlet temperature transient response to environmental variations

[AIAA PAPER 69-29] 06 p1039 A69-18205

Simultaneous measurements of cumulus cloud thermal structure and concentration of water particles larger than 18 micron diameters

09 p1536 A69-21866

Thermal and pressure environments analysis in Saturn S-1C stage base during flight tests, noting base gas flowfield and heating

[AIAA PAPER 69-318] 09 p1611 A69-22383

Boundary conditions for time dependent temperature variations of calorimeter operating in regular thermal regime

11 p2003 A69-25702

Environmental problems of entry vehicle returning from lunar or planetary mission, discussing heat protection system efficiency

11 p1968 A69-25721

Thermal conditions of upper blanket of lunar surface during eclipse, using data to calculate lunar radio emission

14 p2515 A69-28770

Extragalactic background radiation intensity in isotropic world models as function of universe thermal history

14 p2514 A69-29769

Optimal design for improving thermal performance of existing spacecraft thermally actuated lower system by increasing open-to-closed emittance ratio

[AIAA PAPER 69-627] 17 p3071 A69-33269

Vacuum and thermal environment long term influence on thermal resistance for Mg to aluminum and Mg to Mg bolted joints

[AIAA PAPER 69-628] 17 p3073 A69-33309

Micropropulsion system with sublimable solid fuel for satellite attitude control, satisfying mechanical and thermal environmental conditions during launch and in space

17 p3021 A69-33359

Linear thermal anomaly on western margin of Mare Humorum, rejecting internal heating origin

21 p3797 A69-38535

Active cooling systems for high performance reentry vehicles in thermal and shear stress environments

[AIAA PAPER 68-39016] 21 p3851 A69-39016

Orbiting Astronomical Observatory thermal test and evaluation program, discussing equipment and role in experimental design

[AIAA PAPER 69-995] 22 p3920 A69-40373

OSO spacecraft thermal design modified to operate University of Minnesota zodiacal light monitor experiment

[AAS PAPER 69-173] 24 p4393 A69-42873

THERMAL EXPANSION

Exploding wire phenomenon during early expansion from time correlated X ray and optical streak photographs in vacuum chamber

01 p0119 A69-10670

Pre-cracked ceramic rocket nozzle throat inserts, discussing improved thermal displacement accommodation, load transmission, fracture tolerance, articulation capability, etc

02 p0334 A69-12369

Lithium niobate crystals thermal properties measured at various temperatures

03 p0487 A69-13730

Dilatometer for measuring thermal expansion of solid bodies over temperature range at various gas media pressures

03 p0432 A69-14151

THERMAL FATIGUE

- Refractive index and expansion thermal coefficients along axis of oriented Nd-YAG laser rod
04 p0609 A69-14293
- Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon
04 p0619 A69-15392
- Expansion anisotropy in angular distribution of laser produced plasmas in terms of drifting and expanding sphere model, discussing particle velocities, currents and time integrated counts
05 p0804 A69-16460
- Latticed gas model liquid-vapor phase properties calculated with allowance for thermal expansion
06 p1029 A69-16896
- Four specimen vacuum device for simultaneous tensile creep tests at 1200 C, discussing linear and thermal expansion
07 p1116 A69-19318
- Thermal expansion of polymers at cryogenic temperatures
07 p1172 A69-19730
- Thermal expansion coefficients of Nb-Zr-Ti alloy and plexiglass at 10-300 K from dilatometric measurements
11 p1905 A69-24917
- Axial support system for controlling thermal distortion of 82 inch heliostat mirror for Kitt Peak solar telescope
12 p2058 A69-26422
- Stress in elastic cylinder under thermal expansion with one end clamped expressed by series expansion of biharmonic function using least squares method
14 p2534 A69-29284
- Uncoupled dynamic thermal stresses and displacements by heat generation in infinite flat plates, using classical thermoelasticity theory for infinitesimal displacements
15 p2709 A69-30669
- Dilatometric and X ray study of temperature dependence of linear expansion coefficients of lattice constants of chromium disilicon
18 p3156 A69-35020
- Large area Si solar cell arrays design, considering environment, cell layout, thermal expansion, coverslides fabrication, costs, etc
19 p3253 A69-35708
- Thermal expansion properties of oxides and oxide solid solutions measured for improved expansion coefficient search
20 p3567 A69-38066

THERMAL FATIGUE

- Crack initiation and propagation in Ti alloys during thermal cyclic heating, noting influence of gas saturation
01 p0094 A69-10215
- Thermal fatigue testing system for martensitic steels using fluidized bed heating and cooling, specimen manipulation means, cycle control, data evaluation, etc
10 p1714 A69-23979
- Concorde thermal fatigue resistance tested by alternate heating and cooling cycles simulating supersonic flight profile
13 p2241 A69-28102
- Crack initiation prediction in high temperature components subjected to arbitrary thermal-mechanical cycling
13 p2365 A69-28252
- Crack initiation and propagation in Ti alloys during thermal cyclic heating noting influence of gas saturation
15 p2637 A69-30271
- B fiber reinforced Ni failure characteristics at high temperature, discussing plastic deformation and matrix role in crack inhibition
21 p3743 A69-38616
- Dislocations multiplication and rearrangement structure in thermal fatigue of Mo single crystals produced by electron beam zone melting
21 p3746 A69-39162
- Thermal fatigue combined with mean stress, reversed mechanical stress, low cycle fatigue and static creep in stainless steel
21 p3847 A69-39813

THERMAL INSTABILITY

- Thermal instability in power transistor structures, considering effects of design, emitter and base resistance at high currents
08 p1373 A69-20858
- Electrothermal instabilities for explanation of MPD arc thruster rotating spoke phenomenon, noting agreement with experimental results
09 p1566 A69-21254

Hall current effect on thermal instability explaining nonself gravitating astronomical objects, discussing current effects on propagation modes
16 p2854 A69-31649

Heat transfer coefficient approximation under thermal instability conditions complicated by radiant heat exchange at plate surface, noting aircraft design applications
18 p3230 A69-34984

THERMAL INSULATION

- Temperature field and stress state in elastic plane with temperature insulated arc shaped crack
01 p0164 A69-10078
- Unsteady laminar boundary layer near thermally insulated rotating disk, establishing solutions describing motion
01 p0059 A69-10361
- Surface temperature of flat plate cooled convectively and insulated by circular spot, determining effects of spot radius and Biot number
03 p0531 A69-12863
- Thermal design and test for liquefied gas vessels under unsteady insulation cooling conditions
04 p0687 A69-15162
- Thermal insulating characteristics of low conductance interstitial materials under compressive loads, noting carbon paper and wire screens
06 p1036 A69-18072
- Human body heat loss control during water immersion, discussing insulative garments and technologies of energy conversion systems
08 p1267 A69-20681
- Super insulation blankets comprised of dacron sailcloth, silk net or aluminized mylar, describing crinkling, cutting, sewing and hole drilling techniques
09 p1507 A69-22330
- Cryostat design, discussing vapor and radiation shielding, construction and insulation materials, safety features, cost considerations, etc
10 p1810 A69-24015
- Liquid helium vented and nonvented storage container design and handling techniques
10 p1810 A69-24016
- Differential catalytic thin film heat gage for measuring surface temperature variations and ionized flow heat transfer, noting insulating boundary layer thickness
11 p2002 A69-25231
- Insulated one man life raft for sea survival in arctic or subarctic conditions, evaluating thermal protection with endurance time and rectal temperature
12 p2020 A69-26550
- Thin multiple layer superinsulation protection against reentry heat, discussing composite design considerations and refractory materials selection
12 p2060 A69-26817
- Thermal insulation for cryogenic storage in space, discussing Apollo service module conversion to cryogenic service module
12 p2175 A69-26827
- Thermal emission from metal in contact with dielectric for cryogenic insulation applications
13 p2374 A69-27783
- Outgassing rates of multifoil insulation materials for sealed vacuum systems measured over temperature range as function of pumping time
13 p2299 A69-28016
- Multifoil thermal insulation using oxide particle layer separation, discussing insulation heat transfer characteristics as function of source temperature and oxide particle size
14 p2539 A69-29213
- Thermal conductivity of semiinfinite rod with insulated surface and constant internal heat source, considering finite heat propagation rate
15 p2719 A69-31181
- Thermal contacts effects on optimum operating conditions of solar thermoelectric power generator, discussing losses due to low thermal conductivity coefficient of insulating layers
16 p2741 A69-32797
- Heat transfer suppression techniques in high temperature low density fiberglass insulation for flight vehicles
17 p3072 A69-33279
- Thermal analysis of opacified fibrous insulation systems, discussing heat transmission, heat transfer and thermal conductivity relations to compression load and temperature
17 p3072 A69-33282
- Thermal design of landed vehicle on Mars surface, discussing instrument package covering inside surface coating and battery insulation
17 p3049 A69-33295

Lunar module multilayer radiation insulation for thermal control, testing aluminum coated Mylar and Kapton sheets
17 p3073 A69-33300

Multifoil thermal insulation for radiation shielding from cryogenic temperatures to 3500 F, noting thermal conductivity
19 p3341 A69-35548

Combined heat transfer by radiation and conduction in disperse media /thermal insulation/ described by system of nonlinear integrodifferential equations
20 p3631 A69-37000

Conducting and insulating construction materials at high temperatures for MHD conversion nozzles, noting lifetimes
21 p3751 A69-38477

Rotating stratified fluid in thermally insulated cylinder, studying angular velocity abrupt change effects under stable temperature distribution
21 p3694 A69-38761

Laminar free convection from horizontal infinitesimal strip with downward facing thermally insulated vertical walls at edges, noting boundary layer thickness and flow pattern
21 p3853 A69-39672

Effective thermal conductivity parallel to laminations and total conductance for combined parallel and normal heat flow in multilayer insulation
21 p3853 A69-39763

Internal interactions of continua and concept of thermal isolation, discussing second law of thermodynamics
22 p4050 A69-40450

Moisture detector for evaluating trapped water effects in thermal insulation, describing equipment and test procedure
24 p4312 A69-42755

Hazard rating for flammability of aerospace materials in air and oxygen environments applied to J-2 rocket engine insulation
24 p4336 A69-43423

Sprayable polyurethane foam external insulation for liquid hydrogen and oxygen storage aboard Saturn S-2 booster
24 p4337 A69-43453

THERMAL NEUTRONS

- Slow atmospheric neutron energy spectrum determined by resonance detectors and $1/\nu$ detectors, measuring cadmium ratio dependence on longitude and latitude
10 p1758 A69-22831
- Thermal neutron flux perturbations in cylinders in test reactors, using regression analysis to obtain polynomials for flux perturbation, depression, self shielding factors, etc
20 p3575 A69-38274
- Thermal neutron capture cross section at high temperature irradiations determined for W 184, describing radiochemical separation and flux counting techniques
24 p4315 A69-43192

THERMAL NOISE

- Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influenced by appearance of thermal noise
01 p0152 A69-10578
- Ultra cone system for ultralow noise reception of RF space communication from Mariner 5 during occultation by Venus
02 p0220 A69-12429
- Measured noise temperature in argon tubes vs theoretical electron temperature for gas discharge noise sources
02 p0210 A69-12437
- Microwave thermal noise standards, discussing construction, calibration and errors for field operational liquid nitrogen cooled waveguide noise standard
02 p0210 A69-12438
- Compensation method for measurement of mismatched noise source effective temperature independent of reflection coefficient, noting error analysis
02 p0210 A69-12441
- Mismatched errors associated with Y factor power ratio measurement effect on microwave noise-temperature calibrations
02 p0211 A69-12442
- Thermal noise from passive linear multiports, noting influence of temperature and absorption coefficients
02 p0211 A69-12443
- Noise generation and propagation in linear N cascaded mismatched two port networks, noting application to microwave measurements in low noise technology
02 p0211 A69-12445

Low temperature microwave thermal noise standard, discussing waveguide termination, cryogenic cooling and temperature and pressure controls
02 p0211 A69-12446

Additive noise measurement in microwave power amplifiers under continuous wave and pulsed conditions
02 p0221 A69-12454

Liquid helium cooled broadband parametric amplifier, discussing circuits and noise performance
02 p0221 A69-12458

Digital simulation of demodulator/tracking phase locked loop of navigation/traffic control satellite system in thermal noise diffuse multipath fading environment
03 p0390 A69-13204

Thermal and shot noise in pumped resistive diode for frequency conversion, analyzing equivalent circuits
03 p0406 A69-13828

Maser model of single mode field coupled to N identical two level atoms, deriving threshold, stable and unstable steady states, relaxation oscillations, etc
03 p0441 A69-14108

Noise reduction in parametric electron beam amplifier by cooling two frequency resonator noise to liquid nitrogen temperature
05 p0728 A69-15654

Thermal noise and other disturbances from mismatched two port isolator in low power microwave transmission antenna noise between generators and leads
07 p1108 A69-19486

Thermal feedback generation of 1/f-flicker noise in bipolar transistors, deriving formula for flicker noise voltage of emitter junction
08 p1283 A69-20129

Spontaneous reverse current due to Brillouin EMF observed in diode in thermal noise range
10 p1661 A69-22950

Digital simulation of phase locked receiver in diffuse multipath fading environment with band limited thermal noise
11 p1839 A69-25298

Critical review of statements concerning previous paper on noise in transistor mixers at HF
11 p1857 A69-25662

Formulas derived for tropospheric equivalent noise temperature as function of frequency, noting applicability to thermal radiation from rain
12 p2032 A69-26704

Thunderstorm thermal noise emission determined by radiometer and steerable parabolic antenna in preparing water content contours along radio rays
12 p2127 A69-27002

Soviet monograph on intrinsic noise emission in radio channels covering noise temperature at receiver input, thermal microwave radiation, etc
13 p2219 A69-27304

Angle of arrival in amplitude comparison monopulse radars in presence of internally generated thermal noise
13 p2220 A69-27942

Mean-minute thermal noise intensity distribution in telephony channels of tropospheric radio relay systems
14 p2412 A69-29425

Optimum thermal and nonlinear noise intensities distributions in frequency division multiplex satellite communications systems, relating relay station power, frequency band and channels
14 p2412 A69-29426

VHF and uHF MOS tetrode minimum noise factor computed as function of frequency by adding thermal noise sources to resistive parts of equivalent circuit
15 p2577 A69-30603

Micrometeorites acoustic recordings on Cosmos 135, investigating data reliability influences by appearance of thermal noise
15 p2691 A69-30748

Noise reduction in parametric electron beam amplifier by cooling two frequency resonator noise to liquid nitrogen temperature
16 p2762 A69-32511

Optimal radar receivers and waveforms with limited dynamic range for detecting point target masked by thermal noise and clutter returns
17 p2921 A69-33625

Antenna high noise temperature reduction in single channel combined transmission and reception of tracking and communication data
19 p3275 A69-36328

Radio relay FM channel data transmission, evaluating cumulative thermal noise due to IF amplification at each station
21 p3672 A69-38653

Spin-phonon systems thermal noise, based on combined lattice and spin lattice Hamiltonian densities, applied to acoustic noise field measurements
24 p4350 A69-43061

THERMAL PLASMAS
Coupled wave equations for propagation transverse to magnetostatic field in horizontally stratified and magnetized gyrotropic warm plasma
01 p0129 A69-10611

Green function for linear antennas in warm plasma fed by coaxial air filled transmission line, computing current distribution and input admittance
02 p0215 A69-11942

Wave fields and coupling of RF power to ion cyclotron waves in finite length thermal collisional plasma column
03 p0474 A69-13114

Thermal metal-plasma thermodynamic equilibrium, using surface ionization of inner and outer potentials and work function, discussing ion and electron extraction
06 p0979 A69-17249

Nonlinear interaction between cyclotron harmonic waves propagating perpendicular to static magnetic field in warm magnetoplasma, noting parametric amplification and mode conversion
06 p0968 A69-17766

Ion-cyclotron instabilities in hot-ion cold- electron plasma resulting from left-hand circularly polarized wave propagating parallel to magnetic field
06 p0969 A69-17951

Two fluid approximation of one dimensional steady state flow of inviscid plasma with thermal gradients, considering ionization and recombination processes
07 p1189 A69-18691

Comparative models of magnetoplasma, discussing wave propagation in cold plasma, warm plasma and microscopic model
07 p1190 A69-18919

Sco XR 1 optical and X ray spectra simultaneous observations during rocket flights
07 p1220 A69-19391

Wave behavior in warm inhomogeneous plasma with magnetic field perpendicular to density gradients of unperturbed plasma, solving Maxwell-Vlasov equations by perturbation methods
08 p1365 A69-20744

Warm plasma magnetic interactions, discussing density waves, pair correlation function and transport coefficients
08 p1366 A69-20749

Magnetic pinch effect in thermal RF induction plasma in argon, developing theory for calculating excess magnetic pressure
09 p1544 A69-21341

Warm plasma addition to mirror confined hot plasma stabilizing convective loss cone mode
09 p1551 A69-22040

Electrical conductivity, electron density and population temperature as functions of current density in Cs-He thermal plasma studied with nonequilibrium ionization model
10 p1732 A69-23443

Earth thermal plasmasphere contraction subsequent to solar flare obtained from ion mass spectrometers onOGO satellites
10 p1683 A69-23777

Low energy plasma fluxes in magnetosphere, discussing plasmopause position dependence on geomagnetic activity
12 p2150 A69-26747

Laminar MGD electrode boundary layer of thermal nonequilibrium plasma from collisionless Langmuir sheath and continuum theories
13 p2310 A69-28031

Aluminum, Cu, Ni and titanium oxides injection into axis of Ar thermal induction plasma, observing decomposition as function of distance traveled within plasma
13 p2315 A69-28458

Longitudinal inhomogeneities in plasma of Q machines caused by ion emission from hot plate at different radial positions
14 p2502 A69-29959

Equivalent dielectric tensor for warm drifting electron plasma using model
16 p2820 A69-31701

Warm plasma probe, describing transit electrons interaction with electric field and generation of electroacoustic waves radiation
16 p2824 A69-32611

Coupling between electric dipoles in warm plasma, determining electron density and temperature from resonance peak of mutual impedance at electron plasma frequency
17 p2925 A69-33846

Suprathermal electron flux in lower latitudes and polar region analyzed from measurements by retarding potential analyzers on Explorer 31 satellite
20 p3590 A69-37880

THERMAL POWER
U TURBOGENERATORS

THERMAL PROPERTIES
U THERMODYNAMIC PROPERTIES

THERMAL PROTECTION
Thermal protection by ablation calculated, emphasizing blocking phenomenon and effectiveness of laminated and reinforced resins
02 p0351 A69-11890

Apollo thermal protection system, noting low density ablation, flight and ground tests
[AIAA PAPER 68-1142] 03 p0519 A69-13558

Entry corridor thermal entry limits for Apollo spacecraft defined for design of thermal protection system
[AIAA PAPER 68-1144] 03 p0521 A69-13673

Kinetic heating of aircraft, discussing aerodynamic boundary layer, relationship between heat transfer coefficient or boundary layer energy turbulence and skin friction
03 p0534 A69-14087

Inflatable solar shields for thermal protection of space vehicles utilizing cryogen propellants
06 p1017 A69-17609

Life raft thermal protection against exposure of crews to cold, noting chemically fueled heaters and IR reflective liners
06 p0883 A69-17841

Water cooling jackets of plastic textile reinforced film for high inside temperature reduction in protective clothing
06 p0883 A69-18027

Thermal protection system optimization for storage of cryogenic propellants in space, noting vented systems
[AIAA PAPER 69-27] 06 p1039 A69-18211

Protection against burn producing intense thermal exposures, noting double layer of fire resistant material
[AGARDOGRAPH-111] 08 p1266 A69-20674

Spray cooling techniques for thermal protection of aerospace structures including lithium spray cooling, vapor collection and condensation, etc
11 p1966 A69-24532

Porous cermet electrodes thermochemical protection by blowing neutral gas into electrode boundary layer, examining effect on volt-ampere characteristics
11 p1826 A69-25232

Environmental problems of entry vehicle returning from lunar or planetary mission, discussing heat protection system efficiency
11 p1968 A69-25721

Space mission medical heat problems covering thermal characteristics and heat control, protection and resistance of space vehicle and astronaut adaptation
12 p2023 A69-26493

Passive thermal control system for space suit use in extravehicular environment, discussing skin temperature control at varying heat flow rates
12 p2023 A69-26549

Insulated one man life raft for sea survival in arctic or subarctic conditions, evaluating thermal protection with endurance time and rectal temperature
12 p2020 A69-26550

Thermal insulation for cryogenic storage in space, discussing Apollo service module conversion to cryogenic service module
12 p2175 A69-26827

Electron energy effects on reflectance degradation and recovery of thermal control materials in vacuum, reporting test results for various protective coatings
[AIAA PAPER 69-643] 17 p3005 A69-33306

Collection of papers on thermal design principles of spacecraft and entry bodies
18 p3227 A69-34372

Ablative materials thermal protection characteristics at low heating rates evaluated by convective heating tests, stressing polyurethane foam composite
19 p3357 A69-35536

Heat protection efficiency of plane surface in turbulent boundary layer behind tangential slots, comparing cooling effects of insulating gas films
20 p3631 A69-37095

Polyurethane foam composites for low heating rate thermal protection, noting astroquartz fiber additive effect on performance
21 p3753 A69-39236

Thermal design of power amplifier for airborne HF transceiver, discussing component layout, air cooling and materials
22 p3909 A69-39942

Thermal protection for air-launched missile electronics during carry and free flight, considering active, passive and combination systems and weight penalties
22 p4049 A69-39943

IR directional and hemispherical emittance of spacecraft thermal control coatings, comparing values determined by various measurement techniques
23 p4164 A69-41633

THERMAL RADIATION NT PHONON BEAMS

Radiation from isothermal sphere in vacuum having spherical scattering indicatrix solved by Bubnov-Galerkin method with allowance for scattering
01 p0174 A69-10106

Solar absorptance, total hemispherical emittance and absorptance/emittance ratio for metals at cryogenic temperatures measured simultaneously with sinusoidally perturbed incident radiation
01 p0176 A69-10847

Satellite meteorological research in U.S.S.R., discussing Cosmos satellites instrumentation, earth thermal radiation distribution, IR and UV spectra and cloud photography
01 p0111 A69-10950

Thermal radiation effects on two dimensional steady MHD jet of conducting ionized gas confined by magnetic field
02 p0287 A69-11831

Broadband null balancing microwave scanning radiometer using diode in feedback loop as reference noise source
02 p0221 A69-12457

Brightness temperature maps for Jovian thermal radiation obtained through 8-14 micron window of atmosphere
02 p0309 A69-12715

Lunar thermal radiation measurements at 8.6 and 3.2 mm wavelengths, noting brightness temperature-time relationship in curves and as Fourier components
02 p0327 A69-12717

Mean atmospheric downward radiation fluxes for large territories, using simple model atmospheres in derivation of computational formulas
03 p0422 A69-13410

Earth velocity through 3 K cosmic background radiation, measuring velocity by determining anisotropy of radiation
03 p0511 A69-13475

Monograph on radiation gas dynamics, thermal radiation, applied spectroscopy and ablation and applications in high speed atmospheric entry
04 p0685 A69-14597

Thermal explosion in Poiseuille flow of reacting viscous fluid in infinite circular cylindrical channel or between two rotating infinite cylinders
04 p0686 A69-14986

Solar and terrestrial thermal radiometer absolute calibration noting standards and methods
04 p0602 A69-15429

Regular thermal conditions in solid bodies with radiative heat transfer
05 p0845 A69-15896

Regularization methods in inverse problems of atmospheric optics, analyzing atmospheric thermal sounding and interpretation of radiation measurements
06 p0919 A69-17616

Dermal injury predictability for exposure to thermal radiation based on mathematical model using temperature-time histories
06 p0875 A69-17840

Thermal radiative reflectance characteristics of low density charring ablators subjected to planetary entry environment simulation
[AIAA PAPER 69-61] 06 p0947 A69-18148

Solar absorptance and hemispherical emittance of metals at space conditions determined with cyclic incident radiation technique
[AIAA PAPER 69-60] 06 p0945 A69-18154

Spectral reflection computer program utilizing virtual image technique to determine reflection characteristics of enclosed diffusely emitting surface
[AIAA PAPER 69-65] 06 p1040 A69-18215

Nitrogen plasma thermal radiation in spectral region from 0.5 to 1.1 micron, noting plasma state near local thermodynamic equilibrium
07 p1189 A69-18283

Gamma heating rate measured by aqueous dosimeter converted to rate in thin tungsten detector in water shield through transport theory calculations, obtaining correction factors
07 p1178 A69-18825

Diurnal thermal wave form driven by harmonically oscillating ground temperature in nongray atmosphere,

calculating results for terrestrial and Martian atmospheres
07 p1126 A69-19036

Southern Hemisphere galactic H II regions continuum thermal radiation at 6 cm, noting maps for 28 of 36 sources, peak temperatures and emission and half intensity widths
07 p1206 A69-19271

Thermal and nonthermal radiation of hot gases using spectroscopic plasma diagnostics
08 p1363 A69-20463

Collection of papers on thermal problems in aerospace medicine covering intense heat, cutaneous vasomotor and sudomotor control, water immersion, etc
08 p1263 A69-20667

Aircrew members skin temperature changes in response to intense diffuse thermal radiation, noting psychological response to exposure
[AGARDOGRAPH-111] 08 p1264 A69-20669

Thermoregulatory reactions of human body to sharp increase of ambient radiant temperature
[AGARDOGRAPH-111] 08 p1264 A69-20670

Skin and subcutaneous temperature during exposure to intense thermal radiation, discussing estimation of subcutaneous temperature from skin temperature data
[AGARDOGRAPH-111] 08 p1264 A69-20671

Thermal radiation effects on cutaneous vasomotor and sudomotor control of human organism
[AGARDOGRAPH-111] 08 p1265 A69-20672

Protection against burn producing intense thermal exposures, noting double layer of fire resistant material
[AGARDOGRAPH-111] 08 p1266 A69-20674

Human reactions to increasing heat exposure, noting thermoregulation and metabolic and evaporative heat loss
[AGARDOGRAPH-111] 08 p1265 A69-20675

Photon momentum distribution role and relation to thermal radiation spectrum in fully ionized gases
08 p1357 A69-20747

Bismuth bolometer as sensor recording IR radiation for thermal radiation fluctuations in atmosphere caused by temperature inhomogeneities
09 p1490 A69-21868

Iron line absence in emission spectrum of thermal X ray sources, constraining proposed thermal models
09 p1580 A69-22231

Atmospheric thermal sounding by measuring outgoing thermal radiation with infinite resolution device, describing regularization method
09 p1491 A69-22707

IR emissivities of powdered silicates and cloudy atmosphere model of spectral emission for radiative transfer in condensed powder
10 p1778 A69-23414

Thermal radiation properties of gases in thermodynamic equilibrium, discussing radiation resulting from electronic, atomic and molecular state transitions
11 p1998 A69-24460

Fluctuations in angle of arrival of laser and thermal radiation beams over near ground path
11 p1840 A69-25570

Long wave radiation fields calculations based on radiation transport equations, identifying differences between associated transmission functions
12 p1225 A69-25951

Thin multiple layer superinsulation protection against reentry heat, discussing composite design considerations and refractory materials selection
12 p2060 A69-26817

Monograph on atmospheric radiation transfer including absorption, scattering, direct, diffuse, global, thermal and net radiation
12 p2073 A69-26918

Soviet monograph on intrinsic noise emission in radio channels covering noise temperature at receiver input, thermal microwave radiation, etc
13 p2219 A69-27304

Radiation measurements by Cosmos 122 satellite over various regions, determining radiation temperature, long wave heat flux and albedo
13 p2291 A69-27726

Thermal radiation effects on laminar free convection boundary layer of vertical flat plate, studying absorbing and nonabsorbing gases
[ASME PAPER 68-HT-43] 13 p2373 A69-27772

Thermal emission from metal in contact with dielectric for cryogenic insulation applications
13 p2374 A69-27783

Statistical analysis of radiation temperature structure for automatic recognition of meteorological situations from actinometric satellite observations
13 p2293 A69-27842

Thermal radiation effects on subsonic flow of ideal gray gas, calculating streamwise variations of flow properties
15 p2717 A69-30944

Thermal radiation polarization in anisotropic gyrotropic media described by Hermitian permittivity tensor, noting linearity
15 p2653 A69-30944

Atmospheric thermal sounding by measuring outgoing thermal radiation with infinite resolution device, describing regularization method
16 p2782 A69-32040

Broadband thermal radiometer containing InSb electronic bolometer under magnetic field, discussing astronomical applications
17 p2969 A69-32822

Apparent thermal radiation properties for optically dimensionally rough surface, discussing variance with property models employed in engineering analysis of radiant transfer
[AIAA PAPER 69-622] 17 p3071 A69-33279

IR radiometer to measure Jupiter atmospheric temperature by calculating certain constituents heat radiation levels through Planck formula assuming black body properties
17 p2974 A69-33422

Microwave thermal emission by water measured from aircraft, studying radiation dependence on surface roughness
18 p3127 A69-34422

Multifoil thermal insulation for radiation shields from cryogenic temperatures to 3500 F, noting thermal conductivity
19 p3341 A69-35540

Thermal IR image forming devices, explaining principles of image and object plane scanning
20 p3540 A69-37738

Reflection indicatrices of rough surface subjected to heat radiation for stationary and variable incidence angle, noting spatial distribution
21 p3847 A69-38455

Lunar surface thermal radiation incident on unit area flat surface located at variable distance and orientation above moon, considering diffusion effects
21 p3803 A69-38973

Surface roughness effects on equilibrium temperature of isolated adiabatic plane surface illuminated by collimated and uniform solar flux
22 p4050 A69-40558

Thermal perturbation propagation in nonlinear medium, considering thermal relaxation effects
22 p4051 A69-40712

Unsteady thermal conductivity calculated by approximate analytical method in simple shape bodies/infinite plate, long cylinder, sphere/cooled or heated by thermal radiation
23 p4238 A69-41333

Frequency response of thin film thermal detectors, discussing steady state harmonic response proportionality to film thickness and thermal conductivity
23 p4163 A69-41549

Parametric differentiation applied to radiation gas dynamics equations solution, considering energy transfer by thermal radiation in high speed reentry
[AIAA PAPER 68-668] 23 p4059 A69-41892

Thermal radiation diffraction of dielectric cylinder/cold plasma model/containing N plus one layers with arbitrary temperatures and permittivities
23 p4123 A69-42028

Minimum air temperature forecast by terrestrial thermal or long wave radiation balance measurement, using radiometer data
23 p4184 A69-42211

Thermal continuum radiation from coronal plasmas at soft X ray wavelengths, investigating variations effect in element abundances
23 p4207 A69-42406

IR measurements applications to meteorology, discussing IR radiation characteristics, atmospheric effects, thermal radiation detection and differences between real and black bodies
24 p4316 A69-43507

THERMAL RADIO EMISSION U RADIO EMISSION

THERMAL RESISTANCE

Nitriding effect on heat resistance and transition temperature of molybdenum alloys
01 p0093 A69-10212

Cooling rate effect during aging on heat resistance of forged blanks of nickel based chromium alloy
02 p0266 A69-12125

Phase diagram and heat resistance relation for ternary titanium alloys, considering component interaction and dissolution and dispersion effects
02 p0268 A69-12357

Subject classification bibliography for thermal contact resistance

[ASME PAPER 68-WA/HT-18]

05 p0847 A69-16122

Chemical composition relationship to heat resistance of titanium alloys, using diagrams for establishing composition of new multicomponent alloys

07 p1163 A69-18780

Radome materials with superior dielectric and temperature characteristics for constructing high tolerance microwave multiband radome

07 p1109 A69-19514

Contactors for helium in dilution refrigerator mixing chamber, discussing design and thermal resistance determination

09 p1493 A69-21429

Increased Ti heat resistance by forming solid solutions and compounds having various dispersions and bond strength

09 p1525 A69-22140

Heat resistance preservation in heat resistant alloys by inhibiting dislocation motion during operation at high temperatures

09 p1525 A69-22141

Refractory metal oxidation protection by inorganic compounds at high temperatures, discussing protective mechanisms

09 p1526 A69-22322

Transistor thermal resistance determined from temperature dependent transistor parameter, noting measuring method insensitive to collector voltage variations

09 p1468 A69-22592

Spontaneous reverse current due to Brillouin EMF observed in diode in thermal noise range

10 p1661 A69-22950

Heat resistant DIPAM and HNS explosives in aerospace applications, considering mild detonating fuse and core loading

10 p1750 A69-23014

Heating system providing symmetrical temperature field and specimen self centering for thermal resistance tests

10 p1696 A69-23845

Heat resistant composites, discussing composition, properties and high temperature behavior, plastic materials, reinforcement filaments, whiskers and test methods

12 p2117 A69-25855

Conformal transformation reducing transverse thermal resistance of cylinder of revolution to thermal resistance of semiinfinite medium

12 p2190 A69-26292

Space mission medical heat problems covering thermal characteristics and heat control, protection and resistance of space vehicle and astronaut adaptation

12 p2023 A69-26493

Thermal resistance of bolted or screwed sheet metal joints in vacuum, using method applicable to different materials and surface finishes

12 p2191 A69-26803

Heat resistant polyamides and polyimides for electrical insulation, discussing properties and applications under extreme temperatures and basic reactions

13 p2286 A69-27988

Contact between cylindrical surfaces in thermionic converters, determining thermal resistance and pressure in contact area

14 p2400 A69-29216

High temperature thermal resistance stability of multilayer cylindrical elements for thermionic converters determined by layer strain rate

14 p2539 A69-29218

Nitriding effect on heat resistance and transition temperature of molybdenum alloys

15 p2637 A69-30268

Boron effect on sintered porous Ni friction at high sliding velocities and temperatures, analyzing oxide film destruction restraint by decreased Ni plasticity

15 p2641 A69-31187

Optical measuring methods of cross sections and mechanical properties of heat resistant fiber reinforced materials

16 p2803 A69-31804

Transistor temperature and power limitations and thermal resistance calculation, discussing heat sink surface optimum design for power losses

16 p2760 A69-32047

Vacuum and thermal environment long term influence on thermal resistance for Mg to aluminum and Mg to Mg bolted joints

[AIAA PAPER 69-628] 17 p3073 A69-33309

Gravimetric and IR absorption spectra analysis for determining heat resistance and chemical changes in organosilicon resins during heating

17 p2992 A69-33744

Molecular structure and uses of heat resistant plastics, discussing aromatic polyamides

18 p3161 A69-34279

Heat sensitive paints thermophysical characteristics determined by nonstationary heat conditions method

18 p3161 A69-34697

High temperature structural adhesives developed from thermoplastic aromatic-heterocyclic polymers

19 p3357 A69-35560

Heat resistance evaluation of ZHS6-K alloy subjected to multicomponent surface diffusion alloying combinations of Al, B, Cr, Si, Zr

19 p3345 A69-36159

Seam welded U-type fin efficiency and effectiveness, studying effects of fin height, heat transfer coefficient and thermal resistance

19 p3452 A69-36371

Vanadium thermistor fabrication influence on resistance jump at phase change temperature of vanadium dioxide, reproducing parameters by heat treating doped vanadium pentoxide

19 p3256 A69-36718

Heat resistant coatings - Conference, Leningrad, may 1966

20 p3559 A69-37357

Temperature fields and stresses in heat resistant ceramic coatings, illustrating alumina coating on Mo to calculate heating rate

20 p3565 A69-37359

Inorganic heat resistant coatings high temperature mechanical tests noting corrosion, safety factors and rigidity after heating and temperature gradients

20 p3538 A69-37360

Temperature effect on grain size, crystal orientation, microhardness and heat resistance of diffusion Si coatings on Mo

20 p3560 A69-37361

Fusion welding for thin gauge corrugated core sandwich airframe structures capable of operating at high temperature, discussing equipment, techniques and quality control

[SBAC PAPER 9] 20 p3549 A69-37448

Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump

21 p3785 A69-39103

Hybrid microelectronic modules, using basic thermal design guidelines

22 p3910 A69-39952

Spacecraft electronic components operating junction temperature control, considering role of thermal resistance in controlling radiative and conductive transfer

[AIAA PAPER 69-1015] 22 p3922 A69-40387

Thermal conductivity precision tests for refractory samples using ASTM method C 201-47, emphasizing sample preparation and calorimeter calibration

22 p3956 A69-40671

Thin film thermistors heat-separated from graphite substrate to achieve positive temperature resistance coefficient via argon heating and oxygen cooling

22 p3997 A69-41214

Thermal isolation characteristics of low conductance interstitial materials determined, using test apparatus of axially loaded radiation shielded cylindrical column in vacuum

[AIAA PAPER 68-31] 23 p4239 A69-41889

Temperature control by heat pipe using noncondensing gas with methanol to vary thermal resistance and mathematical model to describe heat source temperature variations

23 p4240 A69-42307

Welded honeycomb sandwich structures of Ti, steel and similar materials for use in extreme thermal and acoustical environments

[AIAA PAPER 68-973] 24 p4326 A69-43716

THERMAL SHOCK

Approximate expression for temperature distribution during heat transient in infinite solids of plane, cylindrical and spherical geometry

06 p1025 A69-17779

Dynamic internal thermal shock in spherical shells of arbitrary thickness, considering uncoupled dynamic thermoelasticity problems with spherically symmetrical temperature fields

07 p1236 A69-19471

Thermal shock stresses in flat plates, solids and hollow cylinders, noting geometry, wall thickness, heat transfer characteristics and material properties effects

[ASME PAPER 69-GT-107] 09 p1619 A69-22523

Thermal shock temperature distribution and thermal stresses in finite circular disk subjected to instantaneous point heat source

13 p2363 A69-28130

Bonded solderless solar cell panel prototype withstanding high annealing temperature and thermal shock without electrical or mechanical degradation

19 p3251 A69-35688

Boron nitride and boron nitride composite under high temperatures in air and vacuum for various time periods, discussing thermal shock and oxidation resistance

19 p3359 A69-36208

Dispersion of paraffin cork after instantaneous shock heating, noting expansion at various isotropic indices

19 p3301 A69-36839

THERMAL SIMULATION

Low temperature simulation of hypersonic melting ablation and wave patterns of gas-liquid interface

06 p0907 A69-18064

Thermal vacuum simulator for testing manned Lunar Module Test Vehicle, using conformal skin heaters to control heating rates and skin temperature

[AIAA PAPER 69-312] 09 p1479 A69-22386

Aerodynamic heating of ELDO-A booster rocket, calculating flow field, heat transfer and conduction by method of characteristics and thermal models

11 p1966 A69-25433

Thermal stability of power transistor plates calculation using equivalent body with equivalent heat source at upper surface

12 p2042 A69-26881

Thermal stability of complex transistorized structures determined by extending method of single heat source equivalence to several interacting sources

12 p2042 A69-26882

Space environment simulation for vacuum, solar radiation, heat sink and orbital motion, discussing oil contamination of optical surfaces

13 p2241 A69-28079

Scale modeling of multilayer insulated spacecraft for thermal design, considering solar probe and two meter telescope models

[AIAA PAPER 69-613] 17 p3049 A69-33267

Handbook of solar simulation for thermal vacuum testing, discussing space environment, thermal control coatings, radiation sources, optical components, etc

21 p3690 A69-38894

Speed conditions of environmental simulation of thermal scale models of reentry vehicles, considering ablatives with phase-change and involved chemical reaction

[AIAA PAPER 69-1011] 22 p3922 A69-40384

THERMAL STABILITY

Disulfide effects on jet fuel operating characteristics and demercaptization influence on thermal stability, corrosive action and sedimentation

01 p0142 A69-11098

Structural stability of manganese austenitic steels at high temperatures, discussing phase transformations and carbide precipitation changes

01 p0100 A69-11294

Ammonium perchlorate base propellant and polyurethane binder heat stability, dangers of aging under abnormal conditions and reaction products for components and tolylene diisocyanate

02 p0303 A69-11529

Intentional impurities effects on nitronium perchlorate thermal stability explained by change in cation and anion vacancies

02 p0304 A69-11899

Radiation resistance of MOS transistors noting relationship with thermal stability, gate oxidation and metals used

02 p0221 A69-12468

Plane Couette flow stability in heated nonlinear viscous fluid flowing between horizontal plates heated to different temperatures

02 p0235 A69-12828

Niobium based alloys modulus of elasticity temperature stability, investigating admixture effects

04 p0615 A69-14642

Temperature measurement of moving droplets, noting influence of thermocouple electrode stability

04 p0688 A69-15423

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse ribs and initial defects under combined pressure and thermal stress

05 p0832 A69-15692

Ferrite materials characteristics related to choice for use in waveguide devices, noting importance of low HF magnetic losses and thermal stability

05 p0810 A69-16792

Radiation defects stability in semiconductor, noting low temperature electron irradiation of Ge and effects of annealing

06 p0974 A69-16863

Thermal flutter effect on gravity gradient stabilized spacecraft, noting dependence on sunlight and time
07 p1226 A69-18325

Polymeric Schiff bases synthesis, thermal stability and nature of pyrolytic decomposition of polyazines and derived polystylenes
07 p1074 A69-18628

Stress rupture, creep and thermal stability of AT-3 titanium alloy, discussing possible applications
07 p1163 A69-18782

Alternative balancing technique utilizing linear combination of two equal and opposite drift characteristics to minimize drift in integrated differential amplifiers
07 p1102 A69-18874

Temperature sensitivity of frequency of integrated oscillators, giving design method for achieving temperature compensation
07 p1103 A69-18882

Lattice location of dopant elements implanted into Ge determined by carbon ion backscattering, noting substitutional concentrations above thermal equilibrium solubilities
07 p1199 A69-18903

Thermal stabilization and ethylene oxide effect on spaceborne electronic component sterilization and decontamination
08 p1283 A69-20266

Fire retardant thermally stable electrical grade thermoset resins tested for flexural and dielectric strength and weight loss
08 p1340 A69-20506

Optimization of plane smooth rectangular panels of constant cross section subjected to loading and heating conditions
08 p1417 A69-20821

Thermal stability criteria for thermionic converter performance evaluation, noting electron cooling influence
09 p1441 A69-21838

Temperature stability of slightly ionized gas for arbitrary collision cross sections, discussing electron temperature variation as function of electric field strength
09 p1551 A69-22039

Nickel base wrought and cast superalloys examined to determine minor phases and microstructure thermal stability in high temperature heat treated condition
10 p1714 A69-23977

Thermodynamic stability of dense plasma consisting of electrons and charged ions, plotting ionization potential as function of electron density and temperature
11 p1922 A69-24232

Hot inert gas bubble thermal stability in cool reactive liquid
11 p1998 A69-24475

Thermally induced oscillatory instabilities in spacecraft booms, rederiving thermal torque equation to predict finite twist response
11 p1994 A69-25531

Thermally stable polymers for high stress aerospace applications, noting chemical stability and structure of high polymers
12 p2117 A69-25853

Thermal stability of refractory and cermet materials, analyzing small samples subjected to cyclic high energy radiative heating and air-water cooling
12 p2118 A69-26262

Thermal stability of power transistor plates calculation using equivalent body with equivalent heat source at upper surface
12 p2042 A69-26881

Thermal stability of complex transistorized structures determined by extending method of single heat source equivalence to several interacting sources
12 p2042 A69-26882

Time delay in temperature controlled transistorized time delay circuit determined by transistor unsteady thermal processes
12 p2043 A69-26883

Refractory ceramic materials thermal stability in high temperature subsonic ionized gas flow products, emphasizing zirconia and magnesia
13 p2285 A69-27472

Stellar atmosphere models of pure hydrogen in hydrostatic, radiative and statistical equilibrium, including Lyman-alpha and continua, discussing nonLTE deviations
13 p2338 A69-27560

Antifriction characteristics of hard lubricating coatings based on molybdenum disulfide and graphite in inert gas atmosphere and vacuum, determining thermal stability temperature ranges
13 p2269 A69-28053

Numerical methods for solving steady state and transient heat transfer problems suitable for high speed digital computer
13 p2376 A69-28141

Electrooptical ADP modulator design for use with helium-neon laser, considering temperature stability and crystal faces parallelism
13 p2272 A69-28191

Rigid heat conductor in continuum thermodynamics, discussing conductivity tensor symmetry and heat capacity positivity as restrictors
13 p2377 A69-28193

Thermionic converter stability as function of cesium pressure, heat input, reservoir temperature, load voltage or resistance
14 p2402 A69-29236

Thoria strengthened Ni-Cr alloys high temperature stability, noting thoria particle size influence
14 p2465 A69-29682

Time and temperature effects on corrosion and structure of Hastelloy alloy C-276
14 p2466 A69-29930

Operating conditions influence on thermal stability of DC plasmatron arc to obtain high temperature source
15 p2663 A69-30994

Second breakdown and other thermal instabilities analyzed by heat flow equation, obtaining stability criteria predicting reduced power dissipation for transistor at low currents
16 p2758 A69-31618

Thermal stability of Hastelloy Alloy C-276 determined from time and temperature tests for corrosion and grain boundary precipitation
16 p2799 A69-31719

Ammonium and magnesium perchlorate mixture thermal stability study with differential scanning calorimetry, noting exothermic decomposition of AP [AIAA PAPER 69-500]
16 p2833 A69-32661

Thermal stability elements in solid propellant liner insulation system for heat sterilized solid rocket motors used in unmanned planetary landers [AIAA PAPER 69-437]
16 p2869 A69-32750

Polygonization and strengthening effects simultaneous action at grain boundaries increased thermal stability of thermomechanically treated Ni-Cr alloy
17 p2991 A69-33940

Semiconductor plasma DC overheating instability in electric and magnetic fields, determining growth increments of oscillation amplitude
18 p3182 A69-35022

Polyperfluoroalkyleneimide/oligo(perfluoroalkyleneamide) synthesized by reaction of perfluoroalkane dinitriles with ammonia or diamidine, giving elastomers of varying strength and elongation, noting thermal stability
19 p3264 A69-35535

Ferroelectric transducer for heat transfer rates and flow measurement in gaseous systems with autostabilized temperature, noting film coefficient
19 p3307 A69-35749

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability
19 p3345 A69-36156

Supersonic transport aviation fuel thermal stability measurement data correlated with data deduced from heat transfer measurements
19 p3393 A69-36210

Thermodynamic equilibrium stability general theory extended to arbitrary boundary conditions using properties of entropy balance equation
19 p3452 A69-36789

Facility for evaluating thermal stability of heat resistant materials and cermets in constant temperature gas flow
20 p3565 A69-36979

Thermal stability and radioelectric turbulence parameter derivative relationship for dry adiabatic stratification of lower troposphere and for inversions
20 p3571 A69-37509

Thermally stable polymers chemical and structural properties, discussing polymer use in aerospace technology
21 p3751 A69-38789

Thermal stability of reactive spherical shell, investigating spontaneous ignition of volatile fuel drop exposed to hot oxidizing environment
21 p3849 A69-38804

Plastic deformation in hardened Ti alloys with thermally unstable beta phase under static compression and tensile loads by electron microscope
21 p3746 A69-39161

X ray scintillation spectrometers temperature stabilizing circuit, describing amplitude-frequency compensation version technique for position stability
21 p3727 A69-39891

Cu, Ni, Co, Cr and Ti effect on high temperature mechanical properties and stability after prolonged annealing of Al-Si alloy with added 1 percent Mg
22 p3968 A69-40000

Ferredoxin from thermophilic and mesophilic Clostridia, noting difference in heat stability due to iron disulfide environments
22 p3897 A69-41000

Thermal inertia index of semiconductor thermistors with one dimensional temperature field taking into account conductive heat transfer
23 p4163 A69-41555

Micromodule unsteady thermal behavior reduced to calculating linear heat flux for boundary conditions containing temporal and spatial derivatives
23 p4136 A69-41559

Waveguide Y-circulator parameters thermal stability equation, considering temperature, magnetization level and magnetic field resonance effects on tuning frequency
23 p4123 A69-41959

Choke coil magnetoelastic sensors thermal stability found decreasing proportionally to measurement range decrease/below 100 newtons/
23 p4166 A69-41999

Monograph on thermally stable polymers azomethines synthesis by polycondensation reactions
23 p4113 A69-42019

Constant temperature thermoanemometer design and subsystem operation applied to measurements of turbulent flow velocity and pulse characteristics
24 p4311 A69-42558

Large space erectable structures rigidity, stiffness thermal stability, structural efficiency and integrity [AAS PAPER 69-152]
24 p4398 A69-42877

THERMAL STRESSES

Temperature field and stress state in elastic plates with temperature insulated arc shaped crack
01 p0164 A69-10078

Beta titanium alloys mechanical properties improvement, discussing effects of alloying elements, heat treatment and high temperature deformation
01 p0093 A69-10213

Axisymmetric transient thermoelastic problem for transversely anisotropic hollow cylinder, examining boundary value problems
01 p0166 A69-10302

Orthotropic plates bending and thermal stress, analyzing basic equations
01 p0168 A69-10416

Thermal stresses near spherical inclusion in elastic matrix with uniform heat flow
01 p0171 A69-11264

Generalized unsteady temperature fields and stresses in crystalline plates using Fourier and Laplace transforms
02 p0340 A69-12044

Strain gage behavior on unstressed aluminum alloy under rapid heating using radiant heating, weld strength and high temperature test equipment
02 p0341 A69-12229

Mechanical thermal stresses effects during laser flash illumination of GaAs, discussing temperature dependence of radiative recombination
02 p0256 A69-12245

Viscoelastic materials thermomechanical behavior, discussing constitutive equation and derivation of stress tensor and entropy density from viscoelastic potential
02 p0344 A69-12294

Three dimensional thermal stress distribution in case bonded solid propellant determined by scattered light photoelastic technique coupled with transparent rocket motor model [AIAA PAPER 68-512]
02 p0345 A69-12371

Plane inhomogeneous thermal stress in isotropic elastic circular infinitely long cylinder produced by plane unsteady temperature distribution
02 p0349 A69-12826

Stresses in circular cylindrical shell subjected to local heating
03 p0523 A69-12952

Aircraft cockpit and surface temperatures after solar radiation exposure in desert, showing inadequacies of meteorological data for thermal stress predictions
03 p0381 A69-14077

Thermal stress determination in two dimensional problem of theory of elasticity, using stress simulation by thin plate bending
04 p0668 A69-14272

- Temperature distributions, thermal stresses and natural frequencies of radial vibrations in thin circular cylindrical shells
04 p0675 A69-14704
- Temperature stresses analysis for jet lift VTOL aircraft structure during takeoff and landing, discussing fire hazard in lift pod
04 p0548 A69-14841
- Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling
04 p0682 A69-15393
- Temperature distribution and thermal stresses in liquid filled cylindrical shell
04 p0682 A69-15413
- Natural frequencies controllability by induced thermal membrane stresses examined for thin disk
04 p0682 A69-15494
- Plane thermal stress distribution determined around holes under steady temperature distribution, using complex variable approach
05 p0836 A69-15877
- Axisymmetric thermal stresses in spheroidal shell of arbitrary thickness due to thermoelastic strain nucleus
05 p0836 A69-15923
- Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses
[ASME PAPER 68-WA/MET-19]
05 p0839 A69-16157
- Lunar history reexamination including added mantle convection and recent rocket data
05 p0825 A69-16303
- Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes
06 p1021 A69-17184
- Semiconductor device failure modes temperature dependence, discussing bonds, metallization and packaging
06 p0894 A69-17218
- Temperature distributions and thermal stresses in bimetallic I-beam structures with dissimilar materials for skins and webs and with kinetic heating inputs
06 p1024 A69-17610
- Device for measurement of time to failure of brittle materials in thermal-endurance testing, noting shock wave
06 p0927 A69-17690
- Radial vibrations of thin cylindrical shells subjected to thermal loadings, discussing temperature distributions, thermal stresses and natural frequencies
[AIAA PAPER 69-59]
06 p1028 A69-18143
- Thermal stress concentrations in vicinity of cylindrical elastic inclusions embedded in elastic matrix, using displacement functions and photothermoelasticity
07 p1171 A69-18726
- Boundary value problem of temperature field and heat conduction in transparent media heated by laser radiation producing thermoelastic stresses leading to breakdown
07 p1149 A69-18925
- Steady state thermal stress distributions near external crack in solid, treating temperature distributions with respect to plane of crack
07 p1232 A69-19172
- Mental and physical human performance characteristics under thermal loads noting admissible temperatures and endurance limits
08 p1263 A69-19940
- Translunar cracks in laminated graphite filament composites, noting effect of thermal stresses due to cooling
08 p1337 A69-20483
- Thermal stress propagation in infinite viscoelastic thin plate analyzed with cylindrical coordinate system
08 p1415 A69-20661
- Transient thermal stress distribution in infinite orthotropic elastic cylinder of rectangular cross section in presence of heat sources
08 p1415 A69-20664
- Thermal stress field under uniform heat flow due to elliptical elastic inclusion for anisotropic case
08 p1418 A69-21003
- Failure mechanisms in semiconductors, discussing imperfections, fabrication errors and electrical, thermal and mechanical stresses
08 p1294 A69-21117
- Castigliano variational principle applied to thermal stresses in rectangular plate by expanding stress function in double series of cosine binomials
08 p1419 A69-21178
- Stress formulation of thermoelasticity in simply connected body, noting uniform temperature change influence on stress components
09 p1617 A69-22007
- Thermally generated stress wave propagation in dispersive elastic rod investigated experimentally and analytically, using ruby laser and differential equation
09 p1617 A69-22010
- Thermal shock stresses in flat plates, solids and hollow cylinders, noting geometry, wall thickness, heat transfer characteristics and material properties effects
[ASME PAPER 69-GT-107]
09 p1619 A69-22523
- X ray irradiated dogs subjected to heat stresses to determine thermoregulatory ability
09 p1445 A69-22548
- Plane thermal stress field in discontinuous temperature distribution within isotropic linear elastic circular cylinder of infinite length
10 p1793 A69-22884
- Crack stability under mechanical and thermal stresses, noting critical tensile stress and thermal insulating character of crack
10 p1794 A69-22890
- Heat susceptibility and tolerance in astronauts obtained by plot of skin and oral temperatures for subject under thermal stress
10 p1644 A69-23376
- Thermal stresses for mixed boundary conditions calculated from combined use of integral transforms and variational techniques, reducing computational labor
10 p1801 A69-23429
- Elastic-plastic deformations /strains/ amplitudes measured at high cycle temperatures in thermal fatigue tests
10 p1801 A69-23844
- Subregions method in coupled thermoelasticity, discussing numerical values for thin steel circular disk
11 p1970 A69-24606
- Thermal stresses in longitudinally reinforced cylindrical shell, combining moment and semimomentless shell theories to obtain numerical results
11 p1981 A69-24942
- Residual thermal stresses and plastic strains at hole edges in perforated plates, considering heating and rapid cooling
11 p1982 A69-24947
- Modal coupling in thermally stressed plates, obtaining solution for frequencies and stiffness
11 p1990 A69-25509
- Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit
11 p1994 A69-25534
- Unsteady temperature field and thermal stresses for anisotropic and orthotropic plates heated by heat sources and having Newton law heat transfer
12 p2177 A69-25992
- Thermal stresses induced in plate plane by temperature gradient varying in space and time calculated using Mach-Zehnder interferometer, determining stress intensity factors
12 p2089 A69-26189
- Thermal stress and displacement fields in elastic solid weakened by crack outside of circular region, noting plastic zone size and energy dissipation
12 p2179 A69-26216
- Thermal stresses in infinite elastic plates containing insulated circular holes, using two dimensional bipolar coordinates
12 p2180 A69-26267
- Thermal stresses in hollow finite circular cylinder having smooth rigid insulating cover on curved surfaces and temperature distribution on plane ends
12 p2180 A69-26268
- Lateral bending and two dimensional thermal stress in rectangular orthotropic plates, considering alternating direction implicit method
12 p2188 A69-27100
- Thermal and mechanical stability of fused silica lightweight mirror structures, examining impact and shear strengths of fused joints
13 p2261 A69-27954
- Thermal shock temperature distribution and thermal stresses in finite circular disk subjected to instantaneous point heat source
13 p2363 A69-28130
- Stresses in infinite solid elastic circular cylinder due to rotating line source of heat
13 p2364 A69-28206
- Materials surface thermal stress analysis by strain gauges, considering behavior during rapid temperature changes
13 p2264 A69-28599
- Short time creep rupture behavior of austenitic stainless steel at high temperature ranges, noting rupture times various stresses and data correlation
[ASME PAPER 68-WA/MET-2]
14 p2464 A69-29439
- Beta titanium alloys mechanical properties improvement, discussing effects of alloying elements heat treatment and high temperature deformation
15 p2637 A69-30269
- Thermal stresses in fiber reinforced metals as function of volumetric content of fiber phase
15 p2638 A69-30285
- Uncoupled dynamic thermal stresses and displacements by heat generation in infinite flat plates, using classical thermoelasticity theory for infinitesimal displacements
15 p2709 A69-30669
- Thermoelastic stress in seminfinitesimal elastic medium due to discontinuous temperature distribution over free surface, solving associated heat conduction problem
15 p2712 A69-31006
- Thermal stresses and displacements in isotropic inhomogeneous rotating circular disk with axle hole under steady temperature field
15 p2712 A69-31016
- Thermoelastic stresses in isotropic circular cylinder with surface locally heated by external Newtonian heat source, considering various heat transfer conditions
15 p2714 A69-31178
- Thermal stresses in circular cylinder with regularly distributed cavities, establishing distribution laws for temperatures and stresses
15 p2714 A69-31196
- Photothermoelastic analysis of thermal stresses in turbine wheels with welded blades, noting stress concentration reduction
15 p2715 A69-31488
- Thermal stresses in rotating cylindrical interplanetary body heated by solar radiation
16 p2871 A69-31901
- Stresses due to nucleus of thermoelastic strain in infinite elastic solid with two rigid circular inserts
16 p2872 A69-31906
- Co content influence on temperature stress in WC-Co cermets using one exposure and two exposure X ray diffraction
16 p2802 A69-32340
- Temperature field, strains and stresses induced in thin circular disk by unsteady heat source, noting time effect and resonant vibrations
17 p3054 A69-33021
- Stability of nonuniformly heated rectangular plate reinforced by elastic longitudinal and rigid transverse ribs, accounting for influence of torsional and bending rigidities
17 p3057 A69-33198
- Initial thermostructural stresses in homogeneous quasi-isotropic two component medium, solving statistical boundary value problem thermoelastically
17 p3058 A69-33316
- Loading path criterion for total strain /deformation/ plasticity theory based on Sanders loading function, discussing case of thermally loaded bar
17 p3062 A69-33711
- Temperature dependence of metal elastic properties including thermal strains effect on stress field, yield stress changes and elastic modulus variations
18 p3212 A69-34353
- Laminated anisotropic plate equations from thin plate theory including nonlinear terms, inertia and thermal stresses
[ASME PAPER 69-APM-15]
18 p3213 A69-34390
- Thermal stress in fiber reinforced metals, assuming Young modulus variable when thermal stress is applied during heating and cooling
18 p3223 A69-35021
- Low temperature bond failures of room temperature vulcanizing methyl-phenyl adhesive bonds attributed to thermal stress cracking of primer, presenting in-process tests
19 p3321 A69-35563
- Two dimensional thermoelasticity problem for nonlinear media, obtaining solutions for thermal stress concentration and boundary value problems
19 p3436 A69-35848
- Thermal stresses in solids, discussing spaces and half spaces, thick walled systems, shells, plates, disks and bars
19 p3447 A69-36856
- Facility for evaluating thermal stability of heat resistant materials and cermets in constant temperature gas flow
20 p3565 A69-36979

Thermal stress concentration near elliptical hole in thin walled liquid filled cylindrical shell in presence of temperature gradient across shell cross section
20 p3622 A69-37325

Temperature fields and stresses in heat resistant ceramic coatings, illustrating alumina coating on Mo to calculate heating rate
20 p3565 A69-37359

Automated device for load carrying ability of structural elements like gas turbine blades under thermal and mechanical cyclic loads
20 p3544 A69-37816

Transient thermal stresses in heat treated elastic-perfectly plastic disks with temperature dependent yield stress, considering stress distribution sequence and residual stresses
20 p3629 A69-37974

Stress strain state in thin circular elastoplastic disks under axially symmetric transient temperature distribution, noting moving annular plastic deformation region
20 p3629 A69-38028

Thermal stress distribution induced in wedge by apex heat source analyzed using elasticity theory, considering lateral surface heat transfer
21 p3833 A69-38644

Steady state temperature fields and thermal stresses determined in finite cylindrical shell by optimal parameters of reinforcing circular rib
21 p3834 A69-38714

Thermal stresses and displacements in long isotropic hollow cylinder heated on part of outer curved surface, analyzing temperature distribution
21 p3838 A69-39166

Stability of free and clamped spherical and circular cylindrical shells subjected to uniform or nonuniform heating, discussing effects of temperature stresses
21 p3838 A69-39190

Fatigue endurance determined from thermal stresses by balancing elastic strain rates, creep relaxation and mechanical cyclic loading with triangular waveform, discussing nonsteady creep
21 p3843 A69-39310

Thermal and athermal component of flow stress and deformation dynamics for Ti at low homologous temperatures determined by stress relaxation tests
21 p3749 A69-39598

Time-optimal nuclear rocket propellant start-up with thermal stress constraints based on distributed parameter model, deriving algorithm for flow rate increase
21 p3768 A69-39632

Alloy softening in bcc Fe-N and Fe-Ni, discussing causes of thermal stress component reduction in interstitial and substitutional alloys
22 p3969 A69-40164

Severe heat stress effects on respiratory frequency, rectal temperature, blood gases and pH of conscious dog
23 p4081 A69-41432

Potent chemical factors released from anterior hypothalamus of rhesus monkeys in response to thermal stress during thermoregulation
23 p4084 A69-41472

Thermoelastic stresses in rotating cylinders and disks with radial temperature distribution, deriving plane deformation approximate solutions
23 p4227 A69-41707

Photothermoelastic investigation of thermal stress concentrations around circular cavities and inclusions in two dimensional composite models
24 p4396 A69-42739

Dynamic equilibrium of making and breaking adhesion bonds between polymer segments and dissimilar surfaces through water, allowing thermal stresses relaxation
24 p4326 A69-43458

Thermal turbulence effects on phase fluctuations of laser beams, studying temporal decay of mean square refractive index fluctuation with fringe pattern displacements
24 p4329 A69-43754

THERMAL VACUUM TESTS

Solar thermal vacuum test for space flight qualification of military spin stabilized synchronous orbit communications satellite
15 p2587 A69-30391

Selectively pumped thermal vacuum test chamber for orbital heat transfer and environment simulation for flight vehicle performance prediction
15 p2587 A69-30392

COMSAT thermal vacuum chamber specification configurations, discussing chamber orientation, vacuum and roughing systems, pumping mechanism, wiring, installation, testing, etc
15 p2587 A69-30393

Thermal vacuum /TV/ manned test operations related to Apollo lunar module in simulated space environment
15 p2558 A69-30394

Surveyor thermal vacuum test data comparison with flight results indicating performance prediction reliability of earth-based tests for vacuum and lunar environments
19 p3430 A69-36016

Mission simulation testing in thermal vacuum environment for Apollo Lunar Module, noting conformal skin heaters
22 p3920 A69-40369

Manned testing of EVA equipment in thermal-vacuum environment for qualification of Apollo extravehicular mobility unit, using lunar surface thermal simulator
22 p3893 A69-40370

Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits
22 p3922 A69-40385

Line source technique for ablative heat shield materials thermal conductivity measurements, comparing vacuum and atmospheric test results
22 p3922 A69-40386

Pressure measurements and gas flow analysis during thermal vacuum tests of manned spacecraft indicating adequate space vacuum simulation
22 p3924 A69-40401

Design, fabrication and evaluation of lunar base solar array power modules, emphasizing structural/ dynamic, thermal vacuum and acoustic tests
23 p4072 A69-42288

THERMALIZATION [ENERGY ABSORPTION] NT NEUTRON THERMALIZATION

Thermalization of kinetic energy of plasma flow by shock phenomena produced by magnetic mirror field
02 p0289 A69-12176

Distribution function for thermalization distances derived for infinite atmosphere with plane source in noncoherent light scattering
23 p4192 A69-42403

THERMIONIC CATHODES

Performance prediction for planar and cylindrical electrode geometry fixed spacing thermionic converters
09 p1438 A69-21814

Thermal stability criteria for thermionic converter performance evaluation, noting electron cooling influence
09 p1441 A69-21838

Oxide coated thermionic cathodes, noting semiconducting properties of alkaline earth oxides, particularly barium oxide and adsorption and optical properties
09 p1470 A69-22700

Thermionic electrogenerating element (EGE) design optimization, considering one dimensional linear geometry with thin walled cylindrical sheath cathode
14 p2400 A69-29224

Thermionic converter cathode and anode temperatures difference during start-up heating and under normal operational conditions
14 p2400 A69-29226

Potential distribution between point in interelectrode gap and thermionic converter cathode in collisionless mode under transverse magnetic field
14 p2401 A69-29235

Electron and ion separation as function of plasma potential drop in Langmuir cathode layer in arc regime
14 p2490 A69-29237

Cs mixture effects with Ba and I on cathode electron emission in thermionic converter
14 p2402 A69-29239

Low voltage Cs arc in thermionic converter with slotted cathode surface, determining electron concentration and temperature distribution
14 p2403 A69-29250

Thermoemission converters /TEC/ cathode materials, discussing determination of local work function by electron microscope and delay curves methods
14 p2505 A69-29265

THERMIONIC CONVERTERS

NT SNAP 13

Metallic dismountable thermionic converter enclosed in mica sealed vacuum chamber, giving I-V characteristics, optimal temperature of liquid cesium phase and output power
02 p0194 A69-11587

Thermionic reactor systems, discussing fissionable material content, power output, specific power, component mass, total mass and design
02 p0279 A69-12662

Kinetic theory model of plasma sheath transition, analyzing sheath structure in unignited mode of thermionic converter
03 p0368 A69-13125

Rhenium-niobium cylindrical thermionic converters with mechanically polished or electroetched emitters, comparing performance
03 p0368 A69-13126

Electron emitter cooling and plasma heating of thermionic converters noting effects of plasma density, diode spacing, etc
03 p0368 A69-13127

Probe and spectral techniques compared for investigation of low voltage arc of cesium plasma thermionic converter
03 p0478 A69-13836

Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K
05 p0707 A69-16359

Plasma characteristics in thermionic converter operating under low voltage arc conditions obtained by computer, probes and spectral techniques
06 p0963 A69-16910

Thermionic energy converter theory and efficiency, discussing design considerations to improve performance
07 p1057 A69-18255

Simulated solar radiation heating of cesium vapor thermionic converters with multicapillary transmitters
07 p1058 A69-18951

Out-of-core thermionic space power generators using heat pipes, discussing feasibility in geometry, heat pipes, reactor, shield, heat exchanger and radiator
08 p1256 A69-19856

Thermionic conversion - Conference, Framingham, Mass., October 1968
09 p1436 A69-21806

Reproducibility of thermionic converters performance, comparing volt-ampere characteristics with reservoir and collector temperature
09 p1437 A69-21813

Performance prediction for planar and cylindrical electrode geometry fixed spacing thermionic converters
09 p1438 A69-21814

Comparative performance of niobium cylindrical thermionic converters with vapor deposited rhenium, stressing emitters surface preparation
09 p1438 A69-21816

Cylindrical thermionic converter with vapor deposited rhenium emitter and niobium collector, measuring efficiency and power density
09 p1438 A69-21817

Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability
09 p1438 A69-21819

Emission characteristics of duplex vapor deposited tungsten emitter with molybdenum collector in variable spacing guard ring converter
09 p1438 A69-21820

Side wall currents in unignited hardware type thermionic energy converters, discussing work function and heat choke
09 p1439 A69-21822

Thermionic converter metallography relationship between materials and fabrication methods and reliable performance life
09 p1439 A69-21824

Semiconducting films as collector work function in thermionic converters, with regard to I-V characteristics
09 p1558 A69-21825

Spectroscopic measurements of electron density and temperature for quasi-saturation region of ignited mode plasma in planar thermionic converter
09 p1439 A69-21826

Isothermal diode as study basis for internal complex controlling thermionic energy conversion
09 p1439 A69-21827

Kinetic theory model of plasma sheath transition applied to sheath structure in unignited mode of thermionic converter
09 p1440 A69-21828

Fission fragment generated plasma applicability to thermionic energy converters from electron density, temperature and transport studies
09 p1440 A69-21829

Ionic species identification in argon-cesium discharges for thermionic converter design
09 p1440 A69-21830

Semiempirical relation for electron cooling modified by plasma heating of thermionic converters, including effects of plasma density, diode spacing and surface potential difference
09 p1440 A69-21831

Heat pipes for thermionic converters, wicks development, high temperature life testing and performance
09 p1440 A69-21833

Local axial voltage variation from one dimensional model applied to solve thermionic boundary conditions in two dimensional thermal analysis of converter
09 p1440 A69-21834

Thermionic converters stability and safety maintainable at high Ce pressures
09 p1441 A69-21837

Thermal stability criteria for thermionic converter performance evaluation, noting electron cooling influence
09 p1441 A69-21838

Adsorption process limits when used as Cs reserve in thermionic converter
09 p1441 A69-21839

Gas breakdown model for analyzing breakdown of Ce vapor filled crack in thermionic trilateral insulator
09 p1441 A69-21840

Stability analysis including delayed collector and structure coefficients, showing thermionic reactor instability with all negative reactivity coefficients
09 p1442 A69-21841

Thermionic converter SD-4 design and performance tests covering emitter, collector and Cs reservoir temperatures and power efficiency
11 p1827 A69-25398

Arc mode thermionic Cs converter nonlinear I-V characteristics explained by current-dependent temperature and potential fields in plasma
11 p1827 A69-25400

Current-voltage characteristics and ionization equilibrium of low voltage arc plasma in narrow gap of thermionic converter at high current density
11 p1933 A69-25554

Soviet book on plasma thermionic energy conversion covering operation modes, transport processes, current-voltage characteristics, density, temperature, electric field distribution
12 p2017 A69-26850

Thermionic converter matched with solar cells analyzed for parabolic mirrors, assuming heat conduction power supply to cathode and uniform temperature distribution
13 p2209 A69-27970

Thermionic converter improvements by electronegative additives and emitter surface finishes, noting cesium oxide, heat treatments with electropolishing, electroetching, etc
14 p2397 A69-29173

Nuclear type cylindrical thermionic converter with porous adsorbent structure and liquid cesium tank
14 p2397 A69-29174

Reliability and efficiency improvements for thermionic converters at JPL, giving failures analyses
14 p2397 A69-29175

High pressure Cs thermionic converter with cold region, measuring Cs partial pressure distribution in Ar filled tube
14 p2397 A69-29176

Thermionic converter performance measured using test vehicles with guard ringed collectors and variable emitter-collector spacing
14 p2398 A69-29177

Plane and cylindrical thermionic converters, considering electricity generation by heating through flame, solar radiation and nuclear flux
14 p2419 A69-29178

Thermionic converters with different collectors, emitters and metal-ceramic seals reliability tested, determining life duration
14 p2398 A69-29179

Auxiliary discharge thermionic converter with Penning mixture (Ne-Ar), discussing pressure and Penning ionization effects, collector current discontinuities, etc
14 p2398 A69-29180

All metal nuclear thermionic modular converter, discussing applications, design and material requirements or limitations
14 p2398 A69-29181

Thermionic converter with external fuel surrounding inner emitter annulus for use in in-core reactors
14 p2480 A69-29185

Radioisotope fueled miniature thermionic converter for fractional watt level operation, defining optimum interaction of variables
14 p2399 A69-29193

Single cell fission powered thermionic converters design and testing
14 p2399 A69-29195

Thermionic converter SO-4 design and in- and out-of-pile test results, presenting diode performance at various times
14 p2399 A69-29196

Cylindrical geometry in-pile and out-of-pile thermionic converters long term life tests, including unfueled and fueled versions
14 p2399 A69-29197

Sirene 302 thermionic converter lifetime during irradiation in Triton immersion pile, considering effects on conversion efficiency
14 p2481 A69-29198

Cylindrical in-core thermionic converters performance and life tests, discussing diode design, operation data and irradiation studies
14 p2399 A69-29199

Materials compatibility and maximum heat flux capability of heat pipes emphasizing thermionic conversion
14 p2538 A69-29202

Heat pipes for heating emitters of thermionic converters at high temperatures, noting capillary optimization and thermal resistance values
14 p2539 A69-29208

Sintered metal powder process for metal-to-ceramic seals for thermionic converters, giving results for tensile strength, thermal cycling and cesium corrosion
14 p2454 A69-29211

Metal insulating seals using preliminary metallization or direct brazing for applications in thermionic converter technology and irradiation capsules
14 p2455 A69-29212

Barium vapor effect on converter materials, examining metals-ceramics compatibility at high temperatures
14 p2467 A69-29215

Contact between cylindrical surfaces in thermionic converters, determining thermal resistance and pressure in contact area
14 p2400 A69-29216

Titanium alloys for thermionic nuclear converters, discussing melting, forging, drawing and quality control of mechanical and physical properties
14 p2462 A69-29217

High temperature thermal resistance stability of multilayer cylindrical elements for thermionic converters determined by layer strain rate
14 p2539 A69-29218

High temperature compatibility of Mo, W, Nb and Ta as canning materials with high melting point and formation energy filling materials
14 p2463 A69-29219

Cesium sorption in materials for thermionic converters reservoirs, discussing dimensional stability of porous alumina, W and C samples
14 p2463 A69-29220

Output current and efficiency of vapor thermionic converters obtained in terms of electrodes and interelectrode gas parameters, exemplifying nuclear fuel element
14 p2400 A69-29222

Thermionic electrogenerating element (EGE)/ design optimization, considering one dimensional linear geometry with thin walled cylindrical sheath cathode
14 p2400 A69-29224

Thermionic converters with matrix circuit connections, considering current flow patterns in matrices to evaluate electrical failure spreading
14 p2400 A69-29225

Thermionic converter cathode and anode temperatures difference during start-up heating and under normal operational conditions
14 p2400 A69-29226

Thermionic converter components reliability under mechanical load and failure models, showing probabilistic nature of failures
14 p2400 A69-29227

Axial variation analysis of heat generation rate, temperature, voltage, current density and emitter heat flux in thermionic converter, emphasizing application to long diodes design
14 p2401 A69-29228

Low voltage arc in cesium thermionic converter, investigating current-voltage characteristics, electron temperature, electron density and plasma potentials in ignited mode
14 p2401 A69-29231

Differential equations for ignited mode theory, considering ion and electron transport and energy flux
14 p2490 A69-29233

Potential distribution between point in interelectrode gap and thermionic converter cathode in collisionless mode under transverse magnetic field
14 p2401 A69-29235

Thermionic converter stability as function of cesium pressure, heat input, reservoir temperature, load voltage or resistance
14 p2402 A69-29236

Cell current and calorimetric measurements of electrical power and heat generation with heat pipe thermionic converter
14 p2402 A69-29238

Cs mixture effects with Ba and I on cathode electron emission in thermionic converter
14 p2402 A69-29239

Unignited mode converter and emitter work function patches, calculating electron-cesium momentum transfer cross sections from saturation current measurements
14 p2490 A69-29240

Thermionic converter current-voltage characteristics under various emitter temperatures and cesium vapor pressures, noting role of Schottky effect
14 p2402 A69-29241

Razor phenomenological theory of space ionization in arc mode regime of Cs thermionic converter
14 p2402 A69-29242

Cesium plasma electron temperature in narrow electrode space of thermionic converter determined using electrode and changeable space diode
14 p2491 A69-29243

Current oscillations and electromagnetic radiation in low pressure cesium thermal emission converters using glass diode with plate geometry metal electrodes
14 p2402 A69-29246

Thermal emission converter, using Cs-Ba mixture in low voltage arc mode, detailing construction
14 p2403 A69-29247

Low voltage Knudsen arc in cesium-argon mixture for thermal emission converters
14 p2403 A69-29248

Noble gas thermionic converters, discussing auxiliary discharge compensation of negative space charge, I-V characteristics, efficiency and comparison to ignited mode cesium vapor converter
14 p2403 A69-29249

Low voltage Cs arc in thermionic converter with slotted cathode surface, determining electron concentration and temperature distribution
14 p2403 A69-29250

Rare gases effect on thermionic converters volt-ampere characteristics, noting gas pressure, oxygen contamination and performance relations
14 p2403 A69-29251

Cesium ions decay time in thermionic converter operating in gas kinetic mode by pulse ionization, noting dependence on interelectrode potential distribution
14 p2403 A69-29252

Experimental and theoretical data correlation on low voltage arc in thermionic converters using cesium vapor, describing discharge plasma by solving differential equation system
14 p2404 A69-29254

Electron energy distribution function and nonequilibrium ionization rate in near cathode layer of thermionic converter
14 p2404 A69-29255

Probe and spectroscopic study of dense plasma thermionic converters noting parameters
14 p2404 A69-29256

Plasma potential and density distribution in near-electrode plasma sheath of thermionic converter
14 p2491 A69-29257

Ionization mechanisms in ignited mode cesium thermionic converter, discussing positive ions production for electron space charge neutralization and ion density calculations
14 p2404 A69-29258

Electron temperature and density distributions across cesium converter interelectrode gap determined spectroscopically, noting maxima toward emitter
14 p2491 A69-29259

Radiation effects on Cs thermionic converter, discussing radiation interaction with alkaline atoms to complete space charge neutralization by supplementary ion creation
14 p2404 A69-29261

Emission characteristics of thermionic converter electrodes surfaces with emphasis on work function
14 p2505 A69-29262

Thermoemission converters (TEC)/ cathode materials, discussing determination of local work function by electron microscope and delay curves methods
14 p2505 A69-29265

Thermionic converters semiconducting collector surfaces, evaluating work functions of nickel-chromium steel and aluminum trioxide collectors

14 p2506 A69-29269

Laboratory device for investigating thermionic energy converters and measuring current-voltage characteristics by static/dynamic methods

18 p3136 A69-34700

Electron energy distribution for Cs plasma in emitter region of ignited mode thermionic converter, noting nonequilibrium ionization effect

19 p3380 A69-36442

Thermionic conversion - IEEE Conference, Framingham, Mass., October 1968

23 p4064 A69-41718

Thermionic reactor concepts and development in U.S., comparing strengths and weaknesses

23 p4186 A69-42245

Thermionic reactors for auxiliary space power and electric propulsion applications, discussing converter development regarding nuclear fuel elements

23 p4186 A69-42246

Thermionic converter technology, discussing cesium reservoirs, emitter and collector materials, performance and life tests, etc

23 p4069 A69-42247

Ion sputtering method for making electrodes in thermionic energy converters, discussing alumina and W surface layers preparation

23 p4170 A69-42259

Heat pipe thermionic converters, discussing heat transport, heating rate, pipe lifetime, etc

23 p4074 A69-42295

THERMIONIC DIODES NT CESIUM DIODES

Nuclear reactor space power system concept using thermionic diodes, heat pipes and rod control, emphasizing neutronic aspects and feasibility

04 p0630 A69-14799

Fixed space planar thermionic diode with collector guard ring for studying various emitter materials, measuring emitter temperatures

09 p1438 A69-21815

Cylindrical thermionic diode with rhenium emitter for diode kinetic experiments, presenting test data from prototype diode with thimble water cooled

09 p1438 A69-21818

Comparative performance data of cylindrical diodes with various types of tungsten emitters, including emitter work function measuring device

09 p1439 A69-21821

Uninsulated in-core thermionic reactor design permitting diode series connections to build output voltage

14 p2398 A69-29186

Thermionic converter SO-4 design and in- and out-of-pile test results, presenting diode performance at various times

14 p2399 A69-29196

Cylindrical in-core thermionic converters performance and life tests, discussing diode design, operation data and irradiation studies

14 p2399 A69-29199

Axial variation analysis of heat generation rate, temperature, voltage, current density and emitter heat flux in thermionic converter, emphasizing application to long diodes design

14 p2401 A69-29228

Low voltage arc in thermionic cesium vapor diode with lengthy electrodes and temperature variations along emitter, discussing plasma and current density distributions

14 p2402 A69-29244

Current oscillations and electromagnetic radiation in low pressure cesium thermal emission converters using glass diode with plate geometry metal electrodes

14 p2402 A69-29246

Preignition volt-ampere curves for thermionic cesium diodes exhibiting nonsaturation characteristics under low temperature and electron-rich emission conditions

14 p2403 A69-29253

West German research in thermionic diodes and reactors, describing terrestrial version of thermal in-core thermionic reactor project

23 p4188 A69-42258

THERMIONIC EMISSION

Thermionic emission and dispersion of plasma created by monopulse of laser radiation focused on solid target, discussing plasma temperature determination methods

03 p0441 A69-14141

Thermionic electron emission from Mo and W targets irradiated by CW carbon dioxide laser beam

05 p0771 A69-15812

Rates of charging of thermionically emitting particles in space charge

06 p1035 A69-17928

Richardson constant and tunneling effective mass for thermionic and thermionic field emission in Schottky barrier diodes

07 p1089 A69-18247

Normalized thermionic field emission in metal semiconductor barriers for forward and reverse current-voltage relation

08 p1373 A69-20861

Richardson constant for thermionic emission in Schottky barrier diodes, noting effect of surface shadows

08 p1286 A69-20865

Gaseous suspensions of thermionic emitting particles assessed as MHD working fluids in large scale MHD electric power generators

10 p1738 A69-23491

Radiative heat transfer calculations between parallel surfaces, applying approximations based on total emissivities to known spectral emissivities

14 p2539 A69-29223

Emission characteristics of thermionic converter electrodes surfaces with emphasis on work function

14 p2505 A69-29262

Thermionic emission from bare and Cs-covered metal surfaces, calculating current and work function by employing localized electron orbital model

14 p2505 A69-29264

Thermionic emission parameters for faces of W-Re, Mo-Re and Ta-Mo single crystals determined by Richardson method of straight lines

17 p3015 A69-33630

THERMIONIC EMITTERS

Saturation electron emission characteristics from incompletely outgassed Ta wire emitters immersed in Cs vapor using plasma anode technique, noting oxygen effects

09 p1437 A69-21812

Fixed space planar thermionic diode with collector guard ring for studying various emitter materials, measuring emitter temperatures

09 p1438 A69-21815

Comparative performance of niobium cylindrical thermionic converters with vapor deposited rhenium, stressing emitters surface preparation

09 p1438 A69-21816

Cylindrical thermionic converter with vapor deposited rhenium emitter and niobium collector, measuring efficiency and power density

09 p1438 A69-21817

Cylindrical thermionic diode with rhenium emitter for diode kinetic experiments, presenting test data from prototype diode with thimble water cooled

09 p1438 A69-21818

Thermionic converters with chloride and fluoride vapor deposited tungsten emitters, comparing performance characteristics and stability

09 p1438 A69-21819

Emission characteristics of duplex vapor deposited tungsten emitter with molybdenum collector in variable spacing guard ring converter

09 p1438 A69-21820

Comparative performance data of cylindrical diodes with various types of tungsten emitters, including emitter work function measuring device

09 p1439 A69-21821

Thermionic converter improvements by electronegative additives and emitter surface finishes, noting cesium oxide, heat treatments with electropolishing, electroetching, etc

14 p2397 A69-29173

Thermionic converter performance measured using test vehicles with guard ringed collectors and variable emitter-collector spacing

14 p2398 A69-29177

Thermionic converters with different collectors, emitters and metal-ceramic seals reliability tested, determining life duration

14 p2398 A69-29179

Thermionic converter with external fuel surrounding inner emitter annulus for use in in-core reactors

14 p2480 A69-29185

Cylindrical in-core thermionic converters performance and life tests, discussing diode design, operation data and irradiation studies

14 p2399 A69-29199

Postirradiation investigation of uranium dioxide fuelled thermionic emitters by evaluating released fission gases, noting different neutron fluxes metallic effects

14 p2481 A69-29200

Heat pipes for heating emitters of thermionic converters at high temperatures, noting capillary optimization and thermal resistance values

14 p2539 A69-29208

Deposition and interdiffusion of W layers on Mo emitter of in-core thermionic reactor, investigating microstructure of transition zone

14 p2462 A69-29210

Unignited mode converter and emitter work function patches, calculating electron-cesium momentum transfer cross sections from saturation current measurements

14 p2490 A69-29240

Thermionic converter current-voltage characteristics under various emitter temperatures and cesium vapor pressures, noting role of Schottky effect

14 p2402 A69-29241

Low voltage arc in thermionic cesium vapor diode with lengthy electrodes and temperature variations along emitter, discussing plasma and current density distributions

14 p2402 A69-29244

Thermionic converters semiconducting collector surfaces, evaluating work functions of nickel-chromium steel and aluminum trioxide collectors

14 p2506 A69-29269

THERMIONIC POWER GENERATION

Direct energy conversion and materials limitations, discussing thermoelectricity, solar cells, thermionics and fuel cells

02 p0194 A69-11801

In-core thermionic sodium cooled uranium oxide fueled reactor for space vehicle power plant

02 p0279 A69-12666

Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K

05 p0707 A69-16359

Out-of-core thermionic space power generators using heat pipes, discussing feasibility in geometry, heat pipes, reactor, shield, heat exchanger and radiator

08 p1256 A69-19856

Nuclear power supply with in-core thermionic reactor for space power source and use in satellite TV, discussing theory, design and components

08 p1350 A69-20871

Reactor and mission requirements interaction for unmanned thermionic nuclear electric propulsion, discussing lifetime, payload, power levels, etc [AIAA PAPER 69-250]

09 p1539 A69-21253

Electrical testing of six converter solar energy thermionic generator, discussing overheating and dual current mode anomalies

09 p1439 A69-21823

Thermionic space power reactor design, detailing Critical Experiment problems

09 p1441 A69-21835

Out-of-core thermionic reactor power increase by using central heat pipe in coaxial cavity

09 p1441 A69-21836

Thermionic converter power from satellite nuclear reactor for TV satellites, discussing direct heat utilization and applications

12 p2016 A69-25869

Thermionic electrical power generation - Conference, Stresa, Italy, May 1968

14 p2394 A69-29172

Fast and thermal thermionic reactor systems characteristics including fissile material, components mass, power output and flattening and design features

14 p2480 A69-29182

Out-of-core thermionic reactor concept for space power supply using lithium heat pipes in crossed layers

14 p2480 A69-29187

Out-of-core thermionic systems with heat pipes usable in space applications, meeting advanced auxiliary power and nuclear propulsion requirements

14 p2480 A69-29188

In-core thermionic reactor space power plants stability and control criteria, comparing linear and nonlinear models

14 p2481 A69-29189

Primary isotope thermionic electric power module design, considering various assemblies

14 p2398 A69-29190

SNAP 13 generator designs to develop technology for isotope heated thermionic converters, describing tests, efficiencies, power outputs and life times

14 p2481 A69-29191

Actinium fueled thermionic generator design and characteristics, noting emitter temperature and material

14 p2399 A69-29192

Thermionic electrical power generation from reentry plasmas with nose cone as emitter and vehicle afterbody as collector
14 p2399 A69-29194

Soviet research on thermionic energy conversion, advantages and applicability in various fields
14 p2405 A69-29279

Fast neutron spectrum for subcritical section of homogeneous U 235-polyethylene thermionic critical assembly measured by pulsed source time-of-flight method
18 p3170 A69-34313

SNAP 21 radioisotope powered thermionic generator with multiple couple Pb-Sn-telluride/Bi-Sb-telluride flat plate configuration for deep sea applications
23 p4069 A69-42248

West German research in thermionic diodes and reactors, describing terrestrial version of thermal in-core thermionic reactor project
23 p4188 A69-42258

Li, Na and K heat pipes for high temperature emitter and low temperature collector thermionic applications
23 p4074 A69-42297

THERMIONIC REACTORS
U ION ENGINES
U NUCLEAR ROCKET ENGINES

THERMIONICS
Thermionic converter technology, discussing cesium reservoirs, emitter and collector materials, performance and life tests, etc
23 p4069 A69-42247

THERMISTORS
Atmospheric temperature corrections for measurements by rocketsonde and balloonsonde with thermistor, noting dissipation factors and thermal time constants
01 p0081 A69-10697

Differential thermistor gauge using Wheatstone bridge for use in free molecule pressure probe measurement of macroscopic velocity in rarefied gases
04 p0601 A69-15117

Thermistors for total optical radiation pyrometer and for temperature control system based on radiation pyrometer, noting thermistor response and control circuit
04 p0601 A69-15119

Thermistor assembly apparatus for measuring coefficient of thermal conductivity of pure and binary mixture of gases
05 p0845 A69-15616

Temperature profiles variability for data obtained by rocketsonde thermistors launched with small time and spatial separation
09 p1494 A69-21644

LF measurements with positive or negative temperature coefficient resistors based on current-voltage characteristics
11 p1845 A69-24522

Beryllium oxide semiconductor thermistor for temperatures to 2500 K, discussing construction materials and test results
12 p2092 A69-26478

Thermistor instrument for remote sensing, magnetic synchronous recording and linear display of temperature
14 p2449 A69-29562

Thermistor thermometer with low energy dissipation for flow measurements, discussing design considerations
15 p2608 A69-30296

Dual channel waveguide insertion loss test set for calibrations at 90 GHz in radio astronomy and communication systems, using sprayed thermistor mount
16 p2760 A69-31945

Vanadium thermistor fabrication influence on resistance jump at phase change temperature of vanadium dioxide, reproducing parameters by heat treating doped vanadium pentoxide
19 p3256 A69-36718

Temperature response of semiconductor thermistors as temperature sensing element, determining time constant from dimensions and experimental data
21 p3723 A69-38888

Thermistor radiation detectors bias condition defined from equations and optimized in terms of responsivity, time constant and noise
21 p3727 A69-39782

Thin film thermistors heat-separated from graphite substrate to achieve positive temperature resistance coefficient via argon heating and oxygen cooling
22 p3997 A69-41214

Thermal inertia index of semiconductor thermistor with one dimensional temperature field taking into account conductive heat transfer
23 p4163 A69-41556

THERMO-PHOTOVOLTAIC GENERATORS
U PHOTOELECTRIC GENERATORS
U THERMOELECTRIC GENERATORS

THERMOAEROELASTICITY
U AEROELASTICITY
U THERMOELASTICITY

THERMOCHEMICAL PROPERTIES
NT HEAT OF COMBUSTION
NT HEAT OF FORMATION
NT HEAT OF VAPORIZATION
Energy distribution among products of reactive collision of atomic H with Br molecule yielding HBr and Br atom, using perturbed Morse oscillator approximation
03 p0472 A69-13316

Grey and very grey thermochemical tables for C-H and C-H-O species
[WSCI PAPER 68-38]
06 p0885 A69-17795

Time of heating effect on thermal polymerization of L-lysine free base
13 p2218 A69-28439

Book on equilibrium thermodynamics covering origins and roles of thermodynamic laws, variables, equilibrium, reversibility, thermodynamic and thermochemical properties, etc
18 p3229 A69-34533

Computer routines for approximations of thermochemical properties of gas mixtures, using JANAF/Joined Army Navy Air Force/tables of combustion systems
21 p3670 A69-39591

THERMOCHEMISTRY
NT AEROTHERMOCHEMISTRY
Preparation of refractory alloys in powders, fibers and sintered billets by thermochemical method
[ONERA-TP-636]
02 p0251 A69-11625

Book on thermodynamic and thermochemical tables with charts on thermodynamic properties, physical chemistry and gas dynamics
04 p0688 A69-15459

Thermochemical surface finishing trends, discussing methods to obtain complex diffusion layers
05 p0769 A69-16540

Titanium aluminum alloys two stage direct production by aluminothermal reduction of titanium tetrachloride
07 p1159 A69-18536

Acidic, neutral and basic proteinoids thermal synthesis, discussing characterization and tendency to form microparticles
07 p1074 A69-18633

Organic fluorine chemistry, discussing synthesis reactions and reaction of polyfluorocycloalkenes with various nucleophiles
08 p1269 A69-21129

Laser evaporation vapors from refractory materials to produce surface temperature for carrying out reactions in gaseous phase and thin film preparation
09 p1519 A69-22476

Carbidothermic production of metals and binary and ternary alloys, discussing eutectic properties
09 p1514 A69-22731

Ionic and biradical mechanisms in thermal and photo cis-trans isomerizations elucidated by planar and twisted configurations of polyenes
13 p2216 A69-27618

Solid state chemical heat sources aboard unmanned planetary landing vehicles to maintain batteries and experiments operability during cold planetary nights
23 p4070 A69-42275

Thermochemical analysis of hot corrosion during sulfidation-oxidation of superalloy gas turbine engine components using Pourbaix method
23 p4178 A69-42449

THERMOCOMPRESSION
U COMPRESSING
U HEATING

THERMOCOUPLE PYROMETERS
Radiation compensating thermocouple for gas temperature measurement, noting advantage over single thermocouples
04 p0598 A69-14916

Thermocouple probe measurement error evaluation by parallel plate analytical model
16 p2789 A69-31903

Structural parameters selection for thermocouples with butt-weld electrodes, developing mathematical basis for thermoelectrode length to measure unstable gas temperatures
19 p3311 A69-36197

THERMOCOUPLES
NT THERMOPILES
Temperature measurement of moving droplets, noting influence of thermocouple electrode stability
04 p0688 A69-15423

Design and performance equations for panel type solar thermoelectric generator, based on single thermocouple as generator unit
05 p0704 A69-15675

Thin film thermocouple detector for molecular lasers operating in middle and far IR range
05 p0773 A69-16284

High temperature sensors for gas turbines, discussing thermocouples and radiation pyrometer to sense turbine hardware
[ASME PAPER 69-GT-30]
09 p1501 A69-22492

Resistance temperature transducers and thermocouples covering characteristics, readout and design for aerospace requirements
10 p1690 A69-23225

Signal conditioning for transducers covering piezoelectric devices, thermocouples, resistance transducers, reluctance and differential transformer sensors
10 p1691 A69-23228

Thermocouples dynamic response attached to thin skinned model under constant heating rate, considering error reduction in temperature measurement
13 p2375 A69-27785

Thermocouples precision used for measuring metal temperatures of cooled jet engine turbine buckets
15 p2613 A69-31274

Contact thermocouples to measure temperature of wall exposed to radiation, evaluating errors
17 p2975 A69-33596

Cryogenic liquid level temperature transducer with radiantly heated thermocouple sensitive element
17 p2975 A69-33670

Transient calibrations for Ge surface thermocouple heat flux sensors used in hypervelocity impulse tunnel
19 p3292 A69-35725

Single junction vacuum thermocouple measuring thermal beam effect with reference to velocity distribution perturbation in molecular beam scattering
19 p3376 A69-36173

Thermal contact conductance of thermally thick specimens with thermocouples not located at interface
20 p3632 A69-37521

Plasma thermionic diode figure of merit based on Hatsopoulos model altered to include thermal conduction and electrical resistance
22 p3869 A69-40134

Inhomogeneities effect on thermoelectric power and thermal efficiency of semiconductor thermocouple with constant forbidden band width
22 p3994 A69-40933

Jet engine combustion temperature measurements by thermocouples or gas analysis noting errors involved
23 p4165 A69-41650

Radioisotope thermoelectric generators (RTG)/design and performance analysis method applied to generators using Si-Ge Air-Vac type thermocouples
23 p4188 A69-42260

THERMODYNAMIC COUPLING
Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
03 p0491 A69-14054

Coupled heat and mass transfer with zero order reactions in two phase systems consisting of drops, bubbles or solid particles
14 p2537 A69-29012

Acoustic wave fluctuations in semiconductors in external electromagnetic field, applying conduction electron and lattice elasticity kinetic equations
18 p3182 A69-35047

Viscoplastic thermomechanically coupled systems stability, considering effects of heat transfer to surroundings and heat capacity in material regions below yield
20 p3625 A69-37591

Heat influx equation coupling in thermoviscoelasticity, considering internal forces dissipation and stress-strain operators
22 p4044 A69-40741

THERMODYNAMIC CYCLES
NT BRAYTON CYCLE
NT RANKINE CYCLE
NT STIRLING CYCLE
Idealized cycle of gas expansion machine with regenerator for cooling radio components
04 p0687 A69-15164

Thermodynamic cycle and optimum conditions of electric power source of MHD generator in combination with thermocompressor
09 p1435 A69-21592

Thermodynamics and aerothermodynamics for propulsion problems noting thermodynamic laws and

quantities, steady flow, shock waves, nozzles, inlet and thermodynamic cycles

11 p1821 A69-25583

Thermodynamic cycle analysis of various gas turbines and air breathing propulsion systems noting regenerators, heat exchangers and pulsejet engine

11 p1943 A69-25584

Thermal efficiencies of liquid-metal MHD generator cycles, analyzing optimum parameters, working fluid and partial irreversibilities

13 p2205 A69-27484

Optimal cycle parameters for liquid metal single component MHD cycle, employing condensing ejector in front of generator

13 p2205 A69-27488

Liquid metal MHD generator cycles thermodynamic analysis, considering multicycle operation improvement with heat regeneration

13 p2372 A69-27489

Piston-like laminar liquid metal flow in MHD generator to increase thermodynamic efficiency of cycle and to generate electricity by synchronous principle

13 p2206 A69-27491

Ideal MHD induction converter pressure and generator cycles compared for calculating maximum output and pressure, considering current-conducting walls effects

14 p2393 A69-28887

Thermodynamic parameters of MHD cycle employing supercritical Hg, indicating need for more suitable fluids

16 p2736 A69-31914

Thermal cycle for direct flow supersonic compressorless MHD generator without heat regeneration and high temperature exchange

18 p3093 A69-34714

Air conditioning system for transport airplane using combined simple/bootstrap cycle refrigeration unit, discussing thermodynamic performance and hardware implementation

[AIAA PAPER 69-787] 19 p3243 A69-35641

Temperature and pressure relations in power plant with closed gas cycles with radiative heat transfer, noting radiation area reduction influence

20 p3464 A69-37603

Aircraft engine technology, discussing turbine entry temperatures, reheat temperatures, high pressure spools, high temperature materials and small blades fabrication

[RAES PAPER 20] 22 p4000 A69-40499

THERMODYNAMIC EFFICIENCY

Heat transfer efficiency of triangular radiating fin in diathermal medium producing aerodynamic heating

02 p0354 A69-12490

MHD generator and compressor Joule losses effect on thermoelectric energy conversion closed cycle efficiency with electrical conductivity maintained by nonequilibrium ionization

03 p0369 A69-14152

Increasing vortex tubes energetic cooling efficiency for cooling aircraft components by using potential energy of gas emitted from tubes

04 p0684 A69-14488

Dissociating gas as working fluid for space plant, noting role in radiator area reduction

04 p0551 A69-15313

Smith correlation of turbine stage efficiency for relating achievable efficiency to stage loading and flow factors used for total pressure loss coefficient data

[ASME PAPER 68-WA/GT-5] 05 p0812 A69-16140

Rhenium Nb cylindrical thermionic converter, measuring efficiency and power density in emitter temperature range 1600-2050 K and collector temperature range 873-1173 K

05 p0707 A69-16359

Space radiator dynamic model for predicting outlet temperature transient response to environmental variations

[AIAA PAPER 69-29] 06 p1039 A69-18205

Space storable propulsion system comparison, discussing liquid propellants performance and thermodynamic analysis

[AIAA PAPER 68-614] 09 p1570 A69-21981

Throttling effect on thermodynamic efficiency of MHD generator Rankine cycle with various working fluids

11 p1824 A69-24222

Closed loop cycle converter, composed of MHD generator and compressor consuming thermal energy, exhibiting moderate cycle efficiency decreases

11 p1824 A69-24223

Gas turbine blade cooling by longitudinal air flow, discussing cooling efficiency of guide and impeller blades and blade ring

11 p1942 A69-25337

Enthalpy excess thermodynamic functions of binary gas mixtures based on stationary diffusion thermoeffect in tube

11 p2003 A69-25552

Thermoelectric power generators energy output efficiency, discussing thermal and electric contact resistances influence for optimizing parameters

12 p2016 A69-26364

Thermal efficiencies of liquid-metal MHD generator cycles, analyzing optimum parameters, working fluid and partial irreversibilities

13 p2205 A69-27484

Thermodynamic efficiency of MHD cycles for liquid Na with multistage injection and injection condensation

13 p2205 A69-27487

Piston-like laminar liquid metal flow in MHD generator to increase thermodynamic efficiency of cycle and to generate electricity by synchronous principle

13 p2206 A69-27491

Local film heat transfer coefficients variations effect on longitudinal constant area fin surface under turbulent flow

[ASME PAPER 68-HT-20] 13 p2373 A69-27770

Error analysis in efficiency measurement of gas turbines, considering thermodynamics and power output

14 p2509 A69-29509

Axial gas turbine efficiency and work functions, discussing turbine using isothermal high velocity combustor

16 p2837 A69-32064

Seam welded U-type fin efficiency and effectiveness, studying effects of fin height, heat transfer coefficient and thermal resistance

19 p3452 A69-36371

Finned tube radiators with constant longitudinal specific heat flow, determining thermal efficiency and optimal thermal and structural parameters

20 p3631 A69-36978

Inhomogeneities effect on thermoelectric power and thermal efficiency of semiconductor thermocouple with constant forbidden band width

22 p3994 A69-40933

Edge effects in efficiency of air cooled turbine blade cascades with cooling air ejection from blade trailing edges into gas flow

24 p4364 A69-43090

THERMODYNAMIC EQUILIBRIUM

Steady state problem of convective heat transfer in half space with boundary conditions of third kind

01 p0174 A69-10103

Supersonic air flow around blunt body studied near critical line with allowance for viscosity, thermal conductivity and radiant energy transfer, assuming thermodynamic equilibrium

01 p0006 A69-10378

Statistical equilibrium equations solution for thermodynamic equilibrium variations of populations of very high energy levels in hydrogen and complex atoms

01 p0150 A69-10395

Graphical and analytical interpolation methods for representing initial compositions in equilibrium thermodynamic systems

01 p0176 A69-10403

Carbonaceous, enstatite and stony meteorite classification on basis of siderophilic, chalcophilic and lithophilic element proportions or isotope composition, discussing thermodynamic equilibrium

01 p0025 A69-11368

Solar copper abundance determined from measuring Cu 1 and 2 and resonance lines transition probabilities in electric arc emission under LTE conditions

02 p0204 A69-11456

Arc discharge in axially turbulent airflow producing equilibrium air plasma

02 p0285 A69-11571

Computer models of one dimensional stellar problems, discussing fast relaxation of unsteady state to Fermi-Dirac distribution and slow relaxation to thermal equilibrium

02 p0323 A69-12274

Thermodynamic stability of plasma with strong interaction, discussing relationship to simultaneous oscillation forms

02 p0292 A69-12635

Equilibrium of rotational degrees of freedom in gases undergoing relaxation, noting excitation, relaxation time, kinetics, transfer effects and measurements for hydrogen

02 p0284 A69-12667

Electric potential for axisymmetric equilibrium electron density distribution, solving Poisson equation in closed form

03 p0476 A69-13159

Soviet book on hypersonic flow past truncated cones at various angles of attack with allowance for physicochemical equilibrium transformations

03 p0362 A69-1363

Covariant statistical mechanics for equilibrium thermodynamics

03 p0533 A69-13758

Nondegenerate dense plasma thermodynamic stability by nonclassical methods, discussing atomic concentration dependence on ionic concentration

05 p0802 A69-1589

Thermal metal-plasma thermodynamic equilibrium using surface ionization of inner and outer potentials and work function, discussing ion and electron extraction

06 p0979 A69-17249

Mechanical equilibrium and stability conditions for system of interacting atoms in crystal structure

06 p0944 A69-17504

Thermal nonequilibrium of unsteady adiabatic gas flow in nonheat conducting tube with open ends

06 p0911 A69-18113

Thermal and metallographic analyses of Ti-Zr-Al system vertical sections close to Ti-Al edge, considering phase equilibrium

07 p1162 A69-18771

Dissociation equilibrium of negative H ions in solar type stellar atmospheres, noting H molecule vibrational and rotational levels and continuous thermal radiation

07 p1223 A69-19635

Statistical theory of fluids in equilibrium based on correlation functions for pair interactions between constituent molecules, invoking superposition closure approximation

08 p1350 A69-19868

Fortran 4 program for computation of equilibrium compositions of gas mixtures at high temperatures

08 p1278 A69-20154

Quantitative spectroscopy methods for determining data on chemical constitution of plasmas, treating optically thin LTE plasmas

08 p1363 A69-20465

Frozen shock in steady one dimensional compression flow of relaxing gases weaker than equilibrium shock

08 p1304 A69-20785

Phase equilibria in V-Cr-C, Nb-Cr-C and Ta-Cr-C systems determined by microscope and X ray analyses

09 p1523 A69-21872

Vacuum melting effect on O concentration in heat resistant alloys, outlining conditions for nitrides formation in equilibrium with melt

09 p1524 A69-22136

Fluid dynamical aspect of Schroedinger quantum mechanics and thermal equilibrium

09 p1541 A69-22394

Ionization-recombination thermodynamic equilibrium upset causing spectral excitation in He arc plasma

10 p1742 A69-24077

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio

11 p1957 A69-24403

Thermal radiation properties of gases in thermodynamic equilibrium, discussing radiation resulting from electronic, atomic and molecular state transitions

11 p1998 A69-24460

Gravitational effects on thermodynamic variable equilibrium composition of liquid-vapor binary mixtures near critical point, discussing changes in phase with altitude

11 p1999 A69-24914

Light ion abundance measurements of OGO satellites and field aligned diffusive equilibrium theory with temperature and concentration latitudinal variations

11 p1879 A69-25157

Dense gas equilibrium plasma thermodynamic stability in case of high electrostatic interaction energy of charged particles, analyzing phase transition possibility

11 p1928 A69-25234

Freezing of water droplets in thermal equilibrium with gas mixtures, considering droplet shattering and gas volume

12 p2126 A69-26018

Supersonic air flow around blunt body studied near critical line with allowance for viscosity, thermal conductivity and radiant energy transfer, assuming thermodynamic equilibrium

12 p2012 A69-26669

Gamma prime phase coherent equilibrium solubilities in Ni alloys of Al, Si and Ti from magnetic studies

of particle coarsening and electron metallographic observations
13 p2276 A69-27370

Spectral distribution of fluctuations in stable plasma in absence of external fields, emphasizing electric field fluctuations, quasi-steady states, isotropic plasmas and thermodynamic equilibrium
14 p2490 A69-29103

Radiative effect on rotating gaseous magnetic mass stability in thermodynamic equilibrium, including small oscillations stability
14 p2522 A69-29596

Convective and nonconvective two stream instability for hot plasmas, approximating equilibrium distribution function for given temperature by resonance functions
14 p2499 A69-29844

Relativistic corrections to particle distribution functions for high temperature plasma in thermodynamic equilibrium by integrating Gibbs distribution
14 p2499 A69-29847

B-type stellar spectra, discussing atmospheres and local thermal equilibrium from considerations of He I and P II lines relative strength
15 p2679 A69-30046

Pressure, temperature, density and enthalpy of carbon dioxide behind primary and reflected shock waves determined by method suitable for computer
15 p2592 A69-31054

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in supersonic region
15 p2548 A69-31065

Solar chromosphere metal abundance determined taking into account local thermodynamic equilibrium departures
16 p2855 A69-31657

One dimensional free expansion of collisionless plasma tested as function of thermal equilibrium and confinement, using Vlasov equations and computer
16 p2819 A69-31685

Two component heat pipe operating characteristics on basis of thermodynamic phase equilibrium for binary mixtures
[AIAA PAPER 69-631] 17 p3071 A69-33268

Boron nitride synthesis by gas phase reaction of boron chloride or diborane with ammonia, determining purity from equilibrium gas mixture components
17 p2992 A69-33432

Book on equilibrium thermodynamics covering origins and roles of thermodynamic laws, variables, equilibrium, reversibility, thermodynamic and thermochemical properties, etc
18 p3229 A69-34533

Transformed kinetic equation used to study relaxation of quantum oscillator to thermodynamic equilibrium state
18 p3152 A69-35126

Time dependent equations for non-LTE occupation numbers of lower bound levels of hot gas or plasma outer layer atoms and ions
18 p3231 A69-35242

Dynamic effects in structure of H II equilibrium region left behind expanding ionization front, showing temperature as function of distance from star
19 p3403 A69-35966

Gas dynamics of material slab under radiation impact assuming thermal equilibrium reemission, discussing equations of motion and mean free path as function of frequency
19 p3449 A69-36355

Thermodynamic equilibrium stability general theory extended to arbitrary boundary conditions using properties of entropy balance equation
19 p3452 A69-36789

Spectral absorption coefficients and emissivities of thermodynamic equilibrium mixture of various combustion products at high temperatures, based on graphs
19 p3266 A69-36840

LTE departure calculated for He I in hot star model atmospheres for effects on populations of singlet and triplet states
21 p3801 A69-38761

Laser radiation increased absorption in opaque solid body attributed to vaporization, analyzing factors determining thermodynamic equilibrium between condensed and gaseous phases
21 p3736 A69-38962

High temperature equilibria from hydrocarbon plasma sources subjected to 3000 W RF electrodeless discharge
21 p3670 A69-39738

Einstein development of theory of fluctuations applied to homogeneous nucleation, calculating activation

energy, liquid drop-vapor system equilibrium state peculiarity, etc
22 p3938 A69-40448

Surface roughness effects on equilibrium temperature of isolated adiabatic plane surface illuminated by collimated and uniform solar flux
22 p4050 A69-40558

Phase equilibrium apparatus for measurement of thermodynamic properties of cryogenic fluid mixtures, including argon-methane data
[NAS-NRC PAPER H-3] 22 p3947 A69-40630

Radiative energy transport in moving gaseous media in local thermodynamic equilibrium, assuming spectral line shifts by temperature and pressure variations
22 p3982 A69-41018

Black body radiation at very high temperatures, discussing pion-nucleon interaction in pion gas in thermal equilibrium
23 p4238 A69-41358

Kinetic theory for macroscopic transport phenomena in N-component polyatomic gas mixtures with internal degrees of freedom under nonlocal thermodynamic equilibrium
23 p4238 A69-41435

Atomic hydrogen departures from LTE computed for models of B star atmospheres, assuming detailed balance in hydrogen lines
24 p4376 A69-42665

Thermodynamic calculation of equilibrium constant and homolytic dissociation degree of tetrafluorohydrazine based on enthalpy and statistical entropy
24 p4280 A69-42788

Solar flares accompanied X ray emission temporal and spectral variations, showing departure from thermal equilibrium
24 p4371 A69-43608

Equilibrium state of matter at high temperatures and densities with respect to nuclear reactions, determining neutron-proton ratio
24 p4391 A69-43793

THERMODYNAMIC PROPERTIES

NT CRITICAL POINT
NT CRITICAL PRESSURE
NT CRITICAL TEMPERATURE
NT EMISSIVITY
NT ENTHALPY
NT ENTROPY
NT FREE ENERGY
NT FUSIBILITY

NT THERMAL DIFFUSION
NT THERMAL DIFFUSIVITY
NT THERMAL EXPANSION
NT THERMAL INSTABILITY
NT THERMAL STABILITY
NT THERMOCHEMICAL PROPERTIES
NT THERMOPHYSICAL PROPERTIES
NT VAPOR PRESSURE
NT VOLATILITY

Dimensional effects on thermodynamic and kinetic properties of thin semiconductor and semimetal films, noting quantization influence
01 p0136 A69-10186

Thermodynamical and hydrodynamical relations for relativistic classical scalar fluid, obtaining energy momentum tensor
01 p0175 A69-10345

Energy gap behavior and thermodynamic properties of anomalous superconductors noting sensitivity to phonon spectrum
01 p0138 A69-10436

Complex chemical equilibrium calculation, analyzing thermodynamic principles and solution to nonlinear equations
01 p0023 A69-10588

Vaporization waves in metals, discussing thermodynamic function of carrying liquid metal through successive states on liquidus line in two phase region
01 p0117 A69-10655

Thermodynamics in homogeneous steady state fog over rough terrain representing absolutely absorbing surface
02 p0274 A69-11442

Diatomic dissociating gas free atoms virial coefficient used to study thermodynamic properties and transport coefficients of gases
02 p0283 A69-11574

Lunar surface temperatures and thermal characteristics from Surveyor 5 thermal engineering data gathered during lunar days, eclipse and nights
02 p0321 A69-12227

Viscoelastic materials thermomechanical behavior, discussing constitutive equation and derivation of stress tensor and entropy density from viscoelastic potential
02 p0344 A69-12294

Thermovortex effect, determining functional relations between interdependent parameters by means of dimensional analysis
03 p0531 A69-12966

Thermodynamic and kinetic interactions of high melting point metal oxides reduction by carbon
03 p0445 A69-13568

Thermodynamic evaluation of interaction between solid metals and dispersed high melting point oxides, stressing isobaric potentials
03 p0446 A69-13571

Thermodynamic study of carburization of liquid titanium and zirconium, examining effects of atmosphere, graphite porosity and alloying elements
03 p0446 A69-13572

Lenz-Ising model of ferromagnetism noting mathematical methods used to investigate model properties
03 p0488 A69-13785

Geometrical and thermomechanical effects on pressure and forces in deformation of thin Ti alloy blanks
03 p0452 A69-14123

Constants in formulas describing temperature and pressure dependence of thermodynamic characteristics of high temperature monatomic ionized gases for positive ions
03 p0473 A69-14156

Effect of dipole/dipole resonance interaction between excited and nonexcited atoms on gas thermodynamic properties, showing unstable quasimolecules formation
04 p0632 A69-14551

Thermodynamic function tables for 30 gases under ideal gas conditions up to 6000 K
04 p0686 A69-15153

Heat transfer and IC, discussing semiconductors thermal and electrical analogs and thermal properties
06 p0894 A69-17216

Grey and very grey thermochemical tables for C-H and C-H-O species
[WSCI PAPER 68-38] 06 p0885 A69-17795

Thermodynamic and aerodynamic characteristics of organic Rankine cycle working fluids for ideal applicability to manufacturing
[SAE PAPER 69-0063] 07 p1057 A69-18308

Ignition time of methane and acetylene, considering concentration and thermodynamic properties during reaction
[WSCI PAPER 68-41] 07 p1240 A69-18356

Thermodynamic properties of binary and ternary liquid metal systems, noting electromotive force and vapor pressure measurements
07 p1165 A69-18939

Zirconium niobium alloys thermodynamic properties measured by Knudsen effusion method using zirconium
95 07 p1165 A69-18940

Cobalt-tungsten solid solutions thermodynamic properties calculated by Borelius method using phase diagram
07 p1165 A69-18941

Rawin systems for upper air measurements of wind and thermodynamic parameters, using balloon-borne radiosonde
07 p1057 A69-19581

Mercury concentration relation to thermal history of chondritic meteorites, using activation analysis
08 p1404 A69-20920

Bellows sealed valve for measurement of fluorine thermodynamic properties at moderately high pressures
09 p1493 A69-21428

Finite elastic locking medium, discussing equation of state for thermodynamic variables and applications to thermoelasticity
[IS-ERI-70] 09 p1612 A69-21561

In situ vacuum testing requirement for valid measurement of vacuum induced changes in mechanical and thermal properties of various filled elastomers
09 p1477 A69-22008

Thermosetting resin curing behavior characterized by differential thermal analysis performed above atmospheric pressure to prevent volatilization
09 p1500 A69-22311

Pyrolytic carbon felt composite development and properties, measuring and tabulating mechanical, thermal and ablation properties

09 p1530 A69-22364

Steady compression waves properties in relaxing gases found independent of thermodynamic behavior and relaxation process

10 p1631 A69-22893

Specific heats of oxygen at coexistence from triple point to critical point and corresponding values for liquid phase

10 p1808 A69-23187

LOX thermodynamic properties from triple point to 250K and pressures to 350 atm, tabulating at uniform densities and temperatures

10 p1808 A69-23189

Boltzmann H function for moderately dense gas of identical particles with discrete velocity distribution in cases of nonisotropic binary and ternary collisions

10 p1725 A69-23790

High temperature gas mixture plasmas thermodynamic properties, emphasizing Debye electrostatic interactions and electron states

10 p1810 A69-23794

Boltzmann H theorem and related mathematical topics, noting applications to subsonic gas flow and continuum flow around and over body

11 p1870 A69-25008

Composition and thermodynamic properties of gaseous system reacting at low temperatures with condensed phase formation, discussing iterative process convergence in approximation

11 p2001 A69-25223

Thermodynamics and aerothermodynamics for propulsion problems noting thermodynamic laws and quantities, steady flow, shock waves, nozzles, inlet and thermodynamic cycles

11 p1821 A69-25583

Origin of life in terms of polymers synthesis under thermodynamic and geological conditions

12 p2017 A69-25764

Heat resistant composites, discussing composition, properties and high temperature behavior, plastic materials, reinforcement filaments, whiskers and test methods

12 p2117 A69-25855

Silicon nitride vaporization and thermodynamic properties analyzed using Langmuir and Knudsen methods

12 p2118 A69-26261

Anisotropic Heisenberg antiferromagnetism in spin wave approximation, calculating thermodynamic quantities in terms of elliptic integrals

12 p2144 A69-26500

Electrical, thermal and thermoelectronic properties of refractory oxide materials including lanthanum chromite and strontium zirconate, discussing Hall effect, IR absorption, mixtures, etc

13 p2316 A69-27470

Heat transfer coefficients for carbon dioxide near thermodynamic critical point for flow through electrically heated duct, noting turbulent forced convection as mechanism

13 p2373 A69-27769

Solar wind quiet state thermal properties and chemical composition compared with coronal expansion hydrodynamic model predictions

14 p2513 A69-29098

Low temperature thermal expansion coefficients and linear contraction of metal alloys from liquid hydrogen to room temperature tabulated as function of temperature

14 p2464 A69-29400

Organic and inorganic fabric reinforcements effects on thermal properties of composites noting thermal conductivity, diffusivity, specific heat constants and temperature ranges

15 p2642 A69-30466

Remote sensing cross-beam cross correlation methods of determining spatially resolved average thermodynamic properties

16 p2789 A69-31868

Turbulent jet theory, thermal ignition theory and flameout characteristics of bluff body flame stabilizers

16 p2879 A69-32141

Nonlinear regression techniques for statistical simultaneous measurement of thermal properties including convergence criterion

17 p3070 A69-33260

Mechanics and thermodynamics equations for two dimensional continua, discussing applications

17 p2994 A69-33391

Hypersonic aircraft induced changes in chemical and thermodynamic properties of air influencing aerodynamic forces on vehicle

17 p2895 A69-33576

Book on solid bodies collision theory covering elastic bodies with ruled surfaces, dynamic effects associated with Rayleigh surface waves, thermodynamic effects, etc

18 p3210 A69-34259

Book on equilibrium thermodynamics covering origins and roles of thermodynamic laws, variables, equilibrium, reversibility, thermodynamic and thermochemical properties, etc

18 p3229 A69-34533

Heat sensitive paints thermophysical characteristics determined by nonstationary heat conditions method

18 p3161 A69-34697

Plastics thermal properties and industrial structural applications dependency on temperature

18 p3161 A69-34839

Air data system consisting of aerodynamics covering thermodynamic sensors and computer calculating flight parameters for automatic flight control

18 p3169 A69-34854

Thermoplastic polyarylsulfone thermal and electrical properties at over 500 F, noting resistance to thermal oxidative attack

19 p3355 A69-35527

Thermal and mechanical properties UV of diazadiphosphetides, carbodiimides and phosphorus amide epoxies resins composites for use in environmental extremes

19 p3356 A69-35528

Liquid driver shock tubes dynamic and thermodynamic properties as functions of diaphragm pressure ratio and initial conditions

19 p3295 A69-36471

Ordered sets of Massieu thermodynamic characteristic speeds for reacting gas mixtures relevant to nonequilibrium flow fields compared to Laplacian and Newtonian speeds

19 p3452 A69-36802

Nondissociating vibrationally excited dense N, analyzing compressibility factor, internal energy, enthalpy, entropy, sound speed and specific heat by state equations

20 p3631 A69-37214

Rheology application to description, explanation and measurement of materials properties during deformation

20 p3561 A69-37599

N and H plasmas and N-H plasma mixtures thermodynamic properties calculation, discussing numerical methods and corrections for electrostatic interactions

21 p3847 A69-38421

Thermodynamic properties of hydrogen atoms, protons and electrons, using canonical group analysis to determine bound and free states

21 p3850 A69-38964

Temperature potentials in cylinder of known radius, investigating optimal heating regime and thermal kinetic factor effect on maximum potential magnitude

21 p3837 A69-39089

Cavitation flow of water and ethyl alcohol in venturi tube, noting effect of varying vapor concentration and thermodynamic properties

21 p3696 A69-39101

Thermodynamics of propellant combination of Li hydride containing solid fuel with ethyleneimine base, coupled with Cl trifluoride oxidizer and ammonium nitrate added

22 p3997 A69-39919

Photoelectric measurements of UV absorption coefficients of high temperature air at specific temperature and wavelength ranges in pressure-driven shock tube

22 p4049 A69-40098

Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model

22 p3984 A69-40186

Gaseous mixtures for hypervelocity applications, studying equilibrium conditions and thermodynamic properties for shock and constant volume heating processes

22 p4049 A69-40266

Thermodynamic properties of exchange reaction of Ti, Nb, Mo and W disilicides with graphite and pyrographite systems

22 p3970 A69-40638

Mechanical and thermal properties of vanadium alloys and austenitic stainless steels compared to determine applicability in high temperature reactor fuel jackets

22 p3971 A69-40973

Flow and thermodynamic variables of Ar-Cs mixture behind normal shock in shock tube at various temperatures and pressures

23 p4150 A69-41335

Nb-gaseous Nb chlorides equilibrium from transpiration measurements at 800-1400 C, confirming importance of Nb pentachloride, Nb tetrachloride and Nb trichloride

23 p4112 A69-41335

Nondestructive thermal method of measuring wall thickness and channel blockage in investment casting used in aircraft parts production

24 p4312 A69-42754

THERMODYNAMICS

NT AEROTHERMODYNAMICS

NT COMBUSTION PHYSICS

Approximate boundary controllability for heat equation by considering temperature variation with time

01 p0173 A69-10061

Temperature evolution velocity parameter effect on behavior of elastoviscoplastic solids, noting demonstration by work hardening tests at variable temperatures

01 p0164 A69-10036

Mechanical and thermodynamical theories of material behavior based on rate independence concept, discussing equivalence of various theories

01 p0166 A69-10227

Nonlinear viscoelastic bodies arising in 3d rheological models with hidden parameters behaving according to law compatible with objectivity and 2nd thermodynamics principles

01 p0171 A69-11131

Transformation laws for thermodynamic quantities confirming conventional formulation by mechanical model of heat

01 p0122 A69-11288

Thermodynamics of nonadiabatic vertical ascent of overheated individual air volumes in stably stratified atmosphere

02 p0274 A69-11441

Thermodynamics of ideal multiaxial gases in local nonequilibrium, approximating real gas system by ergodic subsystems grouped by degrees of freedom

02 p0350 A69-11552

Thermodynamic foundations of permanent deformation theory, noting parallel to viscoelastic material theory

02 p0350 A69-11714

Deformation thermodynamics, discussing mechanics, and thermokinetics of continuous media and wave propagation problem

02 p0339 A69-11990

Generalized unsteady temperature fields and stresses in crystalline plates using Fourier and Laplace transforms

02 p0340 A69-12044

Relativistic heat transfer formula and pressure definition in relativistic thermodynamics

02 p0352 A69-12253

Thermodynamics of viscoplastic materials under dynamic loads within framework of continuum mechanics of materials with memory

02 p0343 A69-12281

Thermodynamics of directed continuous media, discussing kinematics, equations of state, entropy inequality and material objectivity principle

02 p0354 A69-12611

Thermovortex effect, determining functional relations between interdependent parameters by means of dimensional analysis

03 p0531 A69-12966

Covariant statistical mechanics for equilibrium thermodynamics

03 p0533 A69-13758

Composite heat transfer by conduction and radiation in nongray medium, outlining electronic computer program for numerical solutions

03 p0533 A69-13884

Thermodynamics of materials with elastic range

03 p0529 A69-13955

Onsager reciprocity relations applied to thermodynamics of nonlinearity and noise in diodes

04 p0574 A69-14435

Thermodynamic computations for combustion product temperature and flow rate as function of pressure in burner and excess air ratio

04 p0684 A69-14487

Variational methods for nonequilibrium thermodynamic processes noting fluctuation theory introduction

04 p0551 A69-15314

Book on thermodynamic and thermochemical tables with charts on thermodynamic properties, physical chemistry and gas dynamics

04 p0688 A69-15459

Thermodynamic theory of strain rate sensitive plastic material within framework of thermodynamics of materials with internal state variables

05 p0834 A69-15792

- Regular thermal conditions in solid bodies with radiative heat transfer
05 p0845 A69-15896
- Acceleration wave propagation and growth in elastic materials, discussing thermodynamic influences
05 p0836 A69-15931
- Thermal potential P and Q smoothness on surfaces, proving relevant theorems
05 p0849 A69-16452
- Thermodynamic approach to calculation of molecular lasers, determining various population levels of carbon dioxide molecule by measuring amplification factors for rotational vibrational transitions
06 p0934 A69-17465
- Thermodynamics of fluid materials and characterization of thermodynamics of irreversible processes, using constitutive equations
06 p0959 A69-18222
- Fluid and thermodynamic modeling for ground test simulation of nuclear rocket vehicle liquid hydrogen propellant behavior
[SAE PAPER 690201] 07 p1178 A69-18306
- Ti alloys thermomechanical treatment effect on strength and plasticity characteristics, noting single and double phase alloys and rupture
07 p1161 A69-18766
- Thermodynamic consequences of Lindemann mechanism for fusion of pure body, discussing application to isolated equilibrium system of solid and liquid phases
07 p1242 A69-19322
- Self gravitating medium in quasi-static equilibrium, using phenomenological equilibrium theory and zero time fluctuations
07 p1222 A69-19622
- Consistency of high temperature equation of state of solids, considering Grüneisen parameter and lattice dynamics
08 p1419 A69-19814
- Corrections to relativistic plasma thermodynamic functions associated with electromagnetic field effect, demonstrating inapplicability of Darwin Hamiltonian to problem
08 p1359 A69-19953
- Thermodynamics of nonsimple elastic materials with two temperatures, showing temperature and stress difference proportional to heat supply
08 p1422 A69-20847
- Thermodynamics and polarization of zinc electrode in alkaline media, discussing anodic dissolution and passivation
08 p1268 A69-21048
- Flow equations of rheological media derived using thermodynamics, assuming nonlinear stress-strain relation in incompressible medium
08 p1419 A69-21074
- Heat transfer mechanism in solid body, deriving integrodifferential equation with classical equation and hyperbolic equation of heat propagation as special case
09 p1621 A69-21587
- Characteristic equation obtained by considering world line vector, basic thermodynamic variables and metric tensor as functions of Lichnerowicz class
09 p1480 A69-21614
- Thermodynamic analysis of engines and heat pumps operating within negative absolute temperatures, noting work increase by throttling
09 p1623 A69-22219
- Asymptotic behavior of frequency function of fluctuations for generalized ensemble parameters, noting characteristic function convergence to Gaussian at thermodynamic limit
09 p1623 A69-22395
- Book on dynamics and thermodynamics of gas at hypersonic velocities and extremely high altitudes
09 p1483 A69-22400
- Thermodynamic potential of rarefied plasma from Coulomb interactions of atoms with electrons and ions
10 p1728 A69-23134
- Book on thermodynamics of charged and polarized layers covering matter in electric fields, general framework theory, applications, etc
10 p1724 A69-23159
- Book on thermodynamics of irreversible processes covering chemical reactions, relaxation phenomena, permeation, osmosis, electroosmosis, thermoosmosis, electric conduction, diffusion, etc
11 p1999 A69-24533
- Thermodynamic approach to equation of state of magnetized Fermi gas, deriving energy eigenvalues of free electron in magnetic field
11 p1961 A69-25107
- Equilibrium compositions of reaction products calculated by permutation over limiting equilibrium surface in reaction space, considering charged components and condensation products
11 p2001 A69-25224
- Thermodynamics of sinusoidal steady state energy converters governed by Onsager reciprocal relation, determining maximum conversion efficiency
11 p1826 A69-25396
- Thermodynamic properties of materials in critical region, discussing inhomogeneity
11 p2003 A69-25440
- Thermodynamics of strain rate sensitive elastoviscoplastic solids, considering kinematic description of plastic deformation and choice of state variables
11 p1994 A69-25601
- Isoperimetric plasma thermodynamics problems, including plasma free energy and relativistic plasma density fluctuations energy
12 p2138 A69-26603
- Thermodynamic equivalence of limit theorems for canonical and grand canonical ensembles, discussing Massieu-Planck function analog relation by Legendre transformation
12 p2191 A69-27148
- Microstructured mixtures theory including energy balance, mass and momentum equations and entropy production inequality for structured fluids in motion
13 p2371 A69-27318
- Allowable thermodynamic processes and constitutive equation restrictions determined by Clausius-Duhem inequality, noting applications to plasticity theory and linear viscous fluids
13 p2371 A69-27319
- Heat transfer in solid bodies, deriving thermal conductivity equation and surface boundary conditions in presence of radiative energy transfer
13 p2373 A69-27584
- Rigid heat conductor in continuum thermodynamics, discussing conductivity tensor symmetry and heat capacity positivity as restrictors
13 p2377 A69-28193
- Constant density heating upstream and constant pressure cooling downstream formulas for radiating shock waves
13 p2249 A69-28240
- Green function for boundary value problems of heat conduction equation constructed by heat potentials method
13 p2380 A69-28548
- Finite thickness plate heat equation using Legendre polynomials
14 p2537 A69-28970
- Fundamental principles of thermodynamics incorporation into general relativity and geometrodynamics, interpreting entropy growth in terms of space dynamics
14 p2538 A69-29019
- Solution methods for differential heat conduction equations, discussing methods of variable separation, Green function, thermal potentials, etc
14 p2539 A69-29456
- Propylene imine IR and Raman spectra, calculating thermodynamic functions based on rigid rotator harmonic oscillator model
14 p2410 A69-29922
- Unsteady heat conduction equations for elliptic cylinder with convection solved by point matching
16 p2879 A69-32171
- Thermodynamics and polarization of Zn electrode in alkaline medium for electric generators
16 p2739 A69-32419
- Transient thermal analysis of space radiators excluding finite difference equations, noting computer adaptability and time saving
[AIAA PAPER 69-615] 17 p3070 A69-33261
- Linear irreversible thermodynamics theory as applied with conservation principles and Maxwell relations to charged particle motion in electromagnetic field, noting Onsager coefficients role
17 p3075 A69-34142
- Shock tube application to transition probability measurements with emphasis on thermodynamic state of radiating gas, noting temperature dependence of level population
18 p3176 A69-34446
- Book on equilibrium thermodynamics covering origins and roles of thermodynamic laws, variables, equilibrium, reversibility, thermodynamic and thermochemical properties, etc
18 p3229 A69-34533
- Meteorological forecasting as problem in fluid mechanics and thermodynamics, discussing accuracy and electronic computer role in classical or mathematical methods
18 p3166 A69-34694
- Dynamic pressure pulsations, temperature distribution and gas concentrations in discrete vortices zone in wake of plate in unbounded flow
18 p3124 A69-35120
- Elastic stability theory from thermodynamic viewpoint, considering postulates and energy equations
19 p3444 A69-36796
- Transformation groups used to find similarity solutions for partial differential equations and heat equation
20 p3630 A69-36915
- Soviet book on theory and design of turbocompressors covering gas dynamic cascade theory, thermodynamics and aerodynamics, viscous gas flow, etc
20 p3459 A69-37238
- Nonlinear viscoelastic material properties evaluation from experimental data with illustration for polymers, deriving equations from thermodynamic principles
20 p3626 A69-37719
- Thermodynamic approach to calculation of molecular lasers, determining various population levels of carbon dioxide molecule by measuring amplification factors for rotational vibrational transitions
20 p3555 A69-37948
- Statistical mechanics applied to mechanical properties and thermodynamics studies of rapidly expanding or collapsing self gravitating systems
21 p3801 A69-38702
- Negative ion influence on electrical conductivity of partially ionized multicomponent gas mixtures, basing analysis on thermodynamic calculations of composition
21 p3774 A69-38867
- Constitutive equations for homogeneous viscous fluid and Kelvin-Voigt viscoelastic solid in electromagnetic field, using linear irreversible thermodynamics and continuum mechanics
21 p3851 A69-39289
- Temperature field in system of coaxial cylinders by solving heat equation with corresponding initial and boundary conditions
21 p3855 A69-39855
- Internal interactions of continua and concept of thermal isolation, discussing second law of thermodynamics
22 p4050 A69-40450
- Relativistic thermodynamics using entropy principle to find restrictions on constitutive functions
22 p4050 A69-40451
- Basic thermodynamic quantities derivatives arranged into three relationship systems for first and second order phenomena
22 p4051 A69-40970
- Thermal diffusivity measurement by nonsteady state methods, discussing time and temperature variables in heat flow differential equation
23 p4237 A69-41326
- Combined heat transfer calculations, considering moving radiating media and simultaneous convection or conduction
23 p4237 A69-41328
- Thermodynamics of elastoplastic materials with dislocation motion related to internal state variables, including case of rate independent plasticity
23 p4226 A69-41537
- Linear partial differential equations derived from thermodynamic identities integrated by method of characteristics for relationships between temperature and pressure incomplete equations of state
23 p4239 A69-41569
- Planck-Einstein equation derivation in special theory of relativity, discussing relativistic measurement of thermodynamic values in terms of Lorentz transformations
24 p4349 A69-42748
- Numerical solutions for time dependent boundary value problems governed by heat equation applied to transient heat conduction in irregularly shaped two dimensional regions
[ASME PAPER 69-HT-50] 24 p4410 A69-43521

THERMOELASTICITY

NT AEROTHERMOELASTICITY

- Book on thermoelasticity covering linearized uncoupled theory in small deformations, small and slow temperature changes, analysis of plane thermoelastic stress, etc
01 p0084 A69-10131
- Axisymmetric transient thermoelastic problem for transversely anisotropic hollow cylinder, examining boundary value problems
01 p0166 A69-10302
- Linear stationary thermoelasticity equations for Cosserat continua, discussing static and kinematic conditions, anisotropy and centrosymmetric isotropy equations
02 p0336 A69-11557

Integration for equations governing linearized thermoelastic transformations of incompressible solids
02 p0340 A69-12033

Menabrea theorem for anisotropic elastic body with internal incompressibility constraint, discussing validity during thermoelastic transformation
02 p0341 A69-12194

Menabrea theorem for nonisothermal transformations of anisotropic elastic body with internal incompressibility constraint and initial stress
02 p0341 A69-12197

Plane inhomogeneous thermal stress in isotropic elastic circular infinitely long cylinder produced by plane unsteady temperature distribution
02 p0349 A69-12826

Compatibility equations in plane micropolar thermoelasticity theory obtained by associated matrix method
03 p0525 A69-13607

Generalized Galerkin functions for asymmetric thermoelasticity, considering separation of coupled equations
03 p0525 A69-13608

Longitudinal thermoelastic wave propagation in infinite body, proving generalized Kirchhoff theorem
03 p0528 A69-13924

Controllable states of elastic heat conductors, analyzing deformations and temperature fields
03 p0529 A69-13957

Stressed state periodic problem in infinite strip under combined pressure and temperature field effect
04 p0673 A69-14497

Circular disk stress-strain state due to thermoelastic strain applied at disk sector edge
04 p0681 A69-15171

Axisymmetric thermal stresses in spheroidal shell of arbitrary thickness due to thermoelastic strain nucleus
05 p0836 A69-15923

Elastic bodies collisions in presence of thermoelastic effects, investigating local inertial and thermoelastic forces effect on compression region shape
05 p0841 A69-16207

Thermoelastic effects on gravity gradient stabilization of artificial satellites, including role of solar activity
06 p1025 A69-17613

Anomalous spacecraft OGO-D motion explained by open section boom thermally induced oscillations, discussing corrective measures
07 p1231 A69-18331

Boundary value problem of temperature field and heat conduction in transparent media heated by laser radiation producing thermoelastic stresses leading to breakdown
07 p1149 A69-18925

Reciprocity, variational and uniqueness theorems developed within linear theory of coupled thermoviscoelasticity
07 p1233 A69-19327

Completeness of Biot solution in theory of thermoelasticity, discussing Mindlin theorem and Boussinesq-Papcovich solution
07 p1236 A69-19470

Dynamic internal thermal shock in spherical shells of arbitrary thickness, considering uncoupled dynamic thermoelasticity problems with spherically symmetrical temperature fields
07 p1236 A69-19471

Heat generation effects by plastic deformations at tip of propagating crack in quasi-brittle materials, considering elastic stress field and crack velocity
08 p1412 A69-20144

Thermoelastic properties of particulate, filamentary and layered composites, summarizing Soviet theoretical and experimental work
08 p1339 A69-20500

Transient thermal stress distribution in infinite orthotropic elastic cylinder of rectangular cross section in presence of heat sources
08 p1415 A69-20664

Thermodynamics of nonsimple elastic materials with two temperatures, showing temperature and stress difference proportional to heat supply
08 p1422 A69-20847

Problems using Fredholm integral equations providing unique solution
08 p1418 A69-21004

Stress formulation of thermoelasticity in simply connected body, noting uniform temperature change influence on stress components
09 p1617 A69-22007

Reciprocity theorems of coupled and uncoupled thermoelasticity for macroisotropic and microisotropic simple homogeneous solids with microstructure
09 p1618 A69-22259

Reciprocity theorem applied to Somigliana relations for static loads and coupled thermoelasticity
09 p1618 A69-22260

Micropolar thermoelasticity using Green functions to solve wave equations in unbounded medium and study displacement, rotation and temperature fields
09 p1618 A69-22262

Unidirectional filamentary composites thermoelastic properties relation to constituent materials properties, using semiempirical micromechanics theory
09 p1530 A69-22320

Thermal stresses for mixed boundary conditions calculated from combined use of integral transforms and variational techniques, reducing computational labor
10 p1801 A69-23429

Subregions method in coupled thermoelasticity, discussing numerical values for thin steel circular disk
11 p1970 A69-24606

Optimum cooling of homogeneous isotropic cylindrical body with constraints on magnitude of thermoelastic stresses
11 p1976 A69-24772

Free vibration modes of infinite uniform plate in linear coupled theory of thermoelasticity, considering heat transfer conditions
11 p1976 A69-24793

Two and three dimensional quasi-static problems in coupled thermoelasticity, obtaining solutions for space containing cylindrical cavity and for solid cylinder
12 p2177 A69-25993

Boundary value problems of thermoelasticity, discussing existence and uniqueness theorems, ellipticity, thermoelastopotentials, Liapunov-Tauber theorem, Fredholm theorems, etc
12 p2182 A69-26726

Thermoelastic waves in stretched circular cylindrical bar, analyzing displacements, secondary pressure and temperature field by using Frobenius method
12 p2189 A69-27115

Classical plasticity theory modified to include finite elastic and plastic strain components by considering thermoelasticity and plastic work irreversible processes
13 p2362 A69-28119

Axisymmetric thermoelastic vibrations of infinite and finite cylindrical shells, determining natural frequencies and stress wave propagation
14 p2532 A69-28979

Thermoelastic stress-strain state of infinite circular cylindrical shell with elasticity modulus temperature dependence expressed by exponential function
14 p2532 A69-28980

Heat conduction and Navier equations solved for temperature distribution and displacements in elastic solids, considering time dependent boundary conditions, body forces and heat generation
14 p2535 A69-29364

Cylindrical wave propagation in thermoelastic incompressible isotropic solids, considering cases of zero and nonzero coefficient of thermic dilation
15 p2707 A69-30626

Thermoelastic stress in semiinfinite elastic medium due to discontinuous temperature distribution over free surface, solving associated heat conduction problem
15 p2712 A69-31006

Stress calculation for thermoelastic mixed boundary value problem in infinite isotropic plate with cylindrical stress free cavity
15 p2712 A69-31013

Thermoelastic stresses in isotropic circular cylinder with surface locally heated by external Newtonian heat source, considering various heat transfer conditions
15 p2714 A69-31178

Magnetothermoelasticity equations, uniqueness and reciprocity theorems and solutions emphasizing moving media
15 p2715 A69-31215

Stresses due to nucleus of thermoelastic strain in infinite elastic solid with two rigid circular inserts
16 p2872 A69-31906

Acceleration waves propagation in nonlinear conducting thermoelastic solid, treating homogeneously deformed and undeformed media
16 p2873 A69-32060

Initial thermostructural stresses in homogeneous quasi-isotropic two component medium, solving statistical boundary value problem thermoelasticity
17 p3058 A69-33316

Coupled stresses in thermoelasticity for displacement and rotation vector characterized medium, discussing wave propagation in unbounded medium
18 p3211 A69-34262

Collocation method applied to solving contact thermoelasticity problem for short thick walled hollow cylinder attached to thin elastic shell in axisymmetric temperature field
18 p3217 A69-34595

Thin walled shell temperature and strain fields described by integrodifferential equations based on Kirchhoff hypothesis and coupled thermoelasticity reciprocity equations
18 p3225 A69-35369

Variational method for computer calculation of supercritical bending of thermoelastic uniformly loaded circular plates, determining Ritz parameter influences on accuracy
19 p3434 A69-35824

Two dimensional thermoelasticity problem for non-linear media, obtaining solutions for thermal stress concentration and boundary value problems
19 p3436 A69-35844

Uniqueness theorems for energy methods solution of equations of dynamic thermoelasticity and viscoelasticity
19 p3439 A69-36470

Completeness and relations between potentials and stress functions in micropolar elasticity and thermoelasticity
19 p3439 A69-36470

Thermoelastic deformation and mean rotation divergence formulas for elastic simply connected micropolar body
19 p3440 A69-36586

Longitudinal waves propagation in unbounded thermoelastic medium expressed as surface integrals generalizing Kirchhoff theorem
19 p3444 A69-36804

Combined analytical and numerical method for thermoelastic boundary problem of unidirectional infinite strip
21 p3836 A69-38927

Mathematical modeling techniques applied to thermoelastic cooling for plate without clamping and mechanical loads, examining integrator schematic diagram
21 p3680 A69-39851

Reissner variational principle applied to incompressible and nearly incompressible anisotropic thermoelasticity
22 p4040 A69-39980

Thermoelastic stresses in rotating cylinders and disks with radial temperature distribution, deriving plane deformation approximate solutions
23 p4227 A69-41707

Wave propagation in dynamical theory of thermoelasticity, considering half space subject to step strain, temperature and stress distributed over free surface
23 p4235 A69-42464

THERMOELECTRIC GENERATORS

NT SNAP 10A

NT SNAP 21

NT SNAP 27

MHD generator and compressor Joule losses effect on thermoelectric energy conversion closed cycle efficiency with electrical conductivity maintained by nonequilibrium ionization
03 p0369 A69-14152

Mathematical model to design weight optimized silicon-germanium solar flat plate thermoelectric generator as spacecraft auxiliary power source in near sun missions
05 p0704 A69-15674

Design and performance equations for panel type solar thermoelectric generator, based on single thermocouple as generator unit
05 p0704 A69-15675

Thermoelectric and thermal phenomena in thermoelectric generator development for spacecraft applications, considering element design and materials selection
12 p2016 A69-25868

Heat conversion coefficients and initial temperature of active elements of solar powered electric devices
13 p2209 A69-28314

I-V characteristics of caloroelectric plasma converter with concentric electrodes measured for various hot electrode temperatures and mercury vapor flow rates
16 p2822 A69-32065

Thermal contacts effects on optimum operating conditions of solar thermoelectric power generator, discussing losses due to low thermal conductivity coefficient of insulating layers
16 p2741 A69-32797

Laboratory device for investigating thermionic energy converters and measuring current-voltage characteristics by static/dynamic methods
18 p3136 A69-34700

Gisette 5 thermoelectric radioisotopic generator for submarine use, discussing strontium 90 as isotopic source
21 p3768 A69-38458

Cascade thermoelectric heat pump reducing temperature gradient in legs of element near cold junction and reducing Joule heating in cold junction area

22 p3869 A69-40133

Planar radioisotope thermoelectric generator system for NASA deep space missions and integrated spacecraft power supply

23 p4070 A69-42254

Radioisotope thermoelectric generators /RTG/ design and performance analysis method applied to generators using Si-Ge Air-Vac type thermocouples

23 p4188 A69-42260

Thermoelectric generators using hot junction pressure contacted lead telluride technique, presenting model for long term performance characteristics

23 p4188 A69-42262

Thermoelectric generators performance and life tests, describing JPL facilities and programs

23 p4188 A69-42263

ISOTEC thermoelectric generators for space power, describing design features, operation, power output and radioisotope heat source

23 p4189 A69-42270

Space radiator system with hybrid, water heat pipes to transport waste heat from radioisotopic thermoelectric generator

23 p4190 A69-42304

Multifuel-capsule radioisotope thermoelectric generator design procedure, applying statistical environment definition

24 p4349 A69-43191

THERMOELECTRIC MATERIALS

Direct energy conversion and materials limitations, discussing thermoelectricity, solar cells, thermionics and fuel cells

02 p0194 A69-11801

Electron band structure of copper-nickel alloys, discussing thermoelectric properties, energy ranges and effect of alloying additions

02 p0301 A69-12765

Ferromagnetic ordering effect on gadolinium dialuminide thermoelectric power, measuring temperature dependence of power and electrical resistivity

03 p0485 A69-13322

Bismuth selenide inhomogeneous distribution effect on thermoelectric properties of bismuth telluride alloy

04 p0644 A69-15265

Chemical compatibility estimation of lead and tin tellurides thermoelectric materials with metallic alloys

04 p0551 A69-15315

Treatment and testing of thin platinum and gold alloy wires used in thermoelements for studying liquid fuel vaporization in combustion chambers

07 p1130 A69-18258

Thermoelectric and thermal phenomena in thermoelectric generator development for spacecraft applications, considering element design and materials selection

12 p2016 A69-25868

Electrical, thermal and thermoelectronic properties of refractory oxide materials including lanthanum chromite and strontium zirconate, discussing Hall effect, IR absorption, mixtures, etc

13 p2316 A69-27470

Thermoelectrical leg product specification /TELPs/ apparatus and data reduction technique for determining temperature dependent thermoelectric properties of material

18 p3093 A69-34783

Electrocaloric effect from 78-130 K on crystalline potassium dihydrogen phosphate, showing quadratic dependence on applied field /and polarization/ in paraelectric phase

20 p3583 A69-37343

THERMOELECTRIC POWER GENERATION

Fe-Fe interactions influence on increase in thermoelectric power with applied magnetic field at low temperatures for dilute alloys of Fe in Au

10 p1639 A69-23861

Thermoelectric power generators energy output efficiency, discussing thermal and electric contact resistances influence for optimizing parameters

12 p2016 A69-26364

Heats of condensation and vaporization of W, Re and Mo cathodes of thermoelectric converter with Cs arc for various output powers and Cs vapor pressure

12 p2017 A69-26544

Electricity from MHD - Conference, Warsaw, July 1968, Volume 4, Open cycle MHD

13 p2308 A69-28021

Zirconium hydride thermoelectric power system for space missions, discussing compactness, shield weight, temperature capability, reliability and SNAP 10A program

16 p2809 A69-31723

Thermoelectric converter systems optimization by geometry independent functions

18 p3093 A69-34782

Cascaded thermoelectric module for spacecraft power conversion via module integration with radio isotope heat source, bonding SiGe and PbTe stages

20 p3465 A69-37706

Thermoelectric power generator with variable thermal conductivity and electrical resistivity, obtaining steady state temperature distribution, power output and thermal efficiency

22 p3868 A69-40131

Power systems for unmanned spacecraft, noting improved performance for zirconium hydride reactors and thermoelectric converters

23 p4187 A69-42255

Nuclear reactor/thermoelectric power system design for manned orbiting space station, discussing station integration and operation

23 p4187 A69-42256

STAR /Stud and Rocker Panel/ four couple section improved by incorporating bonded tungsten electrical contacts for PbTe thermoelectric elements

23 p4188 A69-42261

THERMOELECTRICITY

Thermoelectric properties of GeTe-GaTe system, analyzing phase diagrams, solid solution formation, substitutions and zone structure influence

01 p0138 A69-10404

Intense laser emission interaction with current carriers in semiconductors, analyzing dependence of thermoelectric field produced by light absorption on intensity, frequency and temperature

01 p0139 A69-10895

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers

03 p0488 A69-13885

Simultaneous and independent measurement of thermal conductivity, thermoelectric power and electric resistivity, applying method to cadmium arsenide-zinc arsenide system

05 p0764 A69-16338

Alkali metals thermoelectric power and energy dependence of Heine-Abarenkov pseudopotential, taking into account anisotropy effects

05 p0809 A69-16507

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential

06 p0981 A69-17880

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms

06 p0981 A69-17881

Optical heterodyning with single mode carbon dioxide laser and triglycine sulfate pyroelectric detector, noting detector sensitivity threshold

07 p1156 A69-19332

Resistance temperature transducers and thermocouples covering characteristics, readout and design for aerospace requirements

10 p1690 A69-23225

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers

11 p1938 A69-25686

Qualitative analysis of thermoelectric effects in transistors, describing heat absorption and release

12 p2042 A69-26880

Electrothermal domains in semiconductors, examining domain velocity of motion under external potential

14 p2503 A69-28789

Differential thermal EMF at room temperature in p-InSb as function of concentration for different electron and hole scattering mechanisms

14 p2503 A69-28790

Peltier measurements below 4 K capable of measuring low Seebeck coefficient on high resistivity alloys and in presence of magnetic field

14 p2449 A69-29563

Thermoelectric parameters of polycrystalline p-type bismuth antimony telluride and bismuth antimony tellurium selenide solid solutions

15 p2668 A69-30629

Electrical conductivity and thermoelectromotive force of bismuth telluride and bismuth telluride-bismuth selenide alloys obtained by sintering, hot pressing and annealing

15 p2670 A69-31248

Simultaneous middle and low latitude Thomson scatter measurements, comparing electron density, temperature and exospheric temperature data on quiet and disturbed days

15 p2604 A69-31418

Thermal EMF, electrical conductivity and Peltier effect in sintered refractory oxides at high temperature in air and in Ar

17 p3068 A69-32990

Upper ionosphere Thomson scatter, electron number density measurements and topside sounding results during geomagnetic storms using electrodynamic drift theory

20 p3530 A69-37872

Thermal EMF in cadmium arsenide specimens with various electron concentrations determined to verify parabolic subband structure of conduction band

22 p3993 A69-40607

Electrothermal waves in nonequilibrium electrical discharge in potassium seeded argon plasma

24 p4359 A69-43645

THERMOGRAMS

U RECORDING INSTRUMENTS

U TEMPERATURE MEASURING INSTRUMENTS

THERMOGRAPHS

U RECORDING INSTRUMENTS

U TEMPERATURE MEASURING INSTRUMENTS

THERMOGRAVIMETRY

Synthetic solid lubricants impurity detection by X ray diffraction and oxidation thermogravimetry

01 p0102 A69-10909

Lithium aluminum hydride thermal decomposition using isothermal kinetics and differential thermal and thermogravimetric analyses, noting decomposition in four stages

02 p0304 A69-11898

Thermogravimetric plastics analysis data applied as constants to degradation kinetics equations used in charring-ablator digital computer programs

09 p1529 A69-22312

Thermographic phosphor coatings to obtain optical quantitative heat transfer distribution on wind tunnel models

12 p2099 A69-27150

Thermogravimetric study of oxidation protection of refractory metals by fused LiF coating, noting oxidation retardation of Ta, Nb and W

19 p3341 A69-35573

THERMOLUMINESCENCE

Thermoluminescence intensity of dolomite specimens from Kaali meteorite craters, discussing meteorite impact thermomechanical effect and crystal lattice defects

01 p0159 A69-11371

Allende carbonaceous meteorite age determination by thermoluminescence method, assuming internal radioactivity source

24 p4385 A69-43219

THERMOMAGNADYNAMICS

U THERMOMAGNETIC EFFECTS

THERMOMAGNETIC EFFECTS

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers

03 p0488 A69-13885

Quantum oscillations of Maggi-Righi-Leduc /MRLL/ effect in n-InSb and n-InAs samples from single crystals at liquid helium temperature

06 p0979 A69-16992

Hall effect theory and devices, noting application to measurement of several physical quantities and sources of errors in devices

09 p1541 A69-22698

Thermoelectric and thermomagnetic properties of bismuth at low temperatures, assuming thermal EMF due to phonon capture of carriers

11 p1938 A69-25686

Transverse quantum thermogalvanomagnetic phenomena in thin semiconducting films, noting effects of inelastic electron scattering at acoustic lattice vibrations

13 p2318 A69-27890

Polycrystalline Fe-Ni, Fe-Ni-Co ferrites structure, magnetostriction, magnetization curves and hysteresis prior and after thermomagnetic treatment

13 p2319 A69-27992

Transport processes under adiabatic conditions between external magnetic field and thermal and electrical gradients in solid, defining galvanomagnetic and thermomagnetic effects

13 p2299 A69-28129

Indium arsenide electrical parameters analyzed by kinetic effects, considering conductivity, thermal and magnetothermal EMF and transverse Nerst-Ettingshausen effect

15 p2666 A69-30066

Magnetic analysis by successive double heat treatment of miocene lava cooled during geomagnetic polarity reversal for determining field intensity
16 p2788 A69-32646

Transverse thermomagnetic EMF and Nernst-Ettingshausen coefficient in GaSb semiconductor with double conduction band and strong degeneracy of current carriers
21 p3783 A69-39558

Al-Ni-Co alloys precipitation mechanism effect on magnetic properties, including heat treatment and Ti alloying effects
23 p4175 A69-41298

THERMOMAGNETISM

U THERMOMAGNETIC EFFECTS

THERMOMECHANICS
U THERMODYNAMICS

THERMOMETERS

NT RESISTANCE THERMOMETERS

Low temperature thermometer based on temperature dependence of frequency of F-19 nuclear magnetic resonance in antiferromagnetic manganese difluoride
06 p0927 A69-17703

Gallium arsenide thermometer calibration in 1 to 100 K range using interpolation formula derived from p-n junction diode equation
12 p2093 A69-26484

THERMOMETRY

U TEMPERATURE MEASUREMENT

THERMONUCLEAR EXPLOSIONS

Gas remnant of large scale explosive event in galactic plane at 60 degree longitude, discussing resultant extension on line profile
07 p1225 A69-19717

Ionosphere disturbances due to high altitude thermonuclear explosions, discussing experimental proof by Cosmos satellites short wave transmitter radio signal scintillation statistical evaluation
19 p3304 A69-36624

Radiation effects due to high altitude thermonuclear explosion measured by satellite, estimating fragments longitudinal drift velocity, plasma cloud expansion rate and fragment distribution
20 p3532 A69-37960

Thermonuclear explosion Operation Starfish effect on ionospheric state from recording in Central Kazakhstan, studying frequency characteristics
22 p3942 A69-41097

Electron density decrease in F 2 layer ascribed to 9 July 1962 thermonuclear explosion, noting dissociative recombination role
22 p3942 A69-41098

Radioactive debris distribution in space from 9 July 1962 thermonuclear explosion over Johnston island recorded by Cosmos 6 satellite
23 p4205 A69-41836

THERMONUCLEAR POWER GENERATION

Plasma confinement experiments with Tokamak type magnetic configuration device, giving schematics for thermonuclear reactor
11 p1927 A69-25099

THERMONUCLEAR PROPULSION

U NUCLEAR PROPULSION

THERMONUCLEAR REACTIONS

NT CONTROLLED FUSION

NT NUCLEAR FUSION

Supernova explosion theories, discussing neutrino and degenerate matter concepts, thermonuclear reactions in stellar explosions, oxygen conversion into sulfur, Crab Nebula, etc
03 p0509 A69-13356

Vacuum system for obtaining highly purified plasmas for thermonuclear investigations noting decontamination cycles and chamber characteristics
03 p0412 A69-13839

Thermonuclear neutron emission from high temperature deuterium plasma produced by focusing high power laser radiation on lithium deuteride surface [IEEE PAPER O-11]
07 p1153 A69-19072

Neutrino emission and carbon burning onset in 1.45 solar mass stellar models with pure He envelope, He burning shell and degenerate C-O core
08 p1384 A69-20059

Primordial helium and horizontal branch star luminosity, obtaining luminosities in He burning phase for different He and metal abundances from models
09 p1601 A69-22211

General expressions derived for numerical stellar-interior calculations for nuclear reaction rates, emphasizing density-temperature combinations
09 p1606 A69-22418

Anharmonic pulsations of 15.6 solar mass star in helium burning phase, discussing radiation pressure, third order terms, higher modes and magnitude variation effects
10 p1771 A69-22853

Charged particle motion in superposed Heliotron and biconical cusp magnetic fields, considering particle confinement
16 p2817 A69-31643

Solar thermonuclear reactions studied by emitted neutrinos detection, plotting energy spectra for sensitivity of Cl 37 detection system
18 p3185 A69-34278

THERMOPHILES

Ferredoxin from thermophilic and mesophilic Clostridia, noting difference in heat stability due to iron and sulfide environments
22 p3897 A69-41068

THERMOPHILIC PLANTS

U BLUE GREEN ALGAE

THERMOPHYSICAL PROPERTIES

NT CRITICAL POINT
NT CRITICAL PRESSURE
NT CRITICAL TEMPERATURE
NT EMISSIVITY
NT FUSIBILITY
NT HEAT OF SOLUTION
NT MELTING POINTS
NT PYROELECTRICITY
NT SPECIFIC HEAT
NT SUPERCRITICAL PRESSURES
NT THERMAL CONDUCTIVITY
NT THERMAL DIFFUSION
NT THERMAL DIFFUSIVITY
NT THERMAL STABILITY
NT VAPOR PRESSURE
NT VOLATILITY

State variables of ideal gas in two phase region, discussing determination from equations of state and equation for internal energy and Maxwell criterion inapplicability
06 p1030 A69-17170

Thermoelastic properties of particulate, filamentary and layered composites, summarizing Soviet theoretical and experimental work
08 p1339 A69-20500

Three dimensional reinforcement composites for gear and bearing applications with improved interlaminar shear strength, thermal and wear properties
08 p1340 A69-20509

Molybdenum and vanadium effects on nickel steel properties, stressing brittleness avoidance and quenchability
11 p1904 A69-24642

Thermodynamic properties of materials in critical region, discussing inhomogeneity
11 p2003 A69-25440

Plant and soil thermal behavior for various conditions of crop species, plant spacing, tillage, irrigation and aerial thermal scanner imagery
12 p2075 A69-26989

Polymer structure relationship to thermal, mechanical and chemical properties of electrical insulating materials
13 p2285 A69-27986

High temperature properties relationship to microstructure of Co base superalloys and strengthening methods
14 p2465 A69-29891

Processing characteristics of wrought Co base alloys, discussing thermomechanical treatment effects, yield strength, ductility, etc
14 p2456 A69-29892

Thermoelectric parameters of polycrystalline p-type bismuth antimony telluride and bismuth antimony tellurium selenide solid solutions
15 p2668 A69-30629

Particulate thermophysical lunar soil model for measuring lunation nighttime and eclipse cooling, noting applicability to IR surface brightness temperature of Mercury hot pole
18 p3191 A69-34303

Composite polymers thermophysical properties at thermal destruction temperatures, noting increased heating rate effect on kinetic curves
18 p3161 A69-34696

Unsteady temperature field in plane skin of aerodynamic body in case of temperature dependent thermophysical characteristics of skin material
18 p3092 A69-34982

Nernst effect in pyrolytic graphite at low temperatures including thermal EMF, electrical conductivity, thermal conductivity and magnetoresistance coefficients
21 p3753 A69-39562

Radiative properties of Ta, Mo, Nb, graphite and niobium carbide at high temperatures
23 p4175 A69-41111

Mars atmospheric features from measurements during entry and after landing, discussing atmospheric state properties, diurnal variability, clouds and winds
23 p4212 A69-41101

B, silicon carbide, C and Be reinforcing fiber technology, thermal and physicomechanical properties, noting coating, surface defects and improvement over glass fibers
23 p4179 A69-42122

THERMOPHYSICS

U THERMODYNAMICS

THERMOPILES

Radiation method for temperature and heat flux measurement, discussing transducer with thermopile sensor
15 p2607 A69-30101

THERMOPLASTIC FILMS

U POLYMERIC FILMS

THERMOPLASTIC RESINS
NT POLYMETHYL METHACRYLATE

Reinforcing glass fiber fillers in thermoplastic commercial products, noting applicability to high speed fabrication by injection molding processes
02 p0269 A69-11717

Radiation processed wood-plastic materials produced by impregnating natural wood with liquid monomer followed by ionizing radiation induced polymerization
04 p0605 A69-14511

Thermoplastics reinforcement with fiber and whiskers, fillers, evaluating graded asbestos, carbon, silicon nitride, silicon carbide and potassium titanate
08 p1337 A69-20411

Tensile stress and energy-to-break values compared for glass-fortified thermoplastic resins, discussing notched and unnotched Izod impact
08 p1337 A69-20411

Flexural fatigue of glass-reinforced thermoplastics, function of various parameters, discussing test for autogenous dissipative heating
08 p1337 A69-20411

Thermoplastic resins as matrices for glass reinforcement and aerospace structural and nonstructural adhesives
09 p1530 A69-22311

Rubber modified thermoplastics structure and mechanical properties, emphasizing stress concentration around composite particles and crazing role in creep and fracture
10 p1716 A69-23911

Syntactic foam low density thermoplastic microspheres as hollow spherical filler in polyester matrix, noting applications
14 p2467 A69-29211

Linear pyrolysis of thermoplastics during combustion of composite solid propellants and ammonium perchlorate solid propellant deflagration mechanism studied by loose granule analog [WSCI PAPER 69-16]
16 p2831 A69-32311

Rigid PVC, urethanes and thermosets processing failures high performance, noting injection molding and machine developments role
18 p3148 A69-34611

Fire-retardant thermoplastic and thermosetting materials for electronics industry use including blending of fire-retardant additives into plastics
18 p3162 A69-35211

Thermoplastic polyarylsulfone thermal and electrical properties at over 500 F, noting resistance to thermooxidative attack
19 p3355 A69-35521

High temperature structural adhesives developed from thermoplastic aromatic-heterocyclic polymers
19 p3357 A69-35561

Rigid thermoplastic cylindrical shell creep under axisymmetrical loads, giving computer algorithm and time dependent criterion for rupture strength
22 p4045 A69-40751

THERMOPLASTICITY

Deformation of thermoplastics under tensile loading, discussing types of loading
10 p1716 A69-22941

Polyvinyl acetate and polyvinyl alcohol thermoplastic adhesives, discussing gluing properties, chemical properties, preparation, polymerization methods
14 p2469 A69-29341

Composition effect on tensile and flexural modulus of composites containing randomly distributed fibrous strands, establishing strength-composition relationships
17 p2991 A69-32961

Polycarbonate and polysulfone thermoplastic bonding of Al and Ti in aircraft structures, discussing peel strength and stress crazing tests
24 p4326 A69-43459

THERMORECEPTORS

Thermoregulatory responses to cooling in spinal man, discussing deep temperature sensitive structures and relationship between skin and central regulatory structures
22 p3873 A69-40209

Skin temperature change rate influence on sweating in male subjects, discussing role of central thermosensitive structures
22 p3874 A69-40210

THERMOREGULATION

Thermoregulatory reactions of human body to sharp increase of ambient radiant temperature
[AGARDOGRAPH-111] 08 p1264 A69-20670

X ray irradiated dogs subjected to heat stresses to determine thermoregulatory ability
09 p1445 A69-22548

Heat pipe devices applied to radiative body heat transfer in space suit temperature control
[AIAA PAPER 69-619] 17 p2914 A69-33293

Thermoregulatory responses to cooling in spinal man, discussing deep temperature sensitive structures and relationship between skin and central regulatory structures
22 p3873 A69-40209

Skin temperature change rate influence on sweating in male subjects, discussing role of central thermosensitive structures
22 p3874 A69-40210

Potent chemical factors released from anterior hypothalamus of rhesus monkeys in response to thermal stress during thermoregulation
23 p4084 A69-41472

Brown adipose tissue providing internal heating jacket and metabolic heater overlying systemic vasculature, noting cold survival role
23 p4091 A69-42013

Human thermal regulatory mechanism using analog simulation compared with experimental results of resting subjects responses to climatic chamber
23 p4111 A69-42079

Respiratory effects of body temperature changes separation from blood osmolality changes in dehydrated man
23 p4097 A69-42094

THERMOSETTING RESINS

NT EPOXY RESINS
NT PHENOLIC RESINS
NT POLYAMIDE RESINS

Electric components encapsulation by combining liquid resin techniques and transfer molding
04 p0607 A69-14955

Fire retardant thermally stable electrical grade thermoset resins tested for flexural and dielectric strength and weight loss
08 p1340 A69-20506

Thermosetting resin curing behavior characterized by differential thermal analysis performed above atmospheric pressure to prevent volatilization
09 p1500 A69-22311

Thermosetting adhesives properties and structural applications in aircraft, space and automotive use, discussing polymer systems, moisture, surface preparation, aging, etc
14 p2468 A69-29340

Nozzle throat ablative materials for controlled high regression rates in tactical rocket motors, primarily nylon reinforced thermosetting resins
[AIAA PAPER 69-423] 16 p2804 A69-32710

Injection holding for ceramic parts from nonplastic materials, presenting time-temperature schedules for low temperature removal of molding material without damage
17 p2978 A69-33376

Fire-retardant thermoplastic and thermosetting materials for electronics industry use including blending of fire-retardant additives into plastics
18 p3162 A69-35273

Elastomeric thermosetting one part silicone encapsulant environmental tests, checking physical and electrical properties stability under temperature and relative humidity conditions
19 p3281 A69-35549

THERMOSIPHONS

High turbine inlet temperature technology using thermosiphon cooling for gas turbine, possibly doubling specific horsepower of aircraft
[SAE PAPER 690034] 07 p1203 A69-18311

THERMOSPHERE

Lower thermosphere neutral composition diurnal variations, noting molecular N and O, Ar, He and atomic O
01 p0076 A69-11231

Lower thermosphere composition over New Mexico, discussing rocket flight mass spectrometer measurements during summer 1967
03 p0425 A69-14009

Atmospheric rotation speed dependence on specific heat, thermal conductivity, air absorption coefficient and lower boundary pressure, discussing diurnal variation of the thermosphere
[AFCRL-69-0363] 04 p0649 A69-15130

Long distance propagation of acoustic gravity waves ducted in thermosphere, noting effect of seasonal variations in polar region
04 p0595 A69-15437

Atmospheric density variation measurements by density gages on Explorer 32 satellite confirm wave propagation in neutral thermosphere as free internal gravity waves
05 p0754 A69-16261

Electron cooling rates in midlatitude and auroral zone thermosphere measured by probe rockets
05 p0755 A69-16267

Midlatitude neutral thermosphere density and temperature measurements, noting effect of atomic oxygen adsorption by instruments
05 p0755 A69-16268

Helium flux in lower thermosphere, using diffusion theory for multicomponent gas mixture to determine equation for equilibrium distribution
07 p1125 A69-18848

Quadrupole mass filter for rocket-borne measurements of thermospheric helium content, discussing turbopause level and winter helium bulge
09 p1489 A69-21712

Spin stabilized spherical satellite in high elliptical orbit for lower thermosphere measurements during entire solar cycle
09 p1610 A69-22009

Full wave calculation of gravity waves for thermospheric model, describing wave type reflection, transmission, conversion and coupling by scattering matrix elements
11 p1878 A69-25150

Thermosphere radiative cooling by atomic O 62 micron line, noting cooling and heating rates
12 p2064 A69-26009

Characteristic plane harmonic free internal neutral atmospheric wave oblique propagation through horizontally stratified quiet atmosphere for various thermospheric parameters
12 p2065 A69-26101

RF mass spectrometric measurements of diurnal variation of thermosphere and ionospheric E and F regions composition, noting oxygen concentration
15 p2601 A69-31371

Rocket and satellite measurements of density, temperature and composition in lower thermosphere, considering altitude dependence
15 p2602 A69-31383

Rocket ejected vapor trails structure in lower thermosphere showing no evidence of atmospheric turbulence
15 p2602 A69-31393

Atmospheric models for pressure variation and neutral air winds in thermosphere, discussing wind velocity vector relation to satellites orbital inclination
15 p2603 A69-31403

Exospheric temperature variations by Thomson scattering related to solar and geomagnetic activity, discussing seasonal effect on thermospheric variables
15 p2604 A69-31409

Gravity waves in thermospheric heating during magnetic storm, discussing electron density and temperature and ion velocity variations
15 p2605 A69-31435

Diurnal thermospheric density, temperature and wind variations due to direct solar EUV heat input and tidal wave from lower atmosphere
15 p2605 A69-31439

Thermosphere neutral wind speed measured from observing Doppler shift in O I 6300 night airglow line with Fabry-perot interferometer
16 p2776 A69-32093

Atmospheric density semiannual variation in thermosphere base, suggesting origin at lower heights in mesosphere or stratosphere
17 p2958 A69-32863

Composition and temperature of daytime and nighttime neutral tropic lower thermosphere, obtaining atomic and molecular oxygen ratios
18 p3128 A69-34936

Mesosphere and lower thermosphere molecular O density from solar radiation atmospheric absorption, using satellite measurements
20 p3523 A69-37413

Mass spectrometric investigation of thermosphere at high latitudes, measuring number densities for nitrogen, Ar and molecular and atomic oxygen
20 p3533 A69-38086

Thermosphere temperature shape parameters from probe flights, showing dependence on hour angle
20 p3534 A69-38088

Meteor winds analysis method used on tidal period wind measurement data obtained by chemical release from rocket in 95-135 km region
20 p3574 A69-38092

Explorer 32 atmospheric density measurements revealing neutral thermosphere latitudinal variations during geomagnetically undisturbed times
20 p3535 A69-38100

Lower thermosphere ion and neutral minor constituent concentrations in nighttime auroral zone, considering ionization due to electron precipitation and bremsstrahlung
21 p3704 A69-38365

Circulation near turbopause effect on lower thermosphere composition changes, noting heat source for warmth over winter polar region
21 p3704 A69-38366

Neutral components of arctic thermosphere measured with rocket-borne RF mass spectrometers, discussing origin of atomic hydrogen and water lines
21 p3704 A69-38367

Neutral particle density ratios in thermosphere by rocket-borne monopole mass spectrometers
21 p3704 A69-38368

Midlatitude thermosphere vertical air motions to balance divergence and convergence caused by large scale horizontal wind systems
21 p3714 A69-38553

Molecular O distribution in thermosphere from Ariel 3 observations of solar radiation attenuation, showing large and systematic variation with longitude
21 p3717 A69-39263

Heat conduction equation applied to thermospheric heating in auroral zone to account for local temperature and density variations, introducing horizontal transport mechanisms
22 p3941 A69-40717

Diurnal and solar cycle variations of thermosphere density and temperature generated by solar EUV input and tidal wave, using two dimensional model
24 p4367 A69-43003

Thermosphere dynamic response to low altitude geomagnetic disturbances, showing time lag dependence on perturbation intensity
24 p4310 A69-43180

THERMOSTABILITY

U THERMAL STABILITY

THERMOSTATS

Self thermostatic phase-change coatings for active and passive spacecraft temperature control, discussing temperature dependent changeability in solar absorptance
14 p2530 A69-29434

Thermostatic electronic control device of birefringent filter in Wroclaw Observatory coronagraph during prominence observations
22 p3943 A69-40000

THERMOTROPISM

U ANISOTROPY

U TEMPERATURE EFFECTS

THERMOVISCOELASTICITY

Plane wave propagation in infinite viscoelastic medium taking into account mutual effects of deformation and temperature fields
01 p0164 A69-10076

Thermoviscoelasticity equation solution for class of dynamic problems, giving problem solution for half space with arbitrary temperature field boundary condition
02 p0336 A69-11554

Thermal stress propagation in infinite viscoelastic thin plate analyzed with cylindrical coordinate system
08 p1415 A69-20661

Axisymmetric problems in thermoviscous plasticity, discussing stress-strain state of annular disks and thick walled cylinders made of rate sensitive materials
10 p1802 A69-24025

Stress wave propagation in thermoviscoelastic solids using extended Ritz method
11 p1993 A69-25527

Hollow circular viscoelastic cylinder axisymmetric plain strain problem, considering displacement, trac-

THETA PINCH

tion and mixed boundary conditions, noting applicability to rocket solid fuel core

12 p2181 A69-26396

Temperature, velocity and density perturbation propagation as heat convection wave in viscoelastic thermally compressible heat conducting fluid, analyzing damping and frequency spectra

16 p2878 A69-31952

Thermal effects on viscoelastic structure response to applied loads, using equations for thermomechanics, linear and nonlinear thermoviscoelasticity and nonisothermal creep theorem

19 p3440 A69-36657

Heat influx equation coupling in thermoviscoelasticity, considering internal forces dissipation and stress-strain operators

22 p4044 A69-40741

THETA PINCH

Plasma heating in two step theta pinch with coaxial coils yielding high temperature plasma at low capacitor storage charge

05 p0804 A69-16549

Theta pinch plasma electron density and temperature distributions measured using Thompson scattering of laser light and plasma bremsstrahlung

06 p0972 A69-18220

Spectral distribution and energy of luminous radiation emitted during theta pinch in Ar plasma, noting energy maximum as function of pressure

08 p1362 A69-20280

Monograph on interferometric studies of unsteady shock waves in theta pinch driven shock tube, discussing flow characteristics in helium and hydrogen

08 p1304 A69-20710

High temperature high density theta-pinch plasma refraction measurements by interference refractometer with beam perpendicular to plasma axis

09 p1544 A69-21302

Theta pinch plasma microwave emission from electrodeless inductive discharge at low pressures recorded at near plasma frequencies

09 p1549 A69-22017

Converging cylindrical shock waves produced by discharging condenser bank into single turn coil surrounding gas container /theta pinch discharge/

10 p1678 A69-22933

Toroidal theta pinched plasma column collapse, using snowplow model for study of column position shift and cross section deformation

11 p1924 A69-24303

Spectral broadening measurements of ruby laser light scattered by density fluctuations in theta pinch plasma

11 p1924 A69-24304

Toroidal plasma radial drift suppression on curved theta pinch axis through introduction of transverse conducting ring inside vacuum tube

11 p1925 A69-24313

Kink type instability of rotating linear theta pinch plasma, calculating perturbation behavior with bounce model

11 p1929 A69-25270

Slow theta pinch helium plasma measurements by Mach-Zender interferometer with Q switched laser

12 p2091 A69-26394

High speed streak cameras applicability to low density theta pinch studies, describing image converters design, operation and block diagrams

14 p2496 A69-29787

Time of flight mass spectrometers for plasmoids generated by theta pinch and discharge over organic glass, showing ion and electron currents oscillograms

14 p2498 A69-29813

High beta theta pinch stability against tearing modes, determining necessary magnetic field conditions for slab and cylindrical cases

16 p2819 A69-31681

Collisionless shock wave generation and structure in zeta and theta pinches

17 p3013 A69-33819

Energy dissipation in collisionless shock waves generated in plasmas with 1-500 trillion/cm electron density by theta pinch, measuring axial ionic energy spectrum

17 p3013 A69-33820

Ion energy distribution function and density profile in strong implosion wave generated by theta pinch discharge, investigating compression wave in deuterium

17 p3013 A69-33821

Collisionless plasma heating mechanisms from current layer turbulence in theta pinch experiment and shock wave front structure as function of initial magnetic field

17 p3013 A69-33824

Collisionless shock waves in plasma and ion and electron turbulent heating in high voltage theta pinches, noting magnetic disturbance

17 p3013 A69-33825

THIAMINE

Successive X ray doses effect on oxidative phosphorylation of vitamin B 1 in white rats liver tissue ultrastructure during and after irradiation, establishing thiamine biosynthesis suppression

21 p3658 A69-39056

THICK FILMS

Equipment for minimum cost laboratory for thin and thick film hybrid circuits

04 p0559 A69-15198

Operating and storage conditions effects on reliability of Pd-Ag thick film resistors

08 p1283 A69-20131

Thick film hybrid circuit technology and equipment reviewing conductors, resistors, and insulator inks

09 p1508 A69-22337

Adsorption of N, H, O and CO on thick vapor deposited Be films at room temperature

13 p2322 A69-28017

Hybrid microelectronic circuit failure mechanisms for thick and thin film resistors, conductors and capacitors, noting packaging contributions

22 p3910 A69-39954

Hybrid microwave IC assembly techniques, discussing active devices connection to substrate with thick or thin film metallizations

22 p3912 A69-40068

Hybrid techniques to produce thin and thick film microcircuits and logic system parameters

24 p4286 A69-42906

Materials problems in microelectronic circuits, discussing multilayer interconnection arrays production by thick film or print-and-fire process

24 p4333 A69-43212

THICK WALLS

Analytic model resembling thick walled ellipsoid of revolution incorporating three dimensional shape of human left ventricle and ventricular wall thickness effects

12 p2022 A69-26235

Torsional shearing stress in thick walled hollow rectangular cross sections

13 p2358 A69-27212

Vibrations of thick walled shallow circular cylinder with thickness change in time, applying dynamic elasticity and Volterra equations

14 p2533 A69-28985

Thick walled pressurized cylinder fatigue test results compared with axial tension and rotating beam tests on same material

15 p2709 A69-30676

Ultrasonic spectrometry application to thickness measurement of thin and thick walled articles

18 p3137 A69-35110

Stress-strain state of thick and thin walled closed shells of variable thickness during elastoplastic torsion developing in aircraft component production

21 p3835 A69-38882

THICKENED LEADING EDGES

U LEADING EDGES

THICKNESS

NT FILM THICKNESS

NT TARGET THICKNESS

Plate thickness effect on bending of elastic plate with crack, investigating stress distribution

04 p0678 A69-14890

Thickness and drilled holes effects on notch toughness of Charpy V notch bars over wide temperature range

10 p1798 A69-23087

Displaced layer thickness dependence on air injection parameters measured in wind tunnel

13 p2245 A69-27385

Numerical solutions of thick cambered jet flap in ground effect for flat plate and diamond shaped airfoil [AIAA PAPER 69-738]

18 p3083 A69-34404

Ultrasonic spectrometry application to thickness measurement of thin and thick walled articles

18 p3137 A69-35110

Nonmetallic materials thickness measurements at SHF, describing factors affecting geometrical-optics method

18 p3138 A69-35116

Nonlinear theory of elastic membranes accounting for thickness effects, obtaining field equations and constitutive relations for various cases

21 p3832 A69-38465

Optimum thickness of dynamically stable composite superconducting tapes determined for substrate thickness as function of current density

24 p4361 A69-43611

Laminar sublayer thickness in compressible turbulent boundary layers with and without heat transfer

24 p4306 A69-43061

THICKNESS RATIO

Sandwich beams interlaminar shear stress calculations, considering roles of moduli of elasticity and layers thickness relative to beam

22 p4041 A69-40401

Buckling of thick homogeneous rectangular plate subjected to constant normal stress, noting error in thin plate approximation

24 p4406 A69-43061

THIN AIRFOILS

Thin jet-flapped airfoil flow analysis in ground proximity at small angle of incidence, assuming inviscid compressible flow

09 p1431 A69-22271

Velocity, lifting force, pressure moment and circulation around linear array of thin foils with direction normal to profile chords calculated by Birnbaum-Glauert method

11 p1817 A69-24313

Imaging for flowfield of nonuniform parallel streamlines with thin airfoil represented by vorticity distribution, noting change of lift and moment

12 p2012 A69-26771

Equations of motion of compressible fluid with non-zero resistivity near thin foil, solving supersonic and subsonic flow by Fredholm integral equations

13 p2200 A69-28313

Compressible shear flow linear theory applied to transonic flow past thin airfoil, determining pressure distribution, discussing compressibility effects of nonuniform Mach number

16 p2731 A69-31571

Viscous electrically conducting fluid flow around thin profiles for equal Reynolds and magnetic Reynolds numbers, using Oseen method to linearize equations

18 p3124 A69-35213

Thin jet flapped airfoil analysis with wake fully developed from leading edge and jet flow reflected from ground

22 p3861 A69-41111

THIN BODIES

Thin deformable body motion in disturbed potential flow of ideal incompressible fluid

11 p1876 A69-25413

Three dimensional equations of elasticity reduced to two dimensional equations of shell theory, discussing stressed states of thin elastic bodies

14 p2531 A69-28811

Second order theory for steady or unsteady subsonic flow past slender lifting bodies of finite thickness [AIAA PAPER 68-75]

20 p3458 A69-37113

Optimal control of flight vehicle consisting of loss thin elastic body under torsional deformations, solving by method of successive approximations

21 p3760 A69-38813

Self consistent fields in waveguides containing thin conductors, expanding induced field into Fourier series in normal waves for series coefficients

23 p4123 A69-41911

THIN FILMS

NT ENERGY ABSORPTION FILMS

NT FERROMAGNETIC FILMS

NT MONOMOLECULAR FILMS

Dimensional effects on thermodynamic and kinetic properties of thin semiconductor and semimetal films, noting quantization influence

01 p0136 A69-10181

Digital loaded-line phase shift networks for microwave thin film applications, emphasizing design equations

01 p0040 A69-10191

Erosion damage of bearing alloy lining in the lubricating oil film, considering Cu-Pb alloy and base white metal

01 p0094 A69-10311

Quasi-static Kerr magneto-optic observation of procedure to predict results of dynamic flux reversal in thin Ni-Fe films [IEEE PAPER 11.7]

01 p0138 A69-10711

Soviet book on structure of thin metal films covering electron microscopic and electronographic studies, crystallization and heat treatment effects

01 p0140 A69-11111

Thin film transistors prepared from spray deposited cadmium sulfide, discussing carrier mobility and stability

02 p0214 A69-11511

- Injection laser emission from gallium arsenide base films grown epitaxially from gas phase in moist hydrogen atmosphere
02 p0255 A69-11879
- Reflection elimination for single dielectric film on solid laser material substrate, calculating reflectance as function of frequency
02 p0256 A69-11926
- Thin CuAs selenide films by vacuum deposition, electronographic study proves cubic sphalerite phase existence
02 p0298 A69-12045
- SnTe, SnSe and SnS epitaxial layers obtained by deposition of sublimates on cellulose-nitrite-varnish and single crystal NaCl and KBr substrates
02 p0298 A69-12049
- Integrated circuits technology, discussing thin film, monolithic compatible and hybrid circuit techniques
02 p0216 A69-12050
- Fuel films ignition behind shock waves in air and oxygen
02 p0353 A69-12317
- Microelectronic components joining technique by compliant bonding, utilizing deformable medium between tool and beam leads to eliminate intricate tool shapes and alignments
02 p0254 A69-12473
- Photoelectric effect of thin gold films on silver and quartz substrates, analyzing work function dependence on thickness of deposited metal
02 p0300 A69-12630
- Photoelectric effect of thin gold film under electric field, noting work function dependence on film thickness exhibits extremum
02 p0300 A69-12631
- Acoustic plasma waves propagation in thin films in case of film quantization, showing phase velocities close to Fermi velocities of electrons
02 p0300 A69-12649
- Dynamic current-voltage characteristics of thin film diodes on chalcogenide glass base
02 p0223 A69-12834
- Cathode sputtering and thermal evaporation in vacuum used for preparing thin dielectric coatings on mirrors of optical resonators containing nonlinear crystals
03 p0438 A69-13049
- Analysis and design of synchronous filter compatible with microelectronics requirements, switching N monolithic RC thin film devices to signal source of resistance
03 p0403 A69-13206
- Nondestructive measurement of thin transparent film thickness by interference method, noting diffusion profiles
03 p0430 A69-13634
- Thin film lubricant effect on machine dynamic performance, proposing inclusion with machine structure for reducing vibration effect
03 p0435 A69-13948
- Optical absorption of thin film cesium between 2300 and 11000 Å
03 p0491 A69-14060
- Optical absorption of vacuum deposited thin rubidium films, noting similarity to sodium and potassium
03 p0491 A69-14114
- Heat removal in multilayer superconducting devices, determining optimum number of layers
03 p0493 A69-14225
- Small transverse dimensions effect and domain formation criterion for surface oriented Gunn diodes prepared on thin epitaxial GaAs layers
04 p0639 A69-14335
- Laminar accelerating flow of thin film falling along vertical wall, emphasizing growth and decrease of boundary layer and film thickness
[ASME PAPER 68-APM/Z] 04 p0586 A69-14388
- Vacuum evaporated thin film components welding, using torsional ultrasonic vibrations for joint activation
04 p0605 A69-14561
- Thin film heated Pt resistance thermometer for skin friction or velocity measurements in air, water or blood
04 p0601 A69-15118
- Equipment for minimum cost laboratory for thin and thick film hybrid circuits
04 p0559 A69-15198
- Temperature distribution over receiving layer of absorption edge image transformer, discussing thermal conduction influence on performance of thin film IR image receiver
04 p0631 A69-15280
- Reading amplifier for thin magnetic film memory stores permitting tunnel diode register positioning
04 p0579 A69-15319
- Vacuum deposition of thin film microwave acoustic transducers of piezoelectric aluminum nitride
05 p0761 A69-15820
- Plane supersonic flows separated by thin film shaped jet, deriving pressure as function of deviation
05 p0746 A69-16020
- Five layer thin film band elimination filters amplitude and phase frequency characteristics
05 p0729 A69-16088
- Electrical polarization effect on electroluminescence brightness waves in zinc sulfide films
05 p0807 A69-16213
- Polarization effect on electroluminescent properties of zinc sulfide films
05 p0807 A69-16214
- Thin film thermocouple detector for molecular lasers operating in middle and far IR range
05 p0773 A69-16284
- Surface waveguide composed of inhomogeneous dielectric thin film used as low loss transmission line
05 p0731 A69-16294
- Cryogenic flexibility of thin polymeric film plies for use as spacecraft positive expulsion bladders
05 p0769 A69-16486
- Film processing effects on cryogenic mechanical properties of polyethylene terephthalate
05 p0785 A69-16490
- Zr-Nb alloy structure effect on critical superconductivity parameters determined, using electron microscopy of thin films
05 p0811 A69-16806
- Differential ion pumping for vacuum deposition of thin films
06 p0907 A69-17709
- Selective etching technique in study of dislocations in epitaxial layers of gallium arsenide
06 p0981 A69-17891
- Ferrite microstrips substrates role in integrated circuits, noting application of hybrid technology
07 p1090 A69-18399
- Doped silicon dioxide films as controlled reproducible diffusion sources for silicon devices fabrication
07 p1198 A69-18620
- Low speed four-ball lubricating oil testing machine eliminating thermal effects associated with frictional heating for load carrying capacities of thin lubricant films
07 p1140 A69-18968
- X ray fluorescence and electron microprobe for determining thin film thickness
07 p1113 A69-19582
- Optical parameters for system of isotropic nonabsorbing film on isotropic absorbing substrate determined by ellipsometric method, noting Si optical constants
07 p1201 A69-19648
- Fresnel formulas for surface plasma waves excitation by light in thin metal foil embedded between dielectric layers, discussing transmissive and absorptive resonances
08 p1372 A69-20290
- Thin films of niobium oxide vapor-deposited on silicon and quartz substrates, discussing optical and dielectric measurements, dispersion and absorption coefficient
[ECS PAPER 17] 08 p1372 A69-20365
- Flame emission spectrophotometric method for ultraminate sodium contamination detection in thin silicon oxide films and cleaned silicon surfaces
[ECS PAPER 306] 08 p1314 A69-20367
- GaAs laser employing external resonator with thin film active substance, noting output power and emission thresholds during electron beam excitation
08 p1326 A69-20543
- Holographic technique for measuring thin fluid film profiles using interference image reconstruction and helium-neon laser as coherent light source
08 p1317 A69-20873
- Vapor deposited tellurium thin films orientation, noting effect of characteristic spiral chain structure along c-axis
08 p1373 A69-20891
- Cubic β /silicon carbide films deposition by volatilization in presence of acetylene
09 p1554 A69-21350
- Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects
09 p1555 A69-21473
- Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps
09 p1555 A69-21478
- Electrical conductivity and Hall effect in thin evaporated bismuth films under vacuum using three point method in variable temperature cryostat
09 p1557 A69-21692
- Diffraction pattern recording technique and application to thin film measurements
09 p1499 A69-22303
- Capacitance methods for measuring adhesives mechanical properties in thin film bonded joints, noting results for tension, compression and shear loading
09 p1500 A69-22309
- Microsoldering techniques for thin and thick film hybrid circuits and microminiature printed circuit boards
09 p1510 A69-22349
- Laser evaporation vapors from refractory materials to produce surface temperature for carrying out reactions in gaseous phase and thin film preparation
09 p1519 A69-22476
- Combined electron microprobe and ellipsometric study of thin silicon dioxide films on silicon, noting reliability and accuracy
10 p1742 A69-22946
- FET memory element charge storage two layer model for thin film dielectrics noting charge/discharge times
10 p1742 A69-22947
- Electrical resistivity of epitaxial CdTe films produced by vacuum sublimation on hot orienting mica and single crystal substrates
10 p1742 A69-23001
- Lead sulfide single crystals and polycrystalline films growth studied by electron microscopy during vacuum deposition on NaCl and other substrates
10 p1743 A69-23002
- Optimum microcircuit analog to digital converter for aerospace environment by combining monolithic circuits and thin film resistors
10 p1636 A69-23282
- Three layer vacuum deposited silicon monoxide films current voltage and conduction current density temperature dependence
10 p1745 A69-23324
- Differential energy losses of fission fragments in thin carbon films as function of mass and initial energy mapped by time of flight method
10 p1694 A69-23348
- InAs thin film sensors using Hall effect to measure magnetic fields at cryogenic temperatures
10 p1696 A69-23717
- Light absorption of In and Ga thin films in various gaseous media, noting displacement of irregular absorption band
10 p1747 A69-23792
- Thin film thickness and composition determination through scattered electron and characteristic X ray radiation recording
10 p1747 A69-23847
- Voltage drop measurement across plasma anodized germanium film to determine anodization constant
10 p1742 A69-24004
- Electrodeposition of Te-containing Permalloy films with uniaxial magnetic anisotropy, noting electrolyte composition and film structure
11 p1935 A69-24332
- Thin polycrystalline film structure and formation, using electron beam instrument
11 p1936 A69-24601
- Semiconductor properties, applications and problems including thin films, superconductivity, etc
11 p1937 A69-24736
- Radiant power flow, transmittance and absorbance of absorbing thin film multilayer in terms of characteristic matrix and admittance of surrounding media
11 p1896 A69-24850
- Electron, proton and gamma ray radiation effects on thin film CdS, GaAs and CdTe solar cells
11 p1825 A69-24872
- Differential catalytic thin film heat gage for measuring surface temperature variations and ionized flow heat transfer, noting insulating boundary layer thickness
11 p2002 A69-25231
- Thin film lumped passive elements for microwave power amplifier integrated circuits, discussing distributed reactances, element size and fabrication, etc
11 p1856 A69-25654
- Thin liquid film equilibrium on rotating sphere, determining conditions for detachment as function of angular velocity
12 p2061 A69-25886
- Thin foil preparation technique for transmission electron microscopy and selected etch pitting technique for CoO single crystals
12 p2112 A69-25944

Inertia effect on incompressible fluid film pressure between two oscillating parallel plates, considering Reynolds number

12 p2102 A69-26241

Scale effect on gold films electrical conductivity, analyzing film thickness and electron parameters of mean free path, concentration and surface reflection

12 p2143 A69-26459

Gases effect on electrical conductivity of vacuum deposited thin films of Cr, Be, Ni, Au and Ge at different thickness and low pressure

12 p2143 A69-26460

Semiconductor thin films analysis using mass spectrometer with spark source

13 p2316 A69-27293

Thin film cermet resistors for integrated circuits produced by thermal vapor deposition in vacuum, cathodic sputtering and explosive vapor deposition

13 p2268 A69-27466

Photoelectric characteristics of thin film CdS-CdTe heterojunction diodes, considering I-V illuminance, spectral characteristics and conduction band continuity

13 p2230 A69-27882

Temperature effects on photosensitivity spectra of cadmium telluride thin films

13 p2318 A69-27889

Transverse quantum thermogalvanomagnetic phenomena in thin semiconducting films, noting effects of inelastic electron scattering at acoustic lattice vibrations

13 p2318 A69-27890

Vacuum and thin film - Conference, Pittsburgh, October-November 1968

13 p2298 A69-28003

Dielectric thin film electrical and mechanical properties and preparation for semiconductor devices, emphasizing Si compounds

13 p2286 A69-28004

Transition metal interstitial compounds thin film preparation and superconducting properties, emphasizing high critical temperature, rock salt structure and NbN base

13 p2321 A69-28009

Low resistance Bi thin film complex electrical impedance in IR range, stating methods and equivalent circuits for determining impedance

13 p2322 A69-28011

Prebreakdown and breakdown electrical properties of thin film capacitors with certain oxides, fluorides and Teflon dielectrics

13 p2322 A69-28012

Energetics in solid film lubricants vacuum deposition methods, showing dependence on interfacial and film characteristics

14 p2454 A69-29001

Oxygen K-shell X ray production cross section and stopping power of aluminum oxide thin films for 20-100 kev protons

14 p2489 A69-29994

Josephson current density distribution in thin film superconductors, determining relation between tunneling density and magnetic field for films with/without current

15 p2667 A69-30196

CdS films vacuum deposited on optically polished single crystals used for converting microwave radio signals into hypersonic waves

15 p2575 A69-30236

Thin film thickness determined by weighing film and substrate in liquid having same density as substrate material

15 p2607 A69-30239

Solid lubricant films friction and wear life determined under various conditions of contact, temperature, load and atmosphere [ASLE PREPRINT 69AM 6C-1]

15 p2619 A69-30471

Thermal EMF in epitaxial films, analyzing potential distribution in p-n junction with temperature gradients and film thickness effects

15 p2669 A69-30718

Zone structure of silicon-silicon dioxide system for silica films obtained by pyrolytic dissociation, discussing kinetics of photoelectrons capture at traps

15 p2669 A69-30723

Microelectronic technology for mass production of high reliability hybrid thin film circuits

15 p2628 A69-30845

Thin film tantalum nitride resistors technology and production, evaluating projected reliability of resistance circuits as function of operating and environmental conditions

15 p2628 A69-30846

Lubrication and lubrication systems literature including compressible and incompressible fluid films, automotive, bearing, gear, friction, wear and boundary lubrication, seals and sealing systems

15 p2628 A69-30900

Gas laser cutting of thin carbon films on thick pyrex glass and ceramic substrates

15 p2635 A69-31037

Thin film carbon resistors cutting with carbon dioxide gas laser, considering cylindrical bodies and aging properties

15 p2635 A69-31038

Cadmium sulfides thin film solar cells for supplying power to instrumentation and data telemetry on longer lived balloons

15 p2553 A69-31287

High voltage thin film transistor, discussing design criteria, fabrication, I-V characteristics and switching speed

16 p2757 A69-31614

Superconductive tunneling measurements on thin Al films, discussing enhanced transition temperatures, energy gap dependence on temperature, electron microscope observation of crystallites, etc

16 p2825 A69-31634

High energy electrons emission during alloy evaporation on hot metal filaments used for thin film deposition

16 p2827 A69-32016

Prebreakdown and breakdown electrical properties and light emission during destructive breakdown in thin film capacitors

16 p2761 A69-32323

Numerical method based on thin film optics to determine ionospheric electromagnetic transmission and reflection coefficients for vertical incidence

16 p2752 A69-32392

Thin film optical method generalization accounting for intermode coupling and oblique incidence in plane stratified magnetoionic medium applied to ionospheric LF and hydromagnetic propagation

16 p2753 A69-32393

Thin film metallic oxide catalysts for oxidation in low temperature cells using hydrogen and hydrocarbons and for oxygen reduction in acid electrolyte

16 p2738 A69-32408

Electromigration role in material accumulation and depletion forming regions in Au film conductors, discussing regions origin from and correlation with thermal gradients along conductor

17 p2936 A69-32896

Thin surface films effect on radiative properties of metal surfaces determined by thin film optics, noting dependence on refractive index [AIAA PAPER 69-623]

17 p3072 A69-33283

Single frequency lasers using thin metal film mode selection filters, discussing film properties and experiments with Ar ion and Nd-YAG lasers

17 p2982 A69-33399

Slow electromagnetic wave propagation in superconducting thin film transmission lines, noting phase velocity dependence on film thickness and spacing

17 p2938 A69-33785

NbN thin film production by refined reactive sputtering technique, discussing Pauli spin paramagnetism and spin orbit scattering in high field superconductivity

17 p3016 A69-33790

InSb thin films prepared by flash evaporation, discussing Hall measurements at various temperatures and electron mobility dependence on film thickness

18 p3182 A69-34348

Optimum ballast resistance of thin film heat transfer gage producing shock arrival time, thickness and structure data of low pressure shock tube

18 p3117 A69-34470

Book on thin film phenomena associated with structural, mechanical, electrical, superconducting, magnetic and optical behavior

18 p3182 A69-34929

Thin silicon solar cells environmental tests, evaluating temperature and humidity effects on various contacts and coatings

19 p3252 A69-35699

Integrated thin film solar cell array consisting of CdS cells deposited on Kapton single sheets connected in series and covered by Mylar single sheet

19 p3254 A69-35710

Acoustic surface waves on thin film for pulse compression radar dispersive delay line, describing delay characteristic synthesis and control

19 p3267 A69-35929

Electroabsorption oscillations in CdTe films compared with results of interband transitions theory

19 p3386 A69-36523

Optical and electrical properties of thin amorphous films of glass-forming oxide, using X ray diffraction and electron microscopy for structural features

19 p3391 A69-36555

Fabry-Perot interferometer with Al coating reflecting surface deposited on unbaked thin films

20 p3536 A69-36556

Thin PbTe semiconductor films electrical properties measured in air and vacuum, showing dependence on thickness and conditions of preparation

21 p3782 A69-39298

Transformer for unilateral energy transfer using single domain uniaxial Permalloy film

21 p3684 A69-39299

Metal-polymer-metal and metal-polymer-silicon thin film structures analysis for polymers bulk properties and insulator-silicon interface, noting dipole-like relaxation

21 p3782 A69-39444

Spectral dependence of optical absorption in InAs thin films under conditions of quantum dimensional defect, considering allowance for nonparabolic conduction zone

21 p3783 A69-39555

Gupta stability solution extended to liquid anisotropic viscoelastic films, analyzing surface and shear wave perturbations in material structures

22 p3929 A69-39888

Hybrid microelectronic circuit failure mechanisms for thick and thin film resistors, conductors and capacitors, noting packaging contributions

22 p3910 A69-39959

Failure analysis of corrosion products in hybrid thin film circuits, discussing detection technique, instrumentation and results

22 p3911 A69-39992

Cations desorption from O, H and N films adsorbed at graphite surface under electron bombardment, studying desorption cross sections discrepancies

22 p3972 A69-39995

Hybrid microwave IC assembly techniques discussing active devices connection to substrate with thick or thin film metallizations

22 p3912 A69-40006

He-Ne laser system for micromachining thin film photolithographic masks, describing computer controlled coordinate table and product quality

22 p3954 A69-40223

Film thickness and normal load effect in thin film solid friction, noting dependence on deformation and contact

22 p3955 A69-40400

Thin film thermistors heat-separated from graphite substrate to achieve positive temperature resistance coefficient via argon heating and oxygen cooling

22 p3997 A69-41211

Thin film temperature sensor material, response time, substrate material and flight instrumentation for rocket-borne application

22 p3950 A69-41222

Frequency response of thin film thermal detectors discussing steady state harmonic response proportionality to film thickness and thermal conductivity

23 p4163 A69-41544

Hybrid techniques to produce thin and thick film microcircuits and logic system parameters

24 p4286 A69-42900

Thin film field effect transistors and integrated microcircuits, investigating active and passive element fabrication

24 p4419 A69-42900

InTe phase recrystallization in thin films composed of two InTe phase mixtures, showing random concentrations and distribution of centers growing as spherulites

24 p4361 A69-42999

InTe phase formation in thin film composed of two InTe phases, showing dependence on annealing in high vacuum and substrate temperature

24 p4361 A69-42999

Component proportion and diffraction spectrum of macroblock thin films of indium telluride phase of InTe system, using X ray and microanalysis

24 p4361 A69-42999

Solid film lubricants deposited by DC triode sputtering on Ni, Ni-Cr and Nb surfaces friction tested under ultrahigh vacuum conditions

24 p4321 A69-43122

Thin film formation, deposition methods and relation to film structure and properties

24 p4361 A69-43334

Dielectric and semiconductor films vacuum deposition by CW carbon dioxide laser, discussing optical properties

24 p4329 A69-43755

THIN LAYER CHROMATOGRAPHY

- Gas chromatography used to determine residual solid propellant stabilizers content and nitro derivatives, including thin film chromatography 02 p0303 A69-11528
- Gas-liquid and thin layer chromatography and nuclear magnetic resonance techniques to steric analysis of diketopiperazines 07 p1075 A69-19498
- Gel permeation chromatography to measure rate of adhesive aging and curing in one shot epoxy tapes, noting handling techniques and space applications 24 p4338 A69-43463

THIN PLATES

- Generalized plane stress concept extended for mathematical model to study out of plane displacement restraint in thin plates 01 p0165 A69-10114
- Approximate solution for Dirichlet problem for linear Karman differential equation used in thin plate deflections obtained by Bubnov-Galerkin method 01 p0105 A69-10700
- Asymptotic integration of three dimensional elasticity equations for thin anisotropic shells and plates, deriving variability exponent of stress under given load 01 p0170 A69-10878
- Existence of smooth solution for system of equations describing nonlinear oscillations of thin plate and shallow shell 02 p0337 A69-11654
- Generalized unsteady temperature fields and stresses in crystalline plates using Fourier and Laplace transforms 02 p0340 A69-12044
- Rms approximation validity limits for satellite temperature variances by deriving equations for thin insulated plate in space 02 p0352 A69-12211
- Stresses around two reinforced circular openings in thin elastic plate of isotropic material under biaxial loads 02 p0349 A69-12799
- Elastic stability equations solved in geometrical linearization for thin anisotropic plates under transverse shear, using variational method 03 p0525 A69-13130
- Thermal stress determination in two dimensional problem of theory of elasticity, using stress simulation by thin plate bending 04 p0668 A69-14272
- Thin cantilevered plate theory extended to large in-extensional deflections to account for geometry changes in bending moments [ASME PAPER 68-APM/BB] 04 p0670 A69-14401
- Large finite deflections of clamped thin elastic circular plate subject to transverse concentrated load at center solved by power series 04 p0675 A69-14596
- Creep stress concentration at circular hole in thin sheets under loads in own plane, discussing infinite thin plates [AIAA PAPER 68-175] 04 p0676 A69-14708
- Natural frequencies controllability by induced thermal membrane stresses examined for thin disk 04 p0682 A69-15494
- Laminar flow of stably stratified fluid with uniform upstream velocity and density gradient past thin flat plate, discussing upstream wake and boundary layer 05 p0745 A69-15724
- Stiffness matrices for buckling or vibration analysis of long thin flat plate structures connected at longitudinal edges 05 p0836 A69-16029
- Stress distribution in infinite strip with equally spaced identical semicircular notches on one edge and subject to transverse bending 05 p0842 A69-16643
- Vibration response of thin elastic plates to random loads 05 p0844 A69-16741
- Electron microscopy of titanium alloys noting preparation, heat treatment of samples, crystallographic structure, etc 05 p0782 A69-16807
- Plastic deformation and bursting pressure of thin rupture disk as related to tensile strength 06 p1020 A69-17129
- Deformation and stresses in biaxially loaded stretched thin plate with central small hole during stress redistribution caused by creep 06 p1022 A69-17368
- Couple stresses effect on thin plate stress distribution due to pressure of rivet on one side of circular hole 08 p1319 A69-20201

- Supersonic flutter of circular cylindrical heterogeneous orthotropic thin panels of finite length, obtaining nonlinear flutter equation 08 p1413 A69-20404
- Thermal stress propagation in infinite viscoelastic thin plate analyzed with cylindrical coordinate system 08 p1415 A69-20661
- Dynamic stability of thin flat plates and applications in ship and aircraft deck construction, studying dynamic buckling for rectangular plate 08 p1415 A69-20665
- Forced vibration of thin elastic plate resting on elastic foundation and subjected to time dependent loads and external damping 08 p1416 A69-20692
- Thin semiconductor plates negative differential resistance associated with captures at surface, describing electron gas by electron temperature 08 p1374 A69-21081
- Temperature distribution for thin plate heated by source of arbitrary motion and strength and governed by Sturm-Liouville boundary conditions 09 p1622 A69-21906
- Complex variable theory solution of eigenvalue problem governing elastic stability of thin elastic plate subjected to hydrostatic in-plane compression 09 p1615 A69-21921
- Finite element analysis of large deflections in thin elastic plates subjected to transverse loading, including nonlinear geometric effects 09 p1615 A69-21924
- Eddy current nondestructive tests of nonmagnetic thin metallic sheets and plates from single surface 10 p1698 A69-23046
- Aluminum alloy thin sheets with central transverse fatigue cracks subjected to increasing static loads to fracture, investigating crack tip deformation 10 p1709 A69-23056
- Fatigue crack propagation and crack tip stresses measurements in tensioned cracked panels subjected to acoustic loading 10 p1797 A69-23078
- Excitation of ultrathin Cd/SeS/ platelets with mode locked He-Ne laser for excitons formation, discussing time delay 10 p1703 A69-23512
- Very low temperature dependence of thin single crystal Al plates electrical resistance, noting Umklapp processes contribution 10 p1711 A69-23620
- Two dimensional problems solutions by contour smoothing methods, considering stress concentrations in reinforced or perforated thin elastic plates 11 p1973 A69-24661
- Stress concentrations in bending of thin perforated plates, considering potential and vortex stresses due to edge effect 11 p1976 A69-24784
- Book on statics and dynamics of anisotropic and heterogeneous elastic structures covering thin heterogeneous anisotropic panels, elastic and sandwich plates, etc 11 p1986 A69-25236
- Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates 11 p1990 A69-25507
- Transverse symmetrical vibrations of thin elastic plates under Jacobi pressure distribution, giving displacement and velocity plots 12 p2180 A69-26271
- Heat transfer and temperature distribution in thin fins with stochastic root temperature due to excitation by stochastic and Markov processes [ASME PAPER 68-HT-35] 13 p2374 A69-27780
- Hypervelocity impact of spheres on thin targets studied with numerical solutions utilizing STEEP code two dimensional technique based on hydrodynamic elastoplastic model [AIAA PAPER 69-357] 13 p2366 A69-28290
- Thin elastic plates buckling under small normal load and external edge force 14 p2531 A69-28810
- Plastic strains at crack tips in thin plate under concentrated forces, analyzing slip bands during initial deformation 15 p2708 A69-30659
- Griffith crack in thin plate opened by uniform tension at infinity, discussing effect of ties on stress intensity factor 15 p2710 A69-30809
- Variational principles and differential equations of thin elastic panels mechanics for aerospace structures 15 p2712 A69-30974

- Extensional vibration of thin inhomogeneous circular plate with variable modulus of elasticity and central hole, calculating periods of vibration 15 p2713 A69-31026
- Unsteady oscillations after rupture in thin homogeneous isotropic elastic plate, assuming deflection amplitude smaller than thickness 16 p2873 A69-32033
- Load carrying capacity of thin steel plates fatigued by cyclic shear buckling 17 p3052 A69-32980
- Linear heat flux in thin composite plate with internal point source, assuming no heat transfer at surface and neglectable temperature changes 17 p3068 A69-33126
- Fatigue crack propagation in thin aluminum alloy plates under plane bending using microscopic surface observation and electron fractography, noting role of aging conditions 17 p3061 A69-33677
- Error estimation in thin elastic plate bending problem approximate solution by equal deflection lines method, constructing two sided bound for boundary value problems 17 p3062 A69-33713
- Axisymmetric bending oscillations of thin circular plates of constant thickness with allowance for energy dissipation in material, analyzing resonance and phase amplitude characteristics 17 p3064 A69-33919
- Laminated anisotropic plate equations from thin plate theory including nonlinear terms, inertia and thermal stresses [ASME PAPER 69-APM-15] 18 p3213 A69-34390
- Equations of motion for plate vibration derived by complementary variational principle, including boundary conditions and thin plate transverse vibrations 18 p3218 A69-34626
- Standing twin vortices in wake behind thin flat plate normal to flow visualized by Al dust, noting Karman vortex street 18 p3086 A69-35167
- Transverse vibrations of thin linear viscoelastic rectangular plate of constant thickness resting on elastic medium 18 p3223 A69-35171
- Safety disk strength under static lateral pressure from rupture studies of thin circular plates under static and pulsating lateral pressure 19 p3434 A69-35773
- Engineering equations for elastic thin plate oscillations of materials with properties described by linear integral Volterra-Boltzmann operators 19 p3437 A69-35989
- Residual deformation of elastoplastically bent thin circular plate after perfect unloading from large deflection, considering equilibrium and compatibility conditions 19 p3438 A69-36306
- Natural frequencies of thin oblique angled isotropic plates, discussing closed form solution to differential equations 19 p3438 A69-36312
- Swept cantilever thin elastic plates bending analyzed by power series representing deflection in oblique coordinate system 20 p3621 A69-37207
- Buckling of eccentrically stiffened thin circular elastic plate under circumferential uniform compression, obtaining equations and critical loads 20 p3622 A69-37221
- Stress and displacement in thin circular plates of ductile materials under axisymmetric loading predicted by nonlinear analysis 20 p3628 A69-37787
- Soviet book on thin plates and shells bending and stability during creep covering analytical and numerical solutions for various structural elements 20 p3630 A69-38207
- Stress-strain state in thin isotropic plate with circular hole under lateral bending and torsional moments 21 p3835 A69-38725
- Elastoplastic analysis of thin plates deformation, discussing loading conditions effects 22 p4041 A69-40064
- Natural frequency of thin plate subject to cylindrical bending, analyzing panel flutter by three mode approximation for large buckling deflection 22 p4045 A69-40821
- Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges 22 p4046 A69-41061

Boundary layer separation and free mixing phenomena between streams behind thin flat plate by finite difference methods and Prandtl exchange coefficient

23 p4060 A69-41912

Network method for stability of thin nonlinearly elastic compressible material plates, noting difference operators for rigidly clamped plates

23 p4230 A69-42003

Stressed state of thin plate with circular hole under normal and breaking force applied over hole perimeter

23 p4233 A69-42341

Aeroelastic stability of thin plates exposed to supersonic flow using singular perturbation methods, obtaining flutter boundary and membrane solution

24 p4403 A69-43573

Wake development from turbulent boundary layers on both sides of thin flat plate

24 p4249 A69-43694

THIN WALLED SHELLS

Thin cylindrical shell deformation and stress under concentrated radial loading, analyzing singularity at load point

01 p0166 A69-10301

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution

01 p0168 A69-10380

Sheba family of shell elements for matrix displacement method applied to problems of thin shells under membrane and bending action

01 p0170 A69-10865

Boundary value problems in thin shallow shells of arbitrary planform analyzed by partial differential equations

01 p0171 A69-11071

Predeformations of thin walled elastic isotropic spherical shells analyzed using Vlasov shell bending theory

02 p0336 A69-11555

Torsion of variable cross sectional thin walled bars using shell theory equations

02 p0337 A69-11559

Existence and uniqueness of weak solutions in linear theory of stable equilibrium position for inhomogeneous elastic thin walled shells

02 p0340 A69-12036

Soviet book on vibrations of elastic shell partly filled with fluid covering different stages in procedure for shells of axisymmetric configuration

02 p0346 A69-12480

Recent advances in shell buckling, discussing imperfection sensitivity, boundary conditions and wall configuration

[AIAA PAPER 68-103] 02 p0347 A69-12516

Finite difference numerical integration technique for large elastoplastic deformation transient and permanent deflection responses of thin shells

02 p0347 A69-12518

Helicoidally symmetrical stress in cylindrical thin shells

03 p0529 A69-14056

Initial deviations or imperfections effects on load capacity of infinite and finite length thin circular cylindrical shells under axial compression

[ASME PAPER 68-WA/APM-22] 04 p0669 A69-14398

Elastic-plastic thin walled cylindrical shell axisymmetric behavior under radial pressure difference, noting load for collapse

[ASME PAPER 68-APM/AA] 04 p0670 A69-14404

Elastic noncircular orthotropic conical shell stress-strain state, obtaining differential equations reducible to integrodifferential equations solvable by iteration

04 p0673 A69-14494

Thin shells deformations described by finite element model accounting for transverse shear deformations

04 p0674 A69-14588

Shallow shell deformations based on nonlinear equations solved by Newton-Raphson iteration

04 p0674 A69-14591

Temperature distributions, thermal stresses and natural frequencies of radial vibrations in thin circular cylindrical shells

04 p0675 A69-14704

Nonlinear boundary value problem of elastokinetics solved by step-by-step integration to study thin walled shells stability under axial impact

[DVL-853] 04 p0677 A69-14836

Postbuckling equilibrium calculation for pressure loaded thin walled cylinders of finite length, using Donnell nonlinear shell theory

04 p0677 A69-14837

Reinforced thin walled cylindrical pressure body nonlinear circumferential stress problem approximate solution, noting fatigue strength of aircraft pressurized cabins

04 p0548 A69-14838

Variational theorems for stress function formulation of boundary value problems in linear theory of thin elastic shells

04 p0678 A69-14894

Reissner nonlinear equations for nonshallow symmetrically loaded shells of revolution

04 p0684 A69-15538

Axial buckling load for thin walled circular cylindrical shell, noting design of internal mandrel for control of boundary expansion conditions

05 p0831 A69-15581

Stress-strain state of thin elliptical shell of revolution under rapidly varying cyclic edge loads

05 p0832 A69-15686

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse reinforcement ribs, initial defects and under large strains

05 p0832 A69-15691

Elastic stability of thin circular cylindrical shell with elastic core, longitudinal and transverse ribs and initial defects under combined pressure and thermal stress

05 p0832 A69-15692

Approximate expressions for displacement state of orthotropically reinforced conical thin walled shell, finding stiffness matrix by numerical integration

05 p0835 A69-15829

Ductile creep rupture of thin walled membrane shell of revolution subjected to time dependent internal pressure and strain hardening

[ASME PAPER 68-WA/MET-15] 05 p0838 A69-16153

Circumferential buckling of ellipsoid of revolution due to internal pressure, assuming linear deflection and uniform thin shell

[ASME PAPER 68-WA/PVP-12] 05 p0840 A69-16190

Stability of thin cylindrical shells of medium length with one or both ends rigidly clamped

05 p0840 A69-16199

Resonant frequencies for beam type bending oscillations of thin walled rib-reinforced circular cylindrical shell freely supported at outermost ribs

05 p0841 A69-16204

Elastoplastic stress-strain state of asymmetric profile thin walled beam under mobile load

05 p0841 A69-16205

Dynamics of carrier rockets and space vehicles having complex three dimensional thin walled constructions with cavities containing liquids

[UN PAPER 68-95622] 06 p1013 A69-17051

Calculation of thin shell or beam structures with plasticity and isothermal creep based on linearization and local kinematic behavior

[ONERA-TP-667] 06 p1020 A69-17099

Free vibration of thin laminated orthotropic cylindrical shells

06 p1020 A69-17145

Radial vibrations of thin cylindrical shells subjected to thermal loadings, discussing temperature distributions, thermal stresses and natural frequencies

[AIAA PAPER 69-59] 06 p1028 A69-18143

Geometrically exact finite element for thin shells of revolution, using approximation to predict boundary layer stress distribution during vibration

[AIAA PAPER 69-56] 06 p1029 A69-18193

Thin rods and shells elastic analysis, using Cosserat continua for representing bodies in kinematics and balance and constitutive equations

07 p1234 A69-19382

Gravitational field in static spherical shell of matter in vacuum, deducing exact junction conditions for thin shell

07 p1182 A69-19453

Local stability of thin walled elastic shells of revolution subjected to external pressure

07 p1237 A69-19686

Boundary conditions for reflection and transmission properties of absorbing shell of arbitrary shape

08 p1273 A69-20025

Stability of finitely deformed thin cylindrical shell of rubberlike material, showing bending resistance and thickness effects

08 p1413 A69-20414

Fragmentation behavior of small thin walled metal cylinders during explosions as function of expansion velocity and material parameters

09 p1611 A69-21352

Free vibration frequencies and mode shapes for thin orthotropic oblate spheroidal shells, noting isotropic oblate spheroidal shell and isotropic spherical shell

09 p1613 A69-21719

Surrounding fluid effects on free axisymmetric vibrations of thin elastic spherical shells, studying rotational motions in compressible and incompressible ideal fluids

09 p1613 A69-21717

Elastoplastic response of intersecting hemispherical/cylindrical shell structures compared with plastic deformation predictions

09 p1615 A69-21917

Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells with exact solutions from Flugge shell equation

[AIAA PAPER 69-447] 09 p1616 A69-21918

Finite elastic deformations under transverse incompressive loading of clamped thin rectangular planform shells idealized as membranes, using incremental plasticity theory

09 p1616 A69-21919

Buckling of eccentrically stiffened thin circular cylindrical shell under uniform combined axial compression and torsion loads with lateral pressure

09 p1616 A69-21919

Buckling capabilities of inflation rigidized wire film and shell film cylinders in axial compression and bending

09 p1617 A69-21919

Large uniform torsion of thin walled open section circular cross section, deriving tube radius contraction observed in experiments

10 p1794 A69-22939

Flow instability of incompressible nonconducting fluid in thin cylindrical conducting elastic pipe in constant uniform magnetic field

10 p1798 A69-23099

Proton flux density at axial point of thin cylindrical and slab shell shields bombarded by isotropic inverse power law spectrum of protons in space

10 p1723 A69-23160

Book on statics of thin walled shells of revolution covering stress-strain analysis for geometrical shapes

10 p1800 A69-23194

Biaxial stress effect on creep properties of thin walled tubes of polymethyl methacrylate at controlled temperature and humidity

10 p1717 A69-24211

Stress concentration during deformations in thin shallow shells, using conformal mapping and difference method

11 p1971 A69-24644

Stress distribution around holes in thin shells and plates during large elastic displacements, considering hole size, loading and shallow spherical shells

11 p1972 A69-24655

Stress concentration at holes and cavities in thin elastic shells under static and dynamic loads, considering physical nonlinearities of material

11 p1974 A69-24666

Temperature field in thin walled rods with spiral cross section in solar radiation, considering radiative heat exchange

11 p1999 A69-24777

Theory of thin shells - Conference, Copenhagen September 1967

11 p1977 A69-24800

Thin elastic shell interior equations based on stress and strain, discussing shell description, strain derivatives plate deformation into cylindrical shells, etc

11 p1977 A69-24800

Thin elastic shell theory, using iterative process to develop differential equation integrals for interior state of stress

11 p1977 A69-24800

Nonlinear theories of deformable surfaces as two dimensional generalized continua applied to elastic shells, emphasizing elastic Cosserat surface

11 p1978 A69-24800

Thin plastic shell theory based on statical and geometrical relations for shallow and circular cylindrical shells

11 p1978 A69-24800

Shell theory foundations and basic equations discussing classical shell equations asymptotic nature and errors

11 p1978 A69-24800

Continuum theory for thin elastic shells with local structural effects, emphasizing shell constituted by Cosserat material

11 p1978 A69-24800

Asymptotic methods for three dimensional equations in thin and thick elastic shell theory for determining two dimensional systems

11 p1978 A69-24800

Linear thin shell theory in complex dependent variable form for determining fourth order partial differential equations

11 p1978 A69-24800

ferential equations, considering elastic shells with edge loads

11 p1978 A69-24811

Finite deformation equations for flat annular membranes deduced from equations for thin shells of revolution, discussing displacement equations and fixed edge forces

11 p1979 A69-24813

Postbuckling behavior and subsequent imperfection sensitivity of thin walled cylinders subjected to torsion, considering perturbation

11 p1979 A69-24814

Thin walled circular cylinders postbuckling behavior and stability under axial compression calculated for design loads

11 p1979 A69-24816

Semiinfinite circular cylindrical shell buckling under axial load, computing forces, moments and displacements by thin shell equation

11 p1979 A69-24818

Deformation processes of geometrically nonlinear rotational membrane shells under internal pressure

11 p1980 A69-24821

Thin conical elastic shell stress-strain state calculated by computer for arbitrary thicknesses and loading conditions, considering temperature and edge forces effects

11 p1981 A69-24943

Thin elastic conical shells asymmetric deformation under stresses and strains, deriving asymptotic solution

11 p1983 A69-25090

Heat generation in thin viscoelastic cylindrical shell with relaxation and resonance dispersion during torsional vibration

11 p2000 A69-25168

Maximum stress under bending for thin walled circular cylindrical shell stiffened with uniform stringers

11 p1987 A69-25380

Axisymmetric vibration modal properties /frequencies and mode shapes/ of thin conical shell frustrums, considering dimensional and boundary condition influences

11 p1992 A69-25519

Bending and membrane stresses determination in shallow thin shells of revolution under large axisymmetric deflections, using normal and radial displacements relationship [SESA PAPER 1332]

11 p1995 A69-25651

Stochastic problems in thin elastic shell theory solved by equations obtained by linearizing shell equations near initial state of stress

11 p1996 A69-25732

Nonstiffness of nonshallow spherical dome using asymptotic method, applying nonlinear Reissner equations to finite symmetric deformation of thin shells of revolution

11 p1996 A69-25733

Composite shell carrying capacity under general load, studying closing shape between laminate layers, transverse contraction, supporting layers thicknesses ratio, etc

12 p2176 A69-25851

Quasi-shallow shells theory applicability to thin elastic shallow shells, emphasizing use of function W/ρ

12 p2178 A69-26001

Dynamic programming method for upper bound on collapse load of rotationally symmetric thin cylindrical shell under ring loading

12 p2179 A69-26214

Postcritical deformations of thin conical elastic shells hinged along edges under external pressure using Pogorelov method for cylindrical shells

12 p2181 A69-26609

Axisymmetric deformation of thin orthotropic laminar spherical shells under internal loads calculated on computer using Legendre polynomials

12 p2181 A69-26611

Galerkin method for solving dimensionless Reissner equation for symmetrically loaded thin nonshallow shells of revolution

12 p2182 A69-26679

Natural frequencies of ring-stiffened thin walled cylindrical shell determined by partial differential equations of motion, allowing for eccentricity

12 p2184 A69-26810

Thin cylindrical shell vibration with three supports analyzed by minimizing Lagrangian of vibration, obtaining frequencies and modes

13 p2359 A69-27257

Membrane and bending stresses around elliptic hole in thin circular cylindrical shell, considering axial tension

13 p2362 A69-28123

[NAL-TN-13]

Thin walled maraging steel tube toughness determined by Charpy precrack testing of transverse and longitudinal impact properties

13 p2269 A69-28183

Stress concentration around holes in thin shells, including analysis of stress-strain state in cylindrical and spherical shells

14 p2532 A69-28977

Elastoplastic deformations of thin axisymmetric shells of revolution with variable thickness, exemplifying shell with piecewise constant thickness

14 p2533 A69-28982

Geometric discrepancies influence on stability modes and loads for thin shells up to point of pcollapse

14 p2533 A69-29022

Differential equations for elastic stress distribution in thin rotating shell with arbitrary profile, obtaining analytical dimensionless solutions for potential profiles

15 p2703 A69-30158

Laminar thin orthotropic cylindrical shells natural and forced oscillations and dynamic deflection coefficient

15 p2715 A69-31202

Plane strain solution for thick walled viscoelastic cylinder bonded to thin elastic shell from deformation rate and strain, including inertia effects

16 p2871 A69-31876

Buckling load of cylindrical shell with inclined stiffeners, using method for stability of thin walled cylinder under transverse end load at free end

16 p2872 A69-31912

Potential and kinetic energy of cylindrical thin shell with cutout approximated by two dimensional finite difference methods, obtaining eigenvalue problem [AIAA PAPER 68-318]

16 p2874 A69-32158

Nonlinear partial differential equations solutions in theory of thin elastic spherical shells subjected to temperature fields and external loading

17 p3067 A69-34147

Strain displacement and compatibility equations of finite symmetrical deflections of thin shells of revolution [ASME PAPER 69-APM-14]

18 p3214 A69-34391

Differential equations of shells of revolution theory assuming rotationally symmetric stress and strain in thin elastic shells

18 p3215 A69-34549

Stability of thin walled eccentrically reinforced cylindrical shell, determining eccentricity influence and critical pressure formula from considerations of Poisson ratio, reinforcement parameters, etc

18 p3216 A69-34576

Thin walled cylindrical shells deflections under axial impact load, assuming deformations resembling cylindrical surface bending

18 p3217 A69-34599

Stress and displacement waves propagation in thin walled elastic cylindrical shell under compressive axisymmetric force based on momentless theory

18 p3218 A69-34600

Electromagnetic induction in concentric thin shell-enclosed solid conducting sphere immersed in varying electromagnetic field [AFCRL-69-0082]

18 p3101 A69-34803

Constrained elastoplastic torsion of closed thin walled cylindrical shells, analyzing tangential and normal stress by using equilibrium equations

18 p3222 A69-34978

Thin brittle plastic shells mechanical properties differing under tension and compression described by solving differential equations in successive approximation

18 p3224 A69-35327

Buckling stresses in thin walled box girder under bending determined using stationary potential energy criterion

18 p3224 A69-35344

Thin walled shell temperature and strain fields described by integrodifferential equations based on Kirchhoff hypothesis and coupled thermoelasticity reciprocity equations

18 p3225 A69-35368

Hollow thin walled carbon spheres developed as filler material for resins in low weight high temperature applications

19 p3355 A69-35522

Structural analysis of thin walled conical shell with variable external loading and Winkler-base elastic filler, using linear differential equation with variable coefficients

19 p3436 A69-35846

Contact problem of two thin elastic shells within Kirchhoff-Love theory, discussing constitutive equations

19 p3438 A69-36305

Nonlinear shell theory for thin elastic circular cylinders, obtaining equations for investigating equilibrium configurations of postbuckled states

19 p3440 A69-36636

Thin elastic shells internal stress state by iteration of two dimensional equation of general linear theory

19 p3443 A69-36790

Displacement patterns for buckled shapes of axially compressed thin walled circular, cylindrical and conical shells

19 p3443 A69-36793

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient

20 p3621 A69-37076

Torsional-flexural buckling of thin walled open sections under eccentric load, emphasizing singly symmetric sections loaded in plane of symmetry

20 p3625 A69-37653

Free vibrational characteristics of thin walled circular cylindrical shells with layers of anisotropic elastic material laminated about middle surface

20 p3627 A69-37767

Thin cylindrical pressure vessels with circular cutouts and radial branches, observing limit pressures during plastic deformation

20 p3629 A69-38027

Thin curved panels postbuckling behavior under axial compression, basing study on thin shell finite deformation theory and Galerkin method

20 p3629 A69-38112

Soviet book on shell and thin walled structure calculation methods covering stability and stress analysis, reinforced and sandwich shells, etc

20 p3630 A69-38199

Stress-strain state of thin spherical shell of variable thickness in elastoplastic equilibrium, using Meissner variables to reduce equilibrium equations

21 p3834 A69-38717

Linear hydrodynamic equations describing inviscid fluid flow past thin elastic cylindrical shells in circle with motions described by shallow shell equations

21 p3834 A69-38719

Stress-strain state of thick and thin walled closed shells of variable thickness during elastoplastic torsion developing in aircraft component production

21 p3835 A69-38882

Free vibration of thin cylindrical shells with thickness discontinuity, considering natural frequencies and mode shapes dependence on thick/thin ratio

21 p3836 A69-38984

Buckling stability of thin cylindrical shell under torsion, allowing for finite displacements due to shear in initial stress-strain state

21 p3838 A69-39187

Snap through in thin shells with initial irregularities during creep, determining critical time to failure by analyzing undisturbed buckling process

21 p3838 A69-39188

Computer program for stress analysis of cylindrical pressure vessel with flat-end closures by thin shell theory

21 p3842 A69-39306

Stress analysis of thin axisymmetric shells by plane frame analysis program, noting stiffness matrix for conical shell element

21 p3843 A69-39312

Finite element relaxation method for computing stress distribution in thin walled structure, considering computer program, storage and solving time

21 p3843 A69-39313

Deformation of thin walled spherical shell reinforced with equatorial hoop by concentric equal forces

21 p3846 A69-39714

Approximate generalized stress-strain rate relations for stationary creep analysis of thin shells compared with corresponding exact relations

22 p4041 A69-40013

Nonlinear stability for closed thin walled orthotropic cylindrical shell subjected to uniform external pressure, using Bubnov-Galerkin method for approximate solution

22 p4042 A69-40454

Vlasov thin shell theory extended for undamped bending, transforming partial differential equations and stress function into integral equation solvable by successive approximations

23 p4225 A69-41407

Differential operators representing potential energy of thin shell, discussing self conjugacy of boundary value problems

23 p4229 A69-41999

Computer program for natural oscillations of plates and shells, deriving differential equations of motion for thin elastic shell by variational method

23 p4230 A69-42004

Circular cylindrical thin walled shells creep buckling under uniform axial compression

23 p4234 A69-42413

Asymmetric dynamic response to free and forced vibrations of thin membrane shells at given stress state due to previous loads

24 p4399 A69-42990

THIN WALLS

Thin rigid radial wall effect on convective flow in heated rotating annulus

02 p0275 A69-12013

Optimal thin walled cross section of hollow beam for pure bending, taking into account stability requirements

02 p0340 A69-12054

Fast response thin skinned calorimeters for high heat flux profiles of arc jet flows

04 p0602 A69-15427

Stability functions for local buckling of long thin flat walled structures loaded for longitudinal compression and shear

05 p0833 A69-15709

Thin walled symmetrical angle section beam stability under bending moment by section deformation or torsional buckling

08 p1410 A69-19892

Thin walled channel columns section stability analyzed in terms of overall/Euler and local buckling

13 p2361 A69-27440

Elastoplastic strains in thin walled beams subjected to oblique bending by mobile loads of coupled concentrated forces, calculating deflections and plastic region distribution

15 p2711 A69-30971

Statistical calculation of three dimensional frames of thin walled rods, using method of initial parameters in matrix form

15 p2714 A69-31199

Mechanical machine for fatigue testing flat samples of thin walled structures under tension and at various frequency ranges

18 p3118 A69-34833

Ultrasonic spectrometry application to thickness measurement of thin and thick walled articles

18 p3137 A69-35110

Reinforced plastics static fatigue strength under various loads including thin walled tubes long term tests under constant internal pressure

18 p3162 A69-35353

Matrix formulation for discrete element method applied to linear static and eigenvalue problems of thin walled segments, using homogeneous differential equations

19 p3445 A69-36831

Plastic bending of thin walled pipes taking into account cross section flattening

21 p3835 A69-38868

Natural frequency equations for torsional vibration of fixed/ fixed and fixed/ simply supported uniform thin walled beams of open section based on energy method

22 p4040 A69-39935

Three dimensional welded structure of thin walled girders with stability loss, discussing welding strain gage measurements and simplified computational procedure

23 p4169 A69-42007

THIN WINGS

Pressure coefficients determination on slender body surface to estimate effects of quadratic terms, considering body of revolution with thin cruciform lifting surfaces

10 p1632 A69-22911

Flow field pressure distribution due to plane shock wave impinging by thin wing moving in opposite direction, discussing mathematical formulation, analytic solution and applications

17 p2891 A69-33459

Function theoretic solution of dual integral equations applied to boundary value problem of supersonic flow over infinite span thin wing

19 p3239 A69-36311

Supersonic flow past antisymmetrical thin delta wing by flow separation from subsonic leading edges, noting wing surface pressures

19 p3241 A69-36779

Sedov formula for complex velocity of arbitrary circulation in two dimensional theory of small curvature thin wings

19 p3242 A69-36795

THINNERS

U SOLVENTS

THIOLS

NT CYSTEINE

Disulfide effects on jet fuel operating characteristics and demercaptanization influence on thermal stability, corrosive action and sedimentation

01 p0142 A69-11098

Organosilicon-containing derivatives of 2-aminoethanethiols and 2-aminoethanethiosulphuric acids as radiation protective agents

13 p2210 A69-28486

Synthesis of N-/trimethylsilylalkyl/ diamines and N-/trimethylsilylalkyl/-N-/2-mercaptoethyl/ diamines, determining structure by IR spectra

15 p2561 A69-30414

THIOPLASTICS

Electron beam radiation curing of mercaptan terminated butadiene-acrylonitrile liquid copolymers at ambient temperatures in air

09 p1512 A69-22368

THIXOTROPIC PROPELLANTS

U GELLED ROCKET PROPELLANTS

THOMAS-FERMI MODEL

Thomas-Fermi approximation applied to calculation of equations of state and thermodynamic functions at high pressure from differential equations of statistical atom model

22 p3984 A69-40186

THOMSON EFFECT

U THERMOELECTRICITY

THORAX

Compensative adaptational reactions to weightlessness, discussing blood supply to thorax area, external respiration, gas exchange and energy loss during parabolic and orbital flights

17 p2909 A69-33384

THORIUM

Interferometrically measured wavelengths tabulated for Th lines in 2747-4572 Å range, using liquid nitrogen cooled hollow cathode lamp and Fabry-Perot interferometer

23 p4191 A69-42150

THORIUM COMPOUNDS

Thorium and La-compounds retained superconductivity to Pr and Tm concentrations due to crystal field splitting effect producing nonmagnetic singlet ground state

02 p0295 A69-11778

THORIUM ISOTOPES

Turbulent parameter and turbulent diffusion vertical profile diurnal variations determination based on measurements of Rn 220 and thorium-B concentrations near ground

03 p0459 A69-13273

Thorium 228 production and shaping for radiothermal propulsion, discussing transformation from radium 226, irradiated target processing, etc

05 p0791 A69-15597

Turbulent parameter and turbulent diffusion vertical profile diurnal variations determination based on measurements of Rn 220 and thorium-B concentrations near ground

14 p2472 A69-28781

THORIUM OXIDES

Joining methods for fabricating thorium dispersion strengthened nickel and nickel chromium materials

09 p1509 A69-22342

Thorium strengthened Ni-Cr alloys high temperature stability, noting thorium particle size influence

14 p2465 A69-29682

Recrystallization in thorium dispersed Ni sheet as function of strain-anneal cycles, using electron transmission technique quantitative determination

20 p3557 A69-36958

THORON

U RADON

THREE BODY PROBLEM

Three body problem, discussing impossibility of libration points of gravitating ellipsoid

01 p0155 A69-10957

Stability characteristics of small and moderately sized short period Trojan librations in sun-Jupiter restricted three body problem

01 p0158 A69-11329

Vehicle trajectory motion in transition region of three body problem, noting equations of motion, first order solutions, etc

03 p0505 A69-13001

Interplanetary orbits for probe launched from earth to reencounter earth, noting relationship to three body problem

03 p0514 A69-13783

Hill stability in unbounded three body problem analyzing motion in baricentric coordinate system, deriving equations for curves defining conditions for stability

04 p0652 A69-14543

Low density limit to three body ionic recombination coefficients in various gases

04 p0632 A69-14679

Soviet book on artificial satellite motion in noncentral gravitational field, discussing celestial axisymmetric planetary orbits, stationary centers, three body problem, etc

04 p0659 A69-15023

Asymptotic solutions of restricted three body problem for one parameter periodic orbits in earth-moon synodic system, determining motion near moon

04 p0663 A69-15382

Stellar escapes from clusters and temporary captures in restricted three body problem with equal masses

05 p0827 A69-16599

Resonant long period orbits around Lagrange equilibrium points, discussing formal expansions method for three body problem

07 p1225 A69-19719

Numerical analysis of periodic solutions of restricted three body problem in sun-Jupiter system, noting genealogy of periodic orbits

08 p1382 A69-19874

Separable expansion for off shell two body t matrix with Coulomb potential to solve nonrelativistic three body problem with two body interactions

08 p1354 A69-20205

Five families of simple periodic symmetrical orbits in Hill limiting case of restricted three body problem, studying asymptotic forms

08 p1393 A69-20572

Three body ionic recombination coefficient for moderate and high gas densities, taking into account variability in mean free path and trapping radii

09 p1542 A69-21624

Perturbing body influence on motion near triangular Lagrangian solutions of restricted elliptical three body problem applied to earth-moon system under solar perturbations

10 p1779 A69-23612

Canonical invariance of Hamiltonians noting nature of solutions of differential equations, existence of periodic solutions and application to three body problem

10 p1721 A69-23987

Elliptic integrals to determine orbital elements time dependence in three body problem, estimating satellite lifetime

10 p1791 A69-24196

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem

11 p1956 A69-24399

Triple system p Velorum, discussing coude spectra and published visual orbital elements

11 p1963 A69-25263

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem

12 p2155 A69-25883

Restricted three body problem of conservative Hamiltonian systems with two degrees of freedom and mass ratio parameter, considering phase space around L sub 4

13 p2346 A69-27711

Periodic Trojan orbits for resonance 1/12 in restricted three body problem, noting bridge of stable and unstable orbit lanes

13 p2350 A69-27824

Three and n body problems solution by reduction of independent variables and maximum principle

15 p2652 A69-30448

Numerical analysis of asymptotic solution for earth-moon particle trajectories in idealized restricted three body problem

16 p2857 A69-32155

Ground traces of artificial earth satellites with respect to perturbations due to atmospheric drag, earth oblateness and moon and sun as third body

19 p3398 A69-35614

Short term motion of lunar satellite, discussing three body disturbing functions and perturbation solution of nonsingular orbit elements

19 p3402 A69-35934

Linearization of equations of motion for three body problem, emphasizing lunar far side libration point as related to possible landing

19 p3402 A69-35961

Periodic orbits in nonlinear dynamical system constructed with iterative method based on modification of generalized Newton-Raphson technique
[AAS PAPER 68-085]

20 p3595 A69-37171

Stability of periodic orbits in elliptic restricted three body problem
[AAS PAPER 68-086]

20 p3595 A69-37172

Stability of motions about triangular libration points in elliptic restricted three body problem
[AAS PAPER 68-090]

20 p3595 A69-37175

Trigonometric polynomials representing perturbation function and derivatives in three body problem

20 p3596 A69-37315

First approximation stability of triangular Lagrange solutions of restricted elliptical three body problem, formulating power series for orbital eccentricity

20 p3575 A69-37318

Resonance theory of thermolecular atomic recombination kinetics based on transition complexes identification as quasi-bound states or orbiting resonances

20 p3579 A69-37345

Infinitesimal mass trajectories and possible double collision in gravitational field of two finite and unequal masses in plane elliptic restricted three body problem

21 p3795 A69-38443

Optimal control stationkeeping for maintaining space probe stability around collinear points in three body problem
[AIAA PAPER 69-906]

21 p3807 A69-39338

Computer program [TACTICS] for simulating three vehicles simultaneous motion in space, considering intercepter-target guidance and intercept trajectories
[AIAA PAPER 69-890]

21 p3678 A69-39415

Dynamic systems stability with two degrees of freedom, determining second order time dependent integrals valid near periodic orbit

22 p4013 A69-40123

Symmetric periodic orbits families of restricted three body problem, using two body problem

22 p4031 A69-40908

Periodic orbits obtained for special restricted three body problem in resonance using numerical integration

22 p4031 A69-40909

Collective rotational motion separation from internal motion in system of n point masses based on wave mechanics, emphasizing three body problem

24 p4349 A69-42650

Ellipsoidal satellite translational rotational motion under spherical planet and point source sun gravitational fields influence, obtaining approximate solution for three body problem

24 p4390 A69-43789

THREE DIMENSIONAL BOUNDARY LAYER

Self similar solutions uniqueness of three dimensional laminar boundary layer equations for conical flow determined by supplementary conditions derived from flow pattern

02 p0233 A69-12572

Three dimensional boundary layers on cones at small angle of attack, presenting numerical solutions with heat transfer effects for wind tunnel model
[ASME PAPER 68-WA/APM-24]

04 p0541 A69-14389

Three dimensional boundary layers, extending Prandtl independence principle to laminar compressible flow over convex body

05 p0743 A69-15556

Universal equations for three dimensional laminar boundary layer of incompressible fluid on walls of axisymmetric channel with vortical external flow

06 p0909 A69-17328

Linear equations for three dimensional perturbations in boundary layer of viscous incompressible fluid flow on plane surface, discussing Tollmein-Schlichting waves

06 p0909 A69-17329

Three dimensional boundary layer problems analyzed by exact numerical method
[AIAA PAPER 69-138]

06 p0911 A69-18041

Spatial distribution of three dimensional laminar boundary layer transition zone on sharp half angle cone from hypersonic wind tunnel tests
[AIAA PAPER 69-12]

06 p0863 A69-18112

Three dimensional boundary layer separation assuming zero friction

07 p1050 A69-18736

Numerical method for three dimensional boundary layer equations, applying perturbation technique and independence principle to rotating flat blade
[AIAA PAPER 69-227]

07 p1051 A69-19560

Mixed three dimensional separation of boundary layer on ellipsoid of revolution at ten degree angle of attack, ignoring heat flux

08 p1251 A69-19876

Wall temperature influence on intensity of transverse flow of three dimensional laminar boundary layer resulting from transverse pressure gradient

08 p1251 A69-20274

Numerical integration of equations of three dimensional laminar boundary layer in conical flow, using integral relation method

09 p1430 A69-21789

Nonequilibrium three dimensional boundary layer over slightly yawed cone analyzed for air dissociation and ionization parameters, noting binary scaling application

09 p1430 A69-21965

Krause numerical solution applied to normal injection in three dimensional incompressible laminar boundary layer
[DVL-902]

09 p1482 A69-21971

Numerical solution for three dimensional boundary layers based on stability determinations for linearized difference equations

10 p1631 A69-22902

Three dimensional laminar boundary layer of incompressible flow controlled by suction or injection, considering similarity flow solutions and role in satellite design

10 p1678 A69-22936

Mixed boundary value problem in the theory of axisymmetric potential of three dimensional boundary layer reduced to solution of linear integral equation

11 p1918 A69-24787

Three dimensional laminar boundary layer near windward generator of cone subjected to uniform mass transfer by suction or injection

11 p1874 A69-25281

Numerical integration of equations for three dimensional laminar boundary layer on sharp elliptical cones in supersonic flow of ideal gas, discussing heat exchange

11 p1821 A69-25477

Three dimensional thermal laminar boundary layer around body moving with constant acceleration in incompressible fluid, considering wall temperature and Prandtl number

13 p2380 A69-28631

Boundary value problem in three dimensional boundary layer theory for incompressible flow near stagnation point

14 p2432 A69-29677

Three dimensional laminar boundary layer on semiinfinite permeable flat plate in viscous incompressible fluid flow, calculating velocity profiles and skin friction components

14 p2433 A69-29898

Boundary layer solution in three dimensional bending for plate with curvilinear hole to study stress-strain state at hole and over entire plate

15 p2708 A69-30662

Three dimensional periodic boundary layer on ellipsoid in harmonic motion at given angle of attack, using successive approximations

15 p2548 A69-31008

Laminar boundary layer on rotating blades and yawed infinite wings, solving partial differential equations numerically by implicit finite difference scheme on computer

16 p2732 A69-31885

Systematic formalism specialization of group theory techniques for similarity analysis applied to three dimensional incompressible boundary layer flows

16 p2773 A69-32379

Three dimensional hypersonic laminar boundary layer subdivided into inner and outer regions, obtaining flow description by matching inner and outer solutions
[AIAA PAPER 69-710]

17 p2955 A69-33467

Three dimensional laminar boundary layer on conical body of revolution in low Reynolds number compressible fluid flow

19 p3241 A69-36762

Three dimensional laminar boundary layer hypersonic flow about slender conical vehicles, analyzing transverse surface curvature effect, studying Reynolds number, cone angle, etc
[ASME PAPER 69-FE-23]

20 p3460 A69-37992

Three dimensional turbulent boundary layer over flat surface in incompressible flow calculated by finite difference method based on time averaged motion equations integration

21 p3693 A69-38767

Superimposed free vortex swirl effect on flow and heat transfer in three dimensional axisymmetric laminar boundary layer

24 p4304 A69-43584

THREE DIMENSIONAL COMPOSITES

Three dimensional reinforcement composites for gear and bearing applications with improved interlaminar shear strength, thermal and wear properties

08 p1340 A69-20509

THREE DIMENSIONAL FLOW NT SECONDARY FLOW

Three dimensional flow at large distance and in front of shock wave for three dimensional body traveling at sonic velocity

01 p0005 A69-10159

Steady three dimensional flow through impeller of turbines with small number of blades and with edge cut hub, noting inefficiency of flow without impact

01 p0142 A69-10309

Gravity waves train propagation in cylindrical channel, discussing derivation by three dimensional flow analysis method

01 p0059 A69-10382

Algorithms for three dimensional supersonic gas flow incident on bodies applied to calculating oxygen flow in asymmetric nozzle

01 p0060 A69-10724

Steady state three dimensional MHD flow in variable profile channels calculated by reducing problem to two dimensional approximation using curvilinear coordinate system

01 p0131 A69-10776

Hydraulic analogy for shock and expansion waves arising in supersonic compressors due to three dimensionality of flow
[ONERA-TP-598]

02 p0187 A69-11621

Soviet book on hypersonic internal and external three dimensional viscous and nonviscous gas flow, emphasizing flow past slender blunted bodies

02 p0230 A69-11775

Three dimensional wakes and jets, discussing centerline velocity, half width growth and velocity irregularities

02 p0190 A69-12549

Generalization of characteristic relations for steady supersonic 3D motion of polytropic gas, obtaining complex screw motions

03 p0412 A69-12847

Three dimensional sonic flow downstream from shock wave in nondissipative perfect fluid, introducing pseudorotating flow to obtain velocity field

03 p0362 A69-13363

Survey of papers on computer calculation of two and three dimensional gas flows, emphasizing method of characteristics and finite difference techniques

03 p0363 A69-13657

Resonance analysis of forced vibration of rectangular plate in three dimensional supersonic flow

03 p0528 A69-13928

Surface geometry of three dimensional inviscid hypersonic flows, developing tensor equations for geodesic, steepest descent and pressure approximations

04 p0542 A69-14718

Simulation of two and three dimensional fluid transients by use of one dimensional equations in lattice-work of piping elements

05 p0747 A69-16071

Thickness effects on flow past sweptback wings in supersonic flight noting influence of oscillatory motion
[ASME PAPER 68-FE-31]

05 p0698 A69-16078

Three dimensional steady/unsteady flows of conducting inviscid gas in magnetic field, in absence of electric field, solving related Cauchy problem

06 p0966 A69-17541

MHD flows in channels of MHD devices, emphasizing two and three dimensional problems

06 p0969 A69-17913

Three dimensional scramjet exhaust nozzle flow fields by second order method of characteristics
[AIAA PAPER 69-5]

06 p0862 A69-18048

Three dimensional hypersonic steady flow around blunt and pointed cones at nonzero angles of attack calculated by method of characteristics
[AIAA PAPER 69-187]

06 p0865 A69-18176

Effects of multidimensional flow through porous matrices in mass transfer cooling, analyzing one dimensional model for blunt axisymmetric surfaces
[AIAA PAPER 69-149]

06 p1038 A69-18179

Three dimensional vector fields and flows geometry, discussing vector lines as geodesics on surfaces of normal congruence and flat vector fields

08 p1302 A69-19823

Mixed three dimensional separation of boundary layer on ellipsoid of revolution at ten degree angle of attack, ignoring heat flux

08 p1251 A69-19876

Wall friction influence on three dimensional flow in axial flow turbomachines, introducing shear stresses between flow planes

08 p1252 A69-20724

Three dimensional flow field of incompressible fluid with purely axial development in conical ducts and turbomachines

09 p1480 A69-21597

Natural convective oscillatory three dimensional flow in cylindrical annuli, describing inception, amplitude, period and wavelength

09 p1481 A69-21902

Hydrodynamic stability and entropy decrease in flow in three dimensional space, using irreversible thermodynamics principles

10 p1808 A69-22892

Steady three dimensional flow of gases with thermodynamic relaxation, noting flow field weak discontinuities and effect of discontinuities in wall curvature

10 p1677 A69-22894

Multidimensional theory of characteristics found applicable to calculating three dimensional time dependent gas flows

10 p1632 A69-22913

Three dimensional MHD flow near forward stagnation point magnetic fields with large induction values described by differential equations, showing tendency towards two dimensional flow

10 p1727 A69-23100

Similarity solutions of laminar boundary layer equations for three dimensional flows of incompressible power law fluids

10 p1678 A69-23235

Three dimensional compressible potential flow in curved circular duct analyzed by perturbation method

11 p1867 A69-24607

Holographic recording of three dimensional flow field velocities, applying theory of particle size assessment via Fraunhofer holography

11 p1884 A69-24691

Nonorientable five channel adapter with spherical measuring head for three dimensional gas flow measurement, noting sensitivity to mechanical disturbances in calibration

11 p1888 A69-25340

Delta wing in three dimensional supersonic flow analyzed by method of characteristics, discussing leading edge problems

11 p1820 A69-25425

Three dimensional gas flows near characteristic surface extended over homogeneous polytropic gas at rest

11 p1876 A69-25729

Potential triple traveling space waves in barotropic gas with arbitrary equation of state, analyzing adjacent and three dimensional self similar flows

12 p2061 A69-25889

Optical methods in three dimensional gas flow research, noting role in density field determination and conjunctive use with gas dynamics equations

12 p2011 A69-26191

Difference schemes for quasi-linear hyperbolic equations, with applications to three dimensional supersonic flow past bodies

14 p2430 A69-29475

Unsteady three dimensional heating of finite solid rectangular parallelepiped, deducing expressions for rectangle and slab

15 p2717 A69-30790

Three dimensional laminar jet mixing of incompressible viscous fluid from rectangular cross section nozzle into uniform stream

16 p2768 A69-31687

Book on three dimensional flow of ideal gases past smooth bodies, emphasizing utility of finite difference methods

16 p2771 A69-32003

Three dimensional supersonic nozzle flow field calculations using second order numerical method of characteristics and computer programmed for internal flows

[AIAA PAPER 69-463] 16 p2734 A69-32766

Three dimensional potential surface flow past rotor blade in hover, accounting for compressibility and blade element theory limitations

[AHS PAPER 324] 17 p2895 A69-33537

Three dimensional supersonic flow past pointed nonaxisymmetrical bodies characterized by great local surface curvature changes, using new approximation

18 p3086 A69-34705

Systematic mathematical ordering of knowledge concerning three dimensional flow patterns around blunt bodies, emphasizing high speed computers role

18 p3089 A69-35269

Fraunhofer holography for measurement of three dimensional flowfield velocity components, investigating rectangular channel flow

19 p3305 A69-35729

Monograph on method of characteristics for three dimensional supersonic flows, covering numerical calculations of steady gas flow past bodies at angle of attack

19 p3238 A69-36170

Three dimensional velocity field disturbed by shock wave traveling across slender wing at supersonic speed

19 p3242 A69-36797

Navier-stokes equation numerical integration for three dimensional incompressible flow, discussing annulus thermal convection and trigonometric transforms algorithm

21 p3694 A69-38770

Laplace transforms in heat conduction theory in three dimensional infinite homogeneous body

21 p3851 A69-39011

Linear normal mode instability of three dimensional laminar and turbulent shear layers, analyzing relations between velocity profile, eddy viscosity and oscillations

22 p3932 A69-40893

Mean flow properties of incompressible turbulent three dimensional jets and wakes, treating flow within boundary layer theory context

23 p4060 A69-41908

Tridimensional infrasonic diffuser geometry effects on operational efficiency, considering opening angle, outlet/inlet section fields ratio and diffuser length/hydraulic radius ratio

24 p4243 A69-42560

THREE DIMENSIONAL MOTION NT SECONDARY FLOW

Single impulse noncoplanar orbital transfer with finite time of thrust action for satellite in elliptical orbit

05 p0823 A69-16044

Regularization of perturbed Keplerian motion in three dimensional space by means of Levi-Civita transformation generalized to three dimensions

05 p0827 A69-16602

Integral of Navier-Stokes equations for steady three dimensional motion of incompressible viscous fluid, giving angular velocity vector projections

08 p1342 A69-20320

Elasticity theory upper and lower bounds for two and three dimensional inhomogeneous problems and applications to plates

10 p1794 A69-22889

Three dimensional model of atmospheric drift currents in equatorial region of world ocean system based on nonlinear differential equations

14 p2472 A69-29405

Taylor vorticity transport theory and von Karman similarity hypothesis extended to consider three dimensional fluctuating velocity field in analyzing turbulent swirling ducted flow

[ASME PAPER 69-APM-19] 18 p3120 A69-34394

Two dimensional theory for anisotropic plates motion derived, using asymptotic integration of three dimensional elasticity equations

18 p3224 A69-35297

Single impulse noncoplanar orbital transfer with finite time of thrust action for satellite in elliptical orbit

20 p3606 A69-37953

Spherical motion of solid body about fixed point with nonholonomic coupling, deriving equations for centrifugal moments of inertia effects on motion

21 p3773 A69-39840

Statistical analysis of position errors inherent in position-finding system utilizing position fixing planes in three dimensional space

22 p3979 A69-41253

Three dimensional mixed boundary value problem in elasticity by dominant states method, examining generalized Fourier series feature in Legendre polynomials

23 p4229 A69-41998

THRESHOLD CURRENTS

Exploding wire detonators noting dependence of threshold burst current on bridgwire length and diameter, explosive surface, density, etc

01 p0119 A69-10672

Continuous wave GaAs injection lasers operation at high temperatures shown possible by using available threshold current densities with suitable heat sink materials

02 p0255 A69-11710

Uniaxial pressure applied to p-n junction of GaAs injection laser, discussing effects on threshold current and wavelength

03 p0441 A69-13848

Threshold velocities of acoustoelectric current oscillations in elemental piezo- and nonpiezoelectric semiconductors, taking into account amplification and losses of phonons

05 p0807 A69-15994

Active region doping effect on laser diode threshold current, noting current dependence on loss coefficients in interband transition model without selection rule

06 p0933 A69-17254

Linear perturbation theory to predict instability threshold conditions caused by electric field in poorly conducting liquid subject to vertical temperature gradient

08 p1352 A69-20799

Series operation of Gunn devices with differing threshold currents at SHF

09 p1463 A69-21684

Noise rejection in linear amplitude detector during weak harmonic signal reception improved by limiting threshold voltage

09 p1460 A69-22643

Cross section for ionization of atoms by positive ion bombardment near threshold

11 p1922 A69-25322

Bismuth doped lead tin telluride diode lasers with low threshold currents at cryogenic temperatures, discussing doping effect

12 p2109 A69-26648

Temperature effects on polarization degree of threshold current and delay of radiation from GaAs laser diodes with diffused Zn

13 p2227 A69-27328

Temporal correlations in light field from laser at threshold of oscillation, measuring He-Ne CW gas laser by photoelectron count

13 p2271 A69-27399

Photon loss coefficients in electron beam pumped GaAs laser showing dependence on doping type and impurity concentration, noting threshold current density measurement

13 p2271 A69-27466

Magnetic field effect on Gunn diode vibrations and LF oscillations, noting increase in threshold field and decrease in threshold current

18 p3183 A69-35266

Injection lasers threshold characteristics, studying temperature and doping level effects on current density and radiation energy

19 p3337 A69-36527

Power, efficiency and temperature dependence of emission spectra and threshold current density in electron beam pumped GaAs laser, noting doping concentration

19 p3338 A69-36538

Gallium arsenide junction lasers operating above threshold, showing resonant modes dependence on steady state gain function and frequency dependence of spatial gain distribution

19 p3338 A69-36691

THRESHOLD DETECTORS [DOSIMETERS]

Adaptive threshold detection, using stochastic approximation techniques to derive receiver structures capable of learning optimum threshold setting during actual operation

11 p1839 A69-25297

Incoherent object threshold light detection by quantum limited optical system in presence of radiant thermal energy

23 p4191 A69-42147

THRESHOLD GATES

Delayed response in threshold switching from reset state in ferrite memory cores consisting of magnesium compounds

[IEEE PAPER 16.4] 01 p0045 A69-10719

Gamma radiation effects on gate threshold voltages in modified oxide insulators in MOS structures

06 p0976 A69-16876

Radiation tests on Ovonic threshold switches performed with fast neutrons and broadband X rays

06 p0978 A69-16891

Adaptive threshold detection, using stochastic approximation techniques to derive receiver structures capable of learning optimum threshold setting during actual operation

11 p1839 A69-25297

AC diode switching circuits employed as threshold elements in functional rectifiers for approximating nonlinear functions

11 p1857 A69-25717

THRESHOLD LOGIC

Threshold logic for LSI to realize broad range of functions noting signal control, gate characteristics, weighting, etc

17 p2943 A69-34122

- Algorithm for assigning binary codes to inputs, internal states and outputs for sequential machines by threshold logic
18 p3105 A69-34618
- THRESHOLD SHIFT**
U THRESHOLDS
THRESHOLDS
Atmospheric turbulence effects on detection and resolution of incoherent objects, discussing error probabilities of threshold and maximum-likelihood systems
12 p2029 A69-26252
- THRESHOLDS [PERCEPTION]**
Differential and threshold sensitivity of acoustic analyzer of humans under space flight factors
02 p0197 A69-11500
Aircraft instrument lighting color effects on postexposure, scotopic absolute and acuity threshold and legibility for reading of instruments
03 p0380 A69-14073
Psychophysical methods for determining perception threshold of angular acceleration in man during vertical rotation
05 p0708 A69-15969
Pure tone threshold determination based on pulse tone technique with modified audiometer
06 p0882 A69-17836
Foveal luminances for chromatic and absolute thresholds for hue identification in case of small targets
07 p1183 A69-19649
Otolith apparatus response threshold under weightlessness conditions simulated by aircraft flight, measuring galvanic current threshold for banking
08 p1263 A69-19934
Distance discrimination in simulated space environment, studying just noticeable difference [JND] to determine relations between distance threshold and observation distance
12 p2022 A69-26372
Averaged cortical evoked response characteristics relationship to performance in traditional threshold procedures, discussing stimulus sensitivity and intensity control in central nervous system
21 p3653 A69-38897
Grating size effect on threshold of grating pattern for various colors of illumination and target orientations
22 p3879 A69-40840
Luminance additivity for human visual system in terms of photometric methods based on direct brightness matching, incremental threshold, etc
22 p3880 A69-40849
Luminance threshold for compound stimulus detection measured as function of two components relative luminance
22 p3880 A69-40852
Psychophysical threshold changes during subliminal monocular and interocular stimulation, studying conditioning flash size effects on temporal summation
22 p3881 A69-40860
Subjective and objective thresholds of darkness adaptation in human subjects grouped from infancy to adulthood, using same variable intensity light source equipment
22 p3881 A69-40861
Visual succession threshold for sides of square contour affected by presenting single line on parallel contour sides
22 p3882 A69-40868
Comparative study of differential luminance threshold and spatial summation exponent for solid and annular objects with equal surfaces
22 p3883 A69-40877
Spatial interactions and thresholds in identification and detection of compound visual stimuli
22 p3883 A69-40878
Retinal mechanisms determining visual band movement thresholds obtained by manipulation of retinal locus, luminance, arc length and spectral distribution of moving stimulus
22 p3883 A69-40879
Model of nerve elements, discussing subthreshold processes parameter system and analog investigation of transient processes for various stimuli at model input
23 p4110 A69-41981
- THROTTLING**
Thermodynamic analysis of engines and heat pumps operating within negative absolute temperatures, noting work increase by throttling
09 p1623 A69-22219
Throttling effect on thermodynamic efficiency of MHD generator Rankine cycle with various working fluids
11 p1824 A69-24222

- Flight performance prediction for throttling bipropellant rocket engine utilizing ablative combustion chamber throat, discussing lunar module descent engine
[AIAA PAPER 69-452] 16 p2841 A69-32690
Constant chamber pressure thrust throttling of expansion-deflection rocket nozzle, calculating wall static pressure and thrust by characteristics method, discussing performance
[AIAA PAPER 69-435] 16 p2846 A69-32776
Pressure drop in control element of gas generator during readjustment of throttle in hydraulic supply line, noting assumptions
19 p3393 A69-35819
- THRUST**
NT JET THRUST
NT LOW THRUST
NT MICROTHRUST
NT RETROTHRUST
NT ROCKET THRUST
NT VARIABLE THRUST
Integrated shrouded propeller as glider thrust source permitting powered takeoffs and updraft independence
05 p0702 A69-16379
Hall tube electromagnetic plasma accelerator, with thrust affected only by Lorentz forces in external magnetic field, compared to pure Hall accelerator
11 p1866 A69-25214
Pressure sensors, strakes, removal of full length guide vanes indicate possible difficulties with thrust of NK-8-2 turbofans in Tu-154
19 p3395 A69-36757
- THRUST AUGMENTATION**
Monograph on exhaust gases mixing with cold airstream in ducted fanjet engine, noting thrust and efficiency increase
03 p0496 A69-14048
Turbofan engines augmentation, evaluating duct heater, bluff body stabilizers, piloted can combustors, flameholding techniques and afterburner tests
09 p1573 A69-22617
Electric propulsion systems characteristics, examining sputtering of metallic targets as thrust augmentor
11 p1944 A69-25598
Jet flap as alternative to rigid diffuser for momentum propulsion, discussing thrust augmentation
[AIAA PAPER 69-777] 19 p3393 A69-35645
Thrust increase methods for air breathing turbojet engines analyzed with respect to effectiveness, taking into account environmental supporting mass and fuel expenditures
23 p4199 A69-41578
Booster engines for thrust augmentation of commercial transports, considering tradeoffs in takeoff distance, payload, range, safety and noise patterns
[SAE PAPER 690381] 23 p4201 A69-41667
- THRUST BEARINGS**
Elastomeric bearings for support of heavy loads and accommodation of oscillatory motions, considering molded type for helicopter tail rotor
01 p0085 A69-10406
Fatigue life, kinematics, dynamics, etc., of thrust loaded ball bearings, considering inertial effects of hollow balls
01 p0087 A69-10908
Axial rigidity effect of centrifugal force acting on balls of rapidly rotating radial thrust bearing
04 p0605 A69-14606
Dynamic behavior of series and parallel flow thrust-balance systems for compressible and incompressible flow, using analog computer simulation
04 p0647 A69-15521
Angular inertia of lubricant in MHD hydrostatic thrust bearings, obtaining critical angular speed of rotor
09 p1503 A69-21443
Load capacity, stiffness and flow requirement of capillary and orifice compensated oil lubricated externally pressurized rectangular thrust bearings
12 p2102 A69-26239
Gas molecular mean free path effect on performance of spiral grooved thrust bearing, discussing slip flow factor and He Knudsen number
[ASME PAPER 68-LUBS-17] 13 p2266 A69-27273
Externally pressurized gas lubricated journal and thrust bearings designs, citing reference literature
[ASME PAPER 68-LUBS-8] 13 p2267 A69-27282
Flow models for externally pressurized gas bearings, discussing pressure distributions, load capacity and flow rate
[ASME PAPER 68-LUBS-2] 13 p2267 A69-27285

- Gas lubricated tilting pad thrust bearing analysis and performance, determining optimum hydrodynamic crown profile
[ASLE PREPRINT 69AM 3C-2] 15 p2619 A69-30472
High speed ball bearing skidding, proposing analytic model as design tool, discussing effects of thrust load, speed, oil temperature and flow rate
[ASME PAPER 69-LUBS-20] 18 p3140 A69-34377
- THRUST CHAMBERS**
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] 02 p0229 A69-12385
Glass fiber reinforced plastic (GFRP) roving end grains in rocket combustion chambers, discussing design and structural parameters
02 p0305 A69-12748
Solid fuel rocket engine thrust and chamber pressure development curves from charge and engine geometry, heat of explosion and kinetic characteristics
16 p2836 A69-31994
Liquid propellant injector design for rocket thrust chambers, discussing mass and mixture ratio regulation
16 p2836 A69-31999
ICRPG liquid propellant thrust chamber performance evaluation methodology, reviewing imperfections and limitations
[AIAA PAPER 69-468] 16 p2838 A69-32657
Rocket stability monitoring by temporal radiometry, using exhaust radiance measurement to detect frequencies in thrust chamber combustion pressure
[AIAA PAPER 69-580] 16 p2839 A69-32670
Oxygen difluoride-diborane propellant injector and chamber design criteria applied to unmanned spacecraft rocket engine development
[AIAA PAPER 69-508] 16 p2839 A69-32671
Ablative materials in hydrogen/oxygen thrust chamber using expansion nozzle to substitute regenerative thrust chamber assembly
[AIAA PAPER 69-442] 16 p2747 A69-32702
Discharge chamber plasma processes in electron bombardment ion thrusters, considering factors affecting thruster performance
[AIAA PAPER 69-494] 16 p2845 A69-32735
Electroforming methods in design and fabrication of liquid propellant rocket motor injectors and composite thrust chambers
[AIAA PAPER 69-583] 16 p2794 A69-32757
Space storable hydrocarbon fuel blended FLOX propellant performance with coaxial injector including characteristic velocity, chamber geometry, pressure and heat flux distribution
[AIAA PAPER 69-507] 16 p2835 A69-32772
Li-F-H tripropellant study, discussing injection method variations and thrust chamber configuration effects on characteristic velocity efficiency and heat flux measurement
24 p4362 A69-43128
- THRUST CONTROL**
Mercury ion thrusters and facilities automatic controls durability testing, discussing vacuum chamber systems, unattended operation and control
[AIAA PAPER 68-576] 02 p0229 A69-12385
Dynamic behavior of series and parallel flow thrust-balance systems for compressible and incompressible flow, using analog computer simulation
04 p0647 A69-15521
Analytical model for thrust-time curve during ignition transient of solid propellant rocket engines, discussing flame spreading
[WSCJ PAPER 68-33] 07 p1203 A69-18365
Optimal lift and thrust control programs to maximize range of missile in horizontal flight
09 p1610 A69-22086
Causes and magnitudes of thrust misalignment of Kaufman type electron bombardment ion thruster
[AIAA PAPER 69-303] 10 p1753 A69-23362
Space station attitude control through resistojets and control moment gyros (CMG), discussing propulsion, safety features, weight factors, etc
11 p1965 A69-24531
V/STOL air intakes and jets simulation in wind tunnel tests, noting thrust simulation possibilities
11 p1866 A69-25431
Soviet book on solid propellant guided/unguided rocket design with emphasis on thrust control, including trajectory calculations, optimal parameters and components estimation by weight analysis
12 p2175 A69-27077
Optimum thrust control of satellite along given trajectory to rendezvous at zero velocity with orbited satellite
13 p2356 A69-27684

Optimal motion control of spacecraft refueling during flight by liquefying atmospheric gas along prescribed trajectory under constant thrust
13 p2356 A69-27686

Reaction control rocket engines for manned spacecraft, discussing operating and cycle life, thrust response, specific impulse and reliability
16 p2867 A69-31746

Pilot chamber initiated thermal decomposition reactor concept for monopropellant thruster, discussing thrust levels and throttling ratios
[AIAA PAPER 69-420] 16 p2841 A69-32685

Low thrust reaction control for space missions, summarizing range and specific impulse characteristics for solid and hybrid systems
[AIAA PAPER 69-433] 16 p2834 A69-32745

Stability analysis of missile lateral supersonic flutter based on Lagrange equations, considering conservative thrust, control deviation and aerodynamic forces
17 p3045 A69-32946

Microthrusters thrust requirements for attitude control and orbital transfer of gravity gradient geostationary satellite
17 p3019 A69-33336

Thrust magnitude and direction modulation of hybrid propellant engine, noting applications
17 p3019 A69-33337

Lifting rotors with thrust or tilting motion feedback control, deriving blade equations of motion
[AHS PAPER 340] 17 p2899 A69-33510

Calculator for obtaining moments of inertia data to determine control power for vehicle orientation and to avoid control systems over design
[SAWE PAPER 792] 18 p3118 A69-34865

Solar electric thrust system technology concerning performance, thruster control system stability and method for solution
19 p3394 A69-35941

Density profiles in far field of reaction control system plumes in vacuum obtained by method eliminating difficulties encountered by continuum method
19 p3238 A69-35954

Vehicles optimal flights with controlled or boundary level thrust in circular orbit neighborhood, using linearized equations of motion
19 p3427 A69-36612

Attitude control system for launch vehicles, providing commanded thrust vector angle proportional to desired angular displacement of acceleration vector
21 p3819 A69-39032

Satellite motion orbital elements dependence on large short impulse arbitrarily directed in space, analyzing optimal orbits transfer and thrust control
21 p3818 A69-39821

Communication satellite systems using hydrazine engine thrust for trajectory correction, discussing trajectory deviations causes and ERNO engine design
[DGLR-69-013] 23 p4203 A69-42152

Optimal thrust control for plane curvilinear motion of variable mass point in gravitational field
23 p4192 A69-42340

THRUST LOADS

Ballistic reentry trajectories, considering point mass motion in central force field under tangential thrust action and spherical atmospheric density distribution
06 p1006 A69-17564

Liquid filled cylindrical container motion with longitudinal forces applied to base, obtaining stability conditions for natural oscillations
08 p1419 A69-21181

THRUST MEASUREMENT

Optimal layout of turbofan jet engines, discussing experimental rig for high thrust measurement
[AIAA PAPER 67-416] 01 p0143 A69-11015

ONERA vertical bench for dynamometric calibration to 20 tons used for engine and rocket thrust measurement
07 p1116 A69-19217

Sine wave oscillator circuits and performance prediction for NERO thrust measurement test stand
08 p1300 A69-20155

NERO thrust power measurement, discussing electromagnetic and strain-gage test stands
08 p1301 A69-20156

Rocket engines transient thrust measurement by quartz transducers
08 p1301 A69-20589

Low thrust propulsion devices high response impulse testing, describing limitations imposed by solenoid valve time response
10 p1672 A69-23278

Aircraft test setup design and techniques to simultaneously measure engine thrust and engine thrust

minus drag, noting nozzle configurations variations effect
[AIAA PAPER 68-395] 12 p2059 A69-26769

Simulation of two phase hydrogen venting to space environment, discussing thrust effect measurements, flow instabilities and instrumentation
15 p2701 A69-30396

THRUST PROGRAMMING

Apollo translunar injection burn simulation, analyzing polynomial solutions of optimum geometry and characteristic velocity
[AAS PAPER 68-150] 21 p3820 A69-39225

Thrust optimization for sounding rocket to reach maximum altitude with given initial and propellant weight, using polygonal time function and multiple-parameter numerical technique
22 p4037 A69-41050

THRUST REVERSAL

Soviet book on turbojet engine reverse thrust systems and systems for deflection of jet stream covering aircraft braking efficiency
04 p0647 A69-14934

Mathematical model for flow within external target type thrust reverser, assuming inviscid incompressible two dimensional flow
[AIAA PAPER 69-3] 06 p0985 A69-18124

Thrust reversers for business jet aircraft, discussing federal aircraft regulation requirements for ground and in-flight qualification
[SAE PAPER 690311] 11 p1941 A69-24512

Fluidic thrust reversal control system for turbojet achieving cost and weight reduction, illustrating fluidic circuit and noting circuit reliability
17 p3018 A69-33329

Performance capabilities and handling quality characteristics of aircraft equipped for in-flight thrust reversing
[AIAA PAPER 68-880] 17 p2902 A69-34031

Polyphenyl ether lubricants and self lubricating materials compared for antifriction ball bearings in thrust reversing actuator gear box
[SAWE PAPER 68-LC-1] 18 p3148 A69-35003

Boeing 747 exhaust reverser design and control, discussing stopping distance, cascades, materials, etc
[SAE PAPER 690409] 23 p4200 A69-41637

Commercial jet aircraft thrust reversers and noise suppressors developed by Rolls-Royce, discussing compatibility, reliability and applications
[SAE PAPER 690410] 23 p4200 A69-41638

DC-10 aircraft CF6 engine thrust reverser and spoiler design features impacting operational characteristics, maintainability, noise reduction, structural concept, control and actuation system
[SAE PAPER 690411] 23 p4200 A69-41639

SNECMA thrust reverser system design on Concorde prototype, discussing performance, safety, airworthiness, operational requirements, reliability and maintenance
[SAE PAPER 690412] 23 p4200 A69-41640

THRUST VECTOR CONTROL

Nozzle separation for thrust vector control with applications to guidance problems
01 p0161 A69-10412

Flight test evaluation of small one man lunar flying device (POGO), discussing vehicle control, pressure suit factors and piloting differences
[AIAA PAPER 68-240] 02 p0229 A69-12379

Solid propellant rocket motor thrust vector control by swiveling or gimbaled exhaust nozzles or by secondary injection
03 p0495 A69-12892

Electrohydraulic guidance of second stage of Diamant rocket used for orbiting satellites employing thrust vector orientation
04 p0551 A69-15183

Charged liquid droplets generator and acceleration through electric field for thrust vectoring, analyzing beam focusing and deflection
[AIAA PAPER 69-283] 09 p1563 A69-21230

Cesium microthruster system using beam deflection for satellite control, describing ion engine subsystem and control logic/power conditioner subsystem
[AIAA PAPER 69-292] 09 p1569 A69-21875

Thrust vectoring system using accelerator displacement to reduce alignment errors in multiparticle electron bombardment ion engines
[AIAA PAPER 68-543] 09 p1570 A69-21985

Fluidic secondary injection thrust vector control systems for solid propellant and hydrogen-oxygen rocket engines
10 p1753 A69-23561

Flow field structure involving supersonic secondary jet interactions and separated regions in thrust vector control system
11 p1944 A69-25594

Variable bypass ratio lift/thrust engine arrangement in relation to safety and economic requirements, using scale model of V/STOL
15 p2672 A69-31542

Directional thrust control for solid propellant rockets, describing swinging, bent rotating nozzles and secondary injection
17 p3019 A69-33332

Thrust vector control by secondary gas injection for predicting lateral thrust performance, applying method to rocket engines, secondary gas generator and injector configuration
17 p3019 A69-33333

Mission and planetary vehicles characteristics affecting design of solid propellant motors and thrust vector control systems in planetary orbiters and landers
[AIAA PAPER 68-815] 21 p3819 A69-39031

Digital autopilots for Apollo CSM and CSM/LM vehicles thrust vector control, describing modifications of onboard computers and programs
[AIAA PAPER 69-847] 21 p3762 A69-39377

Test stand for measurement of forces and moments from thrust vector controlled rocket, analyzing dynamic characteristics of hydrostatic supports
21 p3691 A69-39631

Satellite maneuver for changing plane of circular orbit to pass through given point, determining on-off engine switching and thrust vector control
21 p3765 A69-39640

Black Arrow third stage velocity increment vector accuracy, considering attitude errors due to spin-up and spring separation systems, separated stages interactions, light-up impulses, etc
23 p4209 A69-41301

THRUST-WEIGHT RATIO

Unannounced propellant weight and thrust of Soviet Luna spacecraft based on Luna 12 lunar orbit injection maneuver
08 p1409 A69-19969

Propulsion optimization for various vehicles, considering power plant weight, specific fuel consumption, power and thrust ratios, etc
11 p1941 A69-24462

THRUSTORS

U ROCKET ENGINES

THULIUM ISOTOPES

Aircraft tire wear determination by measuring intensity of radiation originating from point source within thread, using thulium 170 isotope
07 p1143 A69-19703

THUNDERSTORMS

Lightning strikes to aircraft, discussing corona discharge, electric fields and meteorological measurements during thunderstorm in cumulonimbus
03 p0458 A69-13031

Propagation of long electromagnetic waves in ionosphere and exosphere, discussing thunderstorm noise spectrum
03 p0396 A69-13702

Thunderstorm thermal noise emission determined by radiometer and steerable parabolic antenna in preparing water content contours along radio rays
12 p2127 A69-27002

Atmospheric turbulence in cloudless region above thunderstorms and relation between turbulence and radar pictures of storms
15 p2649 A69-31211

Atmospheric ozone production by silent discharges near ground level during first stage of storm cell development
16 p2785 A69-32623

Thunderstorm probabilities at Cape Kennedy, giving data on frequency, duration, multiple occurrence, nonoccurrence, runs and conditional probabilities
18 p3167 A69-35100

Negative charge distribution in thunderstorm clouds related to direction of storm movement, noting vertical column
20 p3572 A69-37908

Cloud velocity computations from ATS 1 and 3 satellites spin-scan photographs for prediction of neph systems motion and thunderstorms
21 p3757 A69-38370

Thunderstorm turbulence relationship to weather radar echoes from storm penetrations in Oklahoma by instrumented aircraft
24 p4347 A69-43720

THYRATRONS
S band thyatron waveguide switch as pretriggered megawatt balanced duplexer 01 p0048 A69-11035
Secondary emission and hollow cathode effects in low pressure hot cathode thyatron filled with hydrogen and with shield surrounded thermionic cathode 06 p0896 A69-17475
High temperature and power gas diodes and thyratrons for nuclear electrical space power systems 11 p1847 A69-24744

THYRISTORS
Output pulse parameters of short pulse thyristor generator as function of time constant, considering rise time of switch-on process 11 p1846 A69-24615
Power supply circuits in spacecraft, DC voltage control systems, transistor and thyristor regulators and modulators, etc 17 p2937 A69-33582

THYROID GLAND
Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats 05 p0709 A69-16517
Resting EEG and parieto-occipital response changes evoked by slowly repeated flashes in case of severe hypothyroidism secondary to panhypopituitarism 07 p1064 A69-18634
Hibernation seasonality, protein synthesis during periodic awakenings and importance of awakenings to maintenance and evolution of thyroid activity 10 p1642 A69-23120
Fluorides or AMOX increased concentrations effect on thyroid growth rate, uptake and adrenal weight in rats 14 p2406 A69-29291
Thyroid gland role in resistance and myoglobin content of skeletal muscles of flat land and high altitude acclimatized white rats 18 p3096 A69-34736

TIDAL OSCILLATION
U TIDES

TIDES
NT ATMOSPHERIC TIDES
NT LUNAR TIDES
Commensurability among pairs of mean motions of natural satellites of major planets and hypothesis of tidal evolution of satellite systems 07 p1223 A69-19638
Plumb line fluctuations /M sub 2 tide, 1961/ at 135 degree azimuth by Voit method, discussing residual ellipse for Borowiec 08 p1306 A69-19824
Earth and planets shallow seas tidal dissipation reflected in Q values, noting larger planet pressure effect 08 p1393 A69-20581
Neutral hydrogen asymmetry in Galaxy M101 as evidence for tidal effects due to nearby companions, noting hydrogen emission spectra 08 p1394 A69-20625
Conversion of Woolard theory coefficients of tidal irregularity of earth rotation to new system of constants 09 p1484 A69-21383
Oscillation cycle of atmospheric circulation, analyzing solar activity effects on lunar and solar semidiurnal tides and transition from zonal to meridional circulation 12 p2070 A69-26692
Sea tides and ionospheric effects on lunar variation of geomagnetic field vertical component 12 p2161 A69-26957
Sand ridge origin and dynamical setting, discussing morphology-tidal current system equilibrium indicated by theory and field measurements 15 p2596 A69-30443
Semidiurnal oscillation in thermalgeostrophic atmosphere examined using atmospheric model for tidal oscillations response study 17 p2959 A69-33148
Conversion of Woolard theory coefficients of tidal irregularity of earth rotation to new system of constants 18 p3127 A69-34771
Catastrophic and noncatastrophic alternatives for earth capture of moon, discussing tidal action and spin-orbit resonance 18 p3198 A69-34823
Book on gravimetry covering gravity measurement on land and in ocean, gravity anomalies, isostasy, geodetic applications, Eotvosian measurements and terrestrial tides 21 p3715 A69-39000

Resonant spin and anomalous rotation of Mercury, analyzing influence of tidal degradation and permanent deformation of planet 21 p3814 A69-39568
Moments of inertia and gravity field of moon, noting application to earth tides 22 p4030 A69-40902
Eulerian equations for precession and nutation of self gravitating fluid globes of arbitrary structures in inertial coordinates, discussing coplanar case, tidal breathing, etc 22 p4030 A69-40904

TIG WELDING
U GAS TUNGSTEN ARC WELDING

TIGHTNESS
Adhesive pressure welded joints tightness and fabrication stability analyzed on duraluminum sheet samples 17 p2978 A69-32949

TILT
U ATTITUDE [INCLINATION]

TILT WING AIRCRAFT
NT CL-84 AIRCRAFT
NT VZ-2 AIRCRAFT
NT XC-142 AIRCRAFT
Technological evolution of turboprop propeller powered tilt wing V/STOL aircraft, discussing XC-142A, CL-84 and VZ-2 aircraft 05 p0701 A69-15564
Future development in rotorcraft, discussing autogyros, helicopters, tilt rotor and wing aircraft 05 p0702 A69-16392
Tilt wing executive transport aircraft designed by postgraduates at College of Aeronautics of UK, discussing costs, construction and marketability 11 p1821 A69-24321
CX-84 two propeller tilt wing deflected slipstream V/STOL Military Evaluation Program related to support of surface forces 17 p2900 A69-33526
Tilt wing V/STOL aircraft spray circulation characteristics in overwater operation, examining forces, moments and generated environmental conditions [AIAA PAPER 69-791] 19 p3243 A69-35638

TILTED PROPELLERS
Vertical takeoff aircraft propeller/rotor design and performance prediction, discussing vortex model, wake contraction, blade element aerodynamic properties, etc [AHS PAPER 325] 17 p2894 A69-33534
Folding propotor V/STOL aircraft characteristics, showing configuration effects on performance and optimization of rotor, wing and propulsion systems [AHS PAPER 302] 17 p2901 A69-33547
Tilt propotor composite aircraft design, discussing performance and mission potential [AHS PAPER 202] 20 p3463 A69-37805

TILTING
U ATTITUDE [INCLINATION]

TILTING ROTORS
Future development in rotorcraft, discussing autogyros, helicopters, tilt rotor and wing aircraft 05 p0702 A69-16392

TIME
NT BURNING TIME
NT EPHEMERIS TIME
NT FLIGHT TIME
NT REACTION TIME
NT RELAXATION TIME
NT RESPONSE TIME [COMPUTERS]
NT TESTING TIME
NT TRANSIT TIME
NT UNIVERSAL TIME
Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error 01 p0031 A69-10785
Auroral observations from constant local time westward flights of jet plane 02 p0245 A69-12738
Stability and instability conditions derived for undisturbed motion of system over finite period of time 08 p1351 A69-20321
Minimum measurement time of dynamic transmission coefficient of system by FM method, calculating error 10 p1653 A69-23114
Stability and instability conditions derived for undisturbed motion of system over finite period of time 17 p3005 A69-33314

TIME CONSTANT
Computer analysis of linear active nontime varying circuits by two graph topological approach based on Binet-Cauchy theorem 01 p0037 A69-11349

Graphical method for determining rise time of planar transistors with constant collector space-charge capacitance 01 p0049 A69-11362
Characteristic time on motion of magnetic lines of force in medium with Hall effect 02 p0290 A69-12399
Thermal time constant in Si diffused transistors decreases with increased neutron dosage 06 p0975 A69-16873
Sixth order correlations of laser beam fluctuations near threshold from delayed coincidence measurements with three photodetectors, noting time constants 07 p1144 A69-18252
Monolithic planar process to fabricate DC coupled amplifiers having less than nanosecond risetime 07 p1103 A69-18878
Feedback amplifier with transfer function poles on parabola, discussing small rise time with small overshoot combined in transient response 08 p1282 A69-20111
Time response of second order nonlinear overdamped systems calculated by Krylov-Bogoliubov method of variation of parameters 08 p1297 A69-20356
Response optimization of feedback control systems with reference to single settlement time-constant ideal determined for error evaluation 08 p1298 A69-20855
Transistor large signal saturation time constant dependence on injection ratio, noting nonlinear response and saturation transistor switch storage time 09 p1464 A69-22117
RC circuit with variable time constant using variable resistor 10 p1667 A69-24046
Output pulse parameters of short pulse thyristor generator as function of time constant, considering rise time of switch-on process 11 p1846 A69-24615
Two rotor gyrocompass oscillations stability during finite time interval, deriving differential equation by suitable quadratic functions 11 p1886 A69-25089
Practical time resolution of streak camera, discussing streak camera transfer function and measurement of resolution with pulsed laser diode emission 12 p2084 A69-26152
Asymptotically stable discrete time closed loop linear systems synthesis, presenting feedback matrix as illustration 13 p2287 A69-27238
Phase distortion, conversion of delay coefficients into channel noise and determination of waveguide delay coefficients for FM satellite communication systems [IEEE PAPER 68-TP-382-COM] 13 p2222 A69-28153
Solar quiet day geomagnetic variations harmonic analysis with respect to time intervals centered around noon, defining parameters responsible for modulated Sq 16 p2781 A69-32452
Shock waves propagation in inhomogeneous gases, considering time development and energy flux during point explosion in plane layers by quasi-stationary approximation 17 p2952 A69-33383
Electromagnetic waves radiation in general time invariant linear media with general boundary conditions, using Green function 17 p2924 A69-33834
Temperature response of semiconductor thermistors as temperature sensing element, determining time constant from dimensions and experimental data 21 p3723 A69-38888
State variable feedback design of m-input, m-output time invariant linear systems requiring noninteraction and exact transfer functions, considering coupled core nuclear reactor 24 p4294 A69-43315

TIME DEPENDENCE
Approximate boundary controllability for heat equation by considering temperature variation with time 01 p0173 A69-10008
Time dependent interaction of hot gas bubble with chemically reactive liquid stream, detailing thermal boundary layer theory 01 p0058 A69-10162
Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures 01 p0085 A69-10210

Couette flow stability in axial magnetic field, considering time bounded perturbation energy during increasing angular velocity in radial direction
01 p0059 A69-10233

Nonlinear time dependent parameters systems, analyzing governing differential equations in terms of elliptic functions
01 p0050 A69-10237

Linear stability of steady and time dependent plane Poiseuille flow
01 p0175 A69-10333

LF radiation intensity oscillations of pulsed HF discharge in helium plasma, showing time dependence
01 p0128 A69-10347

Chemical composition effect on duraluminum supersaturated solid solution stability, presenting time vs temperature C curves of isothermal decomposition
01 p0094 A69-10396

Grain boundary gas bubbles growth in chemically vapor deposited tungsten as function of annealing time, temperature and fluorine content
01 p0097 A69-10646

Current sheath surrounding exploding copper wire in vacuum, plotting current distribution as function of time and radius
01 p0119 A69-10669

Time resolved spectroscopy of exploding wire plasmas in visible spectrum of various elements, determining plasma characteristics
01 p0119 A69-10671

Finite f function computation by d/r circuit, discussing computation time
01 p0105 A69-10734

Determination of plant differential equation from time characteristics
01 p0053 A69-10804

Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
01 p0031 A69-10879

Time and latitude variations of blanketing sporadic E of different intensities
01 p0070 A69-11159

Late type variable stars time dependent photometry and polarimetry in blue and violet, noting correlation for stellar brightness and degree of polarization
01 p0158 A69-11326

Time history of unsteady heat transfer in laminar boundary layer over semiinfinite flat plate due to step change in wall temperature or wall flow
01 p0177 A69-11401

Absolute input-output stability of time varying nonlinear feedback system established by frequency domain test similar to Popov test
01 p0054 A69-11414

Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser
02 p0255 A69-11611

Solar and galactic cosmic rays measurement data to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
02 p0306 A69-11658

Soviet book on spectral, spatial and time characteristics of lasers covering luminescence and resonator theories, electromagnetic field structure and radiation dispersion
02 p0255 A69-11800

Generalized unsteady temperature fields and stresses in crystalline plates using Fourier and Laplace transforms
02 p0340 A69-12044

Time dependent viscoelastic stress distribution in two phase composite material, using plane stress model for approximation
02 p0348 A69-12540

Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals
02 p0257 A69-12560

Frequency and time dependent gains of dye solution lasers for pumping by lasers and flashlamps
02 p0257 A69-12616

Step voltage transient behavior of electron-hole plasma injected into Ge, noting current time dependence
02 p0301 A69-12651

Time dependent functions integration by glow discharge tube and oscillator, discussing device for voltage measurement and applications in meteorology and geophysics
02 p0251 A69-12773

Three dimensional unsteady heat conduction and temperature distributions in finite hollow circular

cylinder under time dependent boundary conditions of second kind
03 p0530 A69-12861

Photoviscoelastic stress analysis to predict time dependent stress redistributions in polyphase system with viscoelastic binder under external loading conditions
03 p0524 A69-13061

Diurnal, magnetic and solar cycle dependences of auroral emission variations and auroral occurrence
03 p0420 A69-13325

Green functions associated with electromagnetic radiation in moving medium, finding time dependent and harmonic Green functions
03 p0466 A69-13352

Solar flares effect on ozoneosphere, calculating time necessary for solar radiation to increase ozone concentration by 50 percent
03 p0424 A69-13542

Time dependence of relation between sunspot number and ionospheric index IF 2, noting hysteresis characteristic and changes for different solar cycles
03 p0424 A69-13632

Linearized time dependent equation for photovoltaic distribution in nonuniformly illuminated p-n junction
03 p0486 A69-13636

Galvanostatic transients of iron passive in 2N sulfuric acid, noting space charge effects and zero field current variation
[ECS PAPER 84] 03 p0382 A69-13858

Time dependent variations in magnetic fields of active sunspot clusters in photosphere observed by magnetograph
04 p0651 A69-14369

Time independent flow of highly rarefied neutral gas past finite cone at zero angle of attack with freestream, noting molecular distribution function
04 p0541 A69-14712

Perfect magnetofluid model to study laminar flow stability along magnetic field, considering time dependences and rigid and free boundaries
04 p0637 A69-15045

Book on thermal time independent plastic and time dependent creep strains in structures through analogy permitting inelastic structures analysis
04 p0681 A69-15200

Charged particle motion in constant direction magnetic field varying exponentially with time, discussing electric field effect on particle motion
05 p0801 A69-15744

Flow and heat transfer on nonNewtonian fluid about disk rotating with time dependent velocity, using Runge-Kutta-Gill technique for numerical integration
05 p0745 A69-15793

Constitutive equation for viscoelastic materials generalized, assuming instantaneous part of deformation to be nonlinear function of time dependent stress state
05 p0835 A69-15868

Spectral output time variation of GaAs diode laser operating in Fabry-Perot modes
05 p0772 A69-15961

Time dependent two dimensional incompressible laminar boundary layers analysis, discussing application to transient flow over semiinfinite flat plate
[ASME PAPER 68-FE-10] 05 p0748 A69-16076

Spatial and temporal conjugacy of visual auroras during magnetically quiet periods
05 p0753 A69-16247

Stability analysis of nonlinear and time varying discrete feedback systems
05 p0740 A69-16600

Modulation of galactic cosmic rays due to electromagnetic conditions of interplanetary space, considering time variations and Parkers model
06 p0989 A69-17287

X ray sources intensity and spectrum variation with time, describing proposed balloon experiments with equatorial launching for performing measurements
06 p0992 A69-17312

Settling time estimation method for class of time varying feedback control systems of linear, nonlinear and multivariable natures
06 p0902 A69-17399

Optimality criterion and equations of motion determined for fixed time impulsive trajectory to minimize total characteristic velocity
06 p1007 A69-17575

Plasma impedance effect on time variation of inverse pinch
06 p0967 A69-17716

Image averaging time effects on modulation transfer function /MTF/ of system comprising telescope objec-

tive and horizontal propagation path in turbulent atmosphere
06 p0890 A69-17800

Time dependent emission spectra from flashlamp pumped organic dye lasers recorded with image converter, comparing dyes characteristics
06 p0936 A69-17900

Averaging procedures to represent highly time variable actual hydrometeorological fields by less variable equivalent fields
06 p0952 A69-17989

Nonadiabatic reacting homogeneous system undergoing density changes, predicting chemical reaction rates and intermediate combustion products from chain reaction kinetics
[AIAA PAPER 69-87] 06 p1036 A69-18005

Transient development of reacting boundary layer near stagnation point of vaporizing drop in gas stream
[AIAA PAPER 69-174] 06 p0912 A69-18056

Time dependent model of photochemical, advective and turbulent effects on meridional ozone distribution
07 p1122 A69-18254

Statistical frequency analysis of power spectrum of geomagnetic pulsations, discussing time and latitude dependence
07 p1122 A69-18297

Analytical model for thrust-time curve during ignition transient of solid propellant rocket engines, discussing flame spreading
[WSCI PAPER 68-33] 07 p1203 A69-18365

Time stabilization method for lasing in electro-optically Q switched ruby laser with saturable absorber in cavity
07 p1147 A69-18531

Simultaneous solution of time-dependent momentum and continuity equations for ions and neutral air in midlatitude F 2 region conditions
07 p1123 A69-18818

Time and latitude variations of blanketing sporadic E using wind shear theory, predicting ionization layer formation in ionospheric E layer
07 p1125 A69-18840

Conducting gas acceleration in strong unsteady electromagnetic field, discussing channel flow in relation to time and pressure gradient
07 p1191 A69-18988

Time resolved spectrum of high current pulsed argon laser discharge, noting primary laser output and afterglow
[IEEE PAPER L-12] 07 p1152 A69-19068

Nitrogen ion number density time dependence by mass spectrometric probing of decaying nitrogen plasmas, noting molecular ion production by colliding metastable nitrogen molecules
07 p1184 A69-19141

Particle dynamics measured by ATS satellite synchronous orbit, discussing flux time variations during geomagnetic disturbances
07 p1209 A69-19371

Arrival time distribution and energy content of extensive air shower at large core distances, discussing photon energy spectra and Monte Carlo calculation
07 p1186 A69-19410

Secondary acquisition systems analysis by semiMarkov process model, defining minimum average acquisition time
08 p1270 A69-19852

Kinetic theory for plasma, considering electric field fluctuations time evolution simultaneously with one particle distribution time evolution and Landau damping in wave equation
08 p1360 A69-19991

Time-averaged value of forces of electromagnetic wave falling from vacuum and acting on magnetoactive plasma
08 p1361 A69-20200

Time dependent velocity distribution functions for carriers calculated in weakly ionized plasma in external electric field
08 p1362 A69-20265

Ion number densities time dependence in pink afterglow of N measured with quadrupole mass spectrometer
08 p1308 A69-20292

Spectral intensities and time variations of solar X ray bursts, discussing model for high energy flare plasma and resulting X ray flare
08 p1379 A69-20532

Time dependent behavior of atomic light emitted from pulsed helium afterglow, noting absorption measurements and spectrometric system
08 p1356 A69-20743

Time harmonic, spherical harmonic and power series expansion of Boltzmann equation
08 p1353 A69-20793

- Trapped particles drift velocity in time dependent meridional magnetic and perpendicular electric field
08 p1368 A69-20809
- Computerized simulation of time dependent reliability of multicomponent system based on statistical model of component breakdown
08 p1277 A69-21100
- Reliability distribution parameters for electronic components, determining time and tolerance dependence of reliability
08 p1293 A69-21114
- Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
08 p1374 A69-21187
- Delta functions spectrum in reciprocal time domain for LC and RC structures due to impulse response in distributed parameters
09 p1471 A69-21327
- Work function change of tungsten single crystal /100/ surface measured as time function during surface molecular gas adsorption
09 p1521 A69-21338
- Ultrashort light pulses problems in measurements of time characteristics and instantaneous power of laser radiation
09 p1516 A69-21575
- Decoupling by state variable feedback and determination of inverse extended to linear time varying multivariable system
09 p1472 A69-21680
- Picosecond structure of low power laser signals using calcite beam splitter and potassium diphosphate second harmonic generator
09 p1516 A69-21742
- Time average holography for analysis of vibrations, overcoming fringe peak decrease with large amplitude and loss of phase information
09 p1495 A69-21749
- Time dependent procedure for axisymmetric transonic nozzle flows, programming governing equations for high speed computer
09 p1431 A69-21974
- Time dependent plasma density variations studies by microwave interferometer having reflector for modulated or nonmodulated microwaves
09 p1496 A69-22030
- Eddington approximation to radiative transfer equation extended to time dependent multifrequency problems
09 p1541 A69-22254
- Transient behavior of DC measuring amplifiers with time variable feedback, using matrix method and Laplace transform
09 p1467 A69-22560
- Nonlinear control plants model with pure delay effect identified by harmonic balance method
09 p1475 A69-22669
- Geometrical stability criterion similar to Popov criterion for single loop time varying nonlinear control systems analysis
09 p1476 A69-22784
- Solar cosmic rays proton intensity time variations and diffusion coefficient obtained by satellites, balloons and ground stations observations
10 p1755 A69-22812
- Lagrangian evolution criterion for electromagnetic conducting fluid and MHD flow, defining generalized fluxes and forces
10 p1727 A69-22904
- Multidimensional theory of characteristics found applicable to calculating three dimensional time dependent gas flows
10 p1632 A69-22913
- Oxidation effects on creep and fatigue properties of metals noting time and temperature roles
10 p1708 A69-22998
- Control operation time found dependent on gloves, physical characteristics of control and type of required operation
10 p1648 A69-23180
- Glove characteristics effects on manipulability, finding operation time differences between gloved and barehanded operation dependent on type of required control operation
10 p1648 A69-23181
- Surface recombination efficiencies on metals measured as function of exposure time in steady Oseen flows, providing step-function increase in oxygen atom concentration
10 p1726 A69-23526
- Peaked electron emission from nickel surface with large work function under laser radiation, discussing emission pulses, electron currents and surface temperature time variations
10 p1703 A69-23572
- Time dependence criterion in dynamic fracture determined by spall stress relation to stress pulse duration during plate impact
10 p1803 A69-24032
- Elliptic integrals to determine orbital elements time dependence in three body problem, estimating satellite lifetime
10 p1791 A69-24196
- Universe origin, discussing big bang theory, effects of expansion time and temperature on elementary particles, RF quanta, etc
11 p1953 A69-24352
- Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
11 p1954 A69-24382
- Energy theorem for time dependent materials, deriving convexity conditions for minimum work and maximum complementary work functions
11 p1969 A69-24412
- Time splitting of solar radio bursts observed at Oslo Solar Observatory with high resolution radio spectrographs
11 p1946 A69-24590
- Time correlation of photons emitted by krypton gas discharge tube and helium-neon multimode laser
11 p1895 A69-24718
- Time scales for creep stress redistribution in structures subject to step loading
11 p1980 A69-24879
- Upper atmosphere response to time dependent heating based on approximate analytic solutions of heat conduction equation
11 p1878 A69-25151
- Time and altitude distribution of wind zonal components over Fernando Noronha Island off Brazilian coast, discussing tropospheric pattern
11 p1913 A69-25204
- Book on Wankel RC engine design and performance covering sealing, timing, life, lubrication, etc
11 p1942 A69-25237
- Aircraft vortex wake development prediction for turbulent flow noting vortex size, strength and peak tangential velocity
11 p1819 A69-25377
- Stability of linear time-varying systems via examples, comparing various techniques
11 p1861 A69-25452
- Fading velocity short period characteristics and duration and depth of field strength variations over transhorizon path compared with corresponding atmospheric parameters
12 p2028 A69-25897
- Cosmic radiation origin in terms of sudden injection of particles in time, momentum and space, considering statistical fluctuations role in observed spectrum
12 p2148 A69-26206
- Nanosecond time variations in current-voltage characteristics of gas discharge in air, taking into account discharge circuit resistance and discharge space capacitance
12 p2137 A69-26534
- Dynamic energy balance in positive column of electric arc, integrating expression to determine temperature time dependence
12 p2137 A69-26535
- Finsler geometric apparatus applied to electromagnetic wave propagation in media having refractive index varying with position and time, calculating errors
12 p2031 A69-26642
- Stationary inventory problems analysis, discussing inventory policy, recursive and or limiting procedures, stationary point processes, stock delivery time instants, etc
12 p2192 A69-26750
- Time and temperature dependence of plastic properties of fiber reinforced phenolic heat shield materials
12 p2119 A69-26825
- Temporal variation of metal content in galaxy, discussing stellar radiation pressure effects on heavy element abundance of interstellar gas
12 p2160 A69-26854
- Hologram recording by offsetting reference beam temporal frequency instead of using reference beam spatial offset
13 p2258 A69-27201
- Plane wave solution for wave propagation in inhomogeneous anisotropic time-varying media
13 p2219 A69-27397
- Temporal correlations in light field from laser at threshold of oscillation, measuring He-Ne CW gas laser by photoelectron count
13 p2271 A69-27399
- Analytical expressions for nonlinear partial differential equation of heat conduction in solids, giving temperature as function of time and location
13 p2372 A69-27434
- Numerical methods for time integrating first order differential equations, emphasizing atmospheric oscillations in baroclinic model, evaluating errors
13 p2290 A69-27636
- Venusian water vapor spectroscopic data indicating longitudinal and time dependent variations in abundance
13 p2345 A69-27650
- Lunar surface spectral reflectivity variations with time, noting phase angle effects on color contrast
13 p2349 A69-27819
- Time correlation functions for wind vectors and components at various altitudes over Moscow in winter and summer
13 p2294 A69-27856
- Transport equation numerical solution for unsteady radiation field by straight lines method, allowing for scattering indicatrix forms with passage of time
13 p2350 A69-27858
- Polarization stabilization times dependence on risetime of external field pulse leading edge for semiconductor crystal, determining field concentration
13 p2317 A69-27880
- Time dependences of retardation effect, reversible magnetic permeability and magnetic viscosity during pulse magnetization of ferrite cores
13 p2319 A69-27993
- FM laser pulse formation time characteristics noting modulated resonator losses
13 p2272 A69-28114
- Stratified rotating fluid time dependent motion characterized by stability frequency ratio and Coriolis parameter within quasi-geostrophic approximation
13 p2248 A69-28171
- Minimum weight design of structures excited to harmonic vibrations by given single load, with intensity dependent on time
13 p2369 A69-28350
- Time of heating effect on thermal polymerization of L-lysine free base
13 p2218 A69-28439
- Solar and galactic cosmic rays measurement data used to investigate variation in time of relations between cosmic rays modulation amplitude and solar activity variations
13 p2333 A69-28689
- Reliability analysis of technological systems, determining characteristics as distribution function of time to specified number of failures
14 p2453 A69-28747
- Time dependent convection electric fields as agents for diffusing trapped magnetospheric radiation inward toward earth, discussing one dimensional diffusion equation
14 p2510 A69-28936
- Electron concentration enhancement in upper atmosphere at polar latitudes, noting three independent zones and relation to magnetic local time
14 p2510 A69-28938
- Vibrations of thick walled shallow circular cylinder with thickness change in time, applying dynamic elasticity and Volterra equations
14 p2533 A69-28985
- Time dependent magnetic field induced inside rotating spherical conductor by external sources applied to moon
14 p2518 A69-29121
- Frequency time dispersion of storm sudden commencement micropulsations, noting polarization effects
14 p2440 A69-29129
- Noise duration and spectral complexity effect on subjective rating of disturbance level
14 p2408 A69-29152
- Weighting factors relation in optimal systems integral squared error /ISE/ cost functional, characteristic coefficients and time response performance measures
14 p2534 A69-29317
- Time dependent evolution of probability pressure distribution maximum obtained from Liouville equation
14 p2472 A69-29406
- Cometary tail diffusion model based on luminous particle number decrease with time and particle accelerated motion and diffusion in space
14 p2523 A69-29705
- Time spectra of wind velocity, temperature, pressure and turbulent heat transfer and momentum in synoptic region
14 p2476 A69-29823

- Plasma energy and energy replacement time dependent on discharge pulse shape and magnitude
14 p2499 A69-29848
- Tide dependent variations of critical frequencies of ionospheric layers minimal heights and maximum height of F 2 layer reflection
14 p2444 A69-29871
- Time and temperature effects on corrosion and structure of Hastelloy alloy C-276
14 p2466 A69-29930
- Discontinuities in interplanetary magnetic field observation presented on mesoscale from Pioneer 6 observation, emphasizing distribution in time
14 p2528 A69-29970
- Multivariable linear time-variant systems noninteracting control problem, discussing realization by state variable feedback
15 p2582 A69-30024
- Wiener-Hermite expansion extended to include time dependent ideal random functions, discussing application to shear flow turbulence
15 p2644 A69-30201
- Short laser radiation pulses spectral characteristics determination with device converting laser emission frequency by nonlinear electro-optical crystals
15 p2633 A69-30257
- Finite integral transform determination for solving circular plates forced vibrations with time dependent conditions
15 p2704 A69-30306
- Design and efficiency for signal-time compressors of spectral analyzers using electron beam tubes with charge storage
15 p2576 A69-30351
- Time dependence of maximum structural response of single degree of freedom mechanical system under random loading
15 p2705 A69-30365
- Periodic radial heat flux in infinite cylinder with varying heat sources, assuming time variable heat exchange on surface
15 p2717 A69-30575
- Ruby laser lasing modes spectral time dependence attributed to population inversion inertia responsible for mode competition
15 p2633 A69-30725
- Lasing kinetics, emission spectrum and directivity of ruby laser with spatially homogeneous population inversion
15 p2634 A69-30729
- Stellar energy diffusion processes studied to determine energy transfer time scale between stellar layers
15 p2692 A69-30767
- Coupled kinetic equations for inhomogeneous systems treated as simultaneous equations in time, obtaining solutions by successive approximation
15 p2660 A69-30913
- Long life repairable equipment reliability and mean time between failure with limited life components and material in normal life maintenance environment
15 p2581 A69-31134
- Fiberglass reinforced plastic tensile strength dependence on vibration time and temperature and vibrational effect on modulus of elasticity
15 p2643 A69-31203
- Time variation of altitude distribution of cosmic dust layer in upper atmosphere by Pandora II collector using inflight shadowing technique
15 p2698 A69-31353
- Balmer alpha emission for abundance and distribution of hydrogen around earth, relating temporal variations to azimuth
15 p2700 A69-31437
- OgaAs platelet laser modes time behavior, discussing control by electron-hole pair density
16 p2796 A69-31704
- Q switched laser produced blast waves in low pressure Ar, discussing gas density and time dependence roles
16 p2796 A69-31705
- Thermal stability of Hastelloy Alloy C-276 determined from time and temperature tests for corrosion and grain boundary precipitation
16 p2799 A69-31719
- Linear elastic columns dynamic stability under time dependent axial load, investigating almost-sure asymptotic stability
16 p2872 A69-31911
- Parametric interaction of electromagnetic field with spherical cavity having time variable radius, considering wave diffraction and TM oscillations
16 p2751 A69-32029
- Time, temperature and transformation curves for Ti alloy by dilatometry, hardness measurements, X rays and micrography, discussing martensite and beta-alpha transformations
16 p2802 A69-32180
- Wavelength dependence of linear polarization of sunlight scattered by Venus, noting temporal variations in UV
16 p2860 A69-32236
- Ground based solar proton monitoring, considering particle intensities and radiation dose rates from riometer absorption as function of time
16 p2850 A69-32321
- DQ Herculis photometric measurements synchronized with white dwarf component pulsation, discussing equipment, eclipse curve and binary period dependence on time
16 p2862 A69-32373
- Time dependent radiation diffusion in inhomogeneous stationary medium applied to diffuse reflection of light
16 p2813 A69-32591
- Time behavior of output intensity and polarization of single cavity mode internal mirror Zeeman laser in axial magnetic field
16 p2798 A69-32607
- Spatial and temporal dependence of trapped particle energy spectra on basis of bimodal diffusion
16 p2852 A69-32619
- Transient stress waves due to inputs of various types and time dependence in plates and revolving shells, discussing applications of elasticity theory analysis methods
16 p2876 A69-32785
- Device quantity failure kinetics or time dependence effect on time-to-failure distribution resulting from given device degradation coefficients distribution
17 p2936 A69-32895
- Diurnal periodicity of physiological functions of flight crews flying through several time zones found to correspond to time zone of permanent residence
17 p2906 A69-32935
- Frequency and time dependent gain characteristics of dye lasers, using computer program for rate equations for populations
17 p2980 A69-33025
- Q switching of CW 337 mu maser, gain factor measurements for pulse discharges and data on saturation and time dependence
17 p2981 A69-33088
- Mathematical model for determining time dependent terrain surface temperatures and radiances, considering radiative transfer convection, evaporation, ground vegetation temperature, etc
17 p3071 A69-33263
- Time dependent analysis for quasi one dimensional, vibrational and chemical nonequilibrium nozzle flows approaching steady state solution by finite difference technique
17 p2893 A69-33491
- Buckling time of oval ring under unsteady creep based on strain hardening theory
17 p3062 A69-33716
- Electromagnetic transient wave propagation and reflection in lossless isotropic stratified ionized media, discussing time variations of fields due to incident plane unit step wave
17 p2924 A69-33839
- Shifted pulse multichannel generator producing pulses and pulse sequences time delayed with respect to reference channel
17 p2938 A69-33899
- Single radio pulse reception time relations by panoramic receiver, considering short wideband and long narrowband pulses
17 p2931 A69-33910
- Time distribution of commencements of substantial intensity increases of geomagnetic and aeromagnetic phenomena
17 p2964 A69-33958
- Geomagnetic disturbances intensity spatiotemporal distribution at Northern Hemisphere high latitudes during IGY and IQSY
17 p2965 A69-33966
- Time dependent diffuse reflections related to solar activity, showing diffusion intensity variations with sporadic E layer height and electron concentration
17 p2968 A69-33997
- Deterministic and statistical prediction techniques for aircraft carrier motions at sea for application to aircraft landing operations
17 p2902 A69-34014
- Geomagnetic crotchets time relations to solar X rays, radio bursts and flares
17 p3025 A69-34227
- Anomaly of F region electron content vs polar geographic latitude and local mean time
18 p3126 A69-34252
- Short term frequency stability measured for Doppler radar and space tracking communication applications reviewing FM theory for spectral purity relationship
18 p3100 A69-34277
- Relationship between human response to noise as physical parameter, discussing controlled laboratory investigation to determine duration effect on annoyance
18 p3097 A69-34322
- Automated crop surveys from integrating observations made at different times /time dimensioning/ during growing season, noting earth resources satellite role
18 p3126 A69-34333
- Cylindrical and conical panels dynamic responses to time varying load distributions, using trigonometric series coupled with finite difference methods
[ASME PAPER 69-APM-22] 18 p3214 A69-34399
- Variable CoD minus 35 degrees 4257 noting primary period of 502 days superimposed on secondary beat period of 3000 days
18 p3195 A69-34433
- Mathematical model for operational readiness of dormant systems /periodically checked missiles/ discussing time distribution to failure detection, occurrence and between tests
18 p3142 A69-34477
- Human performance reliability, testing mathematical model application and implications of time to first error concept by vigilance task
18 p3097 A69-34478
- Hazard plot analysis of incomplete data involving times to failure for failed units and running times on unfailed units
18 p3147 A69-34515
- Optimal control theory applications for controllers: not characterized by bang bang time responses using Pontryagin maximum principle
18 p3090 A69-34681
- Algorithm for minimizing expected value of quadratic performance index in closed loop optimal control of linear time varying systems
18 p3111 A69-34688
- Graphic representation of time dependence of subsatellite points and orbital azimuths for relating satellite photographs to locality
18 p3128 A69-34818
- Time variability of horizontal wind as function of time provided by Kolmogoroff structure functions for components of isotropic turbulence
18 p3167 A69-34825
- Navigational equations solution by airborne analog computer techniques, describing electronic, electromechanical, digital reset and mechanical integrations with respect to time
18 p3107 A69-34847
- Algebraic formulation of electromagnetic diffraction, discussing propagation of positive and negative time frequency components by dual operators
18 p3172 A69-35016
- Time dependent recoverable isothermal decrease of photocurrent in CdS crystals in vacuum, noting trap mechanism involving electron redistribution
18 p3183 A69-35156
- Time dependent equations for non-LTE occupation numbers of lower bound levels of hot gas or plasma outer layer atoms and ions
18 p3231 A69-35242
- Parametric and forced oscillations analogy for analyzing dynamic behavior of oscillatory systems with time dependent parameters
18 p3175 A69-35322
- Time dependent collimated light diffuse reflection and transmission by finite inhomogeneous atmosphere using principle of invariance
18 p3132 A69-35343
- Long term creep rupture data based on short term tests in form of Larson-Miller time-temperature curves
18 p3150 A69-35422
- Annealing time effects on creep properties of Ni at various temperatures after work hardening
18 p3159 A69-35443
- Consecutive reaction equations for idealized soil column solved for nitrifying metabolite concentration as functions of time and depth
19 p3264 A69-35600
- System reliability with allowable downtime, calculating probability of on-line units staying operational during mission time using conditional availability
19 p3326 A69-36000

Time-dependent failures of components subjected to fatigue loading analyzed for reliability prediction
19 p3437 A69-36032

Initiation distance and time of detonation with weak ignition sources related to temperature, tube diameter, mixture composition and pressure
19 p3451 A69-36364

Recording instrument paper speed effect on pulse wave measurements precision, discussing multiple observer studies of left ventricular ejection time
19 p3258 A69-36449

InSb instabilities and time dependence of transverse breakdown, performing Hall effect measurements on n-type InSb at 77 K
19 p3389 A69-36546

Autonomous functional differential equations with finite time interval dependent derivatives, resulting in periodicity theorem applicable to difference equations
19 p3361 A69-36600

Townsend discharge formation time determination, taking into account impact ionization in positive ion cloud moving from anode to cathode
19 p3381 A69-36603

Titanium alloys wear and fatigue resistance as functions of time and temperature of nitriding by purified nitrogen
19 p3347 A69-36743

Stochastic motion in linear lattice of coupled harmonic oscillators analyzed by Schroedinger coordinates and Bessel functions for time behavior, energy flow and impurity effect
19 p3374 A69-36752

Spatiotemporal contours of pressure pulses emitted into surrounding fluid by collapsing cavitation bubble, using schlieren-optical observation method, electroacoustical detection device and microphone
19 p3302 A69-36870

Invertibility of linear time invariant dynamical control systems, discussing L-inverses, sequential circuits, inherent integration, reproducibility, pointwise and functional inverses
20 p3509 A69-37138

Finite element discretization technique extended to time dependent processes emphasizing dynamics and heat conduction, discussing applications to aircraft transient response
20 p3575 A69-37204

Red shift-distance relation for galaxies, discussing time dependence
20 p3597 A69-37411

Negative time interval implications for meta particle at superluminal velocity with respect to two reference frames, noting causality paradoxes
20 p3598 A69-37412

Space vehicle space-time position fiducial distribution and future location determinations based on inference theory
20 p3617 A69-37528

Lunar mascons and maria isostasy, discussing time requirements
20 p3604 A69-37564

Ion production rates vertical distribution and temporal changes at midlatitudes during solar activity minimum and maximum above F 2 layer
20 p3525 A69-37656

Inhomogeneities time buildup in lower ionosphere weakly ionized plasma during charged particle concentration perturbations and source temperature variations
20 p3525 A69-37658

Time-space variations in occurrence probability of ionospheric E-2 layer during solar activity maximum and minimum
20 p3527 A69-37672

Multiply censored data plotting on various type hazard papers for engineering information on time to failure distribution
20 p3567 A69-38288

Noctifluent cloud particles nucleation and growth, noting time dependence and water vapor mixing ratio
21 p3702 A69-38346

Computer experiment on 9000 particle plasma to test temporal echo theoretical prediction
21 p3777 A69-38713

Creep measurements in Al alloy during uniaxial tensile stresses between 200-350 C, determining deformation dependence on time and stress
21 p3744 A69-38871

Carbon dioxide laser amplifiers gain saturation time dependence characteristics by theoretical model taking rotational relaxation into account
21 p3736 A69-38941

Spacecraft return probabilities with time constraints and redundant access, using Borel set concept for counting and summing coverage belts
21 p3819 A69-39017

Observation time influence on interferometers resolution limits due to radio wave phase fluctuations
21 p3682 A69-39122

Creep long term deformation characteristics of plate and tube lead alloy model material predicted from short term room temperature creep deformation
21 p3844 A69-39320

Time characteristics and second harmonic of radiation of Nd laser containing lens systems, producing second harmonic in KDP crystal
21 p3740 A69-39544

Upper and lower bounds for growth or decay rate of solutions of parabolic differential equations for indefinitely increasing time
21 p3757 A69-39565

Kinematic and dynamic relations analyzed by vector method for motion time and orbital flight control of point
21 p3818 A69-39820

Stability loss of beams analyzed under compression allowing for various creep conditions in loading and unloading regions, calculating time to failure
22 p4039 A69-39917

Standardizing strain gage with long time stability characteristics, analyzing statistically strain calibration results
22 p3945 A69-40078

Spatiotemporal signal distortions for multiple scattering from unsteady radiant energy transfer equations
22 p3899 A69-40247

Time symmetric electrodynamics for various cosmological models, discussing position and negative space curvature
22 p4022 A69-40469

Time dependent mathematical double acceptor model including heat effects for analyzing Q switching and stimulated emission time delays in pulsed junction lasers
22 p3962 A69-40560

Harmonia and Parthenope /minor planets/ positions, establishing time dependence of relation between image diameter and planet magnitude
22 p4025 A69-40614

Adsorption kinetics in ternary mixture of nitrogen, methane and hydrogen, using concentration-time/breakthrough/ curves measurement on activated coconut shell charcoal [NAS-NRC PAPER H-4]
22 p3981 A69-40629

Sco X-1 X-ray source energy spectrum and time variation from rocket flights in India
22 p4030 A69-40774

Band movement phenomenon model for temporal and spatial interactions
22 p3880 A69-40854

Time dependent differential equation for order parameter in superconductors near critical temperature derived from density matrix equations
22 p3994 A69-41053

Thermal diffusivity measurement by nonsteady state methods, discussing time and temperature variables in heat flow differential equation
23 p4237 A69-41326

Fixed interval human performance control under various histories of conditioning and response cost conditions, considering effects of postreinforcement pauses
23 p4100 A69-41437

Boundary effects on time dependent transport theory based on star product, noting application to transmission line theory and radiative and neutron transfer
23 p4190 A69-41571

Nighttime F region time-altitude variations in aeronomic parameters calculated under conditions close to solar activity maximum
23 p4156 A69-41844

Time dependent natural oscillations of plane open resonators infinite periodic sequence, considering electromagnetic energy transfer into ambient medium
23 p4139 A69-42039

Temporal reference acoustical holography with Sokolov ultrasound camera system using double pulsed ruby or scanning CW laser
23 p4166 A69-42182

IR radiation transmission in pulsed carbon dioxide discharge as function of time, proposing pumping and relaxation mechanism model
23 p4174 A69-42196

Time dependent unsteady flow of incompressible and electrically conducting fluid between two infinite disks rotating in uniform axial magnetic field
23 p4153 A69-42410

Pi 2 micropulsation waveform variation with time from simultaneous observations at low latitude stations, estimating phase velocity of higher frequency component
23 p4161 A69-42440

Nonlinear time varying feedback control system stability applied to damped Mathieu equation
23 p4146 A69-42473

Time and plasticity effects on fracture determining solids strength as function of crack dimension
23 p4236 A69-42530

Time domain expression derived for frequency varying nonperiodic square wave in FDM and FM systems, using orthogonal functions to obtain frequency spectrum
24 p4281 A69-42623

Ni-Nb alloys precipitates tetragonal structure as function of time and temperature using electron and X ray diffraction
24 p4331 A69-42903

Automatic system failure sequence statistical analysis, considering randomly time variable external effects
24 p4289 A69-42953

Transient sources of cosmic rays, discussing possible time variable intensity and momentum spectrum of Galaxy
24 p4367 A69-43006

Creep buckling time of simply supported column under nonuniform temperature distribution over cross sections
24 p4400 A69-43053

Mean absolute relative humidity variations above earth surface over various time intervals during cloudless nights, obtaining spatial humidity differences and corresponding extinction coefficients
24 p4346 A69-43158

Cosmic ray electron energy spectrum and intensity measurements indicating time variations attributed to solar modulation effects
24 p4367 A69-43175

Iterative weighted least squares method for reconstructing time history of coupled rotation and flexural oscillations of Radio Astronomy Explorer satellite
24 p4394 A69-43291

Stability of linear systems with convolution operator in forward loop and time-varying gain in feedback loop analyzed for frequency- and time- domain conditions
24 p4295 A69-43316

Physical and physiological factors involved in determining aircraft passengers time of safe unconsciousness permissible after cabin decompression
24 p4278 A69-43398

Time-variable pulsed transverse magnetic field used to cut off tails of plasmoids ejected from conical Plexiglas plasma gun into curvilinear magnetic field
24 p4358 A69-43476

Numerical solutions for time dependent boundary value problems governed by heat equation applied to transient heat conduction in irregularly shaped two dimensional regions
24 p4410 A69-43521

Time structure of solar X ray bursts from OSO 3 satellite observations showing impulsive and gradual components
24 p4371 A69-43610

Pulsating mechanisms in alternative gas and liquid blocks two phase flow, using stochastic process specified by dynamic pressure time dependent fluctuations
24 p4305 A69-43633

Thermal turbulence effects on phase fluctuations of laser beams, studying temporal decay of mean square refractive index fluctuation with fringe pattern displacements
24 p4329 A69-43754

Quasars time dependent flux density variations at 6.6 cm, noting spectrum peaks tendency toward lower frequencies with time
24 p4389 A69-43772

Isotopic exchange reaction rate between O 18 and CO in shock tube coupled to time of flight spectrometer, noting rate increase with time
24 p4353 A69-43807

Many body perturbation theory with time dependent perturbations applied to frequency dependent polarizability of atomic oxygen
24 p4354 A69-43816

TIME DISCRIMINATION

First and second passage times of stationary random process consisting of sinusoidal signal with stationary Gaussian noise
04 p0561 A69-15453

Auditory temporal masking of tonal signal by narrow band noise and perception of temporal order noting effects of intensity, frequency and time
11 p1830 A69-24795

Temporal discrimination based on signal fluctuations emphasizing signal detection in presence of noise
19 p3373 A69-36057

QRS complex detection time error in noisy electrocardiograms
21 p3667 A69-39442

TIME DIVISION MULTIPLEXING

Pulse code modulation (PCM)/time multiplex system commanding by switching, discussing SNR measurement
01 p0031 A69-10739

Time division multiple access system for INTELSAT satellite, analyzing burst preamble and selection of frame period
03 p0388 A69-13179

Sampled data delay-lock loop for synchronizing pulsed envelope RF signals, using digital circuitry
03 p0390 A69-13216

Correlation coefficient between frequency diversified signals amplitudes estimated by approximation for two beam short wave radio channels
04 p0560 A69-15401

Time division multiple access satellite communication system employing pulse code modulation of voice channels and phase shift keying of RF carrier
07 p1077 A69-18759

Signal multiplexing within linear algebra framework permitting use of orthonormality in receiver construction without orthonormal functions generation in multiplexer
07 p1078 A69-18830

Time division telemetry technique resolving data and control flow to and from remote locations (tactical aircraft), noting application to environmental pollution control
07 p1081 A69-19100

OMEGA 4 100-k Hz ground station telemetry system for acquiring and processing outputs up to 23 FM and two TDM signals applied simultaneously from instrumentation recorder
07 p1105 A69-19103

Multiple access techniques in civil satellite communications systems, noting proposed digital time and frequency division methods
08 p1272 A69-19959

Communication satellite frequency and time divisions multiple access problem, detailing microwave multiplexers design
14 p2417 A69-29688

Satellite system TDM techniques and prototype equipment capable of combining 12 unrelated start-stop and synchronous telegraph channels
17 p2920 A69-33420

Jumbo jet audio entertainment and service systems, describing digital pulse multiplexing technique
19 p3285 A69-35806

Time division multiplexing of asynchronous digital signals from independent sources in continuous or bit stuffing mode, evaluating reliability and efficiencies
20 p3493 A69-37715

TDMA/PCM system for communication tests via Applications Technology Satellites, discussing time synchronization and bit and frame coherency
23 p4129 A69-42510

Multichannel time division multiple access system for communication satellite networks, considering PSK modems, PCM codes and channel capacity
23 p4129 A69-42511

Multiple access discrete address system (MADA) for digital modulation communication systems for satellite networks, using time division techniques
23 p4130 A69-42512

TIME FUNCTIONS

Optimal control of open loop aperiodically modulated discrete time systems, discussing solution of associated two point boundary problem
02 p0226 A69-12732

Time dependent functions integration by glow discharge tube and oscillator, discussing device for voltage measurement and applications in meteorology and geophysics
02 p0251 A69-12773

Spectrum analysis of pulse signals by point to point measurements of magnitude and phase of pulse-like time functions, using narrow band filter output
03 p0399 A69-13939

Modified versions of standard definitions of finite time stability, presenting converse theorems for necessary and sufficient conditions
04 p0624 A69-15005

Real shape of time correlation function computed from partially averaged data
05 p0786 A69-15924

Discrete time positive real functions defined for analyzing system stability with memoryless feedback
05 p0739 A69-16349

Stability of time varying systems by construction of multipliers with prescribed phase characteristics
05 p0740 A69-16598

Existence of cosmic time functions based on stable causality condition /absence of closed timelike or null curves in Lorentz metric/
06 p0957 A69-17471

High latitude transition or scintillation boundary between high and low amplitude fluctuations of satellite radio beacon signals examined as function of time
07 p1125 A69-18846

Time derivatives of Boltzmann H function with respect to dilute gas
07 p1121 A69-19407

Nonautonomous linear systems stability, with coefficient varying with bounded time function and bounded derivative
08 p1296 A69-19922

Flow analysis in magnetic annular shock tube in magnetic field varying with time
08 p1366 A69-20787

Von Karman flow changes due to unsteady heat transfer from rotating disks impulsively changing temperatures, particularly steady state and response time
08 p1422 A69-20996

Electronic optical system to process time-varying signals as optical spectrum analyzer for measuring power spectral density of input time function
08 p1317 A69-21086

Transient analysis for uniform RC structures using impulse excitations in open and short circuit configurations
09 p1471 A69-21328

Space-time variations for approximating sporadic E layer critical frequencies of geographic and time distribution curves
09 p1486 A69-21547

Optimal controls for linear systems with matrix elements and vector components discrete functions of time
09 p1473 A69-21787

Reliability characteristics of service life determination, noting exponential distribution of failure time value
10 p1662 A69-23319
